#### Dear Bidder:

Welcome to the Official U.S. Coin Auction of the Central States Numismatic Society's 72nd Anniversary Convention! Heritage is proud to continue its history-making tradition of presenting auctions at the CSNS Annual Convention with this year's important offerings. More than 300 consignors have contributed over 3,500 lots to be offered on the auction floor, and the best of the best are collected in our separate Platinum Night catalog.

As with our other auctions, this event has a number of important Featured Collections. I'd like to begin the list with a message from Allen Mincho, our Director of Currency Auctions, about the collection of Dusty Gibson.

## The Dustinn (Dusty) Lee Gibson Collection

We are pleased to present in this sale selections from the collection of our long time friend Dustinn Gibson. "Dusty," as everyone who knew him referred to him, was a familiar sight at coin and currency shows as varied as ANA, Long Beach and Memphis. Dusty began his collecting hobby when his grandmother gave him a group of U.S. coins when Dusty was in high school. Intrigued by the coins, Dusty was hooked at once, starting a fifty plus year romance with the study of coins and currency.

While Dusty began with coins, his real affection was for paper money, particularly the currency of his native state of Oregon. He began collecting Oregon National Bank Notes in the late 1960's, mentored by fellow collectors Jim Gates and Richard Dreger, as the trio engaged in a spirited competition to discover and own the great Oregon Nationals that became available in the sixties and seventies. We at Heritage were privileged to have the opportunity to offer Dusty's large size Oregon holdings in January of 2004, and we will be offering Dusty's set of small size Oregon National Bank Notes, the most complete ever assembled, along with his other currency, in our late April Central States Numismatic Society currency sale.

Dusty's coins reflect his wide ranging interests, from early large cents and key date quarters to a high relief Saint. He was known for his keen eye and was perfectly happy buying multiples of the same item when the opportunity arose, correctly realizing even in the early days that coins such as 1916 Standing Liberty quarters would not be available at then current price levels forever.

Dusty was a life-long bachelor and a doting uncle, living his entire life in the Siletz River Valley near the central Oregon coast. He worked at the Toledo Paper Mill until his retirement after 36 years on the job, a retirement that allowed him to attend even more coin and currency shows. He died in a tragic accident while on a hunting trip in October of 2009. Dusty was a gentleman among collectors, fair, easy to deal with, and a man of his word. He is missed by his many friends in the numismatic world, but his collecting accomplishments will live on in the pages of these catalogues. – Allen Mincho

## The Peter Kevorkian Collection

This small but impressive selection focuses on high-end coinage of the 19th and early 20th centuries. Almost half the pieces in the collection are in Platinum Night, including such highlights as an 1869 Seated half dollar graded PR66 Cameo by PCGS with CAC sticker.

## The Dr. Donald M. Gilner Collection

Dr. Donald M. Gilner served two years in active duty with the United States Air Force and 20 years more on active reserve, retiring as Colonel. He was inspired to military service by the experience of his family; his father had fled the rising tide of anti-Semitism in Poland after World War I as a teenager, and his mother was born in the United States to parents who had also left Poland under similar circumstances. As a medical doctor, he received certification from the American Board of Member Specialties in the fields of Pediatrics and Allergy and Immunology. Following his retirement from medical practice in 2001, the Legion of Merit honoree spent seven years doing pro bono work at Fort McPherson in Georgia.

A long-term numismatist and Life Member of the ANA, Dr. Gilner worked with Bill Fivaz and others to build an eclectic collection of mostly nickel, silver, and gold coinage, and his early embrace of certification services explains the preponderance of early holders among his lots. Highlights include an 1853-D half eagle graded AU53 by PCGS in the green label era, and a 1915-S Panama-Pacific half dollar graded MS66 by NGC that is also in a prior-generation holder.

# The Paul Taylor Collection

Six years after Heritage offered two of his famous PCGS Registry Sets, Paul Taylor returns with an impressive collection of Peace dollars, highlighted by his 1927-D, formerly of the Jack Lee Collection and graded MS66 by PCGS with CAC sticker.

Mr. Taylor started collecting coins as a teenager in the late 1950s and early 1960s. After selling his collection to buy his first car, he pursued other hobbies. When he returned to coins in 1996, he tackled Registry collecting with gusto, assembling remarkable sets of Peace dollars, proof Barber halves, and two gold type sets in the categories of Circulation Strikes and 20th Century Proofs. Paul Taylor coins are not merely high-technical-grade pieces, either, but examples with genuine aesthetic appeal that must be seen to be appreciated.

# The Slotkin Family Trust Collection

The Slotkin Family Trust Collection is comprised of award-winning NGC Registry Sets. Our consignor opted for the NGC Registry because it allowed him to collect the best example of any given issue regardless of whether NGC or PCGS had certified it. Heritage is proud to offer, in whole or in part, the following highly rated Slotkin Family Trust Registry Sets:

Proof Shield Nickels, #1
Proof Liberty Nickels, #1
Proof Buffalo Nickels, #2
Proof Seated Liberty Quarters, #1
Proof Barber Quarters, #2
Proof Seated Liberty Half Dollars, #1
Proof Barber Half Dollars, #2
Proof Trade Dollars, #1
Proof Morgan Dollars, #5
Proof Gold Type Set, #1

The Slotkin Family Trust Collection has been built by choosing the best of the best from auctions nationwide over more than a decade, and several of the sets have been award-winners for years; the Proof Shield Nickels and Proof Liberty Nickels, for example, have kept their respective categories' awards on lockdown since 2003, an amazingly dominant stretch. With little room to improve most of the sets, the time came to sell them, and our offering of the Slotkin Family Trust Collection will allow several new collections to ascend to the top spots in their categories — bolstered, no doubt, by selections from this auction.

## The Summitt Collection

The Summitt Collection includes nearly 100 Morgan dollars covering a wide variety of grade levels. A number of Mint State pieces are available, as are attractive midrange key dates such as the 1893-S dollar, which rates VF35 PCGS. Look for Summitt Collection pieces both in our main catalog and among the Non-Floor Session lots.

## The Orchid Collection

An eclectic and intriguing grouping that runs across nearly the entire history of U.S. Mint issues. One of the earliest pieces, a Choice XF 1795 Flowing Hair, Three Leaves dollar, highlights a sequence of four Platinum Night entries that also includes an 1882 gold dollar in PR66 Cameo, an 1855-D quarter eagle in AU53, and an 1856-O half eagle in MS61.

## The Michael A. Tongg Collection

Michael A. Tongg was a remarkably well-rounded individual whose various passions were tied to family and Hawaiian history. By trade, the lifelong Oahu resident was an attorney specializing in family law, but he took that mission beyond simply being an attorney. He also lectured on being a child advocate, and with Janice, his wife of 33 years, he provided a loving Christian household to more than 50 teenagers in the foster care system. Michael and Janice also raised four children of their own, and Michael lived to see one of his four grandchildren.

Michael was also an enthusiastic outrigger canoeist. On a double-hull canoe named Hokule'a, he sailed from Hawaii and crossed Polynesian waters to reach places such as Tahiti, Samoa, New Zealand, Rapa Nui, and the Cook Islands, all without the aid of modern navigational equipment. He also traveled more traditionally around the world as a promoter, teacher, and coach of outrigger canoe paddling. As a collector, he had wide interests but a particular enthusiasm for Hawaiiana. Where this intersected with his coin collecting, the results were spectacular; our Platinum Night session will offer his 1881 Hawaii five cents and 1883 Hawaii eighth dollar patterns, two sublime rarities which will make specialists take notice.

## The B & D Collection

The B & D Collection was assembled over a span of about nine years by a dedicated numismatist. Anchoring the collection are several widely recognized rarities from the 1895 – 1915 period, including an 1895 Morgan dollar in PR66, three pieces of matte proof gold, and round and octagonal versions of the 1915-S Panama-Pacific fifty dollar commemorative.

We hope you enjoy the selections on offer and would like to add some of them to your collection. As always, we offer a variety of bidding methods. You can send Internet, e-mail, fax, and mail bids before the auction. During the auction, we can take your bids over the telephone or through our innovative proprietary online bidding platform, Heritage Live!<sup>TM</sup> If you have the opportunity to travel to the convention, we would love to see you there.

Sincerely,

Greg Rohan President Todd Imhof

## **EARLY PROOF SETS**

1888 Seven Piece Proof Set Cent to Silver Dollar, Well Matched Toning

3001 1888 Cent PR66 ★ Red and Brown NGC. This coin and the following six lots constitute a well matched seven piece 1888 proof set. A substantial mintage of 4,582 proof Indian cents was accomplished in 1888, and this amazing specimen is one of the finest survivors. This high-end Premium Gem proof has rich reddish-orange mint color, slightly subdued over time, with sharp details and exceptional contrast. NGC Census: 1 in PR66★ Red and Brown, none finer (2/11). (#2352)

3002 1888 Three Cent Nickel PR65 NGC. Part of a seven piece 1888 proof set. The 1888 three cent nickel enjoyed a large proof mintage of 4,582 pieces, and high quality specimens are reasonably available in today's market. Splashes of pale gold toning appear over the light gray surfaces of this attractive Gem proof, and all design elements are boldly detailed. (#3785)

3003 1888 Nickel PR63 NGC. Part of a seven piece 1888 proof set. The 1888 proof Liberty Head nickel claims a sizeable mintage of 4,582 pieces. Walter Breen notes most examples seen have dull mint luster, possibly due to some trace element in the nickel stock. Sharp design details confirm the proof status of this piece. The obverse has light gold and violet toning with a few dark flecks, while the reverse displays rainbow patina. (#3886)

3004 1888 Dime PR66 NGC. Part of a seven piece 1888 proof set. Only 832 proof Seated Liberty dimes were struck in 1888. This spectacular Premium Gem proof displays outstanding iridescent toning and impressive design definition. A splash of light silver brilliance is evident on the obverse. NGC Census: 23 in PR66, 7 finer (2/11). (#4785)

3005 1888 Quarter PR64 NGC. Part of a seven piece 1888 proof set. The obverse of this attractive Choice proof has a circle of light silver brilliance with surrounding violet and sea-green toning. The reverse is similar but slightly darker. All devices are sharply detailed. Only 832 Seated Liberty quarters were minted in 1888. Census: 64 in 64, 53 finer (2/11). (#5589)

3006 1888 Half Dollar PR66 NGC. Part of a seven piece 1888 proof set. A delightful Premium Gem, this piece has light contrast with considerable brilliant silver on the obverse, accented by rainbow toning. The reverse has violet and sea-green around central brilliance. Razor-sharp definition is apparent on all design elements. A nominal mintage of 832 proof Seated Liberty half dollars was achieved in 1888, and examples in Premium Gem condition are quite rare. Census: 12 in 66, 5 finer (2/11). (#6449)

- 3007 1888 Morgan Dollar PR64 NGC. Part of a seven piece 1888 proof set. This exceptional Choice proof displays full cameo contrast beneath the toning, although not designated as a Cameo by NGC. This piece is deeply toned with sea-green and gold on each side, the reverse with additional violet and light silver brilliance. For some unknown reason, the Mint struck 833 proof Morgan dollars in 1888, one more than the other silver denominations. Census: 47 in 64, 38 finer (2/11). (#7323)
- 3008 1898 Five-Piece Proof Set PCGS, CAC. All in green label holders with CAC sticker. Set includes: cent PR63 Red and Brown, copper-gold, orange, and violet; nickel PR62, strong green-gold toning; dime PR61 (CAC Gold Label), strongly mirrored with peripheral champagne and blue; quarter PR62, hazy blue, gold, and cloud-white peripheral toning and significant contrast; and a half dollar PR60, significantly hairlined but with prominent contrast. (Total: 5 coins)

#### SHIELD NICKELS

- 3009 1866 Rays MS65 PCGS. A gorgeous Gem example from America's first circulating copper-nickel five cent issue, impressively lustrous with rich honey-gold and cream-gray toning. PCGS has graded just 27 finer examples (3/11).
  - Ex: FUN Signature (Heritage, 1/2009), lot 697, which realized \$1,955.(#3790)
- 3010 1866 Rays MS65 NGC. Gold-to-orange patina covers warmly lustrous surfaces. This first-year With Rays Shield nickel shows extensive peripheral die cracks, a testament to the troubles the Mint had dealing with a metal colloquially known as the "Devil's copper."(#3790)
- 3011 1866 Rays MS65 PCGS. CAC. Light gold-to-peach patina covers much of this satiny first-year five cent nickel Gem. On the reverse, the bottom stars are better-defined than those on top. PCGS has graded 27 numerically finer pieces (3/11).(#3790)

## 1871 Shield Nickel, MS66 Tied for Finest Certified

3012 1871 MS66 NGC. The 1871 Shield nickel is an important condition rarity in the series that seldom receives its due. This Premium Gem is tied with only a few other coins for the finest certified example. Both sides exhibit delicate champagne toning over brilliant nickel-gray luster with a bold strike and satin surfaces. Census: 6 in 66, 0 finer (2/11). (#3798)

- 3013 1872 MS65 PCGS. An exemplary nickel, boldly defined with charming pastel sunset-gold toning. Satiny and pristine with exceptional eye appeal. Population: 34 in 65, 15 finer (3/11). Ex: Dallas Signature (Heritage, 11/2006), lot 309, which realized \$1,495.(#3799)
- 3014 1876 MS65 PCGS. Potent luster, a sharp strike, and a smooth appearance combine to confirm the Gem status of this Centennialyear Gem. Light rose, aqua, and cream-gray toning. The date is lightly repunched north. Population: 33 in 65, 8 finer (3/11). Ex: Central States Signature (Heritage, 5/2004), lot 6081, which realized \$1,121.25.(#3805)
- 3015 1879 AU58 PCGS. CAC. A scarce date in the Shield nickel series, the 1879 had a mintage of just 25,900 business strikes. This light gray example has a sharp strike with a few darker splashes. PCGS has certified six pieces at this grade, with 92 full Mint State examples (3/11). This would be a good beginning for a matched AU58 set of these coins.(#3808)

## 1880 Shield Nickel, XF40 Only 16,000 Business Strikes Produced

- **3016 1880 XF40 NGC.** With 16,000 business strikes and 3,955 proofs produced, it is much easier for the date collector to locate a proof than one of the rare business strikes of this date. The 1880 nickel is rare across the board with few pieces known in any grade, but the higher-graded examples cost multiples of an XF such as this one. So few 1880 nickels were struck it is believed that the same dies were used on business strikes and proofs. This pleasing, moderately circulated example was pulled out of circulation after several years. The surfaces are light gray overall with bright highlights over the devices. There are no obvious or detracting marks on either side. (#3810)
- **1882 MS66 PCGS.** The obverse is flashy with appreciable mirrors. The minimally toned reverse is also bright but with more swirling luster. A great Premium Gem from late in the Shield nickel series. Population: 66 in 66, 4 finer (3/11).(#3812)
- 3018 1882 MS66+ PCGS. CAC. This penultimate Shield nickel issue was clearly struck from late-state dies, so that the last digit in the date is a virtual blob, much of the motto IN GOD WE TRUST shows signs of die erosion, and spidery die cracks appear around the peripheries of both sides. The strike as produced by the dies is nonetheless excellent, as is the subsequent preservation of this splendid Premium Gem. Population: 1 in 66+, 4 finer (3/11). (#3812)

### 1883 Shield Nickel, MS67 Prominent Die Cracks

3019 1883 MS67 NGC. CAC. Many 1883 shield nickels were saved as the last year of issue, thereby accounting for the large number of extant Mint State examples. Specimens in the lofty grade of MS67 are infrequently encountered, however. Radiantly lustrous nickelwhite surfaces exhibit sharply struck design elements and have been well cared for. Heavy peripheral cracks are visible. Census: 16 in 67, 0 finer (3/11). (#3813)

3020 1883/2 XF45 NGC. FS-302. An underlying 2 is clearly visible slightly left of the 3, and a die break runs from the rim through the 3 and the ball of the shield. Both attributes are visible in the Cherrypickers' photo as well. Consistent nickel-gray patina encompasses both sides of this Choice XF piece.

## PROOF SHIELD NICKELS

#### First-Year 1866 Rays Shield Nickel, PR66

3021 1866 Rays PR66 PCGS. By far the more available of the two With Rays proof issues, as the 1867 Rays is a great rarity. This firstyear specimen boasts uniformly attractive nickel-gold surfaces with considerable cameo contrast, even though unnoted on the holder. Some fuzziness on the holder may obscure the lower part of the central 5 in the photo. Population: 39 in 66, 1 finer (3/11). (#3817)

3022 1867 No Rays PR65 PCGS. Reverse IIa. Second year of the issue and the first year this design was struck without the rays on the reverse. This moderately reflective coin has even golden toning over both sides. A distraction-free, solidly graded Gem example. Population: 33 in 65, 7 finer (3/11).(#3821)

## 1868 Shield Nickel, PR67 Cameo Seldom-Seen Date

3023 1868 PR67 Cameo NGC. The 1868 proof nickel is ranked as second scarcest in the series. Only 600 proofs were struck, and PR67 Cameo is the ultimate grade with two other pieces so graded but none finer (3/11). This is a lovely example that shows deeply mirrored fields, nicely contrasting frosted devices, and faint traces of blue and rose color on each side.

From The Slotkin Family Trust Collection. (#83822)

#### 1869 Shield Nickel, PR67 Tied for Finest Certified

3024 1869 PR67 NGC. The 1869 is a moderately scarce proof Shield nickel date with a mintage around 600 pieces. Even though the insert does not specify the coin is a Cameo, there is moderate contrast between the fields and devices on each side. The surfaces are mostly untoned with only faint specks of lint struck into the planchet, and visible only with magnification. The reverse stars lack absolute completeness of definition. Census: 4 in 67, 0 finer (3/11). From The Slotkin Family Trust Collection. (#3823)

3025 1869 PR65 Cameo PCGS. CAC. A few stars are lightly struck on the centers, but all other devices are sharply detailed and frosty. The fields are deeply mirrored, with a few hints of gold and green toning, and the field/device contrast is notable. Population: 16 in 65 Cameo, 9 finer (3/11).(#83823)

### 1870 Nickel, Cameo Superb Proof Tied for Finest Certified

3026 1870 PR67 Cameo NGC. Almost all proof 1870 Shield nickels show planchet problems. This piece has slight granularity that is faintly visible with magnification, but almost all trace has been polished away leaving deeply mirrored fields on each side. The devices are nicely frosted, presenting a noticeable Cameo effect on both obverse and reverse. Both sides are bright, nearly brilliant with just the faintest streaks of golden, again requiring a magnifier. Census: 2 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83824)

3027 1871 PR66 PCGS. CAC. From an estimated proof mintage of 960 pieces, this attractive Premium Gem displays mottled greenish-gold toning and razor-sharp devices. The fields are not deeply mirrored, but the surfaces show few signs of contact. Population: 25 in 66, 0 finer (3/11).(#3825)

## 1872 Shield Nickel, PR67 Cameo Deeply Reflective Fields

3028 1872 PR67 Cameo NGC. Very slight granularity of the surfaces is evident when the coin is closely examined, a trait that is usually much more pronounced on proofs of this date. The mintage of 950 proofs explains much of the availability of the 1872 in lower grades, but in PR67 and as a Cameo it is distinctly unavailable. A total of six pieces have been certified as such combining both of the major services, and none are finer (3/11). The surfaces are exceptionally bright and highly reflective with sharply contrasting frosted devices. As one would expect from a coin in this grade, there are no mentionable defects.

From The Slotkin Family Trust Collection. (#83826)

## 1873 Cameo PR67 Shield Nickel Nicely Reflective, Subtle Iridescence

3029 1873 Closed 3 PR67 Cameo NGC. This high-grade example was struck on a well-produced planchet that shows very little granularity. The mintage for the 1873 proof nickel is uncertain, but estimated widely between 1,100 and 1,650 pieces. All are of the Closed 3 variant. The deeply mirrored fields contrast nicely against the softly frosted devices, and each side shows just the slightest bit of iridescence over the otherwise brilliant finish. Census: 4 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83827)

3030 1874 PR66 PCGS. A well detailed Premium Gem, with a little softness evident on the stars, and light gold and lavender toning. Only 700 proof Shield nickels were struck in 1874, and Premium Gem examples are very scarce. Population: 36 in 66, 7 finer (3/11). (#3828)

## 1874 Shield Nickel, PR67 Cameo One of the Finest Certified

3031 1874 PR67 Cameo NGC. This bright and attractive coin retains excellent contrast between the frosted devices and heavily striated, mirrored fields. The surfaces show just the slightest trace of minute specks (a loupe is necessary, though). One of the finest examples to come down to collectors today from the original mintage of approximately 700 coins. Census: 2 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83828)

3032 1875 PR65 NGC. From an estimated mintage of 700 pieces, the 1875 proof Shield nickel is quite scarce at the Gem level. The present coin is an attractive Gem, with razor-sharp devices and light gold toning. The mirrored fields are just a little hazy. Census: 59 in 65, 24 finer (3/11).(#3829)

## Lightly Toned PR66 Cameo 1875 Shield Nickel

3033 1875 PR66 Cameo PCGS. A light but distinct coat of peach-gold patina graces this Premium Gem Cameo proof, the color stronger and richer over the reverse. The frost is perhaps a touch light on sharply impressed devices, yet the mirrors supply great contrast. Pleasingly preserved. Population: 6 in 66 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83829)

3034 1876 PR66 NGC. Attractive pale green and lavender toning adorns the surfaces of this impressive Premium Gem. The devices display pinpoint definition and the fields are brightly reflective. Census: 30 in 66, 4 finer (3/11).(#3830)

3035 1876 PR66 Cameo NGC. A brilliant and boldly struck Premium Gem that has outstanding white-on-black contrast. There is much leaf and shield detail, while on the reverse all star centrils are full. The surfaces are well preserved and distraction-free, even under a glass. A splendid addition to a cameo proof type set. NGC has certified only four numerically finer (3/11). Ex: ANA Signature (3/2003), lot 5355.(#83830)

#### 1876 Shield Nickel, PR67 Cameo

3036 1876 PR67 Cameo NGC. High-grade proof examples of this popular Centennial-year issue are always eagerly sought by collectors. This minimally toned Superb Gem proof has coruscating spot-free fields that provide a high degree of contrast against the frosty devices. The date and IN GOD WE TRUST are lightly strike-doubled. Census: 2 in 67 Cameo, 2 finer (3/11).

Ex: Long Beach Signature (Heritage, 2/2005), lot 5851, which realized \$8,050.

From The Slotkin Family Trust Collection. (#83830)

## 1877 Shield Nickel, Gem Cameo Proof Interesting Proof-Only Issue

3037 1877 PR65 Cameo NGC. CAC. The proof-only 1877 Shield nickels, produced to the extent of an estimated 500-plus coins, are not only coveted rarities in the series but interesting coins as well, with the 7s in the date of a similar (but smaller) style to the key 1877 Indian cents. This Gem Cameo example boasts considerable contrast over gold-gray surfaces. Census: 33 in 65 Cameo, 49 finer (3/11). (#83831)

## 1877 Cameo Shield Nickel, PR66+ All-Brilliant Surfaces, Deeply Reflective

3038 1877 PR66+ Cameo PCGS. CAC. The 1877 proof is not especially rare compared to other proofs in the series, but it is a proof-only issue and as such, date pressure is significant. Often 1877 proof nickels are found with only moderately reflective mirrors, some even so weak they have been called business strikes (no such pieces were actually produced, though). This piece has deeply mirrored fields and thickly frosted devices, yielding a strong two-toned cameo effect on each side. Both sides are brilliant, and there are no noticeable surface distractions. Population: 1 in 66+ Cameo, 5 finer (3/11). (#83831)

#### Gold-Accented 1878 Shield Nickel, PR66 Cameo

3039 1878 PR66 Cameo NGC. The second consecutive proof-only Shield nickel issue, the 1878 had a mintage that was likely fivefold that of the 1877. This Premium Gem is well-contrasted, with golden accents over nickel-gray surfaces. An especially nice and sharply struck survivor. Census: 10 in 66 Cameo, 4 finer (3/11). Ex: Long Beach Signature (Heritage, 6/2004), lot 5555; FUN Signature (Heritage, 1/2005), lot 5730. (#83832)

## Bold 1878 Shield Nickel, PR67 Cameo

3040 1878 PR67 Cameo NGC. A boldly impressed and pleasingly contrasted survivor of this popular proof-only issue — the second consecutive within the series — carefully preserved and delicately toned with periwinkle-blue outer shadings around pastel-yellow centers. This Superb Gem offers incredible eye appeal. Census: 4 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83832)

## PR67 Cameo 1879 Shield Nickel None Finer at NGC

3041 1879 PR67 Cameo NGC. This Superb Gem Cameo proof is an extremely appealing survivor from the large mintage of more than 3,000 coins. The rarity of business strikes of the issue makes the proofs that much more appealing. This piece has well-contrasted, deeply mirrored surfaces with thick device frost and little suggestion of color other than a hint of rose. Census: 8 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83833)

3042 1879/8 PR65 PCGS. CAC. Breen-2514. The exacting strike confirms status as a proof, although both sides are more satiny than reflective. Milky olive-gold toning evenly drapes the seamless surfaces. Encapsulated in an old green label holder. (#3834)

3043 1879/8 PR65 NGC. CAC. Breen-2514. Breen (1988) writes, "forms a small minority of proofs." Variegated dove-gray patina graces this fully struck Gem. The fields display cartwheel luster, as sometimes seen on nickel proofs of the era, particularly 1886 three cent nickels.(#3834)

- 3044 1879/8 PR67 PCGS. CAC. Breen-2514. Housed in a green label holder. Hints of golden toning are present throughout but deepen slightly at the borders. Lustrous and fully struck with a solitary tiny spot to the right of the cross.(#3834)
- 3045 1880 PR66 PCGS. CAC. Light golden toning overall with suggestions of blue-green. A well-preserved Premium Gem specimen of a proof issue frequently associated with its low-mintage business strike counterpart.(#3835)
- 3046 1880 PR67 Cameo NGC. Hints of champagne toning grace the surfaces of this Superb Gem Cameo proof. This piece is highly attractive and has few peers. Census: 20 in 67 Cameo, 0 finer (3/11).

  From The Slotkin Family Trust Collection. (#83835)
- 3047 1881 PR67 PCGS. CAC. Light golden overtones grace otherwise nickel-gray surfaces. An exquisitely detailed and carefully preserved Superb Gem specimen that offers delightful eye appeal. Population: 22 in 67, 0 finer (3/11).(#3836)
- 3048 1882 PR66+ NGC. CAC. A well struck stone-gray Shield nickel with completely unabraded and carbon-free surfaces. A small strike-through near the S in CENTS is the sole mint-made imperfection. Ideal for an advanced 19th century proof type set. (#3837)
- 3049 1882 PR67 Cameo NGC. A boldly defined Superb Gem Cameo proof, this 1882 nickel is destined for a high end date or type collection. Both sides have a trace of gold toning over the light gray surfaces with excellent contrast. Census: 22 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83837)
- 3050 1883 PR67 Cameo NGC. Starkly contrasted and practically an Ultra Cameo coin, especially on the obverse. Boldly mirrored fields show the faintest hint of aqua patina. Census: 13 in 67 Cameo, 0 finer (3/11).

  From The Slotkin Family Trust Collection. (#83838)

## LIBERTY NICKELS

- 3051 1885 AU55 PCGS. A lightly rubbed example of this popular key date, luminous through peach and sage patina. Abrasions are mostly minor, though a shallow pinscratch appears just off Liberty's chin.(#3846)
- 3052 1885 Improperly Cleaned NGC Details. Unc. Lustrous and virtually void of contact. The olive-green and chestnut-gold toning is consistent save for the infrequent tiny gray spot. The reverse displays nearly imperceptible hairlines. The strike is uncommonly sharp for this key business date.
- 3053 1885 MS61 NGC. Tan-gold, olive-green, and rose-gray enrich this gently shimmering and intricately struck key date nickel. The fields appear pristine, and the cheek displays only faded marks. (#3846)
- 3054 1888 MS65 NGC. More than 10 million 1888 nickels were minted but survivors are rarely seen in Gem or finer grades. This pleasing piece has frosty light gray surfaces with wispy toning and trivial marks. Census: 47 in 65, 12 finer (3/11).(#3849)

## Superb Gem 1889 Nickel Partial Golden Toning

- 3055 1889 MS67 NGC. Lemon-gold and ice-blue patina confirms the originality of this exquisite Superb Gem. The strike is intricate, even on the usually mushy left ear of corn. Luster blazes across immaculate surfaces. Among the finest known examples of this moderately better date. Census: 3 in 67, 0 finer (3/11). (#3850)
- 3056 1892 MS65 PCGS. CAC. Bold and swirling luster pierces a layer of iridescent patina keyed in gold and lilac-lavender. Better-defined than usually seen, a feature best observed on the lower wreath. PCGS has graded 15 numerically finer examples (3/11). (#3853)

### Richly Toned MS66 1893 Nickel

- 3057 1893 MS66 PCGS. CAC. Lovely rose-gold, blue-violet, and jade-green hues grace both sides of this breathtaking Premium Gem. The strike is solid but not full, well-defined on the hair curls and the star radials but showing the usual weakness on the pesky left ear of corn on the reverse. Satiny with a few small marks on the chin which contribute to the grade. Population: 14 in 66, 0 finer (3/11). (#3854)
- 3058 1894 MS66 NGC. Mint State 1894 nickels are scarce, and the higher levels thereof are rare. The lustrous surfaces of this Premium Gem display pastel gold-orange and powder-blue patina. Some localized strike weakness is noted, which is characteristic of this issue. Devoid of significant contacts or spots. Census: 21 in 66, 2 finer (3/11).(#3855)
- 3059 1899 MS66 PCGS. CAC. This olive-blue Premium Gem business strike should be high on some collectors' pickup lists, as a well-struck specimen, save for that pesky ear of corn, and even it is better-detailed than usual. Excellent eye appeal. Population: 53 in 66, 1 finer (3/11).(#3860)
- 3060 1902 MS66 PCGS. CAC. Though a handful of stars and one ear of corn show softness, this Premium Gem is better-defined than usually seen. Peach-orange toning prevails over all but the centers, which are generally nickel-white. Population: 49 in 66, 4 finer (3/11).(#3863)
- 3061 1905 MS66 PCGS. This spectacular Premium Gem is sharply detailed in all areas, except for a little softness on the lower right obverse stars. The virtually pristine fields display an attractive light gold patina, with vibrant mint luster. Population: 68 in 66, 0 finer (3/11).(#3866)
- 3062 1905 MS66 PCGS. Though bluntly struck on stars and lower wreath, this Premium Gem has well-preserved surfaces. Green-gold, rose, and steel-gray mingle on each side. Population: 68 in 66, 0 finer (3/11).(#3866)

- 3063 1905 MS66 PCGS. Variegated pale-blue and gold toning visits the obverse, while the reverse is golden-tan. The stars surrounding Liberty's portrait vary in striking quality, but Liberty herself is well-detailed. Only a few trivial marks preclude an even finer designation. Population: 68 in 66, 0 finer (3/11).(#3866)
- 3064 1908 MS65 PCGS. The 1908 Liberty Head nickel was produced in large numbers, but well struck Gem survivors are scarce. This specimen is an attractive Gem, with just a touch of softness on the stars, bright mint luster, and traces of light gold toning. Population: 69 in 65, 14 finer (3/11).(#3869)
- 3065 1912 MS66 PCGS. A sensational Premium Gem, this 1912 represents the last collectible year of the Liberty Head design. Both sides have light gold toning with bold design motifs. Even the ear of corn left of the ribbon bow shows definition. Population: 25 in 66, 0 finer (3/11).(#3873)
- 3066 1912-S Cleaned ANACS. MS60 Details. This low-mintage branch mint nickel is toned tan-gray, which helps to mask the wispy hairlines that cross both sides. Well struck for this scarce issue, and void of noticeable marks. (#3875)

#### Border-Toned 1912-S Nickel, MS64+

3067 1912-S MS64+ PCGS. CAC. While the interiors are close to nickel-cream on this key-date S-mint Liberty nickel, the margins have distinct canary-yellow and gold-orange colors. Well-defined by the standards of the issue with only localized softness. Marks are few, though when they appear on the portrait they are just a little too deep for a Gem designation. (#3875)

## PROOF LIBERTY NICKELS

1883 No Cents Nickel, PR67 High-Demand, Low-Supply One-Year Design

- 3068 1883 No Cents PR67 NGC. This one-off proof issue has become immensely popular with type and date collectors alike, and demand for the highest-graded examples, Superb Gems such as the present piece, far outstrips supply. This specimen sports pale blue and peach toning, the latter color appearing mostly on the reverse. A tiny contact mark is noted within the wreath. Census: 17 in 67, 0 finer (2/11). (#3878)
- 3069 1883 No Cents PR66 Cameo PCGS. A flashy two-toned representative that shifts from green to gold in a short space. Distinctly contrasted and pleasingly preserved, a great example of a one-year proof type. Population: 55 in 66 Cameo, 11 finer (3/11). (#83878)

## Thickly Frosted 1883 Nickel No Cents, PR67 Cameo

- 3070 1883 No Cents PR67 Cameo PCGS. The 1883 No Cents nickel was widely saved at the time of issue and is a common coin even today. However, the proofs of the issue are no more available (and considerably less so than other dates), with considerable demand from proof type collectors. This piece shows just the faintest accent of rose and lilac toning over each side, and the fields are deeply mirrored with thick mint frost over the devices. A Superb Gem example of this popular proof issue and unexcelled in numeric grade at either service. Population: 11 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83878)
- 3071 1883 With Cents PR66 Cameo PCGS. CAC. The second version of the Liberty nickel had the word CENTS added to the reverse, avoiding confusion about the denomination. This lovely Premium Gem Cameo proof exhibits delicate gold toning over the frosty devices and mirrored fields. Population: 25 in 66 Cameo, 1 finer (3/11).(#83881)
- 3072 1883 With Cents PR66 Cameo NGC. The upper obverse and lower reverse have elements of gold-to-orange color, while the rest of each side is largely untoned. A pleasingly contrasted Premium Gem specimen from the With Cents type, last of three for the year. Census: 30 in 66 Cameo, 2 finer (3/11).(#83881)
- 3073 1884 PR66 Cameo NGC. CAC. Razor-sharp frosty devices provide impressive contrast with the mirrored fields on this Premium Gem Cameo proof. The surfaces are enhanced by attractive light green and lavender toning. Census: 28 in 66 Cameo, 17 finer (3/11).(#83882)

#### Untoned PR68 Cameo 1884 Nickel

- 3074 1884 PR68 Cameo NGC. This is a marvelous and engaging Superb Gem Cameo proof from the original production of a recorded 3,942 coins. Thickly frosted devices seem to float in watery fields, and there is little trace of patina and a strike that is full or nearly so. Census: 3 in 68 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83882)
- 3075 1885 PR66 NGC. Prominent reflectivity defines the eye appeal, though green-gold toning (joined by peach and pale blue on the reverse) also plays a key role. Decisively detailed and a great specimen of this popular proof issue.

  From The Dr. Donald M. Gilner Collection. (#3883)

#### Superb Gem Proof 1885 Liberty Nickel

3076 1885 PR67 NGC. The 1885 proof Liberty Head nickel claims a fairly generous mintage of 3,790 pieces, but pressure from date-set collectors is always high because the business-strikes are so elusive. The present coin is a sharply detailed Superb Gem, with bands of lime-green and lavender toning, and bright proof surfaces. Census: 15 in 67, 3 finer (3/11). (#3883)

3077 1885 PR66 Cameo PCGS. Delicate sea-green and champagne shadings wash over each side. Strongly contrasted through the patina and a thoroughly appealing example of this popular proof issue. Population: 39 in 66 Cameo, 6 finer (3/11). (#83883)

## Popular 1885 Liberty Nickel, PR67 Cameo

3078 1885 PR67 Cameo PCGS. This Superb Gem Cameo example is deeply mirrored, with sharply contrasting white devices. The 1885 is a popular issue in proof format because of the extreme scarcity of Uncirculated 1885 nickels, the key date in the series. The fields show a few tiny lint marks, as made, but they are visible only with magnification. Population: 6 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83883)

## 1886 Liberty Nickel, PR67 In-Demand Proof Date

3079 1886 PR67 PCGS. CAC. The low mintage and low availability of business strikes of this date adds date pressure to 1886 proof nickels that is out of line with a coin that saw 4,290 pieces struck. This is a shallowly mirrored example that shows pinpoint striking details and light, ice-blue surfaces overall. Free from any distracting contact marks. Population: 17 in 67, 0 finer (3/11). (#3884)

## Semikey 1886 Liberty Nickel, PR67 Cameo None Numerically Finer at Either Service

3080 1886 PR67 Cameo NGC. The second rare issue in the Liberty nickel series, the 1886 must be regarded as a semikey compared to the key status of the preceding year's 1885. The mintage comparisons, of course, are much more stark for business strikes than proofs — 1.5 million and 3.3 million versus 3,790 and 4,290 for the 1885 and 1886, respectively. This silver-white piece displays light rose and gold accents on each side, with engaging contrast between the fields and devices. The strike is full throughout, but we note a single dark fleck on the cheek. Census: 5 in 67 Cameo, 1 in 67 ★ Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83884)

#### Satiny Cameo PR67 1887 Nickel

3081 1887 PR67 Cameo NGC. This fully struck Superb Gem exhibits only delicate lime-green and chestnut obverse toning, but the reverse shows vibrant rose-red, sun-gold, and powder-blue patina. A flashy and essentially pristine representative of the popular Barber type. Census: 3 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83885)

3082 1888 PR66 NGC. A richly toned representative with gold-orange patina over most of each side and additional turquoise elements on the reverse. This Premium Gem is housed in a prior-generation holder.

From The Dr. Donald M. Gilner Collection. (#3886)

## Toned Superb Gem 1888 Liberty Nickel

3083 1888 PR67 NGC. This lovely Superb Gem Liberty nickel is a feast for the eyes, combining olive-blue and gold in equal measure on each side, with boldly struck and essentially pristine surfaces. The proof mintage was a large 4,582 pieces, but this is among the numerically finest survivors at either service. Census: 14 in 67, 0 finer (3/11). From The Slotkin Family Trust Collection. (#3886)

#### Incredibly Toned 1889 Nickel, PR67

- 3084 1889 PR67 NGC. This Superb Gem proof sports incredible toning in shades of sunset-gold, jade, and violet on the obverse, while the reverse is almost entirely golden-orange with a thin crescent of sky-blue, a visual feast for collectors of colored coins. The strike is nearly full. Census: 14 in 67, 0 finer (3/11). From The Slotkin Family Trust Collection. (#3887)
- 3085 1890 PR65 Cameo PCGS. A sensational Gem Cameo proof, this Liberty nickel is fully brilliant with excellent field to device contrast. Both sides are boldly defined. Population: 22 in 65 Cameo, 6 finer (3/11).(#83888)
- 3086 1890 PR66 Cameo NGC. CAC. The deeply mirrored fields of this rare Premium Gem set off the fully detailed frosty devices in a display of impressive cameo contrast. From a mintage of 2,740 pieces, the 1890 proof Liberty Head nickel is seldom encountered with this degree of field/device contrast. Census: 18 in 66 Cameo, 2 finer (3/11).(#83888)

## Cameo Superb Gem Proof 1890 Liberty Nickel Tied for Finest Cameo Certified

- 3087 1890 PR67 Cameo NGC. Among 1890 proof Liberty Head nickels with the Cameo designation, this piece is tied with one other specimen for finest certified honors (3/11). The design elements are fully detailed, with richly frosted texture, providing dramatic cameo contrast with the deeply reflective fields. The surfaces are brilliant, with extraordinary eye appeal. From The Slotkin Family Trust Collection. (#83888)
- 3088 1891 PR66 Cameo NGC. This bright Premium Gem has a full strike on the left ear of corn and on Liberty's frosted hair, and only the two uppermost stars are not completely brought up by the dies. Delicate lime-green patina graces the reflective fields. Census: 25 in 66 Cameo, 3 finer (3/11).(#83889)

## Marvelously Contrasted 1891 Nickel Gem Deep Cameo Proof

3089 1891 PR65 Deep Cameo PCGS. CAC. Grand cameo contrast is the hallmark of this gleaming ice-white Gem Deep Cameo piece, one of the most attractive survivors of the proof Liberty nickel issue for 1891. For those who prefer untoned coins, this piece fills the bill marvelously, with a stunning silver-on-black appearance. For a proof, however, the strike is rather blunt on the peripheral stars and lower wreath details, but they detract little from the enormous deep cameo appeal. (#93889)

## 1891 Liberty Nickel, PR67 Ultra Cameo A Contrast Rarity

- 3090 1891 PR67 Ultra Cameo NGC. The icy-white devices have outstanding contrast with the deeply reflective fields. Brilliant aside from a solitary tiny spot on the left side of Liberty's neck. This piece is tied with two others for the finest of just nine NGC certified Ultra Cameo pieces from a total NGC census of 428 proofs (3/11). Although proofs are always available (aside from the 1913, of course), building an Ultra Cameo set poses an impossible challenge, as several issues have never been assigned that designation. From The Slotkin Family Trust Collection. (#93889)
- 3091 1892 PR66 Cameo NGC. CAC. Colorful, yet sharply contrasted. Green-gold toning covers most of the obverse with a small wedge of lavender-blue at the top left, while the reverse has almost the exact inverse toning scheme. Census: 22 in 66 Cameo, 9 finer (3/11). (#83890)
- 3092 1892 PR67 Cameo NGC. Wispy champagne toning is evident on both sides of this amazing piece. The fields are fully mirrored and serve as a lovely backdrop for the sharply defined and lustrous devices. Census: 9 in 67 Cameo, 0 finer (3/11).

  From The Slotkin Family Trust Collection. (#83890)
- 3093 PR66 Cameo NGC. The frosty texture of the fully struck design elements creates profound cameo contrast with the deeply mirrored fields of this spectacular Premium Gem. The surfaces are visited by streaky greenish-gold toning. Census: 24 in 66 Cameo, 6 finer (3/11).(#83891)

#### Lightly Toned 1893 Liberty Nickel, PR67 Cameo

3094 1893 PR67 Cameo PCGS. The obverse displays a hint of goldenpink toning over sharply contrasted surfaces, while the reverse deepens into full-blown rose-gold toning along a portion of the rim, and lighter shades through the center. A fully struck and pleasing Superb Gem. Population: 8 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83891)

3095 1894 PR66 Cameo NGC. CAC. A key date in the Liberty nickel series, the 1894 is in high demand in business strike and proof formats alike. This piece is brilliant and attractive with satiny devices over fully mirrored fields. Census: 9 in 66 Cameo, 3 finer (3/11).(#83892)

#### Better-Date 1894 Nickel, PR67 Cameo

3096 1894 PR67 Cameo PCGS. Some light toning bands of pale pinkish-gold on the obverse fail to impede the considerable cameo contrast on this estimable Superb Gem, from a proof mintage of 2,632 pieces. The 1894 Liberty nickel is a slightly better date, although the effect on proofs is probably minor. This piece is well but incompletely struck, with some minor lumpiness in the central obverse from the planchet, as made. From The Slotkin Family Trust Collection. (#83892)

3097 1895 PR66 NGC. Excellent mirrors with a modicum of contrast through layered green-to-gold patina. An impressively preserved and high-end specimen. Census: 33 in 66, 3 finer (3/11). (#3893)

## 1895 Liberty Head Nickel, PR67 Only One Example Finer at NGC

3098 1895 PR67 NGC. The 1895 proof Liberty Head nickel was a well produced issue, from a mintage of 2,062 pieces. Examples are scarce in today's market, but some exceptional specimens, like the present coin, have survived. This remarkable Superb Gem displays light green and lavender toning on the pristine surfaces, along with mirrored fields and razor-sharp devices. Census: 3 in 67, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#3893)

## 1896 Liberty Head Nickel, PR67 None Finer at NGC

3099 1896 PR67 NGC. Some 1896 proof Liberty Head nickels have flat star centers, due to heavy polishing of one of the dies. This spectacular Superb gem is definitely from another die, as all design elements are sharply defined. The brightly reflective fields show traces of green and lavender toning, with outstanding eye appeal. From a small mintage of 1,862 pieces, the issue is scarce today in all grades, and very rare at the Superb Gem level. Census: 9 in 67, 0 finer (3/11). From The Slotkin Family Trust Collection. (#3894)

3100 1897 PR66 Cameo NGC. Sharply detailed and boldly mirrored with impressive contrast. The obverse has near-brilliant fields, while the reverse is richly toned blue and gold-green in a concentric pattern. A long lamination to the left of Liberty's nose does not influence the technical grade. Census: 17 in 66 Cameo, 10 finer (3/11).(#83895)

## 1898 Liberty Nickel, PR67 Exemplary Strike, Vivid Toning

3101 1898 PR67 NGC. Bands of gold, mauve, and powder-blue color provide exceptional eye appeal on this remarkable coin. The base of the 1 in the date is lightly recut. This magnificent Superb Gem has an unimprovable strike and seemingly pristine surfaces. An outstanding type coin from a small mintage of 1,795 pieces. Census: 7 in 67, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#3896)

3102 1898 PR66 Cameo NGC. CAC. Outstanding mirrors and contrast with just a hint of green-gold color. Crisply detailed, carefully preserved, and immensely appealing as such. Census: 14 in 66 Cameo, 1 finer (3/11).(#83896)

## 1899 Liberty Nickel, Superb Gem Proof Fully Struck

3103 1899 PR67 NGC. Shades of sky-blue, orange-yellow, and lilac nicely decorate this Superb Gem proof 1899 nickel, among the finest certified of the mintage of about 2,000 pieces. Moderate contrast also appears, even though unnoted on the holder. A few light flecks that appear under a loupe are undistracting, and the strike is full throughout. Census: 20 in 67, 1 in 67 ★, 0 finer (3/11). (#3897)

## 1899 Liberty Head Nickel, PR67 Cameo Elusive Date With Cameo Contrast

- 3104 1899 PR67 Cameo NGC. An occasional trace of tan color graces the meticulously struck surfaces of this undisturbed Superb Gem. Even the left ear of corn (located above the CE in CENTS) possesses sharp definition on the kernels. The white on black contrast is unmistakable, although Liberty's hair has greater frost than does the remainder of her portrait. The Cameo designation is elusive for 1899 proofs in all grades. The present specimen is the single finest certified by NGC, although the service has encapsulated 21 examples as PR67 without a Cameo designation. From The Slotkin Family Trust Collection. (#83897)
- 3105 1900 PR66 Cameo PCGS. CAC. Light blue-green patina covers much of this moderately contrasted example, while the reverse interior shows suggestions of peach. Pleasingly preserved with powerful mirrors. Population: 16 in 66 Cameo, 10 finer (3/11). (#83898)
- 3106 1900 PR67 Cameo NGC. An astounding example, this Superb Gem Cameo proof Liberty nickel is fully brilliant with a hint of gold on the rims. Both sides are highly contrasting, with frosty and boldly defined design motifs. Census: 6 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83898)

## 1901 Liberty Nickel, Superb Gem Proof Light Lilac Toning

3107 1901 PR67 PCGS. This nicely mirrored proof typifies why the 1901 is frequently used for type purposes. While there is virtually no contrast on either side, the surfaces appear nearly perfect in terms of preservation. Both obverse and reverse are well-balanced with subtle golden-lilac toning lightly draped over each side. (#3899)

# 1901 Liberty Nickel, PR68 ★ Full Details, Outstanding Visual Appeal

3108 1901 PR68 ★ NGC. The 1901 proof Liberty Head nickel is a scarce issue, but most examples seen are of high quality. The present coin is a case in point, with fully struck design elements and brightly mirrored fields, and no trace of toning or surface flaws. This example shows only a slight cameo effect, as the Mint used a low contrast finish in 1901. Census: 2 in 68 ★ , 0 finer (3/11). From The Slotkin Family Trust Collection. (#3899)

3109 1901 PR66 Cameo PCGS. CAC. Sharply struck with boldly mirrored fields and subtle gold-and-gray patina. The surfaces are impressively preserved and distinctly contrasted. Population: 11 in 66 Cameo, 6 finer (3/11).(#83899)

## White PR67 Cameo 1901 Nickel

- 3110 1901 PR67 Cameo PCGS. CAC. This fully struck Superb Gem proof has barely a wisp of golden patina. Post-strike contact and carbon appear absent, and the sole imperfection is a small and faint tornado-shaped retained lamination (as made) near star 6. Population: 6 in 67 Cameo, 0 finer (3/11). (#83899)
- 3111 1902 PR66 ★ NGC. CAC. A crisply struck and deeply mirrored Premium Gem. Brilliant save for a wisp of apricot across the portrait. A fine diagonal die line (as made) rests west of the prominent V. Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 272, which realized \$1,150.(#3900)

## 1903 Liberty Nickel, PR67 Immaculate Surfaces, Lovely Toning

3112 1903 PR67 PCGS. The fields on this high-grade proof display exceptional depth of reflectivity. The obverse die was so heavily polished in the Mint that the trailing hair curl behind the neck is detached. The strike shows pinpoint sharpness on each side, and every kernel on the left ear of corn is fully articulated. Pale blue toning covers most of each side with a light tracing of rose at the margins. Population: 16 in 67, 0 finer (3/11). (#3901)

## 1903 Liberty Nickel, PR68 Top-Notch Low-Mintage Issue

3113 1903 PR68 NGC. Enticing patina graces the gleaming surfaces of this Liberty nickel proof, flawless to the unaided eye. On the obverse, the watery fields have delightful blue-green patina that surrounds the canary-gold of the portrait, while the thinner reverse patina shows a more even blend of the two hues. A top-notch survivor from this issue of only 1,790 specimens. Census: 5 in 68, 0 finer (3/11). From The Slotkin Family Trust Collection. (#3901)

## Moderately Toned, Fully Struck 1903 Nickel, PR67 Cameo

3114 1903 PR67 Cameo PCGS. Moderately intense golden patina that prevails on each side complements dollops of pale lilac and blue that appear closer to the rims on this well-contrasted Superb Gem Cameo, a fully struck and delightful example.

From The Slotkin Family Trust Collection. (#83901)

## PR67 Cameo 1903 Liberty Nickel Unusual Medallic Alignment

3115 1903 — Medallic Alignment — PR67 Cameo NGC. A handful of 1903 proof nickels were struck with an incorrect alignment; instead of the usual "coin turn" of 180 degrees, they have "medal" turn, with the tops of the obverse and reverse designs opposite each other. This untoned and needle-sharp Superb Gem has good white on black contrast, especially on the reverse. Only microscopic carbon denies perfection. For all proof 1903 nickels, NGC has graded a mere nine finer Cameo coins (3/11). Ex: Long Beach Signature (Heritage, 9/2003), lot 9584. From The Slotkin Family Trust Collection. (#83901)

## Superb Gem Proof 1904 Liberty Nickel

3116 1904 PR67 NGC. Delightful shades of powder-blue and green toning highlight the surfaces of this remarkable Superb Gem. The design elements were not produced with a frosty finish in 1904, so even the razor-sharp devices of this coin only contrast slightly with the reflective fields. This specimen combines the highest available quality with outstanding visual appeal. Census: 11 in 67, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#3902)

- 3117 1905 PR66 PCGS. CAC. Razor-sharp striking details and richly reflective fields are hallmarks of this seemingly pristine Premium Gem proof. Subtly contrasted with mild green-gold elements at the margins. Population: 35 in 66, 9 finer (3/11).(#3903)
- 3118 1906 PR66 Cameo NGC. CAC. Stark gold-to-peach patina has surprisingly little impact on the reflections-and-frost contrast displayed by this Cameo Premium Gem proof. Excellent surface quality and eye appeal in spades. Census: 9 in 66 Cameo, 10 finer (3/11).(#83904)

#### Subtly Patinated 1906 Nickel, PR67 Cameo

- 3119 1906 PR67 Cameo PCGS. Lovely but subtle pastel patina graces both sides, glints of gold around the obverse stars and near-subliminal light-olive in the centers. The reverse deepens into pinkish-gold and pale green. Close to a full strike. Population: 14 in 67 Cameo, 1 finer (3/11).
  - From The Slotkin Family Trust Collection. (#83904)
- 3120 1907 PR66 Cameo PCGS. Outstanding mirrors with the frost a touch light but the contrast at a fully Cameo level. Delicate green-gold patina gives each side a distinct tint. Population: 8 in 66 Cameo, 2 finer (3/11).(#83905)

#### Silver-Gray PR67 Cameo 1907 Nickel

- 3121 1907 PR67 Cameo NGC. This silver-gray Superb Gem Liberty nickel from late in the series shows little evidence of other color, with moderate contrast and pristine, completely struck surfaces. NGC has seen five Cameo submissions at this level, with none finer (3/11). From The Slotkin Family Trust Collection. (#83905)
- 3122 1908 PR66 Cameo PCGS. CAC. Boldly struck, seemingly pristine, and extremely attractive. The fields display strong reflectivity, a worthy backdrop for cameo contrast with the frosted devices. Light olive-gold patina shows varying degrees of opacity. Population: 10 in 66 Cameo, 4 finer (3/11).(#83906)

## Subtly Toned PR67 Cameo 1908 Nickel From the Richmond Collection

- 3123 1908 PR67 Cameo NGC. Ex: Richmond Collection. The pastel toning produces a sublime effect on this coin, pale jade on the obverse with a hint of rose. The reverse, equally appealing, runs from pale jade to rose to ice-blue. An incredibly beautiful coin, not quite fully struck and showing some minor flecks on the reverse. Census: 4 in 67 Cameo, 0 finer (3/11).

  From The Slotkin Family Trust Collection. (#83906)
- 3124 1909 PR66 Cameo NGC. Powerfully contrasted on each side, but especially the obverse with its heavily frosted portrait of Liberty. Pale green-gold toning is prevalent in the fields on each side. Census: 42 in 66 Cameo, 29 finer (3/11).(#83907)

## 1909 Liberty Nickel, PR68 Cameo Dramatic Contrast, Exceptional Eye Appeal

- 3125 1909 PR68 Cameo NGC. Interest in the new Lincoln cents dramatically increased the demand for minor proof sets in 1909, resulting in a large mintage of 4,763 proof Liberty Head nickels. The issue is more difficult to locate than the mintage suggests in high grade. Many nickels were probably spent for face value in the following years, while the coveted cents were retained by collectors. The present coin is a breathtaking PR68 specimen, fully struck, with dramatic cameo contrast. Census: 5 in 68 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83907)
- 3126 1910 PR66 Cameo NGC. Impressively contrasted through thick patina. The fields remain flashy on the obverse despite a bold layer of peach-orange toning, and the reverse is not far behind. Census: 14 in 66 Cameo, 14 finer (3/11).(#83908)
- 3127 1910 PR67 Cameo NGC. Delicate heather and gold toning is noted over pristine gray surfaces with reflective fields and lustrous, sharply detailed devices. Census: 8 in 67 Cameo, 6 finer (3/11). From The Slotkin Family Trust Collection. (#83908)

## Deeply Mirrored, Thickly Frosted 1910 Nickel, PR68 Cameo

- 3128 1910 PR68 Cameo NGC. The merest hint of pale gold prevails in the mirrored fields against thickly frosted devices on this pristine Superb Gem Cameo, among the finest proof survivors certified, at either service, from the issue of 2,405 coins. Census: 6 in 68 Cameo, 0 finer (3/11).
  - From The Slotkin Family Trust Collection. (#83908)
- 3129 1911 PR66 Cameo NGC. Exactingly detailed with impressive frost for a brilliant-era specimen. Both sides have fields boldly mirrored under a layer of pale green patina. Census: 15 in 66 Cameo, 7 finer (3/11).(#83909)
- 3130 1911 PR67 Cameo NGC. An amazing piece, this Superb Gem Cameo proof exhibits fully brilliant nickel-gray surfaces with excellent contrast. The devices are frosty within a deeply mirrored frame. Census: 7 in 67 Cameo, 0 finer (3/11).

  From The Slotkin Family Trust Collection. (#83909)
- 3131 1912 PR66 Cameo PCGS. CAC. Light green-and-gold toning with sparkling mirrors and significant contrast for this final-year proof issue. Well-preserved and attractive. Population: 17 in 66 Cameo, 4 finer (3/11).(#83910)

## Contact-Free 1912 Liberty Nickel Superb Gem Cameo Proof

3132 1912 PR67 Cameo NGC. The 1912 is the last Liberty nickel proof that is generally available to collectors, produced to the extent of 2,145 pieces. This piece is well but not fully struck, with contact-free surfaces and a single mentionable dark fleck right of the N in CENTS. Census: 5 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83910)

#### **BUFFALO NICKELS**

- 3133 1913 Type One MS67 PCGS. CAC. James Earle Fraser would be proud of his design concept, presented here in full array and to best advantage. The olive-green center cedes to pinkish-gold rim toning on the obverse, while the reverse is pink-gold in the center with green, gold, and ice-blue accents. Well-struck save for LIBERTY. PCGS has seen 12 submissions finer (3/11).(#3915)
- 3134 1913-S Type One MS66 NGC. Intense gold and iridescent toning is displayed on each side of this lustrous Premium Gem. Slight peripheral weakness is evident on the reverse, but the strike is still above average. Census: 51 in 66, 15 finer (3/11). (#3917)
- 3135 1913-D Type Two MS65 PCGS. The beautifully toned obverse shows pleasing detail, though the bison is soft at the shoulder. Muted green-gold and mustard shades drape the luminous surfaces. The Type Two pieces are much more elusive than their Type One counterparts in better Mint State grades, particularly for mintmarked issues. PCGS has graded 60 numerically finer examples (3/11).(#3922)
- 3136 1913-S Type Two MS63 PCGS. CAC. A complete set of MS63 Buffalo nickels poses an extraordinary challenge. This piece is a pleasing example of the grade with satiny gray surfaces and delicate gold toning over full luster.(#3923)
- 3137 1913-S Type Two MS63 PCGS. Rather weakly defined, this piece retains full satin luster beneath medium gold toning on each side. Prominent clash marks are visible on the obverse, particularly below the Indian's chin.(#3923)
- 3138 1913-S Type Two MS64 PCGS. CAC. Peach-orange patina covers most of the obverse save the portrait. The reverse has similar coverage, though the nickel-gray on the bison is even more restricted. A few shallow horizontal marks on the central devices account for the grade. (#3923)
- 3139 1913-S Type Two MS64 PCGS. The 1913-S Type Two Buffalo nickel is a key low-mintage date, always popular as the first year of design and type. This well struck Choice example displays satiny mint luster and attractive gold and lavender toning. (#3923)
- 3140 1914/3 AU55 PCGS. CAC. FS-101. The right corner of the underlying 3 appears to the right of the 4 on this Choice AU coin, with much luster remaining and pinkish tints competing with silver-gray. Forming a complete PDS set of these overdates would pose quite a collecting challenge.(#93924)

#### 1915-S Buffalo Nickel, MS65

3141 1915-S MS65 PCGS. Satin luster shines through light champagne toning with delicate blue accents on both sides of this brilliant Gem 1915-S nickel. While available without difficulty at this grade level, finer examples are rarely encountered. Slight weakness is evident at the highest point of the bison's foreleg, but the remaining design elements are boldly defined. PCGS has only certified 31 finer pieces (3/11). (#3929)

## Well-Struck, Colorful MS66 1915-S Nickel Only Three Finer at PCGS

- 3142 1915-S MS66 PCGS. This lovely Premium Gem is exceedingly well-struck save for the sole exception of LIBERTY, a characteristic shared by many examples of the issue. Pinkish-gold and silver-gray dominate over excellent luster. The minor reverse flecks that appear under a loupe are trivial and undistracting. Population: 28 in 66, 3 finer (3/11). (#3929)
- 3143 1916 MS66+ PCGS. CAC. Frosty luster sparkles under a light layer of nickel-blue and gold patina. Minor striking softness in the centers is of little concern in the grander context of the eye appeal. PCGS has graded just 12 numerically finer representatives (3/11). (#3930)

#### Sharply Struck Gem 1917-D Nickel

- 3144 1917-D MS65 PCGS. Autumn-gold and lime shades dominate, although a blush of sea-green and ruby-red is noted near LIBERTY. Well struck for an early branch mint issue, and both sides are devoid of contact. An outstanding Gem of a conditionally rare issue. Encapsulated in a green label holder. (#3935)
- 3145 1918 MS65 PCGS. Softly frosted luster is key to this Gem's eye appeal. Both sides are well-defined overall with only minor softness at the centers. Subtle green, blue, and violet patina enhances the eye appeal. (#3937)
- 3146 1918 MS65 PCGS. CAC. Jade-green, steel-blue, and lilac-red toning encompasses this shimmering and pristine Gem. A good strike overall despite typical definition on the bison's front shoulder. Certified in an old green label holder. (#3937)

3147 1918/7-D Good 6 PCGS. CAC. FS-101. The thick, straight crossbar and downstroke of the underdigit 7 are apparent despite the present slate-gray nickel's long experience in commerce. This full date example is without relevant marks and has pleasing eye appeal for its grade.(#3939)

## Problem-Free 1918/7-D Nickel, VF30 Popular Overdate Variety

3148 1918/7-D VF30 PCGS. CAC. FS-101. The 1918/7-D Buffalo nickel overdate is not the only overdate known in the series — the 1914/3 overdates for the three active mints have achieved varying levels of acceptance — but it is easily the best known and the most popular. As it remained undiscovered until years after its issuance, many of the original 1918/7-D overdates saw extensive circulation, and the all-important date area was one of the first places to show wear. The date on this midgrade example is sharp, with a pronounced underdigit visible without magnification. The surfaces are problem-free and light gray overall, with darker tracings around the devices. (#3939)

#### Choice Mint State 1918-S Nickel

- 3149 1918-S MS64 PCGS. CAC. Soft quicksilver luster is mediumgray and pearl over much of this near-Gem, though pink, peach, and gunmetal-blue hues are also in evidence. While the coin has a pillowy appearance overall, close inspection reveals that the piece actually has above-average definition. PCGS has graded 32 numerically finer examples (3/11). (#3940)
- 3150 1919 MS66 PCGS. CAC. Light golden overtones cross much of each side, and additional orange-peach elements appear near the rims. A well struck Premium Gem with bright and lively luster. PCGS has graded just eight numerically finer examples (3/11). (#3941)

## Gem 1919-D Nickel, Registry Set Prize Glorious Luster and Original Toning

- 3151 1919-D MS65 PCGS. The 1919-D is a strike-challenged issue, and while this piece has some soft spots on the bison's forehead, the tail, and the hair above the braid, it is nonetheless better-struck than many survivors. In addition, the glorious original luster and mellow orange-gold coloration with tinges of violet more than compensate. A Registry Set prize for toning enthusiasts and those who desire an attractive Gem without stretching and long searching for the few finer. Population: 55 in 65, 14 finer (3/11). (#3942)
- 3152 1919-S MS62 PCGS. Considerable design weakness is noted at the centers, but both sides have full luster with attractive light gold toning. Still attractive with satin surfaces.(#3943)
- 3153 1920 MS66 PCGS. Sun-gold and lavender embrace this mark-free, lustrous, and sharply impressed Premium Gem. Struck from boldly clashed dies and certified in a green label holder. PCGS has graded only eight coins finer (3/11).(#3944)
- 3154 1923 MS66 PCGS. Hints of gold toning may be found at the borders of this brilliant Premium Gem. Both sides have strong design elements, although the strike is shy of full. This is a beautiful example for the connoisseur. PCGS has only certified 10 finer pieces (3/11).(#3949)
- 3155 1923-S MS64 PCGS. Intensely toned gold-orange and peach with the brightest color in the lustrous centers. Pleasingly detailed for the issue, though the bison's shoulder shows softness. PCGS has graded 36 numerically finer examples (3/11).(#3950)
- 3156 1924-D MS64 NGC. CAC. The obverse has a bright blend of gold, violet, and blue, the reverse is similarly toned with the colors less vivid. Both sides of this Choice Mint State piece are satiny, and the strike is above average. NGC has only certified 20 finer pieces (3/11).(#3952)
- 3157 1924-D MS64 PCGS. A delightful near-Gem, this 1924-D Buffalo nickel exhibits satiny gray luster beneath pleasing gold and iridescent toning. Shy of a full strike but sharper than usually seen. (#3952)

## Near-Gem 1924-S Buffalo Nickel Luminous Obverse, Brighter Reverse

3158 1924-S MS64 PCGS. The S-mint dates in the 1920s Buffalo nickel series are infamous for poor striking quality, and even highend examples can have a mediocre appearance. While the present near-Gem has localized softness on the bison's shoulder, the head and horn are crisp, and the portrait is well-defined. Light gold-toorange toning is a touch richer over the quicksilver luster of the reverse. PCGS has graded 32 numerically finer examples (3/11).

3159 1925-D MS64 PCGS. The 1925-D Buffalo nickel is an elusive date in Mint State, and this well detailed Choice specimen will be a welcome addition to a fine collection. The satiny mint luster is slightly subdued, and hints of gold and ice-blue toning visit the lightly abraded surfaces.(#3955)

## Gem 1925-D Buffalo Nickel Few Certified Finer

3160 1925-D MS65 PCGS. Golden-brown and steel-blue adorn coruscating and unabraded surfaces. The Denver mintmark is clear despite evidence of a long-in-use reverse die. This lower-mintage branch mint issue becomes a rarity at the MS65 level. Certified in an old green label holder. Population: 70 in 65, 5 finer (3/11). (#3955)

## 1925-D Nickel, MS65 Well-Struck and Lustrous

- 3161 1925-D MS65 PCGS. Unlike so many of its peers, the present 1925-D has a pleasing strike. The mintmark is well formed, and the devices are evenly detailed. Faint almond-gold toning is spread over the lustrous surfaces, which appear unabraded save for a solitary concealed hairline within the Indian's hair. Population: 70 in 65, 4 finer (3/11). (#3955)
- 3162 1925-S MS63 PCGS. Peach, gold, and medium-gray toning over quicksilver luster. Though the strike is undeniably soft through the centers, the ample luster indicates that there is no trace of wear. (#3956)
- 3163 1926-D MS64 PCGS. CAC. A Buffalo nickel issue reputed for its strike weakness, which here is more prominent on the obverse than the reverse. The hair above the braid is soft, and the bison's flank is a bit mushy. Other details are pleasing, with good luster over gray-gold, pink-accented surfaces. Scattered flecks appear on the obverse.(#3958)
- 3164 1926-D MS64 PCGS. Softly struck, as often seen, though the bison's horn has a full outline. Stark blue and gold patina settles over quicksilver luster. An intriguing and valuable D-mint. (#3958)
- 3165 1926-S XF45 NGC. The 1926-S Buffalo nickel boasts a low mintage of 970,000 pieces and the issue is scarce at the XF45 level. The present coin is lightly worn, with pleasing gray and ice-blue patina, and traces of satiny mint luster.(#3959)

## 1926-S Buffalo Nickel, MS63 Well-Known Condition Rarity

3166 1926-S MS63 NGC. A well-known condition rarity in the series, the 1926-S is decidedly scarce in XF or finer grades, and a rarity in all Mint State grades. This Select Mint State specimen has a typical weak strike. The satin surfaces exhibit light gray luster with subtle gold toning near the borders. (#3959)

## 1927-D Buffalo Nickel, MS65

- 3167 1927-D MS65 NGC. Despite a high mintage of nearly 6 million coins, the 1927-D is rarely seen so fine. Attractive champagne-gray toning and peripheral iridescence enhance the look of this pleasing Gem. Both sides have satin luster and sharp design elements with only a few trivial marks that prevent a higher grade. Census: 31 in 65, 5 finer (3/11). (#3961)
- 3168 1929 MS66 PCGS. CAC. Better-defined than usually seen with only minor softness in the centers. Soft quicksilver luster lights up the faded peach and nickel-blue shadings over each side. PCGS has graded three numerically finer examples (3/11).(#3966)
- 3169 1929-D MS65 PCGS. This better date Gem features sea-green, rose-red, and canary-gold shades. Mark-free and lustrous with the customary branch mint lightness of strike at the centers. Certified in an old green label holder.(#3967)
- 3170 1929-D MS66 NGC. Richly though differently toned on each side, with gold and blue on the obverse and more orange and lavender hues on the reverse. Powerful, almost flashy luster is uncommonly appealing. Census: 12 in 66, 1 finer (2/11). From The Dr. Donald M. Gilner Collection. (#3967)
- 3171 1935 MS67 PCGS. Remarkably bold design definition, particularly on trouble-spots such as the bison's shoulder. Light peach and blue-green toning covers the lustrous obverse, while the reverse substitutes gold for the peach. PCGS has graded only one numerically finer example (3/11).(#3974)
- 3172 1935 MS67 PCGS. Powder-blue and sun-gold embrace this shimmering and virtually immaculate Superb Gem. The strike is decidedly above average, and the eye appeal is superior. PCGS has only certified one finer example (3/11).(#3974)
- 3173 1936 MS67 PCGS. CAC. Splendid original patina encompasses jade, ice-blue, and lilac on this pristine and boldly struck Superb Gem. Among the few dozen finest certified at PCGS, save for two MS67+ pieces (3/11). A Registry Set essential.(#3977)

- 3174 1937-D Three-Legged AU50 NGC. FS-901. The perennial collector favorite, here as an AU example with regular steelgray surfaces on each side and all of the requisite diagnostics, the product both of the famous die lapping and extended die use. A nice collector-grade example, despite two tiny obverse dark flecks that do not much detract and appear only under a loupe. From The Dustim (Dusty) Lee Gibson Collection. (#3982)
- 3175 1937-D Three-Legged AU53 PCGS. FS-901. Medium creamgray and almond-gold toning enriches satiny and solidly struck surfaces. A few wispy marks on the bison's flank are of little consequence. Housed in a first-generation holder. From The Dustinn (Dusty) Lee Gibson Collection. (#3982)
- 3176 1937-D Three-Legged AU53 NGC. FS-901. A colorful representative of this all-time collector favorite. Cherry-red and lime-green borders cede to stone-gray and pale golden-brown centers. Marks are few and individually inconsequential. (#3982)
- 3177 1937-D Three-Legged AU53 PCGS. FS-901. Much appeal remains on this slate-gray example, which is perhaps a tad better than the grade assigned and in any case displays well under a loupe. All the requisite diagnostics are present and accounted for, but the surfaces seem to have a bit of extra character that some examples lack, and they certainly display no mentionable distractions. A nice example for a Registry Set or variety collection. (#3982)

## 1937-D Buffalo Nickel, MS62 Famous Three-Legged Variety, FS-901

3178 1937-D Three-Legged MS62 PCGS. FS-901. This extremely popular variety was created when excessive die polishing erased portions of the bison's foreleg. The present coin is a well-struck example, with a touch of softness apparent on the bison's shoulder and the Indian's hair. Attractive gold and ice-blue toning enlivens both sides of this pleasing MS62 specimen, with subtle satiny mint luster. (#3982)

#### PROOF BUFFALO NICKELS

1913 Type One Nickel, PR66 James Earle Fraser's Design Concept

3179 1913 Type One PR66 NGC. The Type One Buffalo nickel illustrates James Earle Fraser's initial design concept before the reverse was modified to facilitate striking. This Premium Gem matte proof shows every detail as the artist intended. Both sides have lustrous surfaces beneath intense gold and iridescent toning. From The Dustinn (Dusty) Lee Gibson Collection. (#3988)

## Iridescently Toned PR67 1913 Type One Buffalo Nickel

3180 1913 Type One PR67 PCGS. Iridescent jade, gold, and pinkish hues peek out from each side of this superbly well-struck Superb Gem, a representative of the debut year and original James E. Fraser design. The proofs, as here, show a remarkable wealth of detail that business strikes can seldom emulate. Population: 45 in 67, 3 finer (3/11). (#3988)

## Type One 1913 Buffalo Nickel, PR67 Attractive Multicolor Toning

3181 1913 Type One PR67 NGC. The lavender-red centers are encompassed by lemon-gold, lilac, and powder-blue. This satiny Superb Gem is crisply struck and devoid of contact. Carbon is essentially absent. The sole year of the design subtype, and although business strikes are plentiful, proofs are unquestionably scarce. Census: 37 in 67, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#3988)

3182 1913 Type Two PR64 NGC. This boldly defined Choice matte proof nickel is destined for a complete or 20th century type set, or for a specialized Buffalo collection. Both sides have dusky gold and iridescent toning over its satin surfaces.(#3990)

## Well-Struck Premium Gem Proof 1913 Type Two Buffalo Nickel

3183 1913 Type Two PR66 PCGS. The Type Two Bison on Plane design choice simply made sense, placing the denomination in a well-defined exergue to prevent it from wearing off rapidly, even if it was less pleasing aesthetically. This Type Two boasts well-struck pinkish-gold surfaces with good luster. Population: 92 in 66, 51 finer (3/11). (#3990)

#### 1913 Type Two Nickel, PR66

3184 1913 Type Two PR66 NGC. A gorgeous Premium Gem matte proof nickel, this 1913 Type Two has bold design definition from a full strike, and exhibits satiny surfaces with brilliant gray luster. Both sides have considerable gold and olive toning to heighten its aesthetic appeal.

From The Dustinn (Dusty) Lee Gibson Collection. (#3990)

## Prized Superb Gem Proof 1913 Buffalo Nickel Type Two, Only Five Finer at NGC

3185 1913 Type Two PR67 NGC. This beautiful pinkish-gold, satiny example of the first-year Type Two design is virtually pristine and free from all but the most trivial signs of contact. A treat for first-year-of-type collectors. NGC has certified only five numerically finer examples (3/11).

From The Slotkin Family Trust Collection. (#3990)

3186 1914 PR64 NGC. Accents of pinkish-gold and sky-blue predominate on this lovely near-Gem, a survivor of the second-year proof mintage of 1,275 pieces. Only a stray high-point contact mark or two seem to separate this piece from a Gem grade, but the appeal is grand.(#3991)

3187 1914 PR66 NGC. An attractive blend of gold, blue, and violet toning graces each side of this boldly defined Premium Gem matte proof. NGC has only certified 67 finer pieces (3/11).

From The Dustinn (Dusty) Lee Gibson Collection. (#3991)

#### Multicolor PR67 ★ 1914 Nickel

3188 1914 PR67 ★ NGC. Extraordinary lemon-gold, silver-blue, and lilac-red toning encompasses this fully struck and mark-free Superb Gem. The sole imperfections are one or two pinpoint flecks on each side. A superior specimen of this scarce proof issue. Census: 5 in 67 ★, none finer with a Star designation (3/11). From The Slotkin Family Trust Collection. (#3991)

3189 1915 PR64 NGC. Streaky pinkish-gold toning appears on both sides, accompanied by a few scattered, tiny carbon flecks, largely on the obverse. The strike is close to full, save for minor weakness on LIBERTY. A scarce matte proof Buffalo nickel.(#3992)

- 3190 1915 PR65 NGC. Delicate gold, pink, and silver-green tints visit the satiny surfaces of this decisively struck and incredibly appealing proof Buffalo nickel. Excellent overall preservation with minimal carbon. With a mintage of just 1,050 pieces, the 1915 proof issue has the second-lowest production for the series. Ex: FUN Signature (Heritage, 1/2003), lot 823.(#3992)
- 3191 1915 PR66 NGC. This sharply defined Premium Gem matte proof has vivid gold toning over its satiny surfaces. This is a highly attractive piece with few finer submissions. From The Dustinn (Dusty) Lee Gibson Collection. (#3992)
- 3192 1915 PR66 NGC. Attractive golden-brown toning invigorates this fully struck and lustrous Premium Gem specimen. Only 1,050 proofs were issued, in the penultimate year of the classic proof era, and high-grade examples are very scarce. (#3992)

#### Richly Toned PR67 1915 Nickel

3193 1915 PR67 NGC. Proof Buffalo nickel mintages dwindled rapidly from the design's introduction in 1913, and by 1915, the official production of such pieces amounted to just 1,050 specimens. This Superb Gem is carefully preserved with remarkable concentric patina, green-gold at the borders with a fade-through to lavender, pink, and violet-blue at the interiors. Census: 30 in 67, 4 finer (3/11). From The Slotkin Family Trust Collection. (#3992)

## 1916 PR64 Buffalo Nickel Only 600 Pieces Struck

3194 1916 PR64 PCGS. Only 600 proofs were struck in 1916, clear evidence of the diminished popularity of the matte proofing process. This near-Gem shows intricate detailing on both sides, and the otherwise brilliant surfaces display just a hint of peripheral reddish patina. An attractive PR64 with no mentionable surface defects. (#3993)

3195 1916 PR66 NGC. Ruggedly detailed and luminous under layers of streaky gold and peach patina. This Premium Gem specimen was one of just 600 pieces produced before regular proof strikings were shut down, a moratorium that lasted for two decades. From The Dustinn (Dusty) Lee Gibson Collection. (#3993)

3196 1936 Type One — Satin Finish PR65 PCGS. Dusky chestnut-brown and gunmetal toning blends throughout this razor-sharp Gem. No carbon or contact is readily observed, even with the aid of a loupe. Encapsulated in a green label holder.(#3994)

3197 1936 Type One — Satin Finish PR65 PCGS. Light golden-tan toning settles along the borders of this satiny but sharply struck specimen. A Gem proof without any singularly obvious faults. (#3994)

- 3198 1936 Type One Satin Finish PR66 PCGS. CAC. Razor-sharp details and brightly reflective fields are the hallmarks of this spectacular Satin Finish proof, from the first year of modern proof offerings. The surfaces display vivid iridescent gold, lavender, and ice-blue toning.(#3994)
- 3199 1936 Type One Satin Finish PR66+ PCGS. CAC. This gleaming, silver-white Premium Gem Satin Finish proof is only lightly tinged with gold on the high points of each side. Well-struck with some minor dark flecks that appear only under a loupe. (#3994)
- 3200 1936 Type One Satin Finish PR67 PCGS. CAC. Fully struck, with vibrant satiny mint luster, this Superb Gem proof represents the Satin Finish type struck early in the year. The surfaces display delightful gold and ice-blue toning. Only 29 coins have been certified in higher numeric grades at PCGS (3/11). (#3994)
- 3201 1936 Type One Satin Finish PR67 PCGS. Peripheral gold-peach accents lend this Superb Gem specimen incredible eye appeal. The luster is satiny, the definition sharp, the preservation excellent. From The Slotkin Family Trust Collection. (#3994)
- 3202 1936 Type Two Brilliant Finish PR65 PCGS. A honeytinged Gem that boasts boldly struck devices and glassy, seamless mirrors. Significantly scarcer than its 1937 proof successor, and encapsulated in a first-generation holder.(#3995)
- 3203 1936 Type Two Brilliant Finish PR65 NGC. An appreciably reflective, boldly detailed example of the Brilliant Finish proof. Light green-gold patina has settled over much of each side on this Gem. From The Dr. Donald M. Gilner Collection. (#3995)

## 1936 Brilliant Finish Buffalo Nickel, PR67 Dazzling and Seemingly Carbon-Free

3204 1936 Type Two — Brilliant Finish PR67 PCGS. CAC. Brilliant throughout with bright, mirrorlike fields. The surfaces are virtually perfect, and the devices are just as flashy as the fields. The devices are intricately detailed, as only proofs can be. Each side appears to be free of any carbon spotting. (#3995)

# Brilliant Finish 1936 Nickel, PR67 ★ A Top-Notch Type Two Specimen

3205 1936 Type Two — Brilliant Finish PR67 ★ NGC. A gorgeous and gleaming Superb Gem specimen awarded the Star designation for extraordinary eye appeal. From the bold design definition to the chromelike reflectivity and the delicate canary-yellow and sky-blue patina over each side, this specimen is most deserving. From The Slotkin Family Trust Collection. (#3995)

- 3206 1937 PR64 PCGS. Caramel-gold dominates this fully struck Choice proof, although occasional high points offer steel-blue toning. Devoid of contact, and a powerful lens reveals only minuscule carbon. Encapsulated in a first generation holder. (#3996)
- 3207 1937 PR65 PCGS. CAC. Boldly toned with gold-orange patina around the margins on each side and nickel-blue interiors. A gleaming Gem from the last of the proof Buffalo nickel issues. (#3996)
- 3208 1937 PR65 PCGS. A lovely Gem example of this final proof Buffalo nickel issue, lightly toned green-gold and champagne. Exquisitely struck and pristine aside from pinpoint flecks on each side. Encapsulated in a green label holder.

  Ex: Houston Signature (Heritage, 12/2008), lot 1011, which realized \$1,265.(#3996)
- 3209 1937 PR66 PCGS. CAC. Boldly detailed with deeply mirrored fields and attractive light gold toning on both sides. The remarkable fields are almost entirely free of flyspecks. An impressive Premium Gem proof Buffalo nickel for the specialist or the type collector. (#3996)
- 3210 1937 PR66 PCGS. Fantastic reflectivity with great interplay between the canary-yellow and blue-white aspects of the patina. This gleaming Premium Gem is housed in a green label holder. From The Dr. Donald M. Gilner Collection. (#3996)
- 3211 1937 PR67 PCGS. Brilliant, monochromatic proof surfaces exhibit bold design definition with ice-blue surfaces and bold design elements. This lovely Superb Gem proof has many peers, but few finer. PCGS has only certified 11 higher grade pieces (3/11). (#3996)
- 3212 1937 PR67 PCGS. CAC. A chromelike gleam radiates from each side of this remarkable Superb Gem, a high-end survivor of the proof mintage exceeding 5,700 coins. Hints of high-point gold attest to the unfiddled-with originality of this well-struck piece, exceeded at PCGS by a mere 11 submissions (3/11). (#3996)
- 3213 1937 PR67 PCGS. CAC. The return of proof Buffalo nickels after the stoppage of 1916 proved all too brief, lasting just two years. This Superb Gem specimen comes from the final issue, a gleaming specimen that showcases a delicate layer of canary-gold and lavender-blue patina over each side. PCGS has graded just 11 numerically finer proofs (3/11).(#3996)
- 3214 1937 PR67 NGC. A stunning Superb Gem proof, this 1937 nickel is the second and final brilliant proof issue of the design. Both sides are light gray with satiny devices and reflective fields. NGC has certified a mere 36 finer pieces (3/11).

  From The Slotkin Family Trust Collection. (#3996)
- 3215 1937 PR67 PCGS. A boldly defined Superb Gem proof, this 1937 Buffalo nickel has satiny devices over deeply mirrored fields. Both sides exhibit lovely light gold and blue toning. Just 11 finer submissions have been examined at PCGS (3/11). (#3996)
- 3216 1937 PR62 Cameo NGC. CAC. Although the Mint used an all-brilliant finish on proof coins in the 1930s, this example displays considerable mint frost on the sharply detailed devices, contrasting boldly with the brightly mirrored fields. Cameo proofs are very rare. Census: 1 in 62 Cameo, 5 finer (3/11).(#83996)

## **JEFFERSON NICKELS**

- 3217 1939 Doubled MONTICELLO MS66 PCGS. FS-801. Dramatic die doubling on MONTICELLO and FIVE CENTS distinguishes this important *Guide Book* variety. This is a virtually pristine Premium Gem with coruscating luster and light lime-gold patina. (#4004)
- 3218 1939-S Reverse of 1938 MS66 Full Steps PCGS. Wavy porch steps at the base of Monticello signify the 1938 reverse type. This lovely piece has a bold strike with satin luster and peripheral iridescence. Population: 17 in 66 Full Steps, 0 finer (3/11). (#84006)

3219 1939-S Reverse of 1940 MS66 Full Steps PCGS. A semiprooflike Premium Gem that possesses an exceptional strike and splendid blushes of lemon-gold patina. The low-mintage 1939-S was saved in lesser numbers than the 1938 branch mint issues, and has long been regarded as an obstacle to the completion of a date and mintmark series. Population: 15 in 66 Full Steps, 0 finer (3/11). (#894006)

# Rare 1942-D/Horizontal D Jefferson Nickel FS-501, MS63 Full Steps

- 3220 1942-D/Horizontal D MS63 Full Steps NGC. FS-501. The Cherrypickers' Guide says succinctly, "This is the rarest of the major Jefferson nickel varieties in Mint State, yet can still be picked on rare occasions." The broad left stand of the original horizontal D mintmark, passing left to right through the overmintmark, is the obvious pickup point. This is a no-questions five Full Steps example with lovely pinkish-gold and ice-blue patina. A few minor obverse ticks preclude an even finer grade.
- 3221 "Date Set" of War Nickel Rolls. A complete date set of war nickels (all date-mint combinations from 1942 to 1945 at Philadelphia, Denver, and San Francisco save the 1942-D, or 11 in all) with each date represented by an entire roll of 40 pieces. Condition of the pieces, judging by the end-of-roll coins, is AU-Unc with moderate to heavy toning that may not be reflected on the interior pieces. Due to the unique nature of this lot, it is sold as is with no returns. (Total: 11 rolls)
- 3222 1942-S MS67 Five Full Steps NGC. Light honey-gold toning adorns this thoroughly lustrous wartime nickel. Both sides appear pristine, and the strike is uncommonly crisp on the hair above the ear and the steps of Monticello.(#84017)
- 3223 1943/2-P MS66 PCGS. FS-101. Beautiful sea-green, lemon-gold, and rose-mauve toning enriches this lustrous and immaculate Premium Gem. The strike is crisp except on the lowest step. The 2 underdigit is obvious when viewed beneath a loupe. (#4019)

## PROOF JEFFERSON NICKELS

- 3224 1939 Reverse of 1940 PR67 PCGS. An exemplary specimen that boasts an intricate strike and a hint of cameo contrast on the reverse. Lightly toned with flashy fields and undeniable eye appeal. Perhaps 95% of all 1939 proofs are the Wavy Steps or Reverse of 1939. The rarity of the Straight Steps, Reverse of 1940 1939 proof is well-known to the specialist. Population: 16 in 67, 0 finer (3/11). (#94176)
- 3225 1971 Proof Set Featuring No S Nickel. In the government packaging with outer box. The nickel is lightly gold-toned and moderately contrasted with well-preserved surfaces; our unofficial estimated grade is PR68 Cameo.(Total: 5 coins)
- 3226 1971 No S PR66 Cameo PCGS. A wisp of honey toning cannot deny the blatant contrast between the frosty motifs and the darkly mirrored fields. A needle-sharp specimen of this very scarce proof mint error.(#84204)
- 3227 1971 No S PR67 Cameo PCGS. Exemplary cameo contrast. The boldly impressed design elements seem to float over mirrored, watery fields. A minimally toned missing-mintmark beauty. Breen (1988) provides a mintage of 1,655 pieces, although the number of certified examples is only a fraction of that production. (#84204)

### **EARLY HALF DIMES**

- 3228 1795 Genuine PCGS. V-5, LM-8, R.3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been damaged. Moderate thin scratches are noted on the portrait and the field between the IB in LIBERTY. Slightly wavy, but well defined and attractively toned in cream-gray and tan shades. (#4251)
- 3229 1795 Cleaned ANACS. VF30 Details. V-5, LM-8, R.3. This slate-gray Flowing Hair half dime is mildly bright but lacks any distracting marks. The reverse is particularly pristine. Although lightly cleaned, the present piece will please a majority of early silver type collectors.(#4251)

## Toned 1795 Half Dime, LM-8, V-5 AU Sharpness

3230 1795 — Improperly Cleaned — NGC Details. AU. V-5, LM-8, R.3. Forest-green and cream-gray embrace this minimally circulated and partly lustrous Flowing Hair half dime. The portrait displays criss-cross adjustment marks, as made, and both sides are mildly glossy from cleaning. Nonetheless a superior example of the introductory two-year type. (#4251)

## V-1, LM-1 1796 Half Dime LIKERTY, AU Details

- 3231 1796 LIKERTY Obverse Scratched NGC Details. AU. V-1, LM-1, R.3. The normal date variety for the year is more famous for the broken top and bottom strokes of the B in LIBERTY, which make the letter look more like a K (hence "LIKERTY"). Though the obverse has extensive scratches, the reverse offers a much cleaner appearance with blue and gold toning over still-lustrous surfaces. (#94254)
- 3232 1797 13 Stars Genuine PCGS. V-1, LM-4, R.5. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Good specimen that is whizzed and repaired. The right obverse is repaired, with a pointed chin on Liberty, and both sides have blurred definition and a granular appearance. Much of UNITED STATES is worn, but all the other legends are readable.(#4260)

#### **BUST HALF DIMES**

- 3233 1832 MS64 PCGS. V-1, LM-3, R.1. The recut star 12 is a tipoff to the obverse, and the top arrowhead on the reverse touching the last A in AMERICA. This near-Gem displays good luster but the center high points have a somewhat mushy appearance that we attribute more to die fatigue than strike weakness, somewhat confirmed by the die cracks on the reverse leading down to the rim from the tips of both wings. Silver-gray with some charcoal patina on the high points.(#4279)
- 3234 1832 MS65 NGC. V-8, LM-5, R.1. A gorgeous Gem example of this popular and accessible die pair. Satiny surfaces range from antique-gold at the margins to near silver in the centers. (#4279)
- 3235 1834 MS64 NGC. V-1, LM-2, R.1. Great eye appeal for this available die pair. Silver surfaces have strong luster and minimal patina. The die bulge in front of Liberty's portrait is strong. (#4281)
- 3236 1834 MS64 ★ NGC. V-1, LM-2, R.1. An early die state without the eventual bridlelike die crack on the portrait. This is a coruscating and precisely struck Choice half dime noteworthy for its multicolor patina, which secured an elusive Star from NGC. A loupe shows a few small marks. Census: 1 in 64 ★, 2 finer with a Star designation (3/11).(#4281)
- 3237 1834 3/Inverted 3 MS63 NGC. V-5, LM-1, R.2. More common of the 3 over Inverted 3 die pairs, seen here with partially reflective fields under golden border-toning. Wispy abrasions across the portrait contribute to the grade.(#94281)
- 3238 1835 Large Date, Small 5C MS64+ PCGS. CAC. V-9, LM-6, R.2. Coruscating luster sweeps this lightly toned almond-gold near-Gem. Sharply struck save for the left shield border, and the fields display only wispy grazes.(#4283)
- 3239 1835 Small Date, Large 5C MS63 NGC. V-6, LM-9.2, R.2. Struck shortly after the dies were repolished, an act that did nothing to disguise the increasingly sorry state of the left reverse. Silver-blue interiors with partial gold-orange splashed at the borders.(#4284)

### Gem 1836 Half Dime, V-6, LM-5

3240 1836 Small 5C MS65 NGC. V-6, LM-5, R.2. The LM-5 variety is indicated by the repunched stars 11 and 12, the small 5 in the denomination, and the scroll ending under the right edge of the left upright of M. The present coin is a rare Gem survivor from the large mintage of 1.9 million pieces. The lustrous surfaces are patinated in shades of golden-brown and ice-blue, with more color on the reverse. Both sides display clash marks. Census: 26 in 65, 18 finer (2/11). (#4288)

## SEATED HALF DIMES

3241 1837 No Stars, Large Date (Curl Top 1) MS64 PCGS. CAC. The early die states of the Large Date 1837 half dimes, as here, show nifty triple punching on the 8 of the date, with double punching on the other digits. Many collectors considered this clutter-free medallic obverse design among the most attractive in U.S. coinage. Splendid, deep, original patina — mostly purple and pinkish-blue — on both sides and a bold strike make this near-Gem, certified in a green-label holder, a real prize.(#4311)

## Large Date 1837 Seated Half Dime, MS66 Briefly Coined No Stars Subtype

3242 1837 No Stars, Large Date (Curl Top 1) MS66 NGC. Goldenbrown and cherry-red enrich coruscating, well preserved fields. The toning is deepest along the reverse margin. The present Premium Gem is interesting for its partial wire rim, which is most prominent near 2 o'clock on the obverse. A radial die crack traverses the Liberty pole to the shield. (#4311)

## Gem No Stars Seated Half Dime Vibrant Patina, Small Date

- 3243 1837 No Stars, Small Date (Flat Top 1) MS65 NGC. Lavender and lime-green adorn this thoroughly lustrous Gem Seated half dime. The strike is precise aside from minor incompleteness on the HA in HALF. The No Stars subtype was coined only in 1837, except for a scarce '38-O production. Struck from moderately rotated dies and certified in a prior-generation holder. From The Dr. Donald M. Gilner Collection. (#4312)
- 3244 1838 Large Stars, No Drapery MS65 NGC. A lovely piece from early in the With Stars Seated half dime series. Bright, faintly satiny luster is lively under layers of pink and blue patina. (#4317)
- 3245 1841 MS66+ NGC. An impressively preserved piece that comes remarkably close to Superb Gem status. Deep orange and violet hues drape dusky surfaces that show small glimmers of luster where the patina is thinnest.(#4328)
- 3246 1848 Medium Date MS64 NGC. An impressively lustrous half dime, minimally toned save for pink, violet, and blue elements at the borders. A die line runs from Liberty's foot area to the nearby rim.(#4338)
- 3247 1849/6 MS64 NGC. FS-301. Ex: Richmond Collection. Cherrypickers' considers this variety an 1849/8 overdate, while the Guide Book calls it an 1849/6. Regardless of the underdigit, this is a moderately prooflike near-Gem with rich golden-brown, cherry-red, and jade-green patina. Ex: Richmond Collection (David Lawrence, 3/2005), lot 1026, which realized \$2,185.(#4342)
- 3248 1850 MS65 PCGS. CAC. Occasional hints of periwinkle-blue patina visit otherwise bright silver-white surfaces. A well-defined and minimally marked Gem. Population: 18 in 65, 22 finer (3/11). (#4345)
- 3249 1853 Arrows MS65 NGC. A fully brilliant Gem, this 1853 Arrows half dime has frosty silver surfaces with light gold toning and minuscule marks. Both sides have heavy clash marks with light peripheral obverse die cracks.(#4356)

## 1853 Arrows Half Dime, Superb Gem Remarkably Lustrous, None Certified Finer

- 3250 1853 Arrows MS67 NGC. The high mintage of 13.2 million pieces for the 1853 is offset by the need for the three-year Arrows type. The otherwise available 1853 Arrows half dime is remarkably unavailable in Superb Gem condition. Only 11 other pieces have been so graded by NGC, and none are finer at either major service. This example displays remarkably thick, frosted mint luster, and just a touch of light golden patina appears on each side. Heavy die clashing and a couple of minor die cracks are the only ripples in the surface of this Superb Gem type coin. (#4356)
- 3251 1856-O MS63 PCGS. CAC. Ex: Eliasberg. Softly lustrous but distinctly toned with excellent eye appeal. Green-gold and blue elements are prominent on each side, and the reverse mixes in orange. Housed in a green label holder. Population: 10 in 63, 11 finer (3/11).(#4364)
- 3252 1858 MS66 ★ NGC. Well-defined and frosty with gorgeous luster and color. Light gold and orange shadings appear over most of each side, though the obverse periphery shows blue and green elements as well.(#4367)
- 3253 1858 MS66+ PCGS. CAC. Soft luster sparkles under iridescent patina. A carefully preserved half dime that shows few marks of any significance, though striking weakness is noted on the obverse stars. Population: 39 in 66, 12 finer (3/11).(#4367)

## Colorful Gem 1867-S Half Dime

- 3254 1867-S MS65 NGC. This colorfully toned Gem is mostly silvergray with random daubs of amber, orange, ochre, and burgundy near the rims, an effect more pronounced on the obverse. This piece is sharply struck for the issue, which amounted to 120,000 business strikes in postbellum San Francisco. Census: 4 in 65, 1 finer (3/11). (#4391)
- 3255 1868-S MS65 NGC. Al Blythe notes the 1868-S half dime is "a better date, especially in high grades." This sharply detailed Gem displays lustrous surfaces, light gold toning, and a variety of die cracks on both sides. Census: 19 in 65, 5 finer (3/11). (#4393)

#### Sharply Struck Superb Gem 1871 Half Dime

- 3256 1871 MS67 NGC. CAC. This issue from near the end of the silver half dimes was a large 1.87 million pieces, but this piece is among the few finest survivors. Well-struck surfaces are contact-free and boast a rich palette of mostly pinkish-gray and ocean-blue. A super example of the Seated half dime series for a type set. Census: 2 in 67, 2 finer (3/11). (#4398)
- 3257 1873 MS65+ NGC. Intensely lustrous and outlandishly toned. This final-year half dime has bold patches of lime, blue, claret, and plum patina that give the coin eye-popping character. (#4404)

#### PROOF SEATED HALF DIMES

3258 1862 PR65 NGC. Dappled peach, sky-blue, and silver-gray toning graces most of each side. A minimally contrasted but charming Gem proof from a Civil War issue of just 550 specimens. Census: 22 in 65, 23 finer (3/11).(#4445)

#### Satiny PR67 Cameo 1862 Half Dime

- 3259 1862 PR67 Cameo NGC. This splendid Superb Gem half dime is visually entrancing and technically impressive, as both sides display razor-sharp definition and intensely watery reflectivity in the fields. Minute die rust is noted on the figure of Seated Liberty, but poststrike defects are nonexistent. A meager 550 proofs were struck. Census: 6 in 67 Cameo, 1 finer (3/11). (#84445)
- 3260 1867 PR65 Cameo PCGS. CAC. Great contrast, especially with the well-layered frost on the devices. Faint golden tinges grace the fields and are more visible on the reverse. Population: 6 in 65 Cameo, 5 finer (3/11).(#84450)

## Ultra Cameo PR66 1868 Half Dime White-on-Black Eye Appeal

3261 1868 PR66 Ultra Cameo NGC. The deeply reflective fields and frosty motifs attest to the NGC designation. The light caramelgold toning is consistent save for a tiny spot on the reverse at 5 o'clock. Well struck except for blending on the wreath opposite the left corner of Liberty's rock. As of (3/11), NGC has certified just three examples as Ultra Cameo. (#94451)

## Superb Gem Proof 1869 Half Dime Only One Example Finer at NGC

- 3262 1869 PR67 NGC. CAC. Only 600 proof Seated Liberty half dimes were minted in 1869, and examples in Superb Gem condition are very rare today. The present coin is a sharply detailed Superb Gem, with spectacular golden-brown and violet toning. The fields are deeply mirrored under the patina. Census: 6 in 67, 1 finer (3/11). (#4452)
- 3263 1873 PR65 PCGS. The 1873 proof Seated Liberty half dime claims a small mintage of 600 pieces, and a number of these were melted in July 1873. The present coin is a well-struck Gem, with brightly mirrored fields and variegated toning. Population: 33 in 65, 16 finer (3/11).(#4456)

## **EARLY DIMES**

3264 1796 AG3 ANACS. JR-6, R.3. A horizontal die break through the 7 in the date helps attribute the variety. The date and LIBERTY are bold, but most of the reverse legend is worn, as are the lower stars. The surfaces are slightly granular and exhibit ocean-blue and lavender toning. (#4461)

## White AU Details 1798/97 Dime, JR-1 16 Stars on Reverse

3265 1798/97 16 Stars on Reverse — Improperly Cleaned — NGC Details. AU. JR-1, R.3. This untoned and briefly circulated early dime displays considerable luster on the portrait, eagle, and borders. The centers are softly impressed, as usual for the issue, and a pair of faded pinscratches intersect on Liberty's jaw. Light hairlines on the right obverse field are of little consequence. All four die varieties of 1798-dated dimes are separately listed in the Guide Book.

## **BUST DIMES**

### Lustrous 1814 JR-1 Dime, MS64

3266 1814 Small Date MS64 NGC. JR-1, R.3. The Small Date obverse has the digits widely spaced. This satiny Choice example is toned jade-green and straw-gold, and appears unabraded save for hair-thin marks near UNITED. NGC has certified 10 submissions of the 1814 Small Date in MS64, with just nine higher-grade pieces (3/11). (#4489)

## Gem 1827 Bust Dime, JR-12 Peripheral Golden Patina

- 3267 1827 MS65 PCGS. JR-12, R.1. The olive-gray and golden-brown toning is most apparent across the lower reverse margin. Lustrous and unmarked with a good strike, although selected softness is seen on star 6 and the shield. The 1827 is plentiful in circulated grades, but Uncirculated examples are scarce and Gems are decidedly rare. Population: 11 in 65, 2 finer (3/11). (#4504)
- 3268 1829 Small 10C MS63 NGC. JR-7, R.1. The plum-red and strawgold centers are encompassed by navy-blue borders. This intricately struck and satiny Capped Bust type coin has a well preserved reverse, and the obverse is only lightly abraded.(#4511)

3269 1829 Large 10C AU55 PCGS. JR-1, R.4. The PCGS insert refers to JR-1 as an "Extra Large 10C," which is true enough since the other Large 10C variety, JR-2, has a clearly smaller 10C than JR-1. Satiny and lightly abraded with deep tan and green toning. (#04511)

## Exquisite Near-Gem 1830 Dime Medium 10C, JR-6

3270 1830 Medium 10C MS64 PCGS. CAC. JR-6, R.2. Caramel-gold toning graces both sides, but is more apparent on the obverse. This lustrous Choice Capped Bust dime is remarkably free from contact, and the grade appears determined only by a minor spot northeast of the 0 in the date. Well struck despite slight blending on the forehead curl and upper fletchings. Population: 26 in 64, 19 finer (3/11). (#4516)

3271 1832 MS62 NGC. JR-2, R.2. This boldly struck and lightly toned Bust dime resembles a Gem upon initial inspection. Only a solitary faint mark on the cheek decides the grade.(#4521)

## Gem JR-6 1832 Dime Moderate Olive-Tan Toning

3272 1832 MS65 NGC. JR-6, R.3. Cream-gray, apple-green, and stone-gray adorn this well struck and satiny Capped Bust Gem. This beautiful type coin appears pristine when examined beneath a loupe, save for a solitary trivial hair-thin mark near star 5. As of (3/11), NGC has certified seven pieces as JR-6, with the present piece the single finest by three grades. (#4521)

3273 1833 MS63+ NGC. JR-10, R.3. A great coin from a scarce die pair. Most of this coin's eye appeal is bound up in its patina, goldorange and blue-violet around much of the borders with silver cores.(#4522)

## Near-Gem 1833 JR-9 Dime Seldom Seen So Fine

3274 1833 MS64 NGC. JR-9, R.2. This variety is most easily attributable by star 13 which is close and presents two points to the curl, and TED in UNITED which is successively higher on the reverse. While fairly common in lower grades, the JR-9 is an important condition rarity at the MS64 grade level. In the JR reference, published in 1984, the finest example known at that time was an AU55. This near-Gem is sharply defined around the peripheries, although there is some strike weakness on some of the central devices on each side. The surfaces are obviously original with light gray patina over most of each side. Each side is exceptionally clean and problem-free, with no obvious surface distractions. (#4522)

#### Richly Toned MS64 1835 JR-9 Dime

3275 1835 MS64 PCGS. JR-9, R.2. The JR-9 is among the more accessible die pairs for the date, and a number of high-end examples have survived, making it popular with type collectors. Rich toning lends this warmly lustrous near-Gem particularly strong eye appeal. Gold-orange, reddish-tan, and sage shadings are separated into outer rings and an inner core on the obverse, but the reverse has a more dappled appearance. (#4527)

## Choice 1835 Bust Dime, JR-9 Smooth, Lustrous Surfaces

3276 1835 MS64 NGC. JR-9, R.2. Golden-brown toning gradually lightens as it approaches the centers. A well struck and highly lustrous near-Gem that has a pristine reverse and only trivial obverse grazes. JR-9 is distinguished by a repunched 3 in the date and an entered-low second T in STATES. (#4527)

#### SEATED DIMES

- 3277 1838 Large Stars MS65 NGC. An impressive Gem with full design elements, this 1838 Large Stars dime has frosty luster beneath rich gold and ivory toning. Minuscule marks are inconsequential. Census: 41 in 65, 38 finer (3/11).(#4568)
- 3278 1838 Large Stars MS65 NGC. Dusky walnut-brown and applegreen dominate this lustrous and needle-sharp Gem. Magnificently preserved, and encased in a prior generation holder. Census: 40 in 65, 38 finer (2/11).

  From The Orchid Collection. (#4568)
- 3279 1844 XF45 PCGS. A lightly worn and richly toned Choice XF example of the "Little Orphan Annie." Rose-to-orange and blue-gray hues strike a rough balance on each side. Population: 13 in 45, 20 finer (3/11).(#4585)

## Elusive 1846 Seated Dime, AU53 Lowest-Mintage Stars Obverse Issue

- 3280 1846 AU53 NGC. Despite all the promotion that the 1844 dime received, the 1846 is the lowest-mintage Stars Obverse issue at 31,300 pieces, and the average certified survivor is apt to grade only VF25-30 or so. (The half dime of the same year is also the lowest-mintage issue of the type.) This AU53 example is silver-white, with a good strike and only a few stray contact marks. Census: 2 in 53, 2 finer (3/11). (#4588)
- 3281 1851 MS63 PCGS. The current numismatic marketplace seems to undervalue Mint State Seated coins, especially the smaller-diameter half dimes and dimes. This piece is a condition rarity in the series, with a low PCGS population. Both sides are deeply toned over frosty luster. Population: 8 in 63, 18 finer (3/11). (#4595)

## Choice 1851 Seated Liberty Dime Underrated Date in High Grade

3282 1851 MS64 PCGS. CAC. A substantial mintage of more than 1 million Seated Liberty dimes was achieved at the Philadelphia Mint in 1851, but many examples were melted in 1853 because of the weight change in silver coinage. The 1851 is an underrated issue in Mint State grades today. The present coin is sharply detailed, with lustrous surfaces and wisps of gold and lavender toning. Housed in a green label holder. Population: 11 in 64, 7 finer (3/11). (#4595)

## 1853-O Arrows Dime, MS64 Conditionally Elusive in Mint State

3283 1853-O Arrows MS64 NGC. With a mintage of 1.1 million pieces, the 1853-O Arrows dime is occasionally available in circulated grades and even lower-end mint condition. It is almost never available in the higher grades of Uncirculated. Only a handful of such coins are known today. The thick, satiny mint luster is nearly brilliant in the centers with peripheral golden-brown and blue patina on each side. The head of Liberty is softly defined, as almost always seen. Close examination with a magnifier reveals a few shallow pinscratches in the left obverse field and a couple in the center of the reverse, but they are indiscernible to the unaided eye. Census: 1 in 64, 1 finer (3/11). (#4604)

#### Interesting Premium Gem 1854 Arrows Dime

- 3284 1854 Arrows MS66 PCGS. This is an interesting and appealing coin, virtually pristine since it left the Mint save for some lovely post-strike cherry-gold patina. The strike is a bit blunt, and some roller marks appear on the upper-reverse high points in particular. Most of the obverse stars have full centril details. Population: 12 in 66, 0 finer (3/11). (#4605)
- 3285 1857 MS64 Prooflike NGC. Silver-white is in the minority here, especially on the obverse, where purple and cobalt-blue prevail. The reverse has a mostly silver center, with less dramatic patina. Prooflike brilliance emanates from both sides, and only a few small ticks including a couple on Liberty's cheek appear to keep this piece from an even finer grade. The strike is a bit blunt on the bowknot. The sole Prooflike of the issue in any grade at NGC (3/11).(#4614)
- 3286 1858 MS65 NGC. CAC. Beautiful peripheral aquamarine, golden-brown, and violet-red bands surround the lightly toned centers. Lustrous and unabraded with moderate incompleteness of strike near the rims. Certified in a prior generation holder. Census: 16 in 65, 10 finer (3/11).(#4616)

#### Premium Gem 1859 Seated Dime

- 3287 1859 MS66 PCGS. CAC. A large mintage of 430,000 Seated Liberty dimes was achieved in 1859, but Premium Gems are quite rare today. The present coin is sharply detailed throughout, an important consideration with this date, since most examples seen are softly struck. The surfaces are lustrous and brilliant, with just a hint of light gold toning. Population: 16 in 66, 14 finer (3/11). (#4619)
- 3288 1865 MS61 NGC. Some dark buildup appears in the date, and on the reverse there are a couple of dark charcoal- and purpletoned areas, along with more traditional gold patina. The piece nonetheless has a lot of appeal remaining, with good luster and few mentionable marks.(#4641)
- 3289 1866 AU55 NGC. A meager mintage of 8,000 Seated Liberty dimes was achieved at the Philadelphia Mint in 1866. The present coin is a lightly circulated specimen, with pale green and ice-blue toning. Census: 1 in 55, 32 finer (3/11).(#4643)

## 1866 Dime, MS65 ★, Scarce Fortin-102b Pronounced Prooflike Fields

- 3290 1866 MS65 ★ NGC. Fortin-102b, R.6. The small postbellum emission of only 8,000 business strikes for the issue nearly guarantees that high-grade survivors will show prooflikeness, as is the case here. The minuscule mintage nonetheless failed to prevent the dies from colliding, as bold clash marks appear on both sides. Tinges of gold and cinnamon accompany a couple of minor ticks that fail to diminish the significant appeal. A bold, raised die line connects the inner upper wreath tips. A nice choice for a date set, and quite a rare variety for the Seated dime specialists. Census: 1 in 65 ★, 9 finer (3/11). (#4643)
- 3291 1873 Arrows MS64 NGC. A sharply detailed Choice specimen of this popular type coin, this piece displays lime-green and cobalt-blue toning. The lustrous surfaces show few signs of contact. Census: 25 in 64, 20 finer (3/11).(#4665)
- 3292 1875-CC Mintmark Above Bow MS65 NGC. This 1875-CC Seated Liberty dime displays the interesting, but not rare, variety with the mintmark positioned inside the wreath. The devices are sharply detailed in most areas, but some softness is noted on the obverse legend. The lustrous surfaces are patinated in shades of light green and gold. Census: 32 in 65, 14 finer (3/11). (#4673)
- 3293 1877 MS66 NGC. Subtle satiny luster swirls beneath thick patina on this Premium Gem. Deep rose-orange toning dominates the obverse, while that side's lavender-violet elements become much more prominent on the reverse. Census: 16 in 66, 6 finer (3/11). (#4682)

## Prooflike 1879 MS67 ★ Seated Dime All-White and Nearly Perfect

- 3294 1879 MS67 ★ Prooflike NGC. This date is often found as Prooflike, which should be little surprise given the low mintage, due to heavy production of silver dollars. Even so, NGC's Star designation for eye appeal is well-justified on this frosty white coin, with noticeable reflectivity evident in the fields and especially deep on the reverse. The surfaces are virtually unabraded. Distinguishable from a proof by an area of incomplete strike on the upper left wreath end. Census in Prooflike: 4 in 67, 2 of which have the Star designation, 1 finer (3/11). (#4687)
- 3295 1883 MS66 PCGS. CAC. The obverse of this Premium Gem has gorgeous gold, rose, and ivory toning, while the reverse is brighter with delicate champagne color. Both sides are frosty and brilliant with sharp design features. Population: 49 in 66, 11 finer (3/11). (#4691)
- 3296 **1890 MS66 NGC.** Medium apricot-brown toning blankets this lustrous and virtually fully struck Premium Gem. An exquisitely preserved representative of a plentiful penultimate issue that becomes scarce in the present grade. Census: 49 in 66, 10 finer (3/11).(#4704)

## Superb Gem 1891 Seated Dime Last in the Series

3297 1891 MS67 PCGS. CAC. Bright and swirling luster is impressive on this final-year Seated dime. A delicate layer of golden patina, occasionally accented in green, enriches much of each side. Pleasingly detailed, if a trifle soft at the margins, with the great preservation demanded of a Superb Gem. Housed in a green label holder. Population: 6 in 67, 0 finer (3/11). (#4706)

## PROOF SEATED DIMES

#### 1857 PR65 Dime, Scarce Early Proof Striking

- 3298 1857 PR65 NGC. An important specimen of this pre-1858 issue with an estimated mintage of just 70 proofs. The devices show little frost, especially the wreath, but both sides display perceptible contrast. Toning is mostly light gray with just a hint of gold along parts of the rims. Census: 9 in 65, 7 finer (3/11). (#4746)
- 3299 1864 PR64 Cameo PCGS. This glittering Choice Cameo proof has bright silver surfaces with delicate peripheral rose toning on each side. The combination of deeply mirrored fields and lustrous, frosty white devices provides exceptional eye appeal. Population: 13 in 64 Cameo, 15 finer (3/11).(#84757)

## 1866 Seated Dime, PR66 Cameo Richly Toned and Deeply Reflective

- 3300 1866 PR66 Cameo NGC. CAC. Electric-blue, cherry-red, and autumn-gold invigorate the peripheries of this sharply struck specimen. Dazzling field reflectivity combines with noticeable frost across the major devices. Under magnification, the fields display delicate vertical lines. A mere 725 proofs and 8,000 business strikes were issued. Census: 12 in 66 Cameo, 3 finer (3/11). (#84759)
- 3301 1869 PR66 Cameo NGC. Only 600 proofs were coined of this post-Civil War issue, of which the present piece is one of the finest handful known at either service with the Cameo designation. Effulgent brilliance bursts through the light, fairly even patina, which features hues of copper and lilac. Some light strike weakness is seen on the upper left (facing) wreath tip, and an interesting raised die line, as made, passes diagonally from the rim at 7 o'clock to the 1 in the date. Census: 7 in 66 Cameo, 1 finer (3/11). (#84762)
- 3302 1871 PR64 PCGS. From a fairly generous proof mintage of 960 pieces, this sharply detailed Choice 1871 Seated Liberty dime displays attractive pale green and violet toning. The mirrored fields show few signs of contact. Population: 33 in 64, 25 finer (3/11). (#4764)
- 3303 1871 PR66 NGC. Speckled gold, blue, and iridescent toning is displayed over fully mirrored fields and frosty devices, masking the light cameo contrast on each side. Census: 11 in 66, 4 finer (3/11). (#4764)
- 3304 1871 PR65 Cameo PCGS. CAC. The centers are high-contrast on each side, brilliant on the obverse with a light golden layer on the reverse. The margins have richer and more obvious color, electric-blue and orange on the obverse with amber-peach ringing the reverse. Population: 6 in 65 Cameo, 1 finer (3/11). (#84764)

#### No Arrows 1873 Dime, PR65 Cameo

- 3305 1873 No Arrows PR65 Cameo PCGS. CAC. Surprisingly richly toned for a Cameo coin, though the immense contrast between the sapphire-blue fields and the ivory-silver devices leaves little room for doubt. A fantastically appealing specimen that bears the Closed 3 logotype, like the rest of the No Arrows silver proofs of the year. Population: 7 in 65 Cameo, 2 finer (3/11). (#84766)
- 3306 1875 PR64 Cameo PCGS. CAC. The surfaces show a range of colors from blue-green to green-gold and burnt-orange, with the patina a touch deeper on the reverse. Strongly frosted devices ensure that the contrast on each side is within the Cameo range. Population: 15 in 64 Cameo, 9 finer (3/11).(#84772)
- 3307 1879 PR66 ★ NGC. CAC. Electric-blue, purple, and gold-orange patina concentrates at the borders of this Premium Gem proof dime with Star designation. Sharply struck and minimally abraded. NGC has graded just 14 numerically finer representatives (3/11). (#4776)
- 3308 1880 PR65 Cameo PCGS. Sharply rendered design elements and brightly mirrored fields provide a degree of contrast, despite the vivid green, golden-brown, and violet toning. The 1880 Seated Liberty dime is rare in PR65 condition with the Cameo designation. Population: 17 in 65 Cameo, 16 finer (3/11).(#84777)

# Cameo PR67 1882 Seated Dime Ex: Sweet Collection

3309 1882 PR67 Cameo NGC. CAC. Ex: Sweet Collection. Though 1,100 proofs were minted for this issue, an ample production for the 19th century, few survivors combine the high contrast and outstanding preservation of this Superb Gem specimen. Thickly frosted devices yield to powerful silver mirrors which show traces of green-gold along the margins. Census: 10 in 67 Cameo, 3 finer (3/11). (#84779)

#### 1884 Seated Dime, PR67 Seldom Encountered Finer

3310 1884 PR67 NGC. Both sides of this Superb Gem proof exhibit deep mirrors around lustrous and sharply detailed devices. Delightful gold, lilac, and blue toning accompanies areas of silver brilliance. Slight contrast exists between the fields and devices, insufficient for a Cameo designation. Census: 19 in 67, 2 finer (3/11). (#4781)

Sparkling 1884 Seated Dime, PR67 Cameo

- 3311 1884 PR67 Cameo PCGS. CAC. This sparkling little jewel, from the low original proof mintage of 875 pieces, boasts lovely silverwhite centers with original cobalt-blue and russet rim toning on each side. Sufficient field-device contrast is abundant for a Cameo designation, and the surfaces are nearly mark-free. Population: 12 in 67 Cameo, 0 finer (3/11). (#84781)
- 3312 1885 PR64+ NGC. Pastel chestnut-gold and lime-green shades grace this satiny Choice proof. The strike is sharp save for Liberty's hair, and the sole detectable marks are hair-thin marks near the right ribbon end and the M in AMERICA.(#4782)
- 3313 1885 PR65 PCGS. A well detailed Gem, with a touch of softness on Liberty's head and the ribbon bow, this specimen displays spectacular pale green and cerulean-blue patina. The surfaces are deeply mirrored and eye appeal is outstanding. Population: 51 in 65, 37 finer (3/11).(#4782)
- 3314 1886 PR65 Cameo PCGS. CAC. Golden peripheral toning is the norm on this Cameo Gem, but the margins also show orange, rose, and sea-green accents, with the reverse adding blue along the right. Gleaming and gorgeous. Population: 9 in 65 Cameo, 5 finer (3/11). (#84783)

# 1888 Seated Dime, PR66 Cameo Lovely Toning Crescents

3315 1888 PR66 Cameo PCGS. CAC. A starkly contrasted piece with flashy fields and delightful toning accents. While most of each side is silver-white, arcs of blue and gold-orange grace the upper obverse, while the reverse has champagne and antique-gold shadings around much of the rims. Population: 9 in 66 Cameo, 2 finer (3/11). (#84785)

#### **BARBER DIMES**

- 3316 1893-O MS64 NGC. CAC. Strong gold-to-orange patina with silver-gray elements never far away. This frosty-satiny near-Gem has attractive design definition for its New Orleans issue. Census: 41 in 64, 16 finer (3/11).(#4801)
- 3317 1895 MS65 PCGS. The 1895 Philadelphia dime is a low-mintage production amounting to only 690,000 coins, and elusive at the Gem level. This satiny piece is silver-gray with accents of gold and radiant luster, separated from an even finer grade by minor slide marks on the cheek. Population: 12 in 65, 12 finer (3/11). (#4806)

## 1895-O Dime, AU55 Premier Rarity Among Barber Dimes

- 3318 1895-O AU55 PCGS. The 1895-O is the prime rarity in the Barber dime series. Only 440,000 pieces were produced, and it is rarely seen in Uncirculated grades (ranking first in mint condition among the 74 issues). This Choice AU piece has charcoal-gray toning over both sides, color of sufficient depth to conceal the remaining luster. Only slight friction is noted, and the only mentionable marks are a couple of small ones on the face and neck of Liberty. Population: 11 in 55, 40 finer (3/11). (#4807)
- 3319 1897-O MS64 PCGS. A key-date Barber dime with a mintage of 666,000 pieces, the 1897-O is popular in all grades, even though the spread between Good and Mint State is surprisingly small. The obverse is silvery and brilliant, while the reverse boasts tinges of golden-brown near the rims. This piece shows some roller marks on Liberty's cheek from the small unstruck area present there, but otherwise there are no singular distractions. Population: 24 in 64, 19 finer (3/11).(#4813)

## Choice 1899-O Barber Dime Sharply Detailed Branch-Mint Specimen

3320 1899-O MS64 PCGS. Golden-brown and forest-green shades embrace the borders, while the lighter centers are pearl-gray. This pinpoint-sharp near-Gem has satiny luster and an unperturbed appearance. The mintage of 2.65 million pieces appears plentiful, but Mint State survivors of this popular O-mint are quite scarce. Population: 8 in 64, 15 finer (3/11). (#4819)

#### Well-Defined 1899-S Dime, MS65

3321 1899-S MS65 PCGS. A well-defined representative of the little-saved 1899-S dime issue, pleasingly preserved with impressive and slightly frosty luster under layers of gold, peach, and blue-green patina which are stronger on the obverse. Minimally marked save for a single small cut across the tip of the bust. Population: 9 in 65, 10 finer (3/11). (#4820)

#### Peach-Toned 1900-O Dime, MS65

3322 1900-O MS65 PCGS. CAC. Just over 2 million pieces were produced for this turn-of-the-century New Orleans dime issue, but most circulated heavily, and this Gem is among the elite survivors. On the satiny obverse, peach patina is more like an overtone, but the saturated hue blossoms on the smooth reverse. Population: 22 in 65, 5 finer (3/11). (#4822)

#### Delicately Toned MS66 1900-S Dime

- 3323 1900-S MS66 PCGS. CAC. Well-defined through the centers with only occasional bluntness on peripheral elements. Bright luster blossoms on each side under a delicate layer of gold, orange, and peach patina. Fantastic eye appeal for this turn-of-the-century S-mint Barber issue. Population: 7 in 66, 1 finer (3/11). (#4823)
- 3324 1902-S MS64 PCGS. CAC. Green-gold and blue-gray with distinct pink elements intermixed. Soft but delightful luster is key to the eye appeal of this well struck near-Gem. Population: 13 in 64, 16 finer (3/11).(#4829)
- 3325 1903-S AU58 NGC. Though more than half a million examples were struck, this S-mint dime issue is a challenge even in better circulated grades. This piece has just a touch of rub on softly frosted surfaces which show peach, gold, blue-green, and pale gray toning. The I in DIME is curiously flat. Census: 6 in 58, 26 finer (3/11). (#4832)
- 3326 1903-S MS62 PCGS. The 1903-S is one of the dozen or so sub-1 million-coin issues among the Barber dimes, at 613,300 pieces. This MS62 example is certified in an early green-label holder, with deep amber-gold obverse toning complementing iridescent rim colors. The reverse is more lightly patinated. A few stray marks, including a small scrape below DIME, appear to limit an even finer grade, but much eye appeal is present here for the grade level. Population: 7 in 62, 42 finer (3/11).(#4832)
- 3327 1904 MS65 PCGS. PCGS has only certified a handful of finer pieces. This Gem is fully lustrous with frosty silver surfaces beneath light gold and iridescent toning. Population: 28 in 65, 7 finer (3/11).(#4833)
- 3328 1906-O MS66 NGC. The obverse of this sharply detailed Premium Gem is patinated in light shades of gold and ice-blue toning, while the reverse displays darker golden-brown and violet hues. Census: 11 in 66, 7 finer (3/11).(#4840)

#### Condition Rarity MS66 1907-D Dime

- 3329 1907-D MS66 NGC. Beautifully toned with golden-brown centers bounded by blue and pearl-gray shades. Lustrous and gorgeously preserved with magnificent eye appeal. Although more than 4 million pieces were struck, the 1907-D is very scarce in Mint State, and few such examples can compare with the present coin. Census: 8 in 66, 2 finer (3/11). (#4843)
- 3330 1910 MS66 NGC. Chestnut-gold and olive-green enriches this well preserved and needle-sharp Premium Gem. A desirable Barber type coin encapsulated in a prior generation holder. Census: 28 in 66, 3 finer (2/11).

  From The Orchid Collection. (#4854)

- 3331 1910 MS66 NGC. CAC. Swirling, frosty luster is silver with a faint peach overtone. A well-defined and immensely appealing Premium Gem from a little-saved issue. Census: 28 in 66, 3 finer (3/11).(#4854)
- 3332 1912 MS66 PCGS. CAC. Apricot, olive, and powder-blue enrich this crisply struck and carefully preserved Premium Gem. This high grade Barber type coin is encapsulated in a green label holder. Population: 43 in 66, 4 finer (3/11).(#4860)

### 1914-D Dime, MS67 ★, Crescent Toning Finest Certified

3333 1914-D MS67 ★ NGC. CAC. While the 1914-D dime may be one of the more available issues in lower (MS62-64) grades it is certainly scarce, perhaps even underrated in MS67 condition. Unlike many 1914-D dimes, this piece has bright, flashy mint frost and each side is accented with a long crescent of multicolored toning around the rims. Strongly struck throughout. Census: 1 in 67 ★, 0 finer (3/11). (#4866)

#### PROOF BARBER DIMES

- 3334 1892 PR64 PCGS. CAC. Deep multicolored accents bathe the obverse on this first-year near-Gem proof, while the reverse shows deep aquamarine tones. A few apparent luster grazes in the obverse right field are made bolder by the deep toning, but this piece should prove a prize for toning enthusiasts.(#4875)
- 3335 1892 PR66 Cameo NGC. CAC. Though lightly frosted by the standards of certain later issues, the devices on this first-year Barber dime supply ample contrast with pale gray fields. Flashy with occasional touches of green-gold away from the devices. Census: 6 in 66 Cameo, 14 finer (3/11).(#84875)
- 3336 1893 PR64 Cameo PCGS. This Choice proof 1893 Barber dime displays impressive cameo contrast between the sharply detailed frosty devices and the brightly mirrored fields. Traces of light gold toning are evident, and eye appeal is outstanding. Population: 9 in 64 Cameo, 41 finer (3/11).(#84877)
- 3337 1894 PR65 NGC. The obverse of this Gem proof is deeply toned in sky-blue and emerald-green, and the reverse is lighter with a gold center and peripheral rose and blue. Both sides suggest light cameo contrast although no designation is assigned.(#4878)

## 1894 Dime, PR67 Cameo Dazzling, Near-Perfect Surfaces

3338 1894 PR67 Cameo PCGS. CAC. The mintage of 972 proofs for the 1894 dime is second-highest in the series, trailing only the popular 1892. While dimes from this year were generally well produced, there are few extant in PR67 condition. Only one other PCGS coin has been so graded, while NGC has certified nine pieces with two finer (3/11). This dazzling, nearly untoned proof striking has deeply mirrored fields with sharply contrasting frost over the devices. Both sides approach technical perfection, as one would expect from a coin in this grade.

From The Peter Kevorkian Collection. (#84878)

#### 1895 Dime, PR66, Premium Issue Among Proofs

3339 1895 PR66 NGC. The 1895 proof dime has always brought a premium because of date pressure from the seldom-seen business strikes of this issue. This example has a splash of cinnamon toning on the otherwise brilliant silver obverse with delicate and subdued gray-lilac toning over most of the reverse. This Premium Gem proof has satiny devices with deeply mirrored fields, just shy of a Cameo designation.

From The B & D Collection. (#4879)

#### 1895 Barber Dime, Richly Toned PR67

- 3340 1895 PR67 PCGS. CAC. Captivating toning is seen on both sides with splashes of aqua-blue, purple, and golden-brown. The deeply reflective fields establish a bright background and provide modest contrast with lightly frosted motifs. The design elements are fully struck, and impeccably preserved surfaces are apparent on both sides. Population: 15 in 67, 0 finer (3/11). (#4879)
- 3341 1895 PR64 Ultra Cameo NGC. CAC. Profound reflectivity is a match for the thick frost on this near-Gem, and the result is an outstanding Ultra Cameo effect. Gleaming silver-white surfaces show minor faults that are trivial in the context of the overall eye appeal. (#94879)

#### 1897 Barber Dime, PR67 Undesignated Cameo Proof

3342 1897 PR67 PCGS. CAC. Dusky iridescent toning is displayed on both sides of this Superb Gem proof. The devices are lustrous with surrounding mirrored fields, creating clear contrast, although the toning prevents any designation. Both sides have an obvious cartwheel appearance. Population: 15 in 67, 3 finer (3/11). (#4881)

## 1897 Dime, PR67 Cameo Lower Mintage Proof Issue

3343 1897 PR67 Cameo PCGS. Ex: Bruce Scher Collection. A fully struck specimen, the devices are decidedly frosted and appear to approach the Deep Cameo designation. Exquisitely struck and immaculately preserved. The mintage of 731 pieces is the lowest of the series prior to 1904, not including the 1894-S rarity. Population: 11 in 67 Cameo, 1 finer (3/11).

From The Peter Kevorkian Collection. (#84881)

#### Intensely Contrasted 1898 Dime, PR67 Cameo

1898 PR67 Cameo PCGS. CAC. We are at a loss to explain why this stunning piece failed to achieve a Deep Cameo designation, even though the intense field-device contrast is a pinch deeper on the reverse than the obverse. This silver-white coin boasts a marvelous crystalline appearance, the result of a total lack of perceptible color and pristine surfaces throughout. Population: 7 in 67 Cameo, 1 finer (3/11).

From The Peter Kevorkian Collection. (#84882)

## PR67 Cameo 1898 Dime Exquisite Production

- 3345 1898 PR67 Cameo PCGS. CAC. Only 735 proof Barber dimes were minted in 1898, but the quality of the coins was simply exquisite. Many examples of the date have earned the coveted Cameo designation, like the coin offered here. The deeply mirrored fields contrast strongly with the sharply impressed devices beneath the rich rose and blue toning on both sides. Technically exemplary. Population: 7 in 67 Cameo, 1 finer (3/11). (#84882)
- 3346 1900 PR66 PCGS Secure. Deep obverse patina runs the gamut from crimson to jade to ice-blue, while the reverse is a more subdued but equally lovely pale citrine color. Sharply struck throughout, and seemingly contact-free. Population: 24 in 66, 10 finer (3/11).(#4884)

# Superb Gem Proof 1900 Barber Dime Vivid Patina, Outstanding Eye Appeal

3347 1900 PR67 PCGS Secure. CAC. Darkly patinated in shades of green and cobalt-blue, this splendid Superb Gem displays razor-sharp details on the ribbon bow and wreath. The fields are mirrored and the devices show pronounced frosty texture. This piece might qualify as a Cameo if the toning did not dampen the contrast. Population: 9 in 67, 1 finer (3/11). (#4884)

## 1906 Barber Dime, PR66 Cameo Only Two Finer PCGS Coins

- 3348 1906 PR66 Cameo PCGS. CAC. This is only the fifth auction appearance of a 1906 Barber dime in PR66 Cameo since our archives began in 1993. Field to device contrast was discouraged at the mint in the early 20th century. Both sides are brilliant and exquisite with a ring of medium gold toning near the borders. Population: 7 in 66 Cameo, 2 finer (3/11). From The Peter Kevorkian Collection. (#84890)
- 3349 1909 PR65 NGC. Boldly mirrored with rich color. Cerulean and gold shadings appear on patches on the obverse and as outer ringtoning on the reverse. Housed in a prior-generation holder. From The Dr. Donald M. Gilner Collection. (#4893)

#### 1909 Barber Dime, PR66 Cameo

- 3350 1909 PR66 Cameo PCGS. CAC. This brilliant Premium Gem Cameo proof Barber dime has wonderful contrast with brilliant surfaces that exhibit delicate gold toning at the right part of the obverse and reverse. A few tiny contact marks and spots are inconsequential. Population: 6 in 66 Cameo, 1 finer (3/11). (#84893)
- 3351 1911 PR65 NGC. Beautiful jade-green, fire-red, and canary-gold illuminate the obverse. The reverse is variegated cream-gray and aquamarine. A scant 543 proofs were issued. Certified in a former generation holder. Census: 49 in 65, 49 finer (2/11). From The Orchid Collection. (#4895)
- 3352 1912 PR66 NGC. The 1912 proof Barber dime is even more difficult to locate than its mintage of 700 pieces would suggest. The present coin is a razor-sharp Premium Gem, with bright mirrors and attractive gold, green, and sky-blue toning. Census: 16 in 66, 10 finer (3/11).(#4896)
- 3353 1912 PR66 Cameo PCGS. A splendid Premium Gem Cameo proof, this 1912 Barber dime has full mint brilliance with untoned silver surfaces and trivial marks visible only with a loupe. Population: 4 in 66 Cameo, 2 finer (3/11).(#84896)

# 1913 Dime, PR66 Cameo Bright, Flashy Fields on Each Side

- 3354 1913 PR66 Cameo PCGS. CAC. The depth of mirroring in the fields is extraordinary. Both obverse and reverse are well-balanced in overall appearance with flashy fields and noticeably contrasting, frosted devices. There are no noticeable surface defects on either side of this exceptional proof striking. Population: 7 in 66 Cameo, 1 finer (3/11).

  From The Peter Kevorkian Collection. (#84897)
- 3355 1914 PR65 Cameo PCGS. CAC. Though not boldly frosted like 19th century Barber proofs, this coin does have appreciable field-to-device contrast, especially on the obverse. Gleaming mirrors show peripheral traces of green-gold color. Population: 8 in 65 Cameo, 3 finer (3/11).(#84898)

## Multicolor PR66 1915 Dime Just 450 Proofs Struck

3356 1915 PR66 NGC. Iridescent peach-red, sun-gold, and oceanblue dominate the obverse, while the reverse is cobalt-blue and ruby-red with peripheral lime and chestnut toning. A fully struck and flawless representative of the low proof mintage of 450 pieces. Encased in a prior generation holder. (#4899)

#### **MERCURY DIMES**

- 3357 1916-D VG8 NGC. A well-worn but still-glossy example of the first-year key of the Mercury dime series. The obverse has strong golden overtones, while the reverse offers duskier rose hues. (#4906)
- 3358 1916-D VG10 NGC. Very Good details with excellent surface quality. This blue-infused key-date dime wore smoothly, and that makes it an ideal selection to complete an otherwise midrange date set of Mercury dimes.(#4906)

#### Seldom-Seen 1916-D Mercury Dime, VF20

3359 1916-D VF20 ANACS. Although it seems that 1916-D Mercury dimes in AG through Very Good grades are legion at most coin shows, those ranging from Very Fine through XF-AU are particularly elusive. This key Very Fine example has attractive light pinkish-gold patina and shows the mintmark high and tilted slightly to the right, closer to the leaf than the stem, one of the four authenticated positions. (#4906)

## Coveted 1916-D Mercury Dime VF Sharpness

3360 1916-D — Improperly Cleaned — NGC Details. VF. A well detailed but slightly glossy example of this famous low mintage key. Most '16-D survivors are in VG or lower grades, and lack the sharpness of the present piece, which has bold legends and close to unbroken vertical lines on the fasces. Light almond-tan toning visits the borders, and there are no noticeable marks. (#4906)

#### Extremely Fine 1916-D Dime, Lightly Toned

3361 1916-D XF40 ANACS. The 1916-D dime is avidly sought after in all grades because there are collectors of this popular series throughout the grading spectrum. It is most frequently encountered in AG, Good, and VG. Midrange examples, such as this one, are usually locked up in sets. This piece has even high point friction, light rose toning, and only one mark (located in the left obverse field). (#4906)

#### Key 1916-D Mercury Dime, XF40

3362 1916-D XF40 PCGS. CAC. Original light blue and golden-brown patina enhances the surfaces of this key-date Mercury dime. The 1916-D represents the first date of the design, and boasts the lowest mintage of the series, making it one of the most sought-after 20th century U.S. coins. The design elements show a little honest wear on this piece, but the pleasing surfaces are lightly abraded. (#4906)

### Choice XF 1916-D Mercury Dime Elusive Grade Level for This Key

3363 1916-D XF45 PCGS. CAC. The Choice XF grade level is an extremely elusive one at which to find nice examples of the key 1916-D dime such as the present piece. All of the vertical fasces bands are clearly articulated, and much pleasing detail remains on the winged cap of Liberty and the olive wreath. The nickel-gray surfaces with rose accents show moderate luster remaining, with excellent eye appeal. (#4906)

#### Top-Shelf 1917-S Dime, MS67 Full Bands

3364 1917-8 MS67 Full Bands PCGS. With just 10 MS67 Full Bands examples of this early San Francisco Mercury dime issue known to PCGS and none finer (3/11), this coin is a Registry Set collector essential. More than that, though, it is simply a beautiful example. The detail is bold not only on the bands but on the intricate curls of Liberty's hair. Strong luster swirls on carefully preserved surfaces under light layers of patina. Colors include pastel-gold, pale lavender, suggestions of blue, and occasional faint windows into silver-white. Great technical preservation with eye appeal to match. (#4915)

#### Condition Rarity MS67 Full Bands 1918 Dime

3365 1918 MS67 Full Bands NGC. By the third year of production, the novelty had worn off for the Mercury dime, and the survival of high-end examples from 1918 on was largely a matter of chance. That chance has led this MS67 Full Bands example to become one of the finest survivors known. Strong, satiny luster shows a few shiny patches and light gold-green toning on parts of otherwise silver-white surfaces. Census: 3 in 67 Full Bands, 0 finer (3/11). (#4917)

3366 1919 MS66+ Full Bands PCGS. CAC. Although PCGS has certified 50 examples in MS66 Full Bands, this piece is one of just two that have been awarded the Plus designation. Both sides display frosty silver luster with bold design elements and a complete absence of toning. Population: 2 in 66+ Full Bands, 9 finer (3/11). (#4923)

## 1921-D Dime, MS66 Key Low-Mintage Issue

3367 1921-D MS66 PCGS. CAC. While generally presenting as a brilliant coin, speckles of light gold and soft bluish-violet also adhere to the lustrous surfaces of this Premium Gem. The design features are well impressed, including those around the periphery, an area this is often weak on this issue. Impeccably preserved and highly appealing. Population: 10 in 66, 0 finer (3/11). (#4936)

#### Popular 1921-D Mercury Dime, MS64 Full Bands

3368 1921-D MS64 Full Bands NGC. The Mercury dime series is a classic design from the early-20th century coinage renaissance, and this 1921-D certified MS64 Full Bands is likely high on the want list of many a series enthusiast. The frosty silver-gray surfaces are thoroughly engaging and appear free of post-Mint defects, although a small planchet flaw occurs on the neck. Well-struck in the centers, with some typical bluntness on a few letter tops. Census: 47 in 64 Full Bands, 51 finer (3/11). (#4937)

# Full Bands MS66 1921-D Dime A Much Better Date

display delicate honey-gold and gunmetal shades. Immaculate save for a solitary hair-thin vertical mark on Liberty's wing. The occasional peripheral letter shows slight incompleteness of strike. The two scarce 1921-dated issues are low mintage because of unprecedented silver dollar coinage that year. Census: 12 in 66 Full Bands, 2 finer (3/11). (#4937)

#### 1923-S Mercury Dime, MS64+ Full Bands

3370 1923-S MS64+ Full Bands PCGS. CAC. The 1923-S Mercury dime is often found with a weak peripheral strike and flat central bands. Neither of those conditions applies to the present coin, which displays sharply detailed devices throughout and full definition on all bands. The lustrous surfaces exhibit vibrant mint luster and hints of light gold and ice-blue toning. Population: 1 in 64+ Full Bands, 37 finer (3/11). (#4941)

3371 1925-D MS64 Full Bands PCGS. At first glance this brilliant and sharply struck piece has the appearance of a Gem or finer coin, but it is "merely" a Choice Mint state example. The limiting factor appears to be light hairlines at the lower obverse. PCGS has only certified 56 finer Full Bands examples (3/11).(#4951)

## MS67+ Full Bands 1934-D Dime Among Finest Certified

- 3372 1934-D MS67+ Full Bands PCGS. CAC. Moderate goldenbrown, jade-green, and lavender toning encompasses this thoroughly lustrous Superb Gem. The reverse appears immaculate, and the obverse exhibits only inconsequential grazes. Well struck with only occasional trivial inexactness on the legends approaching the rim. Population: 3 in 67+ Full Bands, none finer (3/11). (#4991)
- 3373 1937-S MS67 Full Bands PCGS. CAC. Only one finer submission has been examined at PCGS. This piece has subdued mint frost with bold design features and hints of iridescence. A stunning Superb Gem with full band detail on the reverse. Population: 79 in 67 Full Bands, 1 finer (3/11).(#5009)
- 3374 1939-D MS68 Full Bands PCGS. CAC. Blushes of orange and lemon enrich the left borders of this essentially pristine Superb Gem. Dappled forest-green and lilac visit the reverse field. Encased in a green label holder.(#5019)

#### Dazzling MS68 Full Bands 1941 Dime

- 3375 1941 MS68 Full Bands PCGS. Remarkable fire-red, lemon-gold, lime-green, and gunmetal-gray toning occupies the obverse. The reverse displays more subtle indications of lilac, lime, and sun-gold. The centers are fully struck, and only a single hair-thin graze near the mouth precludes perfection. Population: 6 in 68 Full Bands, 0 finer (3/11). (#5029)
- 3376 1942/1 AU50 PCGS. CAC. FS-101. An obvious overdate with the underdigit 1 at the left edge of the 2 in the date. Luster glimmers from the legends and device recesses of this pearl-gray and caramel-gold key-date dime.(#5036)
- 3377 1942/1 AU55 NGC. FS-101. The cartwheel luster is essentially complete, but the fasces bands show a trace of wear. A lightly abraded and attractive example of this desirable and obvious wartime overdate.(#5036)
- 3378 1942/1-D XF45 NGC. FS-101. The base of a 41 from a prior hub impression is evident slightly west of the 42 in the date. Although lightly circulated, this pearl-gray key date dime has no noticeable marks and displays ample glimmers of luster within the legends. (#5040)
- 3379 1945-S MS67 Full Bands PCGS. Knob S. A brilliant and thoroughly lustrous Superb Gem. Both sides appear pristine, and the strike is intricate except for a trace of spreading on the letters near the rim. PCGS has certified just three pieces finer (3/11). (#5061)

#### PROOF MERCURY DIMES

- 3380 1936 PR65 PCGS. Brilliant surfaces reveal no marks or hairlines. This example is for the collector who desires untoned coins. (#5071)
- 3381 1936 PR66 PCGS. A sharply detailed Premium Gem from the first year of the Mint's modern proof offerings. The deeply reflective surfaces display a few wisps of gold toning. Only 4,130 pieces minted.(#5071)

### 1936 Mercury Dime, PR67 First Proof of the Series

- 3382 1936 PR67 NGC. The obverse of this Superb Gem proof has light gold and violet toning with deeper gold on the reverse. Both sides have mirrored fields with sharply detailed and satiny design motifs. A splendid proof Mercury dime with few peers. Census: 80 in 67, 1 finer (3/11). (#5071)
- 3383 1937 PR67 PCGS. CAC. This sharply detailed Superb Gem is an outstanding example from the second year of the modern proof era. Both devices and fields were struck with a brilliant finish, and this specimen shows no trace of toning. (#5072)

# Radiant 1937 Dime, PR68 None Finer at Either Service

- 3384 1937 PR68 PCGS. This silver-white Superb Gem is among a couple of dozen at the PR68 grade level at PCGS, with none finer (3/11). The strike is absolute throughout, with intense, radiant luster and absolutely no impairments of any sort. Glimpses of various colors appear only under a loupe. A marvelous potential type coin. (#5072)
- 3385 1938 PR67 PCGS. CAC. The old-timey name for liquid mercury, quicksilver, seems more than apt for this Mercury dime, which shows almost no contrast, like most of the proofs of this era. A loupe (or a good eye) reveals a slight tinge of gold, and either will reveal the excellent eye appeal and full strike. PCGS has certified only five submissions finer (3/11).(#5073)

#### 1938 Mercury Dime, PR68 Tied for Finest Certified

- 3386 1938 PR68 NGC. An extraordinary Superb Gem proof, this 1938 is tied for the finest certified. Both sides have milky white surfaces with full mirror fields, satiny devices, and peripheral iridescent toning that is especially vivid at the lower obverse and reverse. Census: 35 in 68, 0 finer (2/11). (#5073)
- 3387 1939 PR68 NGC. Liquid-silver surfaces prevail on both sides of this stunning Mercury dime proof, among the finest of the issue certified at either service. The strike is less than absolute on a few of the devices, as made. Census: 60 in 68, 0 finer (3/11). (#5074)
- 3388 1939 PR68 PCGS. This Superb Gem proof displays a touch more contrast than usual on this series, mostly known for its contrastless nature. A touch of purple-amber rim toning on each side also provides added surface texture. Among the finest survivors of the proof mintage exceeding 9,000 coins. Population: 34 in 68, 0 finer (3/11).(#5074)
- 3389 1939 PR68 NGC. Exactingly detailed with moderately reflective mirrors. Faint gold-to-green border toning adds color to each side of this carefully preserved specimen. Census: 60 in 68, 0 finer (2/11). From The Dr. Donald M. Gilner Collection. (#5074)
- 3390 1942 PR68 NGC. CAC. This incredible PR68 Mercury dime combines near-perfect technical quality with tremendous eye appeal. The design elements are fully detailed, and the brightly reflective surfaces offer vivid green, violet, and ice-blue toning. Only one coin certified finer (3/11).(#5077)
- 3391 1942 PR68 NGC. CAC. A virtually perfect specimen of this popular Mercury dime, the last proof issued until 1950. This magnificent specimen displays razor-sharp devices and blinding reflective surfaces, with intense green, amber, and ice-blue toning. Only one coin certified finer (3/11).(#5077)

#### ROOSEVELT DIMES

3392 Complete Set of Circulation-Strike Roosevelt Silver Dimes MS67 NGC. Each 90% silver Roosevelt dime in this lot is a Superb Gem certified by NGC, and the coins are uniformly appealing. Most of these MS67 NGC pieces are largely untoned with strong luster, with the following exceptions: 1946-S MS67 Full Torch, sharply struck and brilliant with only four finer Full Torch examples graded by NGC (1/11); 1947-D, dappled golden-tan and rose toning over the obverse with subtler patina on the lustrous reverse; 1947-S, whispers of ice-blue patina and frosty luster; 1948, delicate cream and gold patina over lovely luster; 1948-D, vibrant luster and hints of sky-blue toning; 1949, elegant gold and powder-blue toning on each side with a largely brilliant reverse center; 1950-D, pale champagne patina over strongly lustrous surfaces; and the 1951-D, rich amber and crimson peripheral toning on the obverse.(Total: 48 coins)

#### 1949-D Roosevelt Dime, MS68

- 3393 1949-D MS68 PCGS. Eye-catching shades of golden-brown and ice-blue toning grace the surfaces of this magnificent Roosevelt dime. The devices are well detailed, with just a touch of softness on the reverse elements, and the lustrous fields are virtually unmarked. Population: 6 in 68, 0 finer (3/11). (#5092)
- 3394 1954-S MS67 Full Bands PCGS. A Roosevelt dime issue seldom seen at this level and never finer. The present Superb Gem boasts deep peripheral patina in amber-gold and saffron on the obverse, with olive and russet on the reverse. Both pairs of torch bands are absolutely full. Population: 8 in 67 Full Bands, 0 finer (3/11). (#85108)

# PROOF ROOSEVELT DIMES

- 3395 1970 No S PR69 NGC. A low-contrast but high-appeal example of this No S proof variant. Subtle gold-orange accents visit the borders of the near-pristine surfaces. Census: 9 in 69, 0 finer (3/11). (#5248)
- 3396 Pair of 1983 Proof Sets With "No S" Dimes. Each set in the original government packaging, the dimes showing Deep Cameo contrast under light gold and blue toning. Our unofficial estimated condition for the dimes is Superb Gem, perhaps a point finer. (Total: 10 coins)

## TWENTY CENT PIECES

3397 1875-S MS62 PCGS. FS-302. A two-toned approach on the obverse, silver with some purple accents, characterizes this example of the most available twenty cent issue. The reverse is brilliant. There is a misplaced digit in the rims, and the mintmark is repunched. Some thin scrapes on the obverse preclude an even finer grade. (#5298)

# 1875-S Twenty Cent Piece, MS64 Lustrous, Toned Around the Margins

3398 1875-S MS64 NGC. The 1875-S is the only twenty cent issue that is relatively available; the other business strikes have much lower mintages and availability. As with most examples of this issue, the mint luster is strong and frosted. The striking details are almost complete, with only slight weakness seen at the top of the eagle's left (facing) wing. Much of the original brilliance remains, with light golden-russet patina around the margins. (#5298)

#### PROOF TWENTY CENT PIECES

### 1876 Twenty Cent Piece Deeply Reflective PR65

3399 1876 PR65 PCGS. There is never any doubt about the status of twenty cent proofs. They seem to have the most deeply mirrored fields of any 19th century type coins. The fields on this piece are so deeply reflective that the medium-density teal and violet toning cannot subdue the contrast against the devices on each side (although it is unacknowledged by PCGS). (#5304)

# 1877 Twenty Cent Piece, PR62 Proof-Only Issue

3400 1877 PR62 NGC. The 1877 twenty cent piece boasts a series-low proof-only mintage of 350 pieces, making the date scarce to rare in all grades. The coin offered here is sharply detailed, with slightly hazy, reflective fields and traces of light golden toning. A few minor field hairlines explain the grade.

From The Dustinn (Dusty) Lee Gibson Collection. (#5305)

# Select Proof 1877 Twenty Cent Piece Only 350 Examples Minted

3401 1877 PR63 PCGS. Twenty cent pieces were only coined in proof format in 1877, and the mintage was an extremely low 350 pieces. The coin offered here is a sharply detailed Select proof, with dark blue and golden-brown toning. The fields remain brightly reflective under the patina. Population: 73 in 63, 88 finer (3/11). From The Dustinn (Dusty) Lee Gibson Collection. (#5305)

# **EARLY QUARTER**

#### Popular 1796 B-2 Quarter Dollar, Fine Details

3402 1796 — Improperly Cleaned — NGC Details. Fine. B-2, R.3. The top of the 6 touches the bust, which is the primary difference between this more frequently found variety and the other, slightly scarcer variety. The scarcer B-1 die variety has a low 6 that is distant from the drapery. This piece has light gray surfaces from cleaning, with some darker peripheral toning on the obverse.

# **BUST QUARTERS**

3403 1815 VF35 NGC. B-1, R.1. Sole die pairing for the year. A nice midgrade silver-gray example, with lighter high points and well-struck surfaces that show some reverse die clashing. (#5321)

#### Choice AU 1818 Quarter, B-3

- 3404 1818 AU55 PCGS. CAC. B-3, R.3. Golden-brown, plum-mauve, and blue-green toning embraces this lightly circulated 1818 quarter. Luster outlines design elements, and the strike is good aside from the joint of the left (facing) wing. Occasional minor field marks are of little import. The dies are double clashed and exhibit slender radial cracks at 7:30 on the obverse and 5 o'clock on the reverse. (#5322)
- 3405 1821 XF40 PCGS. CAC. B-4, R.3. This is a nice midgrade example of this scarce early quarter variety, with silver-gray surfaces that boast good eye appeal overall, amid muted luster and a paucity of mentionable contact. We believe the small rectangular indent above the denomination is Mint-made.(#5331)
- 3406 1821 Reverse Scratched NGC Details. XF. B-4, R.3. The cream-gray and walnut-brown toning deepens to gray near the rims. Parallel scratches are present on the eagle's shield, head, and left (facing) wing. The reverse has minor edge marks at 7 o'clock, and a pinscratch is noted beneath Liberty's ear. (#5331)

### 1824/2 B-1 Quarter, VF30 An Underrated Issue

- 3407 1824/2 VF30 PCGS. B-1, R.3. The most famous Capped Bust quarter dollar is the 1823 rarity that overshadows the 1824/2 issue. Only one die pair of the latter is known, and this piece is a delightful representative. The 1824/2 is an underrated issue, and few are known in higher grades with only 40 better pieces certified at PCGS (3/11). Both sides have pleasing pewter-gray surfaces with heather overtones. A few handling marks are expected at the grade level. (#5335)
- 3408 1825/4/3 AU55 NGC. B-2, R.2. The more accessible of two 1825/4 die pairs for the year. Distinctly rubbed but decidedly lustrous with pale blue accents in the middles and a few darker orange-sage splashes at the margins.(#5336)
- 3409 1836 Artificial Toning NGC Details. Unc. B-3, R.1. Lengthy die cracks on each side provide prompt variety identification. This nicely struck Bust type coin shimmers with luster beneath the richly blended golden-tan and jade-green toning.

# SEATED QUARTERS

3410 1843 MS64 NGC. Both sides of this near-Gem display pleasing luster despite the depth of greenish-gold and reddish-tan obverse toning and gray and reddish patina on the reverse. A well struck and minimally marked specimen. Scarce in Mint State. Census: 11 in 64, 4 finer (3/11).(#5404)

#### Patinated Near-Gem 1849 Quarter

3411 1849 MS64 NGC. Aquamarine toning throughout the margins bounds the lilac-tinged fields and devices. This precisely struck Choice quarter is splendidly unabraded and displays ample satin luster. A small rim die break at 4 o'clock may be of interest to the specialist. Census: 5 in 64, 2 finer (3/11). (#5413)

#### 1849-O Quarter, Fine 12 Scarce Low-Mintage Issue

- 3412 1849-O Fine 12 NGC. The mintage of the 1849-O is uncertain as it is included with the 1850-O, but it is estimated to be 16,000 pieces. Survivors are scattered through all circulated grades, but only a handful of Uncs are known. This original, circulated piece shows the usual soft definition on the design elements. The surfaces are free from any objectionable handling marks. The devices have an outline of charcoal-gray with much lighter silver-rose accents over the high points. (#5414)
- 3413 1854 Arrows MS63 PCGS. This almond-gold and pearl-gray short-lived type coin is well struck and refreshingly unabraded. Luster is particularly vibrant near the rims. The left arrowhead is lightly repunched near the tip. Certified in a green label holder. (#5432)
- 3414 1854 Arrows MS63 NGC. This silver-white Select 1854 Arrows quarter might achieve an even finer grade were it not for some minor strike weakness on the reverse at the left shield border, along with some light die grease on Liberty's sandal area. Interesting peripheral die cracks occur on each side. A nice example for the grade.(#5432)
- 3415 1854 Arrows MS63 NGC. A few faint hairlines and trivial surface marks separate this Select Mint State piece from a higher grade. Both sides are brilliant and sharply defined with frosty luster and peripheral gold toning.(#5432)

## 1857 Seated Liberty Quarter, MS65 Few High-Grade Survivors

- 3416 1857 MS65 NGC. Nearly 10 million 1857 quarters were minted, making it the fifth highest-mintage issue in the entire series. However, high-grade examples are rarely encountered with only 58 finer NGC certified pieces (3/11).. This Gem displays full mint brilliance with satiny silver luster and bold design features. Both sides have reflective, nearly prooflike fields, creating noticeable contrast. (#5442)
- 3417 1858-S VF30 PCGS. This rare-date early S-mint Seated quarter has an unmarked appearance and medium walnut-tan and stone-gray toning. Minor dark residue is noted near the first 8 in the date. (#5447)
- 3418 1864-S VG10 PCGS. The stone-white centers are bounded by deep russet-brown and cobalt-blue. Faintly hairlined but free from distracting marks. Only a small number of examples were set aside from the mintage of 20,000 pieces, and the typical survivor is well circulated. Certified in a green label holder. (#5460)

#### Popular and Rare 1870-CC Quarter, Good 4

- 3419 1870-CC Good 4 PCGS. This is a nice, clean example of this series opener, the perennially popular 1870-CC Seated quarter. The mintage is recorded at 8,340 pieces, but Carson City Mint chronicler Rusty Goe and others question how many were actually released. This piece displays mostly full rims around each side, with BER clear and TY perceptible, the sharpness suggesting Very Good. The reverse shows a lateral dig from the rim through the last S and downward to the scroll top; it reappears at the right shield border and right claw. A smaller straight dig runs upward from the rim between QUAR and DOL. This piece, despite the minor drawbacks, would greatly enhance any set of circulated Seated quarters. Population: 3 in 4, 29 finer (3/11). (#5477)
- 3420 1874 Arrows MS64 PCGS. Deep blue-to-violet toning over most of the interiors with green-gold peripheral elements. Lustrous through the patina and well struck with few significant abrasions. Population: 23 in 64, 14 finer (3/11).(#5494)

## Gem Arrows 1874-S Quarter Two-Year Design Subtype

- 3421 1874-S Arrows MS65 NGC. Delicate peach-gold toning enriches the margins of this fully struck and lustrous Gem. Beautifully preserved, and an important find for the specialist. The obverse has a wire rim, as does the left reverse. Second and final year of the Arrows, Motto subtype. Census: 33 in 65, 28 finer (3/11). (#5495)
- 3422 1875 MS65 NGC. Type Two Reverse. Frosty and effusive luster is this Gem's signature quality. Boldly struck with minimal patina aside from faint gold-orange and blue accents scattered along the margins. (#5498)
- 3423 1875 MS65+ NGC. Type One Reverse. Well-defined, richly toned, impressively lustrous, carefully preserved this blue-and-orange beauty is more than just a Gem. An ideal selection for the type collector who values coins with personality.(#5498)

#### Premium Gem 1876 Quarter Centennial Year

3424 1876 MS66 PCGS. CAC. Type Two Reverse. Prominent, subtly frosted luster radiates through a delicate layer of gold-to-gray patina that has the color strongest at the obverse margins and the reverse. Strongly struck with two small areas of abrupt die polish along the upper reverse. Population: 19 in 66, 7 finer (3/11). (#5501)

# Splendid MS66 1876 Quarter Sweeping Cartwheel Luster

- 3425 1876 MS66 NGC. Type Two Reverse. The obverse is light to medium silver-gray, while the reverse is dusky chestnut-gold and olive-green. The strike is sharp save for softness on the upper stars. In spite of the sizable original mintage, examples in Premium Gem condition are very scarce. Census: 21 in 66, 5 finer (3/11). (#5501)
- 3426 1876-S MS65 NGC. Breen-4085. Type Two Reverse, Wide Medium S. An appealing representative of the last Seated Liberty subtype, coined from 1875 to 1891, or a high-grade specimen for the advanced date collector. Light amber and russet toning, with hints of azure and gray, attests to the originality of this delightful coin. The strike is fairly well defined, although a bit of weakness is noted on Liberty's high points, as often found. The eagle details, including head, neck, and shield, are all robustly struck. Examination with a glass reveals a nick near Liberty's knee that is undistracting. Census: 17 in 65, 9 finer (3/11).(#5503)
- **3427 1877 MS65 NGC. CAC.** Type Two Reverse with narrow feet on the A in STATES. This lustrous Gem has dappled orange-red and ocean-blue borders, although most of the coin is untoned. Sharply struck and carefully preserved. An exceptional Seated type coin. Ex: Houston Signature (Heritage, 12/2009), lot 528, which realized \$1,725.(#5504)

#### 1877 Seated Liberty Quarter, MS66

3428 1877 MS66 PCGS. CAC. Type Two Reverse. The 1877 Seated Liberty quarter is more difficult to locate than the mintage of nearly 11 million pieces would suggest. Many examples were melted in 1878 to provide silver bullion for Morgan dollars. The present coin is a well-struck Premium Gem, with lustrous surfaces and gold and violet highlights. The reverse displays extensive die cracks and clash marks. Population: 49 in 66, 38 finer (3/11). (#5504)

## 1878 Quarter, Gem Uncirculated Multicolored Toning on the Obverse

- 3429 1878 MS65 PCGS. CAC. Medium intensity aqua-blue, purple, and golden-brown toning on the obverse yields to light champagne-gold on the reverse. The devices are sharply struck, and some prooflike tendencies in the fields establish mild contrast with the central design elements. Nicely preserved throughout. Population: 8 in 65, 7 finer (3/11). (#5508)
- 3430 1884 MS64 PCGS. An amazing Choice Mint State piece, this quarter dollar has the eye appeal of a Gem specimen, separated only by the presence of a few microscopic hairlines. Both sides are frosty and lustrous, with brilliant silver centers and peripheral iridescence. All of the Seated quarters of the decade are condition rarities in higher Mint State grades, and they are severely underrated in the current marketplace. Population: 20 in 64, 42 finer (3/11). (#5516)
- 3431 1891 MS65 PCGS. The 1891 Seated Liberty quarter is available in most grades, but Gems are scarce. The present coin is a well detailed Gem, with intense satiny luster and attractive gold and ice-blue toning. Population: 53 in 65, 26 finer (3/11).(#5524)

# PROOF SEATED QUARTERS

3432 1858 PR63 Cameo PCGS. Several lint marks and small planchet laminations are present on each side of this beautiful proof. Full contrast is evident with brilliant devices and violet toning fields. Population: 1 in 63 Cameo, 4 finer (3/11).(#85554)

#### 1859 Quarter, PR64+ Collectible No Motto Issue

3433 1859 PR64+ NGC. CAC. A mintage of 800 proof Seated Liberty quarters was accomplished at the Philadelphia Mint in 1859, in just the second year of the Mint's commercial proof offerings. The present coin displays needle-sharp definition on all the design elements, with iridescent blue and green patina. The fields are brightly reflective beneath the toning. Currently, this coin is the only PR64+ example in the NGC Census, with none certified finer in the Plus category (3/11). (#5555)

## 1859 Seated Quarter, PR65 Cameo Type One Obverse and Reverse

3434 1859 PR65 Cameo NGC. The Type One obverse has the shield point right of the upright of the 1. The Type One reverse has a concave eye with closed claws and heavy arrow heads. This lovely Gem Cameo proof is mostly brilliant with excellent contrast. Both sides are primarily brilliant with delicate peripheral gold toning. Census: 4 in 65 Cameo, 9 finer (3/11).

From The Slotkin Family Trust Collection. (#85555)

# 1859 Seated Quarter, PR66 Cameo Type One Obverse, Type Two Reverse

3435 1859 PR66 Cameo NGC. The Type One obverse has the shield point right of the upright of the 1. The Type Two reverse has a convex or raised eve with open claws and slender arrowheads. This sharply defined Premium Gem Cameo proof is fully brilliant and untoned with borderline Ultra Cameo contrast. Census: 8 in 66 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#85555)

## PR66 Cameo 1859 Seated Quarter Type Two Obverse and Reverse

3436 1859 PR66 Cameo NGC. The Type Two obverse has the shield point about over the right upright of the 1. The Type Two reverse has a convex or raised eye with open claws and slender arrowheads. This Premium Gem Cameo proof exhibits excellent contrast with untoned silver surfaces. Census: 8 in 66 Cameo, 1 finer (3/11). From The Slotkin Family Trust Collection. (#85555)

# 1860 Seated Quarter, PR65 Cameo A Glistening, All-Brilliant Gem

3437 1860 PR65 Cameo NGC. This sharply struck Gem Cameo proof has fully brilliant surfaces on both sides. The obverse and reverse design motifs are fully detailed, save for a few of the stars. The devices are lightly but noticeably frosted and the fields are deeply mirrored, yielding the desirable cameo contrast. Census: 3 in 65 Cameo, 4 finer (3/11). Ex: 2007 FUN Auction (Heritage, 1/2007), lot 2959.

From The Slotkin Family Trust Collection. (#85556)

#### Pale Peripherally Toned 1860 Quarter PR66 Cameo

3438 1860 PR66 Cameo NGC. Type Two Obverse. Light orange toning is gently draped over this unmarked Premium Gem proof. The central devices are intricately detailed, although a few leftside stars are soft. Moderate frost distinguishes the devices from the seamless mirrored fields. Much scarcer than indicated by the mintage of 1,000 pieces. Census: 2 in 66 Cameo, 2 finer (3/11). Ex: 2007 FUN Auction (Heritage, 1/2007), lot 2960. From The Slotkin Family Trust Collection. (#85556)

1863 PR64 PCGS. This Choice proof Civil War-era quarter has brilliant silver surfaces with considerable contrast, although undesignated as Cameo. Both sides are sharply detailed, and the entire presentation is highly appealing. Population: 55 in 64, 18 finer (3/11).(#5559)

3440 1864 PR63 NGC. A light layer of yellow patina settles over otherwise steel-gray surfaces on this Select proof. Appreciably contrasted, if not to Cameo levels, with a few areas of gradedefining hairlines on the mirrors. One of just 470 specimens struck. (#5560)

# 1864 Seated Quarter, PR65 ★ Cameo Low Proof Mintage of 470 Pieces

3441 1864 PR65 ★ Cameo NGC. Only 470 proof Seated Liberty quarters were struck in 1864, and few examples can match the quality of this spectacular Gem. The deeply reflective surfaces are patinated in vivid shades of violet and golden-brown. The needle-sharp, frosty devices contrast boldly with the mirrored fields, even through the patina. Census: 7 in 65 ★ Cameo, 0 finer (3/11). (#85560)

#### PR65 Cameo 1864 Seated Quarter Impressive Contrast

3442 1864 PR65 Cameo PCGS. A richly toned specimen that retains substantial contrast, aided by strong frosty luster on the sharply struck devices. The mirrors also offer penetrating reflectivity. On the obverse, the toning is light gold-gray with an arc of cobalt-blue at the right rim, while the reverse shows a more even blend between the two colors. Population: 4 in 65 Cameo, 0 finer (2/11). (#85560)

## 1864 Quarter, PR66 Cameo Low-Mintage Civil War Date

3443 1864 PR66 Cameo NGC. Proofs were difficult to order and expensive to purchase during the Civil War Era. Collector demand and mintage figures declined accordingly, with only 470 Seated Liberty quarters struck in 1864. This Premium Gem displays fully struck devices and brilliant mirrored fields, with excellent cameo contrast. Census: 3 in 66 Cameo, 1 finer in the designation (3/11).

From The Slotkin Family Trust Collection. (#85560)

#### 1865 No Motto Quarter, PR65 Cameo Nearly Untoned, Sharply Contrasted

3444 1865 PR65 Cameo PCGS. CAC. A good presentation for a proof type set would be an 1865 No Motto quarter next to an 1866 With Motto. This 1865 would certainly make a good No Motto candidate. The fields show illimitable depth of mirrored reflectivity with nicely frosted devices, with the nearly untoned surfaces this yields the desired white-on-black cameo appearance. Just a slight trace of golden patina is seen around the margins on each side. Population: 7 in 65 Cameo, 3 finer (3/11). (#85561)

# 1865 Seated Liberty Quarter, PR66 ★ Cameo Excellent Contrast

3445 1865 PR66 ★ Cameo NGC. Only 500 proof Seated Liberty quarters were struck in 1865, the small mintage probably due to the financial stresses of the last year of the Civil War. The present coin offers needle-sharp frosty devices that contrast boldly with the brilliant mirrored fields. Census: 7 in 66 Cameo, 3 finer in the designation, with 2 in PR67 ★ Cameo (3/11). From The Slotkin Family Trust Collection. (#85561)

## 1867 Seated Quarter, PR67 Cameo None in Higher Numeric Grade

3446 1867 PR67 Cameo NGC. This heavily contrasted 1867 proof Seated Liberty quarter displays razor-sharp design elements and brilliant, brightly reflective fields. Only 625 proofs were struck in 1867. NGC has graded no examples in higher numeric grades, but one specimen is certified in PR67 ★ Cameo (3/11). From The Slotkin Family Trust Collection. (#85566)

# 1868 Seated Liberty Quarter, PR66 ★ Vivid Toning, Sharp Details

3447 1868 PR66 ★ NGC. The only Premium Gem proof Seated Liberty quarter of the year certified with the coveted Star designation, this coin displays exquisite detail on all design elements. The obverse surfaces are patinated in dark shades of green and violet, with less intense toning on the reverse. The fields are reflective and virtually unmarked. Census: 1 in 66 ★ , 0 finer (3/11). From The Slotkin Family Trust Collection. (#5567)

#### Gem Proof 1868 Seated Quarter Rare Cameo Example

3448 1868 PR65 Cameo NGC. A meager mintage of 600 proof Seated Liberty quarters was accomplished in 1868, and few examples survive in high grade with cameo contrast. Currently, NGC has certified only four coins in PR65 Cameo, with a single example in PR65 ★ Cameo, and one in PR66 Cameo (3/11). The present coin is brightly mirrored, with intense contrast, brilliant fields, and fully struck devices.

From The Slotkin Family Trust Collection. (#85567)

3449 1869 PR63 NGC. From a small mintage of 600 pieces, the 1869 proof Seated Liberty quarter is quite scarce in Select condition. The present coin is sharply detailed and reflective, although the mirrors are a little hazy, with touches of green and lavender toning. Census: 32 in 63, 72 finer (3/11).(#5568)

## 1869 Seated Quarter, PR66 Cameo None Finer in the Designation

3450 1869 PR66 Cameo NGC. The design elements of this impressive Premium Gem display pinpoint definition throughout, along with boldly contrasting frosty texture. The fields are brilliant and deeply reflective. A few die lines and striae are evident in the reverse field and between obverse stars 3 and 4. Only 600 proof Seated Liberty quarters were struck in 1869. Census: 5 in 66 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85568)

3451 1870 PR64 NGC. Golden-brown and sky-blue patina graces the surfaces of this Choice proof 1870 Seated Liberty quarter, from a mintage of 1,000 pieces. The devices are sharply rendered, and the fields display reflective proof surfaces under the toning. Census: 42 in 64, 24 finer (3/11).(#5569)

# 1870 Quarter, PR65+ Splendid Toning and Deep Reflectivity

3452 1870 PR65+ PCGS. CAC. Briggs 2-B. The present coin is delightfully toned in iridescent shades of blue, gray, and green on both sides. All design elements are strongly delineated. Only 1,000 proof Seated Liberty quarters were minted in 1870, and the issue is rare in high grades. Population: 1 in 65+, 2 finer (3/11). Ex: Boca Collection, Part II (Heritage, 1/2010), lot 2517, where it was sold as part of a 10-piece proof set. (#5569)

## 1870 Quarter, PR66 Cameo Heavily Contrasted on Each Side

3453 1870 PR66 Cameo NGC. This nicely struck and fully brilliant Premium Gem has icy-white devices that contrast dramatically with the dark, glassy fields. Not far from an Ultra Cameo designation, but a few high points on the figure of Liberty exhibit incomplete frost. The piece is nonetheless nearly perfect from a technical perspective; a couple of tiny obverse lintmarks are of Mint origin. Some die rust occurs on the reverse, a characteristic of 1870 proof quarters. Census: 4 in 66 Cameo, 1 finer (3/11).

Ex: Dallas Signature Auction (Heritage, 12/2005), lot 633.

From The Slotkin Family Trust Collection. (#85569)

### 1871 Quarter, PR66 Cameo Seldom Seen in High Grades

3454 1871 PR66 Cameo NGC. Just 960 proofs were minted for the Seated quarter in 1871. They infrequently show up at auction in high grades, a fact apparent from our auction records, which show only five specimens put on the market over the past few years in PR66-67 Cameo. The present example is nearly brilliant, revealing just a hint of light tan at the rims and in the upper right obverse field. The surfaces are immaculately preserved, and the mirrored fields present stunning contrast with the razor-sharp, mildly frosted design elements. A simply beautiful coin for the Liberty Seated quarter proof collector. Census: 2 in 66 Cameo, 1 finer (3/11). From The Slotkin Family Trust Collection. (#85570)

# Superb Gem Proof 1872 Quarter Cameo Contrast

3455 1872 PR67 Cameo NGC. Quality control was an issue in 1872, and many proofs were manufactured with less than perfect striking details. The present coin is sharply detailed, but the strike is not quite full in certain areas. Likewise, the contrast between the reflective fields and frosty devices is not as dramatic as seen on other dates. Still, this coin is one of the finest survivors from a mintage of 950 pieces. Census: 4 in 67 Cameo, 1 finer in the designation, and 1 in PR67 ★ Cameo (3/11).

From The Slotkin Family Trust Collection. (#85571)

# PR66 Cameo 1874 Seated Quarter Scarce Arrows Proof Subtype

3456 1874 Arrows PR66 Cameo PCGS. The Arrows, Motto type was struck for just two years, which makes the proof type very scarce. This is a brilliant specimen with frosty motifs and darkly reflective fields. The strike is needle-sharp, and although a few mint-made striations are present, actual hairlines are minimal. Just 700 proofs were struck.

From The Slotkin Family Trust Collection. (#85575)

## White-on-Black 1875 Quarter PR65 Deep Cameo

3457 1875 PR65 Deep Cameo PCGS. Type One Reverse. This fully brilliant Gem has ice-white motifs and glassy fields. The cameo contrast is exceptional, and comparable with modern-day proofs. A wonderful representative of a low proof mintage of 700 pieces. Population: 2 in 65 Deep Cameo, 2 finer (3/11). (#95576)

# 1876 PR67 Cameo Quarter Fully Struck Throughout

3458 1876 PR67 Cameo NGC. Type Two Reverse. The 1876 is one of the more frequently encountered dates in the Seated Liberty series, both as a business strike and as a proof. This is certainly one of the best-produced and best-preserved of the 1,410 proofs produced. Each side is almost brilliant with just a tinge of pinkish patina. The striking details are complete throughout, including the upper stars on the obverse. There is an interesting planchet lamination between stars 6 and 7 on the obverse, barely perceptible until the coin is angled under a light. Census: 6 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#85577)

3459 1877 PR64 PCGS. Certified in a green-label holder, this near-Gem proof shows silver-gray centers with blue and gold accents at the rims. This well-struck piece shows a few contact marks that preclude an even finer grade, but much eye appeal prevails. (#5578)

# Brilliant 1877 Quarter, PR66 Cameo Low-Mintage Date

3460 1877 PR66 Cameo NGC. The 77 in the date is lightly repunched at the peaks of the numbers, one of the characteristics of the obverse die used on all proof 1877 quarters. This brilliant Gem has frosted devices and deeply mirrored fields. The surfaces have been carefully preserved and show no noticeable contact marks. The 1877 quarter is an elusive date, as a mere 510 pieces were struck. Census: 6 in 66 Cameo, 3 finer (3/11).

Ex: 2003 November Signature Auction (Heritage, 11/2003), lot 6203.

From The Slotkin Family Trust Collection. (#85578)

#### 1878 Seated Quarter, PR66 Cameo One in Higher Numeric Grade at NGC

3461 1878 PR66 Cameo NGC. Regarding the 1888 proof quarters, Larry Briggs notes, "Proof issues were very sloppily made." This Premium Gem specimen shows a few rust pimples, most notable at the base of the staff, but it is otherwise quite attractive. The devices are sharply detailed and provide significant contrast with the reflective fields. Dark shades of violet and golden-brown toning mix with pale green hues on both sides. Census: 7 in 66 Cameo, 1 finer in the designation (3/11).

From The Slotkin Family Trust Collection. (#85579)

# Dazzling PR67 Cameo 1878 Quarter Ice-White Devices

3462 1878 PR67 Cameo NGC. Splendid fire-red, aquamarine, and orange-gold bands fill the peripheries of this nicely struck and impressively mirrored Superb Gem. Icy devices ensure obvious cameo contrast. Perfect aside from a small circular spot to the left of the shield point. Census: 1 in 67 Cameo, 1 finer as PR67 Ultra Cameo (3/11). (#85579)

3463 1879 PR64 PCGS. Despite light golden toning, the white-onblack contrast is unmistakable. Undesignated as Cameo due to the old green label holder. Sharply struck and pleasing. A low-mintage date due to mandated silver dollar production. From The Orchid Collection. (#5580)

3464 1879 PR62 Cameo NGC. Type Two Reverse. Frosty motifs and legends rise above reflective fields. A fully struck specimen with golden-brown and ocean-blue borders. The right obverse field displays light hairlines. (#85580)

### 1879 Seated Quarter, PR67 Cameo Reverse of 1878

3465 1879 PR67 Cameo NGC. The reverse die was carried over from 1878 and used again in later years. Several rust lumps are evident, more so than its earlier use. Both sides of this Superb Gem Cameo proof have brilliant, untoned silver surfaces with excellent field to device contrast. Census: 5 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#85580)

3466 1880 PR65 PCGS. Type One Reverse. Medium intensity electricblue, lavender, and golden-tan patina on the obverse cedes to bluish-purple on the reverse. The well struck design elements show some contrast against the semireflective fields. Housed in a green label holder.(#5581)

3467 1880 PR64 Cameo PCGS. Type One Reverse. A gorgeous near-Gem Cameo proof with deeply mirrored gunmetal surfaces and ivory devices that create excellent contrast. Light hairlines in the right obverse field define the grade. Population: 21 in 64 Cameo, 25 finer (3/11).(#85581)

## 1880 PR67+ Cameo Seated Quarter Brilliant and Deeply Mirrored

3468 1880 PR67+ Cameo NGC. Type One Reverse. The mintage of 1,355 proofs might give one an illusion of greater availability than is real as only 13,600 business strikes were produced, making the 1880 a low total mintage year. Not all proofs from this year were fully struck, but this piece is. The dies as well as the planchet were heavily polished prior to striking, producing a deeply mirrored quarter with thick mint frost over the devices. The Plus designation is well deserved on this high-grade proof. Census: 1 in 67+ Cameo, 6 finer, 2 finer with the Star designation (3/11). (#85581)

## 1881 Seated Quarter, PR66 Remarkably Deep Mirrors

3469 1881 PR66 NGC. CAC. With only 12,000 circulation strikes, many deceptively deep-mirrored examples of the 1881 quarter resemble proofs. This deeply mirrored proof is covered in cobalt-blue and violet toning. Each side appears flawless, even with the aid of a loupe. Census: 28 in 66, 20 finer (2/11). (#5582)

## 1881 Seated Quarter, PR66 Cameo Recut Date

- 3470 1881 PR66 Cameo PCGS. CAC. Like all proofs, this piece has both 8s recut inside the upper and lower loops. A blazing Premium Gem Cameo proof, this 1881 Seated quarter has frosty devices with brilliant centers. The obverse has peripheral gold toning and the reverse has violet and iridescent toning along the border. Population: 15 in 66 Cameo, 7 finer (3/11). (#85582)
- 3471 1882 PR64 PCGS. Immensely reflective with a light layer of gold-to-gray patina draping each side. Both obverse and reverse show appreciable contrast, though not to a Cameo level. PCGS has graded 60 finer non-Cameo examples (3/11).(#5583)

# Superb Gem Proof 1882 Seated Quarter Profound Ultra Cameo Contrast

3472 1882 PR67 Ultra Cameo NGC. Ex: Sweet Collection. A generous mintage of 1,100 proof Seated Liberty quarters was accomplished in 1882, but only 15,200 business strikes were produced, putting substantial date-set pressure on the supply of proofs. The present coin is an exquisite Superb Gem, with dramatic black-on-white cameo flash. The devices display creamy mint frost, and the fields are fathomless in their depth of reflectivity. Census: 2 in 67 Ultra Cameo, 0 numerically finer in the designation, 1 in PR67 ★ Ultra Cameo (3/11).

From The Slotkin Family Trust Collection. (#95583)

3473 1883 PR64 PCGS. Housed in a green-label PCGS holder, this Choice proof exhibits obvious cameo contrast with frosty and sharply detailed devices and fully mirrored fields. A few specks of dark toning reside on mostly brilliant silver surfaces. (#5584)

# 1883 Quarter, PR67 ★ Rich, Multicolored Toning

- 3474 1883 PR67 ★ NGC. CAC. Deep, multicolored toning surrounds the obverse margin, while the reverse border is primarily aquamarine. The seated Liberty is mostly untoned and frosty, although light rose patina on the eagle precludes a Cameo designation. A fully struck example of this popular low-mintage date. Census: 1 in 67 ★, none finer with or without the Star designation (3/11). (#5584)
- 3475 1883 PR62 Cameo PCGS. A splendid Cameo proof, this 1883 quarter has brilliant silver surfaces with bright white devices and fully mirrored fields. Delicate gold toning is limited to the outer borders on each side. Population: 2 in 62 Cameo, 45 finer (3/11). (#85584)
- 3476 1883 PR64 Cameo NGC. Light champagne toning resides on both sides of this otherwise brilliant Cameo proof. The surfaces are exquisite, with fully mirrored fields and lustrous devices. Census: 16 in 64 Cameo, 35 finer (3/11).(#85584)

# 1883 Quarter, PR65 Cameo Deeply Mirrored, Sharply Contrasted

3477 1883 PR65 Cameo PCGS. CAC. A ring of red and hazel toning around the rims adds color to this mostly brilliant specimen. The deeply reflective fields show pleasing contrast against the icy-frosted devices. The strike is nearly full, and there are only a few pinpoint contact marks. Just 1,039 proofs were issued. Population: 13 in 65 Cameo, 5 finer (3/11). (#85584)

## 1884 Quarter, PR66 Cameo Notable Low-Total Mintage Date

3478 1884 PR66 Cameo PCGS. CAC. Only 875 proofs were struck in 1884 with a scant 8,000 business strikes produced also, the combination of which makes this issue one of the lowest total mintage dates in the entire Seated quarter series. This coin is originally toned with a thin coating of antique-golden patina present over the obverse. The reverse is much more deeply patinated with intermingled shades of reddish-gold and gunmetal-blue. The devices are noticeably frosted against the deeply mirrored fields, and there are no mentionable flaws. Population: 7 in 66 Cameo, 4 finer (3/11). (#85585)

3479 1885 PR64 Cameo PCGS. Distinctly contrasted with bold snow-white frost over devices that emerge from silver-green fields with cobalt-blue edges. Gleaming and gorgeous with just a few stray hairlines determining the grade. Population: 10 in 64 Cameo, 26 finer (3/11).(#85586)

## 1886 Quarter, PR66 Cameo Only 886 Proofs Produced

3480 1886 PR66 Cameo NGC. Pale rose patina is just barely visible on the obverse, while the reverse remains stone-white. The strike is needle-sharp aside from the date, which displays Mint-made granularity. The smooth, mirrored fields contrast favorably with the nicely frosted design elements. Production was limited to 5,000 business strikes and 886 proofs. Census: 14 in 66 Cameo, 15 finer (3/11). Ex: 2007 FUN Auction (Heritage, 1/2007), lot 3007. From The Slotkin Family Trust Collection. (#85587)

## Low-Mintage 1887 Quarter, PR67 Richly Toned

3481 1887 PR67 NGC. Rich golden-brown, sea-green, and ocean-blue toning illuminates the obverse. The reverse displays deep plum and cobalt-blue patina. Well struck save for the uppermost stars. Due to continued massive silver dollar production, mintages of quarters lagged. Just 10,000 business strikes and 710 proofs were issued. Census: 11 in 67, 1 finer (3/11).

Ex: 2007 FUN Auction (Heritage, 1/2007), lot 3011.

From The Slotkin Family Trust Collection. (#5588)

#### 1887 Quarter, PR67 Cameo None Certified Finer

3482 1887 PR67 Cameo NGC. This brilliant, high-grade proof striking shows no surface flaws, as one would expect from a PR67. The cameo contrast is stark on each side and made more so by the lack of toning. Only 710 proofs were struck plus 10,000 strikes for circulation in this seldom-available year. Census: 4 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#85588)

#### 1888 Seated Quarter, PR67 Cameo

3483 1888 PR67 Cameo NGC. A moderate mintage of 800 Seated Liberty quarters was struck in 1888, along with just 10,000 business strikes. For some reason, all examples seen display weakly struck obverse stars. This delightful Superb Gem is sharply detailed in other areas, and the fields are brightly reflective, providing strong contrast. Census: 3 in 67 Cameo, 1 numerically finer in the designation, and 2 in PR67 ★ Cameo (3/11).

From The Slotkin Family Trust Collection. (#85589)

## Superb Gem Proof 1889 Quarter Attractively Toned

3484 1889 PR67 NGC. Lilac-red fields and devices are outlined by glimpses of ocean-blue near the rims. The design motifs are fully struck on this Superb Gem, and both sides display generous eye appeal. The year 1889 was the last of the ultralow-mintage Philadelphia issues, with only 12,000 business strikes and 711 proofs produced. Ex: 2007 FUN Auction (Heritage, 1/2007), lot 3013. From The Slotkin Family Trust Collection. (#5590)

# Marvelously Toned PR67 ★ Cameo 1891 Seated Quarter

3485 1891 PR67 ★ Cameo NGC. Navy-blue, lilac-red, and peach-gold toning consumes both sides of this pristine and nicely struck final-year Superb Gem. Despite the lavish patina, cameo contrast is apparent, especially on the obverse. A find for the connoisseur of fully toned silver proofs. Census: 2 in 67 ★ Cameo, 1 finer (3/11). (#85592)

# 1891 PR67 Cameo Seated Quarter An Exceptional, All-White Coin

3486 1891 PR67 Cameo NGC. After a decade of memorably low mintages, business strike Seated quarters jumped to 3.9 million pieces in this final year of production. However, proofs remained low with only 600 pieces produced. This is an amazing, all-brilliant example with sharp contrast between the deeply mirrored fields and frosted devices. The surfaces are essentially "as struck." Census: 9 in 67 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#85592)

# BARBER QUARTERS

3487 1892 MS65 NGC. Type One Reverse. Frosty and gorgeous luster is a highlight of this first-year Barber quarter Gem. Irregular border toning offers attractive asymmetry in its mix of gold-orange, violet, and ink-blue colors. Encapsulated in a prior-generation holder. From The Dr. Donald M. Gilner Collection. (#5601)

## Superb Gem 1892 Quarter Stone-White and Magnificent

3488 1892 MS67 PCGS. CAC. Type One Reverse. The reverse displays minor die doubling, perhaps most evident on the Rs in QUARTER. Brilliant and beautiful with booming luster and virtually pristine preservation. Those who track appearances of the finest Barber quarters should note a pinpoint spot midway between the beak and the A in STATES. Population: 22 in 67, 3 finer (3/11). (#5601)

3489 1893 MS65 PCGS. The 1893 Barber quarter is a slightly better date, according to David Lawrence. Some high-quality examples were saved, but the issue is rare in Gem condition. The present coin is sharply detailed, with bright luster and attractive goldenbrown and ice-blue toning. Population: 21 in 65, 5 finer (3/11). (#5604)

3490 1894 MS65 PCGS. CAC. A condition rarity in the Barber series and seemingly undervalued in today's market, this lovely Gem has frosty silver luster with lovely gold and iridescent toning. Population: 18 in 65, 11 finer (3/11).(#5607)

### 1894 Quarter, Toned MS66 One of the Finest Business Strikes

3491 1894 MS66 PCGS. CAC. Despite the original production of more than 3 million coins, the 1894 is a challenging date, especially in higher grades. The majority of numerically superior 1894 quarters are proofs. This stunning Premium Gem has frosty silver luster beneath rich gray-gold toning, with peripheral blue and lilac highlights. The strike is bold, and the eye appeal is extraordinary. We are unaware of any detailed variety studies for this or for any other issue of the Barber quarter series. This example is struck from a perfect obverse die and a cracked reverse die, with several cracks through the peripheral lettering. Population: 10 in 66, 1 finer (3/11). (#5607)

#### 1894-O Quarter, Splendid MS66 Example

- 3492 1894-O MS66 PCGS. The 1894-O is in some ways atypical for a New Orleans quarter. Most examples are sharply struck, and the mint luster is far above average for an O-mint product. It is even occasionally available in mint condition. This splendid example boasts all-white surfaces that glow with softly frosted mint luster, and there are no mentionable abrasions on either side. Population: 8 in 66, 0 finer (3/11). (#5608)
- 3493 1894-S MS64 PCGS. David Lawrence notes the 1894-S Barber quarter enjoys strong collector demand in all grades from Fine to MS64. The present coin is a sharply detailed Choice specimen, with vibrant luster and light gold and lavender toning. Population: 45 in 64, 19 finer (3/11).(#5609)
- 3494 1894-S MS64+ PCGS. A mere hint of tan toning adorns this lustrous and razor-sharp near-Gem. The reverse is essentially as made, while the obverse grade is limited only by faint grazes on Liberty's jaw and neck. Population: 1 in 64+, 19 finer (3/11). (#5609)
- 3495 1898 MS65 PCGS. Remarkably similar to a proof at first glance, down to appreciable reflectivity under light blue and gold-gray patina and the sharp definition on the eagle's talons. A few small luster breaks are noted on Liberty's frosted portrait. Population: 28 in 65, 22 finer (3/11).(#5619)
- 3496 1898 MS66 NGC. This well struck Premium Gem displays vibrant satiny mint luster under a blanket of gold and lavender toning. The 1898 was produced in large numbers, but Premium Gem survivors are rare. Census: 18 in 66, 5 finer (3/11).(#5619)
- 3497 1899 MS64 NGC. CAC. Richly toned peach-to-orange with strong luster swirling beneath the patina. The margins of this well-defined near-Gem tend toward violet. Census: 69 in 64, 27 finer (3/11).(#5622)

#### Key 1901-S Barber Quarter, AG3

3498 1901-S AG3 NGC. The 1901-S Barber quarter is a scarce and sought-after issue, due to its minuscule mintage of 72,664 pieces. Collectors prize this date in all grades, and even well-worn examples are avidly pursued whenever they are offered. The present coin displays all major obverse design elements in outline, but the reverse rims and much of the legend are worn smooth. (#5630)

## About Good 1901-S Barber Quarter Rarest Issue of the Series

3499 1901-S AG3 NGC. The date and mintmark are distinct from the rim, which encompasses perhaps half of the reverse peripheral legends. This lavender-gray key date quarter has a couple of minor rim imperfections and a faded mark near the fletchings, but is generally problem-free despite its long stay in circulation. (#5630)

#### Collector-Grade 1901-S Quarter, AG3

3500 1901-S AG3 PCGS. The obverse rim is nearly full all the way around, while the reverse rim, as usual, is worn down much more deeply into the letter tops of the periphery. There is little distraction on this coin other than simple extensive wear, with good eye appeal on gray surfaces and no overt marks. A nice collector-grade example of the key Barber quarter. (#5630)

## Choice Good 1901-S Quarter Prime Series Key

3501 1901-S Good 6 PCGS. The silver-gray surfaces on this key-date Barber quarter show some smudges of deeper charcoal scattered on each side. There is a complete Y and top of the adjacent T visible, and some of the deep detail persists in the leaves above Liberty's head. A few thin marks appear under a loupe on the portrait. The prime series key along with 1896-S and 1913-S. (#5630)

#### 1901-S Quarter, VF Details

- 3502 1901-S Heavily Corroded, Damaged, Tooled ANACS. VF20 Details. Extensive corrosion does appear on both sides, along with some scratches confined primarily to Liberty's neck and the lower right (facing) obverse field. There are a few small dings and hits around the rims. Some small blackened areas at the lower reverse appear to be extensive oxidation. There is no obvious tooling. On the plus side, this piece, for all of its challenges, does exhibit a full LIBERTY. Since merely the adjective "1901-S" is sufficient to incite much interest in this piece, as with any key coin that has a "lot going on," we suggest that a personal inspection might be in order.
- 3503 1902-O MS64 PCGS. CAC. Deep peach, crimson, and gray toning has the colors largely separated on the obverse but a more dappled appearance on the reverse. Great eye appeal for this little-saved New Orleans issue. Population: 16 in 64, 15 finer (3/11). (#5632)
- 3504 1907 MS65 PCGS. A frosty Gem with pristine surfaces, an above-average strike, and delicate gold toning, this 1907 quarter is far finer than usually seen. Population: 39 in 65, 17 finer (3/11). (#5645)

# 1909-O Quarter, MS63 Scarce, Low-Mintage Date

- 3505 1909-O MS63 PCGS. CAC. The 1909-O is rarely available in XF and better grades. Undoubtedly the mintage of only 712,000 pieces explains much of the unavailability with the majority of the production run dropped into circulation. The bright, satiny surfaces are all-brilliant, and only the slightest abrasions are seen over the portrait of Liberty. Population: 10 in 63, 26 finer (3/11). (#5655)
- 3506 1912-S MS65 PCGS. Lustrous surfaces display faint hints of tangold color. This Gem is sharply struck except for softness in the lower right obverse stars and the upper right corner of the shield. Population: 20 in 65, 12 finer (3/11).(#5663)

#### 1913 Barber Quarter, MS65 Scarce Low-Mintage Issue

- 3507 1913 MS65 PCGS. CAC. Barber collectors immediately recognize the 1913 half dollar as a scarce issue. However, the quarter is also a scarcity from a mintage of just 484,000 coins, although resides in the shadow of the even rarer 1913-S issue. This brilliant Gem has a nearly full strike with frosty silver luster and mostly untoned surfaces. Both sides are essentially free of marks. Population: 30 in 65, 6 finer (3/11). (#5664)
- 3508 1913-S AG3 PCGS. Golden overtones suffuse this deep gray example of the famous 1913-S quarter. Clearly a coin that circulated heavily to the point of rim merging, though the date and mintmark remain intact.(#5666)
- 3509 1913-S Good 4 NGC. The last of the great Barber quarter keys, the 1913-S was more hoarded than the first two issues, although this piece seems to have been snatched out of circulation rather late. The rim runs into IN GOD on the obverse but is complete elsewhere, while the reverse rim runs deeper into that side, typical for the design. Silver-gray surfaces are, however, free of other impairments, just quite worn consistent with the grade. (#5666)
- 3510 1914 MS65 NGC. CAC. A remarkable Gem, this 1914 quarter exhibits mottled gold toning over brilliant and lustrous silver surfaces with full mint frost. The strike is sharp and marks are minimal. Census: 57 in 65, 10 finer (3/11).(#5667)
- 3511 1914-D MS66 NGC. Peach, aqua, and blue-green shadings mingle on each side of this Premium Gem. A well struck piece with smooth surfaces and housed in a prior-generation holder. Census: 4 in 66, 1 finer (2/11).

  From The Dr. Donald M. Gilner Collection. (#5668)
- 3512 1915-D MS65 PCGS Secure. Mottled walnut-brown and gunmetal-gray enriches this coruscating and mark-free Denver Mint Gem. The strike is decidedly above average. A charming Barber type coin.(#5671)
- 3513 1916-D MS66 PCGS. Rich peach and blue-green patina covers much of the obverse, while the reverse is border-toned in similar hues. Peripheral definition is soft, though the interiors are better-struck. PCGS has graded six numerically finer examples (3/11). (#5674)
- 3514 1916-D MS66 NGC. A trifle softly struck on a few obverse stars and the eagle's talons, though more central devices are boldly defined. Strong, swirling luster under patches of gold-orange and sage patina. Census: 46 in 66, 9 finer (2/11).

  From The Dr. Donald M. Gilner Collection. (#5674)
- 3515 1916-D MS66 PCGS. This Premium Gem is better-defined than the usual 1916-D quarter, with only a couple of right-side obverse stars showing softness along with the talons. Pale silver is the predominant color, though hints of green-gold also appear at certain angles. PCGS has graded six numerically finer examples (3/11).(#5674)

# PROOF BARBER QUARTERS

#### 1892 Quarter, PR66 Cameo Starkly Contrasted, Pale Patina

3516 1892 PR66 Cameo NGC. Type Two Reverse. The issuance of the new Barber design for the dime, quarter, and half in 1892 coincided with high-quality production of both proofs and business strikes. This, in addition to their first-year status, makes 1892 quarters a frequent choice for type. This starkly cameoed example has deeply mirrored fields with thick, frosted devices. Just the slightest hint of rose patina is seen over each side, and both sides are essentially perfect. Census: 20 in 66 Cameo, 14 finer (3/11). (#85678)

### PR67 Cameo 1892 Barber Quarter Nearly Brilliant and Defect-Free

3517 1892 PR67 Cameo NGC. Type Two Reverse. Essentially brilliant, although the lower reverse has a whisper of gold toning. This razorsharp and undisturbed Superb Gem has pleasing field reflectivity and a richly frosted portrait. Proof production for the various Barber denominations peaked in 1892, the introductory year of the design. Census: 12 in 67 Cameo, 2 finer (3/11).

Ex: 2007 FUN Auction (Heritage, 1/2007), lot 4061.

From The Slotkin Family Trust Collection. (#85678)

# 1893 Barber Quarter, PR66 Attractive High-Grade Striking

3518 1893 PR66 NGC. CAC. There were far fewer proofs struck in 1893 than the previous year, but apparently quite a substantial percentage of the mintage was preserved, many in high grade. This is an intriguing coin. Each side has just the slightest hint of pinkish patina. The fields show nice reflectivity, and it appears the mint frost is sufficiently thick for a Cameo designation — but obviously NGC did not agree. A high-grade example of this popular early Barber quarter. Census: 53 in 66, 28 finer (3/11). (#5679)

#### 1893 Barber Quarter, PR66 Cameo With Silver-White Surfaces

3519 1893 PR66 Cameo PCGS. CAC. This second-year proof Barber quarter boasts generous field-device contrast on each side, even if insufficient for a Deep Cameo appellation. The silver-white surfaces are essentially devoid of other perceptible color. A couple of faint, out-of-the-way contact marks appear to preclude an even higher grade. The strike is full throughout. Population: 9 in 66 Cameo, 13 finer (3/11). (#85679)

## 1893 Barber Quarter, PR67 Cameo Borderline Ultra Cameo

3520 1893 PR67 Cameo NGC. This piece should be called Ultra Cameo in our opinion, but NGC has elected to assign the modest Cameo designation. A Superb Gem proof, it exhibits fully brilliant silver surfaces with no toning on either side. The devices are frosty and highly lustrous. Census: 9 in 67 Cameo, 5 finer (3/11). From The Slotkin Family Trust Collection. (#85679)

3521 1894 PR64 NGC. Richly toned and gorgeous. The obverse has a narrow outer band of sapphire-blue around a peach-gold interior, while the relationship is switched on the reverse.(#5680)

# 1894 Barber Quarter, PR66 Cameo A Superlative Early-Date Type Coin

3522 1894 PR66 Cameo NGC. CAC. Proof quarters of 1894, with a relatively high mintage of 972 pieces, are a common issue. Even Cameos are not all that scarce. The slightest wisps of gold color show up under high magnification on this Premium Gem. Moderate frost shows on the sharply struck motifs that are nicely highlighted by the mirrored fields. A few light grazes are undisturbing. Census: 12 in 66 Cameo, 11 finer (3/11). (#85680)

#### PR66+ Cameo 1894 Quarter

3523 1894 PR66+ Cameo NGC. CAC. Frosty devices and darkly mirrored fields combine for imposing cameo contrast. The strike is nearly full, and a lens reveals flawless preservation save for inconsequential grazes on the portrait. Ideal for a fully brilliant proof type set. Only 972 proofs were produced. (#85680)

# 1894 Barber Quarter, PR67 Cameo Intense Contrast

3524 1894 PR67 Cameo NGC. Highly lustrous and brilliant silver surfaces exhibit a complete lack of toning, save for delicate champagne on the obverse device. Both sides display intense contrast with frosty and lustrous silver motifs and fully mirrored fields. Census: 10 in 67 Cameo, 1 finer (3/11). From The Slotkin Family Trust Collection. (#85680)

#### Vividly Toned 1895 Quarter, PR67 ★

3525 1895 PR67 ★ NGC. CAC. This is a worthy accompaniment, considering that this proof quarter likely started out its life as part of a set that also contained one of the 880 proof 1895 Morgan silver dollars minted. Vivid light jade, saffron, and sunset-orange graces the obverse, while the reverse boasts jade margins with sky-blue centers. A fully struck and memorable Superb Gem. (#5681)

# 1895 Quarter, PR67 With Obvious but Undesignated Cameo Contrast

3526 1895 PR67 NGC. While the 1895 proofs are not as well known as, say, 1896 or 1898 proofs, this coin certainly displays careful attention to detail in production. In our opinion, this Superb Gem proof is a full cameo example, although the NGC holder carries no designation. Both sides are entirely brilliant and untoned, save for a hint of champagne on the outer borders. The fields are deeply mirrored while the crisply detailed devices host satin luster. A few tiny blemishes on the obverse appear to be as struck. From The B & D Collection. (#5681)

# 1895 Quarter, PR66 Cameo Strong Eye Appeal, Deep Mirrors

3527 1895 PR66 Cameo NGC. CAC. The 1895 proof quarter has the memorable mintage for proofs of 880 pieces — the same proof production as the legendary 1895 proof dollar. This is a wondrous striking. The fields go "black" with almost no effort, and the devices display thick mint frost. Both sides are surrounded by light rose toning at the margins. Census: 13 in 66 Cameo, 23 finer (3/11). (#85681)

#### 1895 Barber Quarter PR68 Cameo Tied for Finest at NGC

3528 1895 PR68 Cameo NGC. Deep honey-gold toning is confined to the outer rims of this Superb Gem Cameo proof. Both sides are otherwise brilliant with no trace of toning. The strike is bold with all design elements fully displayed. Here is an amazing coin that is tied for the finest that NGC has certified. Census: 10 in 68 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85681)

#### 1896 Barber Quarter, PR67 Cameo Borderline Ultra Cameo

3529 1896 PR67 Cameo NGC. CAC. A stunning Superb Gem Cameo proof, this 1896 Barber quarter is fully brilliant with frosty and lustrous devices and accompanying mirrored fields on each side. This brilliant and untoned beauty is a borderline Ultra Cameo piece with bold design motifs. Census: 24 in 67 Cameo, 4 finer (3/11). (#85682)

### Wondrous 1896 Quarter, PR67+ ★ Cameo

3530 1896 PR67+ ★ Cameo NGC. CAC. This is the only Plus Star 1896 proof quarter in any grade, and it is truly a wonder to behold. The mirrored fields show unfathomable depth of reflectivity and are set as a background against the thickly frosted devices. Speckled iridescent toning surrounds the obverse rim, but the reverse is free from color. (#85682)

## 1899 PR67 Cameo Quarter Surprisingly Scarce With Contrast

3531 1899 PR67 Cameo NGC. The mirrored fields are deeply reflective, setting up a "black" background against the frosted, white devices. Both sides are brilliant throughout with no obvious surface distractions (nor would any be expected at this grade level). Struck just one year after one of the best-produced years for proofs, there are remarkably few high-grade Cameo quarters known. At NGC only eight others have been so graded with four finer (2/11). (#85685)

# 1900 Barber Quarter, PR67 Cameo Popular for Type Purposes

3532 1900 PR67 Cameo NGC. Of the 912 proofs struck in this popular year, only 12 others have achieved the PR67 Cameo level by NGC, and there are only three pieces finer (3/11). To many observers this immaculate proof will appear all-brilliant, but there actually is slight patina present on the obverse, while the reverse is indeed bright and dazzling. An exceptional, contrasted proof striking. From The Slotkin Family Trust Collection. (#85686)

# Toned 1901 Quarter, PR67, One Finer at PCGS

3533 1901 PR67 PCGS. CAC. This splendidly toned Superb Gem boasts lateral obverse toning bands in varying shades of blue and pinkish-gold, the latter color prevailing throughout most of the central reverse. The strike is better than usual but not yet full, the usual problem area on the reverse the culprit. Only one coin is certified finer at PCGS (3/11). (#5687)

### 1901 Quarter, PR67 Cameo Deeply Reflective Fields

1901 PR67 Cameo NGC. Exceptional contrast results from the icy devices and the obsidian reflective fields. The strike is unimprovable, and the surfaces appear immaculate aside from two trivial, tiny spots on the upper right obverse field. Prominent die polish, as made, surrounds Liberty's lower ear with glimpses of the mirrored field. Census: 13 in 67 Cameo, 4 finer (3/11). Ex: 2007 FUN Auction (Heritage, 1/2007), lot 4080. From The Slotkin Family Trust Collection. (#85687)

# 1901 Barber Quarter, PR68 Cameo Nearly Perfect Surfaces, Surpassed by None

- 3535 1901 PR68 Cameo NGC. This crisply struck Superb Gem has both a brilliant obverse and reverse, with only the faintest tinge of pastel-golden color at the outermost areas. A Mint employee polished the obverse die near Liberty's ear, and as a result, a slightly reflective field replaces portions of the inner ear and upper neck. The low production of 813 pieces ensures that high-grade survivors are elusive. Census: 4 in 68 Cameo, 0 finer (3/11).

  Ex: Long Beach Auction (Heritage, 2/2006), lot 592.

  From The Slotkin Family Trust Collection. #85687)
- 3536 1903 PR65 PCGS. Richly toned gold over the centers with deep ocean-blue at the borders. A gleaming Gem proof with gorgeous visual appeal. Population: 37 in 65, 38 finer (3/11). (#5689)
- 3537 1903 PR64 Cameo PCGS. Fully struck and flashy with frosty motifs and peripheral golden-brown toning. The reverse border also displays ruby-red and electric-blue. A lovely specimen. Just 755 proofs were issued.(#85689)
- 3538 1905 PR65 PCGS. Light gold-orange overtones are present at the obverse margins, while the reverse shares light pearl-gray hues with the obverse, along with occasional splashes of color. Strongly mirrored with a modicum of contrast. Population: 52 in 65, 36 finer (3/11).(#5691)
- 3539 1906 PR66 NGC. Peripheral gold, orange, and blue-violet elements fade to champagne and pale silver toward the centers. A sharp Premium Gem proof with a suggestion of contrast on both obverse and reverse. Great eye appeal for this issue of just 675 specimens. Census: 43 in 66, 33 finer (3/11).(#5692)

# 1906 Barber Quarter, PR68 Brilliant Satin Devices

3540 1906 PR68 NGC. An incredible Superb Gem, this 1906 Barber quarter shows delicate field to device contrast, unusual from a period when such a look was discouraged. Both sides have a trace of champagne toning on otherwise brilliant silver surfaces. NGC and PCGS have graded just nine similar examples, combined, with none finer. Census: 7 in 68, 0 finer (3/11). From The Slotkin Family Trust Collection. (#5692)

# 1907 Quarter, PR67 Ultra Cameo None Finer at Either Service

- 3541 1907 PR67 Ultra Cameo NGC. This Superb Gem proof provides outstanding contrast between the fully frosted motifs and the glassy fields. Untoned aside from dashes of russet near the eagle's tail. A good strike overall, with some blending noted on the right shield corner and fletchings. As one would expect from a PR67, the surfaces are almost perfect. Census: 4 in 67 Ultra Cameo, 0 finer (3/11). Ex: 2008 West Palm Beach Auction (Heritage, 6/2008), lot 887, where it realized \$5,750. From The Slotkin Family Trust Collection. (#95693)
- 3542 1908 PR64 PCGS. This razor-sharp near-Gem is untoned and devoid of noticeable hairlines. Both devices exhibit light, even frost. A charming specimen of this scarce date. A mere 545 proofs were struck. Certified in a green label holder.(#5694)
- 3543 1908 PR65 NGC. This brilliant Gem proof quarter is lightly tinged with gold on each side, from a mintage of 545 proofs late in the series. The strike is full throughout, and it is perhaps only a thin mark on the neck that separates this piece from an even finer grade. Census: 31 in 65, 50 finer (3/11).(#5694)

# 1909 Barber Quarter, PR68 Among the Finest Known

3544 1909 PR68 NGC. Of the 650 proofs struck in 1909, quite a large number were preserved in high grades (PR64 and finer). This is among the finest of those known, and none are certified higher. Fine streaks of iridescence are seen on the obverse, while the reverse displays swirls of golden-rose and lilac toning. The mirrored fields are notably deep and served to backlight the patina on each side. We see no post-striking defects on either side of this immaculate proof; the only surface irregularity is a small, shallow planchet depression in the field directly in back of Liberty's cap. Census: 10 in 68, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#5695)

## 1909 Quarter, PR67 Cameo Pale Peripheral Toning

3545 1909 PR67 Cameo NGC. The frosted devices contrast with the dark, glassy fields. This fully impressed Superb Gem is close to brilliant, although traces of pale rose are lightly draped around the margins of each side. A mere 650 proofs were produced of this issue. Census: 10 in 67 Cameo, 1 finer (3/11).

Ex: FUN Signature (Heritage, 1/2007), lot 4093. From The Slotkin Family Trust Collection. (#85695)

# 1910 Quarter, PR66 Cameo With Strong Contrast

3546 1910 PR66 Cameo NGC. Just the slightest bit of milky-gray patina surrounds the devices on each side of this lovely Premium Gem Cameo. The fields are extraordinarily deep and the devices heavily frosted, yielding strong contrast on both obverse and reverse. Only 551 proofs were struck of the 1910 quarter proofs, and relatively few examples grade PR66 Cameo. Census: 17 in 66 Cameo, 16 finer (2/11). (#85696)

# Stone-White PR68 ★ Cameo 1910 Barber Quarter

3547 1910 PR68 ★ Cameo NGC. Ice-white designs provide dramatic contrast with the jet-black fields. Slight mint overpolishing of the portrait beneath the ear reduces the frost just enough to deny an Ultra Cameo designation. Fully brilliant and essentially pristine. The strike is full save for the knuckles on the eagle's right (facing) claw

From The Slotkin Family Trust Collection. (#85696)

#### Richly Patinated 1911 Quarter, PR67

3548 1911 PR67 NGC. Rotation of this deeply toned Superb Gem beneath a light reveals rich rose-red, jade-green, and ocean-blue shades. Intricately struck and flawlessly preserved with flashy, reflective fields. From a low proof mintage of 543 pieces, and certified in a former generation holder.

From The Orchid Collection. (#5697)

# 1911 Barber Quarter, PR67 Cameo Among the Finest of This Low-Mintage Issue

3549 1911 PR67 Cameo NGC. The devices are glowing with frost, and the fields are deeply mirrored on each side. The strike is razor-sharp, and this is an essentially untoned representative with clean surfaces and spectacular eye appeal. The emission of 543 proofs ranks among the lowest mintages of the type. Census: 13 in 67 Cameo, 12 finer (3/11).

Ex: 2007 FUN Auction (Heritage, 1/2007), lot 4101. From The Slotkin Family Trust Collection. (#85697)

# Brilliant PR68 Cameo 1911 Quarter Exceptional White-on-Black Contrast

3550 1911 PR68 Cameo NGC. The frosty designs rise in full detail above the prominently mirrored fields. Brilliant and beautiful with a virtual absence of carbon. Proof mintages generally declined throughout the Barber series. In 1911, only 543 proofs were struck, and few survivors can compare with the present outstanding quality. Census: 10 in 68 Cameo, 5 finer (3/11).

From The Slotkin Family Trust Collection. (#85697)

3551 1912 PR65 NGC. Modestly contrasted with green-to-gold border toning that extends more toward the fields on the reverse. Interiors are pale silver with a touch of blue. A well-appointed Gem proof from an issue of just 700 specimens. Census: 39 in 65, 36 finer (3/11). From The Slotkin Family Trust Collection. (#5698)

#### 1912 Barber Quarter, PR67 ★

3552 1912 PR67 ★ NGC. The 1912 proof Barber quarter is a low-mintage issue, with only 700 pieces struck. The present coin is a well detailed Superb Gem, with frosty design elements and significant field/device contrast, although not enough for a Cameo designation. The late-date Barber quarters usually show some lack of detail, probably a sign that the hubs were wearing out. Dark green, gray, and amber toning shows at the rims. Census: 1 in 67 ★, 1 finer in the designation (3/11). (#5698)

#### Gem Cameo Proof 1913 Quarter

3553 1913 PR65 Cameo PCGS. Delicate almond-gold toning graces this unabraded and nearly carbon-free specimen. The luminous portrait and eagle exhibit ready contrast with the reflective fields. The strike is bold, since the right shield corner shows only minute incompleteness. Population: 3 in 65 Cameo, 10 finer (3/11). (#85699)

#### 1913 Cameo PR66 Quarter, Nearly Brilliant

3554 1913 PR66 Cameo NGC. Faint tan patina is just barely visible on the lower obverse, but this well-preserved Premium Gem is otherwise untoned. The strike is crisp overall, which only enhances the eye appeal, and the frosty devices demonstrate pleasing contrast with the seamless fields. Census: 6 in 66 Cameo, 11 finer (3/11). Ex: FUN Signature (Heritage, 1/2007), lot 4108. From The Slotkin Family Trust Collection. (#85699)

### 1913 Barber Quarter, PR68 Cameo Tied for Finest Certified

3555 1913 PR68 Cameo NGC. Business strike 1913 quarters are rare in high grades, and the few surviving Gem or finer proofs do little to fill the demand. Novice and advanced collectors alike seek these pieces to represent the date. This Superb Gem Cameo proof is fully brilliant with no toning on either side. It is an exceptional example for the connoisseur. Census: 4 in 68 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#85699)

# 1914 Barber Quarter, PR67 Famous Low-Mintage Issue

3556 1914 PR67 NGC. The 1914 proof quarter is famous for its low mintage of only 380 pieces. This carefully preserved example has deeply mirrored fields with lightly lustrous devices that yield a subtle cameo effect that is further enhanced by the coin's brilliance. Census: 16 in 67, 7 finer (3/11). (#5700)

# 1915 Barber Quarter, PR67 ★ Last Barber Issue

3557 1915 PR67 ★ NGC. Vivid shades of green, lavender, and cobaltblue toning grace the surfaces of this delightful Superb Gem, creating a spectacular play of colors when the coin is angled in the light. The devices are razor-sharp, and the fields display a deeply reflective quality beneath the patina. Census: 2 in 67 ★, 0 finer in the designation (3/11).

From The Slotkin Family Trust Collection. (#5701)

#### STANDING LIBERTY QUARTERS

3558 1916 Genuine PCGS. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AG specimen that has been cleaned and damaged. The curved base of the 6 is evident, and minor design differences on the bottom of Liberty's drapery confirm the key date. Creamwhite and charcoal-gray with generally clear legends, although the date and WE TRVST are well worn. A mechanical coin counter mark on the obverse center constitutes the moderate damage. (#5704)

#### Choice XF 1916 Standing Liberty Quarter

Standing Liberty quarter's low mintage might make it vulnerable to hoarding, had the coins mixed in with 1917 Type One pieces to make them circulate. This Choice XF example stayed in circulation only briefly, and fields faintly toned blue and gold remain lustrous. A soft strike is of little concern.

From The Dustinn (Dusty) Lee Gibson Collection. (#5704)

#### Unc Details 1916 Standing Liberty Quarter

- 3560 1916 Cleaned ANACS. Unc Details, Net AU50. This example of the famous first-year 1916 Standing Liberty quarter eagle shows no trace of wear. While the surfaces are altogether too bright after a past cleaning, each side has retoned in pastel-blue and canary-yellow, and the lower reverse shows an additional arc of violet-brown color. Housed in a small-format holder. From The Dustinn (Dusty) Lee Gibson Collection. (#5704)
- 3561 1917 Type One MS66 Full Head NGC. Beautifully sculpted with bold and swirling luster. Faint gold and peach accents visit otherwise silver surfaces that offer gorgeous texture and preservation. (#5707)
- 3562 1917 Type One MS66 Full Head NGC. For the type collector who favors intensely toned coins, this is a dream selection. Thick peach, medium-gray, violet, and navy hues blanket each side, and the strike is remarkably bold.(#5707)
- 3563 1917 Type One MS66 Full Head PCGS. An extremely popular type coin, the 1917 Type One Standing Liberty quarter is always in demand, especially with the Full Head designation. This sharply detailed Premium Gem is brightly lustrous, with ice-blue, gold, and amber toning. (#5707)
- 3564 1917 Type One MS66 Full Head PCGS. CAC. A frosty Premium Gem, this quarter has exceptional design definition throughout, including a full head, complete shield, and bold bald eagle. Only a faint trace of champagne toning is visible over otherwise brilliant silver surfaces. Ideal for the type enthusiast.(#5707)

3565 1917 Type One MS66 Full Head NGC. A sharply detailed Premium Gem specimen of this popular date, with vivid gold, lavender, and ice-blue patina. The strike exhibits Full Head definition, and the mint luster is vibrant. This 1917 Standing Liberty quarter would make an ideal type coin.(#5707)

### 1917 Type One Quarter, MS67 Full Head No Finer Certified Pieces

- 3566 1917 Type One MS67 Full Head NGC. Boldly struck, not just on Liberty's head but on all of the design elements over each side, including the rivets on the outer shield, the horizontal and vertical lines on the inner shield, and the eagle's breast feathers. The frosty surfaces yield a light golden-gray appearance, and are devoid of significant contact marks. As of March 2011, neither NGC nor PCGS have certified any finer pieces with Full Head. Census: 56 in 67 Full Head, 0 finer (3/11). (#5707)
- 3567 1917-D Type One MS65 Full Head PCGS. An essentially brilliant Gem with booming luster and an intricate strike. Well preserved and pleasing. A horizontal die crack through the beak and flank may be of interest to the specialist. Housed in an old green label holder.(#5709)
- 3568 1917-D Type One MS65+ Full Head PCGS. CAC. Light pink and blue tints over immensely lustrous, faintly textured surfaces. This well-defined MS65+ piece also has an arc of gold-orange at the left reverse.(#5709)
- 3569 1917-D Type One MS66 Full Head NGC. An impressive strike on this Premium Gem transcends Liberty's Full Head to include crisp delineation on the horizontal and vertical stripes of the inner shield, all of the rivets, and the eagle's plumage. Dappled orange, blue, and violet patina further fuels the eye appeal. Census: 75 in 66 Full Head, 16 finer (3/11).(#5709)
- 3570 1917-D Type One MS66 Full Head PCGS. CAC. Chestnut-tan, gunmetal, and lavender tints enrich this relatively lightly toned Premium Gem. Cartwheel luster swirls around the mark-free fields and devices, and is undiminished by the light, even patina. Well struck, as is often the case for the Type One subtype, coined only between late 1916 and mid-1917.(#5709)
- 3571 1917-D Type One MS66 Full Head PCGS. A stone-white and needle-sharp Premium Gem of this popular and briefly issued type. Magnificently void of abrasions, and the cartwheel luster is undiminished by time. For generations, numismatists believed that the Type One design was abandoned due to prudery. Today, the consensus is that the armor plate was added to prepare Liberty for war.(#5709)

# Important MS66 Full Head 1917-S Type One Quarter

3572 1917-S Type One MS66 Full Head PCGS. CAC. Crisp detail and potent obverse luster are the calling-cards of this Type One Premium Gem with Full Head details. Light splashes of gold patina add color to otherwise near-brilliant surfaces which are carefully preserved. Elusive any finer, with just eight such Full Head pieces known to PCGS (3/11). (#5711)

## MS67 ★ Type Two 1917 Quarter Lovely Peripheral Toning

3573 1917 Type Two MS67 ★ NGC. As of (3/11), the present example is the only 1917 Type Two quarter without a Full Head designation to secure the coveted NGC Star, undoubtedly due to the attractive peripheral russet-red, golden-brown, and sea-green toning. Lustrous and virtually pristine. The leaf sprigs on Liberty's head are lightly brought up, but the strike is otherwise exceptional for the Type Two design. (#5714)

3574 1917-D Type Two MS66 PCGS. CAC. A bright and minimally toned example of the first Type Two D-mint Standing Liberty quarter. While Liberty's head is flat, the shield is better-defined with just a few weak rivets. Population: 19 in 66, 1 finer (3/11). (#5716)

# Gold-Tinged Full Head Gem 1917-D Type Two Quarter

3575 1917-D Type Two MS65 Full Head PCGS. A fetching Gem Full Head of this popular mintmarked subtype. The surfaces are largely silver-white, lightly tinged with gold. The strike is about typical for the issue, with a couple of shield rivets missing but sufficient for the Full Head level, with three olive sprigs showing, a complete hairline and earhole. Seldom seen finer. Population: 55 in 65 Full Head, 16 finer (3/11). (#5717)

#### Bold Gem Full Head 1917-S Type Two Quarter

3576 1917-8 Type Two MS65 Full Head PCGS. Despite a threefold mintage compared to the 1917-S Type One, the 1917-S Type Two is far more elusive at the Gem Full Head level and finer; simply put, fewer examples were saved. This boldly struck silver-gold example lacks an absolute strike on a couple of shield rivets but is well within the confines of the Full Head designation. Little contact is evident amid the generous eye appeal. (#5719)

3577 1918 MS66 Full Head NGC. Uncommonly well-defined with glimpses of frost that twinkle in the context of more swirling patina. A gold-kissed Premium Gem of considerable beauty. Census: 30 in 66 Full Head, 3 finer (3/11).(#5721)

3578 1918-D MS65 NGC. The 1918-D Standing Liberty quarter is seldom encountered with a sharp strike, and this pleasing Gem is typically soft on Liberty's head and the eagle's breast. The surfaces display intermingled lavender and gold toning, with strong satiny mint luster. Census: 45 in 65, 17 finer (3/11).(#5722)

# Gem 1918-D Standing Liberty Quarter Rare Full Head Example

3579 1918-D MS65 Full Head NGC. The 1918-D Standing Liberty quarter is an underrated date in the series, especially difficult to locate with a strong date and a Full Head. The present coin is exceptional in this regard, with sharply detailed devices throughout and Full Head definition. The mostly brilliant surfaces exhibit just a touch of gold toning, with vibrant satiny mint luster. Census: 36 in 65 Full Head, 7 finer (3/11). (#5723)

3580 1918-S MS66 NGC. CAC. The 1918-S Standing Liberty quarter is a rare issue in Premium Gem condition. The present coin is a well detailed Premium Gem with vibrant mint luster and just a touch of gold toning. Census: 24 in 66, 6 finer (3/11).(#5724)

#### Choice VF 1918/7-S Quarter

3581 1918/7-S VF35 PCGS. FS-101. The classic wartime overdate, offered here as a Choice VF coin that shows moderate wear but few of the usual serious abrasions; the worst mark, visible on the shield, is minor in context. The date is clear, especially the final digit. Blue and gold-peach overtones linger on still-luminous surfaces. From The Dustinn (Dusty) Lee Gibson Collection. (#5726)

#### 1918/7-S Standing Liberty Quarter, AU Details

3582 1918/7-S — Improperly Cleaned — NGC Details. AU. FS-101. This famous hubbing error is one of the keys to the Standing Liberty series, and collectors prize examples in any grade. The present coin exhibits light high-point wear on the devices, with the underdigit 7 plainly visible below the 8 in the date. The surfaces are mostly white, with just a touch of gold toning. An attractive specimen of this popular variety, despite the noted cleaning.

3583 1919 MS67 PCGS. CAC. Radiant cartwheel luster emanates from both sides of this Superb Gem quarter. Contact marks are few and far between, but the eye appeal is over the top. The strike is excellent, with all shield rivets bold and a 90% full head. A super coin for collectors who obsess about overall quality rather than one area of the coin.(#5728)

3584 1919-D MS62 PCGS. Light gold toning does little to diminish the brilliant luster of this splendid specimen. Both sides have a strong strike with about 70% of the head detail remaining. From The Scott Cedars Collection. (#5730)

3585 1920 MS65 Full Head NGC. Light gold and peach elements cover parts of otherwise silver surfaces on this shining Full Head Gem. Sharp definition on not only Liberty's head but also her shield. Census: 54 in 65 Full Head, 18 finer (3/11).(#5735)

**3586 1920-D MS63 NGC.** About half of the head details are still visible on this pleasing Select Mint State 1920-D quarter. Both sides have frosty luster beneath speckled gold toning. From The Scott Cedars Collection. (#5736)

3587 1921 XF45 PCGS. CAC. The resumption of large-scale silver dollar production in 1921 limited the coinage of other silver denominations. Slate-gray overall with light tan and aqua toning on the obverse border. Luster illuminates protected areas of the design. (#5740)

#### Choice 1921 Standing Liberty Quarter

3588 1921 MS64 PCGS. A wisp of honey toning is present, although many collectors would describe this near-Gem as brilliant. Lustrous and minimally abraded with a bold strike at the centers and moderate incompleteness near 6 and 12 o'clock on each side. A lower-mintage date that is popular in all grades. From The Scott Cedars Collection. (#5740)

3589 1923 MS66+ PCGS. CAC. The luster on this silver-white MS66+ piece is so deep and radiant it could easily pass muster on a Morgan dollar. While the head details are incomplete, all of the shield rivets are bold or nearly so. We note a single dig on the eagle's breast. Population: 3 in 66+, 15 finer (3/11).(#5742)

3590 1923 MS67 NGC. A lovely silver-gold Superb Gem of this available issue, well-struck enough that a full earhole shows (but no olive sprigs), and all of the shield rivets are present, with only two faint. Grand luster and eye appeal emanate from both sides. (#5742)

3591 1923 MS67 PCGS. CAC. Bright silver luster swirls over each side, and the lower obverse and upper reverse show gold-orange patina. Well struck save for the usual trouble-spots at head and lower shield. Population: 14 in 67, 0 finer (3/11).(#5742)

3592 1923-S VF30 PCGS. The date wore quickly on circulated pre-1925 Standing Liberty quarters, which increases price pressure on survivors with clear dates. The final 3 and the mintmark are bold, sufficient to confirm the issue. The 192 is readable but shows greater wear. A problem-free stone-gray example. (#5744)

3593 1923-S VF30 PCGS. A scarce date in the series, the 1923-S is usually found in lower circulated grades. This piece has moderate wear with pleasing gray-gold surfaces, retaining traces of luster. (#5744)

#### Premium Gem 1923-S Quarter Light Golden Toning

3594 1923-S MS66 NGC. Better-defined than usually seen with details on Liberty that approach but do not reach Full Head status. Light gold and orange hues settle over parts of the immensely lustrous surfaces which are otherwise silver-white. A minimally marked and gorgeous Premium Gem. Census: 19 in 66, 4 finer (3/11). (#5744)

### Choice 1923-S Standing Liberty Quarter Scarce Full Head Example

3595 1923-S MS64 Full Head NGC. The 1923-S Standing Liberty quarter is an important key to the series, from a small mintage of 1.3 million pieces. The present coin is sharply detailed, with full head definition and satiny mint luster. Original iridescent goldenbrown and electric-blue toning blankets both sides. Census: 58 in 64 Full Head, 53 finer (3/11).

From The Scott Cedars Collection. (#5745)

## 1923-S Quarter, MS65 Full Head Condition and Strike Rarity

3596 1923-S MS65 Full Head NGC. The 1923-S combines a condition rarity with a strike rarity, making this Gem Full Head specimen an extremely important coin for the advanced Standing Liberty quarter specialist. Both sides have outstanding design definition with a bold shield in addition to the sharp head details. The surfaces are brilliant with frosty silver luster and no evidence of toning. Census: 22 in 65 Full Head, 31 finer (3/11). (#5745)

1924 MS65 Full Head PCGS. This sating Gem Full Head quarter has a brilliant silver obverse paired with a gold and iridescent toned reverse. PCGS has only certified 38 finer examples (3/11). (#5747)

## 1924-D Standing Liberty Quarter, MS65 Full Head Uncommonly Well Defined

3598 1924-D MS65 Full Head PCGS. A lovely representative of this semikey D-mint issue. Both sides are carefully preserved, with an uncommon lack of abrasions. In addition to Liberty's head, the inner shield and gown lines display razor-sharp striking definition. There is slight softness of detail near the top of the date, but every digit is readily evident. A smattering of hazy-lilac patina does not interfere with this coin's bright, frosty texture.

Ex: Dallas Signature Auction (Heritage, 12/2005), lot 698. (#5749)

3599 1924-S MS64 NGC. Pastel lilac, chestnut, and jade-green patina graces portions of this lustrous and pristine near-Gem. A clash mark resembles an additional feather beneath the S in PLURIBUS. Encased in a former generation holder. From The Orchid Collection. (#5750)

3600 1924-S MS64 PCGS. This Choice Mint State piece represents a scarce issue that is seldom found with a sharp strike. This satiny specimen has about 70% of its head detail still visible and is sharper than most.

From The Scott Cedars Collection. (#5750)

3601 1924-S MS65 NGC. This 1924 Standing Liberty quarter exhibits well detailed design elements and remarkably clean fields. The surfaces are brilliant, with the slightest hint of gold toning, and the mint luster is vibrant. Census: 55 in 65, 20 finer (3/11).

#### Bright MS66 1924-S Quarter

3602 1924-S MS66 PCGS. CAC. Bright silver luster shows only a few tiny areas suggesting peripheral color. While Liberty's head is flatly struck, the rest of the piece is better-defined, and the rivets of the shield show only minor softness. A couple of pinpoint marks off the eagle's left (facing) wing contribute to the grade. Population: 28 in 66, 1 finer (3/11). (#5750)

### Radiant Superb Gem 1924-S Quarter One Finer at NGC

3603 1924-S MS67 NGC. The surfaces in the center of each side are silver-gray with random accents of powdery blue and lilac, complementing dots of charcoal at the extreme rims. Handsome luster radiates throughout both sides. The strike is somewhat blunt on Liberty's head and the eagle's breast, but essential contact is absent. NGC has certified only four 1924-S quarters at this level, with a single one finer (3/11). (#5750)

3604 1926 MS65 Full Head NGC. Dappled golden-brown toning is limited to the rims of this lustrous and uncommonly mark-free Gem. The strike is exceptional, since even the two shield rivets near the waist are well outlined. In a former generation holder. From The Orchid Collection. (#5755)

### Virtually Unimprovable 1926 Quarter, MS66 Full Head

3605 1926 MS66 Full Head PCGS. Beautiful, lustrous silver-gold centers cede to accents of burgundy and charcoal near the rims of the splendidly well-struck Premium Gem Full Head example. Even the shield rivets are close to full, and the eye appeal is generous throughout. A nice example for a type or date run — and virtually unimprovable. Population: 25 in 66 Full Head, 1 in 66+ Full Head, 1 finer (3/11). (#5755)

3606 1926-S MS64 PCGS. CAC. The San Francisco Mint coined cents, nickels, dime, quarters, and double eagles in 1926. In each instance, mintage totals were meager with relatively few high grade survivors. This Choice example has a sharp strike with about 70% of its head details visible. The surfaces are frosty with delicate champagne toning.

From The Scott Cedars Collection. (#5758)

### Well-Struck Gem Full Head 1927-D Standing Liberty Quarter

3607 1927-D MS65 Full Head PCGS. The Jay Cline series reference ranks Full Head Gem and Premium Gem examples of the 1927-D as extremely underrated. This MS65 Full Head piece boasts lovely yellow-gold obverse and rose-blue reverse coloration, with subtle luster and excellent overall eye appeal. well-struck overall, despite softness on a couple of shield rivets and the lowest stars flanking Liberty. Population: 71 in 65 Full Head, 12 finer (3/11). (#5763)

3608 1928 MS65 Full Head NGC. Sharply struck examples of the 1928 quarter are rare, and this piece is sharper than most with full head details and sharp rivets on the shield. The surfaces of this Gem are brilliant and frosty with no toning on either side. Census: 50 in 65 Full Head, 24 finer (3/11).(#5767)

3609 1929 MS66 Full Head NGC. Peach-to-orange peripheral elements are more prominent on the reverse. Silver-gray interiors are satiny and beautiful, and the definition is excellent on both head and shield. Census: 51 in 66 Full Head, 8 finer (3/11). (#5773)

3610 1930 MS67 NGC. CAC. Light gold-orange toning is present at the borders, accented occasionally in blue-violet. Subtly frosted and well-preserved with strong definition on the shield, though the head falls shy of full details. Census: 5 in 67, 0 finer (3/11). (#5778)

3611 1930 MS66 Full Head NGC. Pale gold-gray toning laces lustrous fields, and additional peach elements are also present in places. Impressively preserved with Full Head details and only slight softness on Liberty's shield. NGC has graded just 28 numerically finer Full Head coins (3/11).(#5779)

3612 1930 MS66 Full Head PCGS. Frosty luster with faint hints of blue and gold-orange, the latter mostly near the rims. Excellent design detail is particularly eye-catching at Liberty's head. NGC has graded 28 numerically finer Full Head pieces (2/11). From The Dr. Donald M. Gilner Collection. (#5779)

#### EARLY HALF DOLLARS

3613 1795 2 Leaves VG8 PCGS. CAC. O-109, R.4. Dove-gray fields contrast with stone-white device high points. Sharply detailed for the VG level, since all legends are bold and all stars are well outlined. The dentils are also clear, save for greater wear on the obverse at 10:30 due to a slightly misaligned die.(#6052)

#### Choice Fine 1795 2 Leaves O-116 Half

3614 1795 2 Leaves Fine 15 NGC. O-116, R.4. Even on this Choice Fine specimen, the incused UNITED under star 8 and LIBE can be faintly discerned. On the reverse, die clashing has left extra milling incused above UNITED. The deeply colored pinkish-gray surfaces show wear consistent with the grade level, but there are no mentionable distractions otherwise. (#6052)

3615 1795 2 Leaves — Obverse Damage — NGC Details. VF. O-119, R.4. A small attempted puncture near the flag of the 5 in the date corresponds to the NGC notation. Lime-green and peach-gold toning envelop this evenly circulated Flowing Hair half. Minor obverse adjustment marks are noted on Liberty's neck and the border at 9 o'clock.(#6052)

3616 1795 2 Leaves — Scratched — ANACS. VF20 Details. O-122, R.5. This challenging die variety is noted for a heavy reverse crack between 3 and 5 o'clock, and prominent clash marks about the portrait. A pair of faded pinscratches rest on the right obverse field, and both sides are hairlined and have occasional small rim marks. The obverse lavender and electric-blue toning appears artificial. (#6052)

#### XF 1795 Flowing Hair Half, O-110

3617 1795 2 Leaves XF40 NGC. O-110, R.3. An early die state of this obtainable Flowing Hair die pairing. Steel-gray and almond toning blend throughout lightly abraded and well defined surfaces. A small rim nick on the reverse at 4 o'clock, but otherwise pleasing with hints of luster lurking in design crevices. (#6052)

3618 1795 Small Head Good 4 PCGS. O-128, High R.5. Cream-gray and steel-blue with most peripheral letters clear, although the ME in AMERICA, the ED in UNITED, and about half of STATES are faint. A scarce Flowing Hair subtype, represented only by O-126 through O-128.(#6054)

#### Very Fine 1802 Half Dollar, O-101

- 3619 1802 VF20 PCGS. O-101, R.3. The sole die marriage for this difficult date. Depositors of silver bullion at the Mint preferred the dollar denomination, which was more convenient for large payments. For the half dollar, the *Guide Book* reports a mintage of less than 30,000 pieces, and PCGS has certified just two examples as Mint State. The present coin has slightly glossy cream-gray, lime-green, and sun-gold toning. All letters in PLURIBUS are at least partly present, and no marks singularly detract. (#6065)
- 3620 1803 Large 3 XF40 PCGS. O-101, R.3. This faintly toned example is predominantly ice-blue, although tan-gold visits the margins. Traces of luster linger within the curls, and the slightly subdued surfaces lack noticeable marks.(#6066)
- 3621 1805/4 Genuine PCGS. O-103a, R.5. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been tooled and cleaned. The obverse stars have re-engraved centrils, and the field near the chin is cloudy from cleaning. A thin scratch passes through obverse star 4. Late dies with a retained triangular break over the first two stars and a vertical break near the nose.(#6070)
- 3622 1805 XF45 NGC. O-112, R.2. The cream-gray centers are encompassed by aqua-green, sun-gold, and rose-red toning. A well defined and minimally marked example of the popular Draped Bust type.(#6069)

## Choice AU 1805 Half Dollar, O-106 Vibrant Green-Gold Toning

- 3623 1805 AU55 NGC. O-106, R.3. This satiny representative is encompassed by deep gunmetal-gray, walnut-brown, and apple-green toning. No post-strike abrasions are noticeable, but the reverse displays heavy adjustment marks, as made, beneath the blanket of patina. The 1805 is rare in Mint State, and the present piece likely challenges the Condition Census. (#6069)
- 3624 1806 Pointed 6, No Stem VF25 PCGS. O-109, R.1. Autumnbrown and pearl-gray with even design definition save for an indistinct area on the curls beneath the hair ribbon. O-109 is a mint error, since the die engraver neglected to add a stem to the branch that appears to grow out of the eagle's claw. (#6073)
- 3625 1806 Pointed 6, No Stem VF30 PCGS. O-109, R.1. Tan, olive, and gunmetal shades encompass this evenly circulated and attractive example of the popular No Stem variety. Smooth save for a faded abrasion near star 6.(#6073)

3626 1807 Draped Bust VF35 PCGS. O-102, R.2. Though moderately worn, this minimally abraded piece has glossy fields in medium-gray, blue, and gold. Strong eye appeal for this final-year Draped Bust half dollar die pair. (#6079)

#### **BUST HALF DOLLARS**

#### MS62 1807 Capped Bust Half, O-112 50 Over 20, Large Stars

- 3627 1807 Large Stars, 50 Over 20 MS62 NGC. O-112, R.1. Walnut-brown and pearl-gray consume the fields and motifs, while the peripheries are forest-green. Sharply defined and minimally abraded with satin luster particularly prominent on the reverse. The blundered denomination is a popular early Capped Bust variety. (#6086)
- 3628 1808 AU50 PCGS. O-109a, R.3. Rich gunmetal-gray and walnut-brown toning encompasses this evenly struck and partly lustrous half dollar. Marks are inconsequential except for a faded hair-thin vertical mark on the cheek.(#6090)
- 3629 1809 AU55 NGC. O-106, R.3. A Choice AU autumn-gold and stone-gray half dollar. Luster brightens design elements. Marks are inconsequential except for a small reverse rim ding at 6 o'clock. Struck a few degrees off center toward 11:30, affecting only the width of the dentils. (#6092)
- 3630 1809 Normal Edge MS61 NGC. O-115, R.2. A lustrous strawgold half dollar with an uncommonly unabraded obverse and only minor reverse contact. A small flan flaw connects stars 10 and 11. The dies are multiple-clashed and slightly misaligned, since the left borders are fully struck while the right borders are softly impressed. (#6092)

## 1809 Bust Half, MS62 Distinctive O-106 Variety

- 3631 1809 Normal Edge MS62 NGC. O-106, R.3. A repunched N in UNITED identifies the Overton pairing. A lengthy die line from the right shield corner is also diagnostic. Medium chestnut-gold and lilac toning embraces this lightly marked representative. The surfaces teem with luster, and the device high points show only slight blending of detail. (#6092)
- 3632 1809 III Edge AU55 PCGS. O-109a, R.2. Undesignated by PCGS as an experimental example, but most O-109a halves have an experimental edge with IIIII between words. A thick die crack through AMERICA provides ready Overton attribution. Almondgold and gunmetal-gray alternate across this gently shimmering example. The portrait high points show moderate wear, but abrasions are remarkably absent. (#6094)

# Select Mint State O-102 1810 Capped Bust Half

3633 1810 MS63 NGC. O-102, R.1. This coin is intermediate between the O-102 and O-102a die states, as the die crack through the 18 in the date circles left along the rim and right to stars 12 and 13, while on the reverse the die crack runs all the way clockwise from 50 C through STATES before terminating. This lustrous example has pinkish-gray central toning that cedes to electric blue at the rims on each side. A few faded obverse marks and a soft impression on the eagle's left (facing) wing determine the grade.

Ex: Central States Signature (Heritage, 5/2007), lot 701, which realized \$4,025. (#6095)

3634 1811/10 XF45 PCGS. O-101, R.1. Steel-gray and chestnut-tan with freckles of russet near peripheral elements. An unmarked and nicely detailed example of this relatively early Capped Bust date. Luster shimmers throughout the reverse legends. Ex: Long Beach (Heritage, 2/2007), lot 8359.(#6099)

# O-104 1812 Capped Bust Half MS62, Attractive Patina

3635 1812 MS62 NGC. O-104, R.1. A horizontal die line through the left (facing) wing promptly attributes this attractively toned Overton half dollar. Golden-brown and ocean-blue embrace the borders, while the fields and devices are cream-gray. Refreshingly unabraded, and luster accompanies design elements. (#6100)

## MS63 1812 Half Dollar, O-110 Smooth, Lustrous Surfaces

3636 1812 MS63 PCGS. O-110, R.1. Blushes of light golden toning overlie lustrous pearl-gray surfaces. Impressively void of abrasions, with visible contact limited to a brief slender mark on the jaw. Most of the coin is well struck, although the lower obverse and upper reverse show occasional softness. (#6100)

## Select Mint State 1814 Half Popular O-102 Variety

1814 MS63 NGC. O-102, R.2. A plethora of die lines above the drapery clasp identify this otherwise nondescript Overton marriage. Ocean-blue and plum-mauve adorn the margins of this coruscating half dollar. The forehead and other high points are stone-gray. No marks are consequential, and only star 7 lacks a full impression. (#6105)

# Unblemished VF30 1815/2 Half, O-101 Key to a Date Collection

3638 1815/2 VF30 PCGS. O-101, R.2. A blanket of russet-brown and gunmetal-blue enriches this middle-grade example. Surprisingly unabraded, and the eagle displays significant plumage. The 1815/2 is the key to a date collection of Capped Bust halves, since only a single die pair is known and survivors are relatively scarce. (#6108)

#### Choice VF 1815/2 Half, O-101a

3639 1815/2 VF35 PCGS. CAC. O-101a, R.3. The scarcer major die state that shows a slender die crack rising through 50C to the E in AMERICA. Dove-gray centers are bounded by deep gray margins. Clashed at least three times, but actual abrasions are limited to a brief thin mark near star 10. The 1815 quarter is plentiful, but its half dollar counterpart is the scarcest date of its series. (#6108)

3640 1817/3 XF40 PCGS. CAC. O-101, R.3. Deep lavender-gray toning embraces this moderately circulated but lightly abraded overdated half dollar. The strike is generally bold, with softer definition noted on the eagle's claws and the upper right stars. (#6111)

#### Select Uncirculated 1817/3 Half, O-101a

3641 1817/3 MS63 NGC. O-101a, R.2. Ocean-blue and orangered consume the obverse. The reverse is awash in butter-gold, cherry-red, and steel-gray. This satiny overdated half dollar has a concealed field mark near star 2 but is generally lightly abraded. The strike is good aside from lightness of detail on the eagle's head. (#6111)

Toned Choice 1818 Half Dollar, O-112

3642 1818 MS64 NGC. O-112, R.1. Deep cobalt-blue, lavender, and golden-brown envelop this satiny and lightly abraded near-Gem Capped Bust type coin. Exquisitely struck, since even the claws show full detail. Overton-112 is promptly identified by the A in STATES, which is rotated left relative to neighbor letters. (#6113)

3643 1820/19 Square Base 2 AU50 PCGS. O-101, R.2. Two different 1820/19 overdates are known but readily distinguished, since O-102 has a curved base on the 2. Golden-brown and applegreen patina endows the peripheries of this lightly circulated half. Luster fills the margins. Moderate marks appear near the cleavage. (#6125)

3644 1820 Square Base No Knob 2, Large Date AU50 PCGS. O-108, R.2. Golden-brown graces the borders, while the remainder of this Capped Bust half is stone-gray. Luster glimmers from protected regions, and the absence of distracting marks further confirms the eye appeal. (#6123)

Scarce O-105 1822 Half Dollar, MS64

3645 1822 MS64 NGC. O-105, R.3. Prominent die dots in the field above the eagle's neck are diagnostic for this scarce variety. The present near-Gem was struck shortly after the dies were polished; while the reverse die crack around the legends is prominent, both sides are appreciably reflective under light champagne patina. (#6129)

#### Choice 1823 Capped Bust Half Condition Census O-106a

3646 1823 MS64 PCGS. O-106a, R.2. This attractive Choice O-106a 1823 half dollar should challenge several other specimens for the number two spot in Steve Herrman's Condition Census. The present coin is sharply detailed, except for a few stars that are always seen flat on this issue. The surfaces are brightly lustrous, and only a few minor contact marks can be detected. The tampered 3 in the date and the die crack through stars 11, 12, and 13 to the bust identify the O-106a variety. Population (not attributed as O-106a): 50 in 64, 4 finer (3/11). (#6131)

3647 1825 AU58 PCGS. O-101, R.1. The satiny luster appears unbroken as it swirls across the unmarked surfaces of this straw-gold and cream-gray Capped Bust half. The strike is soft on Liberty's curls and the eagle's claws, which may be the reason that a Mint State assessment is denied.(#6142)

3648 1825 AU58 NGC. O-110, R.2. Moderate tan-brown and pearl-gray toning graces this briefly circulated but partly lustrous representative. No detracting marks are encountered. Ex: Long Beach Signature (Heritage, 5/2003), lot 6167. (#6142)

#### MS64+ Overton-110 1825 Bust Half

3649 1825 MS64+ PCGS. CAC. O-110, R.2. Medium chestnut-tan and cream-gray toning enriches this coruscating near-Gem. Well struck at the centers, with minor inexactness at the margins. Marks are surprisingly few in number and are generally confined to the reverse field beneath the left (facing) wing. Liberty's nose is strike doubled, as often seen on this Overton pairing. (#6142)

## Select Mint State O-116 1828 Half Dollar Square Base 2, Small 8, Large Letters

3650 1828 Square Base 2, Small 8, Large Letters MS63 PCGS. CAC. O-116, R.2. Parallel die lines below the bust on the obverse, dots of die rust across the lower reverse. An attractive Select example of this uncommon die pair, warmly lustrous through rich patina that takes on amber, citrine, emerald, and sapphire jewel-tones. Across the various Square Base 2, Small 8, Large Letters varieties, PCGS has graded 33 coins finer (3/11). (#6151)

3651 1829/7 AU55 NGC. O-101a, R.1. Chestnut-gold and cream-gray enrich this partly lustrous Choice AU half dollar. Examination beneath a lens fails to locate any individually relevant marks. Light wear on the curls and drapery corresponds to the grade. (#6155)

### Exquisite Choice 1829 Half Dollar Small Letters, O-105

3652 1829 Small Letters MS64 PCGS. O-105, R.1. Recutting on the upper arrow shaft identifies the Overton variety, as noted in Dr. Glenn Peterson's handy attribution reference to the Capped Bust series. This sharply struck and lustrous Choice half dollar displays peach-red and steel-blue centers. The peripheries are predominantly plum-mauve. Impressively free from contact, although we note a slender dark streak through the NI in UNITED. Encased in an old green label holder. (#6154)

3653 1830 Small 0 MS61 NGC. O-101, R.1. The left side of the first A is recut with a tiny die chip inside that letter, identifying the variety. This satiny piece exhibits ivory luster with splashes of blue and green toning.(#6156)

## 1830 Large 0 Half Dollar, O-121, MS64 Ex: Rice, Eliasberg

3654 1830 Large 0 MS64 PCGS. O-121, R.3. Ex: Eliasberg. One of the few Large 0 varieties for the date. The obverse is dove-gray throughout, while the reverse exhibits rich caramel-gold, gunmetalgray, and forest-green shades. Satiny and unabraded with a bold strike except for the upper star centers. Condition Census quality. Ex: George W. Rice; Clapp Collection; Eliasberg Collection (Bowers and Merena, 4/1997), lot 1869; FUN Signature (Heritage, 1/2007), lot 4408. (#6157)

# Choice 1831 Bust Half, O-103 Iridescent Luster and Toning

3655 1831 MS64 ANACS. O-103, R.1. The stand of the 5 in 50C is recut, diagnostic for O-103. This is a beautifully unabraded and thoroughly lustrous example with olive-gold, powder-blue, lemon, and cherry-red toning. The deepest shades of color are located near the rims. A charming representative of this collectible Capped Bust date. (#6159)

## 1831 O-119 Half Dollar, MS64+ Condition Census Candidate

3656 1831 MS64+ NGC. O-119, R.2. Die lines are visible at the end of the bust on early die states of O-119, although they are no longer visible on this late die state example. A small "inverted comma" die marker is visible in the feathers just right of the third horizontal shield line. This impressive near-Gem exhibits soft, frosty mint luster beneath vivid gold and blue toning with considerable ivory on the reverse. Although short of finest known, this piece is clearly a Condition Census candidate. (#6159)

### MS64+ 1832 Half Dollar Small Letters, Overton-110

3657 1832 Small Letters MS64+ PCGS. CAC. O-110, R.1. Ice-blue and caramel-gold consume both sides, with the former color more prominent on the obverse while the latter dominates the reverse. Well preserved and lustrous with excellent eye appeal. The devices are sharply struck, although a few stars and the A in STATES are lightly brought up. (#6160)

3658 1833 MS62 NGC. O-109, R.3. The dappled walnut-brown and stone-gray fields and devices shimmer with luster. Free from relevant abrasions, and pleasing despite occasional moderate softness of strike. (#6163)

#### Choice 1834 Half Dollar Second-Finest O-101 at NGC

3659 1834 Large Date, Large Letters MS64 NGC. CAC. O-101, R.1. Liberty's forecurl is in one solid piece and line 1 of stripe 3 extends into the crossbars, indicating the popular O-101 variety. The coin offered here is a well-struck Choice example, with attractive gold, gray, and violet toning. Strong mint luster is evident beneath the patina. Census for O-101: 1 in 64, 1 finer (2/11). (#6164)

## Lustrous Gem 1834 Capped Bust Half O-108, Large Date, Small Letters

3660 1834 Large Date, Small Letters MS65 NGC. O-108, R.2. Navyblue and russet-red accompany the margins of this lustrous and unblemished high grade half dollar. The portrait and fields are golden-tan and stone-white. The stars are softly brought up, but the major devices are crisply struck. (#6165)

3661 1834 Small Date, Small Letters MS63 PCGS. O-116, R.1. A lustrous specimen that is completely toned over both sides in shades of sea-green, peach, and gold. Diagnostic flatness is seen on the right side stars and on URI of PLURIBUS. Few surface marks appear on either side. Several bits of charcoal-colored verdigris reside just to the left of the eagle's beak, and in the field area beneath E in the motto. A lovely Select Mint State example of this late Overton variety.(#6166)

3662 1834 Small Date, Small Letters MS63 PCGS. O-113, R.1. A wisp of almond-gold toning visits this lustrous Capped Bust half dollar. The major devices are well struck, and the obverse is unmarked. Only a thin line beneath the ATES precludes an even finer third party grade. (#6166)

#### Near-Gem O-114 1834 Half Dollar Small Date, Small Letters Reverse

3663 1834 Small Date, Small Letters MS64 NGC. O-114, R.1. The 18 in the date and stars 3 and 4 are notably recut, to distinguish this variety from the similar O-113. Subtle chestnut patina visits the borders. The cartwheel luster is rich and unencumbered. Not fully struck, but the eye appeal is undeniably impressive. Ex: Long Beach Signature (Heritage, 2/2005), lot 7005. (#6166)

3664 1835 MS63 NGC. O-106, R.1. Recut on the 5 in the date with a tine off the eagle's neck. Strongly lustrous, if a trifle softly struck, with silver interiors bordered by blue, green, and gold-orange toning. Housed in a prior-generation holder. From The Dr. Donald M. Gilner Collection. (#6168)

#### REEDED EDGE HALF DOLLARS

1837 Reeded Edge Half, MS63 First Large-Production Year of the Type

3665 1837 MS63 PCGS. Reeded Edge halves were struck in such a small quantity in 1836 — 1,200+ pieces — that for many collectors 1837 represents the first collectible year. The old Bust design was reworked the previous year and given a reeded edge. According to Mint Director Patterson striking in a close collar "gives a mathematical equality to their diameters." This attractive example is brilliant throughout. The steam press was certainly effective in this case, as every detail is fully brought up. A few light abrasions appear, but none are worthy of individual mention. (#6176)

### 1837 Capped Bust Half Dollar, MS64 Reeded Edge

3666 1837 MS64 PCGS. With the introduction of steam power to coin presses came a change to production of half dollars late in 1836, a reeded edge taking the place of the earlier lettered edge. A slight reduction in diameter also occurred. This Choice Mint State example presents a sharp strike with frosty luster. The centers are brilliant with wispy champagne color inside a frame of deeper steel toning. Population: 66 in 64, 24 finer (3/11). (#6176)

3667 1838 MS61 NGC. Excellent detail with fewer abrasions than are usually seen for the MS61 designation. Strong luster under light gold, pink, and blue patina.(#6177)

#### Original Near-Gem 1838 Reeded Edge Half

3668 1838 MS64 PCGS. CAC. The mintage of this issue was a generous 3.5 million coins, and the dies used to manufacture this piece managed to produce an excellent strike overall, despite the numerous wispy die cracks evident on the obverse periphery. The lustrous, original silver-gray and gold-tinged surfaces appear only a few minor marks away from the Gem level. PCGS has seen only eight numerically finer (3/11). (#6177)

#### SEATED HALF DOLLARS

#### Near-Gem 1841-O Seated Half Attractive Green-Gold Toning

3669 1841-O MS64 NGC. WB-101. Large O. Golden-brown and aquamarine ensure the originality of this lustrous and well struck New Orleans half dollar. The reverse is exceptionally void of marks, and the obverse displays only minor field grazes. Numerous slender die cracks on the reverse will be of interest to the specialist. Census: 4 in 64, 4 finer (3/11). (#6237)

#### Rare MS62 No Drapery 1845-O Half

3670 1845-O No Drapery MS62 PCGS. CAC. The 1845-O No Drapery is one of the few die polish varieties to receive separate *Guide Book* listing. The drapery near the elbow was inadvertently removed by a Mint worker attempting to efface clash marks on the obverse die. Caramel-gold and dove-gray compete for territory across this dusky and satiny New Orleans half dollar. The strike is full aside from slight inexactness on the eagle's left (facing) ankle, and the fields display only inoffensive contact. Population: 2 in 62, 3 finer (3/11). (#6250)

3671 1846 Tall Date MS62 NGC. WB-108. A diagonal die line or "spike" through the crosslet of the 4 identifies the variety. Satiny and sharply impressed with moderate caramel-gold, steel-blue, and lilac toning. Marks are minor save for a faint cluster above the LF in HALF.(#6252)

### Bold 1848 Half Dollar, MS64 Scarce in Mint State

3672 1848 MS64 NGC. Electric-blue hugs the rims, while peachgold and cream-gray adorn the centers. Well struck with only a hint of incompleteness on the eagle's left (facing) ankle. A loupe reveals only faint field marks. Luster shimmers across raised design elements. Census: 11 in 64, 2 finer (3/11). (#6260)

3673 1853 Arrows and Rays AU58 NGC. Light hairlines and other wispy surface marks are evident on each side of this lustrous light gray piece. Both sides of this near-Mint specimen display light gold and iridescent toning. (#6275)

3674 1854-O Arrows MS63 PCGS. A boldly toned Select example of this O-mint Arrows issue with soft luster filtering through the rich gold-orange and blue-green shadings. Well struck and minimally abraded for the grade with solid eye appeal. (#6280)

3675 1855 Arrows MS64 NGC. Deep ocean-blue and olive-green colors grace the margins, while the centers offer blended lilac and peach hues, the whole coin with prevailing gray patina. A gently shimmering and well-struck near-Gem with a clean reverse and only a lightly marked obverse. The No Motto Arrows type was produced for just two years, which further fuels the demand for the scarce high-grade survivors. Census: 16 in 64, 7 finer (3/11). (#6281)

- 3676 1855-S Arrows Genuine PCGS. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been damaged and cleaned. The '55-S was the first silver half dollar issue from San Francisco, and its importance to commerce was such that PCGS has graded none as Mint State. The present dove-gray example has an attempted puncture at 4 o'clock on the reverse, and the left obverse field has a suspicious area near Liberty's lowered hand.
- 3677 1856 MS64 PCGS. Pink, peach, and plum border toning gives way to pale gold and silver-gray at the interiors of this crisply struck near-Gem. Refreshingly unabraded and remarkably appealing for the designation. Population: 16 in 64, 5 finer (3/11). (#6287)

## Boldly Struck 1856-S Seated Half, MS62 Rare in Uncirculated Grades

3678 1856-S MS62 NGC. Caramel-gold toning drapes this fully struck and lightly abraded better date quarter. Luster traverses the margins and devices. Silver coins from the early San Francisco Mint were vital to West Coast commerce, and few if any were set aside by collectors until decades later. Census: 1 in 62, 3 finer (3/11). (#6289)

## 1857 Half Dollar, Richly Toned MS65 An Early No Motto Type Coin

- 3679 1857 MS65 NGC. With a sizeable (for the era) original mintage of 1.9 million pieces, the 1857 is an understandably plentiful coin in circulated grades. Mint State survivors, however, are remarkably scarce. One of precious few survivors graded MS65 at NGC and PCGS, this coin is richly toned in antique-copper, cobalt-blue, lavender-gray, and golden-orange colors. The texture is fully frosted, but the strike is a little blunt around the obverse periphery and over the eagle's left (facing) leg on the reverse. Some small and moderate abrasions are noted on Liberty's portrait and in the right obverse field. Both major grading services report 18 examples in MS65 with only five finer (3/11).
  - Ex: FUN Signature (Heritage, 1/2003), lot 7157, where it realized \$3,220. (#6290)
- 3680 1858 MS64 PCGS. A well-defined and warmly lustrous No Motto Seated half with rich patina over each side. Yellow-green and orange hues appear mostly at the margins, while the interiors are silver-gray and pewter with varying levels of opacity. Population: 57 in 64, 17 finer (3/11).(#6293)
- 3681 1860-S MS61 NGC. WB-1. The Large S mintmark is indicative of WB-1, one of just two known die varieties for the 1860-S half dollars. This champagne toned Mint State piece has frosty luster with sharp design elements. A highly appealing example. Census: 6 in 61, 18 finer (3/11).(#6301)

#### CONFEDERATE STATES OF AMERICA

### Near-Gem 1861 J.W. Scott Token Struck With Confederate Half Dollar Die

3682 1861 Scott Token MS64 PCGS. CAC. Breen-8003. In 1879 professional numismatist J.W. Scott purchased the original C.S.A. half dollar die from Ebenezer Locke Mason, Jr., who in turn acquired it from Dr. B. F. Taylor, former chief coiner of the New Orleans Mint. Scott overstruck 500 1861-dated halves with the die after planing off the reverses, then paired the C.S.A. die with a "token" die to strike another 500 pieces in white metal. This highgrade example of the latter issue is lightly toned and crisply struck, with smooth prooflike fields. Listed on page 395 of the 2011 Guide Book. Population: 15 in 64, 2 finer (3/11). (#340403)

#### SEATED HALF DOLLARS

- 3683 1866-S No Motto XF40 PCGS. An unblemished stone-gray example of this much better issue. All letters in LIBERTY are sharp, as is much of the eagle's plumage. A mere 60,000 pieces were struck prior to the West Coast arrival of Motto dies. Population: 13 in 40, 21 finer (3/11).(#6315)
- 3684 1866-S No Motto XF40 PCGS. WB-1. The San Francisco Mint coined 60,000 No Motto half dollars in 1866, all from a single die pair. This moderately worn example has grayish-gold toning with deeper peripheral color. Both sides are attractive with smooth surfaces. Population: 13 in 40, 21 finer (3/11).(#6315)

## Lustrous MS64+ 1869 Half Dollar Medium Golden-Gray Patina

3685 1869 MS64+ NGC. Dusky almond-gold and ice-blue grace highly lustrous and boldly struck half dollar. Wispy marks on the right obverse field correspond to the grade. A fairly generous mintage allows the 1869 to trade as a type coin in well circulated grades, but the issue becomes a challenge to acquire this close to full Gem. Census: 1 in 64+, 2 finer (3/11). (#6325)

#### VF30 Sharpness 1870-CC Half

3686 1870-CC — Reverse Countermark — ANACS. VF30 Details. An incuse chopmark with an oval outline is carefully placed above the eagle's left (facing) shoulder. The chopmark flattens a small area opposite near the TY in LIBERTY. This introductory date Carson City half is otherwise unabraded, although the left obverse field is granular. A rim break at 1:30 on the reverse may be of interest to the specialist. (#6328)

3687 1874 Arrows MS63 NGC. WB-102. Large Arrowheads. The frosty silver-gray surfaces are well-struck, with lambent luster and a few stray ticks and scrapes consistent with the grade. Some strike doubling appears at the lower reverse, on HALF D.(#6346)

### MS64 1874-S Arrows Half A Mint State Rarity

3688 1874-S Arrows MS64 PCGS. Small Wide Mintmark. The Wiley-Bugert Complete Guide to Liberty Seated Half Dollars lists this issue as scarce, especially in higher circulated grades, and rare in Mint State. Deep smoke-gray and amber toning lets underlying mint luster filter through. Population: 6 in 64, 3 finer (3/11). (#6348)

### 1875-S Half Dollar, MS65 Impressively Toned

3689 1875-S MS65 PCGS. A gorgeous S-mint Gem with prominent patches of blue-green and peach toning over most of each side. Windows of bright silver luster add spice to the eye appeal, and the level of detail on Liberty's head is impressively complete. Though 3.2 million pieces were struck for this issue, PCGS has graded only 10 coins finer (2/11). (#6351)

## Gem 1877-CC Seated Half Only Three Coins Finer at PCGS

3690 1877-CC MS65 PCGS. CAC. Medium CC. Type Two Reverse. From a mintage approaching 2 million pieces, the 1877-CC Seated Liberty half dollar is an available date in circulated grades, but Mint State specimens are scarce, and Gems are rare. The present coin is sharply detailed, with satiny mint luster, and attractive shades of green and violet toning at the peripheries. Housed in an old green label holder. Population: 16 in 65, 3 finer (3/11). (#6356)

3691 1878-CC VG10 PCGS. Starkly contrasted between gold-gray and charcoal with a touch of orange at the obverse borders. This well-worn but important Carson City half dollar has the letters L and Y in LIBERTY clear and the rest faintly outlined to at least some degree. Population: 12 in 10, 49 finer (3/11).(#6359)

3692 1880 MS63 PCGS. CAC. Considerably reflective like many other examples in this business strike issue of 8,400 pieces, though there is too much swirling luster for this well struck piece to come close to a proof appearance. Delicate green-to-gold patina drapes the outer areas of the lightly abraded surfaces. Population: 28 in 63, 55 finer (3/11).(#6362)

## Gem 1891 Seated Liberty Half Nice Luster and Toning

3693 1891 MS65 PCGS. Randy Wiley and Bill Bugert call the 1891 Seated Liberty half dollar "a better date overall and quite scarce in higher grades." The present coin is an attractive Gem, with sharp details in all areas except the top stars, which are a little flat. The coin possesses vibrant mint luster, and displays traces of pale green, lavender, and ice-blue toning. Population: 22 in 65, 10 finer (3/11). (#6373)

#### PROOF SEATED HALF DOLLARS

### Near-Gem Cameo Proof 1859 Half Ex: Stokely Collection

3694 1859 PR64 Cameo PCGS Secure. CAC. Type One Reverse, with the tops of LF in HALF close. This well struck near-Gem has lovely golden-brown toning framed with peripheral electric-blue blushes. The obverse exhibits pinpoint strike-throughs but few hairlines or other post-production faults. Although the *Guide Book* reports a proof mintage of 800 pieces, Breen states, "many proofs were melted as unsold." Population: 7 in 64 Cameo, 4 finer (3/11). Ex: Stokely Collection (Heritage, 8/2006), lot 3364. (#86413)

# 1860 Half, PR64 Nicely Reflective and Only Slightly Toned

3695 1860 PR64 PCGS. Type Two Reverse. This reverse is easily distinguishable by the crowded appearance of the L and F in HALF, and also by the dotlike lump along the eagle's left leg that was imparted to the hub and subsequently all working dies. Even though 1,000 proofs were struck of the 1860 half, undoubtedly a significant number were melted as unsold at year's end. This attractive, brightly reflective example displays slight contrast against the design elements. The obverse is mostly brilliant, while the reverse is draped in light reddish patina. Population: 32 in 64, 16 finer (3/11). (#6414)

## 1862 Seated Liberty Half Dollar, PR64 Important Early Civil War Issue

3696 1862 PR64 NGC. The 1862 half in proof can be obtained with minimal difficulty through the near-Gem level of preservation. Gems are scarce and higher-grade pieces are elusive. Rich bluishviolet, golden-orange, and yellow-green patination bathes both sides, which are sharply struck and nicely preserved. Census: 61 in 64, 32 finer (2/11). (#6416)

## Cameo Gem Proof 1862 Half Intricately Struck

3697 1862 PR65 Cameo NGC. Ocean-blue and lavender illuminate the margins of this intricately struck and beautiful Gem. Despite the toning, the major devices are frosty, particularly on the obverse. This Civil War specimen is from a proof mintage of only 550 pieces. Census: 8 in 65 Cameo, 4 finer (3/11). From The Slotkin Family Trust Collection. (#86416)

110111 The Switch Family Trust Conection. (#00410

## 1867 Half Dollar, PR64 Cameo Deeply Mirrored and Nicely Contrasted

3698 1867 PR64 Cameo PCGS. In spite of the seemingly large Philadelphia business strike mintage of 449,925 pieces, high-grade examples are seldom seen. In fact, some 1867-S halves have had the mintmark removed to simulate a Philadelphia coin. This scarcity of business strikes adds date pressure to the proofs. This attractive, deeply mirrored example displays noticeably frosted devices on each side. The surfaces are essentially brilliant, with just a hint of light patina on the obverse. Population: 9 in 64 Cameo, 10 finer (3/11). (#86425)

## 1867 With Motto Half Dollar, PR65 Cameo Rarely Seen So Fine

3699 1867 PR65 Cameo PCGS. CAC. The second year of the With Motto Seated coinage, the 1867 silver proof sets were produced to the extent of 625 coins. Few 1867 proofs of any denomination have survived in such pristine preservation as the present untoned Gem Cameo half, however, with excellent field-device contrast and no mentionable distractions. Diagonal striations, as made, appear in the right obverse field. The eye appeal is excellent. Population: 8 in 65 Cameo, 2 finer (3/11).

From The Peter Kevorkian Collection. (#86425)

#### Cameo Gem Proof 1868 Half Dollar Seldom Seen With Contrast

3700 1868 PR65 Cameo NGC. Golden-brown bands surround the margins of this carefully preserved Gem. The strike is fully brought up throughout, and all devices and legends exhibit strong frost relative to the glasslike fields. This early Motto proof issue has a mintage of just 600 pieces, and examples of such quality are highly elusive today. Census: 3 in 65 Cameo, 1 finer (3/11). Ex: FUN Signature (Heritage, 1/2007), lot 4517. From The Slotkin Family Trust Collection. (#86426)

3701 1869 PR63 NGC. Remarkable powder-blue, ruby-red, and sun-gold bands fill the obverse periphery. The central obverse is untoned, and exhibits prominent cameo contrast. The reverse is primarily peach-gold, although the margin displays ocean-blue. Ex: FUN Signature (Heritage, 1/2008), lot 1593, which realized \$1,725.(#6427)

## 1869 Seated Liberty Half, PR66 Cameo None Certified Finer

3702 1869 PR66 Cameo NGC. A fully struck Premium Gem, from a tiny mintage of 600 pieces. The frosty texture of the design elements stands out boldly against the liquid reflectivity of the mirrored fields. The brilliant fields reveal no trace of toning. Census: 5 in 66 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#86427)

3703 1870 PR64 PCGS. Only 1,000 proof Seated Liberty half dollars were struck in 1870, and Choice specimens are very scarce today. The present coin is a well struck specimen, with a little softness showing on the arrows. The fields are brightly reflective, under dark green, golden-brown, and cerulean-blue toning. Population: 54 in 64, 15 finer (3/11).(#6428)

### 1870 Half Dollar, PR66 Scarce With Motto Issue

3704 1870 PR66 PCGS. Soft champagne color dominates the obverse, while the same color palette takes on slightly deeper hues on the reverse. Incompleteness of strike occurs on Liberty's breasts and the eagle's left (facing) leg and claw and adjacent arrow feathers, while the remaining design elements are sharply defined. Both sides are nicely preserved. Census: 41 in 65, 60 finer (3/11).

Ex: Long Beach Signature (Heritage, 9/2008), lot 2260, where it brought \$5,175.

From The Slotkin Family Trust Collection. (#6428)

## Gem Proof 1871 Seated Half Mintage of 960 Pieces

1871 PR65 PCGS. This attractive Gem proof 1871 Seated Liberty half dollar displays vivid green, gray, and violet toning, with most of the color on the obverse. The design elements are sharply detailed on the obverse, but the reverse shows a touch of softness on the eagle's feathers. The fields are reflective under the patina. Population: 14 in 65, 3 finer (3/11). (#6429)

3706 1872 PR63 Cameo PCGS. The frosty devices contrast with glassy fields on this 1872 Seated proof half dollar, from a mintage of 950 pieces. Light iridescent toning is largely confined to the margins. Sharply struck, although evaluation beneath a loupe reveals faint field hairlines. Population: 10 in 63 Cameo, 9 finer (3/11).(#86430)

### 1872 Half Dollar, PR65 ★ Cameo Rarely Seen Finer

3707 1872 PR65 ★ Cameo NGC. Ex: Richmond Collection. A stonewhite Gem with radiant, icy devices and nicely mirrored fields. This fully struck specimen can be identified in future auction appearances by a faint vertical planchet streak (as made) on the lower reverse. A brief lintmark is also detected beneath the I in AMERICA. One of just three Cameo proofs of this issue awarded the Star designation by NGC (3/11).

Ex: Richmond Collection III (David Lawrence, 3/2005), lot 1816; FUN Signature (Heritage, 1/2007), lot 4523.

From The Slotkin Family Trust Collection. (#86430)

- 3708 1875 PR64 NGC. The near-white surfaces of this near-Gem proof display a degree of prooflike fields that offer mild variance with the well struck frosty devices. Magnification brings out some faint field hairlines mingled with die polish lines. Census: 40 in 64, 34 finer (3/11).(#6436)
- 3709 1875 PR63 Cameo PCGS. CAC. Generally silver surfaces with the usual split of frost and mirrors. A number of hairlines run through the fields, and Liberty's arms show a handful of contact marks. Appealing nonetheless. Population: 1 in 63 Cameo, 7 finer (3/11).(#86436)
- 3710 1876 PR63 NGC. Type One Reverse. Open Bud. The popular variety that appears to display the upper half of an S mintmark beneath Liberty's neck. Brilliant save for a glimpse of butter-gold toning near the rims. A good strike with minor incompleteness on Liberty's chest and knees.

Ex: Palm Beach Signature (Heritage, 3/2006), lot 901.

3711 1876 PR61 Cameo NGC. Type One Reverse. Navy-blue and russet-brown toning enriches the margins of this Centennial-year proof. The strike shows only slight softness on Liberty's knees and the eagle's left (facing) ankle. Minor obverse hairlines decide the

### 1877 Seated Half, PR66 Cameo None Certified Finer, Ex: Eliasberg

3712 1877 PR66 Cameo NGC. Type Two Reverse. A splendid Premium Gem proof from a tiny mintage of 510 pieces, this coin claims an illustrious pedigree to the fabled Eliasberg Collection. The design elements are fully struck and frosty, while the brilliant fields are deeply mirrored, ensuring bold cameo contrast. Census: 4 in 66 Cameo, 0 finer (3/11).

Ex: John M. Clapp; John H. Clapp; Louis Eliasberg via Stack's in 1942; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 2043.

From The Slotkin Family Trust Collection. (#86438)

3713 1878 PR64 NGC. Exactingly detailed with a remarkable, almost glasslike appearance. In terms of eye appeal, this Choice proof's bold blue and lilac-lavender toning overwhelms any other concerns. (#6439)

#### Ice-White 1878 Seated Half, PR66 Cameo

3714 1878 PR66 Cameo NGC. This brilliant Seated half has ice-white motifs and darkly reflective fields. A good strike despite a hint of softness on Liberty's forehead and other high points. The obverse field is slightly cloudy near 3 o'clock, as made from an incompletely prepared die. Census: 10 in 66 Cameo, 3 finer (3/11). From The Slotkin Family Trust Collection. (#86439)

#### PR66 Cameo 1879 Seated Half One Finer at PCGS

3715 1879 PR66 Cameo PCGS. CAC. Type One Reverse. Light gold toning visits the borders of this beautiful proof Seated half. The devices are thickly frosted, and the white-on-black contrast is exceptional. Liberty is well struck from head to toe, and even the eagle's left (facing) claw shows good detail. With the Bland-Allison Act forcing Mint resources elsewhere, only 5,900 half dollars were struck in 1879, a total that combines proofs and business strikes. Population: 4 in 66 Cameo, 1 finer (3/11).

Ex: Stephen Stokely #1 PCGS Registry Set of Proof Seated Half Dollars; Denver ANA Signature Auction (Heritage, 8/2006). From The Peter Kevorkian Collection. (#86440)

### 1879 Seated Half, PR67 Cameo Borderline Ultra Cameo

3716 1879 PR67 Cameo NGC. Type One Reverse. First of the lowmintage issues in the Seated half series. Only 1,100 proofs were struck out of a total output of 5,900 coins. This brilliant example is deeply mirrored on each side and nearly flawless, with noticeable mint frost on the devices, which yields a strong cameo contrast. Census: 9 in 67 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#86440)

## 1880 PR66 Half Dollar Outstanding Mirroring and Eye Appeal

3717 1880 PR66 NGC. WB-102. Type Two Reverse. Attributable by the lump on the left (facing) wing of the eagle. This low total-mintage date had 1,355 proofs produced in addition a measly 9,755 strikes for circulation. The nearly brilliant centers are surrounded by peripheral rings of golden-rose and cobalt-blue on each side. The devices are intricately detailed, as one would expect from a proof striking. Deeply mirrored in the fields. Census: 24 in 66, 9 finer (2/11). (#6441)

## 1880 Half Dollar, Spectacularly Toned PR67 Ex: Philip Kaufman

3718 1880 PR67 NGC. Ex: P. Kaufman. Under the "Comments" header in the book *The Complete Guide to Liberty Seated Half Dollars*, Wiley and Bugert state of the 1880: "Low mintage but somewhat saved. Proofs are available." If the latter statement is true, and we have no reasons to believe that it is not, then it should only be applied to examples that grade below the PR67 level. One of just 11 so graded survivors at NGC and PCGS (3/11), this beautifully toned specimen is awash in copper-gray toning that yields to a swath of near-brilliance around the central obverse. This color yields to brighter lilac-pink iridescence at direct angles, and a few sprays of blue-gray patina are noted toward the rims. The strike is sharp and the reflective features are devoid of grade-limiting distractions. Ex:Philip Kaufman Collection/FUN Signature (Heritage, 1/2003), lot 7230, where it brought \$5,175.

From The Slotkin Family Trust Collection. (#6441)

3719 1880 PR62 Cameo NGC. The silver-white, amber-edged surfaces on this proof Seated half are immediately suggestive of an even finer grade, although a loupe reveals minor field hairlines and even more insignificant contact evidence as the culprits. It also reveals an excellent strike and good eye appeal. (#86441)

#### Beautifully Toned PR66 Cameo 1881 Half

3720 1881 PR66 Cameo NGC. Type Two Reverse. An impressively preserved and beautifully toned specimen from an issue of 975 pieces, an ideal selection for the high-end proof type enthusiast. Bold contrast perseveres despite rich patina, a mix of deep gold-gray, lavender, and blue that lightens up on the strongly frosted devices, supplying an excellent cameo effect. Census: 15 in 66 Cameo, 2 finer (3/11). (#86442)

3721 1883 PR63 Cameo NGC. A splendid Cameo proof, this 1883 Seated half exhibits excellent contrast with brilliant surfaces. A hint of gold toning is evident on each side, although many would call this piece untoned. Census: 17 in 63 Cameo, 46 finer (3/11). (#86444)

## Vivid 1883 Half Dollar, PR65 Cameo

3722 1883 PR65 Cameo PCGS. The deepening hues of the setting sun figure prominently on the obverse of this vivid Gem. Goldenorange and burnt orange cede to lilac in the right field. The reverse is more demure, with silver centers scarcely toned encircled by a light orange tinge at the rims. A fully struck coin with a few minor field hairlines. Population: 4 in 65 Cameo, 13 finer (3/11). (#86444)

#### Superb Gem Cameo Proof 1883 Half Dollar

3723 1883 PR67 Cameo NGC. Minimally toned with maximum contrast. That this Superb Gem specimen did not receive an Ultra Cameo designation comes as a surprise, especially given the stark contrast between the thickly frosted, sharply struck devices and the boldly mirrored fields around them. Census: 3 in 67 Cameo, 1 finer (3/11)

From The Slotkin Family Trust Collection. (#86444)

### 1884 Toned Gem Proof Half Lowest Total Mintage of the Decade

3724 1884 PR65 NGC. The extremely low mintages of quarters and half dollars from 1879 through 1890 at the Philadelphia Mint puts added pressure on proofs of that era from collectors seeking a choice example. So it is with this Gem piece, one of only 875 proofs made, compared with 4,400 business strikes. This lustrous specimen shows light pinkish-silver toning, more prominent on the upper portion of each side. Few distractions are seen, even under a loupe. Census: 30 in 65, 17 finer (3/11). (#6445)

# 1884 Half Dollar, PR66 Cameo Brilliant With Dazzling, Deeply Mirrored Fields

3725 1884 PR66 Cameo PCGS. Thick frost covers the devices of this crisply struck Premium Gem. Pristine save for a few nearly imperceptible hairlines near star 1. Proofs and business strikes combined for a mintage of only 5,275 pieces. Population: 1 in 66 Cameo, 1 finer (3/11).

Ex: FUN Signature (Heritage, 1/2008), lot 1625. From The Peter Kevorkian Collection. (#86445)

## White 1884 Half Dollar, PR66 Cameo Richmond Collection Pedigree

3726 1884 PR66 Cameo NGC. Ex: Richmond Collection. The 1 in the date is repunched. Blatant white-on-black contrast distinguishes this brilliant high-grade Seated proof. The strike is close to full, and numismatic perfection is precluded only by a faint Y-shaped flan flaw to the right of Liberty's head. Just 875 proofs were issued, and the business strike production of 4,400 pieces was also quite low. Ex: Richmond Collection (David Lawrence, 3/2005), lot 1829, which realized \$5,290.

From The Slotkin Family Trust Collection. (#86445)

#### Flashy Seated 1885 Half Dollar Brilliant PR66 Cameo

3727 1885 PR66 Cameo NGC. A stone-white Premium Gem that boasts icy motifs and dark, glassy fields. A good strike with only slight inexactness on the forehead curls and the centers of nearby stars. No carbon is observed, even when studied beneath a loupe. A meager 930 proofs were produced. Census: 13 in 66 Cameo, 11 finer (3/11).

From The Slotkin Family Trust Collection. (#86446)

### 1886 Seated Half, PR65 Scarce in All Grades

3728 1886 PR65 PCGS. CAC. This issue is scarce in all grades, from a business strike mintage of 5,000 coins in addition to the 886 proofs. A lovely Gem proof, this piece has nice contrast with brilliant silver surfaces and mildly mirrored fields. Both sides are lustrous with delicate gold toning. Population: 22 in 65, 15 finer (3/11). (#6447)

## 1886 Seated Half, PR64 Cameo Low-Mintage Date in All Formats

3729 1886 PR64 Cameo NGC. The 1886 Seated Liberty half dollar is a rare issue in all formats, as only 886 proofs were struck to accompany a small business-strike mintage of 5,000 pieces. The present coin is a sharply detailed Choice example, with delightful green, golden-brown, and violet patina. The fields display the usual reflectivity under the toning, contrasting boldly with the frosty devices. Census: 11 in 64 Cameo, 14 finer (3/11). (#86447)

### 1886 Seated Half Dollar Deeply Reflective PR66 Cameo

3730 1886 PR66 Cameo PCGS. Wiley-Bugert lists only one die pairing for the 1886, for both business strikes and proofs. Undoubtedly this has led to confusion between actual proofs and first-strike circulation coins in the past, but there is certainly no doubt about the status of this coin. The fields are deeply reflective on each side, with sharply contrasting devices. While mostly brilliant, each side has just a trace of pale golden patina.

From The Slotkin Family Trust Collection. (#86447)

# 1887 Half Dollar, PR66 ★ Cameo Exceptional Eye Appeal

3731 1887 PR66 ★ Cameo NGC. This is a lovely proof representative of a Seated half dollar whose original business strike mintage amounted to just 5,000 coins. Thus, the 710 proofs are a popular alternative for collectors. The margins are toned in variegated cobalt-blue, reddish-gold, and tan-russet colors, and both sides display areas of brilliance in the centers. (The areas vary in size, with the larger on the reverse.) Both sides show sharp details and undeniable technical merits. (#86448)

#### Pristine PR67 Cameo 1887 Half Dollar

3732 1887 PR67 Cameo NGC. The proof mintage was a moderate 710 pieces for the 1887 half dollar, but only 5,000 business strikes were produced as a complement. This Superb Gem proof Cameo coin boasts splendid ice-white surfaces lightly kissed with gold on each side. The surfaces are essentially pristine, but the strike is a bit blunt at the upper obverse on Liberty's forehead and the nearby stars. Still a lovely coin with generous eye appeal. Census: 4 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#86448)

#### Gem Deep Cameo 1887 Seated Half

3733 1887 PR65 Deep Cameo PCGS. The fields are blinding mirrors while the devices sport a thick layer of mint frost, producing the desirable "silver on black" contrast of this Deep Cameo piece. The centers are largely untoned while a light rim accent consists of amber-gold on each side. A couple of small areas of deeper color appear on the reverse, along with a diagonal toning line through the eagle's left (facing) wing. An appealing and fully struck Gem. Population: 2 in 65 Deep Cameo, 0 finer (3/11).

From The Peter Kevorkian Collection. (#96448)

### 1889 Half Dollar, PR65 Cameo Surprisingly Scarce With Contrast

3734 1889 PR65 Cameo PCGS. CAC. Half dollars from the 1880s are memorable and highly collectible because of their low total mintages. In the case of the 1889 half, 711 proofs were struck in addition to 12,000 business strikes. It is surprising that so few Cameo halves are known of this date. A mere four coins have been certified by PCGS at the Gem level with only one finer (3/11). This deeply mirrored example displays nearly brilliant centers with significant golden-russet and blue peripheral toning. The heavily frosted devices are essentially defect-free. From The Peter Kevorkian Collection. (#86450)

#### BARBER HALF DOLLARS

#### 1892 Half Dollar, MS65 Debut of the Charles Barber Design

3735 1892 MS65 NGC. Marking the debut of the new design that Charles Barber created, the 1892 is a popular choice for type collectors. Gem specimens are available with only a little searching. This piece has frosty silver luster and sharp design definition. The obverse has medium intensity gold toning with lighter gold on the brilliant reverse. Census: 77 in 65, 42 finer (3/11). (#6461)

3736 1893 MS64 PCGS. CAC. Nearly all Barber half dollars are condition rarities, and the 1893 is no exception. Just under 2 million were minted, but most entered circulation where they remained for many years. This pleasant exception is sharply struck and retains brilliant silver luster with frosty surfaces and light champagne toning. Population: 29 in 64, 23 finer (3/11). (#6465)

#### 1893-S Barber Half, MS63 Low-Mintage Issue

- 3737 1893-S MS63 PCGS. CAC. Mint records indicate only 740,000 Barber half dollars were struck in 1893 at the San Francisco Mint. Most examples seen are heavily circulated, and few Mint State specimens survive. The present coin is an attractive Select piece, with sharply detailed devices and vibrant mint luster. The surfaces are mostly brilliant, with hints of light gold toning. Population: 19 in 63, 20 finer (3/11). (#6467)
- 3738 1897-O Improperly Cleaned NCS. Unc. Details. An untoned and prooflike scarce date New Orleans half dollar. The portrait and obverse field display faint hairlines. Well struck aside from slight blending near the right shield corner.(#6478)
- 3739 1897-S AU55 NGC. Golden-brown and powder-gray patina embraces this generally lustrous better-date half dollar. Slight friction on the cheek and occasional minor marks attest to a brief encounter with commerce.(#6479)
- 3740 1898 MS64 PCGS. CAC. Strongly struck with a subdued but elegant appearance. Reddish-gold and brick border hues give way to largely silver-gray interiors with satiny luster. Population: 47 in 64, 24 finer (3/11).(#6480)

## 1898 Barber Half, MS65 Full Design Details

3741 1898 MS65 NGC. This Gem Barber half dollar has dark gold, lavender, blue, and steel toning on the obverse, with lighter reverse iridescence and underlying satin luster. Both sides have strong design definition that is indicative of a full strike. Census: 14 in 65, 2 finer (3/11). (#6480)

## 1898 Barber Half Dollar, MS65 Conditionally Rare

3742 1898 MS65 PCGS. The 1898 Barber half dollar, while historically considered a common date, is anything but common in Gem. This brilliant example has satiny silver luster with bold design motifs and lovely iridescent toning confined to the right obverse border with only a trace of gold on the reverse. Population: 16 in 65, 8 finer (3/11). (#6480)

## Distinctive 1900-S Barber Half, MS65 Only Three Pieces Finer at PCGS

- 3743 1900-S MS65 PCGS. CAC. The 1900-S is a conditional rarity within the Barber half dollar series. David Akers has called it "one of the unheralded rarities of the Barber half dollar series." This Gem is surpassed by few examples at either service, either numerically or aesthetically. The center obverse alternates pastel blue and pink, with dollops of sunset-orange decorating some of the areas outside the stars. The reverse is more subtly toned with the same palette. The strike is far finer than usually seen. We are tempted to call it full, as there is no visible weakness on the right shield corner, the wing nearby, or the right claw. An excellent example. Population: 6 in 65, 3 finer (3/11). (#6488)
- 3744 1901 MS64 PCGS. Peach, pink, and plum hues mingle over each side of this lustrous near-Gem. Well struck with a few abrasions at Liberty's cheek which preclude a finer designation. Population: 54 in 64, 12 finer (3/11).(#6489)
- 3745 1901-S AU50 NGC. Still-lustrous surfaces show peach and dark heather toning at the margins with silver interiors. Lightly rubbed with small abrasions dotting the portrait and the nearby fields. Census: 2 in 50, 27 finer (3/11).(#6491)

#### 1902 Barber Half Dollar, MS66 A Condition Rarity

- 3746 1902 MS66 NGC. A fully brilliant Premium Gem, this 1902 Barber half dollar is elusive in MS65 or finer grades. Nearly 5 million were minted, but few survived as fine as this piece. Both sides are boldly detailed with brilliant silver surfaces and satin luster. A remarkable example for the Barber half dollar aficionado. Census: 6 in 66, 1 finer (3/11). (#6492)
- 3747 1903-O MS63 PCGS. Deep purple, russet, and gunmetal-gray colors intermingle on the surfaces of minimally marked representative. Soft luster in the fields complements the well-defined design elements. Population: 24 in 63, 52 finer (3/11). (#6496)
- 3748 1904-S Corroded, Cleaned, Scratched ANACS. AU Details, Net XF40. Mildly granular from a chemical cleaning, this steel-gray and tan-tinged rare date Barber half has an inconspicuous pinscratch near the third star and a large area of charcoal patina on the upper reverse.(#6500)
- 3749 1906 MS64 PCGS. A splendid Choice Mint State piece that is rarely found finer, this frosty example has light champagne toning over brilliant silver surfaces. Considered a common date in the Barber half dollar series, the 1906 is conditionally rare in better Mint State grades. Population: 72 in 64, 27 finer (3/11). (#6504)
- 3750 1906-S MS62 NGC. Brilliant satin mint luster is visible beneath deep gold, blue, and iridescent toning on both sides of this important issue. A sharp die impression provides nearly full design motifs. Struck at the time of the Great San Francisco Earthquake. Census: 12 in 62, 43 finer (3/11).(#6507)
- 3751 1907-S XF45 PCGS. A pleasing example of this scarce issue that is often missing from Barber collections. Lighter design points reside within a frame of deep gray and gold toning. A few contact marks are consistent with the grade.(#6511)

#### Gem Lightly Toned 1908-D Barber Half

3752 1908-D MS65 PCGS. A well-produced specimen of this midseries Denver Mint issue, the present Gem boasts moderate cartwheel luster under a light layer of grayish-gold patina accented by ice-blue and russet accents. A well-struck piece despite the usual problem area on the reverse. Population: 23 in 65, 11 finer (3/11). (#6513)

## 1908-O Half Dollar, MS66 Frosted Mint Luster and Attractively Toned

3753 1908-O MS66 PCGS. CAC. The New Orleans Mint was about to close, and it did a year later, with examples from the end of this era often showing weak design definition. Mintage of '08-O half dollars blossomed to 5,360,000 coins, clearly the highest Barber half dollar production of any date from this mint. This is a fully lustrous example with light gold color and wisps of iridescent highlights. The surfaces have frosty luster with excellent eye appeal. A spectacular Premium Gem for the advanced collector. Population: 16 in 66, 12 finer (2/11). (#6514)

# Lovely 1908-S Barber Half, MS66 Among Finest Certified

- 3754 1908-S MS66 PCGS. Dappled autumn-gold and sea-green toning blankets the borders of this thoroughly lustrous and minimally abraded S-mint half dollar. The fletchings are well struck, and the right shield corner shows only slight inexactness. Population: 4 in 66, 2 finer (3/11). (#6515)
- 3755 1909 MS64 NGC. Deep peach and pink-gray toning blossoms over satiny surfaces. A generally well-defined near-Gem with more wispy abrasions than serious marks. NGC has graded just 30 numerically finer examples (3/11).(#6516)

#### 1909 Barber Half Dollar, MS65 Full Mint Brilliance

- 3756 1909 MS65 PCGS. Only the slightest design weakness is evident at the central obverse on this brilliant Gem. Both sides are fully lustrous with frosty silver surfaces and a complete absence of toning. Trivial surface marks prevent a higher grade. Population: 52 in 65, 9 finer (3/11). (#6516)
- 3757 1910 MS64 NGC. CAC. The 1910 Barber half dollar boasts a low mintage of 418,000 pieces, and Choice examples are very scarce in today's market. This specimen exhibits well detailed devices, vibrant satiny mint luster, and attractive light gold toning. Census: 32 in 64, 8 finer (3/11).(#6519)

3758 1911 MS65 NGC. Bright silver-white luster with a touch of tan clinging to the rims and visiting the obverse fields. This well struck Gem is minimally marked and decidedly attractive. Despite a mintage of over 1.4 million pieces, the 1911 half is elusive at the Gem level and a condition rarity any finer. Census: 18 in 65, 10 finer (3/11).(#6521)

#### 1911-D Half Dollar, Lustrous and Toned MS65

3759 1911-D MS65 NGC. Speckled golden-gray and lilac are sprinkled over both sides of this impressively preserved and lustrous Gem. The right (facing) claw and fletchings show softness, but the strike is otherwise complete. The 1911-D was the first Denver Mint issue since 1908 and the second-lowest mintage from that facility. Census: 15 in 65, 7 finer (3/11). (#6522)

## Premium Gem 1911-S Half Dollar The Pryor-Duckor Specimen

3760 1911-S MS66 PCGS. CAC. Pale yellow-gold toning graces this satiny and unmarked Premium Gem. The strike is decidedly above average, since only the base of the fletchings exhibits any softness. The 1911-S is scarce in Mint State, as expected from its mintage of 1.272 million pieces. Population: 6 in 66, 1 finer (3/11). Ex: Numismatic Enterprises, 2/1966; James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 316; Dr. Steven L. Duckor Collection (Heritage, 5/2007), lot 858, which realized \$5,750. (#6523)

# 1912-D Half Dollar, MS65 Highly Lustrous and Iridescently Toned

3761 1912-D MS65 PCGS. CAC. A relatively common Barber half dollar issue, if any Gem Mint State Barber half could be called common. In reality, all Gem Barber halves are condition rarities. This sharply defined piece has full mint frost with a high degree of luster shining through the golden-brown, sea-green, and iridescent toning. Population: 49 in 65, 13 finer (3/11). (#6525)

#### Low-Mintage 1913 Barber Half, MS65

3762 1913 MS65 NGC. CAC. The 1913 Barber half issue ushered in a string of three low-mintage dates, continuing through 1915. This Gem 1913 is among the few finest of the issue, save for a handful each at NGC and PCGS. Strong eye appeal radiates from consistent silver surfaces with light gold-pink accents and satin luster. The strike is sharp yet incomplete. Census: 10 in 65, 2 finer (3/11). (#6527)

3763 1914 AU58 NGC. The 1914 has the lowest mintage of any business strike 20th century half dollar. This virtually Mint State example has attractive golden-russet and lilac toning. Luster is comprehensive aside from the high points of the portrait. (#6530)

#### Gem 1915-D Barber Half Dollar

3764 1915-D MS65 NGC. The 1915-D Barber half dollar was struck during the last year of the series, and some high-quality examples were saved by collectors. The present coin is an attractive Gem, with well detailed devices that show just a touch of softness on the eagle's wing. The surfaces display vibrant satiny luster, with golden-brown and ice-blue patina. Census: 45 in 65, 8 finer (3/11). (#6533)

#### PROOF BARBER HALF DOLLARS

3765 1892 PR63 PCGS. CAC. As sometimes seen on Barber issues of this introductory year, the reverse is lightly die doubled, evident on the serifs of the legends. The luminous devices are well struck and show moderate contrast with glassy fields. Toned light tan-gold with a spot between the OD in GOD. Housed in an old green label holder. (#6539)

### 1892 Barber Half, PR64 Iridescently Toned

3766 1892 PR64 PCGS. CAC. A few light hairlines explain the technical grade, but the surfaces appear finer. The fields are deeply mirrored, and each side has light rose and olive-lilac patina with deeper russet patina surrounding the devices. The strike is sharp throughout, the combination of all the above making this an excellent choice for type purposes. (#6539)

#### Debut-Year 1892 Barber Half, PR67 Cameo

3767 1892 PR67 Cameo NGC. First-year-proof collectors should find broad appeal in this debut Barber half proof from 1892, certified PR67 Cameo. The merest suggestion of color appears on Liberty's profile — a steel-gray hue — but otherwise the surfaces are ice-white, with generous contrast and radiant fields. Well-struck save for minor softness on the right shield corner and wing nearby. Census: 19 in 67 Cameo, 2 in 67 ★ Cameo, 1 finer (3/11). From The Slotkin Family Trust Collection. (#86539)

3768 1893 PR63 Cameo PCGS. An impressive Cameo proof Barber half dollar, this piece exhibits rich gold and iridescent toning on each side. The devices are boldly defined and the eye appeal is exceptional. Population: 9 in 63 Cameo, 49 finer (3/11). (#86540)

#### Brilliant PR67 Cameo 1893 Half Dollar

3769 1893 PR67 Cameo NGC. This brilliant coin displays mirrorlike fields of unfathomable reflectivity. The devices are frosted and set up a stark white cameo contrast against the "blackness" in the fields. From a mintage of 793 proofs, few survivors could complete with the appeal or technical superiority of this Superb specimen. Census: 10 in 67 Cameo, 1 in 67 ★ Cameo, 2 finer (3/11). Ex: New York Signature (6/2005), lot 5777; FUN Signature (1/2006), lot 2852.

From The Slotkin Family Trust Collection. (#86540)

#### 1893 Barber Half, PR66 Ultra Cameo Finest Seen at NGC

3770 1893 PR66 Ultra Cameo NGC. This magnificent Premium Gem displays fully struck, frosty devices that offer profound contrast with the brilliant, deeply mirrored fields. The visual appeal of this coin is tremendous. Only 792 proof Barber half dollars were struck in 1893, and this example is the finest Ultra Cameo certified at NGC. (3/11). (#96540)

#### Gold-Tinged Original 1894 Barber Half PR67 Cameo

3771 1894 PR67 Cameo NGC. Like many of the marvelous Superb Gem Cameo coins in this wonderful consignment, the present 1894 Barber half sports flashy, appealing surfaces that are mostly silver-white, here kissed with a slight tinge of gold — a characteristic that longtime collectors recognize as a sign of originality and "unfooled with" status. The strike is excellent overall, save for some weakness on that pesky right shield corner and right (facing) wing, a design flaw that makes even proofs subject to its whims. Census: 10 in 67 Cameo, 2 finer (3/11). From The Slotkin Family Trust Collection. (#86541)

#### 1895 Barber Half Dollar, PR65

3772 **1895 PR65 NGC.** The sharply defined design elements of this Gem proof Barber half are frosty and offer bold contrast with the brightly reflective fields, especially on the reverse. Both sides display vivid green, gold, and blue toning, intermingled with reflective brilliance. Census: 55 in 65, 58 finer (2/11). From The Dr. Donald M. Gilner Collection. (#6542)

#### Colorful Gem Proof 1895 Barber Half

3773 1895 PR65 NGC. What this Gem specimen lacks in contrast, it makes up for in gorgeous colors, electric-blue at the borders with a sharp turn to peach in the interior, fading to gold and finally silver-gray at the cores. The obverse shows a measure of frost on the portrait, while the eagle's contrast is more subdued; nonetheless, both sides offer generous eye appeal in their different ways. (#6542)

# 1895 Half Dollar, PR66 Memorable Mintage of 880 Proofs

3774 1895 PR66 NGC. The fame of the 1895 dollar has a coattails effect on the other proofs from this year, and all have the same mintage of 880 pieces. The reverse of this half is rotated a few degrees clockwise with respect to the obverse on this lovely Premium Gem proof. The satiny devices have full detail with brilliant luster and the fields are deeply mirrored, creating delicate cameo contrast. Both sides have subtle champagne toning. From The B & D Collection. (#6542)

#### Gem Proof Cameo 1896 Barber Half

- 3775 1896 PR65 Cameo NGC. From a mintage of only 762 pieces, the 1896 proof Barber half dollar is rare with Cameo contrast. The present coin is a brightly mirrored Gem, with boldly contrasted frosty devices. The obverse design elements are razor-sharp, but just a touch of softness shows on the right top of the shield and the adjacent wing on the reverse. A few minor hairlines are present in the fields. Census: 5 in 65 Cameo, 23 finer (2/11). (#86543)
- 3776 1898 PR63 PCGS. Although some contrast is visible between the fields and devices, the deep gold and iridescent toning prevents a Cameo designation. This splendid Barber half dollar has sharp design features with satiny devices and deeply mirrored fields. (#6545)

#### Colorful 1898 Barber Half, PR66 ★

3777 1898 PR66 ★ NGC. Just picking this NGC slab up by the reverse, we could tell the coin would be justly given the Star designation for superior eye appeal. The beautifully but variously colored surfaces include generous daubs of cobalt-blue, jade, pink, and violet, although a couple of small areas on the obverse remain silver-gray with hardly any color. The 1898-dated proof coins are renowned for their high production values, as this piece amply demonstrates. Census: 1 in 66 ★, 28 finer (3/11). (#6545)

#### Ice-White 1898 Half Dollar PR67 Cameo

3778 1898 PR67 Cameo NGC. A brilliant representative with illimitable depth of reflectivity in the fields. The heavily frosted features conjure impressive contrast with the remainder of the coin. The strike is sharp, even on the forehead curls and the right shield corner. At 735 pieces, it is surprising that the mintage of the proof 1898 half dollar is lower than, for example, the proof 1859 half, struck two generations earlier. Census: 16 in 67 Cameo, 7 finer as Cameo (3/11).

Ex: Long Beach Signature (Heritage, 1/2004), lot 5984, which realized \$6,900.

From The Slotkin Family Trust Collection. (#86545)

### PR67 1899 Half Dollar Thickly Frosted Motifs

3779 1899 PR67 NGC. Glimpses of forest-green, rose-red, and powderblue endow the borders of this razor-sharp Superb Gem. Both major devices are thickly frosted, enough to merit a Cameo or perhaps even an Ultra Cameo designation, but no such notation is present due to an older generation holder. Only 846 proofs were produced. From The Orchid Collection. (#6546)

## 1899 Barber Half, PR65 Cameo

3780 1899 PR65 Cameo PCGS. CAC. The satiny obverse motif and frosty reverse motif are surrounded by deeply mirrored fields on this Gem Cameo proof. Delicate champagne toning adds to the black and white appearance. Just four Deep Cameo proofs and 32 Cameo proofs are PCGS certified from a total 1899 proof population of 243 coins. Population: 5 in 65 Cameo, 7 finer (3/11). (#86546)

# PR65 Cameo 1899 Barber Half Deeply Reflective Fields

3781 1899 PR65 Cameo PCGS. Final year of the 19th century and always a popular date in any denomination for that reason alone. The fields on this half are extraordinarily deep and establish the mirrored background for the frosted devices. One is tempted to say this nearly flawless Gem is brilliant, but there is just the slightest hint of color on each side. Population: 5 in 65 Cameo, 7 finer (3/11). (#86546)

3782 1900 PR64 Cameo NGC. A lovely turn-of-the-century proof, this Choice Cameo specimen is fully brilliant with frosty luster and deeply mirrored fields. Both sides are untoned, allowing for full visibility of the sharply detailed devices. Census: 18 in 64 Cameo, 40 finer (3/11).(#86547)

#### White 1901 Barber Half, PR67 Cameo

3783 1901 PR67 Cameo NGC. A magnificent specimen that has practically bottomless and nearly flawless mirrors. Both sides are devoid of toning, and the sharply impressed and elegantly frosted features only enhance the remarkable eye appeal of this delightful Superb Gem. Census: 6 in 67 Cameo, 5 finer (3/11).

Ex: Denver Signature (Heritage, 8/2006), lot 3460.

From The Slotkin Family Trust Collection. (#86548)

#### White Cameo Superb Gem Proof 1901 Barber Half Dollar

3784 1901 PR67 Cameo NGC. A stone-white Superb Gem that displays exemplary contrast between the jet-black fields and the fully frosted devices. Energetic die polishing (as made) has removed the top of Liberty's hair. A remarkable example of the Charles Barber design. Census: 6 in 67 Cameo, 5 finer (3/11). From The Slotkin Family Trust Collection. (#86548)

#### Brilliant, High-End 1902 Barber Half, PR66

3785 1902 PR66 PCGS. CAC. Rings of russet and electric blue encircle the rims of this attractive Premium Gem proof, which has considerable one-sided (on the reverse) contrast, despite its origin during the so-called brilliant era of proof coinage at the Mint. But the brilliant luster and superlative eye appeal are the chief hallmarks of this high-end piece. Population: 25 in 66, 5 finer (3/11). (#6549)

### Proof Superb Gem 1902 Half Dollar Undesignated Cameo Contrast

3786 1902 PR67 NGC. The 1902 may be the most difficult issue of the type to obtain with cameo contrast. NGC has certified just five pieces as Cameo, and none as Ultra Cameo. Although the current lot lacks any such designation, there is unmistakable contrast between the deeply mirrored fields and the luminous devices. Light almond-gold toning surrounds the untoned centers. One tiny speck is noted near star 4. Census: 11 in 67, 4 finer (3/11). From The Slotkin Family Trust Collection. (#6549)

## 1903 Barber Half Dollar, PR67 Excellent Visual Appeal

3787 1903 PR67 PCGS. This is a delightful Superb Gem proof with excellent eye appeal. Very light contrast is visible between the fields and devices. This is one of the finer proof Barber half dollars available on the market, a sure winner for the connoisseur. Population: 4 in 67, 4 finer (3/11). (#6550)

#### Quicksilver PR67 1905 Barber Half

3788 1905 PR67 NGC. This quicksilver half dollar is essentially devoid of perceptible color or contrast, a consistent silver-white that confirms its origin within the "brilliant proof" era of U.S. Mint coinage. The piece is also devoid of mentionable contact, and close to a full strike save for the right (facing) wing. Census: 11 in 67, 1 in 67 ★, 3 finer (3/11).

From The Slotkin Family Trust Collection. (#6552)

# Premium Gem Proof 1906 Half Sharply Detailed, Brightly Mirrored

3789 1906 PR66 PCGS. This 1906 Premium Gem Barber half exhibits needle-sharp definition on all design elements and the fields are brightly mirrored, with a few touches of golden-tan toning. There are strong elements of field/device contrast on the reverse. Only 675 proofs were struck in 1906, and this issue is one of the few dates with a surviving population of Mint State business-strikes that nearly equals the supply of proof specimens. Population: 15 in 66, 11 finer (3/11). (#6553)

#### Gleaming PR66+ 1906 Half

3790 1906 PR66+ NGC. With the temporary end of the Morgan dollar in 1904, demand for silver proof sets fell off the proverbial cliff, and by 1906, production of proof halves was down to 675 pieces. This is a high-end survivor for the issue, faintly gold-tinged with impressive preservation and a modicum of contrast. (#6553)

#### PR67 ★ 1906 Half Dollar

3791 1906 PR67 ★ NGC. Light on contrast but heavy on the eye appeal, this Superb Gem proof deserves its Star designation and then some. Profoundly mirrored fields show the faintest hint of canary-yellow patina, and exactingly struck devices are carefully preserved. NGC has graded just three numerically finer representatives (3/11). (#6553)

#### 1907 Barber Half, PR67 Cameo One Finer at NGC

3792 1907 PR67 Cameo NGC. This Superb Gem proof 1907 Barber half, from a low midseries mintage of only 575 proof examples, is a product of the post-1901 "semibrilliant" era of proof manufacture at the U.S. Mint. The silver-white surfaces have a minor golden accent, and the reverse is well-contrasted, while the obverse shows only minor field-device contrast, even if sufficient to garner the Cameo designation. This puts it in the distinct minority in comparison to earlier proofs within the series, as the census shows. Census: 3 in 67 Cameo, 1 in 67 ★ Cameo, 1 finer (3/11). From The Slotkin Family Trust Collection. (#86554)

# 1908 Cameo Half, PR66 Cameo Exceptionally Well-Preserved Surfaces

3793 1908 PR66 Cameo PCGS. CAC. Occasional wisps of amber-gold, cobalt-blue, and lavender toning coats each side of this attractive, sharply struck Premium Gem. Both sides show considerable reflectivity, and only a couple of trivial slide marks on the cheek likely keep this sharp coin from an even finer grade. A nice, upperend piece for the PR66 rank. Population: 6 in 66 Cameo, 2 finer (3/11). (#86555)

#### Sharp 1908 PR67 Cameo Half Dollar

3794 1908 PR67 Cameo NGC. Slight but perceptible field-device contrast makes this Superb Gem a standout in other ways than for its pristine surfaces, stemming as it does from an era in which the Mint supposedly produced proofs with no contrast, at least in large part. Well-struck and ultimately pleasing. Census: 3 in 67 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#86555)

#### Dazzling PR66 Cameo 1909 Barber Half

3795 1909 PR66 Cameo NGC. A whisper of golden toning denies full brilliance, but this boldly struck beauty nonetheless commands exceptional contrast between the frosty portrait and eagle and the accompanying fields. The 1909 proof mintage is 105 pieces higher than the prior year, due to the introduction of the Lincoln cent that year. Census: 8 in 66 Cameo, 14 finer (3/11). From The Slotkin Family Trust Collection. (#86556)

## 1911 Barber Half Dollar Vividly Toned Gem Proof Example

3796 1911 PR65 PCGS. CAC. This sharply detailed Gem is vividly patinated in shades of green and violet, with deeply mirrored fields shining beneath the toning. The Barber design, and proof coins in general, had fallen into disfavor by 1911, resulting in a limited mintage of just 543 pieces. Population: 28 in 65, 20 finer (3/11). (#6558)

# 1911 Barber Half, PR65 Third-Lowest Mintage of the Series

3797 1911 PR65 NGC. Only 543 proof Barber halves were struck in 1911, the third-lowest mintage of the series. The coin offered here is patinated in shades of violet and gold at the peripheries while the central devices remain frosty and brilliant. This remarkable Gem is sharply detailed in most areas, with just the slightest softness evident on the right shield point and adjacent wing. Census: 35 in 65, 36 finer (2/11).

From The Dr. Donald M. Gilner Collection. (#6558)

### Gem Proof 1911 Half Dollar Only 543 Pieces Struck

3798 1911 PR65 NGC. The obverse of this low-mintage Gem displays streaky green and lavender patina, while the reverse is iridescently toned in shades of green and violet. The fields are brightly mirrored and the devices are frosty. Like many examples of this issue the strike is sharp in most areas, but the upper-right corner of the shield lacks complete detail. Census: 35 in 65, 36 finer (2/11). From The Orchid Collection. (#6558)

### White-on-Black 1911 Half Dollar PR66 Cameo

3799 1911 PR66 Cameo NGC. Although this brilliant Barber proof is designated as Cameo, the contrast appears unimprovable and deserving of Ultra Cameo status. However, NGC has yet to certify any 20th century Barber half as Ultra Cameo. The present specimen is pristine, and its sole imperfection is slight inexactness of strike on the feathers near the right shield corner. Census: 12 in 66 Cameo, 8 finer (3/11).

From The Slotkin Family Trust Collection. (#86558)

#### Lightly Toned Superb Gem Cameo Proof 1911 Half

3800 1911 PR67 Cameo NGC. Supremely preserved, watery mirrors have virtually no discernible imperfections and display stark cameo contrast between untoned fields and devices. Among the finest Cameo proofs of this year we have yet offered, and one of just a handful to certify similarly. Census: 6 in 67 Cameo, 1 finer (3/11). Ex: FUN Signature (Heritage, 1/2004), lot 6732, which realized \$8,050.

From The Slotkin Family Trust Collection. (#86558)

## 1912 Barber Half, PR65 Popular Late-Date Proof

3801 1912 PR65 NGC. Later-date proof Barber halves were often used for date sets by collectors of that era, rather than pursuing a circulation strike. As a result, many more high-grade proofs were preserved than in earlier years. This is a brightly reflective Gem proof, made in the semibrilliant finish used by the Mint beginning around 1901. Each side is bright, and only the slightest hairlines are present. Census: 23 in 65, 26 finer (3/11). (#6559)

#### PR67 ★ 1912 Half, Ex: Hugon

3802 1912 PR67 ★ NGC. Ex: Hugon. Highly attractive with blazing white centers and deeply toned peripheries. A faint fingerprint is noted in the right obverse field, but otherwise the piece has excellent eye appeal, even by the standards of the high grade, and the Star designation is well-deserved. NGC has graded only three numerically finer representatives (2/11). (#6559)

#### Delightful 1913 Barber Half Cameo Proof Premium Gem

3803 1913 PR66 Cameo NGC. Radiant devices rise in near-complete detail above the dark mirrored fields. Brilliant throughout save for one minuscule spot concealed near a point of star 10. The 1913 proof mintage of 627 pieces is higher than its 1914 and 1915 successors, due to the advent of the Buffalo nickel. Census: 3 in 66 Cameo, 4 finer (3/11).

From The Slotkin Family Trust Collection. (#86560)

### Superb Gem 1914 Proof Barber Half Lowest Proof Mintage in the Series

3804 1914 PR67 NGC. The low-mintage Philadelphia business strikes of the 1913-15 era make the proofs more popular. The proof 1914 mintage was also the series low, at 380 pieces. This Superb Gem is silver-white with rose and gold rim accents, well-struck save for the usual problem area on the reverse. Census: 12 in 67, 1 in 67★, 2 finer (3/11).

From The Slotkin Family Trust Collection. (#6561)

### Fully Struck PR67 1915 Barber Half Last Date of Design

3805 1915 PR67 NGC. Always popular as the last date of the design, only 450 proof Barber half dollars were produced in 1915, along with a small mintage of 138,000 business strikes. The present coin is a magnificent Superb Gem, with fully struck devices and brightly reflective surfaces. The devices are unusually frosty for a coin of this era and, although not designated as a Cameo, some elements of contrast are apparent. Census: 10 in 67, 4 finer (3/11). From The Slotkin Family Trust Collection. (#6562)

## **EARLY DOLLARS**

1795 Flowing Hair Dollar Three Leaves, B-5, BB-27

3806 1795 Flowing Hair, Three Leaves Genuine PCGS. B-5, BB-27, R.1. Bowers-Borckardt Die State II. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been damaged and cleaned. The obverse rim is crimped near 6:30, with some flatness opposite at 11:30. A faint circular mark is noted beneath Liberty's ear. The chestnut-gray toning is moderate and attractive.

3807 1795 Flowing Hair, Three Leaves — Improperly Cleaned — NGC Details. VG. B-5, BB-27, R.1. Slate-gray overall with glimpses of golden-brown and aquamarine near the rims. The surfaces are granular and moderately bright from cleaning. Less abraded than expected for the VG level.

3808 1795 Flowing Hair, Three Leaves — Improperly Cleaned — NGC Details. Fine. B-5, BB-27, R.1. Cleaned and retoned, both sides have dark gray color with hints of iridescence on the slightly rough surfaces. A thin scratch bisects the obverse. (#6852)

## VF25 1795 Three Leaves Flowing Hair Dollar B-5, BB-27, Popular Type Coin

3809 1795 Flowing Hair, Three Leaves VF25 PCGS. B-5, BB-27, R.1. This well defined Flowing Hair type coin still has faint traces of luster in some of the more protected areas. Toned cream-gray and golden-brown with sea-green throughout the obverse border. Moderate adjustment marks (as made) are noted near Liberty' ear and along portions of the obverse periphery. The reverse has scattered faded thin abrasions, none of which deny the attractive eye appeal. (#6852)

3810 1795 Flowing Hair, Two Leaves — Tooled, Improperly Cleaned — NGC Details. VF. B-9, BB-13, R.4. The right obverse field has been smoothed near Liberty's chin, and both sides have a cloudy appearance from cleaning. A rim nick at 5 o'clock on the reverse is also noted. Despite its problems, this is a better variety Flowing Hair dollar with noticeable remaining feather detail on the eagle's wings and tail.

#### 1795 Flowing Hair Dollar, VF30 Two Leaves, B-1, BB-21

3811 1795 Flowing Hair, Two Leaves VF30 PCGS. CAC. B-1, BB-21, R.2. The BB-21 variety is indicated by the position of star 1 with one point just touching the curl, and the 9x10 arrangement of berries on the reverse, with two berries inside the wreath at the bottom right. This pleasing VF30 specimen displays silver, gray, and blue-steel patina, with moderately worn central devices and a few traces of mint luster in protected areas. (#6853)

3812 1795 Draped Bust, Off Center Good 6 PCGS. CAC. B-14, BB-51, R.2. All legends and stars are clear and distant from the rim. The portrait is well outlined, although the reverse center is worn. The cream-gray fields and slate devices are unmarked. One rim ding is noted on the reverse at 7:30.(#96858)

3813 1795 Draped Bust, Off Center — Improperly Cleaned, Scratched — NGC Details. VF. B-14, BB-51, R.2. Mottled autumn-brown and cobalt-blue patina embraces this midgrade first-year Draped Bust dollar. The underlying surfaces are cloudy from faint hairlines, but marks are minor, and limited to the fields near Liberty's mouth and beneath the eagle's wings.

3814 1795 Draped Bust, Off Center — Stained, Improperly Cleaned — NGC Details. VF. B-14, BB-51, R.2. A nicely defined example of this prized introductory Draped Bust variety. Luster still shimmers from Liberty's curls and the reverse legends. The right obverse field is thickly hairlined, and a couple of thin scratches are prominent near the eagle's beak. Toned caramel-gold and cream-gray with a few blushes of deeper patina near the rims.

## XF Sharpness 1795 Silver Dollar Off-Center Draped Bust, B-14, BB-51

3815 1795 Draped Bust, Off Center — Improperly Cleaned — NGC Details. XF. B-14, BB-51, R.2. Rotation beneath a light displays dusky forest-green, lilac, and golden-brown shades. This darkly patinated Bust dollar is free from noticeable hairlines, and mentionable marks are limited to a faded pinscratch above the cleavage and a brief thin mark on Liberty's jaw.

# 1796 Draped Bust Dollar, VF30 Small Date, Large Letters, B-4, BB-61

3816 1796 Small Date, Large Letters VF30 NGC. B-4, BB-61, R.3. A die lump above the 1 in the date, with the large letters in the reverse legend indicates the BB-61 variety. The surfaces of this moderately worn VF30 specimen display even dove-gray toning, with remarkably few abrasions. Two minor rim bruises are noted at 9 and 11 o'clock on the obverse. (#6860)

### Scarce VF Small Date, Small Letters 1796 Silver Dollar, B-1, BB-66

3817 1796 Small Date, Small Letters VF20 PCGS. B-1, BB-66, R.4. The Small Date and Small Letters combination is the scarcest among the three *Guide Book* listings for the 1796. This collectible example displays deep cobalt-blue, golden-brown, and forest-green toning. We note an intermittent vertical mark from the rim to the junction of the left (facing) wing, a cluster of marks left of the eagle's neck, and a few pinscratches beneath the hair ribbon. (#6859)

#### 1796 Draped Bust Dollar, Fine 12 Large Date, Small Letters, B-5, BB-65

3818 1796 Large Date, Small Letters Fine 12 NGC. B-5, BB-65, R.2. A large die lump, or cud, attaches I and C in AMERICA, identifying this coin as a representative of the BB-65 variety, the only Large Date, Small Letters variety of the year. The size of the lump indicates this specimen is from the very scarce Die State IV. The devices show even wear and the battleship gray surfaces are smooth and lightly abraded. A tiny obverse rim bruise is detected at 11 o'clock. Census for BB-65: 5 in 12, 33 finer (3/11). (#6861)

## VF Details 1796 Small Eagle Dollar Large Date, Small Letters, B-5, BB-65

3819 1796 Large Date, Small Letters — Improperly Cleaned — NGC Details. VF. B-5, BB-65, R.2. Bowers-Borckardt Die State II. As always for B-5, a large die break extends from the northeast corner of the I in AMERICA. The 6 in the date is repunched. This creamgray representative is slightly glossy from cleaning, and we note faint pinscratches near Liberty's ear and the eagle's beak. A small flan flaw neighbors the softly struck ST in STATES. Overall, the appearance is more than suitable for the VF level. (#6861)

#### VF25 Large Date 1796 Dollar Small Letters, B-5, BB-65

3820 1796 Large Date, Small Letters VF25 PCGS. B-5, BB-65, R.2. Bowers-Borckardt Die State II-III. The break from the I in AMERICA approaches but does not touch the nearby C. Toned deep olive-gray with impressively unmarked surfaces. We note moderate mint-made laminations near obverse star 3 and across Liberty's neck. Some hair and plumage definition remains. (#6861)

### VF Details 1797 10x6 Stars Dollar Large Letters, B-3, BB-71

3821 1797 10x6 Stars, Large Letters — Improperly Cleaned — NGC Details. VF. B-3, BB-71, R.2. The three single-die-pair varieties of 1797 Bust dollar have separate entries in the *Guide Book*, creating more pressure on the different die pairs than what is seen for comparable issues. Though this moderately abraded midrange example is glossy from a past cleaning, blue-gray and gold toning softens the eye appeal. Rim merging is noted at the lower and right reverse. (#6865)

#### 10x6 Stars 1797 Silver Dollar, VF25 Large Letters, B-3, BB-71

3822 1797 10x6 Stars, Large Letters VF25 PCGS. B-3, BB-71, R.2. Bowers-Borckardt Die State III. The 10x6 star arrangement is diagnostic for B-3. Blended lilac and gunmetal-gray patina evenly blankets both sides of this minimally abraded and pleasing early silver dollar. A few faint mint-made adjustment marks on the obverse border near 9 o'clock are of no import, although the reverse displays minor rim dings at 1:30 and 9 o'clock. (#6865)

### Patinated XF 9x7 Stars 1797 Dollar Large Letters, B-1, BB-73

- 3823 1797 9x7 Stars, Large Letters XF40 ANACS. B-1, BB-73, R.3. Bowers-Borckardt Die State I. Deep plum-mauve, forest-green, and dove-gray toning dominates this nicely defined Small Eagle dollar. The right obverse field displays a few wispy marks, while the remainder of the coin is minimally abraded. Glimpses of luster shimmer from the legends and stars. (#6863)
- 3824 1798 Large Eagle, Pointed 9 Improperly Cleaned NGC Details. VF. B-14, BB-122, R.3. Bowers-Borckardt Die State IV. The reverse die is misaligned a few degrees toward 1:30. A glossy midgrade example with consistent stone-gray toning. Although this coin has been wiped throughout, there are no noticeable marks or scratches.

# 1798 Draped Bust Dollar, XF40 B-15, BB-112, Attenuated Planchet

- 3825 1798 Large Eagle, Pointed 9 XF40 NGC. B-15, BB-112, R.3. Bowers Die State II. A fascinating coin that will appeal to the error enthusiasts as much as to the early dollar specialists. Stars 6 and 7, as well as LI in LIBERTY are absent on the obverse, with all but the first and last letters of UNITED on the reverse missing. The missing design details are the result of improper metal flow. The coin was struck on an attenuated planchet, and the resulting anomaly is not to be confused with postmint damage. NGC agreed and certified this piece as XF40, an accurate determination in our opinion. Medium gray toning reveals subtle hues of rose and gold when viewed at various angles. A couple of small rim ticks on the reverse at 12 o'clock are the only problems that are worthy of mention. (#6873)
- 3826 1798 5 Stripes, Pointed 9 VG8 NGC. B-17, BB-101, R.5. This is the rare *Guide Book* variety called Pointed 9, 10 Arrows in that reference. The pointed 9, the five-line shield stripes (some visible), and line star pattern are sufficient to make the variety attribution but due to the level of remaining detail, we have attempted no die state determination. The obverse is much better-defined than the reverse, where some details at the center and right rim are faint or missing altogether. A large planchet defect, as made at the Mint, has created a fissure at the L in LIBERTY that extends to the reverse, above UN. A considerable dig is also noted above the arrows. This piece is still a respectable if lower-grade example of the rare BB-101 pairing.(#6874)

#### Pointed 9, 10 Arrows 1798 Bust Dollar B-13, BB-108, AU55

- 3827 1798 Large Eagle, 10 Arrows AU55 NGC. B-13, BB-108, R.3. Bowers-Borckardt Die State II, cracked at the L in LIBERTY but not to the left of the date. Rich peach-orange luster, accented in blue, is virtually intact on this well-defined Bust dollar with 10 Arrows reverse. Struck slightly off-center with uneven dentilation, but this only adds to its 18th century charm. (#6876)
- 3828 1798 Large Eagle, Wide Date, Pointed 9 Improperly Cleaned NGC Details. VF. B-23, BB-105, R.3. Bowers-Borckardt Die State III. A dusky walnut-brown and gunmetal-blue representative that boasts considerable definition for the VF level. The surfaces are slightly glossy but are void of distracting marks.
- 3829 1799 7x6 Stars VF20 NGC. B-14, BB-167, R.3. Bowers-Borckardt Die State II, with die flaws under AM in AMERICA but no cracking at tops of those letters. A smooth midrange beauty with deep steel-blue and gold-orange shadings mingled across each side.(#6878)

- 3830 1799 7x6 Stars Obverse Scratched NGC Details. VF. B-11, BB-161, R.3. Bowers-Borckardt Die State III. Two light but lengthy pinscratches intersect beneath Liberty's throat. A small area on the reverse field is tooled near the ME in AMERICA. B-11 is prominent for its heavy die break through the eagle's left (facing) wing.
- 3831 1799 7x6 Stars Improperly Cleaned NGC Details. VF. B-12, BB-160, R.3. Bowers-Borckardt Die State IV. Myriad prominent die cracks cross the obverse on this late dies example. This chestnut-tan and pearl-gray Heraldic Eagle dollar is a bit bright but has no distracting abrasions. Most letters in E PLURIBUS UNUM are bold.

#### Sharply Defined 1799 Silver Dollar Choice VF, B-16, BB-158

3832 1799 7x6 Stars VF35 PCGS. B-16, BB-158, R.2. Bowers-Borckardt Die State I. Butter-gold and ice-blue toning visits this well detailed early half dollar. Luster fills the hair and plumage and emerges from peripheral elements. Lightly abraded except for a few thin marks on the left reverse. (#6878)

#### 1799 Draped Bust Dollar, XF45 B-16, BB-158, Die State III

- 3833 1799 7x6 Stars XF45 PCGS. B-16, BB-158, R.2. The position of star 7 far from the L in LIBERTY and the close 17 in the date identify this coin as a representative of the BB-158 variety. This attractive XF45 specimen is only lightly worn, with most of the original detail intact. The surfaces are silver-gray, with highlights of gold and lavender, and traces of original luster. The many clash marks around the date and lower stars indicate the scarce Die State III. (#6878)
- 3834 1800 Reverse Graffiti NGC Details. Fine. B-8, BB-188, R.4. Bowers-Borckardt Die State IV. Three short, straight pinscratches on the eagle's shield are interpreted as graffiti by NGC, and the cream-gray surfaces are subdued. However, many collectors would cherish this collectible large eagle dollar.
- 3835 1800 Improperly Cleaned NGC Details. VF. B-13, BB-193, R.4. Bowers-Borckardt Die State III. Stone-white motifs contrast mildly with cloudy, lightly polished fields. Free from any relevant abrasions aside from a few moderate reverse rim dings.

## Wide Date, Low 8 1800 Dollar, VF30 B-10, BB-190

- 3836 1800 Wide Date, Low 8 VF30 NGC. B-10, BB-190, R.3. Bowers-Borckardt Die State VI. Walnut-brown and stone-gray embrace this Bust dollar. The devices display moderate wear, and mentionable abrasions are confined to a thin obverse mark at 7:30, a small reverse rim ding at 6:30, and a few hair-thin lines near the arrowheads. A scarce but collectible *Guide Book* variety. B-11 also shares the same obverse die, but is better known for its AMERICAI reverse. (#6888)
- 3837 1800 AMERICAI Fine 12 PCGS. B-19, BB-192, R.2. Gunmetal-gray and caramel-gold enrich this Heraldic Eagle dollar, which is surprisingly sharp for the Fine level. All letters in E PLURIBUS UNUM are at least partly present. A thin mark is noted near the nose tip, along with a few tiny upper obverse rim nicks.(#6892)
- 3838 1800 10 Arrows Improperly Cleaned NGC Details. Fine. B-15, BB-195, R.4. Although cloudy from cleaning, this almondgold and silver-gray example lacks consequential marks aside from a minor reverse rim nicks at 1 and 9 o'clock.

#### 1801 Draped Bust Dollar, VF35 B-1, BB-211

- 3839 1801 VF35 PCGS. CAC. B-1, BB-211, R.3. The position of the arrowhead centered under U in UNITED identifies this specimen as a representative of the BB-211 variety. The 1801 Draped Bust dollar is generally more difficult to locate than the other dates of the Heraldic Eagle design. The present coin shows moderate even wear on the devices, and the surfaces are blanketed in battleship gray patina. A minor rim bruise is evident at 9 o'clock on the reverse. (#6893)
- 3840 1801 Obverse Spot Removed NGC Details. XF. B-1, BB-211, R.3. Bowers-Borckardt Die State II. Liberty's cleavage is cleaned to diminish an unimportant gray spot. Toned gunmetal-blue and lilac with glimpses of golden-brown. A small dig is noted near the fletchings.

### Narrow Date 1802/1 Overdate Dollar B-4, BB-232, XF Details

- 3841 1802/1 Narrow Date Improperly Cleaned NGC Details. XF. B-4, BB-232, R.3. Bowers-Borckardt Die State II. The 1 firmly touching the lowest hair curl and star 13 nearly grazing the bust attribute the obverse, along with the closely spaced overdate, of course. The reverse die, first used in the 1801 B-2, BB-212, shows the leftmost arrow point under the left serif of the N in UNITED. This piece displays much eye appeal, despite an apparent light cleaning in the distant past that has retoned nicely. The silver-gray surfaces have a slight pinkish cast, but there are no mentionable drawbacks and the strike is well-centered and boldly impressed, with a wealth of detail remaining.
- 3842 1802 Narrow Date Polished NGC Details. XF. B-6, BB-241, R.1. Bowers-Borckardt Die State III. A sharply defined slate-gray silver dollar with cloudy, luminous fields and a slender darkly toned flan flaw (as made) in front of Liberty's profile. We also note a brief minor scratch on the reverse near 1 o'clock.
- 3843 1803 Small 3 Improperly Cleaned NGC Details. Fine. B-4, BB-254, High R.3. Light tan-gold toning visits this primarily silver-gray Large Eagle dollar. The fields are hairlined and unnaturally semiprooflike, but there are no obtrusive marks. Small gray obverse spots have little impact on the visual appeal.
- 3844 1803 Small 3 Polished NGC Details. Fine. B-4, BB-254, High R.3. This glossy early dollar is cloudy from hairlines and displays deep, blended cobalt-blue and steel-gray toning. There are no singular obtrusive marks, and some plumage definition remains.

#### 1803 Bust Dollar, VF25 Small 3, B-4, BB-254

3845 1803 Small 3 VF25 PCGS. B-4, BB-254, High R.3. The BB-254 variety is indicated by the position of star 13 close to the bust and the thin top 3 in the date. The present coin is a pleasing VF25 specimen, with dove-gray and blue-steel patina mixed with goldenbrown highlights. Moderate even wear is apparent on the high points of the design elements and the fields are smooth and lightly abraded. (#6900)

#### Unabraded 1803 Bust Dollar, XF45 Small 3, B-5, BB-252

- 3846 1803 Small 3 XF45 NGC. B-5, BB-252, R.2. The 3 has a thin top and its right corner nearly touches the bust, while stars 6 and 7 are more widely separated than any other pair, indicating the BB-252 variety, included in the *Guide Book* under the 1803 Small 3 listing. Pleasing silver-gray centers emit significant luster, with a single small spot noted above Liberty's hair ribbon. No mentionable abrasions are present, although a bit of central strike weakness appears on the reverse. Neither are any clash marks or adjustment marks seen on this pleasing Choice XF example. Census: 61 in 45, 97 finer (2/11). (#6900)
- 3847 1803 Large 3 XF40 PCGS. B-6, BB-255, R.2. Bowers-Borckardt Die State III. Medium orange-gold and olive-gray toning drapes this attractively detailed representative, which retains glimpses of luster within the wings and other design recesses.(#6901)

#### **GOBRECHT DOLLAR**

1836 Gobrecht Dollar, Blue-Gray Toning Judd-60, Die Alignment I, XF Details

3848 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Scratched, Improperly Cleaned — NCS. Proof, XF Details. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Struck in early December 1836, as indicated by the lack of the straight, diagonal die clash mark above the eagle's wing on the reverse. Each side is densely peppered with tiny abrasions, and the surfaces are bright from cleaning. An arcing scratch extends from Liberty's elbow to foot. A significant amount of the original reflectivity from the proof finish remains. Even bluegray patina covers each side.

#### SEATED DOLLARS

3849 1840 AU53 PCGS. A richly toned and luminous Seated dollar from early in the series. Peach and blue-gray patina covers most of each side, and dots of dark patina are present along the lower right obverse. Minor wear on the high points accounts for the grade. Population: 20 in 53, 73 finer (3/11).(#6926)

#### Well-Struck Mint State 1842 Seated Dollar

3850 1842 MS61 NGC. This early-series rarity was a skimpy production, like most of its peers, of 184,000 circulation strikes. This silverwhite piece has a few darker areas around the obverse stars and somewhat chromelike surfaces that are hairlined in the fields. The strike is good overall, with sufficient detail on Liberty's head and sandal and most of the obverse stars, while still short of complete. Each side reveals scattered contact marks, the reverse more so. Census: 17 in 61, 49 finer (3/11). (#6928)

1843 Seated Dollar, MS62 Ex: Richmond Collection

3851 1843 MS62 NGC. Ex: Richmond. The 1843 Seated Liberty dollar enjoyed a substantial mintage of 165,100 pieces, but examples in MS62 condition are quite rare today. The present coin claims an illustrious pedigree to the famous Richmond Collection (David Lawrence Rare Coin Auctions, 11/2004), lot 1464, where it was described as:

"Bright silver in color with an arc of gold around the periphery of the obverse and reverse. Well struck for the date, with all the stars showing their radial lines and the eagle's neck well defined too. An attractive mint state example for the date or type collector."

We can add little to this apt description, as the coin remains unchanged and equally attractive today. Census: 13 in 62, 15 finer (2/11). (#6929)

- 3852 1844 AU55 NGC. Light golden tints visit the flashy surfaces of this lightly worn Choice AU coin. Scattered wispy abrasions appear in the fields, as do a few digs such as those above the eagle. Census: 21 in 55, 56 finer (3/11).(#6930)
- 3853 1845 XF40 PCGS. Blue-gray, burnt orange, and reddish-brown patina covers most of each side, the latter two colors mainly at the margins. Luminous, though a rim bump is visible just to the right of 12 o'clock on the obverse. (#6931)
- 3854 1847 AU55 NGC. A well detailed specimen, with just a touch of high-point rub on the devices, this coin displays light gold, lavender, and silver-gray patina. Traces of mint luster cling to protected areas. Census: 53 in 55, 154 finer (3/11).(#6934)
- 3855 1847 MS61 NGC. Luster shimmers across the lightly abraded fields and devices of this Uncirculated No Motto silver dollar. Golden-brown and navy-blue patina is principally confined to the margins.(#6934)
- 3856 1849 XF45 PCGS. CAC. Traces of luster are still visible on each side of this lightly worn Seated dollar. The surfaces have a combination of deep gray and gold toning with lighter gray devices. (#6936)

#### Pink-Champagne 1853 Seated Dollar, AU58+

3857 1853 AU58+ NGC. Quite a few small abrasions pepper each side and the luster is a bit subdued, but this piece nonetheless is more attractive than that technical description suggests. The luster is "still there" even if muted, and attractive pink-champagne patina graces both sides. An appealing coin that would fit well in a Mint State set. (#6941)

#### Select 1859-O Seated Liberty Dollar

- 3858 1859-O MS63 NGC. The 1859-O Seated Liberty dollar claims a substantial mintage of 360,000 pieces, and the issue is reasonably available in lower Mint State grades today. Because most examples seen are heavily bagmarked, the 1859-O is very scarce in MS63 condition. The present coin is a well struck Select specimen, with satiny mint luster under shades of gold and blue toning. Census: 33 in 63, 17 finer (2/11). (#6947)
- 3859 1860 AU55 NGC. A lightly worn but attractive example of this pre-Civil War Seated dollar issue. Blue-violet and golden-tan overtones mingle on still-lustrous surfaces that show a handful of long, shallow abrasions.(#6949)
- 3860 1860-O MS61 PCGS. Light gold-to-orange toning clings to the rims, while the interiors are bright silver. This late antebellum Seated dollar shows numerous field abrasions and device marks which combine to account for the grade. (#6950)

## 1860-O Seated Dollar, MS62 Last O-Mint of the Series

3861 1860-O MS62 PCGS. CAC. The last New Orleans silver dollar issue struck before the start of the Civil War was the 1860-O. Though more than half a million pieces were produced, many of them circulated, and the date is conditionally scarce in Select and better. Even MS62 coins such as the present piece are elusive. Luster is strong with generally silver interiors and scattered champagne-gold elements at the margins. The obverse has a long graze in the right field, while the reverse shows a number of grade-defining choppy abrasions. (#6950)

#### 1865 Seated Dollar, MS62 Final Civil War Date

3862 1865 MS62 NGC. The 1865 Seated Liberty dollar was struck in a limited mintage of 46,500 pieces during the last year of the Civil War. Few examples were released into circulation in this country, and most of the mintage was exported to Central America. The present coin is a sharply detailed MS62 specimen, with satiny mint luster and a few touches of golden toning. Census: 5 in 62, 14 finer (2/11). (#6955)

# 1872 Seated Dollar, MS64 Exceptional Mint Luster, Nice for Type

3863 1872 MS64 PCGS. This High Date variant is most likely the most frequently seen of several die pairings used to strike 1872 dollars. It is characterized by the date placed high in the exergue, the 1 and 8 clear of each other, and the date more heavily impressed than on the so-called Normal Date. The mint luster on this piece is extraordinary with a bright, frosted finish that has occasional streaks of light russet toning on each side. The strike is well but not fully brought up, and there are a few small, shallow abrasions on each side. Population: 28 in 64, 3 finer (3/11). (#6968)

#### PROOF SEATED DOLLARS

# Select Proof 1861 Dollar Low Distribution, High Attrition Rate

3864 1861 PR63 PCGS. The 1861 proof Seated Liberty dollar has a reported mintage of 1,000 pieces, but experts agree the distribution figure was much smaller, probably around 350 coins. In today's market, the 1861 is the most elusive proof dollar of the early 1860s. The present coin displays razor-sharp details on all devices, with brightly reflective fields and wisps of gold toning. (#7004)

3865 1864 — Obverse Scratched — NGC Details. Proof. The imperfection in the right obverse field might be called a thin scratch, or perhaps a heavy hairline. Both sides have mirrored fields, the obverse with iridescent toning and the reverse untoned. (#7007)

#### Near-Gem Cameo Proof 1864 Seated Dollar

3866 1864 PR64 Cameo PCGS. This mid-Civil War proof Seated dollar was issued to the extent of 470 pieces, accompanied by a meager allotment of 30,700 business strikes. Today the average proof survivor (and they are few) grades PR63-PR64, but this Cameo piece will be difficult to improve upon, technically or aesthetically. Deep field-device contrast is evident on silver-white surfaces that show minor field hairlines, likely limiting an even finer grade. Population: 10 in 64 Cameo, 2 finer (3/11). (#87007)

3867 1868 PR55 PCGS. A proof example that somehow entered circulation for a short time. The mostly brilliant surfaces exhibit just a smidgen of patina about the borders. A couple of larger marks are seen near the top of the reverse. Boldly detailed, and one of only 600 pieces recorded as struck.(#7016)

3868 1868 — Artificial Toning — NGC Details. Proof. Deep oceanblue and lilac patina envelops this intricately struck and hairlinefree specimen. A trace of friction is noted on the cheek and knees. Scarce, since just 600 proofs were issued.

### Colorful Proof 1869 Seated Dollar First-Generation Holder

3869 1869 PR61 PCGS. Sun-gold, powder-blue, and aquamarine shades embrace this lightly hairlined but nonetheless attractive specimen. The strike is good, although a loupe shows trivial inexactness on the eagle's left (facing) leg. Scarce due to a proof mintage of only 600 pieces. Encapsulated in a first-generation holder. (#7017)

3870 1871 PR53 PCGS. The high face value may have encouraged an heir to spend the specimen, perhaps during the Panic of 1893. Brilliant and typically abraded with considerable flash in the fields. Encased in a green label holder.(#7019)

### 1873 Seated Dollar, PR64 Transitional Coinage Year

3871 1873 PR64 PCGS. CAC. This transitional year saw the end of the Seated Liberty dollars and the start of the Trade dollars. A pleasing Choice proof, this Seated specimen exhibits considerable white surface with sharp details and mottled iridescence on each side. Population: 35 in 64, 15 finer (3/11). (#7021)

## TRADE DOLLARS

3872 1874 MS62 PCGS. A luminous and richly toned representative of this second-year Trade dollar issue. The peach-gray and greenish hues over each side lend the coin a dusky appearance. Population: 17 in 62, 53 finer (3/11).(#7034)

## 1874-CC Chop Marked Trade Dollar, MS62 Rarely Found in Uncirculated Grades

3873 1874-CC Chop Mark MS62 PCGS. Highly lustrous and unworn with light pink and tan toning, as well as the usual loss of design detail opposite chops. Four prominent chops are visible, two on each side; one each below Liberty's outstretched hand and at her shins, and marks on the eagle's right (facing) wing and below the beak. A couple of larger abrasions are also noted and Liberty's right (facing) arm shows some planchet irregularity. Still, it is very unusual to find a chop marked Trade dollar in Uncirculated. (#87035)

### Select 1874-CC Trade Dollar Elusive Issue in High Grade

3874 1874-CC MS63 PCGS. Trade dollars were unpopular with 19th century collectors, who also ignored most mintmarked issues, and the majority of the 1.3 million Trade dollars produced at Carson City in 1874 were exported for use in the China trade. As a result, the 1874-CC is one of the rarest dates of the series in high grade. The present coin is a well-struck Select specimen, with bright satiny mint luster and hints of light golden toning. Population: 37 in 63, 22 finer (3/11). (#7035)

- 3875 1875-S Chop Mark MS63 PCGS. Large S. Type One Reverse. A large chopmark is deeply entered over the eagle's body, and causes a granular texture opposite near Liberty's legs. Otherwise, a lustrous and minimally abraded example with moderate autumn-gold and steel-gray toning. (#87039)
- 3876 1875-S MS61 NGC. Type Two Reverse. Large S. A sharply struck and lustrous representative with light chestnut and pearl-gray toning. The fields display diverse minor abrasions consistent with the grade.(#7039)
- 3877 1875-S MS63+ PCGS. Type One Reverse. Large S. Light caramelgold patina graces this lustrous and faintly toned Trade dollar. Marks are inconsequential for the designated grade, and the strike is good despite blending on the hair above the ear and on the eagle's right (facing) leg.(#7039)
- 3878 1875-S MS63 NGC. Type One Reverse. Large S. Flashy-frosty luster filters through a layer of gold-infused patina. Well-defined with few abrasions aside from a small disturbance to the left of the eagle's neck.(#7039)

#### 1875-S Trade Dollar, MS64

3879 1875-S MS64 PCGS. CAC. Type One Reverse. Large S. This well struck Choice specimen displays a touch of softness on the lower left stars and central devices. The surfaces exhibit attractive satiny mint luster and pleasing hints of gold toning on both sides. The reverse features interesting die cracks through the top of TRADE and MERICA. Only 34 coins have been certified in higher numeric grades at PCGS (2/11). (#7039)

#### MS64+ 1875-S Trade Dollar Lustrous, Clean Surfaces

3880 1875-S MS64+ PCGS. CAC. Type One Reverse. Large S. Light almond-gold toning drapes this lustrous and minimally abraded silver type coin. The occasional faint obverse field mark is all that prevents classification as a full Gem. A good strike overall, despite an incomplete impression on Liberty's head and the eagle's right (facing) claw. (#7039)

## Lustrous 1875-S/CC Trade Dollar, MS61 Early Carson City Undermintmark

- 3881 1875-S/CC MS61 NGC. FS-501. The two-letter Carson City mintmark, unique as such in U.S. coinage, is almost inevitably prominent whenever it appears as an *undermintmark*. The 1900-O/CC dollars come to mind, as does the 1875-S/CC Trade dollar seen here. Blue-violet, peach, and gold toning is splashed along the margins, while the centers have pale champagne color. Scattered abrasions and a few digs account for the grade. (#7040)
- 3882 Uncertified Sextet of Trade Dollar "Box Dollars." Six examples of the mysterious "box dollars" fashioned from Trade dollars of the United States. Includes an 1876, opened, well-machined interior; an 1877-CC, opened, name "Lloyd Folvik" on inside; three 1877-S, none opened, one with suspension loop; and an 1878-S, not opened, suspension loop. Due to the unique nature of the pieces, personal examination is recommended. Sold as is, no return lot. From The Dr. Donald M. Gilner Collection. (Total: 6 pieces)
- 3883 1876 MS60 NGC. Type One Obverse and Reverse. An untoned and prooflike representative with faintly hairlined and lightly bagmarked fields. Both sides feature a wire rim, widest at 4:30 on the reverse.(#7041)
- 3884 1876 MS62 PCGS. Type One Obverse, Type Two Reverse. Pale gold and blue aspects invigorate the light layer of patina across appreciably mirrored fields. Well struck but not with the level of detail shown by a true proof. Housed in a green label holder. (#7041)

# 1876 Trade Dollar, MS65 An Upper-End Example, Semiprooflike Reverse

- 1876 MS65 PCGS. CAC. Type One Obverse, Type Two Reverse, the usual subtype combination. Since the Trade dollar was intended for international commerce, particularly in China, it is logical that by 1876, most production for the denomination took place in San Francisco, close to the West Coast ports. Inland Carson City struck only slightly over half a million pieces that year, while the 455,000 coins pressed by the East Coast Philadelphia Mint brought up the rear. From this last, smallest issue hails the present Gem. Both sides are brilliant, and the reverse displays noticeable mirroring in the fields. This sharply struck example has strong eye appeal, and its upper-end status is verified by the CAC endorsement. Population: 20 in 65, 9 finer (2/11). (#7041)
- 3886 1876-S Chop Mark MS62 PCGS. CAC. Type One Obverse and Reverse. Large S. A single deeply entered chopmark on the obverse field near the knee flattens the opposite area near the U in UNITED. No other abrasions are of any notice. Golden-brown and emerald-green cling to peripheral design elements of this lustrous and suitably struck Trade dollar.(#87043)

- 3887 1876-S MS63 PCGS. Type One Obverse and Reverse. Large S. Tobacco-brown and gunmetal-gray embrace this satiny and carefully preserved Centennial-year San Francisco type coin. Liberty's waist displays moderate parallel mint-made roller marks. (#7043)
- 3888 1877-S MS62 PCGS. FS-802. Large S. The reverse legends are die doubled. A bright and beautiful MS62 representative of this highest-mintage Trade dollar issue. The well struck obverse, soft on only a couple of stars, has near-brilliant centers and dots of gold and orange peripheral toning which become stronger on the reverse.(#7046)
- 3889 1877-S MS63 PCGS. Breen-5814. Minute S, which he reported as "very rare." A moderately prooflike and delicately toned Trade dollar with frosty devices and lightly abraded fields. The strike is decidedly above average, since only star 6 lacks full radials, and the eagle's ankles demonstrate exquisite detail. A popular William Barber type coin, scarce in Select Mint State.(#7046)
- 3890 1878-CC Rim Damage NGC Details. XF. A significant gouge is noted on the rim above Liberty's head. Aside from this fault, the present piece is an attractive XF example with luminous gold-gray fields that show numerous wispy abrasions but few serious marks.
- 3891 1878-S Chop Mark AU50 PCGS. A single deeply impressed chop near the eagle's right (facing) claw flattens the opposite portion of Liberty's chest. The semiprooflike surfaces display faint hairlines but retain substantial luster.(#87048)

#### Choice 1878-S Trade Dollar

3892 1878-S MS64 PCGS. CAC. The 1878-S Trade dollar is an available issue in lower Mint State grades, but examples in Choice condition are scarce. The present coin is a well struck Choice specimen, with mottled gold and bluish-gray patina. The surfaces retain much original mint luster, but the effect is slightly subdued by the toning. (#7048)

#### PROOF TRADE DOLLARS

1873 Trade Dollar, PR62 First Year of Denomination

3893 1873 PR62 PCGS. Type One Obverse, Type One Reverse. Only 865 proof Trade dollars were struck in 1873, the first year of the series. The Trade dollar was unpopular with numismatists for most of the 19th century, and many proofs acquired as part of sets were spent for face value, leading to a low survival rate. The present coin is brightly mirrored, with strong hints of golden toning on both sides. The obverse is sharply detailed, but some softness shows on the eagle's leg on the reverse. Housed in a green label holder. Population: 47 in 62, 80 finer (2/11). (#7053)

3894 1874 PR62 PCGS. Both sides of this attractive proof are toned in blue, violet, green, and amber with grayish devices that display bold details. This example is destined for a Registry set of Trade dollars or type coins, and should prove affordable to most collectors. (#7054)

# Choice Proof 1875 Trade Dollar Frosty Motifs, Rich Golden Toning

3895 1875 PR64 NGC. Type Two Reverse. Frost is substantial throughout the devices and legends, but no Cameo designation is awarded, due either to the age of the holder or the deep butter-gold and ocean-blue toning that dominates both sides. A well preserved near-Gem of this elusive issue, limited in availability by a mintage of just 700 proofs. (#7055)

#### 1876 Trade Dollar, Choice Proof Vivid Toning

3896 1876 PR64 PCGS. Type One Obverse, Type Two Reverse. The 1876 Trade dollar enjoyed a generous mintage of 1,150 pieces, but high-quality examples are surprisingly difficult to locate. The present coin is a sharply detailed Choice specimen, with spectacular green, golden-brown, and violet toning on the obverse. The reverse is less vivid, but the lavender and green patina is still attractive. Reflective fields are evident beneath the toning on both sides. Population: 52 in 64, 19 finer (3/11). (#7056)

## 1876 Trade Dollar, PR64 Cameo Popular Centennial Issue

3897 1876 PR64 Cameo NGC. Type One Obverse, Type Two Reverse. The 1876 proof Trade dollar enjoyed a generous mintage of 1,150 pieces, anticipating increased public demand as the nation celebrated its Centennial year. Many specimens were purchased casually and handled in a non-numismatic fashion, resulting in a small supply of high-quality coins today. The present coin is an attractive Choice example, with sharply detailed, frosty devices that contrast boldly with the reflective fields. The surfaces reveal a few minor hairlines and wisps of gold toning. Census: 16 in 64 Cameo, 14 finer (2/11). (#87056)

## Centennial-Year 1876 Trade Dollar Bright PR64 Cameo

3898 1876 PR64 Cameo NGC. Type One Obverse, Type Two Reverse. The surfaces are mostly brilliant, with just a faint hint of golden-champagne patina on this piece when it is rotated under the light. The deeply mirrored fields provide sharp contrast with the frosted devices and lettering. Some light field hairlines, noted with a glass, may have prevented an even higher grade. A crisp example of this Centennial near-Gem Trade dollar that is ideal for a high-grade type set. NGC has graded 16 coins in PR64, with 16 finer, while the PCGS population is nine coins in PR64, with eight finer (3/11). (#87056)

3899 1877 — Improperly Cleaned — NCS. Proof. Exactingly detailed in the way only proof Trade dollars are, though the obverse fields clearly have impaired luster from cleaning. The partly blue-toned reverse is closer to the original reflectivity.(#7057)

## Select Proof 1877 Trade Dollar Original Peripheral Patina

3900 1877 PR63 PCGS. CAC. The butter-gold toning deepens moderately near the rims, which also exhibit ocean-blue and ruby-red. This fully struck Select specimen has a few tiny contact marks on the obverse field, but the eye appeal is superior for the PR63 level. A stingy 510 proofs were coined. (#7057)

3901 1879 — Harshly Cleaned — NCS. Impaired Proof. The fields are coarsely hairlined, but the strike is intricate, and both sides are nearly untoned. A scarce proof-only date.(#7059)

## Gem Proof Cameo 1879 Trade Dollar First Proof-Only Issue

- 3902 1879 PR65 Cameo NGC. Type Two Obverse, Type Two Reverse. The 1879 Trade dollar was only produced in proof format, and demand from speculators resulted in a large proof mintage of 1,541 pieces. The present coin is a delightful Gem, with razor-sharp details on the frosty design elements and brightly mirrored fields. Attractive light golden toning enlivens the surfaces of both sides, and intense field/device contrast adds to the considerable eye appeal. Census: 21 in 65 Cameo, 35 finer (2/11). (#87059)
- 3903 1880 Improperly Cleaned NGC Details. Proof, XF. Clear rub across the high points with hairlines and contact marks through the fields, the latter largest and most obvious at the upper reverse. Nonetheless, as one of fewer than 2,000 1880 Trade dollars in existence, this specimen should enjoy considerable demand.
- 3904 1880 Artificial Toning NGC Details. Proof. Iridescent iodine-red, peach, and electric-blue encompass the glassy fields and boldly struck motifs. The patina may be too good to be true, but the underlying surfaces are free from hairlines or planchet issues.

## 1880 Trade Dollar, PR63 Deeply Toned Yet Reflective

3905 1880 PR63 NGC. The 1880 is always popular as a proof-only issue, these late-date proofs representing an interesting collectible subset among Trade dollars. This is a deeply toned example whose mirrored fields shine brightly on each side. The striking details are full in all areas, as one would expect from a proof. (#7060)

## PR64 1880 Trade Dollar Popular Proof-Only Date

3906 1880 PR64 NGC. Type Two Obverse, Type Two Reverse. This delightful Premium Gem Trade dollar displays razor-sharp design elements, set against brightly reflective brilliant fields. A few minor hairlines in the fields do little to distract from the ample visual appeal. The 1880 Trade dollar was only struck in proof format, with 1,987 pieces minted. (#7060)

# 1883 Trade Dollar, PR63 Elusive Proof-Only Issue

3907 1883 PR63 PCGS. CAC. Type Two Obverse, Type Two Reverse. Only 979 Trade dollars were minted in 1883, all in proof format. The date also has a low survival rate, and the 1883 is more difficult to locate than other Trade dollar issues of the time period. The present coin is an attractive Select example, with sharply detailed design elements and reflective fields. The surfaces are patinated in vivid shades of electric-blue and golden-brown. (#7063)

#### **COLONIALS**

#### VF Details Oak Tree Sixpence, Noe-21

3908 1652 Oak Tree Sixpence —Damaged — NGC Details. VF. Crosby 1c-D, Noe-21, W-400, R.5. 31.8gn. IN on obverse. This glossy and wavy example exhibits rich yellow-green and plummauve patina. The reverse legends are generally sharp, while the oak tree is lightly defined, as are some of the obverse letters. Listed on page 36 of the 2011 *Guide Book*.

## Seldom Seen Noe-20 Oak Tree Sixpence AU Sharpness

3909 1652 Oak Tree Sixpence —Obverse Scratched — NGC Details. AU. Crosby 1a-D, Noe-20, W-400, R.6. 34.2gn. IN on Obverse. Golden-brown and slate-gray toning blanket this evenly struck and richly detailed sixpence. All legends are fully intact. Faint pinscratches are scattered, and are most prominent on the obverse. Listed on page 36 of the 2011 *Guide Book*.

# Choice VF Oak Tree Shilling Noe-14, Famous 'Spiny Tree'

3910 1652 Oak Tree Shilling VF35 NGC. Crosby 7-B, Noe-14, W-530, R.4. 70.7gn. The Spiny Tree, which merits a separate listing on page 37 of the 2011 *Guide Book*. Tan-gold toning outlines design elements, while the open fields are pearl-gray. The unblemished surfaces have clear, even definition save for slightly greater wear at 7 o'clock on the obverse and 5 o'clock on the reverse. The flan is curved due to its rocker press manufacture. (#20)

### Impressive XF 1652 Oak Tree Shilling Rare Late Die State Noe-6

3911 1652 Oak Tree Shilling XF40 NGC. Crosby 1a-D, Noe-6, W-480, R.6. 69.4gn. IN at Bottom. Steel-gray, caramel-gold, and lime-green toning embraces this unmarked example. Wavy due to its rocker press manufacture. Late dies for Noe-6, since mint-made parallel lines obscure the lower obverse. The reverse definition is exceptionally sharp. Listed on page 37 of the 2011 *Guide Book*. (#20)

### XF Sharpness Oak Tree Shilling Rare Noe-13 Variety

3912 1652 Oak Tree Shilling —Obverse Graffiti— NGC Details. XF. Crosby 8-F, Noe-13, R.6. 68.7gn. IN at Bottom. A few thin test marks at 4:30 on the obverse account for the NGC notation. Well struck with essentially full legends and a mint-made straight clip at 3 o'clock. Toned gunmetal-gray with hints of olive-green. A few vertical and parallel planchet striations extend beneath XII. Listed on page 37 of the 2011 *Guide Book*.

## Bold XF Small Planchet Noe-29 1652 Pine Tree Shilling

3913 1652 Pine Tree Shilling, Small Planchet XF40 PCGS. Crosby 14-R, Noe-29, W-930, R.3. 69.4gn. Predominantly golden-gray in sheen, but there are blushes of tan iridescence here and there. The otherwise appreciably bold detail wanes a little at the lower borders. In addition, we note that the obverse is better centered than the reverse with the tops of a few peripheral letters at the upper border of the latter side off the flan. Smooth save for a single small roundish mark left of the third left branch. Listed on page 37 of the 2011 *Guide Book*.

Ex: Baltimore Signature (Heritage, 7/2003), lot 5005. (#24)

# (1670-1675) St. Patrick Farthing, XF45 W-11500

3914 (1670-75) St. Patrick Farthing XF45 NGC. W-11500. The St. Patrick farthing was probably struck in Ireland circa 1670-1675. A quantity of these coins was imported to New Jersey by Mark Newby, and the West Jersey Legislature passed a bill making them legal tender (as halfpence) for small transactions in 1682. The present coin is a well detailed piece with glossy medium brown surfaces, except for some light golden color around the crown on the obverse. This interesting color is explained by a brass splasher implanted in the copper planchet to produce this effect. Listed on page 39 of the 2011 *Guide Book*. Census: 2 in 45, 3 finer (2/11). (#42)

3915 1723 Rosa Americana Penny AU53 PCGS. Martin 2-E, W-1278, R.2. Small or Narrow 3. Satin luster shimmers across the devices of this dark brown representative. Well struck, unabraded, and minimally circulated with moderately granular surfaces. Listed on page 41 of the 2011 *Guide Book*.(#125)

#### 1723 Rosa Americana Twopence MS62 Brown, Martin 3-D

3916 1723 Rosa Americana Twopence MS62 Brown PCGS. CAC. M. 3-D, W-1334, R.2. This golden-brown twopence exhibits a pleasing strike and has mildly prooflike fields. Smooth save for a single pinscratch on each side of the obverse field. Struck a few degrees off center toward 7 o'clock. Listed on page 41 of the 2011 *Guide Book*. Population: 10 in 62 Brown, 7 finer (3/11). (#128)

- 3917 1722 Hibernia Halfpenny, Type Two, Harp Right AU58 PCGS. CAC. Martin 5.2-C.2, W-12810, R.5. A satiny chocolate-brown near-Mint example of this Irish import. The centers are lightly impressed but there is little actual wear. The reverse exhibits prominent die rust but there are no visible marks. Listed on page 42 of the 2011 Guide Book. Population: 3 in 58, 3 finer (3/11). (#170)
- 3918 1723 Hibernia Farthing, DEI GRATIA MS64 Brown PCGS. Martin 3.18-Bc.5, W-12350, R.4. A boldly struck near-Gem with chocolate-brown centers and traces of the initial fire-red near the date. Unabraded save for a slender mark on the base of the neck of King George. Listed on page 42 of the 2011 Guide Book. Population: 20 in 64 Brown, 1 finer (3/11).(#176)
- 3919 1723 Hibernia Halfpenny MS63 Brown PCGS. CAC. Martin 4.34-Gb.3, W-13120, R.2. This well struck and prooflike representative is medium brown and essentially unabraded. Distributed minute strike-throughs are all as coined. Listed on page 43 of the 2011 *Guide Book*. (#180)

#### 1766 William Pitt Halfpenny Choice XF, W-8350

- 3920 1766 Pitt Halfpenny XF45 NGC. Betts-519, W-8350, R.3. A walnut-brown example of this popular medal. William Pitt successfully argued for the repeal of the hated Stamp Act, which made him the hero of merchants on both sides of the Atlantic. Evenly struck and attractive with minor faded field marks and an occasional hint of granularity on the reverse. Listed on page 48 of the 2011 *Guide Book*. (#236)
- 3921 1773 Virginia Halfpenny, Period MS63+ Red and Brown PCGS. N. 25-M, W-1580, R.2. Dusky pumpkin-orange dominates, although the margins display sea-green, powder-blue, and violet-red. Crisply struck and satiny with exemplary preservation. Listed on page 43 of the 2011 *Guide Book*.(#241)

- 3922 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 26-Y, W-1680, R.2. Orange-red dominates design recesses, while the centers and open fields are toned medium brown. This semi-prooflike near-Gem is void of contact, and provides exceptional eye appeal for an 18th century copper coin. Listed on page 43 of the 2011 Guide Book. (#241)
- 3923 1773 Virginia Halfpenny, Period MS63 Red PCGS. CAC. N. 26-Y, W-1680, R.2. Much luster clings to mint-red fields with brown high points. The surfaces show some carbon spots, largely confined to the obverse. The Newman 26-Y is an available variety to represent the 1773 Virginia halfpennies. Listed on page 43 of the 2011 Guide Book. (#242)
- 3924 1787 Connecticut Copper, ETLIR XF40 PCGS. CAC. M. 31.1-gg.1, W-3205, R.3. An unabraded mahogany-brown example with pleasing surfaces overall. Occasional shallow mint-made laminations have toned ebony-brown. Struck several degrees off center toward 12 o'clock, with a portion of the date off the flan. Listed on page 60 of the 2011 *Guide Book*. Population: 4 in 40, 9 finer (3/11).(#391)
- 3925 1786 New Jersey Copper, Wide Shield XF40 PCGS. M. 20-N, W-4905, R.4. A lovely chocolate-brown example of the conditionally scarce Wide Shield subtype. Unabraded and nicely defined with occasional minor mint-made planchet striations. A late obverse die state with advanced swelling on the field near the bust tip of the horse. Listed on page 66 of the 2011 Guide Book. Population: 7 in 40, 9 finer (3/11).(#498)
- 3926 1787 New Jersey Copper, Large Planchet, Plain Shield XF45 PCGS. Maris 62-q, W-5350, R.3. Golden-brown, olive, and rose shades embrace this attractive New Jersey copper. The centers are lightly brought up, but peripheral elements are well defined. The thin line through the neck of the horse was present on the flan prior to the strike. An early die state without the usual prominent die break on the northwest corner of the shield. Listed on page 66 of the 2011 Guide Book.(#509)
- 3927 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU58+ PCGS. CAC. Crosby 3-B, W-1895, R.2. A lovely chocolate-brown example of this important post-colonial type. Luster glimmers from design elements, and there are no visible marks. A late die state with extensive crumbling on the obverse die. Struck from widely rotated dies. Listed on page 52 of the 2011 *Guide Book.* (#813)
- 3928 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF30 PCGS. CAC. N. 16-N, W-6925, R.3. This walnutbrown Fugio cent is free from relevant marks, and has good definition aside from occasional softness of strike at the centers. A 3% curved clip is at 1 o'clock, and moderate mint-made pitting is near the 8 in the date. Listed on page 83 of the 2011 *Guide Book*. (#883)
- 3929 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays Clip VF35 ANACS. N. 11-X, W-6790, R.4. A small curved clip (as made) is noted at 3:30. Such mint errors occur when the planchet strip has an overlapping punch. This olive-brown example is unabraded but shows bold clash marks on the obverse field. The strike is uneven, sharp on the sun but the lower obverse legend is lightly brought up. Listed on page 83 of the 2011 *Guide Book.* (#883)
- 3930 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS60 Brown PCGS. N. 8-X, W-6750, R.3. A satiny medium brown example with a sharp strike and unmarked surfaces. A late die state with a large obverse die break at 6 o'clock. Struck a few degrees off center toward 3 o'clock, although all legends are intact. Mint-made flan roughness is seen on the O in ONE and a small portion of the sundial. Listed on page 83 of the 2011 *Guide Book*. (#883)

# Beautiful MS62 Brown 1787 Fugio Cent STATES UNITED, Pointed Rays, N. 13-X

3931 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown PCGS. CAC. N. 13-X, W-6855, R.2. A well struck and coruscating chocolate-brown Fugio type coin. Unabraded and free from any planchet issues. A 1% mint clip at 12:30 on the reverse barely merits mention. The rings are boldly clashed onto the obverse field. Likely from the famous Bank of New York hoard. Listed on page 83 of the 2011 Guide Book. (#883)

## STATES UNITED 1787 Fugio Cent Pointed Rays, N. 13-X, MS62 Brown

3932 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown PCGS. N. 13-X, W-6855, R.2. A Bank of New York variety with a vertical die crack at 6 o'clock on the reverse. A well struck and unabraded tan-brown Fugio with a retained lamination on the A in ARE and a few darkly toned flan flaws on the reverse. Struck from boldly clashed dies. Listed on page 83 of the 2011 Guide Book. (#883)

## Desirable MS63 Brown Pointed Rays 1787 Fugio Cent, N. 8-X

- 3933 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Brown PCGS. CAC. N. 8-X, W-6750, R.3. A satiny chocolate-brown Fugio copper with a pleasing, undisturbed appearance. Flan imperfections are trivial, particularly on the obverse. Late dies with a break over the center of the obverse motto. Struck several degrees off center toward 2 o'clock, but all legends are intact. Listed on page 83 of the 2011 *Guide Book.* (#883)
- 3934 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars VF25 PCGS. CAC. Newman 15-Y, W-6915, R.2. The eight-pointed star on the label attributes this available STATES UNITED variety, medium brown with some minor planchet laminations at the lower obverse and a larger one on the lower reverse. Listed on page 84 of the 2011 *Guide Book*.(#898)

- 3935 1787 Fugio Cent, Club Rays, Rounded Ends VF20 PCGS. N. 4-E, W-6685, R.3. A golden-brown Club Rays Fugio copper. The surfaces are bright, and unabraded save for a light pinscratch or two on the lower rings. Minor planchet flaws are as made and customary for the issue. Listed on page 84 of the 2011 *Guide Book.* (#904)
- 3936 1787 Fugio Cent, Club Rays, Rounded Ends XF40 PCGS. N. 3-D, W-6680, R.3. A moderately circulated and mark-free medium brown example of this scarcer Fugio type. Mint-made flan striations are noted on the right-side rings but are as issued. Listed on page 84 of the 2011 *Guide Book*. Population: 11 in 40, 16 finer (3/11).(#904)

#### AU Club Rays 1787 Fugio Cent Rounded Ends, Newman 4-E

- 3937 1787 Fugio Cent, Club Rays, Rounded Ends AU50 NGC. N. 4-E, W-6685, R.3. A dark brown example of this conditionally challenging Fugio type. Well defined, void of marks, and without planchet detractions aside from minor flan granularity on the reverse rings between 10 and 11 o'clock. Listed on page 84 of the 2011 Guide Book. (#904)
- 3938 1783 Georgivs Triumpho Token AU53 PCGS. Baker-7, W-10100, R.3. An uncommonly early die state without the usual vertical die break on the upper central reverse. A medium brown representative with substantial remaining mint gloss. No marks merit individual mention. Listed on page 75 of the 2011 Guide Book. Population: 9 in 53, 19 finer (3/11).(#664)
- 3939 1793 Washington Ship Halfpenny, Copper, Lettered Edge AU58 PCGS. Baker-18, W-10855, R.4. This lustrous medium brown Ship halfpenny is essentially Mint State, but myriad tiny mintmade strike-throughs affect both centers. The reverse field has minor marks. Coined from a sunken reverse die, as usual for the issue. Listed on page 79 of the 2011 *Guide Book.*(#734)

#### HALF CENTS

3940 1794 Genuine PCGS. C-2a, B-2b, High R.2. Manley Die State 1.0. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned and scratched. A well-detailed half cent, evenly struck save for the second S in STATES. The reverse displays a pair of faint, minor pinscratches, but the deep brown surfaces are milky appearance from cleaning. MRB VG10.

### 1794 C-4a, B-6b Half Cent, VF30 Clashed Dies

- 3941 1794 VF30 NGC. C-4a, B-6b, R.3. Both sides show light to medium strength clash marks. The obverse border is weak from 11 o'clock to 3 o'clock with the balance well detailed, as is the reverse border. This mottle tan and steel-brown piece exhibits light roughness and verdigris while maintaining an attractive overall appearance. MRB Fine 15. (#1003)
- 3942 1794 Corroded NCS Details. XF. C-4a, B-6b, R.3. We assume Small Letters on the edge, although the possibility exists that this piece could be the extremely rare Large Letters subvariety. Both sides have considerable sharpness with heavy corrosion on the recolored light brown and steel surfaces. MRB Fine 12.(#1003)
- 3943 1800 AU55 NGC. C-1, B-1, R.1. Sole dies for the year. Prominent rose-violet overtones grace glossy surfaces that show only slight evidence of wear. Small abrasions near the rims contribute to the grade. MRB XF40.(#1051)

#### 1800 C-1, B-1 Half Cent, MS63 Brown Full Cartwheel Luster

3944 1800 MS63 Brown NGC. C-1, B-1, R.1. The only 1800-dated die variety. The left foot of the T in LIBERTY is missing, the hair curl near the 1 in the date is open at its base, and a die break nearly joins the E in UNITED to the wreath. A faint die crack connects the tops of NITE in UNITED. A nicely struck, lightly abraded, and satiny piece with luminous chocolate-brown and deep-green colors. Census: 15 in 63 Brown, 6 finer (3/11). MRB AU55. (#1051)

#### 1803 C-3, B-3 Half Cent, AU55 Intermediate Die State

- 3945 1803 AU55 PCGS. C-3, B-3, R.1. The small die bulge at the 18 identifies this variety in its later die states. The latest die state pieces, struck long after this piece, have the bulge entirely broken, obliterating the two digits. This frosty piece has considerable cartwheel luster with dark chocolate and steel surfaces. Somewhat weak details are noted at the lower obverse and at the top of the wreath. Scattered surface marks are evident but pose no distraction. MRB XF45. (#1060)
- 3946 1804 Spiked Chin AU50 PCGS. C-8, B-7, R.1. Four reverse dies were combined with the single Spiked Chin obverse, providing specialists with a challenge. The C-8 die marriage is the most common of the four, a perfect choice for *Guide Book* collectors. The obverse has intermingled light brown and steel and the reverse is mostly olive-brown with splashes of tan. MRB XF40. (#1075)
- 3947 1825 MS62 Brown NGC. C-2, B-2, R.1. More accessible of two varieties for the year, date shifted to the right versus the C-1 obverse. Glossy rosewood surfaces with a soft strike on a few of the obverse stars but better definition elsewhere. MRB AU50. From The Dustinn (Dusty) Lee Gibson Collection. (#1141)
- 3948 1828 12 Stars MS60 Brown NGC. C-2, B-3, R.1. Glossy light brown surfaces host considerable luster with splashes of chestnut and steel toning on both sides. Hints of gold remain from faded mint red. A pleasing example of the NGC undesignated 12 Stars variety. MRB AU55.

  From The Dustinn (Dusty) Lee Gibson Collection. (#1150)
- 3949 1835 MS63 Red PCGS. C-1, B-1, R.1. Manley Die State 2.0. This precisely struck half cent is bathed in luster and displays ample fire-red on each side. The centers exhibit lilac and apple-green shades. Free from contact, and carbon is also minor for the third party grade. MRB MS63.(#1170)
- 3950 1849 Large Date MS63 Brown NGC. C-1, B-4, R.2. Only one die variety is known for the 1849 business strike half cents, with a Large Date logotype. This piece has pleasing mahogany-brown color with a few splashes of tan. MRB AU55.(#1218)
- 3951 1853 MS65 Brown PCGS. C-1, B-1, R.1. Fully lustrous with a strong cartwheel effect, this lovely example has dark brown surfaces with hints of light blue toning around the devices. MRB MS60. (#1227)
- 3952 1855 MS63 Red PCGS. C-1, B-1, R.1. Both sides have full mint brilliance with light orange surfaces and frosty luster. A rather large dark greenish toning spot extends from the bottom eye lid to the cheek bone. A few other old toning spots are inconsequential. MRB MS62.(#1235)
- 3953 1855 MS64 Red PCGS. C-1, B-1, R.1. An orange-gold Choice half cent that has scintillating luster and minimal contact. A loupe is needed to locate minute flecks and pale gray spots. Well struck at the centers, although the right borders are lightly impressed. MRB MS64.(#1235)

### LARGE CENTS

#### 1793 S-1, B-1 Chain AMERI. Cent, Good 4 First U.S. Mint Issue

3954 1793 Chain AMERI. Good 4 NGC. S-1, B-1, R.4. Although well worn, this pleasing piece has light to medium brown surfaces with a full LIBERTY, outlined and partially detailed bust, incomplete date, full chain, and complete legend. A number of moderate handling marks are noted on each side as expected at this grade level. MRB Good 4.

Ex: Jack Beymer; Superior (2/1992), lot 626; March Wells. From The Jack Stickel Collection. (#1340)

# 1793 S-1, B-1 Chain Cent, Net VG10 Famous Abbreviated Reverse

3955 1793 Chain AMERI. — Corroded — ANACS. Fine Details, Net VG10. S-1, B-1, R.4. This darkly toned example has a somewhat rough obverse, while the reverse is only moderately granular. The obverse has the date and LIBERTY sharp with considerable hair definition and a sharpness grade of Fine 12 or finer. The reverse has bold legends and attractive lighter brown color with VF20 or finer sharpness.

The importance of this variety can hardly be over-emphasized, as it represents the first business strike production within the U.S. Mint. AMERICA was abbreviated, apparently to maintain equal spacing between the words in the reverse peripheral legend. MRB Good 6. (#1340)

### 1793 Chain Cent, Good Details S-2, B-2

3956 1793 Chain AMERICA — Damaged — NGC Details. Good. S-2, B-2, High R.4. The sharpness is finer than the holder indicates, despite an invisible date, with some hair detail and a complete chain. The reverse has heavy scratches obliterating the denomination within the chain. Both sides have light chocolate surfaces with other minor scratches. MRB Fair 2. From The Jack Stickel Collection.

#### 1793 Chain Cent, Fine Details S-3, B-4

3957 1793 Chain AMERICA — Corrosion — NGC Details. Fine. S-3, B-4, Low R.3. This nicely detailed dark olive example shows even and fine corrosion over both surfaces. All of the central and peripheral details are complete with some hair tresses visible at the back of Liberty's head. MRB Good 5.

3958 1793 Wreath Cent, Vine and Bars AG3 NGC. S-5, B-6, R.4. The portrait is fully outlined, and LIBERTY is bold. Most of the reverse legends are readable, although OF and CENT are faint. A coveted and important early single-year type. The surfaces are about as choice as can be expected for a coin of this grade. MRB AG3. From The Jack Stickel Collection. (#1347)

#### 1793 S-10, B-10 Wreath Cent, Fine 12 Diagnostic Obverse Rim Flaw

3959 1793 Wreath Cent, Vine and Bars Fine 12 NGC. S-10, B-10, **R.4.** A small die flaw at 3 o'clock on the rim is diagnostic for the obverse die that was only used with a single reverse, so that trait is also diagnostic for the variety. Although both sides have light porosity, the overall appearance is highly attractive with reddishbrown devices and dark chocolate fields. All of the devices are fully legible with a bold date. MRB VG8.

From The Jack Stickel Collection. (#1347)

#### Choice Fine 1793 Wreath Cent S-8, Vine and Bars Edge

3960 1793 Wreath Cent, Vine and Bars Fine 15 PCGS. S-8, B-13, R.3. A mahogany-brown representative of the prized Wreath cent type. A majority of legends are bold, and the devices have are nicely detailed for the grade. The diagonal crack across the central reverse is familiar to specialists and allows uneven wear on the E in CENT. The rims are somewhat abraded, and a brief mark is noted beneath the second T in STATES. MRB VG7. From The Scott Cedars Collection. (#1347)

## 1793 S-6, B-7 Wreath Cent, VF Details Sprung Die Variety

3961 1793 Wreath Cent, Vine and Bars — Environmental Damage - NGC Details. VF. S-6, B-7, R.3. Known as the Sprung Die variety, the S-6 cent has a horizontal die ridge in the left obverse field, providing immediate attribution. The obverse is medium brown, the reverse darker, and both sides have moderate corrosion with faint scratches. The sharpness is about VF20, and this piece was called Fine 12 in the 1983 EAC Sale and in the June 2000 Superior catalog. MRB Fine 12.

Ex: 1983 EAC Sale, lot 138; Chuck Furjanic; Louis Ulian; Superior (6/2000), lot 111.

From The Jack Stickel Collection.

3962 1794 Head of 1793 — Environmental Damage — NGC Details. Good. S-18b, B-2b, R.4. Both sides are granular throughout. The legends are faint but generally readable beneath a strong light. The obverse has moderate rim dings at 5:30 and 8 o'clock, and the cheek displays a diagonal pinscratch. MRB AG3. Purchased from Frank Oldfield. From The Jack Stickel Collection.

3963 1794 Head of 1793 — Corrosion — NGC Details, VG, S-20b, B-4b, High R.4. The date and LIBERTY are sharp on this bettervariety 1794 cent. The fields are dark and rough, and contrast with the lighter-toned high points. Marks are limited to one or two minor rim nicks on each side. MRB AG3. From The Jack Stickel Collection.

## Elusive 1794 Head of 1793 Cent VG Details, Sheldon-19b

3964 1794 Head of 1793 — Improperly Cleaned — NGC Details. VG. S-19b, B-3b, R.4. The deep brown surfaces are slightly glossy from a wipe to reduce mild surface granularity. STATES OF and the fraction are lightly defined, and the central reverse displays a few pinscratches. The Head of 1793 subtype is much scarcer than its Head of 1794 successor. MRB Good 6.

Ex: Stack's (12/1993), lot 1049. From The Jack Stickel Collection.

#### 1794 S-66, B-58 Cent, Good 4 Famous Split Pole Variety

3965 1794 Head of 1794 Good 4 NGC. S-66, B-58, R.5. Known as the "Split Pole" variety as nearly all known examples have a die crack along the lower edge of the pole to the border. It is positioned such that the end of the pole appears to be split in half. All detail is outlines except for the central reverse that is illegible. The surfaces have a pleasing two-tone appearance with reddish-brown devices and darker brown fields. MRB Good 4.

Purchased from Dan Trollan, per notes on the envelope. From The Jack Stickel Collection. (#901374)

3966 1794 Head of 1794 — Environmental Damage — NGC Details. VG. S-51, B-42, Low R.5. Breen Die State II with a bold vertical die crack between the 17 in the date. A much better 1794 die pairing. Granular dark brown fields contrast with tan devices. The obverse legends are bold, and the reverse lettering is fully readable. Void of marks, and an important opportunity for the variety specialist. MRB Good 4.

Ex: Jim Corrado (2/1981); Dennis Mendelson; Rod Burress. From The Jack Stickel Collection.

# Challenging Sheldon-50 1794 Cent Head of 1794, VG Sharpness

3967 1794 Head of 1794 — Improperly Cleaned — NGC Details. VG. S-50, B-43, R.5. This rare-variety 1794 cent has generally even wear, with indistinctness limited to OF AMERICA and the fraction. LIBERTY and the date are the key legends, since their placement distinguishes S-50 from the much more prevalent S-49. The moderately porous surfaces exhibit sea-green and mahogany undertones, and the reverse has a small rim ding at 12 o'clock. MRB Good 4.

Ex: Dennis Mendelson; Rod Burress. From The Jack Stickel Collection.

3968 1794 Head of 1794 — Environmental Damage, Rim Damage — NGC Details. VG. S-36, B-23, R.5. This tan-brown Liberty cap cent has evenly granular fields. All legends are legible, although the base of the date is faint. The reverse has a rim bruise at 5 o'clock and minor dings at 2:30 and 8:30. A much better die marriage. MRB Good 5.

Ex: Denis W. Loring; Robert J. Shalowitz. From The Jack Stickel Collection.

# Rarely Seen S-45 1794 Cent Fine Details, Head of 1794

- 3969 1794 Head of 1794 Environmental Damage NGC Details. Fine. S-45, B-35, High R.5. A diagonal die crack through the O in ONE aids the identification of this rare Sheldon variety. A nicely detailed dark brown cent. All legends are bold aside from the fraction. The obverse has a rim bump at 7:30, and both sides are granular, but there are no noticeable marks. MRB Good 5. From The Jack Stickel Collection.
- 3970 1794 Head of 1794 Fine 12 NGC. S-22, B-6, R.1. The well-known "Mounds Reverse" variety. The reverse die was incorrectly hardened or made of lower quality steel, and sank during the coining of S-22. This dark brown example is attractive for the grade despite a minor obverse rim ding at 10 o'clock and a faint pinscratch on the lower reverse.

  From The Jack Stickel Collection. (#901374)
- 3971 1794 Head of 1794 Fine 12 PCGS. S-60, B-52, R.3. A mahogany-brown representative with generally clear legends, although the RTY is faint. Attractive for the grade despite a few parallel marks on the cheek and an occasional hint of obverse granularity. (#901374)
- 3972 1794 Head of 1794 Fine 15 NGC. S-31, B-13, R.1. A tanbrown example of this popular second-year variety. Sharp legends and even wear aid the eye appeal. The obverse has moderate dings at 5 and 7 o'clock, a pinscratch rests above the Liberty pole, and the fields display expected minor granularity. MRB VG8. From The Jack Stickel Collection. (#901374)
- 3973 1794 Head of 1794 Environmental Damage NGC Details. VF. S-49, B-41, R.2. A well-defined example of this widely pursued early date. The steel-gray surfaces show consistent and moderate granularity but are unabraded for the VF level. MRB Fine 12. From The Jack Stickel Collection.
- 3974 1794 Head of 1794 VF20 NGC. S-47, B-39, R.4. A chestnut-brown example with lightly abraded and slightly glossy surfaces. A spot at 5:30 on the reverse, but desirable overall. No sign of the eventual radial die crack through the upright of the E in LIBERTY. MRB VG10.

  Extraction (6/2000) Let 124 as Fine 12: Chris Victor McCauley.

Ex: Superior (6/2000), lot 124 as Fine 12; Chris Victor-McCawley. From The Jack Stickel Collection.(#901374)

- 3975 1794 Head of 1794 Environmental Damage NGC Details. VF. S-63, B-37, R.2. The well known "Fallen 4" variety. The die engraver entered the 9 in the date too distant from the 7, which forced an awkward placement for the 4. The portrait has pleasing detail, but pitting is noted near the left ribbon end, and a few thin marks are on the obverse center. MRB Fine 12. From The Jack Stickel Collection.
- 3976 1794 Head of 1794 Damaged NGC Details. VF. S-38, B-25, R.5. The "Marred Field" obverse, named for its tornadoshaped die chip on the field beneath the cap. This representative has a minutely pebbled and granular appearance with distributed small marks. Struck from widely rotated dies. MRB Good 6. From The Jack Stickel Collection.
- 3977 1794 Head of 1794 Improperly Cleaned NGC Details. VF. S-61, B-53, R.4. This deep olive-brown example is mildly glossy from a past wipe and has moderately granular surfaces. Marks are minimal for the VF level. The cents of 1794 are often collected by die variety, and S-61 is scarce. MRB VG10. From The Jack Stickel Collection.

3978 1794 Head of 1794 — Environmental Damage — NGC Details. VF. S-42, B-29, R.4. Well detailed for a 1794 cent, and the chocolate-brown fields and devices show only slight granularity. Marks are generally limited to the E in CENT. MRB Fine 12. Purchased from Teletrade. From The Jack Stickel Collection.

3979 1794 Head of 1794 VF20 NGC. S-56, B-48, R.3. A goldenbrown early cent struck with uneven die alignment, since the lower reverse border and LIBERTY are lightly brought up relative to the remainder of the coin. A few small marks are present, although

noticeable only above the E in ONE. MRB Fine 12. Ex: Dr. Gerald Maas (Superior, 2/1998), lot 834. From The Jack Stickel Collection.(#901374)

#### 1794 S-50, B-43 Cent, VF Details

3980 1794 Head of 1794 — Environmental Damage — NGC Details. VF. S-50, B-43, High R.5. Dark reddish-brown on the obverse and slightly lighter brown on the reverse, this piece is peppered with tiny corrosion pits. However, it shows considerable sharpness that strengthens its overall grade. Approximately 40 to 50 examples of S-50 are identified. MRB VG8.

Ex: Coin Galleries (11/1999), lot 2665. From The Jack Stickel Collection.

3981 1794 Head of 1794 VF25 NGC. S-57, B-55, R.1. The blended medium brown and steel-blue are only minutely granular. Out of parallel dies cause an uneven peripheral strike, although the date is sharp, as is AMERICA. Faint marks are noted on Liberty's cap and the obverse border at 12 o'clock.

Ex: EAC 1984, F. Clymer, 4/1997. From The Jack Stickel Collection. (#901374)

#### 1794 S-58, B-56 Cent, VF30

3982 1794 Head of 1794 VF30 NGC. S-58, B-56, R.3. This piece is below the S-58 condition census but it is finer than most survivors. The dark brown obverse has a few minor marks including an old scratch from the neck to the right obverse field that is so nicely blended with the surrounding surface that it is nearly invisible. The reverse is smooth and lighter brown. MRB VF20. From The Jack Stickel Collection. (#901374)

3983 1794 Head of 1794 VF30 NGC. S-44, B-33, R.1. A heavy reverse die crack extends inward from the border at 1 o'clock. Somewhat glossy dark chocolate and steel-brown surfaces host a few small marks on each side, including short hairline scratches on the cheek. MRB Fine 15.

From The Jack Stickel Collection. (#901374)

# Well Defined VF30 1794 Cent Head of 1794, Sheldon-65

3984 1794 Head of 1794 VF30 NGC. S-65, B-51, R.1. Die break through the second S in STATES and the final A in AMERICA help identify the Sheldon marriage, one of many for the date. The obverse die is misaligned toward 1 o'clock, but wear is nonetheless even. The deep brown fields and devices show few marks, although a small spot is noted on the obverse rim at 4 o'clock. From The Scott Cedars Collection. (#901374)

# 1794 S-63, B-37 Cent, VF30 Fallen 4 Variety

3985 1794 Head of 1794 VF30 NGC. S-63, B-37, R.2. The Fallen 4 variety is named for the unusual date layout but it could easily be called the High 9 variety. The distinctive reverse with two barely visible berries to the right of the ribbon in the wreath. This is a moderately worn teak-brown example that shows considerable indistinctness along parts of the peripheral lettering, most notably on the word LIBERTY. The interiors are better-defined despite taking the brunt of the wear. MRB Fine 12. (#901374)

# 1794 S-24, B-8, VF35 Apple Cheek Variety

3986 1794 Head of 1794 VF35 NGC. S-24, B-8, R.1. A typical example of the Apple Cheek variety, the name originating with Dr. Sheldon's father, the obverse has sharp detail and the reverse has weak detail. This piece exhibits smooth brown surfaces with a few shallow marks, including one below the eye. MRB VF20. Ex: John Kraljevich; Doug Bird; Donna Levin. From The Jack Stickel Collection. (#901374)

# 1794 S-51, B-42 Cent, VF35 Early Die State

3987 1794 Head of 1794 VF35 PCGS. S-51, B-42, Low R.5. Breen Die State I. There is no evidence of the die crack at the date on this early die state specimen. Considerable detail remains with mottled steel, tan, and maroon. Slight surface roughness is evident with an obverse rim bruise over the L. Both sides also exhibit trivial handling marks. Here is an attractive piece with considerable detail and only minor deductions. MRB Fine 15. (#901374)

# XF Head of 1794 Cent Sheldon-32, Bold Die Crack

- 3988 1794 Head of 1794 XF40 NGC. S-32, B-18, R.2. A prominent radial die crack through the first S in STATES allows prompt attribution of this second-year Liberty Cap cent. A die break over the L in LIBERTY is also a characteristic of the S-32 variety. The medium brown surfaces display only minor granularity, and both sides appear unabraded. Struck from moderately rotated dies. Previously graded VF35 ANACS. MRB VF25. From The Jack Stickel Collection. (#901374)
- 3989 1794 Head of 1794 —Improperly Cleaned— NGC Details. XF. S-24, B-8, R.1. The bold diagonal obverse die crack between 5 o'clock and 10:30 is familiar to the specialist. This surprisingly unabraded medium brown large cent was burnished to minimize the effect of minor surface granularity. A small flan flaw is noted on Liberty's forehead.(#901374)
- 3990 1794 Head of 1795 Environmental Damage NGC Details. VG. S-68, B-60, R.5. A prominent linear obverse die break between 2 and 8 o'clock helps identify this challenging die pairing. Among the seven Head of 1795 varieties, only NC-3 is rarer. Both sides display even granularity, with the obverse somewhat sharper. A few pinscratches and rim nicks require a loupe to observe. MRB Good 6.

  Ex: Denis W. Loring; Fred Borcherdt (4/22/1995).
  - From The Jack Stickel Collection.
- 3991 1794 Head of 1795 Fine 12 NGC. S-71, B-63, R.2. An ebonybrown Head of '95 cent with even definition and an absence of any corrosion. A loupe reveals minor faded marks, none of which are obvious to the unaided eye. MRB VG10.
  Ex: EAC Sale (5/1996), lot 109; Doug Bird; Col. Steven Ellsworth. From The Jack Stickel Collection. (#1365)
- 3992 1794 Head of 1795 Reverse Scratched NGC Details. VF. S-67, B-59, R.3. This walnut-brown early cent has sharp legends and ample hair detail. A pair of pinscratches near CENT corresponds to the NGC annotation. An accompanying collector's envelope notes that the lettered edge inscription is blundered as "ONE HUNDRED A DOLLAR." MRB Fine 12. From The Jack Stickel Collection.

- 3993 1794 Head of 1795 VF20 NGC. S-72, B-65, R.2. A medium brown cent that has mild surface granularity and a complete absence of relevant marks. The die cracks near the T in LIBERTY and the D in UNITED are usual for the variety. MRB Fine 15. Ex: Heritage, 3/2002, lot 13002, there certified as ANACS VF30. The ANACS insert accompanies the lot. From The Jack Stickel Collection. (#1365)
- 3994 1795 Lettered Edge —Environmental Damage— NGC Details. Fine. S-76a, B-4a, R.5. The Plain Edge Sheldon-76b is plentiful, but its Lettered Edge counterpart is very scarce. The deep brown surfaces display minor porosity, but any abrasions are minimal and all legends are sharp. In a new style NGC holder that allows examination of the edge. MRB VG7.

# Rare Sheldon-73 1795 Cent Lettered Edge, VF Details

- 3995 1795 Lettered Edge Corrosion NGC Details. VF. S-73, B-1, Low R.5. S-75 is the usually seen Lettered Edge 1795 variety, with S-74 in second place. S-73 is rare, and is identified by the placement of the 5 fully beneath the bust. This darkly toned example has impressive hair detail behind Liberty's neck. The surfaces have a minutely pebbled appearance and a few spots of corrosion are noted, principally near Liberty's chin, between the RT in LIBERTY, and at 1 o'clock on the reverse. MRB VG8. Ex: Bowers and Merena (6/2000), lot 69. From The Jack Stickel Collection.
- 3996 1795 Plain Edge VF25 NGC. S-78, B-8, R.1. A more common die pair with the T in LIBERTY centered over the curl and the Y off it. Reddish overtones grace deep brown surfaces. Two very minor clips are found along the rims. MRB Fine 15.(#1380)
- 3997 1795 Plain Edge VF25 PCGS. CAC. S-76b, B-4b, R.1. An attractive chocolate-brown Liberty Cap cent that boasts problem-free surfaces and considerable definition within the neck curls. An excellent candidate for an early copper type set. MRB Fine 15. From The Scott Cedars Collection. (#1380)

## 1795 S-76b, B-4b Cent, XF45 Thin Planchet, Plain Edge

- 3998 1795 Plain Edge XF45 PCGS. S-76b, B-4b, R.1. Lovely tan surfaces exhibit a few splashes of darker brown, along with pinpoint maroon corrosion spots and trivial surface marks. Some of the tiny marks on each side remain from the original planchet, the strike lacking sufficient pressure. MRB VF30. (#1380)
- 3999 1796 Liberty Cap Damaged NGC Details. Good. S-90, B-11, High R.5. LIBERTY is bold, while the date, UNITED, and ONE CENT are legible. This walnut-brown rare variety cent exhibits a number of minute marks on the portrait, and each side has a small rim ding at 2 o'clock. MRB AG3. From The Jack Stickel Collection.

- 4000 1796 Liberty Cap—Environmental Damage—NGC Details. VG. S-88, B-9, R.4. Mahogany and steel toning are intermingled on both sides of this S-88 cent. The surfaces show microscopic roughness with a few old scratches, and reverse rim nicks at 9 o'clock and 11:30. As usual for the 1796 Liberty Cap cents, the obverse is sharper than the reverse. MRB VG7. Ex: Bowers and Merena (11/1998), lot 1063. From The Jack Stickel Collection.
- 4001 1796 Liberty Cap Fine 15 NGC. S-87, B-8, R.3. The dark brown fields display golden-brown and olive when rotated beneath a light. Sharply defined for the Fine 15 grade, and we note only a pair of hair-thin marks beneath the chin and a subtle obverse rim ding at 6 o'clock. MRB Fine 12.

  From The Jack Stickel Collection. (#1392)

# Bold 1796 Liberty Cap Cent Sheldon-84, VF30

- 4002 1796 Liberty Cap VF30 NGC. S-84, B-5, R.3. A chocolate-brown representative of the final-year Liberty Cap cent. The neck curls display pleasing definition, and there are no reportable abrasions save for a minor obverse ding at 7:30 and slight metal loss on the reverse border at 8:30. MRB Fine 15.

  From The Scott Cedars Collection. (#1392)
- 4003 1796 Liberty Cap —Improperly Cleaned— NGC Details. XF. S-81, B-2, R.3. This virtually mark-free Liberty Cap cent is retoned ebony-brown and displays faint surface granularity. Well defined except on CENT, which is lightly impressed. MRB VE25
- 4004 1796 Draped Bust, Reverse of 1796 VG8 NGC. S-98, B-21, R.4. A dark brown Draped Bust cent that exhibits partial hair detail and has fully readable legends. LIBERTY and the date show slight weakness near the rim. A few tiny dull marks on the portrait are of little importance. MRB VG7. Ex: Joel Spingarn (5/1996); Cliff Fellage (2/5/1997). From The Jack Stickel Collection. (#1401)
- 4005 1796 Draped Bust, Reverse of 1796 Environmental Damage NGC Details. Fine. S-116, B-36, Low R.5. This rare-variety large cent is ebony-brown with evenly porous surfaces. A few faded small obverse digs are noted near 2 o'clock. Liberty's hair exhibits considerable detail. MRB Good 5.

Ex: Dr. Gerald Maas Collection (Superior, 2/1998), lot 897; Chris Victor-McCawley.

From The Jack Stickel Collection.

4006 1796 Draped Bust, Reverse of 1796 Fine 12 NGC. S-97, B-20, R.3. This walnut-brown Draped Bust cent has attractive surfaces despite a few faint gray obverse field spots and a faded thin mark beneath CENT. The Reverse of 1796 is identified by single leaf terminations atop the wreath. MRB Good 6. Ex: Coin Galleries (11/1999), lot 2689. From The Jack Stickel Collection.(#1401)

- 4007 1796 Draped Bust, Reverse of 1796 —Environmental Damage NGC Details. Fine. S-92, B-28, R.3. Both sides have pleasing medium olive-brown surfaces with splashes of steel patina. Faint porosity is evident but of little consequence. A few small scratches are nearly invisible, hosting the same color as the surrounding surface. MRB VG8.
  - Ex: David Proskey; Henry C. Hines; Dr. William H. Sheldon; Dorothy Paschal; Dr. Byron M. Stuart; ANA Sale (Kagin's, 8/1977), lot 264; Dr. Willard J. Carmel, Jr.; Del Bland; Robert E. Vail (11/21/1988); Del Bland; Dr. Willard J. Carmel, Jr. (Superior, 9/1997), lot 191. From The Jack Stickel Collection.
- 4008 1796 Draped Bust, Reverse of 1794 Environmental Damage NGC Details. Fine. S-111, B-17, Low R.5. A small die break beneath the E in UNITED helps identify this much better variety 1796 cent. All legends are crisp, but the dark brown fields are granular and contrast with the tan-brown high points. MRB Good 5. From The Jack Stickel Collection.
- 4009 1796 Draped Bust, Reverse of 1794 Fine 12 NGC. S-110, B-16, R.3. This deep brown cent is void of surface distractions. Most legends are bold, although the upper and central reverse exhibit less detail. From early dies without any hint of the eventually large cud over the TY in LIBERTY. MRB VG8. From The Jack Stickel Collection. (#1404)
- 4010 1796 Draped Bust, Reverse of 1794 Corrosion NGC Details. XF. S-108, B-12, R.4. An ebony-brown cent with bold definition and an even strike. Both sides are granular, but no pitting, abrasions, or spots are readily evident. MRB Fine 15. Ex: Lindesmith & LaRiviere Collections (Bowers and Merena, 11/1999), lot 306. From The Jack Stickel Collection.

#### 1796 S-105, B-44 Cent, Fine 12 Bland CC-6, Noves CC-7

- 4011 1796 Draped Bust, Reverse of 1797 Fine 12 NGC. S-105, B-44, Low R.5. The base of the 6 is widely repunched, and the second A in AMERICA virtually touches the right ribbon end. Such are the die characteristics of the elusive S-105. This dark gray example shows even detail and is only minutely granular. The obverse is slightly glossy. Del Bland grades this piece VG8, tied for sixth finest known, and Bill Noyes grades the coin VG7, tied for seventh finest known. MRB VG8.
  - Ex: Dr. William H. Sheldon; Dorothy Paschal; Allen E. McDowell; Jake Hendin (7/30/1978); Richard V. Punchard; 1995 EAC Sale, lot 189; Steven K. Ellsworth; 1996 EAC Sale, lot 120; Stuart "Mac" McDonald (Heritage, 9/1997), lot 5100; Tom Reynolds. From The Jack Stickel Collection. (#1407)
- 4012 1796 Draped Bust, Reverse of 1797 Environmental Damage NGC Details. Fine. S-113, B-41, R.5. This rare Sheldon variety is distinguished by a bold die crack from 7:30 through the lowest curl and the 17 in the date. The olive-brown surfaces are granular, but no marks are relevant and a majority of letters are bold. MRB Good 6.

From The Jack Stickel Collection.

- 4013 1797 Reverse of 1797, Stems Good 4 NGC. S-124, B-14, High R.5. This rare variety early large cent has readable legends, and the fields and devices appear unabraded despite a lengthy stay in circulation. Only relatively minor obverse rim dings at 1, 2, and 4 o'clock merit passing mention. MRB Good 4. Ex: Fred Borcherdt; Dave Palmer; Clay Everhart. From The Jack Stickel Collection. (#1422)
- 4014 1797 Reverse of 1797, Stems VF25 NGC. S-140, B-22, R.1. A deep brown cent with even, moderate wear. Smooth save for granularity on the right obverse field. The reverse die is misaligned a few degrees toward 9:30, as often seen on this available variety. Die bulges at the lower right obverse and upper right reverse are typical of late die states. MRB Fine 12. Ex: L. Neilson (6/1975); Louis Ullian; Superior (6/2000), lot 165. From The Jack Stickel Collection. (#1422)
- 4015 1797 Reverse of 1797, Stems VF25 NGC. S-134, B-4, R.4. Medium brown with hints of powder-blue on the right obverse. Evenly defined, and no marks are remotely worthy of comment. Struck a few degrees off center toward 5 o'clock, although all peripheral legends are complete. A scarce Sheldon marriage. MRB Fine 12.

  Ex: Gary Ruttenberg (McCawley & Grellman, 8/1996), lot 138;

March Wells. From The Jack Stickel Collection.(#1422)

- 4016 1797 Reverse of 1797, Stems VF30 NGC. S-138, B-20, R.1. A richly detailed medium brown large cent that has a mark-free appearance and only minor to moderate surface granularity. Die sinking near OF is characteristic of this familiar Sheldon variety. MRB Fine 15. From The Jack Stickel Collection. (#1422)
- 4017 1797 Reverse of 1797, Stems XF40 NGC. S-130, B-25, R.2. Hints of gold over the deep chocolate surfaces suggest this coin was once cleaned and recolored. However, it is an attractive specimen with sharp design features and hard surfaces that show only trivial handling marks. A few small rim bumps are noted on each side. MRB VF25. Ex: Superior (10/1989), lot 913 as VF30. From The Jack Stickel Collection. (#1422)
- 4018 1797 Reverse of 1797, Stems XF40 NGC. S-135, B-5, R.3. Though appreciably worn, this steely blue-brown example retains strong essential detail. A few small cuts on the portrait contribute to the grade. Bland VF30, MRB VF25. Ex: Benson Collection (2/2001), lot 301. From The Jack Stickel Collection. (#1422)

# Partly Lustrous Choice XF 1797 Cent Reverse of 1797, With Stems, S-138

4019 1797 Reverse of 1797, Stems XF45 PCGS. S-138, B-20, R.1. Luster shimmers from the hair and legends of this gently circulated Draped Bust cent. The medium brown surfaces display only faded minor abrasions and a couple of shallow mint-made strike-throughs near ONE. The reverse die is failing near OF, as usually seen on S-138. Encased in an old green label holder. MRB VF35. From The Scott Cedars Collection. (#1422)

# 1797 S-128, B-23 Cent, AU Details Breen Cent Encyclopedia Plate Coin

- 4020 1797 Reverse of 1797, Stems Whizzed NGC Details. AU. S-128, B-23, R.3. This is the Breen plate coin for B-23 on page 418 of his Encyclopedia of United States Large Cents. Although cleaned and recolored, we disagree with the NGC description that this coin has been whizzed. In fact, it is an attractive piece with significant sharpness and pleasing surfaces that have only a few circulation marks. Del Bland describes this piece as "Sharpness of AU-50 but cleaned and recolored; light corrosion spots" in his census, and gives a net grade of XF40. Bill Noyes also assigns a net grade of XF40 in his census. This piece is tied for seventh finest according to Bland, and tied for sixth finest according to Noyes. MRB XF40. Ex: Jack H. Beymer (11/24/1981); C. Douglas Smith; Del Bland; Rod Burress (2/16/1999). From The Jack Stickel Collection.
- 4021 1797 Reverse of 1797, No Stems VG8 NGC. S-132, B-28, High R.5. A steel-gray example of this much better die pairing. S-131 is the plentiful No Stems variety. This S-132 cent has clear legends, and is mildly granular and unmarked aside from a trivial obverse rim ding at 4 o'clock. MRB VG8. Purchased from Tom Reynolds as VG10. From The Jack Stickel Collection. (#1425)
- 4022 1797 Reverse of 1797, No Stems Environmental Damage NGC Details. VF. S-143, B-31, R.5. This mostly smooth walnutbrown cent is evenly granular and has a few roundish spots on the reverse, with the two most prominent near OF. Sheldon-143 is much rarer than the usually encountered No Stems variety, S-131. MRB VG8.

Ex: Henry Hettger; Gary Ruttenberg (McCawley & Grellman, 8/1996), lot 148.
From The Jack Stickel Collection.

- 4023 1798 First Hair Style Fine 12 NGC. S-147, B-4, Low R.5. An evenly defined lilac-brown example of a challenging Sheldon marriage. All legends are bold, and the shoulder curls are sharp. The fields are unmarked albeit moderately granular. MRB VG8. Purchased from Chris Young (8/27/1999). From The Jack Stickel Collection. (#1431)
- 4024 1798 First Hair Style VF20 NGC. S-162, B-23, R.4. This Draped Bust cent is golden-brown with olive undertones. Both sides show only minor granularity, and the obverse displays only brief, faint thin marks. A better die pairing. MRB Fine 12. Ex: Chris Victor-McCawley (1/1996); Clay Everhart. From The Jack Stickel Collection. (#1431)
- 4025 1798 First Hair Style Environmental Damage NGC Details. VF. S-158, B-17, R.4. An early die state retaining the sharpness of a VF25 cent, this piece has tan and light brown surfaces with splashes of deep steel on each side. Several small marks are visible on the bust and below the chin, and the surfaces show slight roughness. An obverse rim bruise is located at 9:30. MRB Fine 12. Ex: McCawley & Grellman (1/1996), lot 191; Superior (9/1998), lot 1180 as Fine 15. From The Jack Stickel Collection.

# 1798 S-149, B-5 Cent, VF Details Smith Envelope Accompanies

4026 1798 First Hair Style — Environmental Damage — NGC Details. VF. S-149, B-5, High R.5. A delightful example of the rare S-149 die marriage with considerable sharpness and light surface roughness including dark green corrosion. Del Bland gives the sharpness as Fine 12 with a net grade of VG8, tied for fifth finest in his census. MRB VG8.

This piece includes a C. Douglas Smith typed envelope:

"Discovered in a type set owned by J.M. Miller at 1953 Washington, DC GENA, and secured from him 10/24/53, after intense negotiation, by furnishing a commoner 1798 as replacement, plus a cash differential. At that time Dr. Sheldon compared it with his own specimen and called both VF-20 coins, tied for finest known. Such is still the case!"

Ex: J.M. Miller (10/24/1953); C. Douglas Smith. From The Jack Stickel Collection.

- 4027 1798 First Hair Style VF30 NGC. S-157, B-15, R.2. Exhibiting the sharpness of a VF cent, this S-157 has light porosity with olivebrown, mahogany, and maroon on the obverse, and mostly lighter brown on the reverse. A few old scratches and other marks are evident, including tiny green spots on the reverse. This late die state piece has extensive die rust in the fields, including across the right obverse from the rim to the neck. MRB Fine 15.

  Ex: EAC Sale (3/2001), lot 222.

  From The Jack Stickel Collection. (#1431)
- 4028 1798 First Hair Style VF30 NGC. S-148, B-11, R.2. This deeply patinated piece has dark steel surfaces with lighter tan on the devices. Faint scratches appear on the obverse with minor corrosion on the reverse. Even at the present grade level, this piece is probably among the top 20 survivors of S-148. MRB Fine 15. Ex: Tom Reynolds as Net VF20 and tied for CC-10. From The Jack Stickel Collection. (#1431)
- 4029 1798 Second Hair Style VG8 NGC. S-183, B-44, R.5. This charming example of a desirable die marriage. The base of the date is faint, but the legends are generally bold, and the sole noticeable abrasion is a faded pinscratch left of the hair ribbon. MRB VG8. Purchased from Tom Reynolds. From The Jack Stickel Collection. (#1434)
- 4030 1798 Second Hair Style Corrosion NGC Details. VF. S-180, B-41, High R.5. The large die break over the TATE in STATES confirms the elusive S-180 marriage but this middle die state piece was coined before the second rim break developed over U. Both sides show a wealth of detail but are granular with some verdigris, and the rims exhibit the occasional small ding. MRB Good 6. Ex: Superior (6/2000), lot 179; Superior (10/2000), lot 1176. From The Jack Stickel Collection.
- 4031 1798 Second Hair Style Corrosion NGC Details. VF. S-177, B-25, High R.4. The vertical die crack in the right obverse field eventually becomes heavy on its next marriage for the S-178 rarity. This example has light surface corrosion on each side with medium olive and steel color. Bill Noyes grades this piece VF20 sharpness, net VG10 and tied for the 14th spot in his list. MRB Fine 12. From The Jack Stickel Collection.

- 4032 1798 Second Hair Style VF20 NGC. CAC. S-170, B-29, R.3. An early die state with clash marks on the obverse but no evidence of the die crack that appears in the left obverse field. Medium brown surfaces show considerable lighter tan, especially on the obverse. Small obverse rim bruises at 4:30 and 6:30 have little affect on the net grade. MRB Fine 12. From The Scott Cedars Collection. (#1434)
- 4033 1798 Second Hair Style VF25 NGC. S-185, B-46, R.2. A golden-brown representative with pleasing surfaces and even, moderate wear. From later dies with three linear die cracks on the right obverse field. MRB Fine 12.

  From The Jack Stickel Collection. (#1434)
- 4034 1798 Second Hair Style VF30 NGC. S-165, B-31, R.4. A deep brown representative with hints of lilac toning on the leaves. Only lightly abraded, and granularity is limited to a small obverse area near 4 o'clock. MRB Fine 15.(#1434)
- 4035 1798 Second Hair Style VF30 PCGS. CAC. S-167, B-33, R.1.

  Breen Die State VI with several prominent die breaks and cracks.
  This nicely defined Draped Bust cent has pleasing surfaces despite a small, minor spot southwest of the chin and a brief faded pinscratch behind the neck curls. MRB VF20.

  From The Scott Cedars Collection. (#1434)
- 4036 1798 Second Hair Style VF35 NGC. S-186, B-39, R.2. A prominent die crack on each side allows ready attribution. Toned deep olive-brown with substantial design detail and only a few faded thin marks on the portrait and right field. The lower left obverse peripheral displays a couple of minor spots. MRB VF20. From The Jack Stickel Collection. (#1434)
- 4037 1798 Second Hair Style XF45 NGC. S-179, B-37, R.2. The E over inverted E in AMERICA is diagnostic for S-179. An ebonybrown cent with unmarked fields and devices. Well detailed, and evenly struck from moderately rotated dies. MRB VF30. Purchased from Tom Reynolds. From The Jack Stickel Collection. (#1434)
- 4038 1798 Second Hair Style XF45 NGC. S-174, B-35, R.2. Prominent clash marks throughout the fraction aid identification of this Draped Bust marriage. The deep brown surfaces are glossy and impressively sharp. Patience and a lens reveals occasional minuscule marks. Probably in the top 20 for the variety. MRB VF30. Ex: Bowers and Merena (6/2000), lot 109. From The Jack Stickel Collection. (#1434)
- 4039 1798 Second Hair Style Environmental Damage NGC Details. AU. S-184, B-45, R.1. This medium brown example has impressive sharpness and is refreshingly unabraded. Minor pitting is limited to the obverse field near 3 o'clock and 10:30. Del Bland grades this piece VF35. MRB VF35. Purchased from Don Landes (7/28/1989). From The Jack Stickel Collection.
- 4040 1799/8 Damaged NGC Details. Good. S-188, B-2, R.4. A well-worn yet desirable example of the very scarce classic. Though deep brown surfaces are pitted with a curving scrape down the left side of the portrait, this remains a readily collectible coin. MRB AG3. Ex: Superior (9/1998), lot 1194. From The Jack Stickel Collection.
- 4041 1799 AG3 NGC. S-189, B-3, R.2. The top half of the date is clear, as is the bottom of LIBERTY and most of AMERICA, ONE CENT, and the fraction. The golden-brown surfaces are moderately granular and display the occasional light pinscratch. MRB AG3. Ex: Early American Copper Sale (4/1997), lot 152. From The Jack Stickel Collection. (#1443)
- 4042 1799 AG3 PCGS. CAC. S-189, B-3, R.2. Most of the date is clear, and OF AMERICA is bold. UNITED and LIBERTY are essentially worn smooth. The bust is fully outlined. Although this cent probably spent years in commerce, both sides are void of corrosion and consequential contact. Collectors have long regarded the 1799 as the key date of the large cent denomination. MRB AG3. From The Scott Cedars Collection. (#1443)

- 4043 1800 AG3 NGC. S-198, B-19, Low R.6. Despite considerable wear this piece has complete outlined details including a full date and LIBERTY, and a full legend and denomination. The tan and dark brown surfaces are attractive and quite pleasing for the grade. A few trivial marks are consistent with a low grade cent. MRB Good 4. Ex: Bowers and Merena (3/1996), lot 267 as Good 5; EAC Sale (4/2000), lot 221 as Good 5. From The Jack Stickel Collection. (#1449)
- 4044 1800 Fine 12 NGC. S-199, B-14, R.4. Breen Die State VIII with the reverse failing, most notably at ST and NE. This tanbrown example is attractive for the grade despite a few minor faded obverse field marks. MRB VG8. Purchased from James E. Long (12/4/1997). From The Jack Stickel Collection.(#1449)
- 4045 1800 VF25 NGC. S-204, B-25, R.4. A middle-grade medium brown cent with even sharpness aside from minor weakness on LIBERTY. This piece has the sharpness of VF20 with a few minor marks and verdigris, including a subtle ding on the obverse rim at 4 o'clock. Called 20 net 15 by J.R. Grellman. MRB Fine 12. Ex: Superior (2/2001), lot 2236. From The Jack Stickel Collection (#1449)
- 4046 1800 VF25 NGC. S-207, B-28, R.3. A triangle-shaped die break at 6 o'clock on the reverse confirms the Sheldon variety. Medium brown overall with hints of tan. Mildly granular, and the obverse displays scattered tiny ticks. MRB Fine 12. Ex: Mike's Early Coppers (10/19/1983); Jack H. Robinson (Superior, 1/1989), lot 436; March Wells; Superior (2/1992), lot 915 as VG10. From The Jack Stickel Collection (#1449)
- 4047 1800 VF25 NGC. S-197, B-12, R.1. S-197 is sometimes called the "Q variety," named for its die lumps near the 00 in the date. Also distinctive is a tornado-shaped break between the IB in LIBERTY. A smooth dark brown example without any individually mentionable marks. MRB Fine 15. From The Jack Stickel Collection. (#1449)

# 1800/1798 Draped Bust Cent, VF25 First Hair Style, S-190

- 4048 1800/1798 VF25 NGC. S-190, B-5, R.3. The repunched second A in AMERICA attributes this conditionally difficult Guide Book overdate. This walnut-brown representative displays exceptional hair detail and has only trivial marks. Minute granularity is limited to the field near the chin. A majority of S-190 survivors are in VG or lower grades. Bill Noyes grades this coin an extremely conservative VG8. MRB F15. Census: 2 in 25, 4 finer (2/11) Ex: Bowers and Merena (11/1999), lot 316 as VF25; EAC Sale (4/2002), lot 281 as VF20. From The Jack Stickel Collection. (#1452)
- 4049 1800/79 VF25 NGC. S-192, B-6, R.4. Medium brown overall with a glimpse of lighter tan toning near the profile. Considerable hair definition compensates for minor softness on the tops of LIBERTY. Both sides display minimal marks aside from the field above the CE and T in CENT. MRB Fine 15. Ex: Superior (10/2000), lot 1184. From The Jack Stickel Collection. (#1455)

- 4050 1801 AG3 NGC. NC-1, B-3, R.6. This rare 1801 marriage is very similar to S-215, which shares the same obverse die. NC-1 is distinguished by the heavy clash mark on the upper reverse. Although this piece is only graded AG3, the date is sharp, as is much of the reverse peripheral legend. Toned deep olive-brown and gunmetalblue. Small marks on the portrait do not distract. MRB AG3. Purchased from Christopher B. Young (Chesapeake Bay Rare Coins). From The Jack Stickel Collection (#1458)
- 4051 1801 VF20 NGC. S-214, B-2, R.3. A problem-free walnutbrown representative without consequential marks or verdigris. The usual die state with two spindly parallel die cracks through the fraction. MRB VG10. Purchased from James E. Long (12/4/1997). From The Jack Stickel Collection.(#1458)
- 4052 1801 3 Errors Environmental Damage NGC Details. VG. S-218, B-8, High R.5. An evenly granular mahogany-brown and steel-gray example of this much better die pairing. S-218 is the rare 3 Errors marriage. A few faded pinscratches cross the portrait. Several letters in LIBERTY and STATES OF are faint, but the remainder of the legends are bold. MRB Good 5. Ex: Dr. Robert J. Shalowitz. Possibly the VG7 piece in Del Bland's Census, not seen by him, from Shalowitz to James E. Long, Jr. From The Jack Stickel Collection.

#### 1801 S-219, B-11 Cent, VF30 Famous Three Errors Reverse

- 4053 1801 3 Errors VF30 PCGS. S-219, B-11, R.2. Breen Die State IV. The crack at the lower left reverse reaches the rim over the I in UNITED. Weak at BERT and at the fraction, the result of clash marks at those locations. Mostly medium to dark olive surfaces with considerable lighter tan on the obverse and splashes of maroon on the reverse. Both sides are rather pleasing with only a few minor handling marks expected for the grade. MRB Fine 15. (#1461)
- 4054 1801 1/000 VF35 NGC. S-220, B-12, R.3. A well defined medium brown example of this blundered fraction variety. The obverse edge has a small ding at 7:30, and the reverse displays a few small pits accompanied by hair-thin marks. Struck from moderately rotated dies. MRB VF20.

From The Scott Cedars Collection.(#1464)

## 1801 S-223, B-17 Cent, AU50 1/000 Reverse

- 4055 1801 1/000 AU50 PCGS. S-223, B-17, R.1. Breen Die State III. The obverse has a combination of a retained cud and rim break over RT, appearing as a retained cud over the R and a full break over the T. There is also a narrow rim break over the B that developed in its previous marriage for S-222. This pleasing piece has mottle tan, olive, and dark brown surfaces with trivial, grade-consistent marks on each side. Most noticeable are a couple diagonal marks in the left obverse field near the hair ribbon. MRB VF35. (#1464)
- 4056 1802 Corrosion NGC Details. VF. NC-1, B-3, High R.5. A prominent die crack bisects the portrait and confirms the rare NC-1 marriage. Intermittently pitted with green verdigris, and a few minor marks are noted near Liberty's neck. Well detailed with the sharpness of VF25 and predominantly tan-brown. MRB VG8. Purchased from Dan Holmes. Ex: C.F. Gordon. From The Jack Stickel Collection.
- 4057 1802 XF40 NGC. S-237, B-10, R.2. An olive-brown cent that is evenly struck except for softness on the wreath beneath the T in CENT. Study beneath a lens locates only a single consequential abrasion, a thin horizontal mark above Liberty's shoulder. MRB VF25. Purchased from Chris Victor-McCawley. From The Jack Stickel Collection. (#1470)
- 4058 1802 XF40 NGC. S-225, B-1, R.3. Luster shimmers within the hair on this deep brown Jefferson-era cent. No marks are obtrusive, and the eye appeal is imposing. S-225 is distinguished by a light arc-shaped die crack on the upper reverse. MRB VF25. Ex: Superior (2/1992), lot 935. From The Jack Stickel Collection. (#1470)
- 4059 1802 XF40 PCGS. S-230, B-8, R.1. As a still-glossy Draped Bust cent from a more common die pair, this reddish-violet example is well suited to a similarly graded type collection. Aside from a mark at the back of Liberty's jaw, there are few significant abrasions. MRB VF25.

From The Scott Cedars Collection.(#1470)

- 4060 1802 No Stems VF35 PCGS. CAC. S-241, B-20, R.1. An accessible but popular die pair which is distinguished by the widely repunched second S in STATES on the reverse. Well-defined with a largely glossy cinnamon-brown obverse which shows blue splotches, that color growing dominant on the opposite side. MRB VF20. From The Scott Cedars Collection. (#1476)
- 4061 1803 Small Date, Small Fraction Damaged NGC Details. VF. NC-1, B-9, High R.5. A moderately granular steel-gray representative of a challenging die pairing. The right obverse field has vertical pinscratches, and the portrait displays two horizontal pinscratches and a cluster of tiny digs. This piece is tied for 12th finest in the Noyes Census, where he grades the coin Fine 12 sharpness, net VG7. MRB VG7.

Ex: 1999 EAC Sale, lot 312; Jim McGuigan; Chris Young; Roy Sturgeon; Bowers and Merena (1/2002), lot 120. From The Jack Stickel Collection.

4062 1803 Small Date, Small Fraction — Environmental Damage — NGC Details. XF. S-245, B-2, R.3. The rare terminal die state with a large rim break over RICA. This steel and dark brown specimen has the sharpness of VF30 with slightly rough surfaces, less obvious on the obverse. A few tiny handling marks are consistent with the grade. Called VF25 in the June 2000 Superior catalog. MRB VF20.

Ex: Superior (6/2000), lot 210. From The Jack Stickel Collection.

# 1803 S-247 Cent, AU Details The Homer Downing Specimen

4063 1803 Small Date, Small Fraction — Improperly Cleaned — NGC Details. AU. S-247, B-5, R.3. The scarce S-247 is interesting for clashed dentils through the denominator and a "mumps" die break beneath Liberty's jaw. This partly lustrous representative lacks noticeable marks, but is a bit bright and the golden-brown and steel-blue toning is slightly off. A tiny planchet defect over the B of LIBERTY confirms the provenance. Graded XF45 in the 1992 Superior catalog, where they wrote: "Sharper by five points but cleaned and retoned." Del Bland records this piece as XF45 and tied for sixth finest known. Bill Noyes calls it XF40 and tied for seventh finest known. MRB XF40.

Ex: Homer K. Downing (1952 ANA, New Netherlands, 8/1952), lot 1936; C. Douglas Smith (3/30/1992); Eric Streiner; Superior Galleries (10/1992), lot 130; Larry Briggs; Superior (10/2001), lot 431. From The Jack Stickel Collection.

- 4064 1803 Small Date, Small Fraction Reverse Corrosion NGC Details. AU. S-254, B-13, R.1. A late die state with a retained die break beneath Liberty's bust tip. Luster emerges from design recesses, and both sides are only minimally abraded. Medium brown and golden-brown overall, but small areas of gray verdigris are present, notably on the obverse at 9 o'clock and on the reverse at 1 o'clock and 9:30. This piece exhibits the sharpness of at least AU50, tending toward AU55. MRB XF40. From The Jack Stickel Collection.
- 4065 1803 Small Date, Large Fraction XF45 NGC. S-257, B-16, R.2. A charming chocolate-brown Choice XF Draped Bust cent. Void of consequential contact, and minor buildup within ONE CENT corresponds to light circulation. This piece ranks among the top two dozen of the variety. MRB VF30. From The Jack Stickel Collection. (#1485)
- 4066 1803 Small Date, Large Fraction XF45 NGC. S-261, B-20, R.2. The prominent arc-shaped die crack between 6 and 9 o'clock helps attribute the Sheldon marriage. The die is sinking behind Liberty's shoulder, which leads to weakness on the opposite area of the reverse, the TAT in STATES. Medium brown with glimmers of luster on the curls and minor porosity near 7 o'clock on the reverse. MRB VF25.

Purchased from March Wells (7/1991). From The Jack Stickel Collection.(#1485)

## Rare Large Date, Small Fraction S-264 1803 Cent, Good Details

4067 1803 Large Date, Small Fraction — Corrosion, Damage — NGC Details. Good. S-264, B-24, High R.4. Although Small Date 1803 cents are plentiful, only two Large Date varieties are known, and each receives a separate *Guide Book* listing. S-265 has a Large Fraction reverse and is very scarce. S-264 is rare, identified by a Small Fraction reverse and a bold die crack between 10 and 1 o'clock through the upper left leaves of the wreath. This dark brown example is thoroughly granular but has readable legends. A few roundish digs on the portrait slightly bend the reverse above the CE in CENT. MRB AG3.

Purchased from Denis Loring. From The Jack Stickel Collection.

# 1803 S-243 Stemless Cent, AU Details Pedigreed to Hillyer Ryder

4068 1803 No Stems — Environmental Damage — NGC Details. AU. S-243, B-1, R.2. Although S-218 and S-219 are called the "3 Errors" variety, S-243 also has three die blunders: no stems, a double fraction bar, and a widely repunched second S in STATES. This brown example has essentially full design detail and shimmers with luster, but the reverse field is pebbled with nearly microscopic verdigris. Cleaned and recolored, attractively so. With the sharpness of AU50, Del Bland grades this example XF40 and tied for 11th finest. Our opinion is finer sharpness with greater deductions. MRB VF35. Ex: Hillyer Ryder; Wayte Raymond; Dr. William H. Sheldon; Dorothy Paschal; Eugene Exman; Gordon J. Wrubel (12/30/1972); C. Douglas Smith.

From The Jack Stickel Collection.

4069 1804 Fair 2 NGC. S-266a, B-1, R.2. Most of the date is bold, as is the lower half of LIBERTY and nearly all of AMERICA. UNITED STATES is worn smooth. Medium brown overall, with lighter tan-gray at the reverse center. MRB Fair 2. Ex: Chris Young. From The Jack Stickel Collection. (#1504)

- 4070 1804 Fair 2 NGC. S-266c, B-1, R.2. Obverse and reverse rim breaks are both visible on this late die state. The surfaces are smooth olive, chestnut, and dark brown, with only trivial surface marks. Both sides are far finer than the usual low grade 1804 cent. MRB Fair 2. From The Jack Stickel Collection. (#1504)
- 4071 1804 AG3 NGC. S-266c, B-1, R.2. Well worn with medium brown surfaces, this late die state piece has the usual handling marks expected at the low grade. Both sides have rim breaks in the late die state. MRB AG3. From The Jack Stickel Collection.(#1504)

4072 1804 AG3 NGC. S-266c, B-1, R.2. The late die state with obverse and reverse rim breaks. This pleasing low grade example has a full LIBERTY, nearly full date, full wreath, and partial legend. The surfaces are smooth medium brown with only a few blemishes including minor scratches and a small lamination in the right obverse field. MRB AG3.

From The Jack Stickel Collection. (#1504)

4073 1804 Good 4 NGC. S-266a, B-1, R.2. There is no trace of rim breaks on either side of this early die state piece. Both sides have pleasing medium brown surfaces with inconsequential handling marks. The date, LIBERTY, wreath, and denomination are all fully visible, with the statutory legend nearly complete. The obverse approaches VG sharpness. MRB Good 4. From The Jack Stickel Collection. (#1504)

#### 1804 S-266c, B-1 Cent, VG8 Late Die State

4074 1804 VG8 NGC. S-266c, B-1, R.2. The late die state 1804 cent has rim breaks on both sides. This pleasing piece has light brown surfaces with some darker patina, especially on the reverse. Microscopic surface roughness is inconsequential. This piece is still finer than usual. MRB Good 6. From The Jack Stickel Collection. (#1504)

4075 1804 —Damaged — Fine Details ANACS. Net VG8. S-266c, B-1, R.2. The late die state has obverse and reverse rim breaks that are both clearly visible on this olive-brown example. Minor rim bruises and other blemishes are evident on both sides, perhaps leading to the grading designation. MRB Good 5.(#1504)

# Fine S-266a 1804 Cent Key Draped Bust Date

4076 1804 Fine 12 PCGS. CAC. S-266a, B-1, R.2. LIBERTY and AMERICA exhibit die cracks but lack the prominent breaks seen on late-dies examples. Toned deep gray with a hint of russet verdigris near STATES and the M in AMERICA. All legends are bold, and some hair detail remains. Marks are inconspicuous and mostly confined to the obverse field. MRB VG8. From The Scott Cedars Collection. (#1504)

## 1804 S-266a, B-1 Cent, Fine 15 Early Die State

4077 1804 Fine 15 NGC. S-266a, B-1, R.2. An early die state with no rim breaks on either side, this piece has pleasing chocolate -brown surfaces with minor handling marks on each side. The surfaces are above average with only a slight deduction for those marks. A tiny rim bruise is evident on the obverse at 7 o'clock, hidden by the tab on the holder. MRB VG10.

From The Jack Stickel Collection. (#1504)

4078 1804 Restrike MS62 Brown NGC. The rarity of the 1804 cent contributed to the creation of this out-of-mint issue, coined from genuine but muled and altered-date dies prior to the Civil War. As always, the obverse exhibits die rust and heavy cracks. The reverse is rotated and displays a wide double rim near 11 o'clock. Satiny and medium brown with hints of mahogany. One small spot over the N in ONE. MRB AU50.

Ex: Early American Coppers, 4/1998, lot 153. From The Jack Stickel Collection. (#45344)

#### Impressive AU53 1805 Cent, S-267

4079 1805 AU53 PCGS. CAC. S-267, B-1, R.1. This lovely Jeffersonera example shows ample luster within design crevices, and the golden-brown and gunmetal surfaces are smooth despite a small obverse rim ding at 8:30. Although the 1805 is collectible relative to its 1804 predecessor, most survivors are in well circulated grades. MRB XF45.

From The Scott Cedars Collection. (#1510)

- 4080 1806 XF40 NGC. S-270, B-1, R.1. The obverse has light clash marks with a short crack or die flaw from the border at 4 o'clock. The 1806 has long been regarded as a tough date, perhaps because just one die variety is subjected to date, type, and variety pressure. This piece has attractive olive-brown surfaces with a few darker toning splashes. MRB XF40. From The Scott Cedars Collection. (#1513)
- 4081 1807/6 Large 7 XF45 PCGS. CAC. S-273, B-3, R.1. A deep chocolate-brown example of this Guide Book Sheldon variety. Luster dominates the hair, and emerges from the reverse design. All marks are inconsequential except for a couple of faded hair-thin marks near Liberty's lips. MRB VF35. From The Scott Cedars Collection.(#1528)
- 4082 1807 Large Fraction XF40 PCGS. S-276, B-6, R.1. A charming medium brown cent that displays traces of luster within the hair and legends. Study beneath a lens locates only faint pinscratches near the profile and the E in STATES, and a small reverse spot at 7 o'clock. Struck from widely rotated dies. MRB VF25. From The Scott Cedars Collection.(#1516)

- 4083 1807 Comet VF30 PCGS. S-271, B-1, R.1. The die break above the hair ribbon explains the nickname for S-271. The variety is photographed on page 99 of the 2011 Guide Book. This is an unblemished and glossy large cent with bold legends and pleasing eye appeal. The obverse die is misaligned several degrees toward 12 o'clock. MRB Fine 15.
  - From The Scott Cedars Collection. (#1531)
- 1807 Comet VF35 NGC. S-271, B-1, R.1. A pleasing deep brown example of this popular Guide Book variety. The spot-free fields display only minor abrasions, and noticeable curl definition remains. MRB VF20. Ex: McCawley-Grellman (9/1997), lot 114. From The Jack Stickel Collection.(#1531)
- 4085 1808 VF30 NGC. CAC. S-279, B-3, R.1. Deep mahogany-brown toning is consistent throughout this first year middle-grade Classic Head cent. Marks are few and generally minor, though we note an inconspicuous abrasion beneath the 1 in the date. MRB VF20. From The Scott Cedars Collection. (#1543)

#### AU Sharpness 1809 S-280 Cent Hines-Sheldon Provenance

4086 1809 — Improperly Cleaned — NGC Details. AU. S-280, B-1, R.2. The sole dies for the date. Most 1809 cents are in VG or lower grades, but the present briefly circulated cent retains crisp vein definition on the leaves. No marks are consequential, but the dusky olive-brown color suggests retoning. From a later die state with a double crack beneath the ES in STATES. MRB VF30. Ex: Henry Hines; Dr. William H. Sheldon; Dorothy Paschal; Tom

Steinmetz; George Blenker (1/15/1978); Bob Schick; 2002 EAC Sale, lot 360.

From The Jack Stickel Collection.

- 1809 Plugged, Burnished NGC Details. AU. S-280, B-1, R.2. Despite its physical challenges, this piece has considerable detail and will be a welcome addition to a large cent date set. The coin was holed at the top and carefully repaired, the plug now difficult to detect. Burnishing was intended to hide the plug, with fair results. Take a look, as this piece is more attractive than the description suggests. MRB Fine 12.
- 4088 1810/09 VF30 NGC. S-281, B-1, R.1. The 10 in the date shows strong evidence of the 09 underdigits. This dark brown cent has only a few trivial ticks on the left obverse and a single unobtrusive spot on the wreath stem. MRB VF20. Ex: Superior (5/2003), lot 551. From The Jack Stickel Collection.(#1552)
- 4089 1810/09 VF30 NGC. S-281, B-1, R.1. Along with the S-286 1811/0, one of two overdated die varieties among Classic Head cents. This walnut-brown representative is spot-free, and both sides are smooth save for a minor faded mark at 9 o'clock on the reverse. MRB Fine 15.

From The Scott Cedars Collection. (#1552)

# XF 1810/09 Cent, S-281 Conditionally Rare Guide Book Variety

4090 1810/09 XF40 NGC. S-281, B-1, R.1. An ebony-brown overdated cent that has minimal granularity and only a few inconspicuous marks on the left obverse. Customary for the Classic series, S-281 is common in AG-Good but is surprisingly difficult in problem-free XF. Cents were needed in commerce, and little thought was given to setting aside examples prior to the end of the large cent series in 1857. MRB VF20. Ex: Superior (2/1997), lot 83.

From The Jack Stickel Collection. (#1552)

- 4091 1810 VF25 NGC. S-284, B-5, R.3. Flow lines near the rims suggest long-in-use dies, yet S-284 is the scarcest Sheldon variety for the date. A middle-grade chocolate-brown Classic cent without any spots or distracting marks. MRB Fine 15. From The Jack Stickel Collection.(#1549)
- 4092 1810 VF25 PCGS. CAC. S-283, B-4, R.2. A dark brown Classic Head example with sharp legends and even wear. Although circulated, both sides are minimally abraded aside from a slender mark above the 0 in the date. MRB Fine 15. From The Scott Cedars Collection. (#1549)

#### Sheldon-285 1810 Cent, AU53

4093 1810 AU53 PCGS. S-285, B-2, R.2. Recutting on the T in LIBERTY aids identification, as do the spindly die cracks through the stars. This moderately circulated gray-brown representative is smooth overall, although we note faded field marks near the chin and a small nick on the base of the E in CENT. MRB VF35. (#1549)

# 1810 S-284 Cent, AU53 John Reich's Classic Design

4094 1810 AU53 PCGS. S-284, B-5, R.3. A nicely detailed example, this 1810 cent has medium brown and steel surfaces with a few splashes of lighter tan inside the obverse border. The surfaces show microscopic hairlines and other trivial handling marks on each side. This piece exhibits the sharpness of XF45, with a net grade of MRB VF35. (#1549)

#### Scarce XF 1811 Cent, S-287

4095 1811 XF40 NGC. S-287, B-1, R.2. Only two 1811-dated varieties are known, the other of which is an obvious 1811/0 overdate. S-287 is distinguished by a mint-made radial die scratch near star 5. This is a deep brown cent with minimal signs of contact and no evidence of verdigris. A difficult type to locate in better circulated grades. MRB VF25.

From The Jack Stickel Collection. (#1555)

# Smooth XF 1811 Cent S-287, Only Normal Date Variety

- 4096 1811 XF40 PCGS. CAC. S-287, B-1, R.2. A die scratch through star 5 identifies S-287, one of only two 1811-dated die marriages and the sole Normal Date variety. This deep olive-brown example is nearly unabraded and exhibits pleasing eye appeal. Liberty's hair and the leaves display moderate wear. MRB VF30. From The Scott Cedars Collection. (#1555)
- 4097 1812 Small Date XF40 NGC. S-291, B-1, R.2. This deep brown cent has attractive detail, and any granularity is restricted to the reverse periphery. The obverse shows a few faded marks, most noticeable near the bust tip. MRB VF25. Ex: Superior (5/2003), lot 565. From The Jack Stickel Collection. (#1561)
- 4098 1812 Large Date VF35 NGC. S-289, B-4, R.1. Dark brown overall with glimpses of lighter tan toning in protected areas. An appealing and problem-free example with moderate high point wear. Struck from multiply clashed dies. MRB VF25. From The Scott Cedars Collection. (#1564)
- 4099 1813 VF25 NGC. S-293, B-1, R.2. A midgrade example of the conditionally challenging Classic type. This lavender-brown cent is free from consequential contact or spotting. Lightly impressed on star 7 and opposite on the U in UNITED, as usual for S-293. MRB Fine 15.

Purchased from James Polis (1/9/2002). From The Jack Stickel Collection. (#1570)

4100 1813 XF45 NGC, S-292, B-2, R.2, A mahogany-brown representative with ample design detail and hints of luster along the borders, curls, and wreath. Smooth overall despite a few unimportant marks on the cheek. MRB VF35. From The Scott Cedars Collection. (#1570)

#### Choice AU S-292 1813 Cent

- 4101 1813 AU55 NGC. S-292, B-2, R.2. This Choice AU medium brown Classic Head cent has an unabraded reverse and only minor wear on Liberty's curls and the leaves of the wreath. The obverse die is slightly misaligned toward 5:30, with only the width of the denticles affected. Although S-292 is fairly plentiful in well worn or corroded condition, the variety becomes challenging as Mint State is approached. Previously certified AU50 PCGS and called "EAC grade EF45" in the 2003 Superior catalog. MRB XF40. Ex: Superior (2/2003), lot 222. From The Jack Stickel Collection. (#1570)
- 4102 1814 Plain 4 Environmental Damage NGC Details. AU. S-295, B-2, R.1. Breen Die State III. Prominently clashed near Liberty's profile. This final Sheldon variety example shows only light high-point wear, but the medium brown surfaces show intermittent moderate granularity. Nearly void of abrasions. MRB VF30. From The Jack Stickel Collection.
- 4103 1816 MS64 Brown PCGS. CAC. N-2, R.1. The Randall Hoard is responsible for most surviving Mint State 1816 through 1820 large cents. Those of 1816 are the N-2 variety like the example offered here. The rim breaks at the upper right obverse and the recut N in ONE are the identifying features. This piece has lustrous olive-brown surfaces with hints of original mint red. MRB MS60. (#1591)
- 4104 1819 Small Date MS63 Brown PCGS. N-8, R.1. A beautiful chocolate-brown Matron Head cent, nicely struck and undisturbed by contact or carbon. This pleasing type coin is encapsulated in an old green label holder. MRB MS60.(#1606)
- 4105 1820 Large Date MS65 Brown NGC. CAC. N-13, R.1. The usual die state with a bold crack throughout the date and stars. A Randall Hoard Gem with dazzling luster and a nearly mark-free appearance. Considerable brick-red co-exists with gunmetal-blue and olive-green. The few small spots are typical for the variety. MRB MS62. From The Scott Cedars Collection. (#1615)

# 1820 Large Date Cent, MS67 Brown Superb Example From the Randall Hoard

4106 1820 Large Date MS67 Brown NGC. N-13, R.1. The familiar die marriage with a heavy obverse die crack and a multiply punched L in LIBERTY. This variety appeared in some quantity within the Randall hoard, but is also nearly invariably spotted. The present Superb Gem provides an exception, since the undisturbed, highly lustrous surfaces are essentially carbon-free. Glimpses of the initial Mint red color emerge here and there. MRB MS63. Census: 5 in 67 Brown, 0 finer (3/11). (#1615)

4107 1822 MS62 Brown NGC. N-11, R.3. A satiny deep brown Matron Head cent with smooth, glossy surfaces aside from minor contact on the cheek. The stars are mostly lightly impressed, but the remainder of the strike is bold. MRB AU50. From The Jack Stickel Collection. (#1624)

#### Challenging Choice VF 1823 Cent Normal Date N-2

- 4108 1823 VF35 PCGS. CAC. N-2, R.2. The medium brown and gunmetal-gray surfaces are nicely defined and lack consequential marks. This middle die state example features a break within, but not past, the dentils near star 5. The 1823 is a much better date, and all three die varieties (overdate, normal date, and restrike) receive separate *Guide Book* listings. In better grades, the normal date N-2 is the scarcest of the three. MRB VF20. From The Scott Cedars Collection. (#1627)
- 4109 1824/2 XF45 PCGS. N-1, High R.1. The later die state with die cracks encircling the reverse. A deep brown Choice XF overdated Matron cent with attractive, unblemished surfaces. The design highpoints display only moderate wear. MRB VF30. From The Scott Cedars Collection. (#1639)

## 1825 N-2 Cent, MS63 Brown Elusive in High Grades

- 4110 1825 MS63 Brown PCGS. CAC. N-2, R.2. High grade 1825 Coronet cents of all varieties are rare, and this piece is a splendid representative with golden-tan, olive, and steel toning on the obverse and light brown on the reverse. A few small marks are evident on the cheek and elsewhere. Overall, a highly attractive example of the N-2 die marriage that is easily among the top 20 examples known. Population: 14 in 63 Brown, 5 finer (3/11), for all 1825 varieties. MRB AU55. (#1642)
- 4111 1826 MS64 Brown NGC. N-6, R.2. Fully lustrous with dark brown surfaces and deeply faded mint color on each side, this 1826 cent has pleasing surfaces and excellent eye appeal. A rim break joins the dentils over stars 7 and 8. Census: 17 in 64 Brown, 7 finer (3/11) for all 1826 varieties. MRB AU55.(#1645)
- 4112 1829 Large Letters AU58 PCGS. CAC. N-2, Low R.2. This beautiful near-Gem has comprehensive satin luster and an exceptionally mark-free appearance. Slight friction on Liberty's facial curls and the upper leaves of the wreath are all that preclude an Uncirculated assessment. MRB AU50. From The Scott Cedars Collection. (#1663)
- 4113 1830 Large Letters MS64 Brown NGC. N-4, Low R.3. Grellman Die State a. The N-4 variety is famous for its "inner circle" obverse. Rich reddish overtones on brown surfaces which have a mild gloss. A slight double profile is evident. MRB AU55.(#1672)

4114 1831 Large Letters MS64 Brown PCGS. CAC. N-1, R.1. A bold peripheral obverse die crack helps attribute the Newcomb marriage. This olive-brown Choice cent has booming luster, and the major motifs are well struck. We note only occasional wispy marks and a small spot left of the O in ONE. MRB AU55. From The Scott Cedars Collection. (#1678)

# 1831 Medium Letters Cent, MS66 ★ Brown N-3, Glossy Surfaces

4115 1831 Medium Letters MS66 ★ Brown NGC. N-3, R.1. Many of the letters in LIBERTY are recut, as is the top of the E in CENT. A lovely, highly luminous chocolate-brown Premium Gem with plum-mauve undertones. Although most of the stars lack full centrils, the major devices are well struck. A thin mark above the N in ONE provides an identifier, but hardly detracts from the breathtaking beauty of this piece. NGC has certified seven 1831 cents as MS66 Brown, but only the present piece has in addition received a Star designation. MRB MS63. PCGS has certified none above MS65 (3/09).

Ex: Joshua and Ally Walsh Collection of United States Cents (Heritage,

4116 1834 Large 8, Large Stars, Medium Letters VF35 NGC. N-5, R.5. The rare N-5 variety merits a separate Guide Book listing, as it is the sole 1834 Large 8, Large Stars obverse paired with a Medium Letters reverse. The present chocolate-brown representative has attractive surfaces with the slight peripheral softness of impression customary for N-5. MRB VF25. From The Jack Stickel Collection. (#1702)

1/2006), lot 614, which realized \$6,325. (#1681)

#### Gem Red and Brown N-8 1837 Cent Medium Letters, Plain Hair Cords

- 4117 1837 Plain Cords, Medium Letters MS65 Red and Brown PCGS. CAC. N-8, R.1. Bold obverse dentils and die scratches above the RI in AMERICA separate N-8 from N-7, which was struck from the same dies but in a later state. This is a pleasing Gem that boasts significant fire-red in design recesses. The open fields and portrait are toned brown. Sharply struck except for the left-side stars. MRB MS63. (#1736)
- 4118 1838 MS64 Brown PCGS. N-7, R.1. A die scratch from a leaf to the F in OF identifies the Newcomb variety. Mahogany-brown and olive toning enrich this satiny and mark-free near-Gem. A slightly granular cherry-red area is noted on the obverse at 12 o'clock. MRB MS60.

From The Scott Cedars Collection. (#1741)

#### High Grade N-2 1838 Cent MS66 Red and Brown

- 4119 1838 MS66 Red and Brown NGC. CAC. N-2, R.1. A lustrous high grade cent that is essentially unabraded and has only a single pinpoint spot beneath the E in ONE. Brick-red is intermingled with medium brown. About half of the stars are well struck. The fields display an orange-peel texture, as coined from long-in-use dies. MRB MS64. (#1742)
- 4120 1839/6 VG10 PCGS. CAC. N-1, High R.3. Five different busts were used on 1839-dated cents. N-1 is the sole Plain Cords variety, and is also the only overdate from the 1830s. This deep chocolate-brown example lacks consequential marks and has just a whisper of surface granularity. MRB VG8.
  From The Scott Cedars Collection.(#1756)
- 4121 1839 Booby Head MS63 Brown PCGS. CAC. N-5, R.1. A lustrous example, this piece exhibits pleasing golden-tan surfaces with dark blue toning around the devices. This piece is sharply detailed with only trivial surface marks. MRB MS60. (#1751)

# 1839 N-6 Booby Head Cent MS63 Red (Mostly) and Brown

- 4122 1839 Booby Head MS63 Red and Brown PCGS. N-6, R.2. Light repunching on star 9 and a tiny die chip near star 10 help attribute this Booby Head cent, a design subtype coined only in 1839. This lustrous representative is predominantly fire-red, although blushes of apple-green are found at the centers. Marks are limited to a few trivial hairlines on the lower left obverse field. MRB MS63. (#1752)
- 4123 1840 Large Date MS63 Brown NGC. CAC. N-5, R.1. Grellman Die State c. A lovely golden-brown representative with shimmering luster and no noticeable abrasions. The stars are lightly impressed, but the major devices are boldly struck. MRB AU50. From The Scott Cedars Collection.(#1820)
- 4124 1840 Small Date MS64 Brown PCGS. N-1, R.2. A middle die state with the recutting at the lower left corner of the 8 faded but still visible. Reverse die lines are unapparent on this specimen. Both sides have traces of mint red with olive-brown toning. A pleasing example with a subdued cartwheel appearance. Population: 6 in 64 Brown, 1 finer (3/11). MRB MS60.(#1823)
- 4125 1843 Mature Head, Large Letters MS63 Brown PCGS. CAC. N-5, R.1. This sharply detailed piece has satin luster with light tan surfaces and traces of darker toning. A few small toning spots are evident on each side. MRB MS60.(#1850)

- 4126 1846 Small Date XF45 NGC. N-23, Low R.6. Only about two dozen examples of this rare 1846 cent variety are known and the present piece just misses the condition census. It is an attractive piece with pleasing olive-brown surfaces and minor circulation marks. MRB VF20.(#1865)
- 4127 No lot.

### LARGE CENTS

- 4128 1848 MS64 Brown NGC. N-2, High R.1. Grellman Die State b. Mahogany and powder-blue undertones emerge when this deep brown near-Gem is rotated beneath a light. Satiny and essentially unabraded with exemplary preservation. Well struck aside from a few star centrils. MRB AU50. From The Scott Cedars Collection. (#1883)
- 4129 1848 MS65 Brown NGC. N-12, R.1. Grellman Die State b. Generally chocolate-brown, but mint red is noticeable near design crevices, especially on the reverse. Well preserved and beautiful. MRB MS63.

Ex: J.R. Grellman, who recorded the grade as 63 and noted its Condition Census as tied at #7.

From The Jack Stickel Collection.(#1883)

- 4130 1851 MS65 Red and Brown PCGS. CAC. N-29, R.2. Considerable original orange mint luster is visible alongside bluishbrown toning. A full cartwheel appearance is evident on each side. Tiny die lumps above the E in LIBERTY are characteristic of this variety. MRB MS63.(#1893)
- 4131 1852 MS65 Red and Brown PCGS. CAC. N-22, R.1. Faint die cracks at the upper left part of the obverse identify the N-22 die marriage. This pleasing example retains considerable mint red with lilac and brown toning, a shade deeper on the reverse. MRB MS63. (#1899)

# 1852 Braided Hair Large Cent, MS65 Red Great for Type Purposes

- 4132 1852 MS65 Red PCGS. N-8, R.2. A gorgeous, radiant Gem, the surfaces display appreciable cartwheel effects over rich cherry-red luster. The central devices are boldly defined and both sides are equally free of grade-limiting distractions. A conditionally scarce example for the high quality copper collector. Population: 16 in 65 Red, 2 finer (3/11). MRB MS65. (#1900)
- 4133 1853 MS66 Red and Brown NGC. N-25, R.1. Grellman die state b. Light repunching under the base of the 1 in the date identifies this variety. Closer to Red than Brown, although the cheek and wreath are toned. A few stars are lightly impressed, as is usually the case, but the rest of the details are fully defined. Housed in an old NGC holder. MRB MS63.

Ex: Baltimore ANA Signature (Heritage, 7/2008), lot 1077. (#1902)

4134 1855 Upright 5s MS66 Brown PCGS. CAC. N-4, R.1. Grellman Die State a. Medium brown surfaces offer steel-blue overtones. Strongly defined except on the upper left obverse, and housed in an old green label holder. MRB MS63.(#1907)

# 1855 Large Cent, MS65 Red Upright 5s, N-4 Variety

4135 1855 Upright 5s MS65 Red PCGS. CAC. N-4, R.1. Grellman Die State a. The 1855 N-4 cent is undoubtedly the most plentiful of all 1855 large cents. A substantial hoard of the early die state pieces once appeared, providing plenty of Mint State examples today, but seldom do specimens display the high quality of this piece. The design elements on both sides are boldly defined, and the surfaces have intense mint frosty with brilliant orange luster. Few marks are evident, and only the smallest flyspecks are visible, and those can only be seen with a glass. Population: 77 in 65 Red, 13 finer (3/11). MRB MS64. (#1909)

# MS65 Brown 1856 Slanted 5 Cent, N-18 Important Late Transitional State

4136 1856 Slanted 5 MS65 Brown PCGS. CAC. N-18, R.1. Grellman Die State c/d, showing non-trivial beginnings of the die cud that was described by Grellman as "unique." Surfaces rough on both obverse and reverse, a die pair signature, and the lines at the TY of LIBERTY remain strong. Deep blue-violet surfaces show glimpses of bright copper-orange mainly near the rims. MRB MS63. (#1922)

#### PROOF LARGE CENT

#### 1855 N-10 Cent, PR64 Red and Brown

4137 1855 PR64 Red and Brown PCGS. N-10, R.5. This variety is R.1 as a business strike, and R.5 as a proof. Probably about five dozen are known in all grades. This pleasing piece in a first-generation PCGS holder has fully mirrored fields with splashes of orange mint color and considerable bluish-brown toning. The obverse border has a small area of greenish corrosion below the date. A dark spot is located above the left serif of the E in LIBERTY. MRB PR60. Population: 4 in 64 Red and Brown, 2 finer (3/11). (#1995)

#### **FLYING EAGLE CENTS**

- 4138 1858 Small Letters MS64 PCGS. Low Leaves, Closed E. Deep sunset-orange surfaces show occasional accents in rose and gold. Luminous with a small dot of deeper color under the final digit of the date.(#2020)
- 4139 1858 Small Letters MS64 PCGS. Eagle Eye Photo Seal. Ex: Chiro. High Leaves, Closed E. A bold strike with only a hint of blending on the ends of the tail feathers. Moderately prooflike and attractively preserved with predominant orange-yellow color but also prominent lavender-blue accents.(#2020)

#### **INDIAN CENTS**

4140 1859 MS64 PCGS. Bright mint luster glows over both sides and slight reddish and lilac patina is evenly distributed throughout. Well struck with a few tiny specks of carbon.(#2052)

# 1860 Pointed Bust Indian Cent, MS65 Pleasing, Slightly Mellowed Surfaces

- 4141 1860 Pointed Bust MS65 PCGS. The 1860 Pointed Bust is the missing link between the one-year 1859 type and the Shield Reverse. All 1859 cents have a Pointed Bust, while the Rounded Bust constitutes the sizable majority of 1860 cents. Apparently, a few undated obverse dies were left over from 1859 and put into use after the types of 1860 were introduced. This sharply struck and satiny honey-gold Gem is splendidly preserved. Clash marks from the headdress (as made) outline the inner right half of the wreath. Population: 28 in 65, 6 finer (3/11). (#2056)
- 4142 1860 MS65 PCGS. Well struck save for weakness on the lower portion of the Indian's portrait. Tan surfaces are well-preserved with beautiful luster on both sides of this appealing copper-nickel cent.(#2058)
- 4143 1861 MS65 NGC. Uncommonly rich toning for this coppernickel issue. Luminous surfaces are muted copper-orange at the borders with strong lavender overtones through the centers. (#2061)
- 4144 1862 MS65 NGC. The obverse has booming cartwheel luster, while the reverse appears prooflike. This Civil War Gem is fully struck, and its sole imperfection is a speck of carbon above the N in CENT.(#2064)
- 4145 1862 MS66 NGC. Almond-gold shades dominate this lustrous copper-nickel Civil War cent. Well struck through the centers but with selected softness on the tips of the feathers. Census: 32 in 66, 6 finer (2/11).(#2064)
- 4146 1866 MS65 Red and Brown PCGS. The dusky obverse more copper-orange "Red," the luminous reverse more walnut "Brown," this Gem's color designation splits the difference. Well struck and appealing for this post-Civil War issue.(#2086)
- 4147 1866 MS66 Red and Brown NGC. CAC. A satiny and nicely struck Indian cent that lacks any indication of contact and displays only infrequent pinpoint carbon. Lightly toned, but still principally orange-gold.(#2086)

4148 1867 MS65 Red and Brown NGC. Eagle Eye Photo Seal, card included. The orange-gold color has slightly mellowed with lavender and violet elements. A satiny Gem with moderate carbon and virtually no indication of marks. A retained die break at 2 o'clock on the reverse will be of significant interest to the specialist. Coined from moderately rotated dies, and encased in a former generation holder.

Ex: Long Beach Signature (Heritage, 6/2005), lot 5138. (#2089)

# 1867/67 Snow-1 Cent, MS64 Red and Brown Popular Repunched Date Variety

- 4149 1867/67 MS64 Red and Brown PCGS. Snow-1. This repunched date ranks among the sharpest in the series, perhaps only behind the 1894/94. The entire date of this popular variety is repunched, most prominent above the 67. This piece has considerable mellow orange mint luster with hints of olive and blue. The reverse has a planchet defect that affects the upper part of the shield. Population: 14 in 64 Red and Brown, 4 finer (3/11). (#92089)
- 4150 1868 MS65 Red and Brown PCGS. Dusky copper-orange and violet hues mingle on each side of this postwar Gem. Strongly struck overall with faint but complete diamonds on the ribbon. (#2092)
- 4151 1869 MS61 Brown PCGS. This sharply struck and prooflike Indian cent has deep brown toning and an absence of visible marks or spots. Among the lowest mintage dates in the series. (#2094)
- 4152 1869 MS64 Red and Brown PCGS. Ex: The Connelly Collection. Rich mahogany and deep sunset-orange hues mingle on this marvelous near-Gem. An immensely lustrous and well-defined paragon of fiery eye appeal.(#2095)
- 4153 1869 MS64 Red and Brown PCGS. Deep blue-to-violet hues prevail over each side, but enough ruby and copper-orange luster remains to keep the piece off a fully "Brown" designation. Gorgeously patinated in any instance with well-kept surfaces. (#2095)

## Gem Red and Brown FS-301 1869/69 Indian Cent

4154 1869/69 MS65 Red and Brown NGC. CAC. Snow-3a, FS-301. Eagle Eye Photo Seal, card not included. Snow-3 was once considered an 1869/8 overdate, and remains popular due to its continued separate *Guide Book* listing. This lustrous and unabraded Gem approaches full Red, although the color is slightly mellowed and the borders display moderate carbon. Struck from prominently clashed dies. (#2095)

- 4155 1870 MS63 Brown PCGS. Bold N in ONE. Deep brown surfaces show occasional reddish overtones. A luminous example that is perhaps best appreciated in person, for the eye appeal is better than the Select grade might suggest. Population: 16 in 63 Brown, 27 finer (3/11).(#2097)
- 4156 1871 MS64 Red and Brown PCGS. Eagle Eye Photo Seal, card not included. Bold N in ONE. The borders retain their initial pumpkin-gold, while the portrait and left obverse field are brown. Void of any contact, although a small spot is on the E in LIBERTY. (#2101)
- 4157 1873 Open 3 MS65 Red and Brown PCGS. Copper-gold luster exhibits traces of light tan patina. An exquisitely struck piece, though a light mark but ultimately grade-defining mark is visible on the cheek. Population: 53 in 65 Red and Brown, 3 finer (3/11). (#2107)
- 4158 1873 Open 3 MS64+ Red PCGS. CAC. Strong copperorange and brick-red luster with occasional dots of deeper color. Remarkably close to Gem status, though a depression of ambiguous origin is noted to the right of the E in ONE on the reverse. (#2108)
- 4159 1873 Closed 3 MS64 Red PCGS. Locating full Red examples of the Closed 3 is challenging. The surfaces of this near-Gem are a light copper-gold, and an impressive strike results in sharp definition on the design elements, save for softness on some of the feather tips. A spot is noted on the E in ONE, but this piece has good eye appeal nonetheless. Population: 16 in 64 Red, 16 finer (3/11).(#2111)

#### Red Gem 1874 Indian Cent Unabraded Surfaces

4160 1874 MS65 Red PCGS. A lustrous wood-grain Gem with hints of cherry on the obverse and olive on the reverse. The strike is bold, and surface imperfections are limited to a small reverse spot near 3 o'clock. Housed in a green label holder. Population: 29 in 65 Red, 5 finer (3/11). (#2120)

# 1875 Indian Cent, Bright Reddish-Golden MS66 Tied for Finest Certified

4161 1875 MS66 Red NGC. The surfaces are ablaze with reddishgolden luster that highlights the rich cartwheel sheen. Boldly, if not
absolutely fully struck throughout, both sides are smooth from rim to
rim. This example displays repunching south at the bases of the 1 and
8 in the date. NGC and PCGS combined have seen just 141875 cents
in MS66 Red, and there is not a single specimen finer (3/11).
Ex: 2009 Central States Auction (Heritage, 4/2009), lot 1123.
(#2123)

- 4162 1876 MS65 Red and Brown PCGS. More Red than Brown with just a few areas of violet among the copper-orange and sunset-red hues on each side. Generally smooth and attractive. Population: 62 in 65 Red and Brown, 1 finer (3/11).(#2125)
- 4163 1877 Fine 12 PCGS. Deep chocolate-brown surfaces show few significant marks, though a nick on the first S in STATES has turned up fresh copper. The letters in LIBERTY are all outlined, though to varying levels of readability. A great key-date cent for a Fine to Very Fine set.(#2127)
- 4164 1877 VF20 NGC. Deep cinnamon-brown surfaces are moderately worn, but the letters in LIBERTY are completely readable. The weak lower corner on the N in ONE attests to this coin's business-strike origin.(#2127)

## 1877 Indian Cent, XF45 Sought-After Key

4165 1877 XF45 NGC. The low mintage of 852,500 pieces, and a low survival rate, make the 1877 Indian cent the rarest issue of the series. This glossy brown specimen displays some high-point wear, and a scattering of minor contact marks, but all lettering is easily legible and the overall appearance is quite attractive. (#2127)

#### MS60 Sharpness 1877 Indian Cent Rarest Date of Series

- 4166 1877 —Cleaned— ANACS. MS60 Details. Shallow N, characteristic of business strikes of this series key. The obverse is apple-green and orange-tan, while the reverse is rose-red and olive. Although recolored, the present example is unworn and satiny with minimally marked surfaces.
- 4167 1886 Type Two MS64 Red and Brown PCGS. Eagle Eye Photo Seal, card not included. Apple-green centers are bounded by orange-red. Carbon-free, unabraded, and sharply struck save for the curl on Liberty's shoulder. (#92155)

## 1894 Indian Cent, MS65 Red Doubled Date Variety

4168 1894 Doubled Date MS65 Red NGC. Snow-1, FS-301. A Top 5 Variety. The remains of the repunched date are easily visible to the upper right of the primary date. This Guide Book variety is one of the most sought-after, valuable varieties of the series. The present coin is a sharply detailed Gem, with original red surfaces and fiery mint luster. Census (FS-301): 6 in 65 Red, 1 finer (3/11). (#92189)

# 1895 Indian Cent, MS66 Red Ex: Ally Collection

- 4169 1895 MS66 Red PCGS. Ex: Ally Collection. This extraordinary Premium Gem Indian cent features blazing red surfaces, with only a few pinpoint specks in the obverse field. The design elements are sharply detailed, and the unmarked surfaces are brightly lustrous. Population: 33 in 66 Red, 3 finer (3/11). (#2192)
- 4170 1896 MS66 Red NGC. Rich, dusky orange and peach hues dominate the eye appeal of this satiny Premium Gem, though the colors rarely approach Brown territory. A trifle softly struck on peripheral elements, though the diamonds on the ribbon are better-defined. Census: 14 in 66 Red, 4 finer (3/11).(#2195)
- 4171 1902 MS66 Red PCGS. This beautiful Premium Gem sports frosty, somewhat mattelike surfaces from fresh dies, with even, consistent tan-gold surfaces complementing a small crescent of deep purple and jade along the right rims on each side. The small surface area affected, probably no more than 5%, keeps this piece well within the Red confines, but the accents gives it "keeper" character. Population: 44 in 66 Red, 9 finer (3/11).(#2213)

1905 Indian Cent, MS66 Red

4172 1905 MS66 Red PCGS. This sharply detailed Premium Gem offers sharply detailed design elements, with the slightest touch of softness on the feather tips. The surfaces are mint red, with no bothersome copper spots, and few signs of contact. Housed in a green label holder. Population: 37 in 66 Red, 0 finer (3/11). (#2222)

4173 1908-S MS65 Red and Brown PCGS. More Red than Brown, though mahogany and blue-violet elements against the coppergold surfaces render the designation accurate. In any event, an attractive Gem that is well struck with four full diamonds on the ribbon. Population: 93 in 65 Red and Brown, 4 finer (3/11). From The Dr. Donald M. Gilner Collection. (#2233)

## 1908-S Indian Cent, MS66 Red None Finer at PCGS

- 4174 1908-S MS66 Red PCGS. Subtle golden bronze color with a hint of green encircles the devices of this Gem, while the centers show a woodgrain toning pattern with copper highlights. Reasonably well struck, with exceptionally smooth surfaces. An attractive Premium Gem example of this semi-key date. Population: 33 in 66 Red, 0 finer (3/11). (#2234)
- 4175 1909-S VG10 NGC. Just the tops of the first four letters in LIBERTY are visible, though the last three are half-present. Rich chocolate-brown surfaces are largely unabraded, making this a great example for the collector seeking a worn but attractive example. (#2238)
- 4176 1909-S MS64 Red and Brown PCGS. A luminous copper-orange and mahogany-brown near-Gem from the second and final S-mint Indian cent issue. Softly struck at the feather-tips but with fully outlined diamonds on the ribbon.(#2239)

# Gem Red and Brown 1909-S Cent Lowest Mintage of Series

4177 1909-S MS65 Red and Brown PCGS. CAC. Eagle Eye Photo Seal, card not included. A lustrous olive-gold and chestnut Gem of this coveted issue. Only the upper feather tips lack an exacting strike, and surface imperfections are limited to distributed peripheral pinpoint carbon. The 1909-S has less than half the mintage of the famous 1877 cent. (#2239)

# 1909-S Indian Cent, MS65 Red and Brown Significant Mint Red Remaining

4178 1909-S MS65 Red and Brown PCGS. The woodgrain-effect often seen on S-mint Indian and Lincoln cents from 1909 is only slightly evident on this piece. A streak of pale blue across the headdress is the only area of non-Red we see on this lovely key to the Indian cent series. The strike is better defined than usual on the ends of the feathers in the headdress. (#2239)

#### Choice Red 1909-S Indian Cent First Generation Holder

4179 1909-S MS64 Red PCGS. Pumpkin and wheat shades alternate across this lustrous and unmarked near-Gem. A good strike with slight blending on the feather tips. A few pinpoint flecks are of little import. The lowest mintage regular issue small cent. Encased in a first generation holder. (#2240)

# PROOF INDIAN CENTS

- 4180 1868 PR64 Red PCGS. Mellow orange-red surfaces on this well-struck piece reveal only a few minor flecks that likely preclude an even finer grade. An elusive proof issue of only 600 pieces and few Red examples graded makes this near-Gem among the finer survivors today. Population: 28 in 64 Red, 9 finer (3/11). (#2293)
- 4181 1870 PR64 Red PCGS. Shallow N. Copper-gold and orange surfaces have remained remarkably bright despite the passage of more than 140 years. Excellent detail with just a few small grade-defining dots in the portrait area. Population: 30 in 64 Red, 27 finer (3/11).(#2299)

# Gem Proof Red 1875 Indian Cent Only Two Finer With Red Surfaces

4182 1875 PR65 Red PCGS. Only 700 proof Indian Head cents were minted in 1875, and examples with red color are very rare. The present coin is an attractive Gem, with original red surfaces in most areas, and just a touch of light brown on the devices. The mirrored fields show a few traces of contact, none worthy of individual mention. Population: 12 in 65 Red, 2 finer (3/11). (#2314)

#### Red and Brown Choice Proof 1877 Cent

- 4183 1877 PR64 Red and Brown PCGS. Bold N, diagnostic for proofs. Cherry-red, orange-gold, and sea-green embrace this boldly struck near-Gem. The obverse is satiny, while the reverse is deeply mirrored. No carbon is visible, even when studied under a lens. An important specimen of this coveted series key. (#2319)
- 4184 1879 PR66 ★ Red and Brown NGC. Beautiful cherry-red, peach, and jade-green endow the obverse. The reverse is primarily pumpkin-gold with glimpses of rose and aqua. A razor-sharp specimen with flashy mirrors and noticeable (but undesignated) cameo contrast.(#2325)
- 4185 1881 PR66 Brown PCGS. CAC. "Brown" here actually translates to lovely magenta, jade, and canary-yellow on the obverse of this pristine Premium Gem proof, a fully struck example of this mintage of 3,575 cents for the year. The reverse displays mostly aqua color. Population: 11 in 66 Brown, 0 finer (3/11).(#2330)
- 4186 1881 PR66 Brown PCGS Secure. This deep brown Premium Gem displays ocean-blue and olive-gold once rotated beneath a light. A razor-sharp representative of this Garfield-era proof issue.
- 4187 1883 PR66 Red NGC. Bright, even orange-red endows both sides of this splendid high grade proof. Deeply mirrored fields and luminous motifs combine to provide noticeable contrast, although this older holder example is undesignated as Cameo. One small obverse spot at 5:30. Census: 6 in 66 Red, 5 finer (3/11). Ex: Alex Highland Collection (Heritage, 6/2002), lot 5221. (#2338)
- 4188 1885 PR66+ Red and Brown PCGS Secure. Deep fire-red and lavender consumes the obverse, with glimpses of sun-gold and apple-green also evident. The reverse is primarily cobalt-blue. A razor-sharp and carbon-free high-grade proof.(#2343)
- 4189 1893 PR66 Red and Brown NGC. Though roughly half the surface area on this Premium Gem proof is toned dusky peach and mahogany, the rest of the coin is bright copper-gold with ample reflectivity. Sharply defined with an unusual but engaging appearance.(#2367)

- 4190 1905 PR66 Red and Brown PCGS. CAC. Bold lime, orange, and magenta hues dominate the eye appeal of this still-flashy Premium Gem specimen. A gorgeous and carefully preserved survivor from late in the proof series. Population: 18 in 66 Red and Brown, 2 finer (3/11).
  - From The Peter Kevorkian Collection. (#2403)
- 4191 1907 PR66 Red and Brown PCGS Secure. Magnificently toned with blended ruby-red and cherry-red on the obverse, while the reverse is orange-red with lilac and apple-green near the rim. Carbon-free and undisturbed by contact. The lowest-mintage post-1877 proof date.(#2409)
- 4192 1907 PR66 ★ Red NGC. Cherry-red and peach-gold adorn the obverse field, while the reverse displays ruby-red and apple-green. The portrait is frosty and exhibits blatant cameo contrast, which likely the reason for the NGC star designation.(#2410)

#### LINCOLN CENTS

# MS66 Red Doubled Die Obverse 1909 VDB Cent, FS-1101

- 4193 1909 VDB Doubled Die Obverse, DDO-001 MS66 Red PCGS. CAC. FS-1101. The RTY in LIBERTY and the 190 in the date are nicely die doubled. The peach-gold color appears unchanged despite the passage of more than a century, and the lustrous fields and devices display only minimal contact and carbon. Population: 11 in 66 Red, 1 finer (3/11). (#82425)
- 4194 1909 VDB Doubled Die Obverse, DDO-002 MS66 Red PCGS. FS-1102. Cherrypickers' states that "the doubling on this variety is evident as extra thickness on all obverse letters and numbers." The 9s in the date are especially thick. This variety should not be confused with the better known 1909 doubled die obverse, FS-1101. Orange-red and lustrous with a crisp strike and only minor obverse imperfections. (#37636)
- 4195 1909-S VDB VF35 PCGS. A Choice VF example of the popular first-year key with rosewood accents through the brown centers and a few small areas of encrustation near the rims. Solid all-around eye appeal for the grade range.

  From The Dustim (Dusty) Lee Gibson Collection. (#2426)
- 4196 1909-S VDB VF35 ANACS. A Choice VF example of the series key that should make an excellent capstone for a VF to XF collection. Golden-brown surfaces are glossy and delightful despite the light to moderate wear present. Housed in a small-format ANACS holder.(#2426)
- 4197 1909-S VDB VF35 PCGS. Faint golden overtones visit deep brown surfaces that are moderately worn. Spotting is noted at the obverse margins and the fields of the dusky reverse, yet the overall eye appeal is solid.(#2426)
- 4198 1909-S VDB XF40 ANACS. A lovely collector example of this widely pursued low mintage date. The tan-brown fields and devices lack remotely relevant marks, and spots are equally absent. From The Dustim (Dusty) Lee Gibson Collection. (#2426)

- 4199 1909-S VDB XF40 NGC. Light brown surfaces, with only light wear on the devices, and few signs of contact make this specimen a pleasing representative of the most famous date of this long series. The all-important initials are plainly visible to the naked eye. (#2426)
- 4200 1909-S VDB XF45 PCGS. This charming golden-brown Choice XF cent displays all major design detail and is free from mentionable marks. Traces of luster lurk within protected areas. (#2426)
- 4201 1909-S VDB XF45 NGC. This moderately circulated goldenbrown example is void of relevant contact, although a few tiny gray spots are present near ONE CENT. A key date coveted in all grades. (#2426)
- 4202 1909-S VDB AU50 ANACS. Much luster remains on the woodgrain surfaces of this well-struck key coin. Glimpses of gold peek out from under the prevailing medium brown color. A solid AU example.

  From The Dustinn (Dusty) Lee Gibson Collection. (#2426)
- 4203 1909-S VDB AU50 PCGS. Light violet and gold accents visit rich oak-brown surfaces for this key-date Lincoln cent. Modestly worn with a subtle woodgrain pattern on faintly abraded surfaces. (#2426)
- 4204 1909-S VDB AU50 PCGS. Light wear on the cheekbone and above the ear indicates brief circulation, but this olive-brown representative is smooth aside from a hair-thin vertical line on Lincoln's shoulder.(#2426)
- 4205 1909-S VDB AU53 NGC. A coruscating medium brown cent that boasts a sharp strike and bold VDB initials. Smooth aside from a few faint marks on the right obverse field. The traditional key to the series.(#2426)
- 4206 1909-S VDB AU55 ANACS. A boldly struck and completely problem-free example of this famous introductory issue. A single tiny spot is present above the O in ONE.

  From The Dustinn (Dusty) Lee Gibson Collection. (#2426)
- 4207 1909-S VDB AU55 NGC. Lincoln's jaw and cheekbone show a hint of friction, but satin luster dominates the fields. An unmarked and boldly struck low mintage and introductory-year cent. (#2426)
- 4208 1909-S VDB AU55 PCGS. Golden-brown and lime-green blend throughout this satiny and richly detailed key date cent. Minor faded marks are noted behind Lincoln's shoulder and above the T in UNITED. Housed in a first generation holder. (#2426)
- 4209 1909-S VDB AU58 NGC. This momentarily circulated key-date cent is interesting for its bold clash marks near Lincoln's bowtie. Toned ocean-blue and tan on the obverse. The reverse is orangerusset and sea-green.(#2426)
- 4210 1909-S VDB Altered Color— NGC Details. Unc. Well-defined with no trace of wear. Though the pink-yellow and green-brown color on each side is "off," this key-date coin should still find a home with an appreciative bidder.
- 4211 1909-S VDB MS62 Brown NGC. CAC. A pleasing MS62 example of the most sought-after issue of the series. This specimen features sharply detailed devices and smooth brown surfaces, with hints of original red, and slightly subdued luster.(#2426)
- 4212 1909-S VDB MS63 Brown PCGS. Smooth rosewood and mahogany hues with a strong copper-orange overtone to the obverse. Well struck and attractive for the date, and housed in a first-generation holder.(#2426)
- 4213 1909-S VDB MS62 Red and Brown PCGS. Honey-gold, seagreen, and lilac intersperse throughout this thoroughly lustrous and boldly struck key date cent. The grade is limited solely by a trio of wispy lines beneath the ST in TRUST.(#2427)

## Premium-Quality 1909-S VDB Cent Gem Red and Brown

4214 1909-S VDB MS65 Red and Brown PCGS. CAC. This Gem Red and Brown 1909-S VDB seems worthy of a premium bid, confirmed not only by the CAC label but also by the superior surface quality. The obverse is brick-orange in the fields, tending to cherry and violet, with some brown high points. The reverse is more red than brown, and the strike is full throughout. A loupe reveals only a single tiny fleck behind the head. Among the nicest Red and Brown pieces available, and quite cost-effective compared to a Gem Red specimen. PCGS has seen 30 Red and Brown submissions finer (3/11). (#2427)

#### Dynamic Red and Brown Gem 1909-S VDB Cent

4215 1909-S VDB MS65 Red and Brown NGC. Peach-red borders encompass lime-green centers. This lustrous and fully struck Gem has beautiful color that approaches full Red. Only minute flecks and marks preclude a higher grade. A lovely example of the most famous issue of the series. (#2427)

# 1909-S VDB Cent, MS64 Red Characteristic Color and Slight Woodgrain Texture

4216 1909-S VDB MS64 Red PCGS. The bright yellow-reddish mint luster with a slight woodgrain texture is commonly seen on 1909-S cents of both design types, but we cannot think of another issue this is common to. The striking details are sharp over both sides with only a few specks of carbon that prevent an even higher grade. (#2428)

4217 1909-S MS65 Red PCGS. The mint luster glows with yellow-red color and the striking details are fully brought up on each side of this impressive Gem.(#2434)

- 4218 1909-S MS65 Red PCGS. CAC. This Gem is fully brilliant with golden mint luster and bold design definition. A few richer toning splashes near the margins on each side do little to diminish the excellent eye appeal.(#2434)
- 4219 1909-S S Over Horizontal S MS65 Red PCGS. FS-1502. A dramatic repunched mintmark that would be even more popular if not for the difficulty in finding high-end 1909-S cents. Swirling luster is pale copper-gold with a few dots down the right side of the obverse.(#92434)
- 4220 1909-S S Over Horizontal S MS65 Red PCGS. FS-1502. Booming luster and a mark-free appearance proclaim the quality of this wheat-gold Gem. Only faint carbon is present. The strike is full save for slight blending on the reverse margin near 10:30. (#92434)
- 4221 1910 MS66 Red PCGS. CAC. Rich copper-orange luster is satiny yet bright on each side. The color of the well struck reverse is a trifle lighter, but both sides are firmly ensconced in the "Red" category. PCGS has graded only 19 numerically finer Red representatives (3/11).(#2437)

#### Exceptional MS66+ Red 1911 Cent

- 4222 1911 MS66+ Red PCGS. CAC. A spectacular peach-gold and sun-yellow cent with carbon-free and unabraded surfaces. Precisely struck and thoroughly lustrous. Third party services have certified a few finer, but it is doubtful that their eye appeal could significantly surpass that of the present lot. Population: 1 in 66+ Red, 8 finer (3/11). (#2443)
- 4223 1914-D XF40 PCGS. This medium brown key date cent displays even, moderate wear and lacks any consequential abrasions. A cluster of faint streaks is present above the date.(#2471)
- 4224 1914-D AU50 PCGS. Muted luster is scarcely visible on the medium brown surfaces of this second key-date Lincoln cent, with a few darker charcoal flecks of toning not carbon scattered around the rims. A few marks on each side are grade-consistent. (#2471)

# Select Red and Brown 1914-D Cent Scarce Low Mintage Issue

4225 1914-D MS63 Red and Brown NGC. A well struck and lustrous orange-red example that appears full Red, but has been designated as Red and Brown due to moderate carbon, most noticeable beneath the bowtie and on the reverse exergue. The low mintage 1914-D is scarcer in Mint State than its heralded 1909-S VDB predecessor. (#2472)

#### Well-Struck Near-Gem Red and Brown 1914-D Lincoln Cent

- 4226 1914-D MS64 Red and Brown PCGS. CAC. This key-date example is well struck and highly lustrous, with carefully preserved, original surfaces that show deep purple-red coloration. A few trivial tick marks on each side are consistent with the near-Gem grade level. This piece would fit quite well into a mostly Gem or mostly Red set with equal ease and cost-effectiveness. PCGS has seen 39 Red and Brown submissions finer (3/11). (#2472)
- 4227 1915-S MS64 Red and Brown PCGS. CAC. Warm gold-orange and copper hues are prevalent on this early Lincoln S-mint. Scattered spots are noted on the obverse, while the reverse has a broad patch of blue-violet on the lower two-thirds which accounts for the Red and Brown designation.(#2484)
- 4228 1922 No D Strong Reverse VF20 PCGS. FS-401. Die Pair 2. This series key cent is rich mahogany-brown throughout save for a blush of lighter tan on the reverse exergue. No marks are noticeable on either side, and the lines within the wheat ears are chiefly separated. From The Dustinn (Dusty) Lee Gibson Collection. (#3285)
- 4229 1922 No D Strong Reverse VF20 PCGS. FS-401. Die Pair 2. Olive-green toning emerges when this key date cent is rotated beneath a light. No marks are noticeable, and the wheat ears display substantial definition.

  From The Dustinn (Dusty) Lee Gibson Collection. (#3285)
- **4230 1922 No D Strong Reverse VF30 NGC. FS-401.** Die Pair 2. The NGC insert displays the variety's former *Cherrypickers*' number, FS-013.2. A pleasing and problem-free tan-brown middle-grade example of this famous key date. From The Dustinn (Dusty) Lee Gibson Collection. (#3285)
- 4231 1922 No D Strong Reverse VF30 PCGS. FS-401. Die Pair 2. The deep olive-brown surfaces exhibit a wood-grain texture. Lavender toning accompanies the central reverse legends. The bold final 2 in the date is characteristic of the key No D variety. From The Dustim (Dusty) Lee Gibson Collection. (#3285)
- 4232 1922 No D Strong Reverse VF30 ANACS. FS-401. Die Pair 2. A medium brown example with lavender undertones. Nicely defined, and a lens is needed to notice the faded marks on Lincoln's shoulder and the obverse rim at 2 o'clock.(#3285)
- 4233 1922 No D Strong Reverse VF30 ANACS. FS-401. Die Pair 2. This medium brown key date cent displays only minor contact, and has impressive sharpness on the lines of the wheat ears. TRUST is sharper than IN GOD WE, a diagnostic for this desirable variety. (#3285)
- 4234 1922 No D Strong Reverse XF40 PCGS. FS-401. Die Pair 2. Principally tan-brown, although the portrait shows hints of olive-green and fire-red. A lightly abraded example of this challenging key variety. A faint fingerprint fragment appears above the date. (#3285)

- 4235 1924-S MS64 Red and Brown PCGS. CAC. The 1924-S is both a famous color and strike rarity within the Lincoln cent series, a phenomenon exemplified by the legendary 1926-S issue, of which PCGS has certified a sole Gem Red coin. For the 1924-S, PCGS has graded eight Gem Red pieces. This near-Gem Red and Brown example will cost far less and yet need no apology. The surfaces are primarily pinkish-blue on each side, with a somewhat soft strike, typical for the issue, but little carbon. A single mark on Lincoln's cheek may preclude the Gem level, where PCGS has seen 21 Red and Brown submissions (3/11).(#2556)
- **4236 1924-S MS63 Red PCGS.** Excessively worn dies imparted to this gold-orange example the "quicksilver" luster more often associated with Buffalo nickels of the same date. Subtle violet accents are visible on the lightly abraded reverse.(#2557)
- 4237 1928-D MS65 Red PCGS. Warm copper-orange luster shows occasional pink-violet accents with small flyspecks on the reverse. This D-mint Red Gem displays well nonetheless. PCGS has graded just 11 numerically finer Red examples (3/11).(#2590)
- 4238 1941 Doubled Die Obverse MS64 Red PCGS. FS-101. One of the classic doubled dies, though not yet listed in the *Guide Book*. This bright example is largely lemon-gold with spotting at the upper reverse, but the obverse displays well.(#37780)

#### Full Red 1941 Doubled Die Obverse Cent, MS65

4239 1941 Doubled Die Obverse MS65 Red PCGS. FS-101. Termed in the Fivaz-Stanton reference as an "old school" doubled die. Doubling is seen on most of the obverse devices, most prominently on the 4 in the date and the motto above. The surfaces display even mint red color with no mellowing. Population: 22 in 65 Red, 19 finer (3/11). (#37780)

# High Grade Doubled Die Obverse 1941 Cent, MS66 Red, FS-101

4240 1941 Doubled Die Obverse, DDO-001 MS66 Red NGC. FS-101. The crossbar of the 4 is strongly die doubled, as is the BER in LIBERTY and much of IN GOD WE TRUST. A highly lustrous and essentially unabraded fire-red Premium Gem. A few flecks on the reverse exergue and brief granularity beneath the second 1 in the date are all that limit the grade. Census: 9 in 66 Red, 1 finer (3/11). (#37780)

## 1951 Lincoln Cent, MS67 Red Tied for Finest Certified

**4241 1951 MS67 Red PCGS.** Ex: Tom Mershon Collection. Fully struck with resplendent luster and glorious mint crimson-red and lime-gold color. Unmarked on the reverse, with a couple of superficial marks on Lincoln's cheek and head. Population: 10 in 67 Red, 0 finer (3/11).

Ex: 2005 Central States Auction (Heritage, 5/2005) lot 5426. (#2788)

# 1955 Lincoln Cent, MS67 Red Deep Cherry-Red Surfaces

- 4242 1955 MS67 Red PCGS. Each side displays even, deep cherry-red mint luster. The surfaces are unaffected by the normally expected abrasions one would expect. This piece was obviously either set aside and carefully preserved at the time of issue or remained in an original roll. Population: 14 in MS67, none finer at PCGS (3/11). (#2824)
- 4243 1955 Doubled Die Obverse Whizzed ANACS. AU Details, Net XF40. FS-101. The small format holder lists the former FS number 021.8. This is a lightly worn example of the bold doubled die that has been whizzed to simulate luster. Retoning has partly softened the appearance to mahogany-tan with violet accents.
- 4244 1955 Doubled Die Obverse XF45 ANACS. FS-101. Lightly worn but minimally abraded. Strong bluish overtones contribute to the eye appeal of this doubled die cent. Housed in an ANA-era ANACS holder.(#2825)
- 4245 1955 Doubled Die Obverse Damaged ANACS. AU50 Details. FS-101. This chocolate-brown and olive-green key date cent displays considerable mint gloss, but scattered small digs and short scratches affect the eye appeal.
- 4246 1955 Doubled Die Obverse Improperly Cleaned NGC Details. AU. FS-101. The first American doubled die to be appreciated popularly as such, the 1955 Doubled Die Obverse has had lasting appeal for more than half a century. Though this lightly rubbed yellow-green and violet example is glossy from a past cleaning, it will have considerable appeal for the right Lincoln cent collector.

- 4247 1955 Doubled Die Obverse AU55 PCGS. FS-101. A lovely chocolate-brown Choice AU cent that has an unmarked appearance and substantial shimmering luster. The jaw and cheekbone display minimal wear. The most prominent of all U.S. doubled dies. From The Dustinn (Dusty) Lee Gibson Collection. (#2825)
- 4248 1955 Doubled Die Obverse AU55 PCGS. FS-101. The quintessential doubled die, seen here as a scarcely worn chocolate-brown piece that retains all but the highest details. Minimally abraded and attractive.(#2825)
- 4249 1955 Doubled Die Obverse AU58 PCGS. FS-101. This chocolate-brown key date cent retains much mint gloss, and there are no distracting marks. One spot is noted over the U in UNITED. An appealing example of this famous doubled die variety. (#2825)
- 4250 1955 Doubled Die Obverse AU58 PCGS. FS-101. Strong blueviolet overtones enrich chocolate-brown surfaces that are almost entire in their gloss. Minimally abraded with just a touch of rub on the highest design elements. The doubling is completely clear. (#2825)

#### MS62 Brown Doubled Die Obverse 1955 Lincoln Cent, FS-101

4251 1955 Doubled Die Obverse MS62 Brown NGC. FS-101. A chocolate-brown representative of this important doubled die issue. Boldly struck and generally lustrous with a hint of friction on the cheekbone and at the center of the wheat ears. Minor marks on the right obverse field merit only passing mention. When the 1955 doubled die was first publicized, collectors were fascinated but had no clue what caused the dual image, since the minting process was then less known. (#2825)

# 1955 Doubled Die Cent, MS63 Brown Minimally Abraded

4252 1955 Doubled Die Obverse MS63 Brown PCGS. CAC. The surfaces have evenly mellowed to chocolate-brown over both sides, and now show almost no traces of mint red except for the faintest glimmer around the obverse devices. Only the smallest abrasions are seen on each side, none certainly significant enough to warrant individual mention. (#2825)

# Famous Doubled Die 1955 Cent MS63 Brown, FS-101

4253 1955 Doubled Die Obverse MS63 Brown NGC. FS-101. A coruscating golden-brown example of the most famous doubled die variety in numismatics. The strike is crisp, and marks of any kind are practically absent. A few trivial flecks are noted near the stem of the right wheat ear. A charming example of this always-popular mint error. (#2825)

#### Doubled Die Obverse 1955 Cent, MS64 Brown

4254 1955 Doubled Die Obverse MS64 Brown NGC. FS-101. A smooth and gorgeous representative of the quintessential American doubled die, a glossy "Brown" piece that showcases prominent pink, violet, and blue overtones. The strike is pleasing, if not razor-sharp, and the doubling is prominent as always. NGC has graded 12 finer Brown examples of the variety (3/11). (#2825)

#### Well-Known Doubled Die Obverse 1955 Cent MS63 Red and Brown

4255 1955 Doubled Die Obverse MS63 Red and Brown PCGS. CAC. FS-101. Approximately 5,000 examples of this extremely popular doubled die variety were produced, but far fewer than that number remain in Mint State with substantial remaining mint red. According to numismatic lore, many pieces were placed in circulation and dispensed through cigarette vending machines in the Boston area. This lustrous Select Uncirculated piece displays vibrant luster and coloration that is definitely closer to Red than Brown. An opportunity for the alert specialist.

Ex: Long Beach Signature (Heritage, 5/2008), lot 1100, which realized \$5,750. (#2826)

# 1955 Doubled Die Cent, MS63 Red and Brown Evenly Mellowed Surfaces

4256 1955 Doubled Die Obverse MS63 Red and Brown PCGS. The profound hub doubling on the 1955/55 ensures its enduring popularity. It is impossible to shrug and say the doubling on this coin doesn't matter. This piece retains generous amounts of original mint red that has mellowed slightly and evenly. Both sides are well-balanced in overall appearance. The only mentionable marks are a couple above the date and a single abrasion at the end of Lincoln's beard. (#2826)

#### Doubled Die Obverse 1955 Cent Red and Brown Near-Gem

4257 1955 Doubled Die Obverse MS64 Red and Brown NGC. CAC. FS-101. The strongest, earliest known, and most famous of the many doubled die varieties within the century-plus Lincoln cent series. Vibrant brick-red luster mellows slightly to gunmetal across the high points. Remarkably free from abrasions, and an exceptional example of this key variety. (#2826)

#### PROOF LINCOLN CENTS

- 4258 1909 PR65 Red and Brown PCGS. Primarily sun-gold and peach with plum-red on the portrait. Fully struck and lustrous with a couple of minor flecks on each side. Certified in a green label holder. Ex: Long Beach Signature (Heritage, 2/2005), lot 5606. (#3304)
- 4259 1909 PR65 Red and Brown PCGS. A first-year Lincoln cent specimen sans VDB, deeply toned cherry and blueberry with celery-green in between. Matte surfaces are largely undisturbed, as befits the coin's Gem status.(#3304)
- 4260 1909 PR65 Red and Brown NGC. Cherry-red and orange-gold dominate all but the portrait of Lincoln, which is bathed in yellow-green. Only the infrequent obverse pinpoint fleck determines the grade. Matte proof issues are invariably much scarcer than their Uncirculated business strike counterparts.(#3304)
- 4261 1909 PR63 Red PCGS. The more available of the two Lincoln cent proofs of 1909. This Select piece shows a few carbon spots and a trace of a fingerprint in the obverse fields that explain the grade. Lots of orange and gold color remains over lustrous, well-struck surfaces. A nice proof type coin for budget-conscious collectors. (#3305)
- 4262 1912 PR65 Brown NGC. Beautiful shades of ocean-blue, applegreen, and cherry-red compete for territory throughout this coruscating and crisply struck Gem. An aesthetic treasure from the scarce matte proof subset of the series. Census: 26 in 65 Brown, 13 finer (3/11).(#3312)

- 4263 1912 PR65 Brown PCGS. CAC. Deep blue and violet overtones dominate the eye appeal of this "Brown" specimen. Sharply impressed with fine matte surfaces that are largely undisturbed. Population: 39 in 65 Brown, 9 finer (3/11).(#3312)
- 4264 1913 PR65 Red and Brown NGC. CAC. This fully struck matte proof Gem is generally orange-gold and approaches full Red. Glimpses of rose-red appear along the right reverse, and a few pinpoint flecks accompany the obverse.(#3316)
- 4265 1914 PR64 Brown PCGS. An impressive Choice cent whose satiny fields and devices display consistent blended sea-green and mahogany toning. This carbon-free specimen is certain to delight its next owner.(#3318)
- 4266 1914 PR64 Red and Brown PCGS. This well struck piece is mellowed in natural amber hues from its initial peach-red. Careful inspection locates a couple of small spots. A low mintage matte

Ex: Long Beach Signature (Heritage, 6/2004), lot 5461.

(#3319)

- 4267 1914 PR64 Red and Brown PCGS. Orange and peach dominate more than half of the obverse, while Lincoln's vest and LIBERTY are deep ruby-red and forest-green. The reverse is primarily plummauve with frequent glimpses of gold.(#3319)
- 4268 1914 PR64 Red and Brown PCGS. The obverse is primarily orange-red with moderate lavender toning at the center. The reverse has a peach-gold border that encompasses a large blush of forest-green and ruby-red. Encapsulated in an old green label holder.(#3319)

#### Red and Brown Gem Matte Proof 1915 Lincoln Cent

4269 1915 PR65 Red and Brown PCGS. CAC. A needle-sharp firered and pumpkin-gold Gem. Steel-gray toning on Lincoln's head denies classification as full Red. Satiny and free from contact with only microscopic carbon save for a faint and minor spot above the NI in UNITED. A scant 1,150 proofs were struck. (#3322)

## Scarce Red and Brown Gem Matte Proof 1915 Lincoln Cent

4270 1915 PR65 Red and Brown NGC. CAC. Interest in the matte proofs produced by the U.S. Mint was decidedly on the wane by 1915, when just 1,150 proof cents were struck. This coin is of unusually high quality among the known survivors, bright copperorange on the obverse with a peach blush on the margins. On the textured reverse, blended rose and steel-gray prevails, accounting for the Red and Brown designation. The 19 in the date exhibits minor die doubling. Housed in an early pre-hologram holder. (#3322)

# PR64 Red and Brown 1916 Lincoln Cent **Deeply Patinated**

4271 1916 PR64 Red and Brown NGC. Deeply toned in shades of purple, tan, violet, green, and red. The strike is razor-sharp, and the surfaces are undisturbed by the sometimes-encountered contact marks. Each side has one or two minute carbon spots. Only 1,050 pieces were struck, the lowest-mintage proof issue of the series. (#3325)

## 1916 Cent, PR65 Red and Brown Significant Mint Red Remaining

4272 1916 PR65 Red and Brown PCGS Secure. While the mintage was reported to be 1,050 proofs for 1916, archive research has proved only 600 pieces were actually produced. As with all authentic matte proofs from 1916, the strike is remarkably strong in all areas. This particular coin has a significant amount of mint red remaining on each side. Additionally, we see no carbon spotting, which adds considerably to the desirability of this coarse-grain proof cent. Population: 50 in 65 Red and Brown, 13 finer (3/11). (#3325)

# Gem Red and Brown Proof 1916 Cent Lowest Mintage Proof Date

- 4273 1916 PR65 Red and Brown PCGS. CAC. Fully struck and mark-free with expectedly micro-granular orange-gold surfaces. Gray toning on the right obverse field and portrait high points determines the grade. Only 600 proofs were struck. Matte proof Lincoln cents have gained dramatically in popularity within recent years, as their scarcity relative to Uncirculated business strikes becomes better known. (#3325)
- 1936 Type One Satin Finish PR65 Red and Brown NGC. This precisely struck and undisturbed Gem appears void of carbon and displays pumpkin-gold and lilac-red patina. Both Satin and Brilliant finishes were used in 1936, the first year of proof coinage since World War I.(#3331)

# Red Gem Proof 1936 Cent Satin Finish, Fully Struck

4275 1936 Type One — Satin Finish PR65 Red PCGS. A straw-gold and orange Gem that boasts a precise strike and smooth glassy fields. Only a minor fingerprint fragment on the reverse exergue denies an even finer grade. Although proofs were sold to the public in 1936 for the first time in a generation, initial demand was limited due to the commemorative speculation of the era. Population: 51 in 65 Red, 24 finer (3/11). (#3332)

# Radiant PR65 Red 1936 Cent Satin Finish, Superior Eye Appeal

- 4276 1936 Type One Satin Finish PR65 Red PCGS. CAC. A gorgeous sun-gold and peach-red Gem. The strike is intricate, and both sides lack visible carbon or contact. Uncommon quality for this scarce and low mintage issue. Proof cents and nickels switched from satin to brilliant finish to more readily distinguish specimens from their business strike counterparts. Population: 51 in 65 Red, 24 finer (3/11). (#3332)
- 4277 1936 Type Two Brilliant Finish PR65 Red PCGS. CAC. Rich copper-orange with only occasional peripheral variations on gleaming surfaces. The first true brilliant proof of the Lincoln cent series and thus popular with collectors. Housed in a green label holder. (#3335)
- 4278 1936 Type Two Brilliant Finish PR65 Red PCGS. CAC. Smooth, gleaming surfaces are like copper-orange glass. A gorgeous brilliant-finish proof, the first of its kind seen in the Lincoln cent series.(#3335)
- 4279 1936 Type Two—Brilliant Finish PR65 Red NGC. The surfaces are aglow in golden-orange hues that accent the reflective surfaces and fully brought up devices. Some light iridescence is noted overall, and there is a mentionable reverse spot over the left wheat stalk. Census: 62 in 65 Red, 19 finer (3/11).(#3335)

# 1937 Superb Gem Red Proof Cent Tied for Finest at PCGS

4280 1937 PR67 Red PCGS. CAC. The fields are deeply mirrored and essentially perfect with no visible spots or other distractions. A pristine orange-gold Superb Gem from the second year of restored proof production. The PCGS population of this coin has remained unchanged since we last offered it. Population: 10 in 67 Red, 0 finer (3/11)

Ex: I.S. Memorial Collection (Heritage, 7/2003), lot 5771; Houston Signature (Heritage, 12/2008), lot 499. (#3338)

## Peach-Gold 1938 Lincoln Cent, PR67 Red None Finer at PCGS

4281 1938 PR67 Red PCGS. CAC. Incredibly even peach-gold coloration with near-immaculate surfaces on either side are the calling cards of this lovely Superb Gem proof. The proof mintage amounted to nearly 15,000 pieces, but this coin is among 28 examples in PR67 Red at PCGS, with none finer, a population that has stood unchanged in the four years since this splendid piece last paid us a visit (3/11).

Ex: St. Louis Signature (Heritage, 5/2007), lot 1308. (#3341)

**4282 1939 PR67 Red PCGS.** A fantastic Red Superb Gem with gleaming copper-gold fields. Sharply impressed and without spotting or other significant flaws. Population: 27 in 67 Red, 0 finer (3/11).(#3344)

#### Flawless PR67 Red 1941 Cent

4283 1941 PR67 Red NGC. A peach-red Superb Gem that boasts an unimprovable strike and only an occasional trace of carbon. Die polish has effaced portions of Lincoln's vest and neck. Middle date proof wheat cents are far scarcer than their 1950s counterparts, particularly at the Superb Gem level. Census: 5 in 67 Red, none finer (3/11). (#3350)

- 4284 1956 PR69 Cameo NGC. Pristine throughout, as demanded of the grade, this engaging cent shows golden-orange color with some slightly deeper color on metal flowlines on the reverse. Well-contrasted and pleasing. Census: 4 in 69 Cameo, 0 finer (3/11). (#83377)
- 4285 1957 PR69 Cameo NGC. Golden-orange surfaces deepen to sunset-orange near the obverse border below the date on this essentially pristine and ultimately pleasing, well-contrasted example. Census: 3 in 69 Cameo, 0 finer (3/11).(#83380)
- 4286 1957 PR69 Cameo NGC. Collectors outside of cent specialists might be quite surprised to learn how few Cameo examples at the PR69 level are certified. This Cameo 1957 is one of only four so graded at NGC, with none finer (3/11). Orange-gold surfaces display splendid contrast, especially deep on the reverse. (#83380)

#### Red Deep Cameo PR68 1960 Cent Scarce Small Date Logotype

- 4287 1960 Small Date PR68 Red Deep Cameo PCGS. Radiant devices loom above darkly mirrored fields. Fully struck and devoid of contact. Study beneath a loupe locates only a trace of carbon near the N in ONE and above Lincoln's shoulder. In proof format, the Small Date is much scarcer than its Large Date successor. Population: 35 in 68 Red Deep Cameo, none finer (3/11). (#93392)
- 4288 1971-S PR69 Red Ultra Cameo NGC. Early San Francisco proofs are seldom seen with outstanding cameo contrast, but the present crisply struck specimen provides an exception. Peach-gold and carbon-free.(#93434)

#### 1990 No S Proof Cent Part of a Sealed Set

4289 1990 No S Proof Cent in a Government Set. At first glance, this appears to be a normal 1990 proof set in the government case with certificate of authenticity and mintmark. Closer inspection reveals that the cent, a fully Red piece with moderate to heavy contrast, is actually of the rare No S variety. Among other coins, the nickel has peripheral green-gold toning, while the fields on the rest are near-brilliant.

#### TWO CENT PIECES

#### Series-Key Small Motto 1864 Two Cent Piece MS64 Red and Brown

- 4290 1864 Small Motto MS64 Red and Brown PCGS. CAC. FS-401. The Small Motto from 1864 and the proof-only 1873 are the bookend keys to the short and highly collectible two cent series. An unknown, but small number of Small Motto pieces were struck. Only a couple of thousand Small Motto coins are believed to have been produced. This attractive near-Gem has evenly mellowed surfaces that display a light greenish tint in the fields. Sharply struck. Population: 82 in 64 Red and Brown, 40 finer (3/11). (#3580)
- 4291 1864 Large Motto MS66 Red and Brown NGC. Repunched Date. A nice collector-grade example of this first-year type, much more red than brown, with a good strike and muted luster prevailing on both sides. All four digits show repunching north of the final punch, although the piece seems not to match either variety listed in Cherrypickers'.

Ex: Long Beach Signature (9/2009), lot 7373.(#3577)

# Large Motto 1864 Two Cent, MS66 Red Vibrant Orange Color

- 4292 1864 Large Motto MS66 Red PCGS. Booming luster sweeps this boldly struck and unmarked honey-gold Premium Gem. Carbon is limited, and the eye appeal is exemplary. An elusive type in such a lofty full Red grade. Encapsulated in an old green label holder. Population: 45 in 66 Red, 1 finer (3/11). (#3578)
- 4293 1865 MS65 Red PCGS. Fancy 5. This lustrous wheat-gold Gem displays only minimal carbon, and marks are limited to a slender inconspicuous abrasion on the left obverse border. (#3584)
- **4294 1866 MS64 Red PCGS.** A delightful peach-red near-Gem of this conditionally challenging date. Well struck save for the TS in CENTS, and the lustrous surfaces are nearly void of abrasions. (#3590)

#### Red Gem 1866 Two Cent

4295 1866 MS65 Red PCGS. Warm reddish-orange color has scarcely mellowed on this third-year two cent piece. The strike is decent, the overall eye appeal impressive. A small spot is noted at the rim above the letter D in GOD. Close inspection of the upper obverse reveals a small spot, a grade-defining abrasion, and rim crumbling inherent to the dies. Population: 42 in 65 Red, 7 finer (3/11). (#3590)

#### 1867 Two Cent, MS65 Red Tied for Finest Certified

- 4296 1867 MS65 Red PCGS. This lovely Gem is tied for the finest that PCGS or NGC have graded. Both sides have strong designs, satiny luster, and brilliant orange mint surfaces. A few minor die lines are noted on the obverse, including in the dentils below the date, while a few wispy die cracks are evident on the reverse. Population: 21 in 65 Red, 0 finer (3/11). (#3593)
- **4297 1872 Fine 15 PCGS. CAC.** The 1872 has only a fraction of the production of earlier dates within the ten-year series. This deep brown example displays ample detail, and is unmarked aside from an inconspicuous curved pinscratch above the shield. (#3612)
- 4298 1872 XF40 PCGS. A boldly defined medium brown example of this business strike key date. No marks are noteworthy, and the design exhibits only moderate wear.

  From The Dustinn (Dusty) Lee Gibson Collection. (#3612)
- 4299 1872 XF45 NGC. This low mintage chocolate-brown example is only lightly abraded, and wear is limited to high points such as WE within the motto. The last business issue of the denomination. From The Dustinn (Dusty) Lee Gibson Collection. (#3612)
- 4300 1872 XF45 PCGS. A tiny mintage of 65,000 pieces ensures the rarity of the 1872, whose production is only a fraction of prior dates within the brief series. This is a lightly circulated and problem-free chocolate-brown representative. IN GOD is die doubled, but from a different obverse die than FS-101.

  From The Dustinn (Dusty) Lee Gibson Collection. (#3612)
- 4301 1872 AU55 PCGS. This golden-brown Choice AU representative displays noticeable luster and an absence of marks. The Guide Book reports a mintage of only 65,000 pieces.

  From The Dustinn (Dusty) Lee Gibson Collection. (#3612)
- 4302 1872 AU58 ANACS. A partially lustrous example of this uncommonly low mintage date. The light brown fields exhibit olive-green and lilac-red undertones. Well struck and only minimally abraded.

From The Dustinn (Dusty) Lee Gibson Collection (#3612)

# 1872 Two Cent Piece, MS64 Brown A Key to the Series

4303 1872 MS64 Brown NGC. The keys to the business strike series of two cent pieces are the 1864 Small Motto and the 1872. Each is elusive in Mint State grades. This piece is mostly bluish-brown on the obverse with a splash of orange mint luster. The reverse has considerable orange mint color with a blend of pale blue, violet, and brown toning.

From The Dustinn (Dusty) Lee Gibson Collection. (#3612)

# PROOF TWO CENT PIECES

- 4304 1865 PR66 Brown PCGS. CAC. Plain 5. A carefully preserved second-year two cent proof, deep mahogany-brown at its base with bold lavender-violet and cobalt-blue overtones which catch the light. Dynamic eye appeal. Population: 2 in 66 Brown, 0 finer (3/11).(#3627)
- 4305 1866 PR65 Red and Brown PCGS. The sun-gold and orange obverse approaches full Red, while the dusky reverse displays intermingled olive, lilac, and pumpkin-gold. An attractive and well struck Gem that is housed in an old green label holder. (#3631)

# 1866 Two Cent Piece PR66 Cameo Red and Brown

4306 1866 PR66 Red and Brown Cameo NGC. CAC. The obverse retains most of its initial brick-red color, while the reverse is about evenly divided in orange-gold and powder-blue shades. A precisely struck and nicely mirrored specimen with no trace of contact marks or hairlines, although the reverse border has an infrequent pinpoint fleck. A scant 725 proofs were issued. Census: 3 in 66 Red and Brown Cameo, 0 finer in the designation (3/11). (#3631)

#### 1866 Two Cent Piece, PR65 Red

4307 1866 PR65 Red PCGS. CAC. Breathtaking field-motif contrast is evident on this Gem proof as the coin is rotated ever so lightly beneath a light source. Both sides exhibit beautiful yellow-gold color, imbued with whispers of orange, violet, and pale crimson. A powerful strike lends exquisite delineation to the design elements, further enhancing their variance with the mirrored fields. A few tiny, light flecks do not disturb. Outstanding eye appeal! Population: 31 in 65 Red, 2 finer (3/11). (#3632)

#### 1867 Two Cent Piece, Glowing PR65 Red

4308 1867 PR65 Red PCGS. CAC. Reflective fields display moderate contrast against the frosted motifs when the coin is tilted slightly beneath a light source. Copper-gold color embraces both sides, each of which exhibits fully struck design elements. A few tiny flecks may well preclude an even finer numerical grade. Outstanding eye appeal is aptly reflected by the affixed CAC green label. Population: 20 in 65 Red, 3 finer (3/11). (#3635)

# 1868 Two Cent Piece, PR66 Red and Brown More Red Than Brown on the Obverse

4309 1868 PR66 Red and Brown PCGS. CAC. The obverse of this lovely Premium Gem proof is decidedly more Red than Brown, with fresh copper-orange color over most of that side. The upper obverse has deep crimson-brown color, however, and while the reverse peripheral zones are "Red," the wreath area offers slight variations on a pale green hue. Among the finest certified at PCGS of the mere 600 proofs struck. Population: 7 in 66 Red and Brown, 1 finer (3/11). (#3637)

#### Premium Gem Proof 1870 Two Cent Piece Red and Brown

- 4310 1870 PR66 Red and Brown PCGS. CAC. This proof's mahogany and copper-orange shadings blend on the obverse, but the reverse has the lighter color outside the wreath and the deeper toning within. Crisply impressed with only the most trivial flaws visible, even under close inspection. Population: 11 in 66 Red and Brown, 0 finer (3/11). (#3643)
- 4311 1871 PR66 Brown NGC. CAC. Peach-gold emerges from design crevices, although the open fields are medium brown with lavender, olive, and cobalt-blue undertones. TRUST is widely die doubled, as always for this scarce proof issue.

  Ex: Houston Signature (Heritage, 12/2009), lot 180, which realized \$1,610.(#3645)
- 4312 1871 PR65 Red and Brown PCGS. Rich copper-orange luster on virtually the entire obverse and the outer reverse, though the core of the latter side is too close to mahogany for a fully Red designation. An appealing proof nonetheless, and one from a late date in the series. (#3646)

## Attractively Toned 1872 Two Cent PR66 Red and Brown

4313 1872 PR66 Red and Brown NGC. CAC. Plum-red centers are encompassed by orange-gold borders. The obverse displays glimpses of sea-green. This flashy and carbon-free Premium Gem has a needle-sharp strike and an undisturbed appearance. A very low business strike mintage puts date collector pressure on the scarce proofs. (#3649)

# 1873 Two Cent Piece, PR66 Brown Original Closed 3 Type

4314 1873 Closed 3 PR66 Brown NGC. CAC. The 1873 proof two cent pieces with a Closed 3 in the date are thought to be originals, while the Open 3 examples are restrikes. Only 600 proofs were struck in 1873, and some examples were probably melted when the denomination was discontinued in July. The present coin is a sharply detailed Premium Gem, with reflective surfaces beneath a greenish-gold and lavender patina. Census: 6 in 66 Brown, 0 finer (3/11). (#3651)

# 1873 Closed 3 Two Cent Piece PR65 Red and Brown Cameo, Fully Red Obverse

4315 1873 Closed 3 PR65 Red and Brown Cameo NGC. Without looking at the date it is possible to know this is a Closed 3. All Closed 3 two cent pieces have complete horizontal shield lines, while the restrike Open 3 pieces display an oval of weakness on the lower shield lines. Only 600 pieces (all proofs) were struck in this final year of the denomination. The obverse flashes with full mint red, while the reverse is only slightly subdued by occasional bluebrown. Magnification reveals a few small spots on the reverse, but none are apparent on the obverse. (#3652)

# Proof-Only 1873 Open 3 Two Cent Piece PR66 Red and Brown

4316 1873 Open 3 PR66 Red and Brown NGC. The so-called "Crime of '73" eliminated several denominations, including the two cent piece. This proof-only Premium Gem is dusky orange-red with hints of rose near the rims. The strike is precise, and neither side displays any indication of contact. A loupe is required to locate any pinpoint carbon. Only 500 Open 3 proofs were struck, along with 600 Closed 3 proofs. Housed in a prior generation holder. From The Dr. Donald M. Gilner Collection. (#3655)

#### THREE CENT SILVER

- 4317 1851-O MS64 PCGS. Faint olive, almond, and plum shades visit this coruscating and unmarked near-Gem. Well struck save for the TA in STATES. The sole branch mint issue of this underappreciated series. Housed in an old green label holder. (#3665)
- 4318 1852 MS66 NGC. This second-year trime has gold-to-green patina with additional blue-gray elements. A well struck and carefully preserved Premium Gem that is housed in a priorgeneration NGC holder. Census: 81 in 66, 13 finer (2/11). From The Dr. Donald M. Gilner Collection. (#3666)
- 4319 1852 MS66 PCGS. Fully original ivory color and frosty mint luster provide excellent eye appeal. This Premium Gem Type One example is a remarkable piece with a bold strike, including sharp clash marks in the center reverse. Population: 81 in 66, 13 finer (3/11).

  Ex: Long Beach Signature (Heritage, 2/2008), lot 3291. (#3666)
- 4320 1857 MS64 NGC. A splendid representative of the Type Two design, this Choice Mint State piece exhibits brilliant mint frost beneath delicate steel and iridescent toning. NGC has only certified 48 submissions in finer grades (3/11).(#3673)

# 1858 Three Cent Silver, MS66 Fully Struck, Exceptional Type Coin

- 4321 1858 MS66 NGC. Last year of the short-lived Type Two design, and an important type coin as such. The devices on each side show the often-seen "Longacre doubling" common to coins from this era, with an extra outline around the devices. What is uncommon, though, are the exceptionally well-preserved surfaces, almost completely brilliant preservation, and the pinpoint striking details on each side. Die clashed, as usual. Census: 15 in 66, 12 finer (3/11). (#3674)
- 4322 1861 MS65 PCGS. The green-gold, aqua, and cerulean patina over the obverse becomes far more intense on the reverse. A lustrous Gem from one of the last heavily produced business strike issues.(#3679)
- 4323 1862 MS65 NGC. Deep blue-green, cerulean, violet, and orange concentric toning surrounds a silver center on the obverse. The reverse has similar colors in bands converging on a much broader untoned interior. A lovely Civil War-era Gem.

  From The Dr. Donald M. Gilner Collection. (#3680)

# 1863 Three Cent Silver, MS67+ ★ Prooflike The Only Piece So Graded

4324 1863 MS67+ ★ Prooflike NGC. CAC. Die clashing and slight metal flow around the margins distinguish this as one of the rarely seen strikes for circulation from 1863. Only 21,000 pieces were produced plus another 460 proofs (which one is much more likely to encounter). The fields are exceptionally deep and flashy, the devices notably frosted, and each side is brilliant. This is the only MS67+ ★ Prooflike certified by NGC, and only one coin has been graded numerically finer, an MS68★ (3/11). (#3682)

#### Target-Toned MS66 1867 Three Cent Silver

- 4325 1867 MS66 NGC. Among the five finest submissions at NGC, this Premium Gem Type Three boasts thin silver centers contrasting with deep, original iridescent target toning that comprises electric blue, russet, jade, and lilac. A contact-free and beautiful three cent silver for toning lovers, from 4,000 business strikes. (#3687)
- 4326 1871 MS65 NGC. From a tiny business-strike mintage of 3,400 pieces, the 1871 trime is very scarce in Gem condition. The present coin is a well struck, lustrous example, with light blue and gold toning.(#3692)

#### PROOF THREE CENT SILVER

- **4327 1860 PR64 NGC.** Glassy mirrors show faint hairlines under intense yet smooth patina. Blue-green hues dominate the centers, while the rim areas are edged in emerald. Census: 28 in 64, 14 finer (3/11).(#3709)
- **4328 1861 PR64 PCGS.** Sunset-gold and pinkish-gray prevail on both sides, with accents of blue near the rims on this near-Gem proof, one of 1,000 minted. The strike is decisive overall yet incomplete, with minor weakness on the inner shield borders of the obverse. Population: 49 in 64, 25 finer (3/11).(#3710)
- 4329 1865 PR64 NGC. Jade-green, autumn-gold, and rose-red adorn this fully struck and flashy near-Gem. The fields are undisturbed beneath the colorful toning. Just 500 proofs were struck for this Civil War date.

  From The Orchid Collection. (#3715)

# Gorgeous PR66 ★ Cameo 1865 Three Cent Silver

- 4330 1865 PR66 ★ Cameo NGC. A simply gorgeous specimen of this Civil War-era proof three cent silver issue, richly toned gold, green, and blue and yet profoundly contrasted, especially on the obverse. Carefully preserved with amazing eye appeal, an all-around winner. NGC has graded just two numerically finer Cameo examples (3/11). (#83715)
- 4331 1866 PR66 NGC. CAC. This is a lavishly toned Premium Gem proof with shades of deep electric-green and coral toning gracing highly reflective surfaces. Sharply struck and well-preserved with contact-free surfaces that show none of the frequently-seen die clash marks of this brief denomination. Census: 15 in 66, 0 finer (3/11).(#3716)
- 4332 1867 PR64 PCGS. CAC. Rich blue, violet, and peach patina embraces each side of this near-Gem specimen. Crisply detailed with just a few faint hairlines hidden under the toning. Housed in a green label holder.(#3717)
- 4333 **1867 PR64 NGC.** An exquisite near-Gem specimen that is cloaked in intermingled hues of steel-blue, apricot, and rose toning. Survivors, while generally well preserved, are few in number, as could be predicted by its modest mintage of 625 proofs. Ex: Long Beach Signature (Heritage, 9/2005), lot 1287. (#3717)

# Deeply Reflective 1869 Three Cent Silver PR65 Cameo

- 4334 1869 PR65 Cameo NGC. Of the 600 proof 1869 three cent silver pieces struck, only nine examples have been certified to date as Gem and with cameo contrast, with 14 finer (3/11). This impressive specimen has exceptionally deep mirrors in the fields with devices that are notably contrasted beneath the rose and cobalt-blue toning seen over each side. (#83719)
- 4335 1870 PR64 Cameo PCGS. CAC. Beautifully toned in original amber-gold with glimpses of iridescence near the rims on each side, this well-contrasted piece boasts superior eye appeal for the grade and nearly a full strike, save for a couple of star centrils on the reverse. The proof mintage was 1,000 pieces. Population: 12 in 64 Cameo, 9 finer (3/11).(#83721)

# 1873 Trime, PR64 Deep Cameo Low-Mintage, Proof-Only Issue

4336 1873 PR64 Deep Cameo PCGS. CAC. Only 600 proof three cent silver pieces were minted in 1873, and many examples were melted in July of that year, when the denomination was discontinued. The present coin displays intense cameo contrast between the sharply detailed frosty devices and the brightly reflective fields. Population: 1 in 64 Deep Cameo, 2 finer (3/11). (#93724)

#### THREE CENT NICKELS

# 1873 Three Cent Nickel, MS66 Closed Three Type

4337 1873 Closed 3 MS66 PCGS. A lightly toned, lustrous Premium Gem, with no mentionable abrasions and a few prominent clashmarks (as made) on the reverse. Sharply detailed, with some minor softness on the central devices. No coins have been certified finer at either major grading service. Population: 10 in 66, 0 finer (3/11).. (#3739)

# Gem 1873 Three Cent Nickel Open Three

4338 1873 Open 3 MS65 PCGS. CAC. From a substantial mintage of 783,000 pieces, the open 3 is scarce in Gem condition. This specimen has light golden patina overlying satiny, essentially blemish-free surfaces. Minor strike weakness shows on portions of the central devices. Population: 18 in 65, 0 finer (3/11). (#3740)

4339 1876 MS65 PCGS. CAC. Gems of this Centennial issue are deucedly difficult to find, but this piece fills the bill nicely. Silvergray surfaces show golden device high points on the obverse and a bit of charcoal-gray on the reverse. Well-struck and free of singular contact. Population: 26 in 65, 4 finer (3/11).(#3744)

4340 1879 MS66 NGC. Light blue, gold, and pink patina covers parts of each side. The luster is strong, almost flashy, though the design detail and other characteristics point to a Mint State example (as opposed to a proof). Census: 18 in 66, 3 finer (2/11). From The Dr. Donald M. Gilner Collection. (#3747)

#### PROOF THREE CENT NICKELS

#### Brilliant Cameo Gem Proof 1865 Three Cent Nickel

4341 1865 PR65 Cameo NGC. CAC. The 1865 is the rarest proof date in the three cent nickel series, even though its corresponding business issue ranks as the most common. As always, the date is boldly repunched. This is a brilliant and fully struck Gem with blatant white-on-black contrast. (#83761)

#### 1865 Three Cent Nickel Gem Proof Cameo

- 4342 1865 PR65 Cameo PCGS. From a minuscule mintage of only 500 pieces, the 1865 proof three cent nickel is scarce in all grades, and rare at the exalted PR65 Cameo level. The present coin exhibits razor-sharp details on all design elements, and the frosty devices contrast boldly with the brilliant reflective fields. The surfaces are lightly patinated in shades of green and lavender. Population: 26 in 65 Cameo, 23 finer (3/11). (#83761)
- 4343 1866 PR65 Cameo NGC. CAC. Lightly but distinctly frosted across the devices with faint sky-blue accents on the mirrors. A captivating Cameo Gem specimen from the second proof issue in the series. Census: 25 in 65 Cameo, 12 finer (3/11). (#83762)
- 4344 1866 PR65 Deep Cameo PCGS. Light peach-gold overtones visit surfaces which gleam nickel-white where not patinated. A profoundly contrasted Gem specimen with undeniable eye appeal. Population: 9 in 65 Deep Cameo, 7 finer (3/11). (#93762)
- **4345 1867 PR65 NGC.** Dusky but beautiful patina is key to this Gem proof's eye appeal. Strong mirrors pierce the layers of antique-gold and olive toning embracing most of each side. Census: 52 in 65, 18 finer (3/11).(#3763)
- 4346 1867 PR66 Cameo NGC. Though both sides show cameoed devices, those on the reverse are unusually frosty, and contrast more than those on the obverse. A pleasing, deeply reflective coin overall, with hints of light gold toning. (#83763)
- 4347 1868 PR65 Cameo NGC. Clean, mirrored fields and light, evenly cameoed devices help lend this example nice eye appeal. Faint parallel marks noted in the central reverse are as struck, likely due to an abraded planchet. (#83764)

#### 1868 Three Cent Nickel, PR67 Cameo

4348 1868 PR67 Cameo NGC. The surfaces of this spectacular Premium Gem offer profound cameo contrast and tremendous eye appeal. All design elements exhibit pinpoint definition, while the unmarked fields are deeply reflective. From a meager mintage of 600 pieces. Census: 9 in 67 Cameo, 0 finer (3/11). (#83764)

# 1868 Three Cent Nickel PR66 Ultra Cameo

- 4349 1868 PR66 Ultra Cameo NGC. This Premium Gem proof 1868 three cent nickel offers razor-sharp frosty design elements and brightly reflective fields, ensuring a dramatic cameo effect. The pristine surfaces are untoned and brilliant. Only 600 proof three cent nickels were struck in 1868. Census: 6 in 66 Ultra Cameo, 1 finer (3/11). (#93764)
- 4350 1869 PR65 Cameo PCGS. Green-to-gold toning occasionally turns opaque at the margins. This has little impact on this Gem specimen's bold overall contrast. Pleasingly preserved and attractive. Population: 36 in 65 Cameo, 8 finer (3/11).(#83765)
- 4351 1870 PR65 Cameo NGC. Fully struck with bright surfaces, featuring highly reflective fields and beautifully frosted devices. A loupe reveals a few trivial dark flecks on the obverse and a small reverse planchet flaw, near the first column in III. Census: 34 in 65 Cameo, 23 finer (3/11).(#83766)
- 4352 1871 PR65 PCGS. CAC. Light apricot overtones enrich the eye appeal of this moderately reflective, mildly contrasted Gem specimen. Though a trifle softly struck on Liberty's hair, this piece has solid all-around eye appeal. PCGS has graded 26 numerically finer examples in the contrast category (3/11).(#3767)
- 4353 1872 PR65 PCGS. Excellent mirrors with green-to-gold toning of varying thickness that appears mostly at the margins. Well-contrasted on the obverse, though the reverse shows only a minor cameo effect. PCGS has graded 17 numerically finer examples (3/11).(#3768)
- 4354 1873 Closed 3 PR65 NGC. Some die striae show between Liberty's neck and the rim on this attractive Gem, and the fields display pleasing green and lavender patina. The design elements are sharply detailed and the fields show slightly muted reflectivity under the toning.(#3769)
- 4355 1873 Closed 3 PR66 PCGS. Attractive reflectivity and pleasing green-gold toning lend this Closed 3 example ample eye appeal despite a lack of contrast on the reverse. The obverse presents well thanks to frost on the well-defined portrait. Population: 10 in 66, 0 finer (3/11).(#3769)

- 4356 1874 PR65 NGC. CAC. A well struck Gem, showing a touch of softness on the coronet, with frosty texture on the devices and reflective mirrored fields. Only 700 proof three cent nickels were struck in 1874.(#3770)
- 4357 1875 PR65 NGC. The 1875 proof three cent nickel boasts a low mintage of 700 pieces. This pleasing Gem features mirrored fields and sharply detailed devices, with attractive green and lavender toning.(#3771)
- 4358 1876 PR66 Cameo PCGS. CAC. Faintly gold-toned over each side with strong field-to-device contrast. The portrait is both better-defined than usually seen and amply frosted. Population: 12 in 66 Cameo, 0 finer (3/11).(#83772)

# 1876 Three Cent Piece, PR66 Deep Cameo Finest Certified at PCGS

4359 1876 PR66 Deep Cameo PCGS. The 1876 three cent nickel enjoyed a large proof mintage of 1,150 pieces, anticipating large proof set orders during the country's centennial year. The present coin is an impressive Premium Gem, with sharply detailed design elements and brightly reflective fields. The frosty texture of the devices provides a degree of cameo contrast seldom encountered on three cent coins. Population: 1 in 66 Deep Cameo, 0 finer (3/11). (#93772)

## 1877 Three Cent Nickel, PR66 Cameo Proof-Only Issue

- 4360 1877 PR66 Cameo PCGS. An attractive Premium Gem example of this proof-only issue, here seen with frosted, sharply detailed devices that are set against well mirrored fields. Peerless surfaces are tinted in delicate golden-gray hues. From a tiny mintage of 510 pieces. Population: 37 in 66 Cameo, 8 finer (3/11). (#83773)
- 4361 1878 PR66 NGC. Light green-gold and lilac-pink hues mingle on this Premium Gem specimen from a popular proof-only issue. Great design definition and ample reflectivity. From The Dr. Donald M. Gilner Collection. (#3774)
- 4362 1878 PR66 NGC. CAC. Soft sunset-gold and peach shadings drape luminous and modestly reflective surfaces. This well-defined Premium Gem proof has a pleasing appearance that will blend in better with an otherwise Mint State set than the usual gleaming proof.(#3774)
- 4363 1878 PR66 NGC. Gold and lavender-rose patina of varying opacity covers each side of this Premium Gem from a proof-only issue. Impressive surface preservation reveals itself only on close inspection. NGC has graded 18 numerically finer examples (3/11). (#3774)

#### Proof-Only Cameo Superb Gem 1878 Three Cent Nickel

- 4364 1878 PR67 Cameo PCGS. CAC. Luminous motifs and darkly reflective fields combine for blatant contrast. This crisply struck Superb Gem appears pristine. The bridge of Liberty's nose has been lapped away, as coined. The second of three proof-only dates within this nonetheless collectible series. Population: 13 in 67 Cameo, 1 finer (3/11). (#83774)
- 4365 1881 PR66 NGC. CAC. Delicate gold-orange and lavender-blue hues settle over each side of this strongly mirrored Premium Gem. A carefully preserved and thoroughly appealing specimen. NGC has graded 55 numerically finer examples (3/11).(#3777)
- 4366 1882 PR67+ NGC. CAC. Outstanding preservation, even by Superb Gem standards, and a gleaming nickel-white proof. The wreath and portrait display noticeable cameo contrast. The strike is full, even on the often incomplete denominational columns. (#3778)
- 4367 1884 PR67 Cameo NGC. Great contrast and sharply struck devices. Pristine surfaces are virtually untoned on this Superb Gem specimen from late in the three cent nickel series. Census: 15 in 67 Cameo, 3 finer (3/11).(#83780)
- 4368 1884 PR67 Cameo NGC. Exquisitely struck with faint, speckled olive-milky toning. Impressively preserved and distinctly contrasted with strong, yet watery mirrors. Census: 15 in 67 Cameo, 3 finer (3/11).(#83780)
- 4369 1885 PR67 PCGS. CAC. Pinpoint-sharp and essentially brilliant with flawless surfaces. This satiny Superb Gem is virtually unimprovable, as the population data suggest. Population: 30 in 67, 1 finer (3/11).(#3781)
- 4370 1885 PR67 NGC. CAC. A sharply detailed, brightly reflective Superb Gem, with light green and lavender patina. The 1885 proof three cent nickel is a sought-after issue because few of the 1,000 business-strike examples have survived.(#3781)
- 4371 1887/6 PR66 Cameo NGC. CAC. FS-302. Gleaming fields are lemon-yellow and nickel-white. Frosted devices, including the underdigit curve of the 6, provide appreciable contrast. A great example of this unusual proof issue. Census: 22 in 66 Cameo, 12 finer (3/11).(#83784)
- 4372 1888 PR65 NGC. CAC. Faint speckles of gold tan color roll over the bright proof surfaces of this three cent nickel. Excellent definition is apparent on all of the design features, with no areas revealing hints of softness. A couple of wispy slide marks are noted on Liberty's cheek, otherwise, the surfaces are very well preserved. (#3785)
- 4373 1889 PR66 NGC. CAC. A spectacular Premium Gem from the last date of the series, this example displays needle-sharp definition on all devices, with nickel-gray reflective fields. From a generous proof mintage of 3,436 pieces.(#3786)

# WASHINGTON QUARTERS

- 4374 1932-D MS64 PCGS. The first-year branch mint Washington quarter issues pose a significant challenge to collectors, especially any finer than this near-Gem. Soft silver-gray patina at the right obverse and central reverse gives way to bold gold-orange and deeper lavender, violet, and crimson hues elsewhere. PCGS has graded 62 numerically finer pieces (3/11).(#5791)
- 4375 1932-S MS64 NGC. Dappled peach and gold shadings are light, almost translucent, across otherwise pale gray surfaces. A pleasing near-Gem from the low-mintage first-year San Francisco issue. (#5792)
- 4376 1932-S MS64 NGC. CAC. A fully brilliant and satiny near-Gem, this 1932-S is an excellent representative of the important key issue. Just 408,000 were struck, the lowest mintage of any regularissue Washington quarter.
- 4377 1932-S MS64 PCGS. A satiny near-Gem with heather and iridescent toning over amply lustrous surfaces. Well struck with just a few abrasions of any significance hidden under the patina. (#5792)
- 4378 1932-S MS64+ PCGS. CAC. A frosty coin that comes close to Gem status. Most of each side is pale silver-gray, though elements of violet and gold are splashed on each side, most visibly at the right obverse border.(#5792)
- 4379 1932-S MS64+ PCGS. Attractively detailed with a touch of satin to the strong, swirling luster on each side. Interiors are minimally toned, while the margins have dots of golden-tan and brown color. Highly appealing for a near-Gem.(#5792)

#### 1932-S Washington Quarter, MS65+

4380 1932-S MS65+ PCGS. CAC. The 1932-S and its Denver Mint counterpart are the keys to the Washington quarter series. The 1932-S has a smaller mintage, at 408,000 pieces, but the 1932-D is slightly more elusive in Mint State. The present coin is a highend Gem, with sharply detailed devices and vibrant mint luster. A crescent of dark green and amber toning highlights both sides. Population: 2 in 65+, 4 finer (3/11). (#5792)

# Gem 1934 Washington Quarter Doubled Die Obverse, FS-101

4381 1934 Doubled Die Obverse MS65 PCGS. CAC. FS-101. This Guide Book variety has become famous for its signature obverse die doubling, most visible on the G in GOD and the first T in TRUST. Offered here is a frosty Gem example which offers dappled blue, gold, cobalt, and umber shadings over lustrous silver surfaces. For the variety, Population: 17 in 65, 11 finer (3/11). (#5795)

4382 1936-D MS65 NGC. Silver surfaces have faint golden overtones with more overt dots of blue at the left reverse. A frosty and gorgeous Gem that is housed in a prior-generation holder. From The Dr. Donald M. Gilner Collection. (#5801)

#### Superb Gem 1936-D Washington Quarter

- 4383 1936-D MS67 PCGS. While the 1936-D Washington quarter is readily available in circulated grades, Mint State examples are scarce, and Superb Gems are very rare. The present coin is a sharply detailed Superb Gem, with vibrant satiny mint luster, and unmarked brilliant surfaces. Population: 11 in 67, 0 finer (3/11). (#5801)
- 4384 1939-D MS67 PCGS Secure. CAC. Softly frosted luster is silvergray in the centers with bands of yellow and orange around much of the margins and reddish-brown at the bottom of the reverse. This Superb Gem is tied for numerically finest in the combined certified population (3/11).(#5809)

# 1941 Washington Quarter, MS68 None Certified in Higher Grades

- 4385 1941 MS68 NGC. CAC. Iridescent shades of golden-brown and lavender toning are the dominant visual characteristics of this spectacular Washington quarter. The design elements are sharply detailed, and the surfaces display vibrant mint luster, underneath the patina. Census: 2 in 68, 0 finer (3/11). (#5814)
- 4386 1946-S MS67 PCGS. CAC. Remarkable apple-green and cherryred patina competes for territory across this lustrous and sharply struck high grade Washington quarter. Immaculate save for a faint graze on the field near the nose.(#5832)

# Gem 1950-D/S Washington Quarter Very Scarce Guide Book Variety

4387 1950-D/S MS65 PCGS. FS-601. The S undermintmark rises above and to the west of the prominent Denver mintmark. A hint of gold toning visits the lustrous and well impressed surfaces. Only occasional minor marks determine the grade. Population: 16 in 65, 7 finer (3/11).

Ex: Houston Collection of Washington Quarters (Heritage, 3/2006), lot 783, which realized \$7,475. (#5843)

# PROOF WASHINGTON QUARTERS

- 4388 1936 PR66 PCGS. CAC. Both sides of this Premium Gem are fully brilliant, with pristine quicksilver surfaces that are essentially devoid of contrast or contact. Just eight finer examples of this first proof Washington quarter issue have been certified in finer grades by PCGS (3/11).
  - Ex: Dallas Signature (7/2006), lot 2384.(#5975)
- 4389 1936 PR66 PCGS. CAC. Dappled jade-green, peach, and creamgray embrace this undisturbed and well struck Premium Gem specimen. The 1936 is the first and lowest-mintage proof date in the Washington quarter series and constantly in demand. PCGS has graded eight numerically finer examples (3/11).(#5975)
- 4390 1936 PR66+ NGC. CAC. The traces of golden-brown toning are confined to the right margins. The key date of the proof series, and this satiny, undisturbed Premium Gem would be the highlight of most collections. (#5975)
- 4391 1937 PR67 PCGS. CAC. The quicksilver surfaces are essentially contrast-free and also free of visible contact, with an almost subliminal hint of gold on the obverse. Among the nicest certified at PCGS from the proof issue of 5,542 pieces. Population: 77 in 67, 2 finer (3/11).(#5976)
- 4392 1937 PR67 PCGS. CAC. This smooth Superb Gem is principally stone-gray and almond-gold, although the lower margins display forest-green and cherry-red. Undisturbed and impressive. Population: 77 in 67, 2 finer (3/11).(#5976)

#### WALKING LIBERTY HALF DOLLARS

- 4393 1916 MS64+ NGC. This low mintage half dollar provides coruscating luster and exceptionally mark-free surfaces. Sharply struck, and moderately toned in pearl-gray, caramel-gold, russet-brown, and apple-green.(#6566)
- 4394 1916 MS65 PCGS. Lustrous and sharply struck with exceptionally unabraded, original surfaces. A few minute gray obverse flecks are noted over medium stone-gray and caramel-gold toning. Housed in a first generation holder.

Ex: Charlotte ANA (Heritage, 3/2003), lot 5991, which realized \$1,495.(#6566)

- 4395 1916-D MS64 PCGS. CAC. Rich orange-red and russetbrown toning fills the margins, with apple-green and steel-gray also evident. A lustrous and nicely struck example of this much better date. A small retained lamination is near the R in LIBERTY. (#6567)
- 4396 1916-D MS65 NGC. Light caramel-gold toning denies full brilliance, but this thoroughly lustrous introductory-year Gem is minimally abraded and features an above average strike. From The Orchid Collection. (#6567)

# Gem 1916-D Half Dollar First Year of Walking Liberty Design

- 4397 1916-D MS65 PCGS. The 1916-D half dollar is always popular with mintmark type collectors as the first year of the Walking Liberty design. The 1916-D is reasonably available in lower Mint State grades, but Gems are scarce, and examples in higher grades are rare. The present coin is a well struck Gem, with strong mint luster under gray, gold, and charcoal toning. (#6567)
- 4398 1916-S MS62 PCGS. Light golden toning graces the fields on this textured first-year S-mint Walker, with the color turning orange close to the reverse rims. Minimally flawed save for a small disturbance off the T in LIBERTY on the obverse. (#6568)
- 4399 1916-S MS62 NGC. Satiny luster is the greatest asset on this unworn first-year S-mint Walking Liberty half. At different angles, the surfaces shift color from pale silver-gray to a distinctly gold-orange appearance. (#6568)

# 1916-S Walking Liberty Half, MS64 Low-Mintage, First-Year Representative

4400 1916-S MS64 PCGS. The 1916-S half dollar represents the first year of the Walking Liberty design, from a small mintage of 508,000 pieces. The coin offered here is sharply defined on the peripheries, but the typical softness is evident on the central devices. Mint luster is strong, and the surfaces display just a wisp of golden toning. Housed in a green label holder. (#6568)

# 1916-S Walker, MS65 Original Example of This Scarce, First-Year Issue

- 4401 1916-S MS65 PCGS. The 1916-S boasts the lowest mintage (508,000 pieces) among the three first-year issues in this series. Nevertheless, examples are not difficult to locate in circulated grades. One must not assume, however, that Mint State coins are common. In fact, all Uncirculated 1916-S halves must be considered scarce, and fully struck Gems are, according to Bruce Fox in the 1993 book *The Complete Guide to Walking Liberty Half Dollars*, "one of the most difficult [to locate in] the series." The obverse of this peripherally toned example is well impressed throughout, save for Liberty's head, and the reverse is only slightly less so with a little lack of detail on the eagle's trailing leg feathers. Population: 85 in 65, 14 finer (3/11).

  Ex: 2005 FUN Auction (Heritage, 1/2005), lot 7541. (#6568)
- 4402 1917 MS66 PCGS. Vibrant, untoned centers are framed in russet toning with an occasional flash of blue-green on the reverse periphery. The most obtainable of the early Walking Liberty issues in Mint State, but legitimately scarce this nice. (#6569)
- 4403 1917-D Obverse AU58+ NGC. This untoned and lustrous example undoubtedly passed as Uncirculated in the years prior to third party grading. Minimally abraded, and highly attractive despite a trace of wear on the high points.(#6570)
- 4404 1917-D Obverse MS63 NGC. Soft, sweeping luster characterizes this piece from the short-lived Obverse Mintmark subtype. Tangold and peach toning prevails at the margins, while the centers are closer to pale silver-gray.(#6570)
- 4405 1917-D Obverse MS64 PCGS. Faint tan and pearl-gray toning enriches this coruscating and crisply impressed near-Gem. A well preserved and attractive example of a scarce World War Denver issue.(#6570)

# Select 1917-D Half Dollar Reverse Mintmark Variety

4406 1917-D Reverse MS63 PCGS. Walking Liberty half dollars in Select MS63 grade are among the most popular and actively collected of all United States coins. Many collectors have found that this grade provides an ideal combination of market value and quality. There is no doubt that many more collectors can afford this grade than the slightly nicer Choice and Gem quality examples. The surfaces of this attractive Select specimen are fully brilliant with frosty luster. The strike is quite good, certainly at least average for the issue, and the obverse and reverse are both free of any obtrusive marks. (#6571)

#### Choice 1917-D Walking Liberty Reverse Mintmark

4407 1917-D Reverse MS64 NGC. Light autumn-gold, sea-green, and plum-mauve adorn the borders of this thoroughly lustrous and minimally abraded near-Gem. The 1917-D reverse mintmark is considerably more elusive than its obverse mintmark counterpart. Well struck, and much scarcer in Mint State than implied by the *Guide Book* mintage of 1.94 million pieces. (#6571)

# Impressive MS63 1917-S Walker Obverse Mintmark

4408 1917-S Obverse MS63 NGC. Light golden-tan, russet, and slategray toning drapes this lustrous and nicely struck better date half dollar. Die polish weakens the RU in TRUST, although there is no evidence of clash marks. Marks are surprisingly few for this highend representative, and the eye appeal is uncommon for the Select level. (#6572)

## 1917-S Half, MS64 Obverse Mintmark

4409 1917-S Obverse MS64 PCGS. The 1917-S Obverse Walking Liberty half dollar is the sixth rarest issue of the series in high grade, from a mintage of only 952,000 pieces. The present coin is a well struck example, with some emerging detail on Liberty's hand and the eagle's leg. The surfaces have a slightly granular texture, with bright satiny mint luster and wisps of gold toning. (#6572)

# Near-Gem 1917-S Walking Liberty Half Obverse Mintmark

4410 1917-S Obverse MS64 PCGS. The 1917-S Walking Liberty half dollar with the popular obverse mintmark is a challenging issue in high grade, from a mintage of just 952,000 pieces. The present coin is a well struck Choice example, with vibrant mint luster on both sides, and just a hint of pastel toning. Only 39 coins have been certified in higher numeric grades by PCGS (3/11). (#6572)

# 1917-S Obverse Mintmark, MS64 Well Struck and Lightly Toned

- 4411 1917-S Obverse MS64 PCGS. The 1917-S is scarce in all grades of Uncirculated. It is usually only available in major auctions in high grades. This softly frosted example is well struck overall, but lacks absolute high point definition (as do almost all early Walkers). The fine-grain surfaces are draped with pale golden toning that deepens slightly at the margins. (#6572)
- 4412 1917-S Reverse MS62 PCGS. Light sun-gold and slate-gray encompass this lustrous and alertly struck Walking Liberty half. The eye appeal is exceptional for the designated grade. (#6573)
- 4413 1917-S Reverse MS64 ANACS. Peripheral autumn-brown toning gradually cedes to cream-gray at the centers. This lustrous and impressively unabraded early branch mint Walker shows moderate incompleteness of strike at the centers. (#6573)

## 1917-S Walking Liberty Half, MS64 Reverse Mintmark

4414 1917-S Reverse MS64 PCGS. The 1917-S Walking Liberty half dollar with the mintmark on the reverse is surprisingly elusive in high grade. Examples in Choice condition are scarce, and any finer grade is quite rare. The present coin is a well struck Choice specimen, with the typical softness on Liberty's head and the eagle's leg. The vibrant mint luster shows through light streaks of gold toning. (#6573)

### Reverse Mintmark 1917-S Half, MS64 Well-Preserved Surfaces

4415 1917-S Reverse MS64 NGC. Light golden-brown and cream-gray toning enrich this nearly mark-free early branch mint Walking Liberty half. The strike is precise, and cartwheel luster dominates the smooth surfaces. Given the cost of an MS65 example, the present high end near-Gem provides superior value. (#6573)

### 1918 Half Dollar, Gem Uncirculated Swirling Mint Luster

4416 1918 MS65 PCGS. The 1918 half dollar is a rather plentiful issue in average Uncirculated grades, but the supply of Gems falls of dramatically. This is a well-struck piece that has shallow detail on the skirt lines, as is often the case on this issue. Light silver-gray toning is noted on each side. Just a couple of minor obverse marks hardly detract from the coin's overall appearance. (#6574)

### 1918-D Walking Liberty Half Dollar, MS64 Challenging Issue in High Grade

4417 1918-D MS64 PCGS. This specimen exhibits a better-thanaverage strike for the 1918-D, which is usually weak on the central devices of both sides. The present coin shows significant detail on Liberty's hand and head, and the eagle's leg and breast are just a little flat. Strong mint luster shines beneath a light gold patina. Only 29 coins have been certified in higher numeric grades at PCGS (3/11). (#6575)

### 1918-D Half Dollar, MS64 Excellent Eye Appeal

- 4418 1918-D MS64 NGC. Sweeping luster and exquisite preservation proclaim the quality of this sharply impressed and lightly toned Choice half dollar. One tiny tick on the eagle's breast is apparently all that prevents classification as a full Gem. The right borders exhibit a wire rim. Ideal for most advanced collectors, since Coin World lists MS65 examples at \$25,000. (#6575)
- 4419 1918-S MS63 PCGS. CAC. A rich blanket of autumn-gold toning dominates the obverse, while the reverse features lighter stone-gray, jade-green, and golden-brown patina. Lustrous and nicely struck with pristine preservation save for a solitary pinscratch on the flag beneath the outstretched arm.(#6576)
- 4420 1918-S MS63 NGC. Subdued luster has occasional strong flashes through the rich peach, orange, gold, and gray toning covering each side of this Select example. Better-defined on Liberty's head than often seen, though her branch hand and the eagle's inner leg are more typically struck.(#6576)

### 1918-S Half Dollar, MS64 Good Value in This Grade

4421 1918-S MS64 PCGS. This is a lustrous example with attractive light gold toning over satiny surfaces. The strike shows typical weakness in the centers, along the high points of the obverse, and corresponding reverse. Given the rarity of Gems, this Choice Mint State example is a nice alternative at a substantially reduced price. (#6576)

### 1919 Half, MS62 Low-Mintage Philly Issue

4422 1919 MS62 NGC. Chestnut-tan and cobalt-blue freckles visit the peripheries of this lightly toned Walker. Lustrous and impressively unabraded, and the strike is crisp save for softness on Liberty's head. Struck from slightly rotated dies, and one of only three Philadelphia issues with a mintage of less than 1 million pieces. (#6577)

### Select 1919 Walking Liberty Half Low-Mintage Philadelphia Issue

4423 1919 MS63 PCGS. Among Philadelphia Walking Liberty half dollars, only the 1921 is more difficult to locate than the 1919. Collectors saved a few high-grade examples from the small mintage of 962,000 pieces, but coins grading better than MS63 are scarce. The present coin is a well struck Select example, with the typical softness limited to the central devices. The surfaces display slightly muted luster under shades of gold and gray toning. There is a single dark color spot at the obverse rim, near Liberty's foot. (#6577)

### 1919-S Half Dollar, MS62 Low Mintage, Low Survival Rate

- 4424 1919-S MS62 PCGS. The 1919-S Walking Liberty half dollar is a low-mintage issue that saw extensive circulation, resulting in a small supply of Mint State coins for today's market. The present coin is a well struck MS62 example, with lustrous surfaces that show hints of light golden toning. The surfaces are remarkably free of contact marks. (#6579)
- 4425 1920 MS64 PCGS. CAC. Softly struck with engaging, satiny luster and a dappled appearance. Strong dots of gold, tan, and orange toning cover much of both obverse and reverse, while the rest of the coin is medium-gray. (#6580)
- 4426 1920 MS64 PCGS. Ex: Ray Cassano Collection. Cream-gray and almond-gold toning drape this lustrous Choice Walking Liberty half. Well preserved save for a hair-thin mark on the face, and the strike is good despite blending on the branch hand. (#6580)
- 4427 1920 MS64 NGC. Gold, orange, and peach patina is generally light but makes its presence known on both sides. The lustrous obverse is well-kept for the grade, though the reverse shows a horizontal abrasion just above the eagle's left (facing) talon. (#6580)

### MS62 1920-D Walking Liberty Even Medium Tan Toning

4428 1920-D MS62 NGC. Rich golden-brown toning endows this lustrous and boldly struck early Denver Mint half. Marks are limited to a few trivial grazes on the right obverse field. A wonderful example of this notable conditional rarity, struck during the year Franklin Roosevelt ran on the Democratic ticket for Vice President. (#6581)

### 1920-D Walker, MS64 Well Struck, Milky Golden-Gray Toning

4429 1920-D MS64 PCGS. One of the most prized strike rarities among early Walkers, this milky golden-gray representative is unusually well defined and exhibits speckled golden-russet and intermittent blue toning at the borders. A few well scattered blemishes are primarily confined to the obverse. Population: 108 in 64, 48 finer (3/11). (#6581)

4430 1920-S MS62 NGC. Deep and gorgeous color embraces each side of this luminous 1920-S Walker. Both sides have dusky peach-orange color dominant, though the violet that accents the obverse becomes a significant minority on the reverse. (#6582)

### MS63 1920-S Half Dollar Peripheral Golden Toning

4431 1920-S MS63 NGC. Caramel-gold hugs the borders of this lightly toned and lustrous Walking Liberty half. The strike shows selected blending in the usual places, but both sides are well preserved. Despite a relatively high mintage, the 1920-S is surprisingly scarce in Uncirculated grades. (#6582)

### Choice 1920-S Walking Liberty Half Dollar

4432 1920-S MS64 PCGS. The 1920-S is known as a strike rarity in the Walking Liberty series, and this specimen displays some of the typical softness on the central devices, but some emerging detail is evident on Liberty's hand and head. The mostly brilliant surfaces exhibit vibrant mint luster, with hints of green and gold color. (#6582)

### Well Struck 1923-S Walker, MS63

4433 1923-S MS63 PCGS. The mintage of the 1923-S was 2.1 million pieces, and obviously most entered circulation as very few pieces are extant today in Uncirculated grades. This is a brilliant example that is remarkably well struck on the obverse with a few light abrasions scattered about that account for the grade. (#6586)

### 1923-S Walking Liberty, MS64

4434 1923-S MS64 NGC. Medium almond-gold patina graces this well struck and lustrous San Francisco Walker. The reverse is splendidly preserved, and the obverse has only a few moderate and inconspicuous abrasions. The 1923-S is the only issue struck in the five years between 1922 and 1926, likely due to the quantity of silver dollars coined during that half-decade. (#6586)

4435 1927-8 MS63 NGC. Brighter than usually seen with a downright flashy obverse. Gold and blue border toning is more prevalent on the obverse, though the reverse does have a distinctive patch of shiny "die burn" below the F in OF. (#6587)

### 1927-S Half Dollar, MS64 Scarce 1920s Issue

4436 1927-S MS64 PCGS. This is a flashy and lustrous near-Gem example of this better-date Walking Liberty. Speckles of olive-tan and violet color are scattered around the margins on each side. The strike is soft in the centers, as usual, but the gown lines are well defined. A few minute obverse marks limit the grade. Housed in a PCGS green-label holder. (#6587)

### 1928-S Walker, MS64 Well Struck, Subtly Toned

4437 1928-S MS64 PCGS. Compared to the usual 1928-S this piece is distinctly above average in definition on the figure of Liberty and the eagle. The mint luster is bright and frosted, rolling around each side unimpeded by abrasions or dark toning. Only the most subtle iridescence is present on obverse and reverse. (#6588)

### Near-Gem 1928-S Half Dollar Lightly Toned and Lustrous

4438 1928-S MS64 NGC. Small S. Light chestnut and olive toning enriches this thoroughly lustrous better date half dollar. A good strike despite bluntness on the branch hand, and marks are generally limited to a minor grazes on the right obverse field. NGC has certified just 40 pieces finer (3/11). (#6588)

### 1929-D Walking Liberty Half, MS65 Bright, Satiny Mint Luster

4439 1929-D MS65 PCGS. CAC. The 1929-D Walking Liberty half dollar is not as difficult to locate as its limited mintage of just over 1 million pieces would suggest, but the issue does become scarce at the Gem level. The present coin is a delightful Gem, with vibrant, satiny mint luster and excellent eye appeal. The strike is sharp for a Walker from this era, with just a little softness on Liberty's hand and the eagle's leg. Housed in a green label holder. (#6589)

### 1929-D Half Dollar, MS66 Glowing Mint Luster and Sharply Struck

4440 1929-D MS66 PCGS. Satiny and heavily frosted with the bold definition in the centers that is characteristic of this challenging Denver issue. A hint of speckled toning is noticed about the borders and the only contact mark of merit is a horizontal glancing blow on Liberty's gown above the hand. Population: 60 in 66, 1 finer (3/11). (#6589)

4441 1929-S MS64+ NGC. Lightly toned in caramel and ice-blue shades. Lustrous with a pristine reverse and a few delicate obverse grazes. Well struck except for the usual bluntness on the branch hand.(#6590)

### 1929-S Half, Gem Uncirculated Scarce in This Condition and Well Struck

4442 1929-S MS65 PCGS. The mint luster is sating with a little bit of golden color at the edges. The fields display light die polishing marks (not to be confused with hairlines), and the strike is surprisingly bold for the issue. The 1929-S has a mintage figure that is approximately 900,000 coins greater than that of its similarly dated D-mint counterpart. Nevertheless, it is the scarcer of the two issues, particularly above the Mint State threshold. (#6590)

4443 1933-S MS64 NGC. Light gold-to-peach overtones enrich this satiny but uncommonly well-defined near-Gem. If not for a small dig to the right of Liberty's sharply detailed branch hand, this coin would be in line for a finer designation.(#6591)

### Gem 1933-S Half Dollar Sharply Detailed Example

4444 1933-S MS65 PCGS. This attractive Gem 1933-S Walking Liberty half dollar displays sharp striking details throughout. Even Liberty's hand and head show fine definition. The surfaces are brightly lustrous, with small patches of prooflike reflectivity in the reverse legend. The surfaces are mostly brilliant, with a few hints of gold toning on the obverse. Housed in a green label holder. (#6591)

### Well Struck Gem 1933-S Walking Liberty

4445 1933-S MS65 PCGS. A blush of walnut-tan toning visits the right obverse field of this otherwise brilliant Gem. Refreshingly free from abrasions, and sharply struck aside from a hint of softness at the center of Liberty's head. A conditionally challenging Great Depression issue.

Ex: Dallas Signature (Heritage, 4/2007), lot 842, which realized \$3,450. (#6591)

4446 1934 MS67 PCGS. The satiny, smooth, well preserved surfaces are lustrous and display appealing caramel-gold and cream toning. Essentially mark-free, and a lovely Superb Gem. Ex: FUN Signature (Heritage, 1/2004), lot 6774, which realized

\$1,035.(#6592)

4447 1934-D MS66 PCGS. The striking details are strongly brought up, except on the head of Liberty, and the mint luster swirls around each side. A dazzling Gem.(#6593)

4448 1934-S MS64 PCGS. Faint gold and cream toning visits this unmarked and satiny Great Depression near-Gem. Intricately struck, and a good value relative to higher grades. (#6594)

### 1934-S Walking Liberty Half, MS65 Better Date in Gem Condition

4449 1934-S MS65 PCGS. The 1934-S Walking Liberty half dollar is a better date in the series, from a smallish mintage of 3.6 million pieces. Most examples seen grade MS64 or below, and Gems are scarce. The present coin is a sharply detailed Gem, with strong mint luster and traces of light gold toning. Housed in a green label holder. (#6594)

Gem 1934-S Walking Liberty

4450 1934-S MS65 NGC. Golden-russet freckles enrich the borders, but this lustrous Gem is lightly toned overall. The strike is intricate given the mint facility of origin, and the preservation is pleasing, especially the pristine reverse. 1934 was the first year since 1931 that all three mints struck Walking Liberty halves. Among the three issues, the 1934-S is the scarcest in Mint State. (#6594)

4451 1935-D MS65 PCGS. The bright, shimmering mint luster goes beyond the expected satin finish and is more akin to the thick frost seen on S-mint products. Well struck, especially on the obverse, with a slightly lighter strike on the reverse.(#6596)

Finest Certified MS66+ 1935-D Walking Liberty

4452 1935-D MS66+ PCGS. Over the past quarter century, NGC and PCGS have certified nearly 100 1935-D Walkers as MS66. However, only the present piece (as of 3/11) has in addition attained a Plus designation. It is lustrous with light green-gold toning and exemplary preservation. The strike shows customary softness on Liberty's head and branch hand. (#6596)

### 1935-S Walking Liberty Half, MS66 Well Struck, Frosted Mint Luster

4453 1935-S MS66 PCGS. The frosted finish glows as the coin is rotated beneath a light source, and the surfaces display a touch of ever-so-light reddish-gold toning. The devices are well defined but not quite fully struck up, with slight softness on the central devices of each side. Population: 91 in 66, 2 finer (3/11). (#6597)

4454 1936-D MS66+ PCGS. CAC. An essentially stone-white high grade half dollar whose sweeping luster and attractive preservation ensures its eye appeal. The strike is sharp on the skirt lines, and the fields display only a few faint grazes.(#6599)

4455 1936-S MS66 PCGS. Dazzling cartwheel luster illuminates this well struck and carefully preserved Walking Liberty half. A wonderful representative of this lower mintage Great Depression issue. PCGS has certified a scant six pieces finer (3/11). (#6600)

4456 1937 MS67 PCGS. When high-grade 1937 halves are found, they can be a wonder to behold. This is a nearly perfectly preserved example whose razor-sharp design motifs make this a wonderful 1930s type selection. Just the slightest hint of patina is seen over each side. (#6601)

### 1937-S Walker, MS67 Tied for Finest Certified

4457 1937-S MS67 PCGS. Extraordinary frosted mint luster characterizes this Superb Gem 1937-S. The luster rolls around each side as the coin is tilted beneath a light, and both obverse and reverse display subtle shadings of rose and lilac toning. The strike is strong throughout and there are no abrasions worthy of note. Population: 21 in 67, 0 finer (3/11). (#6603)

### 1938 Half, MS67, Underrated Issue

- 4458 1938 MS67 PCGS. Both sides are draped in golden-gray patina that deepens somewhat about the obverse border. The obverse is especially well struck, and there are a couple of small contact marks on the eagle's right (facing) leg. A scarce P-mint Walker in this outstanding grade. Population: 60 in 67, 0 finer (3/11). (#6604)
- **4459 1938-D MS66 PCGS.** Warm gold and peach toning overall with great eye appeal. Crisply detailed with a touch of pale blue close to the rims. One of fewer than half a million pieces struck. PCGS has graded 25 numerically finer examples (3/11).(#6605)
- 4460 1938-D MS66 PCGS. The 1938-D is notable for its low mintage of only 491,600 pieces and is easily the most expensive half among the later-date halves. This is a strongly struck example that is brilliant throughout. An exceptional '38-D.(#6605)

### 1938-D Half Dollar, MS66+ Prized Low-Mintage Issue

4461 1938-D MS66+ PCGS. CAC. The 1938-D Walking Liberty half dollar is slightly more available than the tiny mintage of 491,000 pieces would suggest. Coin collecting was popular in the late 1930s, and a number of high-quality coins were saved. The present coin is a high-end Premium Gem, with well struck devices and satiny mint luster. Both sides display wispy golden patina. Population: 5 in 66+, 25 finer (3/11). (#6605)

### Superb Gem 1938-D Half Dollar Completely Brilliant Example

4462 1938-D MS67 NGC. This is an immaculate example of the keydate 1938-D half dollar. The mintage of 491,000 coins is the third lowest of the series, behind the low-production 1921 issues. The surfaces are brilliant and snow-white without any trace of toning, and the design elements show only a touch of softness on Liberty's hand and the eagle's leg. Census: 16 in 67, 0 finer (3/11). (#6605)

- 4463 1939-D MS67 PCGS. This is a lightly toned example of this scarce, underrated D-mint issue. Each side has beautiful lilac patina and the lower obverse is accented with a streak of deep russet. Exceptional luster, strike, and overall eye appeal. (#6607)
- 4464 1939-S MS67 PCGS. The 1939-S is undoubtedly one of the most attractive of all Walkers, and this piece exemplifies why. The surfaces exude bright, shimmering mint frost, there are no mentionable abrasions, and the striking details are strong throughout.(#6608)
- 4465 1939-S MS67 NGC. Frosty silver-white with only occasional suggestions of color when tilted into the light. A well struck and attractive Superb Gem from just outside the short set. (#6608)
- 4466 1940-S MS66 PCGS. CAC. Bright white luster is mildly frosted on remarkably smooth surfaces. Well struck for the issue, though this still leaves soft detail at the centers. PCGS has certified three numerically finer pieces (3/11).(#6610)
- 4467 1940-8 MS66 PCGS. Booming luster and light olive-gold toning are characteristics of this virtually immaculate high grade Walker. The cheek and branch hand show typical detail, but the strike is otherwise attentive. Certified in an old green label holder. (#6610)
- 4468 1940-S MS66+ PCGS. This stone-white high grade half dollar has an above average strike for the San Francisco issue, and the sole visible mark is a graze on the upper skirt lines. Population: 7 in 66+, 3 finer (3/11).(#6610)
- 4469 1941 MS67+ PCGS. CAC. Bold luster and inviting golden patina greatly enhance the eye appeal on this short-set Superb Gem. Awarded the Plus by PCGS, and judging by the utter lack of marks, the designation is well-deserved. Population: 10 in 67+, 13 finer (3/11).(#6611)
- 4470 1941 MS67+ PCGS. CAC. Excellent striking detail even on the usual trouble-spots. This bright Superb Gem, subtly frosted with dappled gold-orange border-toning, is remarkably close to an even finer designation.(#6611)

### 1941 Walking Liberty Half, MS68 None Certified Finer

- 4471 1941 MS68 NGC. The 1941 Walking Liberty half dollar was produced in large quantities to meet the needs of the expanding economy. This magnificent MS68 specimen is one of the finest survivors, with razor-sharp definition on all design elements and bright satiny mint luster. The virtually pristine surfaces are patinated in attractive shades of gold and ice-blue. Census: 17 in 68, 0 finer (3/11). (#6611)
- 4472 1941-S MS66 NGC. Frosty ice-white surfaces dominate on both sides of this Premium Gem, with excellent luster and equal eye appeal. Seldom seen finer at either service. NGC has seen only 17 submissions finer (3/11).(#6613)
- 4473 1941-S MS66 PCGS. Butter-gold patina is chiefly confined to the peripheries. A lustrous Premium Gem of this popular short-set key. The strike is excellent for a San Francisco issue of the era. Only a faint mark near the elbow denies perfection.(#6613)

### 1941-S Half Dollar, MS66+ Spectacular Iridescent Toning

4474 1941-S MS66+ PCGS. CAC. The 1941-S is a noted strike rarity in the series, and this high-end Premium Gem displays a touch of the typical softness on the central devices, but the coin is well struck in most areas. The outstanding visual feature of this piece is the stunning golden-brown, green, amber, and ice-blue patina that covers both sides of the coin. Strong satiny mint luster adds to the appeal. Population: 4 in 66+, 6 finer (3/11). (#6613)

### Superb Gem 1941-S Half Dollar None Certified Finer

- 4475 1941-S MS67 NGC. The 1941-S Walking Liberty half dollar claims a moderate mintage of 8 million pieces, but the issue is the rarest date of the late-date series in high grade. The present coin is a delightful Superb Gem, with brilliant surfaces and blazing mint luster. The design elements are strongly impressed in most areas, but a little softness shows on the centers of both sides. A search of auction records reveals the 1941-S has been offered in MS67 condition only 17 times since we began our permanent auction archives, including the magnificent MS67 PCGS specimen in the Joseph Thomas Collection (Heritage, 4/2009), lot 2526, that realized \$27,600. Census: 17 in 67, 0 finer (3/11). (#6613)
- 4476 1942-D MS67 PCGS. Fully brilliant with intense frosty luster. This Superb specimen is very sharply struck and highly attractive. (#6615)
- 4477 1942-S MS66 PCGS. Trumpet Tail S. Olive and honey hues adorn this lightly toned and lustrous high grade half dollar. Both sides appear pristine, and the strike is crisp on Liberty's head. The upper skirt lines are incomplete, as are the feathers on the eagle's front leg.(#6617)

### 1943 Walking Liberty Half, MS68 Stunning Mint Luster

- 4478 1943 MS68 NGC. Shimmering satiny luster shines beneath the mottled hazel and silver patina that envelops both sides. Several wispy grazes and a touch of softness on the centers keep this stunning piece from being absolutely flawless. NGC and PCGS combined have certified just 20 pieces at this lofty level, with none finer (13/11). (#6618)
- 4479 1944 MS67 PCGS. Light honey toning graces this lustrous and unblemished Superb Gem. The strike is sharp save for the fingers of the branch hand. Unexpectedly scarce in the highest Mint State grades. Population: 65 in 67, 4 finer (3/11).

  Ex: Palm Beach Signature (Heritage, 11/2004), lot 7040, which realized \$2,817.50.(#6621)
- 4480 1944 MS67 PCGS. Fantastically frosty with a faint halo of golden color in the fields surrounding the solidly struck devices. An ideal piece for the short-set collector. Population: 66 in 67, 1 finer (3/11). (#6621)

### 1944 Walking Liberty Half Dollar, MS67+ Only One Coin in Higher Grade at PCGS

- 4481 1944 MS67+ PCGS. CAC. A crescent of vivid green toning graces the left rims of both sides, while the remaining surfaces display bright ice-blue patina. The design elements are sharply detailed in most areas, with just a touch of softness on Liberty's hand and the eagle's leg. Vibrant mint luster is apparent on both sides and eye appeal is outstanding. Population: 3 in 67+, 1 finer (3/11). (#6621)
- 4482 1944-D MS67 PCGS. While the 1944-D is one of the best-produced Short Set type coins, along with the 1943-D, it is also one of the premier type coins for this popular design type. This brilliant, satiny example is fully detailed in all areas.(#6622)
- 4483 1944-S MS66 PCGS. CAC. Large S. Dappled cobalt-blue and russet-brown around the borders transitions into lighter chestnuttan at the centers of this lustrous Premium Gem. Both sides appear immaculate as well as beautifully patinated. A good strike overall with the usual incompleteness on the cheek and branch hand. (#6623)
- 4484 1944-S MS66 PCGS. Large S. This certainly looks undervalued when one considers the rarity of full strike 1944-S halves combined with nearly perfectly preserved surfaces. The 1944-S is the premier strike rarity in the Short Set. This piece is almost completely brought up with only slight softness on the hand and head of Liberty. The luster glows and swirls around each side, and there is just the faintest trace of patina evident.(#6623)

- 4485 1945 MS67 PCGS. CAC. Slender and beautiful arcs of firered, lemon-gold, and jade-green endow the left obverse border. This sharply struck and highly lustrous Superb Gem shows only faint grazes on the right obverse field and the eagle's front wing. (#6624)
- 4486 1945 MS67 PCGS. Light straw-gold patina visits the upper right obverse of this nicely struck high grade half dollar. Booming luster overwhelms the minimally abraded surfaces. Population: 72 in 67, 1 finer (3/11).

Ex: Portland Signature (Heritage, 3/2004), lot 5911, which realized \$2,990.(#6624)

4487 1945-D MS67 PCGS. Light straw-gold toning drapes this lustrous and lovely half dollar. The strike is above average, and only minor surface imperfections are encountered.

Ex: Long Beach Signature (Heritage, 9/2003), lot 7277, which realized

### 1946-D Walking Liberty Half, MS67 Attractive Iridescent Toning

\$1,495.(#6625)

4488 1946-D MS67 PCGS. The 1946-D Walking Liberty half dollar is more available than its mintage of 2.1 million pieces would suggest, but Superb Gems are still rare. This coin is a boldly detailed Superb Gem, with vibrant mint luster and iridescent golden-brown and ice-blue toning on the obverse. Population: 38 in 67, 0 finer (3/11). (#6628)

### 1946-S Half Dollar, MS67 Among the Finest Certified

- 4489 1946-S MS67 PCGS. CAC. Iridescent shades of gold, amber, and ice-blue toning enhance the surfaces of this spectacular Superb Gem. Bright mint luster adds to the stunning visual appeal. The strike is better-than-average for this issue, but a little softness is evident on the central devices. Population: 25 in 67, 0 finer (3/11). (#6629)
- 4490 1946-S MS67 NGC. Evenly struck and satiny on the obverse with a brighter, frosty reverse. Lovely rose-gray and peripheral sea-green toning graces the former side, while the latter is silver-white in the centers with dappled reddish-brown and cobalt-blue patina near the borders. Census: 57 in 67, 0 finer (3/11).(#6629)
- 4491 1947 MS67 PCGS. A fantastic final-year Superb Gem with sharp definition. Billowing, frosty luster radiates through a layer of intermittent sky-blue and golden toning. Population: 23 in 67, 0 finer (3/11).(#6630)

### PROOF WALKING LIBERTY HALF DOLLARS

4492 1936 PR62 PCGS. CAC. Pinkish-gold and ice-blue patina prevails on each side of this piece, with some accents of charcoal-gray near the obverse rim. There are a few contact marks in the left obverse field that explain the grade but also make this first-year proof more attainable.(#6636)

### 1936 Half Dollar, PR64 First Walking Liberty Proof

4493 1936 PR64 NGC. The Philadelphia Mint resumed commercial proof set offerings in 1936, resulting in a small mintage of 3,901 proof Walking Liberty half dollars. The present coin is a sharply detailed Choice specimen, with fine definition on Liberty's head and hand. The Mint used an all-brilliant finish in 1936, and this example displays a few wisps of gold toning. From The Orchid Collection. (#6636)

### Premium Gem 1936 Half Dollar Low-Mintage Proof Issue

4494 1936 PR66 NGC. CAC. The 1936 proof half dollar is extremely popular with type collectors as the first proof issue of the Walking Liberty series. Only 3,901 pieces were coined, making the date somewhat scarce in Premium Gem condition, and rare in higher grades. The present coin is a sharply detailed Premium Gem, with mirrored surfaces, and light golden toning. (#6636)

### 1936 Walking Liberty Half, PR66 First Proof Walker

4495 1936 PR66 PCGS. CAC. The 1936 Walking Liberty half dollar was a well produced issue, and this specimen is an impressive example of that craftsmanship. The design elements display razorsharp details and the surfaces are deeply reflective. The fields are mostly brilliant, with a hint of gold toning at the rims. Eye appeal is extraordinary. (#6636)

### 1936 Half Dollar, PR66

- 4496 1936 PR66 NGC. A sharply detailed Premium Gem proof, from a mintage of 3,901 pieces, this attractive specimen exhibits full separation between Liberty's thumb and index finger. The reflective surfaces are a bit hazy, with highlights of green and lavender toning on both sides. Currently, NGC has certified 71 coins in higher numeric grades (3/11). (#6636)
- 4497 1937 PR66 NGC. CAC. Mottled powder-gray patina prevails on this Premium Gem proof, with glimpses of pink and ice-blue on the reverse. Well but not fully struck in the centers, yet quite appealing. (#6637)
- **4498 1937 PR66 NGC.** Powerfully mirrored with a modicum of contrast supplied by faintly frosted devices. Delicate golden accents are prominent in the carefully preserved fields. *From The Orchid Collection*. (#6637)
- 4499 1937 PR66 PCGS. CAC. Both sides are flashy and attractive. The reverse is close to brilliant, while the obverse shows a delicate layer of cloud-white patina with occasional streaky breaks. (#6637)
- 4500 1937 PR66 NGC. CAC. Powerfully mirrored with reflective contours on the devices as well as the flats of the fields. Beautifully detailed with just a few small dots of milky toning on otherwise brilliant surfaces.(#6637)
- 4501 1937 PR66+ NGC. CAC. A flawless and prominently mirrored representative of this scarce second-year proof date. Stone-white save for an occasional trace of golden-brown toning on the reverse. (#6637)
- 4502 1937 PR67 PCGS. CAC. This scarcer early-date proof is seldom seen in Superb Gem condition. This impressive, fully brilliant example boasts flashy, deeply reflective fields and shows pinpoint striking details throughout. The obverse die appears to have been overpolished, as the fourth ray is attenuated. PCGS has seen only nine submissions finer (3/11).

  Ex: Dallas Signature (12/2005), lot 2217.(#6637)
- 4503 1938 PR67 PCGS. CAC. A fully brilliant and deeply mirrored Superb Gem that has slight white on-black obverse contrast, although a Cameo designation is not forthcoming. Splendidly preserved and a better date as well, since the mintage of 8,152 pieces is less than half that of the 1942. PCGS has seen only 11 submissions at finer grade levels (3/11).

  Ex: Dallas Signature (12/2005), lot 2219.(#6638)
- 4504 1938 PR67 ANACS. Attractive chestnut-tan, cream-gray, seagreen, and fire-red encompass this needle-sharp Superb Gem. Occasional small russet-brown freckles are seen on the eagle and obverse margin.(#6638)
- 4505 1938 PR67 NGC. Slender bands of blue-green, ruby-red, and honey toning adorn the peripheries of this fully struck and flawless Superb Gem. A better date within the seven-year proof run for the type. From The Orchid Collection. (#6638)
- **4506 1939 PR66 NGC. CAC.** Boldly detailed with powerful, gleaming mirrors. This Premium Gem from the middle of the proof series is minimally toned save for a few minor, milky dots at the margins. (#6639)

- 4507 1939 PR67 PCGS. CAC. Excellent reflective luster and definition. The margins show a measure of milky patina, largely green-gold but with additional blue elements at the upper left obverse. PCGS has graded 24 numerically finer specimens (3/11). (#6639)
- 4508 1939 PR67 NGC. Appreciably contrasted, though not to Cameo levels, with potent mirrors and faint frost on well-defined devices. Faint washes of blue and gold patina further fuel this Superb Gem's generous eye appeal.
  From The Dr. Donald M. Gilner Collection. (#6639)
- 4509 1939 PR67 NGC. Strong mirrors with dramatic patina. The interiors alternate between green-gold and pale white-silver, while the rims show evidence of deep claret that is most prominent as a thin crescent around the right reverse.

  From The Dr. Donald M. Gilner Collection. (#6639)
- 4510 1940 PR67 PCGS. CAC. Boldly detailed with appreciable contrast on the reverse, though the obverse has a more brilliant appearance broken only by suggestions of canary-yellow patina carried over from the opposite side. A powerfully mirrored Superb Gem specimen. PCGS has graded just 31 numerically finer pieces (3/11).(#6640)

### PR68 1940 Walker None Finer at NGC or PCGS

- 4511 1940 PR68 NGC. The peripheries of this coin are patinated in dark hues of green and amber, while the centers display lighter shades of green and ice-blue. The design elements are sharply detailed throughout. The 1940 claims a fairly generous mintage of 11,279 pieces, but PR68 specimens are rare, and no coins have been certified in higher grades at NGC or PCGS (3/11). From The Orchid Collection. (#6640)
- 4512 1941 No "AW" and With "AW" Half Dollar Set PR65 NGC. Two Gems, both lightly gold-toned, one each representing the types with and without engraver's initials on reverse. Comes with a vintage plastic display holder.

  From The Dr. Donald M. Gilner Collection. (Total: 2 coins)
- 4513 1941 PR67 PCGS. CAC. With AW. Well-struck throughout silver-white surfaces on both sides that lack any suggestion of other color and show minor field-device contrast, this Superb Gem is about as good as it gets for the 1941 half dollar, produced to the extent of 15,412 proofs on the eve of America's involvement in World War II. PCGS has certified 14 submissions finer (3/11). (#6641)
- 4514 1941 PR67 NGC. A satiny cream-gray Superb Gem that provides peripheral portions of cherry-red, powder-blue, and jade-green. The strike is exemplary, as is the eye appeal. In a prior generation holder.
  From The Orchid Collection. (#6641)

### 1941 Walking Liberty Half Dollar, PR68 Among the Finest Certified

- 4515 1941 PR68 NGC. The 1941 proof Walking Liberty half dollar enjoyed a generous mintage for the time, with 15,412 pieces produced. Examples in PR68 condition are rare today, and no coins have been certified in higher numeric grades at NGC or PCGS (3/11). The present coin is a magnificent specimen, with a razor-sharp strike and deeply mirrored surfaces. The all-brilliant finish shows no trace of toning. (#6641)
- 4516 1942 PR67 PCGS. CAC. Fantastically mirrored on both sides with a subtly contrasted reverse. Champagne-tinted surfaces are carefully preserved, as befits a Superb Gem. Housed in a secondgeneration PCGS holder.(#6642)

### 1942 Walking Liberty Half, PR68 Stunning Eye Appeal

4517 1942 PR68 NGC. CAC. The last proof issue of the Walking Liberty half dollar series, the 1942 also claims the largest mintage, at 21,120 pieces. This magnificent PR68 example is a testament to the high quality of the issue, with brightly mirrored surfaces that show a trace of attractive green toning on both sides. The strike is exemplary for a Walking Liberty half of this era, with just a touch of softness on the eagle's leg. Only four coins have been certified in higher numeric grades at NGC (3/11). (#6642)

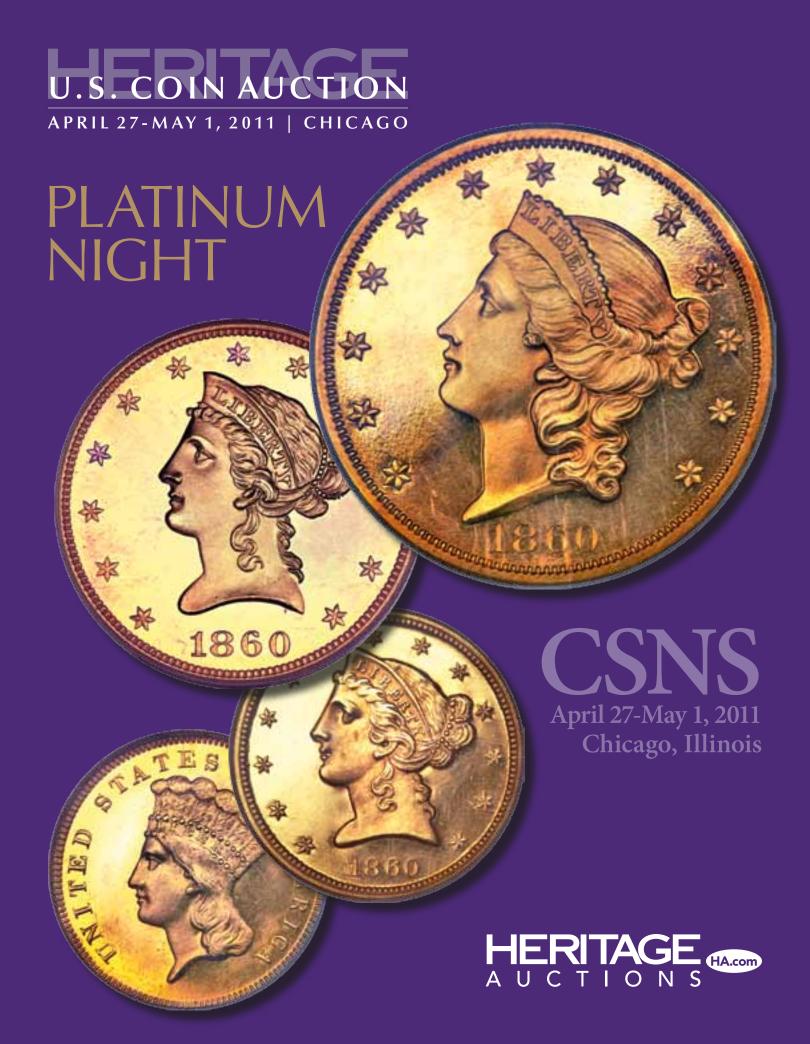

### FRANKLIN HALF DOLLARS

- 4518 1948-D MS66+ Full Bell Lines PCGS. Presently the single finest Full Bell Lines certified 1948-D half dollar, the only example (as of 3/11) at the MS66+ level at either major service with none finer. Lustrous and crisply struck with attractive powder-blue, olive-gold, and rose-red toning.(#86652)
- 4519 1954 MS66 Full Bell Lines PCGS. Minimally toned, crisply detailed, and distinctly frosty, this Premium Gem has great allaround eye appeal. It is also tied for numerically finest among Full Bell Lines examples known to PCGS (3/11).(#86667)
- 4520 1962 MS65 Full Bell Lines PCGS. An available Franklin half issue overall, but with Full Bell Lines the Gem level is almost never exceeded. This silver-white piece shows glimpses of gold and russet, mostly on the obverse high points, with a good strike throughout. PCGS has certified four Full Bell Lines pieces finer (3/11).(#86682)

### PROOF FRANKLIN HALF DOLLAR

4521 1956 Type One PR68 Cameo NGC. The earlier or Type One variant of proof 1956 half dollar, swiftly replaced by the Type Two. This moderately contrasted example is minimally toned with hardly any evidence of the usual milk-spotting.(#86686)

End of Session Two

**Lot Number Key** 

### Dear Bidder:

Welcome to Platinum Night! More than 550 of the top lots in our Central States U.S. coin auction have been gathered into this special evening session. Good things come in pairs, at least for this Platinum Night — a pair of stellas, a pair of proof Bust half dollars, and a pair of Kingdom of Hawaii pattern rarities, among others. From humble Massachusetts silver to grand and gleaming proof double eagles, from tiny trimes to a hefty Kellogg and Humbert gold bar salvaged from the S.S. Central America, we are offering lots from a wide range of series and time periods, all of great importance.

Whether the coins came singly, in pairs, or by the dozens, our Platinum Night session contains contributions from more than one-third of the auction's 300-plus consignors, including lots from the following Featured Collections:

The B & D Collection • The Dustinn (Dusty) Lee Gibson Collection • The Michael A. Tongg Collection The Peter Kevorkian Collection • The Orchid Collection • The Paul Taylor Collection The Slotkin Family Trust Collection

As always, Heritage offers an array of opportunities to participate in Platinum Night. Before the auction, we can take your absentee bid by mail, fax, e-mail, or on the Internet at HA.com. If you cannot attend the auction in person but would like to participate in real time, you can bid through an agent, on the telephone, or with our proprietary online bidding system, Heritage LIVE!, which makes bidding as easy as clicking a button.

If you are attending the convention, we hope to see you at our booth, at lot viewing, and at the auction itself. Make sure to stop by and say hello!

Sincerely,

Greg Rohan

President Executive Vice President

Todd Imhof

# PLATINUM NIGHT

### **COLONIALS**

XF40 1652 Oak Tree Sixpence Crosby 6-F, Noe-16, W-360

**5001 1652 Oak Tree Sixpence XF40 PCGS. IN on Reverse, Crosby 6-F, Noe-16, W-360, R.5.** Every Oak Tree sixpence die pair is a rarity regardless of condition, and similarly, any Oak Tree sixpence graded above VF is a condition rarity regardless of its die pair. This Noe-16 example is unevenly struck on a wavy and imperfectly formed flan like many of its fellows, but ample remaining luster is evident on each side. This filters through strong rose, orange, and steel-blue toning which enriches the all-around eye appeal. Wear is generally light, marks are few, and this is a desirable piece of Massachusetts silver in every respect. Listed on page 37 of the 2011 *Guide Book*, where it is valued at \$18,000 in XF40. (#19)

Desirable Choice AU Noe-5 Large Planchet Pine Tree Shilling

**5002 1652 Pine Tree Shilling, Large Planchet AU55 PCGS. CAC. Crosby 5-B.2, Noe-5, W-720, R.4.** 70.0 gn. Backwards or retrograde first N in ENGLAND. Without pellets at trunk. Noe 4, 5, and 6 are all from the same die pair with various Boston Mint re-engravings of the tree and letters. Nearly full glossy luster is visible on both sides of this lovely deep gray piece. Hints of blue, gold, and iridescent toning on both sides add to its desirability. A definite S-bend is evident from the rocker press used to coin these pieces. None of the frequently seen planchet splits are evident on this remarkable piece. Listed on page 37 of the 2011 *Guide Book.* (#23)

### Conditionally Rare AU St. Patrick Farthing, W-11500

**5003 (1670-75) St. Patrick Farthing AU50 PCGS. Breen-211, W-11500.** Mark Newby emigrated from Ireland to America in 1681, bringing with him a barrel of St. Patrick farthings. In 1682, Newby convinced the New Jersey assembly to grant legal tender status to the coppers. Newby died later that fall, but the coppers remained in circulation long afterward, and most survivors are well worn. This lightly circulated medium-brown example displays refreshingly markfree and unspotted surfaces. The centers are lightly struck, while peripheral elements are well defined. Listed on page 39 of the 2011 *Guide Book.* Population: 7 in 50, 6 finer (3/11). (#42)

# Exquisite MS62 1776 Continental Dollar Pewter, CURENCY, Newman 1-C

**5004 1776 Continental Dollar, CURENCY, Pewter MS62 NGC. Newman 1-C, W-8445, R.3.** The CURENCY Continental dollars were likely struck in New York City in 1776, prior to that city's capture by the British in September of that year. The purpose behind their manufacture was to replace the one dollar Continental Currency note. Although a few silver examples are known, those were presumably made as patterns, to demonstrate the issue under ideal circumstances. Brass pieces were struck, likely as test pieces, from prototype Newman 1-A and 1-B dies, but no brass or copper examples are known for Newman 1-C.

Enough pewter examples of Newman 1-C have survived that the issue must have been intended to circulate. The leading services have certified a Good 4 and a VG10, along with numerous pieces in Fine and Very Fine. It is interesting that of the initial die pair, the reverse was modified first, despite the blundered CURENCY legend on the obverse. This was because an entirely new obverse die was needed to correct that error, while the appearance of the existing reverse die could be improved by reengraving the outlines of the 13 rings from dots to lines.

The present lot is a magnificent example of this famous and popular Early American type. Both sides are minimally abraded and display blended chestnut-gold and olive-green toning. The obverse is remarkably free from spots, and planchet issues are limited to a small flaw just inside the rim at 8 o'clock. The stand of the R in YOUR has shifted but remains intact. The reverse has a few light charcoal-gray spots that determine the grade but have little impact on the eye appeal, which is far superior to the typical pewter Continental dollar. The dies are rotated approximately 135 degrees clockwise from coin turn. Census: 11 in 62, 11 finer (3/11).

Listed on page 81 of the 2011 Guide Book. (#791)

1820 North West Brass Token, W-9250 Choice VF, Second Finest at NGC

5005 1820 North West Company Token, Brass VF35 NGC. Breen-1083, W-9250, R.4. It is commonly believed that the North West Company tokens were redemption tokens used in the Pacific Northwest to be exchanged with the Indians for beaver pelt. A note in the current *Guide Book* suggests that most surviving pieces have been found in Oregon's lower Columbia River valley. Production is attributed to John Walker and Company of Birmingham, England,. Examples were struck in brass and copper.

Nearly all known pieces have a hole at 12 o'clock, with just two unholed examples confirmed. This brass example and the copper piece in the present sale are both examples with holes, undoubtedly used to string multiple pieces together for ease of carrying. This piece exhibits tan and olive surfaces with microscopic roughness, but it is far smoother than usual. The central motif is typically weak, with sharp peripheral details. NGC has only certified five in all grades, with an XF45 and this VF35 the two finest (3/11). Listed on page 74 of the 2011 *Guide Book*. (#952)

1820 North West Company Token W-9292, XF Details, Copper Rarity

5006 1820 North West Company Token, Copper — Environmental Damage — NGC Details. XF. Breen-1084, W-9252, High R.6. Holed at 12 o'clock as nearly always, this piece has heavy surface corrosion, typical of most surviving specimens. In the Whitman Encyclopedia of Colonial and Early American Coins, Dave Bowers writes that "examples actually used in trade are holed at top for suspension on a cord. Two without holes have been reported." One of the two reported pieces is illustrated in that reference, the same piece illustrated in the current Guide Book.

The underlying details are rather remarkable and seem to approach Mint State, in our opinion, despite the conservative NGC description. The surfaces exhibit various colors, with dark steel predominant. Listed on page 74 of the 2011 *Guide Book*.

### **HALF CENTS**

1793 C-2, B-2 Half Cent, VF25 Second of Four Varieties

**5007 1793 VF25 PCGS. C-2, B-2, R.3.** The Y in LIBERTY is distant from the cap, and the fraction is well centered, both diagnostic to the C-2 die marriage. The first year of the denomination, and also notable as the only year of the Bust Left type. The second of four die marriages for the year, the C-2 survives to the extent of about 400 pieces in all grades. Muted light brown and magenta surfaces approach XF definition, but are hampered by lengthy planchet cracks and peripheral laminations on the obverse. MRB Fine 12.

Ex: FUN Signature Sale (Heritage, 1/2006), lot 510. (#1000)

1793 C-4, B-4 Half Cent, XF Details

**5008 1793** — **Corrosion** — **NGC Details. XF. C-4, B-4, R.3.** The Philadelphia Mint coined 35,334 half cents in 1793 from four die pairs made up of two obverse dies and three reverse dies. All four varieties are about equal in rarity with a slightly lower population for C-1, and a slightly higher population for C-4. Both sides of this dark brown half cent have some areas of lighter tan, with heavy corrosion, planchet lamination, dents, and scratches. However, this piece exhibits considerable sharpness of its design with nice centering. Collectors who seek bold designs will pursue this offering. MRB VG10. (#1000)

### 1793 C-2, B-2 Half Cent, MS61 Brown From the Richard Picker Collection

5009 1793 MS61 Brown PCGS. CAC. C-2, B-2, R.3. Manley Die State 1 as always, with the obverse die rusted and the reverse die perfect. The obverse die was used for C-1 and C-2 and is quickly recognized by the smoothly curved bust line just above the date. This is the most visible diagnostic, although some note the position of the forecurl below the I in LIBERTY. The other obverse has this line sharply bent where it joins the hair and forecurl below the L. The reverse legend is widely spaced, with the final A joined to the right stem end. Each wreath branch has 15 leaves.

Ronald Manley writes in *The Half Cents Die State Book* that this variety is normally found in low grades, but at least two Mint State pieces exist. Walter Breen recorded five Uncirculated pieces and six AU coins, acknowledging that some of those listings may be duplicates. This specimen is one of the AU pieces in Breen's roster, from the Richard Picker Collection, where it was cataloged as Uncirculated.

For the benefit of those who lack access to the September 1968 Merkin catalog offering this piece, we reprint the description of lot 27:

"1793 Gilbert 3. Forelock below I; fraction bar bent between ribbons; heavily rusted dies. Unc., light brown, plenty of faded mint color. No significant blemishes inflicted after striking. Between Y and hair are two shallow pre-striking flan chips; opposite D and 200 are two edge planchet defects superficially looking like rim dents, though careful examination with a glass shows their true origin. Obv. die rust is as advanced as we have ever seen' rev. die rust is as on some Gilbert 1's [Cohen-3], unpublished die state, hitherto unknown. At present only six are recorded in mint state; which of these is finer is principally a matter of color preference. From a very old noncollector estate; never before auctioned."

Today, we are unable to add more to the description or to clarify any parts thereof. The coin has lovely intermingled light and medium brown, with considerable gold faded from mint red, and patina of pale blue and lilac, especially on the obverse. MRB AU55.

Ex: Richard Picker Collection (Lester Merkin, 9/1968), lot 27; later, The Madison Collection (Heritage, 1/2009), lot 3567, where it realized \$126,500. (#1000)

# PLATINUM NIGHT

1793 C-3 Half Cent, MS62 Brown First Year of Mint Operations

5010 1793 MS62 Brown PCGS. C-3, B-3, R.3. The 1793 Liberty Cap has obvious significance as the first half cent produced by the Mint, and it is also a highly coveted one-year type. In the informative Encyclopedia of United States Half Cents: 1793-1857, Walter Breen wrote that the Philadelphia Mint prepared two obverse and three reverse dies for this issue between April and July 1793. The obverse design was based on sketches prepared by David Rittenhouse, who in turn relied heavily on Augustin Dupré's attractive Libertas Americana medal of 1782. On July 20, the first 7,000 pieces were produced, followed by 24,934 coins on July 26, and a further 3,400 pieces on September 18. These three deliveries totaled a mere 35,334 coins.

The surfaces on this extraordinary Mint State representative are an appealing medium brown color with hints of faded pinkish-orange that is primarily seen in the peripheral areas of the reverse. The high points of the devices are uniformly bold, and none of the usual porosity, corrosion, or other problems that so often mar these important early coppers are visible. A small obverse rim bruise is noted over LI. The Condition Census status of this high-quality 1793 half cent is secure, making it a landmark offering for the quality-conscious collector. MRB AU55.

Ex: 1959 ANA (Leo A. Young, 8/1959), lot 402; Kagin's; Leo A. Young; Auction '80 (RARCOA, 8/1980), lot 1512; later, Long Beach Signature Sale (Heritage, 2/2002), lot 5018; Central States Signature Sale (Heritage, 8/2006), lot 5017. (#1000)

Problem-Free 1795 Lettered Edge Half Cent C-1, B-1, MS62 Brown

1795 Lettered Edge MS62 Brown PCGS. C-1, B-1, R.2. The I rather than 1 in the date is an obvious tipoff to this widely sought-after Liberty Cap half cent. Other diagnostics include the everpresent thick Liberty pole near the truncation of the bust, and the small die dot following the last A in AMERICA. This piece is sharply struck on the obverse curls but shows minor softness on the highest portions of the leaves on the reverse. The pleasing surfaces are medium brown with a slight reddish undertone. Faint traces of mint red peek out from around some of the letters on the darker reverse. The problem-free surfaces show no noticeable abrasions or rim dings. Accompanied by an insert where the piece was earlier graded MS63 Brown by PCGS. MRB AU50. Population: 2 in 62 Brown, 5 finer (3/11). (#1009)

# ALES CENT

# 1804 C-13 Half Cent, Gem Red and Brown Only One Finer Certified Specimen

**5012 1804 Plain 4, No Stems MS65 Red and Brown NGC. C-13, B-10, R.1.** The Plain 4, No Stems type is the most plentiful of the various 1804 issues in Mint State grades, yet it remains elusive with red and brown color. In fact, all Draped Bust half cents are scarce or rare in such preservation, regardless of the date. Even the 1806 C-4 half cent — the most plentiful of the entire type — is seldom seen as nice as this piece.

This delightful Gem example displays considerable original orange mint brilliance, blended with pleasing medium brown accompanied by hints of blue and violet iridescence. The design features are nearly full, showing excellent definition in the drapery and hair, as well as nearly full venation in the wreath. Census: 4 in 65 Red and Brown, 1 finer (2/11). MRB MS63.

Ex: The Madison Collection (Heritage, 1/2008), lot 2658, which realized \$14,950. (#1064)

### **LARGE CENTS**

1793 Chain AMERI Cent, S-1, B-1, VF25 First U.S. Mint Coinage

5013 1793 Chain AMERI. VF25 PCGS. S-1, B-1, R.4. The Chain cents were the first coins struck at the U.S. Mint. We know this since they carry the same Vine and Bars edge found on the early Wreath cents. Later Wreath cents have a Lettered edge, like the Liberty Cap cents struck from 1793 to 1795. We also know the order that the five varieties of Chain cents were minted through the study of die states. Known as the emission sequence, the order of striking shows that the Chain AMERI cents were the first pieces minted in early March 1793, the first coins struck in the Philadelphia Mint building.

This piece represents Breen Die State V, with a die crack through the tops of TATE. The surfaces are medium olive with splashes of darker steel. The obverse has minor imperfections including a small mark at the lips and an old, short scratch from the chin. The reverse has a number of blemishes. Among those are several small nicks, a planchet defect at the first S, and a few modest rim bruises. MRB Fine 12. (#1340)

## PLATINUM NIGHT

1793 S-3, B-4 Chain Cent, VF Details First Philadelphia Mint Coinage

5014 1793 Chain AMERICA — Rim Damage — NGC Details. VF. S-3, B-4, Low R.3. The 1793 Chain cent issue was our first national coinage actually produced at the Philadelphia Mint. Each observer finds that certain blemishes are objectionable, and others less so. This Chain cent is ideal for the collector who can forgive occasional rim bruises. The NGC-reported rim damage appears in the form of a small bruises around much of the obverse and part of the reverse. However, the surfaces are otherwise smooth and attractive with lovely olive-brown color and splashes of steel-blue patina at the center of the reverse. MRB Good 5.

1793 S-4, B-5 Periods Chain Cent, VG8 Last-Minted Chain Cent Variety

5015 1793 Chain Periods VG8 NGC. S-4, B-5, R.3. The last of the five Chain cent varieties was the Periods Obverse variety with punctuation following the date and LIBERTY. The entire 36,103-coin mintage of Chain cents was delivered from March 1-12, 1793, and the Periods coins were probably struck during the five-day period from March 8 to 12. Specifically correlating varieties and delivery dates is an interesting but likely impossible exercise.

Aside from a modest obverse rim bruise at 5 o'clock, this example has smooth, problem-free steel and tan surfaces with a "woodgrain" toning pattern. It is attractive and nicely detailed with a full date, motto, and legend. The chain is bold and complete. Previously certified VG10 PCGS. MRB Good 6.

From The Jack Stickel Collection. (#91341)

1793 S-4, B-5 Chain Cent, VG10 Periods After Date and LIBERTY

5016 1793 Chain Periods VG10 PCGS. S-4, B-5, R.3. One of the many unknowns surrounding our early coinage is the 1793 Periods Obverse Chain cent. No clues exist to tell us why the engraver placed periods after the date and LIBERTY. For that matter, we do not even know who the engraver was. Walter Breen suggests that the engraver may have been Joseph Wright, who placed a period after LIBERTY on the obverse of his 1792 pattern quarter dollar. An alternative is that another engraver was merely familiar with the Wright quarter dollar design and copied the concept.

This representative of the Periods design has a blend of medium olive and dark steel with faintly granular surfaces. However, there are no marks or bruises of consequence on either side. This attractive piece will appeal to the variety specialist or date collector. MRB VG7. (#91341)

1793 S-9, B-12 Wreath Cent, VF25 Vine and Bars Edge

5017 1793 Wreath Cent, Vine and Bars VF25 NGC. S-9, B-12, R.2. The Vine and Bars edge was utilized for the Chain cents and most of the Wreath cents, before the beginning of the Lettered Edge that was used for most of the S-11 Wreath cents, continuing partway through the 1795 series. Some major variety collectors consider both Wreath cent types necessary, while others ignore the edge differences. Of course, variety collectors seek all of the different die marriages and edge types.

This pleasing piece has medium brown surfaces with traces of darker steel. Faint granularity is only visible with a glass, and a small reverse rim bruise at 1 o'clock is inconsequential. MRB Fine 15. *Purchased from Tom Reynolds (7/25/1997).*From The Jack Stickel Collection. (#1347)

# PLATINUM NIGHT

Top-Notch 1793 Wreath Cent, S-11a, VF30

**5018 1793 Wreath Cent, Vine and Bars VF30 NGC. S-11a, B-16a, High R.4.** Certified as S-11a on the NGC insert, this piece features the Tall 7 obverse, with all three leaves in the sprig leaning to the right and the stem virtually touching the top of the 9 in the date. On the reverse, the fraction and bar cant upward to the right. This piece offers remarkably smooth surfaces with even chocolate-brown color, perfectly balanced from side to side. One contact mark on the neck and two shallow planchet voids on the face will serve as pedigree identifiers, along with an irregular planchet flake above the top of the wreath. Far finer than usual surfaces. A top-notch example for the assigned grade. MRB VF20.

From The Dustinn (Dusty) Lee Gibson Collection. (#1347)

1804 S-266c, B-1 Cent, VF20 Obverse and Reverse Rim Breaks

**5019 1804 VF20 NGC. S-266c, B-1, R.2.** The 1804 is well-known as an important issue in the early cent series, despite the R.2 rating suggesting that as many 1,000 to 1,200 survive. This late die state example has heavy rim breaks over RTY on the obverse and over MERI on the reverse, the latter just missing the adjacent C. This pleasing piece has the sharpness VF20, with the grade reduced slightly for its faint porosity and even fainter scratches on each side. Possibly cleaned at one time, the surfaces exhibit a combination of steel and reddish-brown with only a few other trivial blemishes on each side. MRB Fine 15.

Purchased from Steven Ellsworth (Butternut Coins). From The Jack Stickel Collection. (#1504)

1804 S-266b, B-1 Cent, VF30 Middle Die State

**5020 1804 VF30 PCGS. S-266b, B-1, R.2.** The intermediate die state has a rim break over RTY on the obverse but no rim break on the reverse. The die states of 1804 are highly collectible, and even carry their own Sheldon subvariety labels of a, b, and c. In all other instances among the early cents, the subvariety labels are reserved for edge changes or planchet differences. This pleasing representative has olive and dark brown surfaces with splashes of lighter tan on the obverse, and traces of reddish corrosion on the reverse. A few small areas of dark green verdigris are also visible but overall, this middle state 1804 cent is pleasing and quite collectible. MRB Fine 15. (#1504)

Well-Struck 1810 S-284 Cent, MS62 Brown

1810 MS62 Brown PCGS. CAC. S-284, B-5, R.3. This MS62 Brown piece is nominally tied for the finest-graded Sheldon-284 that we have offered in the last few years with a couple of other examples in the same grade, one each at NGC and PCGS. Dr. Sheldon considered the S-284 to be the rarest of the year, while Breen favored the S-283 and S-285; the overdate 1810/09, S-281, is the commonest of them all. This example exhibits pleasing light brown color over problem-free surfaces that are well-struck overall, a tad more so on the obverse. Minor softness appears on the leaves on the reverse. The finest S-284 that PCGS has certified is a single MS65 Brown piece (3/11). MRB AU55. (#1549)

### **PROOF LARGE CENTS**

### 1829 N-6 Coronet Cent, PR64 Brown An Important Proof Rarity Rarely Seen With Brilliant Surfaces

**5022 1829 PR64 Brown NGC. N-6, R.6 as a Proof.** The 1829 N-6 is readily secured as a business strike, but proofs are extremely rare. Walter Breen's 1988 *Complete Encyclopedia of U.S. and Colonial Coins* states under Breen-1841, "at least 6 proofs of N-6." A few years earlier Breen, in the *Encyclopedia of United States and Colonial Proof Coins*, pedigreed seven examples, with the Brand specimen (#7) possibly the same as the Beckwith example (#2). Eliasberg, of course, used a proof to represent the 1829 cent within his legendary "complete" collection. The Bowers and Merena catalog description for that piece states, "Perhaps 10 proofs are known of this variety, in the cataloger's opinion, although John Wright suggests 12 to 16."

This is only the fourth appearance of an 1829 proof large cent in any of our auctions dating back to the beginning of our archives in 1993, including one previous offering of this identical specimen. In the roughly 25 years of operation of NGC and PCGS, the services have encapsulated a total of 13 proofs for the 1829, which presumably are from N-6 dies. Most of those pieces were bronzed at the Mint, including 10 of the 13 certified submissions. Breen states that the technique involves coating a planchet or a struck example with bronzing powder and baking it, used mostly on 19th century Mint medals — although some proof patterns, half cents, and cents were also bronzed.

The present example appears to be unbronzed, and in fact shows traces of the original orange-gold color, particularly on the reverse legends and wreath. The strike is sharp aside from stars 6 to 9, consistent with Breen's comment that "all proofs have the top four stars weak." Star 8 is repunched, which helps identify this Large Letters variety. The dies are rotated counterclockwise perhaps 30 degrees, and the only relevant imperfections are a couple of wispy marks near the NT in CENT. The fields are nicely mirrored. The proof 1829 will be a centerpiece of even the most advanced holding of middle-date large cents. MRB PR60. (#1792)

1856 N-5 Cent, PR65 Red and Brown Famous Hines-Downing-Pittman Specimen

**1856 PR65 Red and Brown PCGS. N-5, Low R.5.** Ex: Pittman. The 1856 N-5 large cent is a proof-only date with about 60 examples believed to exist today, although few are as fine as this Gem Red and Brown specimen. This coin was previously in the collections of Henry C. Hines (1856-1946), Homer K. Downing (1898-1951), and John Jay Pittman (1913-1996).

Housed in a green-label PCGS holder, this cent has mostly orange mint color on the obverse blended with light olive toning, and deeper gold on the reverse intermingled with blue and violet. Several darker provenance spots are visible on each side, especially below the 1 in the date, at the dentil tips between stars 3 and 4, and below the right side of the N in CENT. MRB PR63.

Ex: Henry Hines; Homer Downing-1952 ANA (New Netherlands, 8/1952), lot 2221; John Jay Pittman (David Akers, 10/1997), lot 278. From The B & D Collection. (#1998)

1856 N-5 Cent, PR66 Red and Brown Proof-Only Variety, Robison Specimen

**1856 PR66 Red and Brown PCGS. CAC. N-5, Low R.5.** Perhaps as many as 60 examples of this proof-only variety still survive, but most are in lower grades than this piece. The Mint distributed proof large cents in larger quantities in 1856 and 1857 than at any previous time. The result is a higher survival rate, but many have become damaged or impaired in the intervening years. Relatively few exist in higher grades, and this piece ranks as one of the 10 finest known examples. Just six pieces carry the numerical PR66 grade, including two PR66 Red and Brown PCGS, two PR66 Brown NGC, and two PR66 Red and Brown NGC (2/11).

Housed in a green-label PCGS holder, this Premium Gem exhibits brilliant red and violet surfaces with slight mellowing of the original mint color. Design motifs on both sides are boldly defined and beautiful, while the surfaces are pristine. A splash of blue toning between stars 3 and 4, along with a tiny carbon fleck on the outer obverse rim at 5:30 will identify this specimen. MRB PR64.

Ex: Robison Collection (Stack's, 2/1982), lot 538; Auction '86 (RAR-COA, 7/1986), lot 1008; Superior (1/1995), lot 55; Bowers and Merena (7/1997), lot 21; Bowers and Merena (11/2008), lot 1167. (#1998)

### PROOF FLYING EAGLE CENT

# 1856

### Fully Struck Gem Proof Snow-3 1856 Flying Eagle Cent

**5025 1856 PR65 PCGS. CAC. Snow-3.** The Snow-3 die pair is considerably scarcer than Snow-9 and is associated with business strikes coined in 1856, instead of proof restrikes made a few years later. However, the current specimen has a full strike and mirrored fields, giving every indication of production as a proof, aside from its status as a Snow-3. The orange-gold and olive surfaces are devoid of contact and exhibit only infrequent pinpoint carbon.

In 2001, early small cent specialist Rick Snow wrote concerning Snow-3:

"Only rarely does this die pair show prooflike fields, a strong strike, and taken on its own merits could be considered a proof. It is entirely possible that a small pre-production run of proofs were struck prior to the non-proof press run. If in fact there are a few struck as proofs, they are in such a small minority as to make them a statistical anomaly."

If Snow is correct, the present example could have been among the first Snow-3 pieces struck. (#2037)

### **INDIAN CENTS**

Famous Doubled LIBERTY Snow-1, FS-101 1873 Cent, MS63 Red and Brown

**5026 1873 Doubled LIBERTY, Closed 3 MS63 Red and Brown PCGS. FS-101, Snow-1.** Along with the 1888/7, the key to a *Guide Book* collection of Indian cents. LIBERTY is widely die doubled, and less dramatic doubling is present on the profile and headdress feathers. This nicely struck and satiny representative features dusky orange-red and straw-gold throughout the fields, while the portrait, wreath, and legends are toned brown. Marks are essentially absent aside from a faded thin mark between the O in ONE and the C in CENT. Snow-1 is rare in Mint State, and only a single example has been certified by PCGS as Red, with its status as such questioned by specialists. Population: 9 in 63 Red and Brown, 11 finer (3/11). (#2116)

5027 1877 MS65 Red and Brown PCGS. CAC. Eagle Eye Photo Seal. Snow-2. An early state of this die pairing. The diagnostic die dot appears at the junction of the hair and neck just above the ribbon, but we do not see any of the clash marks or die cracks that are noted on later states. The striking details seen here are not quite as strong as usually seen on S-2 coins. However, the surfaces are magnificent, and this will undoubtedly be the centerpiece of a major collection of Indian cents. Approximately half of the original mint red still remains and makes the surfaces glow. We see no mentionable abrasions and only microscopic evidence of dots of carbon (magnification will be required). A memorable Gem example of this key to the series. Population: 52 in 65 Red and Brown, 3 finer (3/11). (#2128)

Gem Red and Brown 1877 Indian Cent

**5028 1877 MS65 Red and Brown NGC.** Note how the second 7 in the date is not only a trifle lower than the first 7, but the base and top of that digit are each broader than their parallels on the first 7. On the reverse, the bottom right part of the N in ONE is considerably weaker than other letters, and the die clash that appears on the reverse above O(NE) — from the near-right-angle area of the Indian's chin-neck area on the obverse — is practically a universal occurrence. This piece shows some limited areas that have turned brown, more so on the device high points of each side, but much original red and gold prevails throughout. A planchet lamination is as made on the reverse, left of O(NE). The strike and overall appeal are both excellent. (#2128)

### **PROOF INDIAN CENTS**

### 1859 Indian Cent, PR67 Only Four Similarly Graded

**5029 1859 PR67 NGC.** An important one-year type coin with a reported mintage of 800 pieces. Richard Snow writes of the 1859 proof in his series reference: "Very rare, as many were unsold and melted. Probably under a hundred pieces survive as no question proofs. Intense collector demand for this one year type." Walter Breen, in his proof *Encyclopedia*, queries: "Do as many as forty survive?"

NGC/PCGS population figures would seem to indicate that the extant population is higher; the two services have certified about 440 examples, undoubtedly including numerous resubmissions and crossovers.

This Superb Gem ranks among the four finest-graded examples, including one certified PR67 Cameo NGC, as this piece should be graded. The reflective fields are a beautiful orange-gold and establish pronounced contrast with the light tan motifs, especially when the coin is tilted slightly under a light source. The strike is complete throughout, and both sides are immaculately preserved. A coin with great eye appeal. Census: 2 in 67, 1 finer (2/11).

From The Estate of Robert R. Rollins Collection, Part One. (#2246)

1862 Copper-Nickel Cent, PR67 Cameo Exceptional Contrast, Deeply Reflective

**5030 1862 PR67 Cameo PCGS.** Ex: Palm Beach Collection. This coin exemplifies why the 1862 is considered the ultimate date for a copper-nickel cent type coin. In general, strike, mirroring, and planchet problems are not a problem on 1862 cents. That is certainly the case on this coin. The fields are deeply mirrored and the devices nicely frosted, which gives the coin a pronounced cameo contrast on each side. The obverse displays an even reddish coloration, while the reverse tends more toward the original whitish-tan the coin had when new. This is a memorable coin from this important set of proof Indian cents.

Ex: 2004 FUN Auction (Heritage, 1/2004), lot 4371. (#82259)

### LINCOLN CENTS

1918 Lincoln Cent, MS67 Red Registry Set Prize

**5031 1918 MS67 Red PCGS. CAC.** The 1918 Lincoln cent is an extremely common coin in circulated grades and lower Mint State grades, due to the massive postwar mintage of nearly 300 million coins. However, the emphasis in Philadelphia was certainly on quantity, as at the Superb Gem Red level of the present coin, there are only 10 submissions at PCGS, with a single finer (3/11). The surfaces are uniformly orange-red on both sides and show an unusual "crinkly" appearance, as made, with no singular contact and only a single small dark fleck on the reverse, above U(NITED). A prize for Registry Set collectors. (#2506)

AU53 1969-S Doubled Die Obverse Cent

5032 1969-S Doubled Die AU53 PCGS. FS-101. While the 1955 Doubled Die Obverse has the most press among Lincoln cent doubled dies, it is the 1969-S Doubled Die Obverse which combines prominence and rarity such that it has emerged as the key to the variety series. This lightly worn example is largely mahogany in color with variations into oak-brown and gold at parts of the margins. The strike is a trifle soft in the date area, but the doubling on the lettering is as crisp as a collector could want. Dedicated Lincoln cent enthusiasts will want to pay close attention to this infrequent opportunity. Population: 2 in 53, 19 finer (3/11). (#2921)

### THREE CENT SILVER

MS65+ 1855 Three Cent Silver

**5033 1855 MS65+ PCGS. CAC.** An uncommonly high-end survivor from the Type Two or "double outline" subset of three cent silvers. The silver-gray areas show prominent rose tints, while mustard-gold, green, and lavender-violet hues are strongest at the peripheral obverse and through the reverse. The strike is uneven, with the definition particularly soft on the stars above the denomination, yet the warm, slightly frosted luster gives this piece visual appeal that is not to be denied. Great eye appeal from an issue numbering just 139,000 pieces. Population: 1 in 65+, 5 finer (3/11). (#3671)

### PROOF THREE CENT SILVER

Premium Gem Proof 1856 Trime Among the Finest Certified

**1856 PR66 NGC.** No official mintage records exist for the proof 1856 trime, but the production total must have been quite small. Walter Breen believed only 30-40 specimens survive in all grades, and the present coin is tied with one other example for finest certified at NGC (2/11).

This splendid Premium Gem proof exhibits faint lilac splashes on otherwise brilliant silver surfaces with deeply mirrored fields that frame its lustrous silver devices. Design elements are bold and carry a cameolike presentation on the fields. In fact, this piece may qualify for a Cameo designation, although no designation is currently on the holder. The fields show prominent die polishing lines that are usually encountered on true proofs. Few coins can match the appeal of this spectacular example.

From The B & D Collection. (#3703)

1873 Three Cent Silver PR67 ★ Ultra Cameo

5035 1873 PR67 ★ Ultra Cameo NGC. Just 600 pieces were struck for this proof-only issue, the last of the three cent silver series. Not all of the coins survived; Walter Breen's *Proof Encyclopedia* noted "Many melted July 10, 1873." Moreover, the deep toning that appears on most examples dims much of those coins' inherent contrast. This Ultra Cameo coin has no such worries. The fully detailed devices are thickly frosted and offer great contrast with the surrounding mirrors. Aside from occasional pale gray overtones, the only hint of patina is a suggestion of green-gold along the right rims. A stunning Superb Gem specimen that is entirely deserving of its Star designation. (#93724)

### THREE CENT NICKEL

Premium Gem 1884 Three Cent Nickel None Finer at PCGS

**1884 MS66 NGC.** Only 1,700 business-strike three cent nickels were struck in 1884, the second smallest regular-issue mintage of the series. In addition, few examples were saved by collectors in 1884, and the date has a low survival rate. In today's market, the 1884 is the most difficult issue of the series to locate, outdistancing the lower-mintage 1885. The 1884 is the key to the business-strike series.

The present coin is a delightful Premium Gem with sharply detailed devices and strong satiny mint luster. Intermingled shades of green and lavender toning blanket the unmarked surfaces. Eye appeal is outstanding. Census: 4 in 66, 0 finer (3/11). (#3752)

### PROOF THREE CENT NICKEL

## PROOF SHIELD NICKELS

First-Year 1865 Three Cent Nickel PR66 Deep Cameo

**5037 1865 PR66 Deep Cameo PCGS.** The three cent denomination, which began as a subsidiary silver coin, had faded into near-irrelevance by 1865, when the copper-nickel version was first produced. The "three cent nickels" quickly supplanted their silver counterparts, thanks to a first-year production of more than 11.3 million business strikes, more than double the mintage of any other year. While the business strikes of 1865 are abundant, their proof counterparts number among the fewest, with somewhere north of 500 specimens made.

That makes the 1865 proof issue challenging regardless of condition and puts tremendous pressure on the few Deep Cameo survivors, such as the present piece. Light green-gold toning covers parts of the boldly mirrored fields, while the devices are thickly frosted nickel-white. As always, strong repunching on the date adds visual interest. Population: 8 in 66 Deep Cameo, 2 finer (2/11). (#93761)

1866 Shield Nickel, PR67 Cameo The More Accessible With Rays Proof

5038 1866 Rays PR67 Cameo NGC. The "nickel" as the average person understands it today began in 1866, when the With Rays Shield nickel, the first design for the copper-nickel five cent piece, made its circulation debut. Along with the more than 14 million business strikes that first year, some 600-plus proofs were also produced for collectors, unintentionally creating the only With Rays proof Shield nickel issue that is accessible to most contemporary numismatists.

Of course, any issue has its extraordinary representatives, and this Cameo PR67 representative is sure to be appreciated by even the most elite collectors of nickels. Faint hints of peripheral green-gold grace otherwise nickel-white surfaces that shift between mirrorpolish in the fields and appreciable frost on well-defined devices. Census: 7 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83817)

# Interesting and Rare 1867 Rays Shield Nickel PR66 Cameo, Dannreuther-1

**5039 1867 Rays PR66 Cameo NGC. Dannreuther-1.** The 1867 Rays Shield nickels were apparently struck, then restruck at various times, according to extensive research conducted by John Dannreuther, published in the June 2007 PCGS *Rare Coin Market Report* and previously summarized in the 2006 Bowers *Guide Book of Shield and Liberty Head Nickels.* 

According to the latter reference:

"The 1867 With Rays Proof ... is a classic rarity. Probably no more than several dozen are known; there are some prooflike Mint State coins that have been mistakenly called Proofs. The mintage is unknown. Students of the series have given many opinions, including the statement that no Proofs at all were struck until several years later. John Dannreuther, who has studied the die technicalities, has demonstrated that Proofs were struck on several runs. Per the same authority, an estimated 15 originals were made in 1867, plus perhaps three or more times that many were made on at least five later production sequences. Likely, dealers with close connections to the Mint — John W. Haseltine being the prime example — simply ordered more Proofs as needed for store stock. The depth and breadth of such restriking is just beginning to be appreciated, with new leading-edge scholarship by Dannreuther and others."

Among the characteristics for Dannreuther-1 are:

- —the left serif of the 1 in the date over the right half of a dentil;
- -7 in date recut;
- —the lack of die polish within the vertical stripes at the bottom of the shield;
- —a fully detached upper right olive leaf;
- —and probably the most obvious of all, the frosted devices and deeply reflective fields, indicative of fresh dies.

The Bowers reference notes further down that "the earliest [die] state was used to strike With Rays Proofs on or before February 8, 1867, then Without Rays Proofs, and then more With Rays Proofs." This piece appears to be a later die state of the obverse as, despite the abundant cameo contrast, some of the leaves are assuming a "hollowed" look and a couple of the berries are detached, sans stems

As noted, intense contrast is evident throughout, and the surfaces are mostly nickel-gray, with faint glints of rose on the obverse. We note an interesting planchet flaw or strike-through on the right part of the W in WE, and another die crack on the reverse, through the U in UNITED and the rays below, appears to connect to a small planchet lamination. A couple of other minor planchet blemishes appear on the reverse under a loupe, all Mint-made. There are no other obvious marks or contact on either side. An appealing and interesting coin (as well as a quite rare one) that should prove equally rewarding to the type collector or specialized researcher. Census: 2 in 66 Cameo, 2 in 66 ★ Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83818)

# Extremely Rare 1867 Rays Shield Nickel PR66 ★ Cameo, Dannreuther-2 Tied for Finest Certified

**5040 1867 Rays PR66** ★ **Cameo NGC. Dannreuther-2.** The left base of the 1 in the date is over the left portion of a dentil. The lower portion of the shield displays die polish. The lower shield is clear for Dannreuther-1, and Dannreuther-3 has the left base of the 1 over the right portion of a dentil. The rarity of the proof 1867 Rays nickel was known to collectors at an early date, and it appears that the Mint made unofficial restrikes between 1867 and 1879, likely for sale at a profit to well-connected Philadelphia dealers.

The 1867 Rays nickel has a traditional proof mintage of 25 pieces, which presumably applies only to examples struck in early 1867. In the 2006 Guide Book of Shield and Liberty Head Nickels, Q. David Bowers estimates a mintage of 55 to 80 proofs. This figure is approximately 10% of the 1867 No Rays mintage, and less than 2% of the proof production for the 1883 Shield nickel. The key date status of the proof 1867 Rays variety is unchallenged.

Delicate plum-red, gold, and ice-blue toning visits this flashy and intricately struck Premium Gem. The attractive patina is undoubtedly the inspiration for the Star designation awarded by NGC. For those who research the pedigrees of this rare variety, we note a small planchet flake beneath the E in CENTS, and a curly Mint-made lint mark at the lower right corner of the N in IN.

NGC has seen 30 proof 1867 Rays nickel "certification events" in all grades, although several of those certainly represent duplicate submissions (3/11). None have been certified as Ultra Cameo, and none have been certified without a Cameo designation above the PR65 level. Four proofs are graded PR66 Cameo, but only this piece and one other (or the present piece twice) have garnered the Star designation. The present piece thus holds the honor of tied for finest NGC-certified, assuming the two pieces are different coins. The PCGS population is similar, with none encapsulated as Deep Cameo and none certified higher than PR66 with or without a Cameo designation.

From The Slotkin Family Trust Collection. (#83818)

### Ultra Cameo Superb Gem Proof 1867 No Rays Nickel

**5041 1867 No Rays PR67 Ultra Cameo NGC.** The first of the No Rays proof issues in the Shield nickel series, a design change that would last until the end in 1883. Out of an estimated 600+ proofs produced for the 1867 No Rays, this is the single finest of just three specimens rated as having Ultra Cameo contrast by NGC (3/11). A faint olive-gold overtone across parts of the gleaming mirrors serves only to heighten the essential contrast between fields and sharply struck, thickly frosted devices. Marvelously preserved with only a few minuscule irregularities, such as a tiny toning dot at the lower right obverse, to serve as future pedigree markers.

From The Slotkin Family Trust Collection. (#93821)

### Superb Gem Cameo Proof 1871 Nickel

**1871 PR67 Cameo NGC.** While mintages of proof Shield nickels from 1866 to 1877 are inexact, it is clear from reading the patterns of stated strikings that the first high-production period for the series began in 1870, when strikings took a jump from the 600-piece range to four-figure production. The 1871 nickel has a slightly lowered official mintage but still falls in the higher range for the early years at 960+ examples. This moderately contrasted example has light frost and mirrors, the latter showing green-gold toning patina along parts of the margins. Census: 4 in 67 Cameo, 1 in 67 ★ Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83825)

### PR67 Cameo 1877 Shield Nickel

**5043 1877 PR67 Cameo NGC.** In the years between 1876 and 1882, dates when the Philadelphia Mint produced multiple millions of Shield nickels, the denomination was utterly neglected. Total business strike mintages for the intervening five years were in the low six figures, with the first two years, 1877 and 1878, contributing nothing at all to the total.

This is a Superb Gem Cameo proof representative of the former issue, which has the lower proof-only mintage of the two. Pale nickel-white surfaces are moderately contrasted on each side with a few small dots of greenish-gold border toning noted at the lower obverse. Census: 3 in 67 Cameo, 1 in 67 ★ Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83831)

Proof-Only 1877 Shield Nickel PR67 ★ Cameo

**5044 1877 PR67** ★ Cameo NGC. For the first time since the debut of the five cent nickel in 1866, there were no business strikes produced for the denomination in 1877. Only proofs were minted, creating a series key that is recognized widely today; the official mintage of 510 pieces is supplemented by an unknown quantity of off-the-record strikes. This is an impressively preserved specimen with moderate to heavy contrast and hints of aqua and emerald scattered in gleaming fields that are otherwise nickel-white. Out of four examples graded PR67 Cameo by NGC, this is the only one to receive the Star designation (3/11).

From The Slotkin Family Trust Collection. (#83831)

PR68 1879/8 Shield Nickel

**1879/8 PR68 PCGS.** The underdigit is clear on this overdated proof, which in itself is an unusual but not unprecedented occurrence in U.S. coinage history. The overdate aside, this is among the most impressively preserved specimens that could be imagined for the issue. While contrast is light, owing to the luminous lavenderblue and peach patina over each side, the mirrors retain considerable gleam, particularly on the reverse. Faintly frosted devices offer characteristically exquisite detail. PCGS has certified six examples as PR68 with one coin numerically finer (3/11).

From The Slotkin Family Trust Collection. (#3834)

PR68 Cameo 1881 Shield Nickel Finest Cameo Certified

**5046 1881 PR68 Cameo NGC.** The proofs of the 1881 Shield nickel highlight the inherent tension between such pieces and their corresponding business strikes. While the proof 1881 pieces have the third-highest mintage within their series, the business strike 1881 issue saw production only in the five figures, and the date is well-established as a semikey. In any event, a coin so high-end as this PR68 Cameo specimen is more likely to be appreciated as a keystone of a proof collection rather than a business-strike substitute. Pale green-to-gold patina has settled over parts of the powerful mirrors, and the cameo effect is stronger than the devices' light frost might suggest. Census: 1 in 68 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#83836)

### **PROOF LIBERTY NICKELS**

With Cents 1883 Liberty Nickel PR67 ★ Cameo

5047 1883 With Cents PR67 ★ Cameo NGC. After the initial Liberty nickel design was modified during the year of its debut, proofs were struck of the new With Cents type. This was the third and final type of proof five cent coin struck in 1883, after the Shield nickel and the No Cents Liberty type, and the With Cents coins had the highest nominal mintage in both proof and business strike categories. Nonetheless, finding a survivor this high-end is an unusual occurrence; NGC has graded only this coin as PR67 ★ Cameo with just one PR68 ★ Cameo coin finer (3/11). This specimen is carefully preserved with strong contrast within the Cameo category, virtually black-and-white save for a hint of aqua and jade patina near the borders.

From The Slotkin Family Trust Collection. (#83881)

Ultra Cameo PR67 1896 Nickel

**1896 PR67 Ultra Cameo NGC.** The present Superb Gem is one of just three Ultra Cameo examples of this issue known to NGC and the best specimen by a point (3/11). Unlike many Cameo examples of the Liberty nickel series which often show indifferent contrast, this Ultra Cameo coin offers bold, eye-catching frost on the sharply struck central devices, and the glassy mirrors offer subtle golden overtones. Beautifully preserved with impressive eye appeal by any standard. The 1896 was the lowest-mintage proof Liberty nickel issue to that time, with total production of just 1,862 pieces.

From The Slotkin Family Trust Collection. (#93894)

### Cameo PR68 1897 Liberty Nickel

**1897 PR68 Cameo NGC.** A profoundly flashy but distinctly Cameo specimen that offers a great visual balance between color and contrast. The viewer is immediately conscious of the inherent field-to-device contrast, though the portrait appears more satiny than frosted at a distance. This is in part an effect of the toning over each side, which appears gold-green at the obverse borders with pale nickel-blue at the interior. The reverse offers a mix of the two colors with the former hue covering a majority of the fields on that side. Census: 3 in 68 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#83895)

Cameo PR67 1902 Nickel

1902 PR67 Cameo PCGS. Cameo examples of the Liberty nickel proof series are challenging enough to find in the early years, when the process for making proof dies favored contrast. For post-1901 issues, the nickname "brilliant era" is well-deserved, yet a handful of gorgeous exceptions turn up year after year. This is among them for 1902, a moderately contrasted Superb Gem with a light wash of greenish-gold patina over gleaming mirrors and a few outer areas of the finely textured and exquisitely detailed central devices. Amazing eye appeal. Population: 6 in 67 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#83900)

### Outstanding PR68 1905 Nickel

**5051 1905 PR68 NGC.** The 1905 is one of several proof Liberty nickel issues for which Cameo specimens are inherently rare. In the absence of Cameo coins, low-contrast but high-appeal pieces such as this PR68 survivor emerge as the most desirable representatives of the issue. Bold color is the signature aspect of this profoundly mirrored piece, which has canary-yellow, orange, and lavender-blue outer hues that fade into lighter centers, pale yellow on the obverse and a slightly deeper nickel-blue on the impressively preserved reverse. Census: 2 in 68, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#3903)

### **BUFFALO NICKELS**

Famous 1916 Doubled Die Obverse Nickel FS-101, XF40

**5052 1916 Doubled Die Obverse XF40 NGC. FS-101.** It is remarkable to many numismatists today that the 1916 Doubled Die Obverse nickel, one of the most blatant doubled dies of any U.S. denomination, would have spent nearly half a century in obscurity before it was discovered. Awareness of doubled dies and similar varieties was not widespread before 1955, the year the bold 1955 Doubled Die Obverse cent captured the public imagination, and many important varieties, including the 1916 Doubled Die Obverse nickel, were not found until the 1960s.

By then, many examples had worn to some degree. While this piece experienced a degree of wear, it is nonetheless pleasing, faintly luminous with peach-gray patina and few significant marks. This is one of the relative handful of circulated coins that creates a solid impression of "quality." Census: 6 in 40, 49 finer (3/11). (#3931)

Well-Struck Premium Gem 1918-S Nickel Rare Registry Set Prize

**1918-S MS66 NGC.** The 1918-S Buffalo nickel is among the first of the legendary S-mint rarities that dot the series, although most of them cluster in the early through mid-1920s. Only the finest Buffalo nickel Registry Sets can ever hope to achieve a 1918-S in Gem condition — much less the Premium Gem level of the present piece. For most collectors, they will have to hope to obtain a nice 1918-S at the Select or Choice Mint State level, and even in those grades the issue is deucedly difficult.

The present piece is well but not quite fully struck. Even so, there is evidence of a split tail on the bison, which is also appropriately shaggy, if not absolutely so. Neither side shows any singular marks, and lovely golden tinges prevail over nickel-gray surfaces with minor iridescence and excellent luster. Some nifty strike doubling appears on the obverse. Census: 1 in 66, 1 in 66  $\bigstar$ , 0 finer (3/11). (#3940)

Sharply Struck 1920-D Nickel, MS65+ With Splendid Toning

**1920-D MS65+ PCGS. CAC.** The 1920-D Buffalo nickel issue is one known for both middling luster and a generally inadequate strike, and this coin is the exception on both counts. Intense luster wafts from both sides, the likely reason for the Plus grade. The strike, while not full, is much better than normal for the issue, with pleasing shaggy detail on the buffalo's hide (but little evidence of a split tail). The obverse is crisply struck as well, while short of completely. A small die crack crosses the high point of the Indian's cheek. The splendid variegated color palette comprises gold, olive, ice-blue, and lilac in pleasing proportions. A Registry Set prize; PCGS has graded this single coin in 65+, with two pieces finer (3/11). (#3945)

### Amazingly Well-Struck Gem 1923-S Nickel

5055 1923-S MS65 PCGS. CAC. The S-mint Buffalo nickels of the series are legendary for their elusiveness in the higher Mint State grades, particularly a handful of issues from the late teens-early 1920s. A short list at the Gem level would include the 1918-S, 1921-S, the 1923-S through 1925-S, and of course the lowest-mintage 1926-S. This Gem 1923-S Buffalo is certified in a green-label holder and accompanied by the CAC green-label approbation. The strike on this coin is incredible, a simply amazing strike that we are tempted to call *full*. The tail is split, the bison is shaggy, the horn and eye are complete, and all obverse details are equally pleasing. Obviously beauty and fullness of strike are both in the eye of the beholder, but we recommend a personal inspection, as it will not disappoint. The prevailing color is a light olive-gray, with traces of iridescence on the obverse. Population: 34 in 65, 2 finer (3/11). (#3950)

Lovely, Well-Struck 1924-S Nickel, MS65 Lange: Tied With 1926-S for Most Elusive

**5056 1924-S MS65 PCGS. CAC.** The 1924-S Buffalo nickel is an issue with a mintage of only 1.437 million coins — fourth lowest of the entire series — and survivors in any grade above Fine are elusive. David Lange's reference offers these comments:

"Seemingly the most difficult date in the series in grades VF-AU, 1924-S is also quite rare in mint state. Although largely spared the technical problems that plague other key dates, it is rare by virtue of its poor survivorship in desirable grades. 1924-S nickels are much scarcer than the vaunted 1926-S in grades VF-AU, although both are rare in mint state. In fact, these two dates are tied for first/second place with the lowest certified mint state populations."

This Gem example is certified in a green-label holder and also has the CAC green label. Lovely olive, jade, and gold hues waft over both sides. The strike, while incomplete, is much bolder than normally seen, and singular contact is simply a nonissue. A coin that will never need upgrading, and indeed one that would be near-impossible to upgrade, given the PCGS Population: 31 in 65, 1 finer (3/11). (#3953)

Choice 1937-D Buffalo Nickel Prized Three-Legged Variety

5057 1937-D Three-Legged MS64 PCGS. CAC. FS-901. The 1937-D Three-Legged Buffalo nickel is one of the most famous and sought-after error coins in the U.S. federal series. The 1937-D was produced in large numbers, and the dies were used until they developed heavy erosion problems, and one set of dies clashed. Mint employees tried to erase the clash marks by polishing the die surfaces. An unintended consequence of this procedure was the eradication of the bison's leading foreleg. The error went unnoticed, and the coins were released, most examples surfacing in Montana. The variety was discovered almost immediately, and became a prime target for coin hunters. Its popularity remains undiminished today.

The present coin is a well struck Choice example, patinated in attractive shades of ice-blue and gold. The luster is a trifle subdued, as David Lange notes the overworked dies caused the coins to have "very diffused light reflection." Overall, this coin possesses excellent visual appeal. (#3982)

1937-D Three-Legged Buffalo Nickel, MS65 Satiny Surfaces With Rich Rose Toning

5058 1937-D Three-Legged MS65 NGC. FS-901. The discovery of the Three-Legged Buffalos was published in *Numismatic Scrapbook Magazine* in 1937-38, shortly after the coins were minted. This is a serendipity for collectors, and a similar story to the later 1955 Doubled Die Obverse Lincoln cent. Both were found soon after their creation, and today examples are readily obtainable for a price in nearly any grade desired. Only in the highest Mint State grades do examples command extremely steep prices. Both are also available in more reasonably attainable Mint State grades such as MS61 through MS63. A couple of thousand Three-Leggeds have been certified in Mint State at NGC and PCGS combined, with a only a small handful in the MS66-67 range, the latter only at NGC (3/11). Despite the large supply, the popularity of the variety is such that buyers eagerly snap up nice examples whenever they appear.

This coin has wonderfully satiny surfaces with even rose toning over each side. The satiny mint luster is noteworthy, as many Three-Legged nickels have subdued mint luster. No abrasions are apparent to the unaided eye. An exceptional opportunity to acquire this popular issue in one of the finest grades obtainable. Census: 55 in 65, 18 finer (3/11). (#3982)

### PROOF BUFFALO NICKEL

# FIVECENTS

### Superb Gem Proof 1916 Nickel

**5059 1916 PR67 NGC.** "Effective at once, you will please discontinue the manufacture of proof coins." With that sentence in late 1916, Mint Director Frederich von Engelken ended regular production of proof sets for the next two decades. At the time, only 600 two-coin minor proof sets had been issued, each containing a matte proof Lincoln cent and a Buffalo nickel such as the present piece. This beautifully textured and carefully preserved specimen has generous satiny nickel-white luster with pale gold and peach overtones gracing parts of each side. Census: 18 in 67, 1 in 67 ★, 1 finer (3/11). From The Slotkin Family Trust Collection. (#3993)

### **SEATED HALF DIME**

Iridescent-Toned 1870 Half Dime, MS68 ★ Sole Finest at NGC

5060 1870 MS68 ★ NGC. The 1870 half dime is, according to Al Blythe, a common date, with a mintage of 535,000 business strikes. The present coin is nonetheless found in an extremely uncommon condition. This piece is one of only two MS68s of the issue certified at NGC, and the sole possessor of the Star designation for superior eye appeal. The centers of each side are radiant silver-white, with iridescent shades of blue, jade, and copper at the rims. A curious area of roughness, as made at the Mint, appears in the crook of Liberty's upturned arm at the elbow. Whether this is a planchet flaw or something in the die, we cannot say. A marvelously appealing half dime from shortly before the series ended in the "Crime of '73." (#4396)

### PROOF SEATED HALF DIMES

### Select Proof 1847 Seated Half Dime Fewer Than a Dozen Pieces Minted

**5061 1847 PR63 NGC.** The 1847 proof Seated Liberty half dime was minted more than a decade before the Mint began its commercial offerings of proof sets, and no mintage figures were recorded. The number struck was certainly small, probably no more than 10-12 examples. The known specimens are all of the V-2 variety, with the tops of all the numerals in the date touching the base of the rock and heavy reverse lettering.

The present coin is a sharply detailed Select specimen, with fine detail showing on the stars, wreath, and bow. The surfaces are brightly reflective, and display vivid green and lavender patina. Census: 2 in 63, 4 finer (3/11). (#4423)

Premium Gem Proof 1856 Half Dime Ex: Pittman, None Certified Finer

**1856 PR66 NGC.** The 1856 proof half dime is a rare issue from an unrecorded but undoubtedly small mintage. David Akers estimates only 30-35 examples are extant today in all grades, and the date is very rare at the Premium Gem level. This is only the third time Heritage has been privileged to handle an 1856 half dime in PR66. The spectacular Premium Gem offered in lot 1793 of the Milwaukee ANA Auction (Heritage, 8/2007) realized \$17,250.

The present coin claims an illustrious pedigree to the famous John Jay Pittman Collection. Pittman was widely known for the high quality of his coins, and this example more than lives up to his standards. Delicate champagne toning on the obverse and light heather toning on the reverse fail to subdue the brilliant mirrored finish and distinct cameo contrast of this Premium Gem. The obverse has reddish splashes that provide additional character. Both sides feature a strong strike that only shows weakness along the obverse border, with a few tiny planchet flakes on otherwise pristine surfaces. Census: 5 in 66, 0 finer (2/11).

Ex: Paul Sietz, purchased by John Jay Pittman on 7/1/1947 for \$15; John Jay Pittman Collection (David Akers, 10/1997), lot 504. From The B & D Collection. (#4434)

### **EARLY DIME**

MS64 1807 Draped Bust Heraldic Eagle Dime, JR-1

**5063 1807 MS64 PCGS. CAC. JR-1, R.2.** The only variety of the year. This is a gorgeous representative of this early dime issue, with shimmering satin luster and indisputably original gold, rose, electric-blue and light-gray coloration. Moderate die clash marks are observed on the obverse, but neither side reveals any distracting marks or problems. According to *Early United States Dimes 1796-1837*, the standard reference for the series: "Fully 90% of 1807 dimes show heavy clash marks, especially on obverse near date and before face." Population: 19 in 64, 7 finer (3/11). (#4480)

### **BUST DIMES**

JR-1 1822 Dime, AU58+ Key to the Capped Bust Series

**5064 1822 AU58+ NGC. JR-1, R.4.** Sole die pair for the year, and very scarce regardless of grade. In the better circulated grades, it emerges as a significant condition rarity, to say nothing of its status in Mint State. This AU58+ survivor straddles the two worlds; its high points show enough rub that the coin cannot be called Uncirculated, yet its surface quality is magnificent. Gold and orange patina covers much of the obverse, while the reverse adds elements of blue along the reverse borders. Immensely lustrous and beautiful. Striking weakness on several obverse stars is not unusual. Census: 1 in 58+, 9 numerically finer (3/11). (#4497)

1827 JR-6 Dime, MS67 Tied for Finest Certified

**1827 MS67 NGC. JR-6, R.2.** Undoubtedly the finest known of the variety, this piece is tied with one other MS67 NGC coin for the finest certified of the date (2/11). Star 6 is high and close to the lower edge of a denticle, the ED of UNITED is close and even at the base, and the I in the motto is under the right foot of the second T in STATES.

The surfaces display bright luster and are enveloped with delicate, variegated cobalt-blue and pastel tan patination. A sharp strike characterizes the design elements, except for softness on the centrils of stars 1 and 2, and on those along the right border. Minor softness is also noted on some of Liberty's hair curls, on the eagle's neck feathers, and on the horizontal lines of the upper right part of the shield. The vertical stripes are mostly solid, typical for the variety. Both sides are nicely preserved and reveal just a couple of wispy handling marks in the left obverse field. A truly magnificent coin for the Capped Bust dime specialist. (#4504)

1832 JR-4 Dime, MS65 Rarely Offered in High Grade

**5066 1832 MS65 PCGS. CAC. JR-4, R.3.** While Obverse 3 was used on other varieties this year, the Reverse C pairing is distinctive with the wide spacing between SO. Over the past 18 years, this is only the fifth offering of a Mint State example of this variety in any of our sales, and this is the finest of those coins. The JR-4 variety is one of seven known die marriages for the year, and all seven are similar in rarity. Four of those are rated R.3 and the other three are R.2. This is a lovely Gem example with olive and pale gray color over satiny silver luster. Population: 15 in 65, 5 finer (3/11). (#4521)

### **PROOF BUST DIME**

1835 JR-4 Capped Bust Dime, PR63 Less Than 10 Proofs Known

**1835 PR63 PCGS. JR-4, R.2, R.7 as a Proof.** Breen's *Proof Encyclopedia* aptly describes this variety: "Wide date, 'horned' 8, recut 3, high 5, UN even but too high. Tall 0 in 10 C." Stars 1 and 10 touch denticles at the border. The D ending UNITED is noticeably lower than the rest of the word. The mintage of this early dime issue is unknown but minuscule by any measure. Some sources estimate the entire mintage at only 10 pieces, although that figure seems on the low side. This piece offers smoke-gray and aqua patina over surfaces that show considerable cameo contrast. Population: 3 in 63, 7 finer (2/11). (#4557)

### **SEATED DIMES**

1855 Arrows Dime, Astounding MS68 Tied for Finest Certified

5068 1855 Arrows MS68 NGC. This beautiful Superb Gem type coin is close to brilliant, although specks of faint tan toning are present here and there. These flecks of color make this otherwise brilliant coin identifiable. Three faint golden-brown dabs are seen in the right obverse field above the foot of Liberty, and a similar number are located in the left obverse field. On the reverse there are a few faint freckles of color in the field below the ME in DIME and just above the right part of the wreath. The design motifs are well struck aside from the dentils on the rim on the lower part of the reverse. The preservation is outstanding, since careful evaluation is necessary to locate the occasional faint grazes. The mint luster is softly frosted, and the essentially untoned appearance of the coin allows full appreciation of the lustrous finish.

Arrows dimes were struck for only three years, 1853 to 1855. By 1849, West Coast gold was mined in sufficient quantity to increase the relative value of silver. Silver coins were promptly hoarded and melted. The Mint responded by reducing the weight of silver coins in 1853, which allowed them to circulate. Arrows were added to the date to denote the new tenor. The 1853 production was prodigious and ended the shortage of silver in circulation, but by 1855, mintages were reduced to normal levels and Mint State pieces are elusive. Census: 2 in 68, 0 finer (3/11).

Ex: 2008 Long Beach Auction (2/2008), lot 101, where it brought \$43,125. (#4607)

Well-Struck 1872-S Seated Dime, MS65 Late-State Obverse Die, Sole Finest at NGC

**5069 1872-S MS65 NGC.** Die economy was the theme at the San Francisco Mint for this issue of 190,000 coins, as Brian Greer's series reference notes that most of the survivors show the same die crack. On this piece it passes from the tops of 187 in the date to the bottom of the rock above the 2, and to the left-side corner of the rock in the other direction up to UNITE, sounding a bit more extensive than the Greer description. That die economy was a theme is unsurprising, as the dies were all made in the Philadelphia Mint shop, nearly 3,000 miles away. This piece is well-struck overall, with pinkish-gray surfaces and lots of eye appeal. The weakness on the left side of the wreath is also a common occurrence. This coin is also the single finest certified at NGC (3/11). (#4658)

### **PROOF SEATED DIME**

### 1856 With Stars Dime, PR66 Ex: Eliasberg, Only One Graded Finer

**5070 1856 PR66 NGC.** The mintage figure for the 1856 proof Seated Liberty dime is unrecorded, but experts estimate only 35-45 specimens survive today in all grades. A search of auction records reveals only four prior appearances of the 1856 proof dime in Premium Gem condition over the last two decades, with a single offering of a finer coin in PR67. The fabulous Superb Gem in lot 1794 of the Milwaukee ANA Auction (Heritage, 8/2007) realized \$29,900.

The present coin was once a highlight of the famous Eliasberg Collection, perhaps the most famous coin collection of all time, justly noted for its quality and completeness. This PR66 example is a worthy representative of that famous holding. Both sides exhibit satiny devices with deeply mirrored fields and sufficient contrast that a Cameo designation is deserved, although this piece is currently undesignated. The obverse has lovely gold, heather, and blue toning, while the reverse has a similar but lighter presentation. Minuscule marks on each side do little to prevent a strong grade assessment. Census: 2 in 66, 1 finer (2/11).

Ex: John G. Mills (S.H. and H. Chapman, 4/1904); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 1152.

From The B & D Collection. (#4745)

### **PROOF BARBER DIMES**

1895 Cameo Barber Dime, PR68 Immaculately Preserved

**5071 1895 PR68 Cameo NGC. CAC.** The 1895 circulation strike dime is a well-known condition rarity with only 690,000 pieces produced. Among Philadelphia issues it ranks first in both overall Mint State rarity and MS65 and finer rarity. This is important since business strikes are so difficult that significant date pressure has traditionally been exerted on the proofs of this date. This is a wondrous proof. The fields are deeply mirrored on each side and set up a "black" background for the frosted whiteness on the devices. The centers are dazzlingly brilliant and surrounded at the margins by golden-rose and blue rings of toning. The surfaces appear perfect, even with magnification. Census: 4 in 68 Cameo, 0 finer (3/11). (#84879)

1896 Barber Dime, PR67 Deep Cameo Tied for Finest Certified

**5072 1896 PR67 Deep Cameo PCGS.** This date is well known for uniformly high-quality proofs across all the denominations. While numerous Cameo and even Deep/Ultra dimes can be located, it is evident that preservation in high grades was a particular problem. In general, it just did not happen. Only one other PR67 Deep Cameo has been certified by PCGS, and a single Ultra Cameo has been graded by NGC (3/11). This is an exceptional, starkly contrasted proof with deeply reflective mirrors in the fields and equally thick mint frost over the devices. As one would suspect from a PR67, there are no contact marks on either side. Brilliant throughout.

Ex: 2007 FUN Auction (Heritage, 8/2007), lot 593. From The Peter Kevorkian Collection. (#94880)

# ONE

### 1900 Barber Dime, PR67 Deep Cameo Overlooked Issue With Deep Contrast

**5073 1900 PR67 Deep Cameo PCGS. CAC.** When we first offered this coin at auction four years ago, it was the first PR67 Deep Cameo 1900 dime certified by PCGS. It remains so today (3/11). Each side of this stunning coin is brilliant with deeply mirrored fields and heavily frosted, contrasting devices. The 1900 dime is an underrecognized rarity with Deep/Ultra Cameo contrast. Only nine total pieces have been certified in all grades and range from PR62 to this piece (which is tied with four examples at NGC). Both obverse and reverse are virtually perfect, with no obvious flaws; the only pedigree identifier might (or might not) be a milky spot of color at the top of the wreath on the reverse.

Ex: 2007 ANA Auction (Heritage, 8/2007), lot 596. From The Peter Kevorkian Collection. (#94884)

### **MERCURY DIMES**

AU58+ Full Bands 1916-D Dime

**1916-D AU58+ Full Bands PCGS Secure.** Given the choice between a heavily abraded MS61 or MS62 example of a key date and an attractive AU55 or AU58 example, many collectors attuned to coins rather than holders will show an obvious preference for the latter. Certainly a coin like the present lot would be fit to join a set that is otherwise Select Mint State or so. The strike is sharp, especially on the reverse bands, and the high points show only the slightest trace of wear. Gold and blue shadings grace amply lustrous surfaces that are remarkably unabraded, and the eye appeal as a whole is excellent. (#4907)

1917-D Dime, MS66 Full Bands Multicolored Toning With Strong Underlying Mint Luster

**5075 1917-D MS66 Full Bands PCGS. CAC.** Ex: Joshua II Collection. In the context of the Joshua II Collection, this coin was unusual in that it was not a Superb Gem, though this is hardly the fault of the collector; PCGS has still not certified a single MS67 Full Bands piece in its Population Report (3/11), and there are just six MS66 Full Bands coins tied for finest. This is one of them, brightly lustrous with subtly frosted surfaces beneath ethereal but colorful patina. Green-to-gold peripheral toning is most prominent, while the centers offer a mix of silver-gray and subdued rose.

Ex: Joshua II Collection of Mercury Dimes, #1 All-Time Finest PCGS Registry Set/2010 ANA Auction (Heritage, 8/2010), lot 4493. (#4913)

MS67 Full Bands 1921-D Dime One of the Two Finest Certified

**5076 1921-D MS67 Full Bands NGC.** The 1921-D is definitely a semikey along with the 1921 in the Mercury dime series compared to the vaunted 1916-D key, and grade for grade they are much more available and less expensive than their earlier counterpart. The upside to this, however, is that nice Mint State examples are at least available and comparatively affordable in relation to the '16-D.

The present example, however, is no ordinary Mint State example, but rather one of only two Full Bands examples certified at NGC, and there are none finer (3/11). (The finest at PCGS are 15 MS66 Full Bands submissions.) This piece exhibits superb, swirling mint luster over surfaces that are lightly toned in shades of pale lilac and rose. A pronounced die crack appears on the obverse, running from the rim left of the first 1 to the upper part of the neck, a not-infrequent occurrence on the issue. (#4937)

### 1945 Mercury Dime, MS66 Full Bands

5077 1945 MS66 Full Bands PCGS. The 1945-P Mercury dime is perhaps the best-known strike rarity of the past 65 years. It is unknown why quality control was so lax in the Philadelphia Mint in 1945, but the result was that extremely few dimes were produced with a complete split in the reverse horizontal bands. According to Lange: "1945-P is the rarest coin in the series with full bands." This piece is well struck, with attractive ice-blue and light gold toning. The focal features are crisply defined, and the central crossbands are fully separated. The fields are smooth and pristine, while two or three tiny ticks on the central devices are the only evidence of contact or handling. With fulsome luster, this beautiful coin could form the centerpiece of any advanced Mercury dime collection. Population: 13 in 66 Full Bands, 3 finer (3/11).

Ex: Stephen and Dianne Stokely Collection (Heritage, 7/2003), lot 6730; The Joshua II Collection of Mercury Dimes, #1 All-Time Finest PCGS Registry Set. (#5057)

### **EARLY QUARTERS**

### 1796 B-2 Quarter, VF35 Unusual Middle Circulated Grade

**5078 1796 VF35 PCGS. B-2, R.3** The variety with the high 6, nearly touching the drapery, is more plentiful than the low 6 variety, although neither variety is seen with any frequency. As the first year of issue for the denomination and the only year for the Small Eagle reverse design type, this issue receives extraordinary demand from type collectors on top of its importance to date and variety collectors.

The example offered here is remarkable for its preservation. It is finer than usually encountered, and incredibly, exhibits no problems other than the usual minor hairlines and abrasions received from circulation. The silver-gray fields darken to steel-gray near the borders, with lighter gray devices. Traces of pale blue and iridescent toning add to its eye appeal. (#5310)

### Select Mint State 1796 Quarter, B-1

**5079 1796 MS63 NGC. B-1, R.4.** Tompkins Die State 3/3, a late example of the more elusive (very scarce) die pair for this one-year design type. Both sides show diagnostic die cracks of the advanced state; the 1 in the date has a crack at the left side on the obverse, while the reverse shows a spidery crack connecting the letters in OF. While a relative handful of Mint State 1796 quarters are available to modern collectors, the vast majority of them are of the more common (though still scarce) B-2 variety.

In fact, while this NGC-graded MS63 example would not make the Condition Census for the B-2 variety (as listed in *Early United States Quarters* by Tompkins, where all slots are taken up by MS64 and MS65 examples), as a B-1, it is nominally tied for second in the census, behind only an "MS65+" example offered as part of the Eliasberg Collection. In practice, this representative probably ranks third, since the tie is with a "Choice BU Prooflike" coin offered by RARCOA in August 1980, a coin that would have a solid chance of bearing a higher grade today.

One need not be a specialist in early quarters to appreciate this Select example, of course; even type enthusiasts recognize the inherent condition rarity and appeal of a coin such as this. Significantly reflective fields shine through green-gold, aqua, and blue-gray toning, and well-defined devices are faintly frosted. The reverse has a number of crisscrossing adjustment marks that should not be interpreted as damage, and indeed will not be by the sophisticated collector, who will appreciate them as part of the coin's charm. For the two 1796 quarter varieties combined, Census: 7 in 63, 11 finer (2/11). (#5310)

### 1805 Draped Bust Quarter, XF Details Scarce B-4 Variety Previously Unpublished Die State

1805 — Improperly Cleaned — NGC Details. XF. B-4, Low R.4. This remarkable 1805 Draped Bust guarter displays prominent clash marks on both sides, indicating this piece represents a rare, previously unpublished die state of the scarce B-4 die marriage. The B-4 variety is distinguished by the large reverse stars and the position of 25 in the denomination close to U in UNITED. The large star punch was used throughout 1806 and 1807, indicating this reverse die was probably the last one produced in 1805. Both the Browning/Breen reference and Steve Tompkins' Early United States Quarters 1796-1838 indicate the B-4 marriage is only known with perfect dies. In an extremely unusual circumstance, probably due to a shortage of die steel, the used obverse die was annealed and a 6 was punched over the 5 in the date to create an obverse for use in 1806. While overdating dies was not unusual during this time period, most overdates were made from leftover dies that had not been previously used, as the dies became hardened and brittle with striking. Paired with the same reverse used on the B-4 variety, this overdated obverse was used to strike the B-1 variety of the 1806 quarter. Both standard quarter references suggest the 1806 B-1 quarter is known with perfect dies in its initial die state. We can only conclude the 1805 B-4 dies clashed late in the year, and must have been lapped to remove the clash marks before being overdated for use in 1806. The fact that both the 1805 B-4 and 1806 B-1 varieties are usually seen with weak striking details would camouflage any loss of detail incurred during the lapping.

A new reference on early quarters, *Early Quarter Dollars of the United States Mint 1796-1838*, by Rory Rea, Dr. Glenn Peterson, Bradley S. Karoleff, and John J. Kovach, Jr., is now at the printers. Noted early quarter specialist and author Rory Rea was kind enough to let us know this reference does not list clashing on the 1805 B-4 quarter, but does note a few minor die cracks on the reverse. The die cracks are noted on the initial state of 1806 B-1 as well, not perfect dies. About the clashing, Rea states, "Off the top of my head, I don't believe I have seen a clashed example. Not on the Pittman specimen, not on my old AU example, and not on the high grade examples in my data base." We believe this previously unrecorded, clashed die state of the 1805 B-4 quarter must be extremely rare, but further study may bring other examples to light.

The coin offered here shows little actual wear, but displays the typical softness on the central details, especially the shield and reverse star 4. Dramatic clashing is apparent on the obverse, with a cloud and a star clearly impressed in the left obverse field, immediately adjacent to the bust. Other clash marks are observed in the right obverse field before Liberty's face and below the bust. On the reverse, the clash marks show through the stars, beside the eagle's wings, arrows, and wreath. The surfaces exhibit the unnatural brightness usually associated with a previous cleaning, but attractive gold and green toning is returning to the peripheries. Altogether, this coin is an attractive representative of a scarce variety and, to date, possibly unique in this die state.

### **BUST QUARTERS**

1818 B-2 Quarter Dollar, MS64 Ideal for Type Collections

**1818 MS64 NGC. B-2, R.1.** Years after it was used to produce these 1818 quarters, the obverse die was sold as scrap steel and eventually made a new appearance with an 1818 large cent reverse die to create a collector fantasy piece.

The present piece, while an early die state, has a crack in the field above the Liberty cap, identifying the variety. This Choice Mint State specimen has subdued silver luster with bold design definition and faint champagne toning. The B-2 is the most common 1818 quarter variety and is the die marriage most often chosen for type collections. Census: 57 in 64, 35 finer (3/11) for all 1818 varieties. (#5322)

1834 Capped Bust Quarter, MS64 B-1 Variety, Late Die State

**1834 MS64 PCGS. CAC. B-1, R.1.** The reverse design with two-line stripes in the shield and no period after C in the denomination identifies this coin as an example of the B-1 variety. The 1834 Capped Bust quarter claims a mintage of 286,000 pieces, and the B-1 is the most available of the five die varieties known for the date. This specimen is from a late die state, with the reverse die rotated about 45 degrees clockwise from the usual alignment. The dies have been lapped, and the lower leaves on the olive branch are detached. Several clash marks are still evident below Liberty's ear.

The present coin is a sharply detailed Choice example, with original iridescent gold and powder-blue patina. Strong mint luster is evident beneath the toning. Population: 47 in 64, 9 finer (3/11). (#5353)

### **SEATED QUARTERS**

Fascinating 1846 Seated Quarter, MS65 Briggs 2-D, Repunched Date, Die Cracks One Finer for the Year at NGC

**1846 MS65 NGC. Briggs 2-D.** Recutting shows south of the original date on the 46, with the knob of the undertype 6 filling the space between the knob of the subsequent 6 and its inner top circle. The obverse also shows several wispy die cracks, and an interesting, extensive area of apparent die polishing to the right of and inside the right portion of the shield. On the reverse a long, spindly die crack runs through ITED STAT, to the top of E(S), to the base of OF AMER, upward through ICA to terminate at the rim above the last A. Besides the interesting two-sided variety-die state, this early Seated quarter is the sole Gem certified of this issue at NGC, with a single piece finer (3/11). The silver centers complement rim toning of copper-gold, with a dollop of blue thrown in on each side. (#5409)

1857 Seated Liberty Quarter, MS67+ Fabulously Toned

**1857 MS67+ NGC.** This one of those occasional numismatic treasures that we Heritage catalogers get to enjoy before the bidders — a coin that simply should not exist in so high a grade. Antebellum Seated quarters, even when Mint State, usually hover around the MS63-MS64 grade, with the infrequent MS65 or MS66. This incredible MS67+ example is one of the two finest of the issue, despite the large mintage approaching 10 million coins. Fabulous iridescent toning prevails on each side. The rim on the obverse has concentric rings of varying shades of blue and then rose, with a golden-rose center. The reverse is sky-blue accented with rose-gold on each side. Bright underlying frosted luster only serves to make the color pop that much more. The strike is a bit soft on each side, and as expected for the high grade, no mentionable contact marks appear. Census: 1 in 67+, 1 in 68 (3/11). (#5442)

MS63 1867-S Quarter, High-Attrition Issue Perhaps Six Mint State Coins Survive

1867-S MS63 ANACS. The mintage of 48,000 pieces sounds sufficient for a number of higher-grade 1867-S quarters to have survived, but that is not the case. Beginning with the Gold Rush in 1849 and the subsequent influx of miners and hangers-on, subsidiary coinage was in great demand in northern California. World coins were used until the San Francisco Mint opened in 1854, and then non-U.S. coinage was banned in 1857. Once world coins were no longer usable in the channels of commerce, great pressure was put upon San Francisco to produce a substitute. This increased demand was coupled with a distinctly Western affinity for silver and gold coins rather than paper money, the result predictably being the high attrition rates of S-mint subsidiary coinage. Probably no more than a half-dozen Uncirculated 1867-S quarters are known today. This solid MS63 example exhibits softly frosted mint luster abundantly evident beneath rose and emerald-green toning over each side. The strike is sharp throughout, and the only mark of any note is a horizontal abrasion that connects Liberty's right shin and star 13. (#5471)

1870-CC Seated Quarter Classic Rarity, VG10

**1870-CC VG10 NGC.** In April 1997, the finest known example of the 1870-CC quarter, the Eliasberg Collection specimen, cataloged as MS-64 prooflike by Bowers and Merena and far and away the finest known, brought a staggering \$187,000 at auction. Carson City Mint chronicler Rusty Goe says that the auction, along with an 1876-CC twenty cent piece on the same night, "kicked prices up a notch," and they have been going ever since.

The 1870-CC Seated quarter, with a recorded mintage of 8,340 pieces, is in demand in all grades. This Choice VG piece has pinkishgold surfaces that display extensive, grade-consistent wear, but no singular abrasions aside from a few thin marks on Liberty's legs and shield. A tiny area near star 10 is an apparent planchet flaw. The rims are full around both sides, LIBERTY is complete, and the mintmark is clear, with the second C weaker than the first as always. A classic rarity in U.S. coinage, this piece should see heated demand at auction from Seated coinage and Carson City specialists. (#5477)

### Superb Gem 1886 Seated Quarter None Certified Finer

**5087 1886 MS67 PCGS.** Only 5,000 business-strike Seated Liberty quarters were struck at the Philadelphia Mint in 1886, accompanied by a small mintage of 886 proofs. The 1886 is the rarest date of the series in circulated grades, and Mint State survivors are often mistaken for proofs because of their prooflike surfaces. The coin offered here exhibits prooflike reflectivity in the fields, but the stars show strong centrils and the reverse shows the effects of lapping, both diagnostics of a regular-issue coin. Superb Gem survivors are extremely rare.

The present coin is a sharply struck Superb Gem, but die polishing has resulted in a lack of detail in some areas. Liberty's neckline and the rock above the date show a little softness, while the eagle's tail below the shield is faint. Attractive greenish-gray and violet toning enhances the pristine fields. Population: 2 in 67, 0 finer (3/11). (#5518)

### **PROOF SEATED QUARTERS**

### Premium Gem Proof 1856 Quarter Tied for Finest Certified, Ex: Eliasberg

**5088 1856 PR66 NGC.** Ex: Eliasberg. Earlier from the Harlan P. Smith Collection. Harlan Page Smith (1839-1902) was a partner with David Proskey in the New York Coin and Stamp Company, and an active collector of 19th century proof coins and famous rarities including an 1822 half eagle.

A remarkable Premium Gem proof, this 1856 quarter exhibits gold, violet, and blue toning on the obverse with lighter champagne inside a frame of gold and blue on the reverse. The fields are deeply mirrored with sharply defined, satiny devices. All proof 1856 quarters exhibit the die bulge visible at the right side of the reverse on this specimen. Walter Breen estimated perhaps 30 examples of the 1856 proof quarter survive in all grades. NGC has certified only two coins in PR66, with none finer, while PCGS has graded a single Premium Gem proof, also with none finer (2/11).

Ex: Harlan P. Smith (S.H. and H. Chapman, 5/1906), lot 836; John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1462.

From The B & D Collection. (#5552)

1858 Seated Quarter, PR66 First Proof Issue for Collectors

**5089 1858 PR66 NGC.** At one time the reported mintage for all proof silver coins in 1858 was just 80 pieces of each denomination. As recently as 20 years ago, the figure of 80 coins was still used, including in Larry Briggs' reference on the Seated quarters. However, today, the *Guide Book* records a mintage of 300 proofs, a figure that is merely an estimate. The actual proof mintage for all silver denominations in 1858 remains unknown. For every denomination the number of certified proofs falls in the range of 113 to 164 coins, figures that admittedly include resubmissions, but are still substantially higher than the old report of 80 pieces minted. This was the first year that proofs were widely distributed to contemporary collectors.

This Premium Gem proof exhibits multihued toning with delicate blue and lavender. Both sides are fully mirrored and sharply detailed with light cameo contrast. Slight design doubling appears at the lower right part of the reverse. An outstanding opportunity for the proof Seated connoisseur. Census: 4 in 66, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#5554)

1859 Seated Quarter, PR67 Cameo Sole Finest NGC-Certified Specimen

**5090 1859 PR67 Cameo NGC. Briggs 2-B.** Two proof die pairs are recorded in Larry Briggs' Seated quarter reference for the mintage of 800 coins. This second die pair has three prominent die lines extending up from the left base of the rock, nearly reaching the border below star 1. The reverse has QUAR. DOL. recut. This incredible Superb Gem Cameo proof exhibits full silver brilliance with no evidence of toning on either side. The devices are frosty and lustrous within a deeply mirrored frame. All design elements are bold and completely defined. NGC and PCGS have each certified one example as PR67 Cameo with none finer. A remarkable example for the connoisseur. Census: 1 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85555)

1860 Seated Quarter, PR68 Cameo The Finest Certified

**5091 1860 PR68 Cameo NGC.** Two different proof obverse dies have the same basic characteristic of stars that "are rather weak and show faint or irregular centrils" according to Larry Briggs. That characteristic is clearly seen on this Superb Gem Cameo proof. Otherwise, all details on both sides are boldly defined. This incredible specimen exhibits full mint brilliance with no evidence of toning, aside from a faint gold cast limited to the borders. The fields are deeply mirrored and the devices are highly lustrous, presenting incredible eye appeal. This piece is the only PR68 example of the date at NGC or PCGS, regardless of designation. Census: 1 in 68 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85556)

1861 Type Two Quarter, PR66 Cameo Tied for the Finest at PCGS

**5092 1861 PR66 Cameo PCGS.** Type Two. The three years from 1859 to 1861 were transitional for the proof Seated quarters. Type One reverse dies have a concave eagle's eye and Type Two reverse dies have a convex eagle's eye as seen on this Premium Gem Cameo proof. Both sides have deeply mirrored fields, brilliant and lustrous devices, bold design details, and a complete absence of toning on the bright silver surfaces. The reverse is rotated a few degrees counterclockwise on this example. Faint contact marks and microscopic hairlines limit the grade of this impressive proof. Population: 2 in 66 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85557)

1862 Seated Quarter, PR67 Cameo None Graded Finer

**5093 1862 PR67 Cameo NGC.** This is a Superb Gem proof example of the No Motto design with fully brilliant obverse and reverse surfaces. Only about 430 proofs were actually sold in 1862; the balance of the 550-coin mintage was melted. The 550-coin figure continues to be reported in the *Guide Book*, but we tend to subscribe to Breen's figures in regard to these coins. When we last offered this piece in 2004, we stated that four had been certified with none finer. Just three additional examples have been similarly graded at NGC since then. This is an extremely important opportunity to acquire a rare Proof quarter dollar from the Civil War era. Census: 7 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85558)

1863 Seated Quarter, PR67 Tied With One Other for Finest

**5094 1863 PR67 NGC.** The Philadelphia Mint produced far fewer Seated quarters in 1863 than it did in 1862. The latter year witnessed a production of just 191,600 business strikes and 460 proofs. Both formats are condition rarities, and the present Superb Gem is tied with one other as the finest NGC-certified proof (3/11). The originality is undeniable and breathtaking. The obverse is covered in green, gold, red, and blue hues; the reverse is more extensively patinated, with rich cobalt-blue and violet. Needle-sharp detail characterizes all devices, which are equally as blemish-free as the smooth, placid fields. A spectacular proof Seated quarter and an important bidding opportunity for the specialist.

From The Slotkin Family Trust Collection. (#5559)

1863 Seated Quarter, PR66 Cameo No Finer Cameos

**5095 1863 PR66 Cameo NGC.** One of the finest graded of this date and with as much cameo contrast as found on any 1863 Seated quarter. NGC has only graded one example of this date with the Ultra Cameo designation. The color is stark white, and only a shadowy hint of gold toning is found in the fields. Well contrasted between the reflective fields and devices, with ample frost piled high on the devices. It is of importance to note that the mintage for this issue was a scant 460 coins, apparently demand fell off with the horrors of the Civil War unfolding in nearby Gettysburg, so collectors were ordering fewer proofs. An impressive and outstanding coin for the specialist, and one that is a solid contender for the finest known. Census: 6 in 66 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85559)

1866 Motto Seated Quarter PR67 Ultra Cameo, Finest Certified

**5096 1866 PR67 Ultra Cameo NGC.** The first year of the With Motto design had a limited mintage of only 16,025 business strike quarters from one die pair and 725 proofs from a second die pair. The obverse of all proofs shows a prominent diagonal die scratch through the upright of the R in LIBERTY, extending upward to join vertical line 8 and downward to join vertical line 9. That die scratch is mentioned as an attribution aid to distinguish between proofs and prooflike business strikes.

A Superb Gem Ultra Cameo proof, this 1866 Seated quarter has amazing contrast with brilliant and sharply defined satin devices and deeply mirrored fields. There is no evidence of toning on either side. This piece is destined for a top quality collection, being the single finest certified Ultra or Deep Cameo proof. Census: 1 in 67 Ultra Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#95565)

1873 No Arrows Quarter, PR68 Ex: Philip Kaufman Collection

5097 1873 No Arrows PR68 NGC. Ex: P. Kaufman. As they were delivered early in the year, all proof 1873 No Arrows quarters display a Closed 3 in the date. Superb Gem 1873 No Arrows proofs are of the utmost rarity and desirability in today's market. The razor-sharp devices and smooth, pristine fields are drenched in original toning. The obverse is mostly silver-gray, while the reverse is awash in rich antique-copper patina with lilac, cobalt-blue, and golden-champagne undertones moving from the lower left to the upper right. A coin that the finest collection should not do without.

Ex: Long Beach Signature Sale (Heritage, 2/2003), lot 6664; FUN Signature Sale (Heritage, 1/2005), lot 6462; FUN Signature Sale (Heritage, 1/2006), lot 3157.

From The Slotkin Family Trust Collection. (#5572)

# 1873 Arrows Quarter, PR68 ★ The Only Star-Designated Piece

**5098 1873 Arrows PR68** ★ **NGC.** The Mint Act of February 12, 1873, converted subsidiary coinage to the metric system, and in so doing slightly increased the weight of silver planchets. Passage of the legislation, sometimes known as the "Crime of '73," discontinued the two cent piece, three cent silver, half dime, and silver dollar, at the same time creating the Trade dollar and moving the Mint offices from Philadelphia to Washington, D.C.

The arrows were a distinguishing mark to easily identify the new coins from the old-tenor silver pieces. The weight change was so slight that old blanks remained within Mint tolerance and probably stayed in use. A further result of the 1873 act was an order sent to San Francisco and Carson City to melt all older coins on hand, creating rarities for collectors today. In two instances, the order completely eliminated a particular issue. No 1873-S Seated half dollars or dollars are known today, despite mintages of 5,000 and 700 coins, respectively.

Only 540 proof 1873 Arrows quarters were struck. The current specimen is tied with one other PR68 as the finest certified by the two major services, that other coin graded PR68 Cameo NGC. This piece also holds honors as the only proof 1873 Arrows quarter awarded the NGC Star designation. The fields are deeply reflective, and the obverse possesses a warm russet and cobalt-blue edging, with an elliptical area of brilliance over most of the portrait and part of the date. The reverse displays even steel-blue patina that yields to copper-gold about the margins. Although undesignated as such, this piece is a remarkable cameo example, with exceptional contrast between the mirrored fields and lustrous devices. The only contact noted is a small patch of marks in the right obverse field, near stars 10 and 11. Census: 1 in 68 \*, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#5574)

1873 Arrows Quarter, PR66 Cameo Open 3 Date Style as Always

**5099 1873 Arrows PR66 Cameo NGC.** The Arrows quarters were struck after the change from the Closed 3 to the Open 3 logotype. For that reason, all 1873 Arrows proofs are the Open 3 style. A raised reverse die line through the left shield border identifies this multiyear proof die. Another prominent die marker is a raised die line in the margin below GO of the motto. This sharply detailed and highly appealing Premium Gem Cameo proof exhibits full mint brilliance with white-silver surfaces and no evidence of toning. Both sides are exquisite and beautiful. Census: 1 in 66 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#85574)

1874 Arrows Quarter, PR67 Only One Finer NGC Specimen

5100 1874 Arrows PR67 NGC. A spectacular Superb Gem proof, this 1874 Arrows quarter is destined for a high-end date or type collection. Both sides have gorgeous toning, the obverse with light gold within a frame of vivid blue-green, rose, and violet, the reverse skyblue with pale green. Although undesignated, this piece has noticeable cameo contrast between the lustrous devices and mirrored fields. Struck from the multiyear reverse die, this piece clearly shows the die scratch that crosses the left shield border. Census: 6 in 67, 1 finer (3/11).

Ex: Central States Numismatic Society Sale (Heritage, 4/2009), lot 2360.

From The Slotkin Family Trust Collection. (#5575)

1875 Seated Quarter, PR66 Ultra Cameo Sole Finest Ultra Cameo Proof

**5101 1875 PR66 Ultra Cameo NGC.** Type One Reverse. The reverse has the usual die scratch crossing the left shield border, seen on most proof Seated quarters struck from 1872 to 1880. This Premium Gem Ultra Cameo proof displays full brilliance and no evidence of toning on either side. The boldly defined devices are fully lustrous, brilliant frosted silver, and the mirrored fields exhibit nearly unlimited depth. Just six of the 160 NGC submissions of proof 1875 quarters carry the Ultra Cameo designation, and this piece is the single finest among them (3/11). Similarly, PCGS has certified six Deep Cameo proofs out of 172 graded examples, none better than PR66. *From The Slotkin Family Trust Collection*. (#95576)

1880 Seated Quarter, PR68 ★ Cameo Reverse Die of 1872

**5102 1880 PR68** ★ Cameo NGC. Type One Reverse. A die line crossing the left shield border identifies the reverse as the same one that was used for proofs in every year from 1872 to 1880. Obvious white on black contrast challenges the Ultra Cameo designation. A gorgeous, razor-sharp, and fully brilliant Superb Gem, unquestionably among the finest examples of the date. The quality is worthy of a trophy-winning Registry Set. Proofs and business strikes combined for less than 15,000 pieces, since the mints were burdened with heavy Morgan dollar production. Census: 1 in 68 ★ Cameo, 1 finer as PR69 ★ Cameo (3/11).

From The Slotkin Family Trust Collection. (#85581)

1881 Seated Quarter, PR68 ★ Cameo Proof-Only Recut Date Variety

5103 1881 PR68 ★ Cameo NGC. Both 8s in the date are prominently recut, a feature that sets true proofs apart from the many prooflike business strikes sometimes offered as proofs. The numismatic perfectionist will want to consider this piece, as it is the single finest 1881 proof quarter that NGC has certified (3/11). Both sides are spectacular, with brilliant and untoned silver surfaces, bold design details, and amazing cameo contrast. This borderline Ultra Cameo possesses incredible eye appeal. A small iridescent spot on the reverse should aid future researchers to track its provenance.

From The Slotkin Family Trust Collection. (#85582)

1883 Seated Quarter, PR68 Ultra Cameo The Only Ultra Cameo Proof

**5104 1883 PR68 Ultra Cameo NGC. Briggs 1-A.** The obverse has the tops of two stray digits visible in the denticles below the 83 in the date, apparently a hallmark of true proofs. The feature is clearly visible on this wonderful Superb Gem Ultra Cameo proof.

This amazing coin is the only Ultra Cameo or Deep Cameo proof certified by NGC or PCGS, regardless of grade (3/11). It is the one coin that a collection of such coins can hope to acquire, and it carries an amazing numerical grade in addition. Without a doubt, here is the single finest surviving 1883 quarter from the proof mintage of 1,039 coins.

From The Slotkin Family Trust Collection. (#95584)

1884 Seated Liberty Quarter, PR68 Cameo Only One Finer Cameo Proof

5105 1884 PR68 Cameo NGC. Only 8,875 quarters were struck in 1884 (875 proofs), which is one of the lowest total production runs in the entire Seated quarter series. While not especially rare as a proof, this is a piece of singular beauty. Each side is brilliant, and the fields are deeply reflective. The devices show a significant amount of mint frost, which gives the coin its pronounced cameo effect. Nearly perfect surfaces, a strong magnifier will be necessary to pick up any post-striking impairments. An oval-shaped lint mark is located between the eagle's left (facing) wing and the left side of the scroll. When one views this magnificent proof, it is difficult to believe that NGC has actually graded another coin finer — now that is a coin we would like to see. Census: 2 in 68 Cameo, 1 finer (3/11). From The Slotkin Family Trust Collection. (#85585)

1885 Seated Liberty Quarter PR68 ★ Cameo

5106 1885 PR68 ★ Cameo NGC. NGC has certified three 1885 quarters as PR68 Cameo, and two of those carry the Star designation (3/11), with none finer. The two Star-designated pieces are clearly different, as this example is fully brilliant on both sides, while the other one (appearing in our October 2008 sale as lot 680), carries iridescent toning. This boldly defined piece displays amazing contrast, nearly attaining the Ultra Cameo designation, with sharp design details everywhere except at the stars along the right obverse border. Stars 7 through 12 are typically weak on all proof 1885 quarters. From The Slotkin Family Trust Collection. (#85586)

### Singular PR68 Ultra Cameo 1886 Quarter

5107 1886 PR68 Ultra Cameo NGC. This is the single finest Ultra Cameo or Deep Cameo representative of the proof 1886 quarter in the combined certified population (3/11), and if that designation is insufficient to attract attention, one glance is all it will take for even the most discerning Seated coinage enthusiast to become a believer. The contrast on each side is simply stark, perhaps not strictly blackand-white but so close and so strong that the distinction is all but irrelevant. The mirrors are virtually immaculate with only the faintest evidence of clouding, and the eye appeal is immense.

From The Slotkin Family Trust Collection. (#95587)

Sole Finest 1888 Seated Quarter PR68 Cameo

**5108 1888 PR68 Cameo NGC.** In business strike and proof formats, the 1888 Seated quarter is elusive in every numeric grade, including circulated, Mint State, and proof. This is a stunning specimen with richly frosted, snow-white devices that exhibit razor-sharp striking definition. The fields are deep pools of watery reflectivity, and a splendid cameo appearance results from the stark white-on-black contrast on both sides of the coin. The surfaces are impressively preserved and nearly pristine. This amazing piece is currently the single finest-graded example at either service, with none finer (3/11)

From The Slotkin Family Trust Collection. (#85589)

#### Ultra Cameo PR68 1889 Quarter

5109 1889 PR68 Ultra Cameo NGC. Out of 711 proof 1889 Seated quarters struck, NGC has certified six of them as having Ultra Cameo surfaces. The present piece, at PR68 Ultra Cameo, is the single finest certified example in the *Census Report* (3/11), a sure draw for Registry Set collectors. Even those with no interest in Registry Set collecting are certain to appreciate the absolute contrast on each side, the faint canary-yellow accents over fathomless mirrors, and the richly frosted central devices. Both sides are magnificently preserved, and a more appealing specimen is difficult to imagine.

From The Slotkin Family Trust Collection. (#95590)

Singular PR69 ★ Cameo 1890 Quarter

5110 1890 PR69 ★ Cameo NGC. The survival of a 19th coin so magnificently preserved as this PR69 ★ Cameo quarter cannot be explained, only appreciated. It is one of only five proof Seated quarters rated as PR69 by NGC regardless of contrast, and one of just three graded PR69 Cameo with none Ultra Cameo (3/11). Needless to say, this coin stands far and away as the exemplar of the issue, with magnification a must to find the minuscule faults used to deny the piece a perfect grade. Stark black-and-white contrast has a small curiosity on the obverse, where a touch of overpolishing has left a narrow brilliant hollow at Liberty's waist and reflectivity in the shield stripes above the ribbon but not below.

From The Slotkin Family Trust Collection. (#85591)

#### PROOF BARBER QUARTERS

# Untoned 1892 Barber Quarter PR68 Ultra Cameo

**5111 1892 PR68 Ultra Cameo NGC.** Type Two Reverse, left (facing) wing covering most of E in UNITED. The silver-white surfaces on this first-year-of-design coin — one of the finest from the issue of 1,245 proofs — display a total lack of perceptible color otherwise, with profound field-device contrast. Any type collector who likes his coins untoned would do well to pause here in a search for the optimal specimen to represent the Barber quarter issue. At PR68 Ultra Cameo, this piece is tied with four other submissions for the finest technical grade and deepest contrast of any 1892 proof quarter at NGC (3/11).

From The Slotkin Family Trust Collection. (#95678)

1893 Barber Quarter, PR68 Cameo No Finer NGC Cameo Proofs

**5112 1893 PR68 Cameo NGC.** The frosty devices offer obvious frosty contrast with the deeply mirrored fields. This fully struck Superb Gem has a seemingly pristine obverse, and the reverse is nearly as well preserved. Both sides present essentially as completely untoned, although the reverse field has just a hint of pale lemon color. The production of proofs fell substantially from the 1,245 pieces struck in 1892, the first year of the series. Apparently, collector interest in the new design was subdued by 1893, as only 792 proofs were minted. Simply stunning quality and eye appeal for a proof Barber quarter. Census: 8 in 68 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85679)

Immaculate 1893 Barber Quarter
PR68 ★ Ultra Cameo, Sole Finest Graded

**5113 1893 PR68**  $\star$  **Ultra Cameo NGC. CAC.** The 1893 quarter came with 792 proof strikes, making this issue fairly available. NGC and PCGS have, to date, certified more than 560 proof examples. Even so, there are only 16 specimens at both services that have achieved the Deep or Ultra Cameo designation (the same number as when we offered this piece four years ago). Of those coins, however, the present coin is the solitary PR68  $\star$  at NGC, and its shares with a single PR67  $\star$  the honor of being awarded the Star designation (3/11). The finest Deep Cameos at PCGS are five submissions at the PR67 level.

White-on-black contrast immediately grabs the viewer's attention, and the heavily frosted motifs appear to glide over the deep watery fields when the piece is rotated beneath a light source. A powerful strike emboldens the design features, leaving no areas with even a hint of softness. Immaculately preserved, completely untoned surfaces round out this coin's fantastic eye appeal.

Ex: ANA Signature (Heritage, 8/2007), lot 1660, which brought \$16,100.

From The Slotkin Family Trust Collection. (#95679)

All-Brilliant 1896 Quarter, PR68 Cameo

**1896 PR68 Cameo NGC.** Of the coins surviving today out of the 762 proof 1896 quarters struck, this is without a doubt one of the finest in terms of both technical and aesthetic merits. Fully brilliant, the fields are deeply mirrored on each side with snow-white devices that provide strong cameo contrast. As one would expect from a coin graded PR68 Cameo, the surfaces are just about as near to perfection as possible with no obvious flaws. The strike is full throughout, including all star centrils on the obverse and the challenging right (facing) shield and wing area on the reverse. Census: 6 in 68 Cameo, 1 finer (3/11).

Ex: FUN Signature (1/2004), lot 6122. From The Slotkin Family Trust Collection. (#85682)

PR69 ★ Ultra Cameo 1896 Quarter The Ultimate Barber Proof

5115 1896 PR69 ★ Ultra Cameo NGC. From a proof mintage of 762 pieces, this issue is one of the more available proof quarters of the era. Charles Barber's classic profile of Liberty shows to best advantage on this superb specimen. Clearly, the Mint engravers and technicians had fully mastered the techniques of proof coinage at this juncture. This coin can hold its own with any proof issue produced today.

The present specimen is a magnificent example of the minter's art. The liquid, deeply mirrored fields are flawless. All design elements are frosty and strongly delineated. The contrast is truly breathtaking. The spectacular eye appeal of this piece will inspire spirited competition from connoisseurs of Barber coinage. NGC lists three certification events at PR69 Ultra Cameo, but only this piece was given the Star designation (3/11).

From The Slotkin Family Trust Collection. (#95682)

1897 Quarter, PR68 ★ Cameo

5116 1897 PR68 ★ Cameo NGC. The proof mintage of quarters in 1897 — 731 pieces — was the lowest in the first 10 years of the new Barber design, although not by much. This piece is nonetheless technically and aesthetically at the top of the food chain among survivors. Like most of the quarters in this marvelous consignment, the surfaces are brilliant throughout, although here both sides offer at least a perceptible hint of golden color. The contrast is deep and uniform, and the strike is equally impeccable. Of the seven PR68 Cameo survivors at NGC, this piece is one of four with the Star designation (3/11), and there are none finer.

From The Slotkin Family Trust Collection. (#85683)

**5117 1898 PR68 Cameo NGC.** The 1896- and 1898-dated silver proofs are especially renowned for their superb aesthetics, and this Superb Gem proof, one of the finest survivors among the 735 coins struck, demonstrates ample confirmation of that proposition. The surfaces throughout are once again blinding snow-white with a faint suggestion of bluish tint. Thick mint frost contrasts profoundly with looking-glass fields. The strike is full throughout, save for a couple of tiny areas at the extreme rims. For pedigree purposes we note a minuscule planchet flaw right of the last T in TRUST. Census: 9 in 68 Cameo, 2 finer (3/11).

From The Slotkin Family Trust Collection. (#85684)

Silver-White 1899 Quarter, PR68 Cameo

**5118 1899 PR68 Cameo NGC.** Fully brilliant silver-white surfaces on each side are among this coin's most obvious attributes, creating a splendid contrast that appears to verge on an Ultra Cameo designation. There is little perceptible color otherwise, beyond the vaguest suggestion of gold. Even a loupe fails to reveal any mentionable distractions, although we note a few swirling lines on the jawbone area that may be minor slide marks. The strike is full throughout both sides. Among the finest survivors of the proof mintage of 846 pieces, this PR68 Cameo 1899 quarter is one of four so graded at NGC. A single PR69 Ultra Cameo is finer (3/11).

From The Slotkin Family Trust Collection. (#85685)

Cameo PR68 1900 Quarter

**5119 1900 PR68 Cameo NGC. CAC.** The turn of the new century (except to the purists) appears to have been especially popular with collectors, as the proof mintages of minor silver coins took a small but noticeable pop, nearly to the 1,000-piece level. Accordingly, some wonderful coins such as the present coin exist, perhaps also due to scrupulous production on the part of Mint personnel. The centers are silvery on this piece, with a peripheral ring of iridescent almond and steel-blue patina marking the originality and enormous appeal of this special numismatic treasure. Census: 3 in 68 Cameo, 1 in PR68+ ★, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85686)

Singular PR68 Cameo 1902 Quarter

5120 1902 PR68 Cameo NGC. The importance of a Cameo proof from the earliest part of the 20th century cannot be overstated. Beginning in 1902 and continuing to the matte proof era, the Mint discouraged production of cameo proof coins as undesirable. Few were originally produced with any contrast, and even fewer have survived to the present day. Both sides of this singular specimen are fully brilliant with exceptional white luster on the devices and deep mirrors in the fields. A wisp of delicate champagne toning adds to the overall eye appeal. Census: 1 in 68 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85688)

PR68 Cameo 1903 Quarter Tied for Finest at PCGS

**5121 1903 PR68 Cameo PCGS.** The 1903 proof Barber quarter issue clearly falls in the brilliant era, with a 214-52-2 split among non-Cameo, Cameo, and Deep Cameo pieces in the PCGS *Population Report.* Among those Cameo pieces, just three are graded PR68 and none are numerically finer (3/11). This is a magnificently preserved and boldly contrasted specimen that approaches Deep Cameo quality. The faint golden toning that graces parts of the fields was perhaps the deciding factor in not awarding the coin a Deep Cameo designation, yet the coin's eye appeal would be lessened by its absence. In all respects a magnificent piece.

From The Slotkin Family Trust Collection. (#85689)

Vivid 1904 Quarter, PR68 Cameo

1904 PR68 Cameo PCGS. This unusual 1904 Barber quarter presents the best of both worlds for toning enthusiasts, with vivid color on each side and yet more than sufficient contrast to merit the Cameo designation. The obverse displays amber-gold ceding to russet on the left half, with sprinkles of sapphire. The reverse exhibits multicolored olive, ochre, pink, and blue tints prevailing. Despite the more-intense reverse color, that side also offers deeper field-device contrast. The strike, as desired, is complete on both sides. This piece is the single finest Cameo specimen of the 1904 issue certified at PCGS, a Registry Set prize (3/11).

From The Slotkin Family Trust Collection. (#85690)

Patinated 1905 Quarter, PR68 None Finer at Either Service

5123 1905 PR68 NGC. This midseries Barber quarter is among the technically finest survivors from the nominal proof mintage of 727 coins. This piece should prove a real treasure for toning enthusiasts, with the obverse boasting a combination of silver centers and iridescent rim toning where jade, saffron, and electric-blue prevail. The reverse feature similar hues, although a bit more intense and with a dollop of magenta near the rim thrown into the mix. This fully struck piece is one of three PR68 examples at NGC, along with four in PR68 Cameo, and there are none numerically finer (3/11). The finest at PCGS are two PR68 coins.

From The Slotkin Family Trust Collection. (#5691)

1907 Barber Quarter, PR68 Cameo Among the Few Finest at NGC

5124 1907 PR68 Cameo NGC. This brilliant silver-white Superb Gem Cameo example, one of the technically finest and most aesthetically pleasing survivors of the low proof mintage of 575 coins, shows virtually no suggestion of perceptible color otherwise. (In this regard, it has much in common with most of the other extremely high-grade Barber quarters in this stunning consignment.) This piece, however, lacks the full strike of many of its fellows, showing weakness on the challenging right (facing) shield corner and eagle's wing adjacent. The strike is impeccable elsewhere, and as usual, contact marks are simply a nonissue. Census: 1 in 68 Cameo (this coin), 1 68 ★ Cameo, 1 68 ★ Ultra Cameo (3/11).

From The Slotkin Family Trust Collection. (#85693)

#### Remarkable 1908 Quarter, PR69 Cameo Sole Finest Certified for the Issue

**5125 1908 PR69 Cameo NGC.** Even at Heritage, where we regularly get the privilege of seeing "now here's a coin you don't see every day" material, this 1908-dated Barber quarter with the incredible grade of PR69 Cameo definitely made us sit up and take notice. The beaming surfaces are mostly silver-white, save the the subtlest suggestion of golden color at the extreme rims on each side. Even a loupe — as expected but seldom attained — reveals no mentionable distractions, although we note a tiny planchet "dot" flaw in the right reverse field, near the I in AMERICA, solely for pedigree purposes. The intense contrast is a bit heavier on the reverse, and the strike is full throughout.

In the technical grade of PR69, for the entire type, NGC has certified 27 Barber quarters, undoubtedly including duplicates — six non-Cameo, 11 Cameo, 10 Ultra Cameo. There are no PR70 coins certified. For the 1908 proof quarters, this PR69 Cameo is the sole example regardless of contrast. A remarkable coin for a Registry Set or type set.

From The Slotkin Family Trust Collection. (#85694)

#### Flawless 1911 Quarter, PR68 Ultra Cameo

**5126 1911 PR68 Ultra Cameo NGC.** By the year 1911, collectors had apparently tired of the two-decades-old Barber series, judging by the meager proof mintage of 543 coins each. After a brief resurgence in 1912 and 1913, the totals for 1914 and 1915 would fall even further, reaching a low of 380 proofs in the penultimate 1914 issue. This Superb Gem 1911 is all-white on the obverse, with a suggestion of gold on the reverse. Thick mint frost and deep mirrors set up the coveted "silver on black" contrast expected and desired, and the strike is flawless throughout. Census: 3 in 68 Ultra Cameo, 1 68 ★ Ultra Cameo finer (3/11).

From The Slotkin Family Trust Collection. (#95697)

# Deeply Mirrored 1912 Quarter PR68 ★ Cameo

5127 1912 PR68 ★ Cameo NGC. This is an amazing Superb Gem Cameo proof with brilliant and vibrant obverse and reverse surfaces. The coloration is silver-white, with little evidence of other color. Both sides have extremely deep mirrored fields with fully lustrous devices. In 1912, the Philadelphia Mint produced 700 proof quarter dollars, and this piece is clearly among the finest survivors of the issue. Close examination with a loupe reveals no contact evidence on either side, and the strike is close to full, save for minor weakness at the usual areas on the reverse. Census: 2 in 68 ★ Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#85698)

#### Reflective 1914 Quarter, PR68 Cameo

**5128 1914 PR68 Cameo NGC.** From a proof mintage of only 380 coins — lowest in the entire Barber quarter series — this Superb Gem 1914 specimen is silver-white in the centers, with a uniform accent of pastel rose at the extreme rims, and highly reflective and deeply contrasted throughout. The piece is seemingly on the cusp of an Ultra Cameo designation. A loupe reveals no mentionable distractions but does confirm this piece's fully struck status. A marvelous potential acquisition for date set, type set, or Registry Set purposes. Census: 2 in 68 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#85700)

#### STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter Still-Lustrous Choice AU

5129 1916 AU55 PCGS. Collectors of today may not realize it, but they narrowly escaped a series called the "Woolley." Tom LaMarre wrote in a *Coins Magazine* article in September 2009 that "Mint Director Robert W. Woolley was involved in overseeing the preparation of the quarter design in the Mint that the *Gettysburg Times* predicted would be known as the 'Woolley quarter' or simply the 'Woolley.' " The small mintage of 52,000 1916-dated Standing Liberty quarters, the first of the new design, would see circulation in early 1917 along with the 1917 Type One issues. This briefly circulated piece still retains noticeable amounts of mint luster. The bright surfaces displays only the slightest hints of golden toning on each side. A few small marks appear on the obverse.

From The Dustinn (Dusty) Lee Gibson Collection. (#5704)

1916 Standing Liberty Quarter Remarkably Lustrous MS61 Example

**1916 MS61 NGC.** The 1916 Standing Liberty quarters were released only a short time after the Panama-Pacific commemorative coins of 1915, and the original design had much in common with those coins commemorating the Panama Canal completion. Designer Hermon MacNeil's original concept had dolphins flanking Liberty on each side of her pedestal, symbolizing the Atlantic and Pacific oceans, as on the octagonal fifty dollar gold pieces of the previous year. Sprigs of laurel joined the dolphins' tails to LIBERTY, and the rim had a cable design rather than beads and pellets. One reverse design had olive branches tied with ribbons near the rim.

MacNeil later thought better of his dolphins and received permission from the Mint to make changes. Fortunately, the design as finally released in 1917 was a cleaner, less-cluttered one. The Standing Liberty quarter design remains a favorite of collectors today, and the key 1916 and 1918/7-S issues are at the top of many collectors' want lists.

This piece is remarkably lustrous for an MS61. It is also remarkably free from any distracting abrasions. The strike is strong throughout, and each side has just a tinge of light rose-colored toning, all adding up to a remarkably attractive coin in this grade. (#5704)

# Uncirculated 1916 Standing Liberty Quarter Well-Struck, Moderately Toned

5131 1916 MS61 ANACS. The 1916 Standing Liberty quarter is the unquestioned key to the series, especially if one chooses to exclude the variety overdate, 1918/7-S. All the other series issues are obtainable, even if some are conditional rarities. The 1916 quarter has enough distinguishing characteristics that even dateless Fair or Poor specimens can occasionally be cherrypicked from bulk 90% silver coinage. The finest specimen certified at PCGS (and pictured on the CoinFacts website) is a marvelous MS67+ Full Head example with glorious amber and cherry patina on portions of the obverse, a visual treat. The finest at NGC are three submissions, each graded MS67 Full Head. While this may not be one of the league with these finest known examples, it is nevertheless a well-struck Uncirculated piece, quite a rarity in itself. Each side has subdued gray and goldenrose patina with an undercurrent of blue. The only abrasion of note is a short reeding mark on Liberty's left (facing) breast. (#5704)

1916 Standing Liberty Quarter Near-Mint Full Head Lightly and Evenly Toned

5132 1916 AU58 Full Head NGC. The 1916 Standing Liberty quarter is a popular coin in any grade, from dateless Poor 1 to the highest Mint State grades. (Even dateless examples can be picked out by collectors cognizant of the distinguishing characteristics of the issue.) With the increased collecting of Full Head specimens, collectors have also become aware of the unusual strike attributes of the 1916 Standing Liberty quarter. Even AU55 and AU58 examples can sometimes meet the criteria for Full Head certification, providing a viable alternative to Mint State Full Head pieces, which are much more pricey and, of course, less available in any case. The fields and high points of the devices on this piece only show slight thinning of the mint luster — a small difference between this and a technically Uncirculated coin. Both obverse and reverse display pronounced mattelike granularity, and there are no mentionable marks on either side.

From The Dustinn (Dusty) Lee Gibson Collection. (#5705)

#### Full Head Near-Gem 1916 Standing Liberty Quarter

5133 1916 MS64 Full Head PCGS. CAC. After the experiences of 1909, when the release of the Lincoln cent led to speculation and shortages, Mint officials understandably showed concern when production of Standing Liberty quarters in 1916 amounted to just 52,000 pieces. To keep the coins from being hoarded, they were withheld from circulation that year and later released mixed with 1917 Type One quarters. Fortunately, a number of high-end pieces have survived, among them this Full Head near-Gem. Golden toning ranges from antique shadings at the borders to pale gold-gray at the frosty centers. Liberty's head detail is subtle but evident under magnification. (#5705)

# 1918/7-S Quarter, MS65 Brightly Lustrous and Among the Finest Known

**1918/7-S MS65 PCGS. CAC. FS-101.** An unknown quantity of overdated 1918/7-S quarters were struck from a single obverse die and released into circulation. These pieces circulated freely, and the overdate was not discovered until nearly 20 years after the coins entered commerce; as a consequence, few Mint State survivors are known today, and in most Uncirculated grades, the 1918/7-S has the highest price among dates and varieties listed in the *Guide Book*.

In the August 2001 edition of *The Numismatist*, Brian A. Silliman's ANA Authentication Bureau column looked at the 1918/7-S Standing Liberty quarter and supplied two useful diagnostics, apart from the overdate:

"The most notable characteristic of genuine specimens is a die clash in the protected recess next to Liberty's right knee. It can be seen on most specimens, even those grading Good and Very Good.

"Another important diagnostic is a small 'pimple' of extra metal above and to the right of the last digit of the date. However, it is hard to discern (or virtually invisible) on very worn specimens."

Since the present example is a beautiful and thoroughly well-preserved Gem, both markers are easy to spot; the former, in particular, shows that it is the E from E PLURIBUS UNUM on the reverse. The devices are well struck, save for slight softness on the shield and head, with only the lack of an earhole precluding Full Head status. Hints of pink-gold toning grace the brightly lustrous and otherwise silver-white surfaces. The sole mark warranting individual mention is noted on Liberty's midsection, on the line formed by the words IN GOD WE TRUST. Population: 3 in 65, 2 finer (3/11). (#5726)

#### Premium Gem 1927-S Quarter Undisputed Type Two Series Key

5135 1927-S MS66 PCGS. Among regular Type Two Standing Liberty quarter issues, the 1927-S is the undisputed key, thanks to a mintage of just 396,000 pieces. While the date is relatively accessible with high or moderate levels of wear, Mint State coins are elusive regardless of where they fall in the spectrum. This is a Premium Gem representative, flashy silver with pink and purple toning that deepens to claret in crescents among the lower and left borders. Softly struck on Liberty's head and shield but otherwise an impressive example. Population: 30 in 66, 4 finer (3/11). (#5764)

#### WASHINGTON QUARTER

FS-601 1950-D/S Quarter, MS66 The *Guide Book* Classic

**5136 1950-D/S MS66 PCGS Secure. FS-601.** The Washington quarters of 1950 have an unusual "mirror image" overmintmark scenario: one 1950-D reverse die has the D punched over an S, while a single 1950-S die has the S punched over a D. Both are listed in the *Guide Book,* and one of the best known examples of the 1950-D/S variant is offered here. Satin-frost surfaces are largely brilliant with faint but delightful accents in pink and gold. The sharp unaided eye can detect an anomaly in the mintmark area, and under magnification the curve of the S under the D is easily appreciated. For the variety, Population: 6 in 66, 1 finer (3/11). (#5843)

#### **EARLY HALF DOLLARS**

1795 O-112 Recut Date Half, AU55+ Condition Census Specimen

5137 1795/1795 AU55+ NGC. O-112, R.4. The engraver originally placed the date low, merged with the denticles, and corrected his mistake in the normal centered position between the border and bust, creating a distinctive and boldly recut date. This advanced die state has clash marks in the obverse and reverse fields, with a heavy obverse die crack from the upper border through the E to the hair, ear, and center dot. Another crack joins stars 3 through 7.

This scarce variety is popular with collectors and rarely seen in high grades. An amazing Gem from the St. Oswald sale appeared in our February 1995 auction, and a slightly finer AU58 specimen carries a provenance from the famous Eliasberg Collection. The present specimen appears to be the third finest survivor from the die pair.

Only a trace of high-point wear is evident on this lustrous example. Both sides are nicely detailed with an excellent strike and full borders. Trivial surface marks are visible beneath lovely gold and sea-green toning. (#6055)

1796 O-102 16 Stars Half, Fair 2 A Problem-Free Type Coin

5138 1796 16 Stars Fair 2 PCGS. O-102, High R.5. The Draped Bust Small Eagle half dollar, bearing the date 1796 or 1797, is usually absent from even advanced type collections. When an example does make an infrequent appearance at auction it may well exhibit impairments such as whizzing, scratches, digs, plugs, graffiti, or corrosion. On the other hand, a specimen without problems, even in the grades of Good or Very Good, might put it out of the price range of most collectors. The present Fair offering, showing just honest wear, is therefore a wonderful opportunity for the collector seeking to obtain this important key to a U.S. type set.

Apparently an early die state with no visible evidence of the crack through stars 1 to 4. This well-worn example has a complete bust, a sharp date, and a dozen fully outlined stars, with a few border dentils visible at the lower edge. The reverse is worn smooth with no visible details. Most important about this piece, in addition to the sharp and complete date, is the surface quality. There are a few microscopic lines and marks, including a tiny reverse rim nick at 12 o'clock, but it is essentially a problem-free coin. Both sides are light tan with wisps of delicate blue on the obverse.

Ex: Bowers and Merena (11/1993), lot 335; Stack's (1/1995), lot 504. (#6058)

#### 1797 Half Dollar, O-101a Attractively Toned VF25 Example Near-Terminal Die State

5139 1797 VF25 NGC. O-101a, High R.4. The Draped Bust Small Eagle half dollar of 1796-1797 is one of the most difficult type coins in American numismatics, regardless of the level of preservation. It certainly exhibits the highest value, on a grade-for-grade basis, of any U.S. type coin. Consequently, it is absent from most collections.

The VF25 offering in this lot is a perfect fit for a mid- to high-grade collection. Medium gray fields highlight silver-gray devices, yielding a pleasing two-tone patination. Liberty's hair displays excellent detail for the grade, as does most of the drapery. About one-half of the eagle's feather detail is visible, and the right (facing) talons are nearly full. The dentilation is nearly complete on both sides, a significant attribute for a 1797 half that ordinarily shows extensive weakness along the right obverse. The wreath, clouds, and lettering also stand out. We mention a few unobtrusive marks solely for pedigree purposes: one near the rim to the lower right of star 1, a diagonal mark beneath Liberty's chin, and one to the upper right of the eagle's beak.

The reverse of this coin is significant in that it approaches the terminal die state of Overton's 1797 101a variety, as seen by myriad die cracks. While many of them are worn off on lower-grade examples, the present specimen retains several diagnostic cracks. We describe them for the benefit of early half dollar specialists who collect by die state. First, a crack runs from the lower right side of the O in OF through the palm leaves to the wing. Second, a crack extends from the rim between D and S through the wreath to the wing. Finally, a crack travels from the rim through the first T in STATES and the wreath to the eagle's neck. The absence of the final-stage crack, which will form a right angle with the latter one and travel through the bottoms of ST to join perpendicularly the crack between D and S, precludes this piece from being classified as the "terminal die state."

In summary, this is an attractively patinated, well-defined coin that exhibits a late die state. As such, it will elicit spirited bidding among type and variety/die state collectors as well as those simply interested in owning a classic piece of Americana.

Ex: Superior Galleries (9/2006), lot 1119. (#6060)

# 1805 1805

#### 1803 O-104 Small 3 Half, MS61 ★ Third Finest Known

5140 1803 Small 3 MS61 ★ NGC. O-104, R.3. The 1803 Small 3 half dollar is a scarce variety and a condition rarity, with only three Mint State pieces that we are able to trace. The three Mint State pieces in our roster are the only ones that appear in the NGC and PCGS census records (3/11:

- —MS64 PCGS. Reed Hawn (Stack's, 8/1973), lot 12; Auction '87 (Stack's, 8/1987), lot 745; Superior (9/1993), lot 1262, as MS63 NGC; Stack's (1/2009), lot 409. Stack's separated the provenance of this coin, creating two listings for one piece in their January 2009 sale.
- —MS62 PCGS. Stack's (12/1982, privately); Queller Collection (Stack's, 10/2002), lot 33; American Numismatic Rarities (1/2006), lot 529.
- —MS61 ★ NGC. The present specimen. From an oldtime numismatic holding.

This lovely piece has a typical strike that shows softness on the left obverse stars, the lower hair curls, the reverse stars, and the clouds. The centering is adequate although imperfect, with narrow borders at the top on each side, suggesting the dies were out of alignment. Both sides exhibit full satin luster beneath a lovely display of rose, blue, and champagne toning. Contact marks are trivial. (#6067)

#### **BUST HALF DOLLARS**

1808/7 O-101 Half Dollar, MS63 First Capped Bust Overdate

**5141 1808/7 MS63 PCGS. O-101, R.1.** Following the 1805/4 and 1806/5 overdate Draped Bust half dollars, the 1808/7 is the first overdate in the Capped Bust series. Several Mint State examples are known, although most are at the lower Mint State grade levels, and this example is tied with one other for the sixth finest in any of our auctions since 1993.. This lustrous specimen has frosty silver surfaces beneath gray and orange toning at the centers, with deep blue and green near the borders. The strike is sharp with full star details, a bold drapery clasp, and strong feathers. Population: 7 in 63, 6 finer (3/11). (#6091)

1808/7 O-101 Half Dollar, MS64 A Top 10 Specimen

**5142 1808/7 MS64 NGC. O-101, R.1.** Records currently available to us suggest that only half a dozen Gem 1808/7 half dollars exist, placing this piece just outside the Condition Census. It is similar to the Eliasberg specimen that we sold two years ago, also graded MS64 NGC. In our past sales, we have also handled two different MS65 NGC examples and two different MS64 PCGS coins. The present specimen compares favorably to all of those coins and is easily one of the 10 finest survivors from the die pair. Both sides have frosty light gray surfaces, minimal marks, and excellent details. The strike is adequately centered, while the late die state weakens part of the reverse border. Both sides exhibit splendid orange, blue, and violet toning. Census: 5 in 64, 3 finer (3/11). (#6091)

1827 O-105 Half Dollar, MS65 Condition Census Candidate

**1827 Square Base 2 MS65 PCGS. O-105, R.3.** The recut tip of the 5 in 50C is characteristic of the reverse die used to coin O-105 and O-116. Star 7 points to the lower edge of a dentil on O-105, and to the upper edge of a dentil on O-116. Only four or five MS65 examples of this die marriage are known, including the Frederick Collection coin that we sold a year ago. The present example is a lovely Gem from an old-time numismatic holding. It possesses a bold strike with frosty silver luster and stunning gold and iridescent toning. Population: 16 in 65, 4 finer (3/11), for multiple 1827 varieties. (#6144)

#### PROOF BUST HALF DOLLARS

#### Extremely Rare Gem Proof 1818 Half O-113, The Hain-Byers Specimen

**1818 PR65 NGC. O-113, R.8 as a Proof.** Proof Bust half dollars are some of the greatest delicacies available to collectors of early U.S. Mint products. The 1818 (as opposed to 1818/7) proofs are all believed to be from the O-113 die pair; two overdated die pairs, O-101 and O-102, are responsible for a single proof each.

The roster of O-113 proofs reads as follows:

- The Clapp-Eliasberg Specimen: George H. Earle Collection (Henry Chapman, 6/1912), lot 2888; John H. Clapp; Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena/Stack's, 4/1997), lot 1756; Superior (8/2004), lot 1124, not sold; Heritage (1/2008), lot 2871.
- 2. The Hain-Byers Specimen, **the present specimen:** Believed to be Green and Cleneay; Newcomer; Wayte Raymond; Gustav Lichtenfels Collection, Part I (Kreisberg-Schulman, 2/1961), lot 2741; confirmed Hain-Americana Collection (Stack's, 1/2002), lot 1302; George Byers (Stack's, 10/2006), lot 1038.
- 3. The Smithsonian specimen. Suggested as O-113 by Breen in his *Proof Encyclopedia*, though unseen by him

A fourth coin, ex: Superior (7/2003), called a proof or specimen striking, sold at a steep discount compared to the results of the Clapp-Eliasberg and Hain-Byers pieces.

While there is doubt about that fourth coin, there can be little about this marvelous Gem proof, which is both profoundly mirrored under green-to-gold and aqua-gray field toning and lightly frosted on the high points of sharply struck devices. Surface preservation is excellent, with only a few disruptions in the field above the eagle's head and scattered elsewhere. As noted in other places, the strike is softly offset toward 2 o'clock on the obverse, so that the lower left obverse dentils are longer there than in other places, but this is a historical curiosity as opposed to any kind of problem. A great piece of numismatic history. (#6193)

# The Norweb 1823 PR63 O-111 Half Dollar Select, Unique as a Proof

**1823 PR63 NGC. O-111, Unique as a Proof.** The sole known proof specimen from O-111 dies, though a handful of O-108 specimens are accepted as proofs to varying degrees. One of the few proof coins Walter Breen admitted to *not* having examined in his legendary *Proof Encyclopedia*, where he wrote:

"Normal date. Repeatedly reported but not seen by me, though several deceptive early strikes are around. First auctioned in the J.N.T. Levick sale of October 1864 (W. Elliott Woodward, auctioneer), Cleneay:1154, illustrated; several flat stars. Waldo Newcomer had one, #1440 in his private catalogue, unattributed, possibly the Levick (?) - Cleneay coin; it cost him \$25 back in the early 1920's, which was then a high price even for proofs."

Interestingly, Breen does not record the offering of the present coin by B. Max Mehl in November 1954, as lot 230; from there it went into the Norweb Collection, later to be offered as lot 3079 in Norweb III (Bowers and Merena, November 1988). This piece was linked speculatively to the Levick - Cleneay pedigree in both its Norweb appearance and its initial Heritage appearance (see below), and the absence of other examples of the O-111 as a proof make that descent the most plausible, though there will always be a measure of uncertainty where the coin was before the Mehl auction.

Heritage had the privilege of offering this piece in its January 1996 FUN Auction, and we are proud to do so once again. Last time, the cataloger wrote: "This piece has exceptionally deep mirrors in the fields with quite a different 'look' to it than a prooflike business strike, even though several of the peripheral stars are not fully struck. Both sides show light golden toning, and the devices have a moderate amount of mint frost which provides a modest contrast on each side."

The presence of a few flat stars is a constant refrain in the descriptions of the proof O-111 1823 half dollars throughout history. More subtle visual markers that turn up in the Norweb and Heritage 1996 plate appearances include a tiny dark toning dot at the back of Liberty's cap and two areas of planchet roughness on the reverse, one on either side of the eagle's neck. Though lightly hairlined with a pinscratch trailing from the M in AMERICA, this is a fundamentally pleasing specimen that will prove to be a star in whatever cabinet of early U.S. coinage holds it next. (#6198)

#### **BUST HALF DOLLAR**

#### Historic PR63 1829 Half Dollar The Unique O-111a Proof

**5146 1829 PR63 NGC. CAC. O-111a, Unique as a Proof.** While other die pairs are known for the 1829 half dollar as a proof, including the O-107, O-108, and O-112, the O-111a has the unusual distinction of being struck *after* many, if not all, of the circulation-strike coins produced from its die pair. Both dies show evidence of wear; the obverse stars are drawn toward the rims, while the first and last letters of AMERICA are filled at the top. Nonetheless, this is a noquestions proof with intense, slightly flawed mirrors around softly frosted devices. Color is mostly gold with blushes of rose and elements of blue at the margins.

Ex: The Globus/Shulman Auction (Stack's, 12/1998), lot 1362; 71st Anniversary Sale (Stack's, 10/2006), lot 2755. (#6208)

#### **SEATED HALF DOLLARS**

#### Memorable 1839 No Drapery Seated Half, MS64 Important First-Year Type Coin

5147 1839 No Drapery MS64 PCGS. CAC. The Christian Gobrecht Liberty Seated design debuted on the silver dollars of 1836 with Flying Eagle reverse, spreading to the silver half dimes and dimes in 1837, the quarters of 1838, and the No Drapery half dollars of 1839, before finally ending up more than a quarter-century later on the obverse of the silver twenty cent pieces introduced in 1875. The Liberty Seated half dollar design lasted more than 50 years through 1891, although the No Drapery is a single-year type, and in extreme demand as such.

The mintage of No Drapery half dollars approached 2 million coins, but circulated examples prevail. Even pieces in the lower Mint State grades are very rare (Wiley-Bugert estimate Low R.6 in Mint State), and examples at the near-Gem level of the present specimen are memorably elusive. There are also a few proofs known of the 1839 No Drapery and they are impossibly rare, with fewer than a half-dozen examples known today. The fabulous George M. "Buddy" Byers Collection (Stack's, 10/2006) contained an example cataloged as "brilliant proof, one of apparently 4 known."

The present near-Gem business strike is softly impressed, as usual for the issue, with attractive, softly frosted mint luster. Consistent with the grade, there are few impairments or obvious signs of contact. The only identifying blemish is a reeding mark near the reverse border near 8 o'clock. Each side displays medium-density reddish-golden patina, with accents of blue around the margins. There is no sign of the reverse die cracks that some business strikes and proofs alike exhibit. A memorable Seated half, not soon to be bettered among even the most advanced collectors. Population: 8 in 64, 2 finer (3/11). (#6230)

# CONFEDERATE STATES OF AMERICA

Scott Restrike 1861 Confederate Half Dollar Breen-8002, MS61

5148 1861 Scott Restrike MS61 PCGS. CAC. Breen-8002. When the chief coiner's specimen of the original Confederate half dollar came to the attention of Philadelphia collector Charles E. Mason, Jr. in 1879, he bought it from the coiner, along with the reverse die used to strike the Confederate halves. Mason in turn sold the coin and die to New Yorker J.W. Scott, who manufactured his own "Confederate" halves by planing down the reverses of genuine 1861-dated U.S. half dollars and stamping the blanked sides with the Confederate reverse die. This process created the flattened obverses which have become a signature of the Scott Restrikes, and the characteristic is on full display with the present piece. Otherwise, the coin is normal as can be with pale golden luster, a few streaks of darker toning at the margins of the Liberty side, and no wear on the Confederate devices. (#340402)

#### **SEATED HALF DOLLARS**

1865-S WB-5 Seated Half, MS65 Extremely Late Die State

**5149 1865-S MS65 PCGS. CAC. WB-102, WB-5, R.2.** The 1865-S half dollar is a condition rarity in the Seated Liberty series, and this Gem is equal to the finest that PCGS and NGC have certified. The present piece is the latest die state seen, with additional cracks that are unlisted in Bill Bugert's specialized reference: *A Register of Liberty Seated Half Dollar Varieties, Volume I, San Francisco Branch Mint.* The obverse die appears on WB-5 and WB-6, while the reverse die appears on WB-4 and WB-5.

The obverse has heavy clash marks, and all of the cracks recorded for WB-5 and WB-6, along with an additional crack diagonally through the field left of the date. There is also a bold die chip on Liberty's left (upper) thigh.

The reverse is also the latest seen with additional unrecorded die cracks. The following additional cracks are noted: from the eagle's beak through the field toward the first S, from the top of the right (facing) wing into the field well below the first A in AMERICA, from the final A through all three arrowheads, and through the base of DOL to the period after L and turning sharply to a dentil below the lower arrowhead.

The late die state of both dies suggest that this might be a remarriage of WB-5, following production of WB-6. This amazing Gem has slight peripheral weakness with stronger central details. The surfaces are remarkable with light silver at the centers, within a frame of vivid gold and iridescent toning. Population: 1 in 65, 0 finer (3/11). (#6314)

1872-CC Seated Liberty Half, MS62 Finest Certified at NGC

**5150 1872-CC MS62 NGC.** A mintage of 257,000 Seated Liberty half dollars was achieved at the Carson City Mint in 1872, and the coin offered here is certainly one of the finest surviving specimens. This date circulated heavily in the regional economy, and most examples seen are in XF or lower grades. The last time Heritage was privileged to offer a specimen in MS62 was in lot 10213 of the San Francisco ANA Signature Auction (Heritage, 7/2005), which realized \$35.793.75

The present coin is sharply detailed in most areas, but star 13 is a little flat, and the neckline shows a touch of softness. The surfaces display mottled green patina, with a few touches of cerulean-blue. Census: 1 in 62, 0 finer (3/11). (#6334)

Gem 1873 Seated Liberty Half Popular Arrows Type

5151 1873 Arrows MS65 PCGS. The year 1873 was a seminal one in U.S. numismatics. Henry R. Linderman began his second term as Mint director, serving until 1878. The Latin Monetary Union, comprising France, Italy, Belgium, and Switzerland, adopted a gold standard. The "Crime of '73" legislated the two cent piece, trime, and silver half dime out of existence, omitted the Seated Liberty silver dollar from the list of authorized coins, introduced the Trade dollar, and increased the weight of minor silver coinage. The half dollar's weight increased from 12.44 gm to 12.50 gm of .900 fine silver.

The present coin is a stunning Gem half dollar, with the arrows at the date to mark the change in composition. This example offers lush shades of olive-green on the obverse that complement pinkish-silver and pastel lilac-blue hues on the reverse. A boldly struck and delightful type coin. Population: 10 in 65, 4 finer (3/11). (#6343)

Well-Struck and Rare MS62 1874-CC Seated Half Dollar, WB-101

**1874-CC Arrows MS62 PCGS. Breen-4988, WB-101.** The small mintage of 59,000 half dollars at Carson City, Nevada, in 1874 would be the first clue to the subsequent rarity of this issue, although the Western economy managed to grind many examples down to basal state through attrition. This was a time and place where hard money, gold and silver, did the talking. Wiley-Bugert today rate the issue rare in XF and above, very rare in Mint State. The WB-101, as here, shows a straight die line through the ES in STATES, and early states, also here, show a "tine resembling a cowlick off the eagle's head." This piece has generous cartwheel luster over attractively toned golden-pink surfaces. The strike is better than expected, despite a few toned-over roller marks that appear in the centers of each side. The minor contact marks are grade-consistent. Population: 6 in 62, 7 finer (3/11). (#6347)

#### PROOF SEATED HALF DOLLARS

Singular PR66 Cameo 1858 Half Dollar

1858 PR66 Cameo NGC. The 1858 proof issues were the first to receive wider, systematic distribution as sets and officially recorded mintage figures. In the case of the silver proofs, "300+" pieces were produced, a reflection of both stated production and the uncertainty induced by some of the Mint's more questionable practices at the time. However many coins were created, it is doubtful that one could find a more beautiful proof 1858 half dollar than this PR66 Cameo representative, border-toned blue and gold with silver interiors that show sharp contrast between mirrors and frost. One of just three Cameo examples certified by NGC and the finest by three points (3/11).

From The Slotkin Family Trust Collection. (#86412)

#### PR66 Cameo 1859 Seated Half

**1859 PR66 Cameo NGC.** One of the earliest Seated proof half dollar issues made for wide distribution, the 1859 has a mintage of 800 specimens, which were distributed in sets. Many examples with little patina show strong contrast, but few coins combine the Cameo appearance and great preservation of this PR66 Cameo survivor. Faint glints of champagne-gold color visit the gleaming fields, while the sharply struck devices are frost-white. A few tiny planchet flakes are scattered on either side of Liberty, and a mint-made depression is noted to the left of the date. Census: 1 in 66 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#86413)

Brilliant 1860 Half Dollar, PR66 Cameo

5155 1860 PR66 Cameo NGC. Just over 10% of the proof 1860 half dollars certified by NGC have been awarded a Cameo designation. They number only a dozen total, and this Premium Gem specimen ranks in the upper half of the group. Both sides offer appreciable gray-on-gray contrast, with the fields gleaming and pearlescent and the devices sharply struck and silver-frosted. Subtle toning accents the contrast, with faint lavender-to-blue border toning enhancing the obverse and an arc of golden-tan gracing the denomination area on the reverse. Census: 2 in 66 Cameo, 4 finer (3/11).

From The Slotkin Family Trust Collection. (#86414)

#### Superb Gem Cameo Proof 1860 Half

**5156 1860 PR67 Cameo NGC.** The proof half dollar series saw its first four-figure mintage in 1860, when official production reached exactly 1,000 specimens; the net mintage likely slides back into three figures to account for melting of unsold pieces. Offered here is one of just a dozen Cameo examples certified by NGC, a coin tied with three others for finest in the Census (3/11). Rich rose, gold, and blue toning over each side lets both the frost of the devices and the mirrors of the fields shine through, and this Cameo Superb Gem thus supplies both patina and contrast, which add up to fantastic eye appeal.

From The Slotkin Family Trust Collection. (#86414)

Cameo PR66 1861 Half Dollar Ex: Jules Reiver Collection

5157 1861 PR66 Cameo NGC. Heritage had the privilege of offering this specimen a touch over five years ago as part of the Jules Reiver Collection. At the time, it was graded PR65, a level that proved too conservative in its rating of both condition and contrast. Certainly the interplay between frosted devices and mirrored fields is at a Cameo level, and the mirrors are better-preserved than expected for a simple Gem. Blue and golden-tan border toning confirms the pedigree and further fuels the eye appeal.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21340, then graded PR65, realized \$4,887.50.

From The Slotkin Family Trust Collection. (#86415)

PR67 ★ Cameo 1862 Half Important Civil War Date

5158 1862 PR67 ★ Cameo NGC. It is easy to see why NGC decided to bestow the coveted Star designation on this splendid, virtually pristine specimen. All of the design elements are crisply and fully outlined. The portrait of Liberty and the eagle are amply frosted and seem suspended above deeply watery fields. Vivid russet, red, and cobalt-blue toning encircles flashy, untoned centers. This beautiful Superb Gem proof from the Civil War era is one of the finest survivors from the original mintage of 550 pieces. Census: 2 in 67 Cameo, both with Star designation, none finer (3/11).

From The Slotkin Family Trust Collection. (#86416)

Reverse-Toned 1863 Half, PR67 Cameo

1863 PR67 Cameo NGC. Both sides of this Superb Gem Cameo proof show patina, though that of the obverse is a pale greengold that scarcely impacts the coin's incredible contrast. The reverse is more richly toned with deeper champagne elements, but again the cameo effect is irrepressible, with the figure of the eagle especially well-frosted. A diagonal lint mark to the left of star 11 on the obverse may serve as a pedigree marker in the future. One of just 460 proofs struck for this important issue in the middle of the Civil War era. Census: 1 in 67 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#86417)

#### Ultra Cameo PR66 1864 Half Dollar

**5160 1864 PR66 Ultra Cameo NGC.** The 1850s and 1860s are not especially fertile ground for collectors seeking Ultra Cameo proof coinage. In the case of the 1864 half dollar, there are only three entries for such pieces, one certified as PR65 and the other two rated PR66 (3/11). This is one of the higher-graded pieces, exquisitely frosted on the sharply defined devices with faintly textured, deeply reflective mirrors around. The obverse presents as essentially black-and-white, while the reverse shows a delicate layer of greenish-gold patina. Fantastic eye appeal in all respects.

From The Slotkin Family Trust Collection. (#96418)

Colorful PR67 ★ Cameo 1865 Half

5161 1865 PR67 ★ Cameo NGC. Interior contrast is admirable on this Superb Gem specimen, thanks to frost-white devices that offer exquisite, almost sculptural detail. The rest of the coin shows appreciable patina, most notably deep blue and yellow-gold border shadings, while the obverse has aqua-silver interior fields and the reverse has a distinct champagne-gold cast. Carefully preserved with outstanding visual appeal for this Civil War-era issue amounting to just 500 proofs. NGC has graded two examples as PR67 Cameo, but only this one received the Star designation (3/11).

From The Slotkin Family Trust Collection. (#86419)

#### With Motto 1866 Half Dollar, PR66 Cameo

**5162 1866 Motto PR66 Cameo NGC.** This issue marks the beginning of the With Motto series of proof Seated halves. Cameo survivors make up a small minority of the pieces in the NGC *Census Report,* just 17 Cameo pieces versus 92 non-Cameo coins (3/11), and of the 17 Cameos, the majority (10 entries) are rated PR64 Cameo. This Premium Gem, then, is well ahead of the curve. Strong mirrors are subtly textured around the thickly frosted central devices, which are sharply detailed and carefully preserved. Gold-orange border toning is at its thickest to the left of the date. A horizontal lint mark at Liberty's waist may serve as a future pedigree marker.

From The Slotkin Family Trust Collection. (#86424)

Brightly Toned 1866 Motto Seated Half PR67 Cameo, Only One Finer at NGC

**1866 Motto PR67 Cameo PCGS.** Only 725 proof Seated Liberty half dollars were minted in 1866, the first year to include the motto IN GOD WE TRUST as part of the reverse design. Proofs are seldom encountered today, but may still be more available than Mint State business strikes.

The deeply mirrored fields on this Superb Gem contrast boldly with the sharply detailed, frosty devices to produce the coveted cameo effect. Peripheral bright blue toning surrounds a slightly off-center area of brilliance. Under magnification, some striations appear in the fields. Census: 3 in 67 Cameo, 1 68 ★ Cameo finer (3/11).

Ex: Los Angeles Signature (Heritage, 7/2009), lot 1131, which brought \$23,000.

From The Slotkin Family Trust Collection. (#86424)

Reconstruction-Era 1867 Seated Half PR67 ★ Cameo

5164 1867 PR67 ★ Cameo NGC. Though the post-Civil War silver proof issues saw a significant percentage increase in mintages compared to the years from 1862 to 1865, total production remained small; in 1867, Philadelphia struck just 625 proof Seated halves. This magnificent example offers gleaming, essentially untoned mirrors that supply ample contrast with the moderately frosted silver-white devices. Boldly impressed and an absolute delight, certain to be a highlight of a top-notch collection. Among Cameo pieces, NGC has graded just two Superb Gems, and the other PR67 piece failed to receive the Star designation (3/11).

From The Slotkin Family Trust Collection. (#86425)

Pristine 1868 Seated Half, PR67 Cameo Fully Struck Example

5165 1868 PR67 Cameo NGC. Despite the recorded proof production of 600 pieces in this Reconstruction-era year, Superb Gem examples of the 1868 Seated half are quite elusive in all contrast levels. NGC has certified four coins in PR67, with one PR68 finer. Those PR67s include two each in Cameo and Ultra Cameo, and the present Cameo piece is bettered only by a single PR67 ★ Cameo example (3/11). This charming and historic coin should nonetheless be a star of many a collector's holdings, with a rim of rose color accenting the pristine silver-gold surfaces in the centers of each side. Some interesting missing details, as made at the Mint (and clearly in the master hub), appear at Liberty's sandal and the rock just beneath, and on the lower feathers of the eagle directly under the shield and the left (facing) wing. The strike as produced by the dies is nonetheless full throughout.

From The Slotkin Family Trust Collection. (#86426)

# 1869 With Motto Half, PR66 Cameo Starkly Contrasted, Pale Toning

5166 1869 PR66 Cameo PCGS. CAC. The mintage of 600 proofs suggests a greater availability than is actually found for this date, especially among Cameo coins. Only 23 grading events have been recorded by both of the major services from PR61 through PR66 (the highest grade accorded). No Deep/Ultra coins have been certified. The fields display deeply reflective proof mirrors that provide a "black" backdrop against the frosted devices. Each side has a slight overlay of pinkish-rose patina. An extraordinarily attractive, early With Motto proof half. Population: 2 in 66 Cameo, 0 finer (3/11).

From The Peter Kevorkian Collection. (#86427)

#### Fully Struck 1871 Half Dollar, PR67 Cameo

1871 PR67 Cameo NGC. The proof mintages of Seated halves from the first three years of the 1870s were curiously large — a reported 960 pieces, in the case of the 1871. Some of the reverse dies from previous years (1868-1870) were apparently reused on some proofs of 1871, including the present coin which shows incomplete vertical stripes 1-3 in the shield, especially at the bottom of stripes 2-3. This piece has splendid and generous cameo contrast, with a full strike over silver-white surfaces lightly tinted with gold. Census: 2 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#86429)

1872 Seated Half, PR66 Cameo None Finer at PCGS

5168 1872 PR66 Cameo PCGS. CAC. This magnificent Premium Gem 1872 half dollar is one of the finest surviving specimens from the nominal proof mintage of 950 pieces. The 1872 is seldom encountered with the profound cameo contrast displayed by this example, with razor-sharp frosty devices standing out boldly against the deeply mirrored fields. All star centrils are present, and the detail on Liberty's hair and facial features is crisp and complete. The surfaces are brilliant, with the slightest hint of gold in isolated areas. Only a few minor hairlines can be detected in the virtually pristine fields. This is only the second time Heritage has been privileged to offer an 1872 Seated Liberty half dollar in PR66 Cameo, and we expect spirited competition when this lot is called. Population: 1 in 66 Cameo, 0 finer (3/11).

From The Peter Kevorkian Collection. (#86430)

Ultra Cameo PR66 1872 Seated Half

5169 1872 PR66 Ultra Cameo NGC. Out of 950 proof 1872 Seated halves struck, exactly four have been rated as Ultra Cameo by NGC. Each of the four has received a different grade: PR63, PR65, PR66, and PR67 (3/11). While this piece may be second in NGC's Ultra Cameo Census, its eye appeal is first-rate. Bold white frost blankets the crisply defined devices, while the silver fields are intensely mirrored and essentially untoned. Carefully preserved with a single minor disturbance off Liberty's left (facing) shoulder.

Ex: Ira and Larry Goldberg (5/2006), lot 2942, which realized \$12,075.

From The Slotkin Family Trust Collection. (#96430)

Important 1873 No Arrows, Closed 3 Seated Half Dollar, PR66 Cameo

5170 1873 No Arrows, Closed 3 PR66 Cameo NGC. The mintage of the No Arrows 1873 Seated halves is given as 600 pieces, although few survive today in as high a grade as the present Premium Gem Cameo specimen. All known examples are of the Closed 3 variety, although Breen mentions a possible Open 3 that was listed in the Beistle half reference, once owned by Colonel E.H.R. Green. The present coin is untoned silver-white, with light accents of gold on each side that are almost subliminal. The strike is close to full, save for minor weakness on the eagle's left (facing) claw and feathers just above. An important and appealing coin. Census: 3 in 66 Cameo, 3 finer (3/11).

From The Slotkin Family Trust Collection. (#86431)

Impeccable 1873 Closed 3 Half Dollar No Arrows, PR67 Cameo

**5171 1873 No Arrows, Closed 3 PR67 Cameo NGC.** The year 1873 was a busy one at the Philadelphia Mint, although certain issues such as the Open 3 two cent piece may have been struck later. The Mint struck 600 proof No Arrows, Closed 3 half dollars, made none of the No Arrows, Open 3 variety, and then struck 550 Arrows, Open 3 halves. This Closed 3 specimen, certified PR67 Cameo, is among the few finest certified. The strike is bold but not full. Light lilac toning covers the centers, framed by narrow bands of cobalt-blue and sage. The surfaces are impeccably preserved. Census: 1 in 67 Cameo, 1 in 67 ★ Cameo, 1 in 68 (3/11).

Ex: Dallas Signature (Heritage, 12/2005), lot 844, which realized \$12,075; Baltimore Signature (Heritage, 7/2008), lot 572, which brought \$13,800.

From The Slotkin Family Trust Collection. (#86431)

#### Gem Cameo Proof 1873 Arrows Half

5172 1873 Arrows PR65 Cameo NGC. One of only two years for the reintroduced Arrows half dollar type, and an especially desirable coin when located as a proof. Only 550 specimens were struck in this year, making it the lower of the two proof mintages for the Arrows type. The fields exhibit shimmering, watery reflectivity and the devices are nicely frosted, which provides a strong cameo contrast on both obverse and reverse. Light golden-olive-gray toning gravitates to the border on each side of this lovely Cameo Gem proof. Rarely seen so fine. Census: 7 in 65 Cameo, 5 finer (3/11). From The Slotkin Family Trust Collection. (#86434)

Silver-White 1873 Arrows Seated Half PR66 Cameo, Two Finer at NGC

5173 1873 Arrows PR66 Cameo NGC. Open 3, as all known. The mintage reported in the Breen *Proof Encyclopedia* and the *Guide Book* comes from famed researcher "Mr. 1873," Harry X Boosel, who added greatly to the numismatic knowledge of and interest in this pivotal year. Despite the given production of 550 coins, the present Premium Gem Cameo example is among the finest survivors of the issue certified at either service. The surfaces are uniformly silver-white, with little suggestion of other color and deep, generous field-device contrast that appears to verge on the Ultra Cameo level. Only trifling strike weakness occurs on the eagle's left (facing) claw, but overall the strike is bold and the eye appeal is excellent. A super candidate for a high-grade type set. Census: 5 in 66 Cameo, 2 in 66+ ★ finer (3/11).

From The Slotkin Family Trust Collection. (#86434)

#### Superb Gem Cameo Proof 1874 Arrows Half

**5174 1874 Arrows PR67 Cameo NGC.** Whether series enthusiast or type collector, any numismatist on the lookout for a high-end Arrows, With Motto proof half dollar will want to take a close look at the present lot. It has obvious grade appeal as the *single finest* Cameo example of the date in the combined certified population (3/11), and the overwhelming eye appeal gives the specimen even more validation. Gold-to-peach border toning gives way to pale gray at the centers. The toning is thin, permitting the full effect of mirrors that contrast well with the ample frost over the devices.

From The Slotkin Family Trust Collection. (#86435)

#### Well-Struck 1875 Seated Half, PR66 Cameo

1875 PR66 Cameo NGC. This Premium Gem Cameo proof is marvelously well struck and thoroughly appealing, a fitting representative of this proof emission of a recorded 700 coins that ushered in the last quarter of the 19th century. The fields are radiant and reflective, with a generous layer of mint frost on both sides' devices and a total lack of relevant contact marks. The surfaces are silverwhite with a slight golden tinge, and the strike is full throughout, save for minor weakness on Liberty's upper hair curls. Struck from the first die pair described in Breen's *Proof Encyclopedia*: metal spines up from Liberty's calf; unpolished surface between arrowheads. Census: 2 in 66 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#86436)

PR66 Cameo 1876 Half Dollar Tied for Finest at PCGS

**5176 1876 PR66 Cameo PCGS.** Type One Reverse. The "Dropped Mintmark" variety with the top of a small S beneath Liberty's throat, as made. The reported mintage of silver proof sets for 1876 was a substantial 1,150 units, but Walter Breen notes some of these sets may have been dated 1875. The proof 1876 Seated Liberty half dollar is definitely more difficult to locate than the large mintage figure would suggest. The present coin is a magnificent Premium Gem, with intense field/device contrast and spectacular iridescent toning. The sharply detailed central devices remain mostly brilliant, while the reflective fields are patinated in vivid shades of green and violet. This specimen is tied with one other coin as the finest certified Cameo at PCGS (3/11).

From The Slotkin Family Trust Collection. (#86437)

1877 Seated Half, PR66 Cameo Sole Finest at PCGS

5177 1877 PR66 Cameo PCGS. Type Two Reverse. The proof mintage of Seated Liberty half dollars was an unusually low 510 pieces in 1877. The demand for proof sets may have weakened after the large mintage of 1,150 sets in 1876, the country's Centennial year. The number of complete 1877 proof sets issued would have been limited by the mintage of the twenty cent piece, only 350 coins, so some sets may have lacked a specimen of that denomination, or some of the sets may have included coins from the previous year. In any case, the 1877 proof half dollar is certainly a rare date in Premium Gem condition, and almost unobtainable with the Cameo designation.

The present coin is a spectacular piece, with razor-sharp frosty devices and brightly reflective brilliant fields. The black-on-white cameo flash of this coin is quite dramatic. A few minor hairlines are evident in the fields, but they do not detract from the extraordinary visual appeal. Population: 1 in 66 Cameo, 0 finer (3/11).

From The Peter Kevorkian Collection. (#86438)

Brilliant 1878 Seated Half, PR67 Cameo Tied for Finest Certified

5178 1878 PR67 Cameo NGC. Type Two Reverse. A virtually stone-white Superb Gem with carbon-free surfaces. The strike is absolute save for Liberty's left (facing) knee. The preservation is flawless aside from an inconspicuous gray freckle beneath star 8 and a small mint-made strike-through near the R in AMERICA. The year 1878 marks a turning point within the Seated half series. After the introduction of the Morgan dollar, business mintages of other silver denominations dwindled to near-token levels, which places greater collector demand on proofs from that period. Census: 3 in 67 Cameo, none finer, none certified as Ultra Cameo in any grade (3/11).

From The Slotkin Family Trust Collection. (#86439)

1880 Half Dollar, PR66 Cameo All-White With Exceptional Contrast

**5179 1880 PR66 Cameo PCGS. CAC.** Ex: Stokely Collection. Type Two Reverse. The 1880 half is the second in a series of low-mintage dates that spanned the decade. Even though a rather substantial 1,355 proofs were minted, that number pales in comparison to the 8,400 business strikes, making the 1880 a significant, low-total mintage date. The ice-white devices and darkly mirrored fields provide obvious, undeniable cameo contrast. The strike is strong throughout, although a pair of thin roller marks are retained from the planchet prior to the strike, one on the left (facing) thigh, the other above the right scroll end. Technically flawless. Population: 7 in 66 Cameo, 0 finer (3/11).

From The Peter Kevorkian Collection. (#86441)

Single Finest NGC-Certified PR67 ★ Cameo 1881 Half Dollar

5180 1881 PR67 ★ Cameo NGC. Here it is, the single-finest NGC-certified proof 1881 Seated half dollar. The firm has yet to grade any examples as Ultra Cameo, and of the three certified as PR67 Cameo as of (3/11), only the present coin has in addition secured a Star designation. Undoubtedly, the reason for the NGC Star is the eye appeal derived from the contrast between ice-white devices and untoned glassy fields. This Superb Gem specimen is nearly void of hairlines, and the strike is sharp aside from slight blending on the knuckles of the eagle's left (facing) claw. Only asmade granularity near Liberty's raised hand prevents an even higher numerical assessment.

From The Slotkin Family Trust Collection. (#86442)

1882 Seated Half, PR67 Cameo No Errant 88 in the Denticles

**5181 1882 PR67 Cameo NGC.** Years ago Dick Osburn claimed that all 1882 proof halves have the errant 88 in the denticles. We are unsure if he has since revised his opinion on this, but this half shows no remnants of the errant date punch in the denticles. Only 1,100 proofs were struck in addition to 5,500 strikes for circulation. The fields are glassy and deeply reflective on each side, with the frosted devices providing significant cameo contrast. The devices are fully struck, and this is essentially an "as made" coin with just the slightest tinge of color on each side. Census: 4 in PR67 Cameo, only two finer, a PR67 ★ Cameo and a PR68 ★ Cameo (3/11).

From The Slotkin Family Trust Collection. (#86443)

1883 Seated Liberty Half, PR67 Cameo Ex: Stokely, Thomas Collections

**5182 1883 PR67 Cameo PCGS.** Ex: The Stokely Collection. The Seated Liberty half dollar business strikes from 1879-1890 (as well as the quarters and some of the dimes) have suffered from benign neglect by all but series specialists, as their miserly mintages — due to the enormous Morgan silver dollar coinages of that era — have gone largely unrecognized. The effect of this has been to put added pressure on the proof issues from collectors seeking a choice example. In the case of the 1883 Seated half, only 8,000 business strikes were coined, compared to 1,039 proofs.

This silver-white specimen offers spectacularly brilliant, untoned surfaces with black-on-silver contrast against the snowy devices. This coin is essentially pristine and extremely well executed. A trivial contact "dot" in the left obverse field, between stars 2 and 3, is mentioned for pedigree purposes. Population: 2 in 67 Cameo, 0 finer (3/11).

Ex: The Stephen Stokely #1 PCGS Registry Set of Proof Seated Half Dollars; Joseph Thomas Collection (Heritage, 4/2009), lot 2488. From The Peter Kevorkian Collection. (#86444)

Low-Mintage 1884 Half, PR67 Cameo Among the Finest at Either Service

**1884 PR67 Cameo NGC.** Just over 5,000 1884 Seated Liberty half dollars were produced in any form. Of those, a mere 875 were proofs. Of those proofs, just a few dozen have been designated as Cameo by either NGC or PCGS. And of those Cameos, NGC and PCGS have combined to certify but five 67s, with none finer (3/11). While 1884 proof half dollars were preserved at a high rate, this coin clearly stands strong among the elite not only for the date and series, but for the type. General collectors and series enthusiasts alike should look at this Superb Gem Cameo as a unique opportunity to own a conditional rarity. The surfaces are brilliant throughout, and the fields deeply reflective. This reflectivity sets up a strong cameo contrast against the frosted devices on each side. An essentially flawless Superb Gem.

From The Slotkin Family Trust Collection. (#86445)

Target-Toned 1885 Seated Half, PR68 ★

**1885 PR68** ★ **NGC.** This is a coin whose "wow factor" is simply off the charts, at least for the many collectors who prize beautifully toned coins. The target toning on the obverse encompasses amber-russet in the center, radiating outward into sky-blue, then a marvelous shade of pale lilac. On the reverse, the bull's-eye is more pale lilac, moving out into rings of sky-blue, jade, and russet at the rim. From the mintage of 930 proofs in 1885 with a small complement of 5,200 business strikes, we expect this piece will always remain one of the most appealing survivors. Census: 2 in 68 ★, 0 finer (3/11). (#6446)

PR67 ★ Cameo 1885 Half Dollar

5185 1885 PR67 ★ Cameo NGC. This is a magnificently preserved Superb Gem half dollar with Cameo-grade contrast and eye appeal in spades, as suggested by the Star designation. Deeply reflective fields surround richly frosted devices, the summed contrast approaching Ultra Cameo territory. Minor golden accents visit the margins and a few touches of cloud-gray visit the fields, while a diagonal field disturbance below the raised die dots to the right of Liberty's head may serve as a future pedigree marker. Census: 1 in PR67 ★ Cameo, 1 in PR67 ★ Cameo, 2 finer (3/11).

From The Slotkin Family Trust Collection. (#86446)

PR68 Cameo 1885 Half Dollar Conditional Rarity

**5186 1885 PR68 Cameo NGC.** Production of half dollar business strikes dropped precipitously after the 1878, and branch mints ceased minting halves altogether. Only a few thousand were made each year, but proofs continued to be struck for sale to collectors. Still, just 930 proofs were issued in 1885, and they are scarce today regardless of grade.

As a PR68 Cameo, of course, the date is a condition rarity. Iridescent lilac, gold, and rose toning encircles the pale gray center on the obverse of the present piece, while the reverse is engulfed in teal and reddish-orange. The deeply mirrored fields show impressive cameo contrast against the frosty devices. Magnification reveals only a few nearly imperceptible flaws. Census: 2 in 68 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#86446)

1885 Seated Half, PR66 Deep Cameo None Finer at PCGS

5187 1885 PR66 Deep Cameo PCGS. The deep frost is essentially seamless throughout the devices and legends on this spectacular Premium Gem. Inspection beneath a strong loupe reveals a nearly imperceptible, brief break on Liberty's left (facing) forearm. The superlative quality continues across the fields, which are prominently mirrored and devoid of blemishes. Only 930 proofs were struck, along with a scant 5,200 business strikes. Population: 1 in 66 Deep Cameo, 0 finer (3/11).

Ex: The Stephen Stokely #1 PCGS Registry Set of Proof Seated Half Dollars; Denver Signature Auction (Heritage, 8/2006), lot 3416, realized \$12,650.

From The Peter Kevorkian Collection. (#96446)

#### Amazingly Toned 1888 Seated Half, PR68 Tied for Numerically Finest Certified

**5188 1888 PR68 NGC.** Any high-grade 1888 proof half dollar is important, as this issue is scarcer than its already-low mintage of 832 pieces would indicate. This example is tied as finest known for the date with a single Ultra Cameo in PR68. The surfaces appear perfect. Both sides are covered with swirls of rich blue- and rose-colored toning with a small circle of brilliance at the upper-right obverse. An exquisite and unimprovable proof Seated half, one of the finest we have seen of this or any other date.

Ex: Bowers and Merena (8/2000), lot 4180, which brought \$5,750; 2003 FUN Auction (Heritage, 1/2003), lot 7243, which realized \$9,750.

From The Slotkin Family Trust Collection. (#6449)

1889 Half, Brilliant-White PR67 Cameo No Finer Cameos Graded

**5189 1889 PR67 Cameo NGC.** Untoned, silver-white features are well frosted over the devices and deeply mirrored in the fields. The surfaces show no distracting abrasions — a feature that confirms the validity of the PR67 designation. Virtually all major features are sharply struck, although we note some incomplete reverse detail on IN GOD WE TRUST that appears to be the result of a partially filled die. Produced at the end of the Seated half dollar series, the 1889 has a limited mintage of 12,000 business strikes and 711 proofs. Census: 3 in 67 Cameo, 0 finer (3/11).

Ex: 2003 FUN Auction (Heritage, 1/2003), lot 7244; 2005 ANA Auction (Heritage, 7/2005), lot 6337.

From The Slotkin Family Trust Collection. (#86450)

#### Superb Proof 1890 Seated Half Dollar Rare Ultra Cameo Specimen

**5190 1890 PR67 Ultra Cameo NGC.** The 1890 half was struck at the end of a long string of low-mintage dates that began in 1879. Only 12,000 coins were struck for circulation and another 600 proofs were produced in 1890. This span of dates from 1879 through 1890 has long been known for confusion of first-run business strikes with proofs, and the substitution of proofs for circulation strikes in date sets. There is no question about the status of this coin. The fields are deeply mirrored and the devices heavily frosted, presenting a well-balanced appearance from side to side. Not a speck of toning is seen, and there are no observable contact marks on this remarkable coin. Census: 4 in 67 Ultra Cameo, 1 finer (3/11).

From The Peter Kevorkian Collection. (#96451)

#### PR67 Ultra Cameo 1890 Half Dollar

**5191 1890 PR67 Ultra Cameo NGC.** NGC has graded just 10 examples of this late-date proof Seated half dollar issue as having Ultra Cameo contrast regardless of technical grade. This coin is upper-end within the spectrum of those fabulously contrasted coins, deeply mirrored in the essentially silver fields with thick standout frost draping the central devices. A narrow vertical lint mark just to the left of Liberty's shield arm may prove useful in the future as a pedigree marker, as may two reverse planchet flakes that bookend UNITED STATES OF AMERICA. Census: 4 in 67 Ultra Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#96451)

#### 1891 Half Dollar, PR67 Cameo All-White, Sharply Contrasted Proof

**5192 1891 PR67 Cameo NGC.** After a decade of low mintages for circulation strikes, the 1891 half ended the series with 200,000 coins struck for commercial use. This large outpouring relieved the date pressure on the 600 proof 1891 halves struck, and it also had the effect of slightly increasing the availability of high-grade and Cameo coins. This is the only PR67 Cameo certified by NGC; one PR67 ★ has been graded by NGC and two PR68s. PCGS has also certified three pieces in the super grades, two PR67 Cameo and one coin as a PR68 Cameo (3/11).

This all-brilliant example is almost perfectly preserved. The fields are deeply reflective and the devices are nicely frosted, yielding a sharp cameo contrast on each side. The striking definition is complete, except for the stars on the right side of the obverse. From The Slotkin Family Trust Collection. (#86452)

Refinery House, Philadelphia Mint, 1901

#### **BARBER HALF DOLLARS**

# 1892-O Half Dollar, Unc Details Possible Specimen Striking Accompanied by a Letter From Walter Breen

5193 1892-O — Improperly Cleaned — NGC Details. Unc. Possible Specimen Striking. The strength of the special nature of the striking of this coin does not rest solely on the Breen letter that accompanies. Rather, close examination of the texture of the coin tells the viewer much more than is revealed in the brief letter from Walter. The fields are deeply mirrored from rim to rim on each side. This includes areas in the fields between the design motifs; for example, between the arrowheads on the reverse. Often on branch mint proof dollars we have examined, incomplete die polish is seen behind the eagle's head or between the leaves in the wreath. This piece exhibits none of those signs of incomplete die polish, a feature that underscores the careful production of this coin.

Comparison is inevitable to the SP66  $\star$  1892-O half we offered in Central States two years ago. That coin also displayed no incomplete die polishing. The main difference in the fields between the two coins is that light cleaning has partially subdued the flash on this half, and the reverse periphery is deeply toned. Also, the SP66 coin was completely brilliant. The strike on this piece is notably stronger than on the SP66. Just the slightest weakness is seen here on the eagle's plumage.

On the coin offered two years ago, mention is made of light die cracking on the reverse. We see very slight die clashing below star 12 (not apparent on the SP66 coin), and a microscopic die crack can be seen between the tops of AM. As speculated in the Central States catalog in 2009, this may mean the dies were cracked (and slightly clashed) prior to striking. This seems more reasonable than cracking and clashing after a perfect first strike.

In addition to these two special strikings, there may be a third one. In a Bowers auction from August 2010, an MS62 that was noted with prooflike fields brought \$16,100, indicating at least two bidders thought there was something special about that coin.

The letter that accompanies this coin is on FCI letterhead and dated April 19,1979. It reads:

"This certifies that I have examined the accompanying coin and that I unhesitatingly declare it genuine and as described.

"It is an 1892 O half dollar, struck with exceptional sharpness at least equal to that of 1892 Philadelphia proofs, from polished dies, on a polished blank. Without the mintmark there would be no doubt of this coin's proof status. With it, I am still forced to conclude that it was intentionally so made."

Each side has a slight layer of golden-gray patina with deeper color around the margins, which is much more pronounced on the reverse. We are not quite certain why the coin was not encapsulated as a Specimen — perhaps because of the light cleaning and subsequent subduing of the fields. However, we feel confident bidders will see this coin as a specially produced half dollar from the New Orleans Mint with the first year of Charles Barber's design.

1896-O Barber Half, MS66 From the Dr. Thaine B. Price Collection

1896-O MS66 PCGS. Ex: Thaine B. Price. A truly exceptional specimen and one of the very finest to survive of this elusive date and mint. The surfaces are quite attractive, with strong luster and no distracting nicks or marks. The reverse is particularly smooth. Lightly toned with a blush of russet-gold near the periphery. For an 1896-O, this coin is well struck, although the fletchings and right shield corner lack complete detail. These areas are always seen with some degree of softness in the strike for this date and mint. No die cracks or clashes are seen, similar to the Eliasberg coin. When it comes to rarity, this date has long been known to be one of the most difficult to locate in true Gem condition. David Lawrence rates this issue second only to the 1904-S in the series in overall Mint State rarity. A review of the great auction sales of the past decades will turn up few that can compare to the present coin. When David Akers last cataloged the present coin, he noted that it was surpassed only by the Eliasberg specimen, a piece that, like many of the Eliasberg coins, originated with numismatist J.M. Clapp, who purchased it directly from the New Orleans Mint in August 1896 (Bowers and Merena, 4/1997, lot 2077). An important opportunity for the advanced Barber specialist. While there is a single MS67 piece now certified at PCGS, we would not be at all surprised to find that to be the Eliasberg coin, making this splendid piece still second (and not by much) in the Condition Census for the issue. Population: 2 in 66, 1 finer (2/09).

Ex: Dr. Thaine B. Price Collection (David Akers, 5/1998), lot 137; FUN Signature (Heritage, 1/2005), lot 4212, which realized \$29,900; ANA Signature (Heritage, 7/2008), lot 1705, which brought \$51,750. (#6475)

Richly Toned MS66+ 1909-S Half

**1909-S MS66+ PCGS. CAC.** Rich patina, olive-green at the narrow borders with thin skeins of similar color reaching into blue-green interiors, defines the eye appeal of this S-mint Barber half. Under the toning is a carefully preserved coin that comes remarkably close to Superb Gem status with only a few tiny, scattered marks on satiny surfaces. This century-old date was little-saved at the time of release, and a mintage of 1,764,000 pieces has left few opportunities for high-end survivors such as the present piece. PCGS has certified just seven numerically finer examples (3/11). (#6518)

# THE SOLUTION AND ADDRESS OF THE PARTY OF THE

Superb Gem 1909-S Barber Half Dollar Extraordinary Quality Ex: Duckor, Queller

5196 1909-S MS67 PCGS Secure. Ex: Duckor/Queller. Struck from perfect dies, with no evidence of cracks, clash marks, or other signs of die wear. This Superb Gem exhibits some strike weakness, probably due in part to parallel rolling lines visible on both sides. Two small marks on Liberty's cheek are all that separate this piece from virtual perfection. Both sides of this piece exhibit frosty luster and full mint brilliance beneath gorgeous original toning. The obverse has delicate gold at the center, with a lovely frame of blue, green, and yellow. The reverse is deeper-colored, with lilac-brown at the center surrounded by thick iridescence.

The San Francisco Mint only coined 1,764,000 Barber half dollars in 1909. However, census data suggests that a small group of high-grade pieces may have been preserved. The combined NGC and PCGS population records 12 MS66 coins and seven MS67 specimens. A single MS68 NGC coin that appeared in our January 2005 sale of the Hugon Collection no longer appears on the NGC Census Report. The Hugon coin is now MS67 PCGS and part of the Shireman Registry Set of Barber half dollars. This specimen, which we handled once previously, is the fifth MS67 PCGS example of the 1909-S half dollar Heritage has been privileged to offer. Population (3/11): MS66 (4); MS66+ (1); MS67 (7).

Ex: James A. Stack (Stack's, 3/1975), lot 630; Queller Family Collection (Stack's, 10/2002), lot 814; Dr. Steven Duckor; Boston ANA Signature Auction (Heritage, 8/2010), lot 3229. (#6518)

#### PROOF BARBER HALF DOLLARS

Cameo PR68 1895 Half Dollar

5197 1895 PR68 Cameo NGC. CAC. Ocean-blue and rose-red visit the peripheries of this magnificent Superb Gem. The deeply frosted devices provide agreeable contrast with the glassy fields. The strike is bold, since the fletchings and shield corners display complete definition. Splendidly preserved and nearly uncollectible any finer. The proof 1895 half dollar has the same mintage as its famous silver dollar counterpart but is far more affordable since the 1895 business strike half is plentiful. A scant 880 proofs were struck. Census: 7 in 68 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#86542)

#### Crisp PR68 Cameo 1896 Half Dollar

5198 1896 PR68 Cameo NGC. The 1896 and 1898 are two of the best-produced dates in the Barber half series. The surfaces on this Superb Gem Cameo 1896 display a pronounced two-toned contrast between the fields and devices. The fields are especially deep in their mirrored reflectivity. Both sides are almost completely brilliant, save for the slightest hint of golden toning that decorates the fields and devices. Myriad tiny die polish lines occur on Liberty's portrait, lending a fully original appearance. Even close examination with a loupe fails to reveal mentionable identifiers, spots, or marks of any kind. An especially attractive type coin that represents a fleeting opportunity for the specialist. Census: 2 in 68 Cameo, 0 finer (3/11). From The Slotkin Family Trust Collection. (#86543)

1897 PR68 Ultra Cameo Half Dollar

**5199 1897 PR68 Ultra Cameo NGC.** The reverse exhibits spectacular contrast between the ice-white devices and the darkly mirrored field. The obverse contrast is nearly as remarkable, although the borders show light milky-gray toning. The strike is complete on the often-soft fletchings and claws, and even the right shield corner has pleasing definition. Pristine aside from a brief thin mark beneath obverse star 7, which will identify future appearances of this impressive proof Barber type coin, among the finest survivors from an issue of 731 pieces. Census: 12 in 68 Ultra Cameo, 1 finer (3/11). *From The Slotkin Family Trust Collection.* (#96544)

#### Ultra Cameo PR68 1898 Half Dollar

**5200 1898 PR68 Ultra Cameo NGC.** Just a few short years before the "brilliant era" transformed the way American proof coinage looked, the U.S. Mint produced some of the most beautiful cameo coinage of any proof era. This magnificently preserved 1898 Barber half comes from the tail end of the sequence, exemplifying its best traits through incredibly thick frost that takes on a creamy hue as it coats the decisively struck central devices. Deep surrounding mirrors are minimally toned and primed for maximum contrast. A simply amazing specimen. Census: 4 in 68 Ultra Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#96545)

Border-Toned 1899 Half, PR68 ★ Cameo

**5201 1899 PR68** ★ Cameo NGC. This piece is one of the most beautiful Barber halves that we have ever examined. It is crisply struck with immaculate surfaces and jet-black fields that display illimitable reflectivity. The intense silver-white frost on Liberty's portrait is dazzling. The gorgeous, deep red-brown and turquoise-green peripheral toning on both sides increases the absolutely breathtaking eye appeal of the coin, easy to appreciate and difficult to forget. Tied with three additional PR68 Cameo pieces at the top of that section in NGC's Census Report, and of the three, only one other has received the Star designation (3/11).

From The Slotkin Family Trust Collection. (#86546)

#### Cameo PR68 1900 Half Dollar

**5202 1900 PR68 Cameo NGC.** This turn-of-the-century proof Barber half dollar issue is not so well known for Cameo quality as its predecessors, yet isolated specimens can match up with almost any survivor from 1896 or 1898. Though Cameo rather than Ultra Cameo, this specimen compares favorably on overall eye appeal, and the devices on each side are heavily frosted; the reverse alone likely would qualify for an Ultra Cameo designation. Delicate golden tints enrich the eye appeal. One of just two PR68 Cameo coins certified by NGC with none finer in the contrast category (3/11).

From The Slotkin Family Trust Collection. (#86547)

#### Deep Cameo PR68 1900 Half Dollar

**5203 1900 PR68 Deep Cameo PCGS. CAC.** As one of just two Deep Cameo examples certified by PCGS as PR68 with none numerically finer (3/11), this 1900 half dollar has to rank as one of the most desirable proofs of its issue. No numeric grade is needed, however, to tell the viewer that the coin in his or her hand is special. Intense contrast between glassy silver-black mirrors and sharply defined, thickly frosted devices tells the entire story. A tiny polished hollow is noted under Liberty's ear, but the overall preservation is impressive and spotting is minimal. Superb visual appeal. (#96547)

#### Bright 1901 Barber Half, PR68

**5204 1901 PR68 NGC.** The proof production of 1901-dated half dollars was a generous 813 coins, but most of them have various minor flaws or contact marks, averaging around the Select proof (PR63) level. At the lofty level of PR68 the issue is quite elusive, as fewer than 10 submissions — not necessarily different *coins* — have been seen.

This bright, untoned PR68 coin exhibits sharply impressed devices, except for a hint of the often-found softness at the upper right shield corner and eagle's wing. A loupe reveals the surfaces to be near pristine, as there are no blemishes that we can even identify as pedigree markers. Census: 6 in 68, 1 in 68  $\star$  finer (3/11).

From The Slotkin Family Trust Collection. (#6548)

Unusually Contrasted 1903 Half Dollar PR67 Cameo

5205 1903 PR67 Cameo NGC. This is a bright silver-white Superb Gem survivor of this proof production of 755 coins, although the reverse has a faint glimmer of gold. While the obverse seems barely there in terms of cameo contrast, the reverse on its own appears to verge on an Ultra Cameo designation, so intense is the field-device contrast. (This is unusual, as the Mint in 1902 and after changed its method of proof manufacture, lessening the frosty devices seen on earlier coins.) The often-seen strike weakness on the upper-right shield corner and eagle's wing is minor, and only a single slide mark on the cheek appears to preclude an even finer grade. Census: 2 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#86550)

#### Gleaming PR68 Cameo 1904 Half

**5206 1904 PR68 Cameo NGC.** Just 14 Cameo examples of this issue have been certified by NGC, and many of them show little in the way of frost on the devices. While this high-end specimen shows the chromelike mirrors that define many brilliant-era proofs, the light but distinct frost over the central devices is impossible to ignore, especially on the reverse. A magnificently preserved specimen that appears virtually faultless to the unaided eye; an apparent mark below the word IN on the obverse is actually a holder flaw and in no way affects the coin. Census: 1 in 68 Cameo, 1 in 68 ★ Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#86551)

1906 Barber Half, PR67 Cameo Sole Finest at NGC

**5207 1906 PR67 Cameo NGC.** The 1906 Barber half dollars, like all silver proof coins, show lessened contrast between the fields and devices after the Mint in 1902 changed its method of manufacture to what Breen calls "semibrilliant," a reduction of the frosty devices contrasting with mirrored fields. As such, proof coins of the era certified as Cameo are seen much less often. This Superb Gem Cameo proof 1906 nonetheless exhibits generous contrast, somewhat deeper on the reverse than the obverse. The surfaces are silver-white, with slight suggestions of gold on the obverse. Minor strike weakness appears in the usual area of the reverse, but elsewhere the impression is impeccable. Census: 1 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#86553)

#### High-End 1909 Barber Half, PR68 Cameo

**5208 1909 PR68 Cameo NGC.** This remarkable specimen offers virtually unrivalled quality; it is one of just four PR68 Cameo pieces in the combined certified population with none numerically finer (3/11). Each side is exactingly struck with marvelously clean surfaces that display crisp contrast between richly frosted devices and deeply reflective jet-black fields. Even thorough inspection with a strong magnifier fails to reveal more than a handful of grade-limiting defects. Other than a few tiny, milky specks scattered in the fields, this magnificent specimen is virtually perfect.

From The Slotkin Family Trust Collection. (#86556)

Elusive 1910 Barber Half, PR68 Tied for Finest Certified

**1910 PR68 NGC.** Among Barber half dollars, the 1910 Philadelphia Mint issue is elusive in business strike form, placing additional demand on the surviving proofs. Just 418,000 business strikes were produced, the fifth lowest-mintage Barber half behind the 1892-O and the highly regarded 1913, 1914, and 1915. In addition to the coins struck for circulation, 551 proof examples were coined in 1910. This production is also the fifth-lowest proof mintage within the series. The obverse of this amazing Superb Gem has lovely blue, lilac, and iridescent toning around a patch of brilliant silver luster. The reverse is toned with deep steel and iridescent color. A tiny contact mark on Liberty's cheek is the only blemish we see, scarcely worth mentioning. Tied for the finest certified proof 1910 Barber half dollar. Census: 7 in 68, 0 finer (3/11).

Ex: Long Beach Signature (Heritage, 8/2006), lot 2030. From The Slotkin Family Trust Collection. (#6557)

#### Singular PR68 Cameo 1911 Half

**5210 1911 PR68 Cameo NGC.** With a mintage of only 543 examples, the 1911 issue had the lowest production for a proof Barber half to that time, a status it would hold until 1914. Most survivors show little to no contrast, a change from the 19th century issues, which often showcased gorgeous cameo effects. In many ways, this incredibly appealing half has more in common with its 19th century forebears than its contemporaries. The devices show moderate to heavy frost and contrast beautifully with the deeply mirrored fields. Reddish-tan and blue-green peripheral toning visits each side, though any impact on the contrast is minor. As one might infer from the grade, the overall preservation is stellar. The piece stands alone as the single finest Cameo coin in the combined certified population (3/11).

From The Slotkin Family Trust Collection. (#86558)

Impeccable 1912 Half Dollar, PR68 ★
Tied for Finest at NGC

**5211 1912 PR68** ★ **NGC.** The Barber half dollar proofs of 1912 were produced to the extent of a nominal 700 pieces, but this piece today is at the extreme top end of the certified population. Both sides are largely untoned silver-white, but each displays a slight golden tinge in addition, and a small complement of pale lilac patina overlying as well. The reverse on its own would likely garner a Cameo designation, although the obverse field-device contrast is insufficient. Contact marks are not a factor, and the strike is well-executed overall while still showing minor weakness on the reverse, in an area familiar to all specialists in the series. The Star designation for superior eye appeal is well-deserved. Census: 3 in 68 ★, 0 finer (3/11). *From The Slotkin Family Trust Collection*. (#6559)

#### Silver-White 1913 Half Dollar, PR67 Cameo

**5212 1913 PR67 Cameo NGC. CAC.** The low mintages of 1913-dated business strikes and those of 1914 and 1915 exert added pressure on high-grade proof survivors from those years. In the case of 1913, the business strikes were made to the extent of only 188,000 coins, complementing the 627 recorded proofs. This Superb Gem proof boasts an unusual quota of cameo contrast, heavier on the reverse but noticeable on each side. The silver-white surfaces gleam with radiant luster and there are no singular distractions on either side. The strike verges on full, another plus that collectors will note. Census: 1 in 67 Cameo, 1 in 67+ Cameo, 2 in 68 Cameo (3/11). *From The Slotkin Family Trust Collection*. (#86560)

# WALKING LIBERTY HALF DOLLARS

Lightly Toned MS62 1919-D Half Dollar

**1919-D MS62 NGC.** The 1919-D, while not the lowest-mintage of the Walking Liberty half dollars, is nonetheless one of the most notorious condition rarities in the series. Even at the MS62 level, as seen here, the date is conditionally scarce. This example is uncommonly attractive for the grade. The strike is above-average on Liberty's head, and the thumb on her branch hand is clearly separated, though the eagle's breast has less definition. Light gold and peach patina settles over much of the softly lustrous surfaces. Minimally abraded but with a few small digs in the right obverse field that contribute to the grade. (#6578)

1919-D Walking Liberty Half, MS64+ Conditionally Rare in Higher Grades

**5214 1919-D MS64+ PCGS.** The 1919-D Walking Liberty half dollar is widely known as a condition rarity, and the issue is almost always seen with incomplete details on Liberty's hand and head. The eagle's leg typically lacks definition on the reverse. Considering coins in Gem condition or better, the 1919-D is the rarest coin of the Walking Liberty series. The present high-end Choice specimen offers quality approaching the Gem level, without the automatic price increase incurred when upgrading from the MS64 category.

The present coin is a delightful MS64+ specimen, with vibrant satiny mint luster. The mostly brilliant surfaces display just a few wisps of gold and ice-blue toning. The design elements exhibit the expected softness on the central devices, with a little more detail than usual showing on Liberty's hand. Population: 1 in 64+, 11 finer (3/11). (#6578)

1921 Walking Liberty Half, MS64 Popular, Low-Mintage Issue

**5215 1921 MS64 PCGS.** This is an important opportunity for the advanced collector to add this low-mintage rarity to an advanced set of Walkers. The 1921 has the second-lowest mintage in the entire series, and in all grades it is one of the rarest issues. However, in spite of its low mintage it appears quite a few pieces were set aside at the time of issue in Uncirculated grades, certainly more than its D- and S-mint counterparts. A few slight abrasions on each side prevent a higher grade. The surfaces are frosted with a hint of champagne toning, and the striking details are especially well defined on the obverse. (#6583)

#### Near-Gem 1921 Half Dollar

**5216 1921 MS64 NGC.** Following the Great War (as it was known then), the return of veterans to the United States and the wind-down of munitions manufacturing sparked a recession and a significant rise in unemployment. As a result, commerce was subdued, and thus demand for new coinage was at a low. It is little wonder that the years from 1919 to 1922 are such fertile ground for low-mintage issues and condition rarities. Among them is the 1921 half dollar, with production under a quarter-million pieces. This near-Gem survivor has distinct gold-orange patina over strongly lustrous surfaces and a decent strike. NGC has graded 35 numerically finer examples (3/11). (#6583)

Select Mint State 1921-D Half Dollar

5217 1921-D MS63 NGC. Better-defined than usually seen for this postwar Denver issue, especially on Liberty's head and branch hand and the eagle's upper body. Gold-peach overtones grace strongly lustrous and faintly frosted fields, while the unworn devices are more silver-gray. With a mintage of just 208,000 pieces, the 1921-D is among the most elusive and in-demand Walking Liberty half dollars regardless of grade, and it hardly comes as a surprise that the date is conditionally scarce at the Select level. NGC has certified 99 numerically finer representatives (3/11). (#6584)

#### Choice 1921-S Walking Liberty Half Dollar Rarest Walker in Mint State Sought-After Key to the Series

**5218 1921-S MS64 NGC.** Production of Walking Liberty half dollars was reduced drastically in 1921 at all three mints. The resumption of silver dollar coinage absorbed the lion's share of resources, as record numbers of Morgan dollars were coined to act as backing for Silver Certificates. The San Francisco Mint actually had the highest half dollar production total for the year, at a paltry 548,000 pieces. The fact that the 1921-S had a larger mintage than its Denver and Philadelphia counterparts may have caused collectors to overlook the issue, and few examples were saved for numismatic purposes. Today the 1921-S is the rarest coin of the series in Mint State grades.

The elusive nature of the 1921-S was recognized at an early date, and offerings at public auction always brought high prices. The specimen in lot 695 of the Will Neil Collection (B. Max Mehl, 6/1947) realized \$52.50, a staggering price for a silver coin that was only 26 years old at the time. The Walking Liberty half dollar was still the current series in 1947, although it would be replaced by the Franklin design the following year. In more recent times, the magnificent MS65 PCGS coin in the Anne Kate Collection realized \$161,000 in 2006.

While the present coin is not quite a match for the Anne Kate specimen, it will still serve as the cornerstone of a fine Walking Liberty half dollar collection. This attractive Choice example displays more detail on Liberty's head than the average 1921-S, which is known for its soft strike. This piece also shows some separation between the thumb and index finger, although the area does display the typical flatness and lack of detail. Mint luster is strong and satiny, and the surfaces exhibit areas of light gold and gray toning. This offering represents an important opportunity for the advanced Walking Liberty collector. Census: 51 in 64, 19 finer (3/11). (#6585)

#### Gem 1928-S Walking Liberty Half

**5219 1928-S MS65 PCGS. CAC.** While not one of the great lowmintage rarities of the Walking Liberty series — its mintage amounts to nearly 2 million pieces — the 1928-S is well-established as a conditionally elusive issue. Gems such as the present piece are borderline condition rarities, while anything finer is extremely rare. The present beauty has strong, swirling silver luster through the interiors with gold, orange, and russet elements splashed liberally through the border zones. Softly struck on Liberty's head and hand, though this is a minor quibble in context. Population: 54 in 65, 6 finer (3/11). (#6588)

#### FRANKLIN HALF DOLLAR

Gem Full Bell Lines 1953-S Franklin Half The Key to the Series

**5220 1953-S MS65 Full Bell Lines PCGS.** The 1953-S Franklin half dollar claims a low mintage of just 4.1 million pieces, and the issue is noted for its weak strike. Rick Tomaska calls the 1953-S "the weakest-struck date in the series ... far and away the rarest date in MS-65 with full bell lines." These caveats should be borne in mind when examining the present coin, which does show a little softness in some areas, but is much superior to the usual specimen in this respect. Currently, PCGS has certified 22 coins in MS65 Full Bell Lines, with a single coin finer, while NGC has seen only four examples in this exalted grade, with none finer (3/11). The coin offered here offers vibrant mint luster and mostly brilliant surfaces, with hints of gold and ice-blue toning. This coin is one of the finest representatives of this elusive date. (#86666)

#### **EARLY DOLLARS**

1795 Flowing Hair Dollar, XF45 Three Leaves Reverse, B-5, BB-27

5221 1795 Flowing Hair, Three Leaves XF45 PCGS. B-5, BB-27, R.1 The common Three Leaves variety, the B-5 dollar is seen more often than all other 1795 Flowing Hair dollar varieties combined. A short diagonal bar in the left obverse field identifies the variety. This piece, housed in a green-label PCGS holder, exhibits pewter-gray surfaces with delicate gold toning on the high points. Traces of pale blue heighten the eye appeal of this Choice XF dollar. A few small blemishes are evident on each side, with minor adjustment marks at the left side of the reverse. (#6852)

1795 B-6, BB-25 Flowing Hair Dollar, XF45 Three Leaves Reverse

**5222 1795 Flowing Hair, Three Leaves XF45 PCGS. B-6, BB-25, R.3.** There are three distinct types of 1795 silver dollars. They are the Flowing Hair with Two Leaves inside the branch below each wing, the Flowing Hair with Three Leaves below each wing, and the Draped Bust. This splendid piece, housed in a green-label PCGS holder, represents the Flowing Hair, Three Leaves type. Both sides have lovely blue-gray patina with additional gold, emerald, and violet toning. The surfaces have only a few minuscule marks of no consequence. This highly appealing, lightly circulated 1795 dollar will appeal to a broad audience.

From The Orchid Collection. (#6852)

1797 B-3, BB-71 Silver Dollar, AU58 10x6 Stars, Large Letters

**5223 1797 10x6 Stars, Large Letters AU58 NGC. B-3, BB-71, R.2.** Less than 2,000 1797 silver dollars survive in all grades, and few are equal to or finer than this near-Mint representative. The average grade for 468 NGC-certified 1797 silver dollars is 37, and only 13 examples are graded AU58, with just 13 others in Mint State grades (3/11), the census including all three die varieties.

This lovely piece exhibits nearly full mint frost with brilliant and highly lustrous silver surfaces. Both sides have a few trivial handling marks consistent with the grade. Light adjustment marks at the center of the reverse are inconsequential, and most of the surface marks appear to remain from the original planchet before this piece was struck. The left obverse and reverse show weak details, with the balance boldly defined. (#6865)

1797 B-2, BB-72 Silver Dollar, VF30 9x7 Stars, Small Letters

**5224 1797 9x7 Stars, Small Letters VF30 PCGS. B-2, BB-72, R.4.** The B-2 dollar, with 9x7 stars on the obverse and Small Letters on the reverse, was once considered a major rarity. However, current collectors consider the variety scarce, with 100 to 200 known. It is still harder to locate than either of the other two 1797 varieties.

Grading is difficult, as the obverse is usually much sharper than the reverse, as it is on this example. The grade of such coins is normally based on the sharper side, as in the 1922 Plain cent, which is always graded by the reverse alone. Both sides of this piece have light gray surfaces, the obverse also showing a delicate frame of iridescence. (#6866)

1799 B-17, BB-164 Dollar, AU58 The Usual Die State

5225 1799 7x6 Stars AU58 NGC. B-17, BB-164, R.2. The usually seen intermediate die state with a prominent die crack through UNITED ST. Other minor cracks and die flaws are evident on each side. This sharply defined specimen is nicely centered with complete borders, strong star details, and visible breast and tail feathers. The surfaces are frosty and lustrous with friction only visible on the high points. Both sides have lovely iridescent toning over the frosty luster. With only four or five Mint State pieces known, the present example is a clear candidate for the Condition Census. (#6878)

1799 B-5, BB-157 Dollar, MS61

**5226 1799 7x6 Stars MS61 ANACS. B-5, BB-157, R.2.** Bowers-Borckardt Die State III. The E in LIBERTY is almost perfectly centered over the hair peak, and the U in UNITED has a defective upper left serif. The reverse die cracks are advanced on this intermediate die state specimen. Although considered one of the most plentiful 1799 silver dollar varieties, Mint State examples are elusive with only about a dozen such pieces known.

This satiny example has pleasing surfaces that exhibit a few trivial marks beneath central gold and mustard toning, with peripheral iridescence. Both sides present a bold strike with excellent design definition. (#6878)

#### **GOBRECHT DOLLAR**

1836 Gobrecht Dollar, Problem-Free PR58 Judd-60, Die Alignment I

5227 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR58 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the O in DOLLAR). This early striking lacks the diagonal die clash mark above the eagle's wing, and as such is one of the 400 pieces struck in early December 1836. Many of these coins were set aside as mementoes of this radically different and artistically accomplished design. This was apparently just such a coin. The only detracting feature is evidence of slight handling, which accounts for the PR58 grade. However, the fields are remarkably reflective and the striking details are complete throughout, with no friction seen over the high points of the design (indicating only the slightest handling). One small mark appears in the right obverse field and each side displays just the slightest trace of golden patina. This extraordinary Gobrecht dollar should realize a significant premium. (#11225)

#### **SEATED DOLLARS**

1859 Seated Dollar, MS64 Infrequently Offered in Mint Condition

**5228 1859 MS64 NGC.** The mintage of the 1859 Seated dollar was a substantial 256,500 pieces. With such a large number struck, the 1859 should be abundantly available in high grades. But the story of these coins is not simply one of large mintage equaling large availability. Rather, most of those produced were exported to northern China where they were subsequently chopmarked or converted to bullion again. The result is that few 1859 dollars are known to collectors today (not to be confused with the frequently available 1859-O). This is a brilliant dollar that is well struck, except on the head of Liberty and uppermost stars. A few shallow marks are scattered across the obverse and account for the grade. Census: 16 in 64, 0 finer (3/11). (#6946)

#### 1871-CC Seated Dollar, AU58 One of the Finest Known Ex: Queller

**5229 1871-CC AU58 NGC.** The 1871-CC has the lowest mintage of any silver dollar issue from the Carson City Mint, and is second in rarity only to the 1873-CC. Q. David Bowers, in his 1993 silver dollar *Encyclopedia*, estimated between 85 and 125 survivors in circulated grades. A mere nine coins have been certified at AU58 through the combined efforts of NGC and PCGS, and just seven more are known in Mint State, as of (3/11).

According to Weimar W. White (1985): "One of the rarest Liberty Seated dollar(sic) in all grades. This coin always excites the silver dollar specialist when offered for sale. ... This great date, when available, is almost always offered for sale in circulated condition." (from *The Liberty Seated Dollar 1840-1873*, page 54.)

This piece is solidly struck, with bold details noted on Liberty's head and foot, and on all of the eagle's feathers and talons. With the aid of magnification, minor doubling is evident on many of the lower reverse design elements, but this appears to be shelflike "machine" or "strike" doubling. The tan coloration over each side seems entirely original, and iridescent green and gold accents are prominent on the reverse. A great deal of satinlike luster and considerable semiproof-likeness remains evident on the lightly marked surfaces, which show no singularly noteworthy or distracting abrasions. Only slight highpoint wear occurs on Liberty's head and hair, and on the eagle's neck feathers and wing tips.

Ex: Queller Family Collection of Silver Dollars/Central States (Heritage, 4/2008), lot 2131, where it realized \$46,000. (#6967)

#### **PROOF SEATED DOLLARS**

# 1858 Seated Liberty Silver Dollar PR65 Cameo, A Proof-Only Issue

**1858 PR65 Cameo NGC.** Seated dollar collectors recognize the 1858 as a proof-only issue — the last proof with no recorded mintage, and the first proof with pieces made available to the public at the Mint. Various mintage estimates have been suggested over the years, from a low of 80 pieces that the Chapman brothers reported late in the 19th century, to a high of 300 or more coins. Numismatist and Seated specialist Duncan Lee suggested the latter figure in a 2006 article about the series. His article, "Proof Seated Dollars A Study in Relative Rarity," appeared in the August 2006 Monthly Supplement of *The Coin Dealer Newsletter*. Lee wrote:

"The 1858 is the only Proof-only date in the Liberty Seated Silver Dollar series. All known survivors were struck from one obverse die paired with at least two reverse dies, one being the same reverse die used for some 1856 and 1857 Proofs with a prominent rust lump over the left base of the 'L' in 'DOL.' Several others were made with the reverse die which was used to produce some 1859 proofs."

The exact or even the approximate mintage may never be known but it is almost certainly closer to Lee's estimate than it is to Chapman's estimate. NGC and PCGS have certified 154 submissions, a figure that includes resubmissions and crossovers. The current population figure is almost double the mintage estimate of the Chapman brothers. We believe that close to 200 1858 Seated Liberty dollars still survive today, lending further support to Lee's estimate.

This brilliant Gem possesses icy devices that exhibit obvious contrast with the unperturbed and glassy fields. Both sides are entirely untoned with the exception of the rims, which display subtle gold coloration. A splash of darker toning on the obverse rim at 3 o'clock should provide a ready provenance marker. PCGS has certified 88 proofs and four Cameo proofs, including four PR65 and three PR64 Cameo. NGC has certified 66 proofs and six Cameo proofs, including four PR66, one PR67+ Cameo, and two PR65 Cameo. Census: 2 in 65 Cameo, 1 finer (2/11).

Ex: Heritage (9/2008), lot 2474. (#87001)

1859 Gem Proof Ultra Cameo Seated Dollar Of the Greatest Rarity

5231 1859 PR65 Ultra Cameo NGC. In the case of the business strike and proof mintages for the 1859 Seated dollar, both are deceptively high for the number of survivors today. Mint Director James Ross Snowden apparently anticipated that a great many more collectors would order silver dollars from the Mint than actually did so. The original mintage was 800 proofs, but a more realistic estimate is that 450 pieces were eventually distributed, and the remainder melted. This starkly contrasted white-on-black Cameo dollar is totally brilliant throughout and fully struck in all areas. A shallow, linear depression in the upper reverse field is the only surface disturbance worthy of note, and that appears to be Mint-created. Of the highest rarity both as an Ultra Cameo and a Gem, this is the only 1859 dollar so graded with one piece finer (3/11). (#97002)

Stunning 1865 Seated Liberty Dollar PR65+ Ultra Cameo, Last No Motto Issue

**5232** 1865 PR65+ Ultra Cameo NGC. The final year of the Civil War was also the last for the No Motto Seated dollar designs, due to the upswell in religious belief that the catastrophic conflict engendered. The 1865-dated Seated dollars are accordingly the last of their kind, although some 1865-dated pattern With Motto silver dollar proofs (Judd-434), transitional issues, are known. The present Gem Ultra Cameo presents unusual and stunning quality for a proof from this challenging era, early in the Mint's status as official marketerpurveyor of proof coins to collectors. The devices are thickly coated with mint frost; profound mirrors characterize the fields. The surfaces are largely ice-white, with a suggestion of russet and blue-gray on the obverse. The strike is full throughout, and minor field contact chiefly in the left obverse — limits an even finer grade. The reverse die is a carryover from 1863. Census: 1 in 65+ Ultra Cameo (this piece), 7 in 66 Ultra Cameo finer (3/11). (#97008)

1867 Seated Dollar, PR66 Ultra Cameo Tied for Finest Certified

**5233 1867 PR66 Ultra Cameo NGC.** Seated dollars are rarely seen in Ultra Cameo proof, regardless of the numerical level. Only a little over 2% of proof Seated dollar submissions at NGC and PCGS have received the Ultra or Deep Cameo designation with 154 such pieces certified from a total submission of 6,594 proofs. For 1867 the ratio is slightly different with 17 Ultra or Deep Cameo proofs from a total of 475 submissions.

The contrast that this Premium Gem exhibits is sensational, with highly lustrous and frosty devices that show complete detail, within a frame of deep mirrors. Delicate gold toning is evident on each side of this mostly brilliant silver specimen. Only four of the aforementioned 17 proofs carry the PR66 grade at NGC and PCGS, with none finer. Here is a wonderful opportunity for the connoisseur. Census: 3 in 66 Ultra Cameo, 0 finer (3/11). (#97015)

1871 Gem Proof Seated Dollar Beautifully Toned

**1871 PR65 PCGS.** The fields display bright, mirrored flash beneath the modest multicolored toning seen over each side. The strike shows the expected completeness one would expect from a proof, with pinpoint sharpness on the star radials. The toning is just deep enough to slightly mask the cameo contrast that is apparent when the coin is viewed beneath a light. This is a well-preserved Gem, one of just 960 examples coined. In spite of the low mintage, two die pairings were used to strike proofs. This coin is from the Breen-5488 pairing with the 71 in the date further apart. Population: 20 in 65, 1 finer (3/11). (#7019)

#### TRADE DOLLAR

#### **PROOF TRADE DOLLARS**

1875-S Trade Dollar, MS65 A Magnificent Type Coin Ex: Jack Lee III

**5235 1875-S MS65 PCGS.** Type One Obverse, Type One Reverse. Large S. The mintage of 4.4 million pieces guaranteed that even after many hundreds of thousands of 1875-S Trade dollars were exported to the Orient, there would still be an abundant supply on the West Coast. This magnificent type coin would be hard to beat in terms of eye appeal. The surfaces are bright and heavily frosted, the devices almost fully brought up in all areas. A number of coins have been certified as technically superior, but among MS65 examples this piece has outstanding visual appeal. And surely that is what Jack Lee and the present consignor appreciated in this dazzling coin.

Ex: Jack Lee Collection III (Heritage, 11/2005), lot 2265. (#7039)

1873 Trade Dollar, PR66 Cameo Second-Finest at NGC

**1873 PR66 Cameo NGC.** The first year of Trade dollar coinage was a transitional year, also witnessing the last of the Seated Liberty silver dollars. The proof mintage included 600 Seated Liberty pieces and 865 Trade dollars. Two reverse dies were used for production of the Trade dollars.

This example represents a late die state of the Patched Letters reverse, with the tops of E in STATES and F in OF strengthened. Parallel and curved die lines in the lower reverse field are characteristic of the late state pieces.

Although some design weakness is present on each side, this Premium Gem Cameo proof exhibits fully mirrored fields, lustrous devices, and delicate peripheral gold toning. Census: 1 in 66 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#87053)

#### Rare PR67 Cameo 1874 Trade Dollar Finest Certified

5237 1874 PR67 Cameo NGC. This spectacular coin is the finest certified 1874 Trade dollar at either of the leading grading services, and has legitimate claims to the title of "Finest Known." Currently, PCGS has graded no examples higher than PR66, while NGC has certified two proof specimens in Superb Gem condition, but without the Cameo designation, leaving this coin alone at the top of the grading pyramid.

The 1874 proof Trade dollar is the rarest date of the series, excluding the clandestine 1884 and 1885 issues. The reported mintage was a meager 700 pieces, but experts concur that the issue is much less available than even this small figure suggests. Unlike other proof dates of the era, numismatists believe the entire mintage was eventually dispersed to paying customers, with no melting of leftover pieces at the end of the year. While most of the coins were sold as part of proof sets, records show 175 unsold examples were released at face value, probably to Philadelphia coin dealers like A.M. Smith, on January 9,1875. Even if the entire mintage reached numismatic hands, the supply was small, and the issue had a particularly low survival rate. It is likely that hundreds of specimens have been mishandled or spent for face value over the years.

The present coin is a spectacular Superb Gem, with profound field-device contrast. The deeply mirrored fields are highlighted by a rainbow of iridescent sky-blue and green toning on both sides. The design elements display razor-sharp details throughout, and the surfaces exhibit only the most minor hairlines. This offering represents an important opportunity to acquire the finest certified example of one of the rarest dates in the Trade dollar series.

Ex: Old Colony Collection (American Numismatic Rarities, 12/2005), lot 1452.

From The Slotkin Family Trust Collection. (#87054)

1875 Trade Dollar, PR66 Cameo Type Two Reverse

**5238 1875 PR66 Cameo NGC.** Type One Obverse, Type Two Reverse. Beautifully toned in orange, rose, and electric-blue colors, this flashy and well struck Premium Gem Cameo proof has pleasing frost on the devices and no shortage of eye appeal. Thorough evaluation of the surfaces reveals no mentionable imperfections. Only 700 proofs were struck, and the majority bore the Type One Reverse, with a berry beneath the right claw. Of course, the 1875, as a business strike, is among the scarcest issues of the series. An interesting slender and vertical strike-through (as made) is noted on the upright of the R in TRADE. Census: 6 in 66 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#87055)

1875 Trade Dollar, PR65 Ultra Cameo Challenging Early Proof Issue

**5239 1875 PR65 Ultra Cameo NGC.** Type One Obverse, Type Two Reverse. The contrast of this essentially untoned Gem specimen is made all the more profound by the deeply mirrored fields which set up a "black" background against the white frost over the devices. The strike on this impressive early proof Trade dollar is fully executed over the central devices, while just a handful of the obverse stars come up a trifle short of complete. These earlier dates in the series are not touted like the higher-mintage proof-only issues, but they are far more challenging in high grades. Census: 3 in 65 Ultra Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#97055)

1876 Trade Dollar, PR65 Cameo Type One Obverse, Type Two Reverse Transitional Variety

**5240 1876 PR65 Cameo NGC.** Type One Obverse, Type Two Reverse. A transitional variety with the obverse used from 1873 to 1876 and the reverse used from 1876 to 1885. An attractively contrasted specimen with untoned centers and arcs of burnt-orange, cobalt-blue, and violet toning partially framing each side. The obverse displays excellent sharpness throughout, while a touch of softness is noted on the more stressful points (left wingtip, leg feathers, and talons) of the eagle. While receiving less fanfare than the proof-only issues, the 1876 is actually scarcer in such an outstanding grade. Census: 9 in 65 Cameo, 6 finer (3/11).

From The Slotkin Family Trust Collection. (#87056)

1876 Trade Dollar, PR66 Cameo Scarce in Higher Grades

**5241 1876 PR66 Cameo NGC.** Type One Obverse, Type Two Reverse. Most extant proof 1876 Trade dollars are of this hub variety. With an original mintage of 1,150 pieces, the 1876 is one of the more readily available dates in this series, at least in an absolute sense. Surprisingly, Gem quality survivors are scarce, and they can be equally as difficult to locate as those of the first-year 1873 delivery. Well frosted over the devices, the present survivor is boldly cameoed with deep, glassy fields. Rich russet and cobalt-blue shades dominate the peripheral areas on each side, this lending a fully original appearance to this well-preserved example. A sharply impressed Premium Gem. Census: 6 in 66 Cameo, 0 finer (3/11). (#87056)

#### 1877 Trade Dollar, PR67 Ultra Cameo Extraordinary Technical Quality and Eye Appeal Tied for Finest Certified

1877 PR67 Ultra Cameo NGC. Excluding the controversial 1884 and 1885 issues, the 1877 Trade dollar boasts the lowest reported mintage of the series, at 510 pieces. Even this small figure may be too high, as Walter Breen writes in his Complete Encyclopedia of U.S. and Colonial Coins, "Proof mintage unknown; Mint report [510P] unconfirmed by Archives data, true quantity probably smaller." Breen was alluding to the figures in Mint Director James P. Kimball's report of 1887 — 10 years after the coins were struck. Most contemporary numismatists agree with Breen about the small production total, but Q. David Bowers favors a somewhat larger mintage, about 710 pieces, based on his experience over the years. Some evidence can be found in 19th century listings, such as W. Elliot Woodward's Twenty-Fifth Sale (Woodward, 12/1879), lot 287, "1877 Trade Dollar. Splendid proof. Only about 500 struck, and will be very rare." Woodward's mintage figure coincides well with the accepted total, and this independent account, published eight years before Kimball's official report, lends credence to the Kimball/Breen number.

The coin offered here is tied with one other specimen at NGC for finest certified at either of the leading grading services. The outstanding characteristic of this coin is the profound contrast between the deeply mirrored liquid fields and the fully struck frosty devices. The design elements seem to extend out of the fields in a three dimensional, statuesque fashion. Both sides display wisps of light grayish-gold toning. A tiny, almost invisible speck in the obverse field below the two lower berries on the branch can serve as a pedigree marker. Census: 2 in 67 Ultra Cameo, 0 finer (3/11).

Ex: Baltimore Auction (Bowers and Merena, 3/2006), lot 2011. From The Slotkin Family Trust Collection. (#97057)

#### 1878 Trade Dollar, PR67 Cameo First Proof-Only Issue

1878 PR67 Cameo NGC. The first of the proof-only Philadelphia Mint Trade dollars, as business strike production was curtailed to make way for the new Morgan dollar. The proof Trade dollar mintage was 900 coins in 1878, and most of those pieces still survive today. However, few can hold a candle to this piece, with the exception of the solitary PR69 Cameo piece that appears on the NGC census. Just three coins, including two NGC and one PCGS, are certified as PR67 Cameo. This Superb example has brilliant orange and deep blue peripheral toning with delicate champagne at the centers. It is generally sharp with excellent design definition. Census: 2 in 67 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#87058)

#### THE:AMERICAN:NUMISMATIST

Published Monthly in the Interest of Coin Collectors.

PATERNOK, N. J., MARCIE, 1867.

THE REDEMPTION OF THE TRADE DOLLARS.

Since Congress passed the bill authorizing the redemption of the trade dollars, the professional examiners and counters in the profinational examiners and counters in the Sub-Trumerica at New York and San Francis-co have born kept busy receiving the large sums forwarded from all parts of the country. As the dollars can only be redocuted in these two cities, and as such pirce has to be emerbally scrutinized to see that it is neither defaced, muthated, nor stamped, it will probably be five or six mouths before the work is comple-

It is the common belief that at the time the value of trade delians fell to eighty-eight the value of trade defilies fell to eighty-eight south, large quantities were bought by hel-lion brokers speculating on a possible raise. If anyone had bought the estine in 1883, at their lowest price, and held them satil the passage of the redemption set, he would scall have but money, as the profit on the four passe increases would only be twelve-rents. A large useful than this could have essts. A larger profit than this could have been obtained by investing in Governout

The Treasury Department has issued the following statement to holders of trade dol-

TREASURE OF THE UNITED STATES, | Washington, March 7, 1887.

Owing to the present inadequate provis Owing to the present inacequate previous for the recopium and storage of trade dollars, the redemption of which is previded for under the act of Congress possed Feb. 20, 1887, the following regulations will be observed, in order, so far as practicable, to comply with the terms of the law:

Requests for the redemption of these | ted, principally to China.

coins stating the amount held should be forwarded to the above-named officers, who will file applications and notify holders in their turn when presentation may be made and payment obtained. The notification by the holders of trade dellars to the Treasurer or Sul-Treasurers of the United States of the amounts held by them respectively will be held to be a sufficient presentation of the coins within the meaning of the law, and will out-the the holders in the order of roughtion of such notifications to deposit such coins in the such notifications to deposit such soins in the respective Sub-Trausries, when notified that such deposits can be received at those offices, Notifications must be filed with the Sub-Trausries on or before Ang. 1, 1887. After notifying those officers, and upon receipt of notification from them, such coins may be forwarded by express or otherwise, teamspor-tation change being prepaid, when receipts will be issued for the amounts purposting to the constained in the descript on their secube contained in the deposits on their re tion. Upon the count and ascertainment of the amount of each deposit payment will be made therefor in standard silver dollars or in fractional silver coin at the option of the holder. Defaced, metilated, or stamped trade dollars found in deposits will not be retrade delicars found in deposits will not be redeemed or exchanged by any of the Sub-Treasmry efform, but they will be returned to the
depositor or purchased as builton in same of

#### 1879 Trade Dollar, PR68 Ultra Cameo Spectacular Contrast and Toning Finest Certified at NGC or PCGS

**5244 1879 PR68 Ultra Cameo NGC.** Speculation in proof Trade dollars became quite popular in late 1879, resulting in a large mintage of 1,541 pieces. Many examples were saved from that time period, but it is doubtful that any other survivor can match the appeal of the coin offered here. While a small number of coins have been certified by the leading grading services in different designations at the PR68 level, this coin is the only PR68 to be awarded the Ultra Cameo designation (3/11).

The dies must have clashed at some point late in the year because the reverse shows signs of extensive lapping. Some areas in the lower part of the eagle's legs and belly have been erased by the lapping, leaving gaps in the feathers that can be detected easily with the naked eye. Among the high-grade coins Heritage has handled in recent years, this reverse is extremely uncommon. In his 1993 reference on silver dollars and Trade dollars, Q. David Bowers commented that he had not seen an example of this die marriage, which he called the third variety. However, Walter Breen was familiar with this reverse in 1977, and indicated there was no great difference in rarity between the varieties. Further study is needed to determine the true rarity of this die marriage.

The present coin is a magnificent PR68 specimen, with profound cameo contrast between the razor-sharp, frosty devices and the deeply mirrored fields. Both sides are ringed by spectacular bands of golden-brown and violet toning, creating a fantastic play of colors when the coin is angled in the light. This coin is an unimprovable combination of high technical grade and tremendous eye appeal and should be the centerpiece of one of the finest collections of Trade dollars. Census: 1 in 68 Ultra Cameo, 0 finer (3/11).

Ex: The Pevehouse and Davis Collections (American Numismatic Rarities, 10/2004), lot 676, realized \$34,500.

From The Slotkin Family Trust Collection. (#97059)

Deeply Contrasted, Rim-Toned 1880 Trade Dollar, PR66 Cameo

**5245 1880 PR66 Cameo PCGS. CAC.** The glassy fields on this glamorous Premium Gem proof are well-mirrored and the devices boast far more than a modicum of mint frost, leading the viewer to wonder if this piece is not on the verge of — or why it failed to achieve — the Deep Cameo level. Just a hint of iridescent pinks and blues decorate the extreme rims, a bit more forcefully on the reverse. An exquisite representative of the issue. The 1880 production of 1,987 proof Trade dollars, by far the largest of the series, was only the second year in which there was no corresponding complement of business strikes. Population: 7 in 66 Cameo, 6 finer (3/11). (#87060)

PR66 Cameo 1880 Trade Dollar Extraordinary Eye Appeal

**1880 PR66 Cameo NGC. CAC.** The Philadelphia Mint set a record for proof Trade dollar production in 1880, with 1,987 pieces struck. No business strikes were minted. The popular speculation in proof Trade dollars, begun in 1879, reached its height in March 1880, when 777 examples were delivered. Orders dropped off after March, and the boom was over by May.

The present coin is a magnificent Premium Gem, with deeply mirrored fields and frosty devices. The design elements are sharply detailed in most areas, but the lower right obverse stars are a little flat. Strong black-on-white cameo flash is apparent on both sides. A lintmark in the obverse field, near star 8, serves as a pedigree marker. Census: 31 in 66 Cameo, 16 finer (3/11). (#87060)

#### 1880 Trade Dollar, PR68 Cameo Tied for the Finest Certified

**5247 1880 PR68 Cameo NGC.** The 1880 is a well-known proofonly date in the Trade dollar series. Only 1,987 pieces were struck, and we are certain that few of the other surviving high grade coins from this low mintage can rival the eye appeal and technical preservation of this immaculate piece. Virtually brilliant throughout, the fields show unfathomable depth of mirrored reflectivity, and the frosted devices yield a profound two-toned cameo effect on each side. The design elements are sharply struck, and the surfaces are impeccably preserved. Population: 9 in 68 Cameo, 0 finer (3/11). *From The Slotkin Family Trust Collection.* (#87060)

#### Cameo PR66 1881 Trade Dollar

**1881 PR66 Cameo PCGS. CAC.** After two years of hyperkinetic proof Trade dollar production in 1879 and 1880, strikings fell to more normal levels for the last three years of the regular proof-only issue. First in the series is the 1881, mintage 960 specimens and an issue rarely found so fine as the Cameo Premium Gem proof offered here. Crisply detailed devices are moderately frosted, but the essentially silver fields of the obverse have such strong mirrors that the contrast is intense. A touch of gold graces the carefully preserved and no less contrasted reverse. Population: 8 in 66 Cameo, 3 finer (3/11). (#87061)

1881 Trade Dollar, PR68 ★ Cameo From the Jack Lee Collection, Part III

5249 1881 PR68 ★ Cameo NGC. The 1881 Trade dollar is a proof-only issue with a mintage of just 960 coins. Few have survived in such a high technical grade as the piece we offer here. In fact, it is one of just three specimens certified at this lofty grade level, and no finer examples have been seen (3/11). The cameo contrast on both sides is outstanding, and even high magnification reveals no significant impairments to the immaculately preserved surfaces. The obverse displays crescents of cobalt-blue, lavender, and goldenbrown patination along the right border. A similar coloration takes on a mottled effect throughout the entire reverse. The design elements are boldly impressed and reveal excellent detail. This coin exhibits splendid eye appeal and is sure to draw enthusiastic bids from Trade dollar connoisseurs.

Ex: Jack Lee Collection, Part III (Heritage, 11/2005), lot 2276. From The Slotkin Family Trust Collection. (#87061)

1882 Trade Dollar, PR68 Cameo Sharply Detailed Motifs

**5250 1882 PR68 Cameo NGC.** Just two examples of the proofonly 1882 Trade dollar have received the PR68 Cameo grade from NGC, with a single PR68 Ultra Cameo piece also certified (3/11). PCGS has certified a single PR68 Cameo as their finest submission. The last auction appearance of such a fine piece was six years ago when American Numismatic Rarities offered the other PR68 Cameo NGC coin. This amazing Superb Gem Cameo proof exhibits mostly brilliant silver with excellent contrast between the deeply mirrored fields and lustrous devices. Peripheral gold and iridescent toning adds to its splendid eye appeal. The strike is especially bold with far sharper details than usual.

From The Slotkin Family Trust Collection. (#87062)

1882 Trade Dollar, PR67 Ultra Cameo Impressive Cameo Contrast

**1882 PR67 Ultra Cameo NGC.** Three minor die varieties are recorded for the 1882 Trade dollars, with the variety seen here having the crossbar of the 4 in 420 fragmented and virtually nonexistent at the right. A second reverse has minute die doubling at the lower portion, and a third die has incomplete leg feathers.

The typical 1882 Trade dollar has a flat head and flat stars at the upper obverse, but this piece is atypical, having bold detail at those locations. Both sides are fully brilliant with deep mirrored fields and highly lustrous devices. Toning is absent on either side. This piece presents amazing eye appeal and will undoubtedly serve as a show-piece in a high-grade collection. Census: 4 in 67 Ultra Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#97062)

1883 Trade Dollar, PR67 Cameo Final Collectible Issue

**1883 PR67 Cameo NGC.** This exceptional proof Trade dollar displays magnificent black and white contrast on each side. We cannot recall an 1883 with mirrors this deep or devices so heavily frosted. The surfaces are essentially perfect and are further enhanced with colorful shades of antique-golden, crimson, magenta, and electric-blue at the peripheral areas. This truly impressive coin represents a proof-only date and survives from a mintage of only 979 pieces. This piece shows the same fragmented crossbar in the 4 of 420 seen on the 1882 Trade dollars in this sale, except more of that detail is visible on the present specimen. Census: 12 in 67 Cameo, 0 finer (3/11). *From The Slotkin Family Trust Collection*. (#87063)

#### **MORGAN DOLLARS**

1878 Morgan Dollar, MS62 Prooflike 8 Tail Feathers Hit List 40 Variety, Rare VAM-14.7

5253 1878 8TF MS62 Prooflike PCGS. VAM-14.7. Hit List 40 Variety. The 8 Tail Feathers reverse was used only in 1878, the first year of the Morgan design, making this issue extremely important to type collectors. The coin offered here shows a small die flake next to Liberty's ear, a diagnostic of the very rare VAM-14.7 variety. VAM-World.com states only seven examples of the VAM-14.7 have been verified to date.

This coin shows slight doubling on the date and obverse stars, characteristic of the VAM-14.7, and a radial die crack to the right of 1 in the date. A planchet lamination shows between L and U in PLURIBUS. The fields are brightly mirrored and mostly brilliant, with just a hint of gold toning in isolated areas. The reverse shows the usual flatness of detail on the eagle's breast, caused by the die design, but this coin is sharply struck. This lot represents a rare opportunity for the Morgan dollar specialist. Population: 3 in 62 Prooflike, 2 finer (3/11). (#7073)

MS66 Deep Mirror Prooflike 1878-CC Morgan Dollar Only Three in This Grade, None Finer

**1878-CC MS66 Deep Mirror Prooflike PCGS.** The 1878-CC Morgan dollar was a well-produced issue, from a mintage of 2.2 million pieces. The date is doubly popular with mintmark type collectors, as high-quality specimens are usually available, and the 1878-CC represents the first date of the Morgan design. Prooflike examples are known, but they are much more difficult to locate than lustrous specimens.

The present coin is a stunning Premium Gem, with Deep Mirror Prooflike surfaces. The fields are reflective, but slightly hazy, with attractive golden patina at the peripheries. The devices are sharply detailed and frosty, with good contrast. Housed in a green label holder. Population: 3 in 66 Deep Mirror Prooflike, 0 finer (3/11). (#97081)

1879-CC VAM-4 Dollar, MS64 Normal Mintmark

5255 1879-CC MS64 PCGS. VAM-4. The obverse has a die chip at the junction of the outer left curves, and two sharp die lines or gouges down from Liberty's nose. Earlier die states exist without the die chip at the 8, so this piece should be listed as VAM-4A, although no such designation is currently recorded at www.VAMWorld.com. The reverse has the CC mintmark set to the left, with the second C centered below the ribbon knot and doubled inside its left curve.

This Choice Mint State piece has satin luster with deep gold, violet, and blue toning on the obverse, and wisps of gold at the upper left brilliant, the balance of that side untoned. PCGS has only certified 93 finer examples of the 1879-CC Morgan dollar with the normal mintmark (3/11). (#7086)

Beautifully Toned 1879-CC Morgan Dollar MS64, VAM-3, 10 Finer at PCGS

**1879-CC Capped Die MS64 PCGS. CAC. VAM-3.** A Top 100 Variety. The absurd "Capped Die" moniker is well-established but bears little numismatic meaning. The mintmark is acknowledged to be a Medium CC over Small C, with extra die chips the apparent result of the effort to efface the blunder. The VAM-3 is scarcer than the Normal CC. This near-Gem piece should form a wonderful prize not only for Morgan and VAM collectors but also for those who treasure outstandingly toned coins. Both sides boast excellent luster, while the obverse shows primarily copper-gold rim toning. The reverse is more extensively patinated in lovely shades of ocean-blue and pinkish-gray. Few contact marks are in evidence, although roller marks appear through most of the face and the hair above the ear. PCGS has seen only 10 submissions finer (3/11). (#7088)

Gem 1881-O Dollar, Deep Mirror Prooflike None Certified Finer

5257 1881-O MS65 Deep Mirror Prooflike PCGS. The 1881-O Morgan dollar is an available date in most grades, from a large mintage of 5.7 million pieces. However, high-quality pieces are more elusive, and Gem specimens with the Deep Mirror Prooflike designation are very rare. Most examples seen with prooflike surfaces are heavily bagmarked, restricting the supply of high-grade coins. Wayne Miller comments, "This is one of the most difficult 'common date' dollars to obtain in fully gem prooflike condition."

The present coin is a spectacular Gem, with deeply reflective fields that contrast boldly with the frosty devices. The design elements exhibit razor-sharp definition, even on the hair strands above Liberty's ear. Only minor hairlines and a few contact marks can be detected on the mirrored surfaces. Population: 12 in 65 Deep Mirror Prooflike, 0 finer (3/11). (#97129)

1885-CC VAM-3 Dollar, MS67 Only One Finer at PCGS

**5258 1885-CC MS67 PCGS. CAC. VAM-3.** The obverse has die scratches at the eye, and the reverse has a tilted mintmark leaning slightly to the left, with the top serif of the second C nearly touching the ribbon. Peripheral die cracks are evident at the left side of the obverse, and others join the letters UNITED STATES OF at their tops. The VAM-3 die marriage is scarce, although with a rather low interest rating. However, few 1885-CC Morgan dollars of any variety survive in Superb Gem. This piece exhibits fully brilliant and frosty silver luster, pristine surfaces, sharp details, and a complete absence of toning. Population: 39 in 67, 1 finer (3/11). (#7160)

Superb Gem 1885-CC Dollar 'Doubled Dash,' VAM-4

**5259 1885-CC Doubled Dash MS67 NGC. VAM-4.** A Hot 50 Variety. The "dash" under the second 8 in the date is so large that it is visible to the unaided eye, though magnification helps the viewer appreciate the nature of the variety. This Superb Gem is in the usual strongly clashed state, but also shows numerous spider-cracks through the reverse peripheral lettering. Softly frosted devices stand out from smooth, cartwheeled fields of remarkable quality, which would have ensured this coin's desirability even without the variety at the date. The single finest VAM-4 housed in a regular NGC holder (2/11), though that service also shows a "GSA Hoard" coin in its *Census Report*. (#133999)

Fully Struck Mint State 1889-CC Morgan Dollar

1889-CC MS60 NGC. Far and away the key to the CC-mint Morgan dollar series, the 1889-CC is coveted in any Mint State grade. An interesting anomaly concerning the low production figure, cited as 350,000 coins, is that a sizeable portion of the few Mint State coins surviving are certified as Prooflike. This Mint State non-Prooflike example boasts mint luster that is subdued but complete over each side. The surfaces are largely untoned, save for a slight hint of golden around the obverse rim. This piece is fully struck, however, and a definite score as such. There is a light sprinkling of abrasions, including one on Liberty's cheek, but the weak luster constitutes the lion's share of the grade. This piece should nonetheless find a ready home among many willing bidders striving to assemble mostly Mint State collections. (#7190)

#### Gem Deep Mirror Prooflike 1892-CC Morgan Dollar, VAM-8 Tied for Finest of the Issue at Either Service

**5261 1892-CC MS65 Deep Mirror Prooflike NGC. VAM-8, R.3.** Die chips in 89, filled CC mintmark on reverse. Not only is this splendid Gem Deep Mirror Prooflike 1892-CC the single finest so certified as NGC with none finer (and tied with two at PCGS), but it is also a recognized Van Allen-Mallis variety, the VAM-8.

The 1892-CC Morgan dollar issue is one that has been treated cruelly by posterity. The mintage was a meager 1.35 million coins, not an overlarge production to begin with. Nonetheless, in 1982 when Wayne Miller published the *Morgan and Peace Dollar Textbook*, he reported that at that time "large quantities of this date still exist in BU condition." This was, of course, in an era before third-party certification, and oftentimes the BU adjective actually encompassed a wide grading range. This availability of BU examples is due to the numerous but sporadic releases of several bags of 1892-CC dollars in the 1940s and 1950s. Despite Miller's assertion, by the time of the Treasury releases in 1962-64, there were few — if any — 1892-CC Morgan dollars left in the hoard.

The famed eccentric Nevada collector LaVere Redfield, whose hundreds of thousands of Morgan dollars were disposed of in 1976, is reputed to have had a bag or more of 1892-CC Morgans, but they were apparently run through a counting machine (!), which damaged most of those pieces.

Note how many times we have mentioned "bags" already in the context of this issue. Since the 1892-CC for a long time was considered a "common" or "available" date, the pieces seem to have been treated roughly. Today, most examples of the issue are heavily bagmarked, even those that remain in Mint State. Few are sufficiently pristine to achieve the Gem level of third-party grading. Fewer still achieve Prooflike status, and the Deep Mirror Prooflike level of the present Gem, as mentioned earlier, puts this coin in a class by itself, the only such piece certified by NGC (3/11). PCGS has additionally seen two certifications at the Gem DMPL level.

This piece is largely silver-white on both sides, save for a suggestion of gold and copper at the extreme rims. The fields are virtual looking-glasses on either side, and the liberal coating of mint frost is uniformly thick on all devices. A phenomenal coin for the finest collection, whether as a representative of the issue or the VAM variety. (#97215)

Choice XF 1893-S Dollar Bright With Noticeable Traces of Luster

**5262 1893-S XF45 PCGS. CAC.** From a series-low mintage of 100,000 pieces, the 1893-S is the most sought-after issue of the Morgan dollar series. It is not only the glamour coins in Uncirculated grades that are pursued, but any 1893-S dollar in any grade is the object of collector interest. We offer many examples in each of our auctions, and the saturation point has never yet been reached. The present coin is lightly worn on the high points of the motifs, but much original detail remains. The surfaces are lightly abraded for the grade and retain much of their original mint luster. (#7226)

1893-S Morgan Dollar, XF45 Famous Key Date

**5263 1893-S XF45 PCGS. CAC.** The famous 1893-S Morgan dollar is the business strike issue missing from more collections than any other. Examples remain in demand, as the constantly increasing market price illustrates. This Choice XF example should see considerable bidding activity due to its original, problem-free surfaces.

Both sides of this piece are medium to dark gray with lighter silver-gray on certain design elements. The border is also lighter gray, providing a frame for the design motifs on each side. An excellent opportunity to eliminate the 1893-S from a want list. (#7226)

Partially Lustrous 1893-S Morgan, AU53 Bright Silver-Gray Surfaces

**1893-S AU53 NGC.** The 1893-S Morgan dollar in the various AU grade levels has a perennial popularity that seems as though it will endure for many years to come. Given the rarity of Mint State coins and the considerable expense required to obtain one, nice AU examples provide a viable alternative for most collectors. The present AU53 example, in concert with the grade, retains partial luster — a prime consideration for the legions of Morgan dollar collectors. The surfaces are bright silver-gray and show minimal wear on the high points, another plus. Minor contact marks on Liberty's upper lip and the eagle's breast and leg appear under close scrutiny. (#7226)

1894-O Morgan Dollar, MS64+ Only Nine Coins Finer at PCGS

5265 1894-O MS64+ PCGS. CAC. The 1894-O Morgan dollar boasts a smallish mintage of 1.7 million pieces, and attractive Mint State coins are rare. Production values were low at the New Orleans Mint during this time period, and nearly all examples seen exhibit weak striking details. While population data suggests the 1894-O is merely scarce in Choice Mint State condition, well detailed specimens with strong luster are quite elusive.

The present coin is a high-end Choice example, with well-detailed design elements that display a touch of softness on the hair strands above Liberty's ear and the eagle's breast. The surfaces exhibit vibrant satiny mint luster, with wisps of golden toning and ample eye appeal. Population: 26 in 64+, 9 finer (3/11). (#7230)

#### VAM-5 1896-S/S Morgan Dollar, MS65 Early Reverse Die, Sole Finest at PCGS

**5266 1896-S/S MS65 PCGS. VAM-5.** A Hot 50 Variety. Ex: New York City Set. It seems likely that most of the 5 million 1896-S dollars struck entered the channels of commerce, as circulated examples are quite common and high-grade Mint State coins are seldom encountered. This piece appears to be from an earlier die state than the example depicted on the VAMWorld.com website, as more of the "curved line to the right and in the lower opening" appears than there. This snow-white coin displays sparkling mint luster. A series of roller marks (as struck) appear above the eagle in the reverse field. The piece is well but not fully struck; only the slightest abrasions are present on either side. A lovely Gem example of this conditionally rare issue, the sole finest VAM-5 certified at PCGS (3/11).

Ex: FUN Signature (Heritage, 1/2005), lot 30341, which realized \$13,225; FUN Signature (Heritage, 1/2006), lot 3342, which brought \$18,400. (#134022)

#### **PROOF MORGAN DOLLARS**

1878 8 Tailfeathers Dollar, PR66 Cameo Noteworthy Cameo Contrast

**5267 1878 8TF PR66 Cameo NGC. VAM-14.3.** Proof specimens of this initial and briefly used design are scarce and comparatively underpriced. Bowers estimates that 300-500 pieces were struck, but, of course, far fewer are known today and survivors are more apt to be mishandled than the later issues. This deeply reflective proof is exceptionally flashy with untoned centers and a touch of reddishgolden peripheral color. The major design elements display a degree of contrast with the glassy fields that would be considered mild on issues such as the 1896-1898, but are noteworthy for 1878. Census: 13 in 66 Cameo, 6 finer (3/11).

From The Slotkin Family Trust Collection. (#87311)

1878 7 Tailfeathers Dollar, PR66 Cameo Reverse of 1878

**5268 1878 7TF Reverse of 1878 PR66 Cameo NGC.** The powerfully impressed devices of this gorgeous Premium Gem Cameo proof dollar are surrounded by dark, deep mirror fields. Pleasing russet and iridescent toning enhances the obverse and reverse peripheries. The delicate surfaces are free of troubling hairlines or contact marks, but a few touches of cloudiness in the fields prevent an even finer grade designation. This first-year proof issue had a mintage reported as 250 pieces. Possibly as many as 200 survive, but few are equal to the present specimen and only a small percentage have noticeable contrast. Census: 1 in 66 Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#87312)

Stunning 1879 Morgan Dollar, PR67 Cameo

**1879 PR67 Cameo NGC.** The year 1879 was an interesting one at the U.S. Mint, as the year was a mixture of long, well-established series — Indian cents, Seated silver coins, and Liberty Head gold — recently redesigned series, such as the Morgan dollar, and brand-new series, such as the rare Flowing Hair stellas introduced in this year. The Morgan dollar proof production was a nominal 1,100 coins, and today the average certified survivor is either a Choice or Gem proof. This Superb Gem Cameo example boasts stunning silverwhite surfaces lightly kissed with gold, and generous field-device contrast appears on both sides. A small arc of light russet patina appears to the right of the eagle. Census: 13 in 67 Cameo, 3 finer (3/11).

From The Slotkin Family Trust Collection. (#87314)

# 1880 Morgan Dollar, PR67 Cameo Starkly Contrasted on Each Side

**5270 1880 PR67 Cameo NGC.** In spite of the earliness of the date, the 1880 Morgan is one of the best-produced proofs in the series and is often a choice for a type coin. Both sides of this splendid coin are stone-white. The fields are deeply reflective and set up a "black" background for the noticeably frosted devices, thus yielding a two-toned cameo contrast on both obverse and reverse. In the case of the 1880 proof dollar, the large mintage of 1,355 pieces equates to a high survival rate in better grades and even coins with cameo contrast. NGC has certified 22 pieces in PR67 Cameo with 11 examples finer. Undoubtedly these numbers include a number of resubmissions. (#87315)

Superb Gem Cameo Proof 1880 Morgan Dollar

**5271 1880 PR67 Cameo NGC.** While the 1880 Morgan dollar has the highest proof mintage in the series (a nominal 1,355 specimens), it is nonetheless a genuinely scarce coin at the Superb Gem level, particularly when seen with Cameo-level contrast as here. This elegantly preserved example is strongly mirrored through the fields with ample frost on snow-white devices. The interiors are minimally toned, though the edges are gold-tinged and a faint rose overtone appears when the obverse is tilted at just the right angle to the light. Marvelously preserved with fantastic visual appeal. Census: 22 in 67 Cameo, 11 finer (2/11). (#87315)

#### The South Beach Collection 1880 Morgan Dollar, PR67 Cameo

**5272 1880 PR67 Cameo NGC.** The reverse die is slightly doubled, especially visible on the letters at the bottom. This is a splendid Superb Gem Cameo proof with amazing surfaces and deeply mirrored fields around broadly frosted devices. A faint golden overtone reaches into the fields from the borders. This exceptional example ranks among the top-quality proofs known for the Morgan dollar proofs of 1880, an issue that had a mintage just over two-thirds that of the contemporaneous proof-only Trade dollar.

Ex: South Beach Collection (Heritage, 1/2005), lot 30354, which realized \$10,925.

From The Slotkin Family Trust Collection. (#87315)

1881 Morgan, PR67 Cameo, VAM-8 Doubling on Date, Lump on Second 1

**5273 1881 PR67 Cameo NGC. VAM-8.** Doubled 18-1 and lump on second 1, hollow around engraver's initial M on obverse. The mintage of 1881 proof Morgan dollars was 984 pieces. Breen notes the change to the proofs of this year, besides the VAM mentioning the "rims (outside beaded borders broader than uncirculated counterparts, and these rims are sharp on inner and (usually) outer edges." The design high points are also sharper than Mint State coins, as demonstrated on this Superb Gem, which shows a full strike on the hair above the ear, the eagle's breast, and wreath, and no trace of mint frost in the fields. A sumptuous silver-white, well-contrasted example. Census: 9 in 67 Cameo, 8 finer (3/11).

From The Slotkin Family Trust Collection. (#87316)

'Just Right' 1882 Morgan, PR67 Cameo Light Toning, Well-Contrasted Surfaces

**5274 1882 PR67 Cameo NGC.** Of all the splendid proof coins in this marvelous consignment, the present Morgan dollar has to be the present cataloger's (GH) favorite. The coin presents the best of both worlds, untoned, well-contrasted silver centers with a thin ring of "just right" iridescent toning, mostly deep amber but with traces of aqua, russet, and lilac. The strike is full throughout, contact marks are simply a nonissue, and the reverse on its own seems close to an Ultra Cameo designation. A super acquisition for a type or date set, and a coin that will never need apology — or upgrading. Census: 8 in 67 Cameo, 3 finer (3/11).

From The Slotkin Family Trust Collection. (#87317)

Cameo PR67 1883 Morgan Dollar Ex: South Beach Collection

**5275 1883 PR67 Cameo NGC.** This gleaming 1883 proof displays a chromelike finish in the fields that contrasts against lightly frosted devices. The design elements are exquisitely struck and almost appear to float over the watery fields, which are essentially white on the obverse with a faint suggestion of gold over the reverse. The surfaces are near-pristine as the grade demands, though one tiny contact mark occurs in the right obverse field under left side of the M of UNUM. Census: 5 in 67 Cameo, 1 finer (3/11).

Ex: South Beach Collection (Heritage, 1/2005), lot 30358, which realized \$10,925.

From The Slotkin Family Trust Collection. (#87318)

1884 Morgan Dollar, PR67 Beautifully Toned

**5276 1884 PR67 NGC.** All proof Morgan dollars are highly collectible, especially in Superb Gem. This gorgeous piece is close to the top of the population charts, with a combined non-Cameo population of just six coins with two finer at NGC and PCGS. NGC has certified just five others in higher numerical grades, including Cameo and Ultra Cameo coins.

This sensational Superb Gem exhibits deeply mirrored fields, and boldly defined, satiny devices, all beneath outstanding gold toning with blue and violent accents. This piece is ideal for the numismatic connoisseur working on a high-end proof Morgan or type collection. Census: 3 in 67, 1 finer (3/11). (#7319)

PR67 Cameo 1884 Morgan Dollar Ex: South Beach

**5277 1884 PR67 Cameo NGC.** The official mintage of 875 proofs gives one an indication of this coin's relative availability. However, even though a large number of pieces are extant today, many of the surviving examples have been cleaned and are in marginal PR60-62 condition. This is a spectacular gold-edged proof that exhibits deeply mirrored fields with noticeably frosted devices. Magnification is virtually a requirement to locate the few contact marks on the delicate, reflective surfaces seen on this piece.

Ex: South Beach Collection (Heritage, 1/2005), lot 30359, which realized \$11,500.

From The Slotkin Family Trust Collection. (#87319)

1887 Morgan Dollar, PR67 Cameo Borderline Ultra Cameo Contrast

**5278 1887 PR67 Cameo NGC.** In business strike format, this is one of the most common dates of any Morgan silver dollar. Proofs are another matter, altogether. While most of the 710 originally produced still exist today, the majority are in the lower Proof grades, and/or have been cleaned or lightly impaired. The NGC Census shows that this piece is tied with a few others for the finest certified Cameo proof of the date. That service has only certified one Ultra Cameo proof (PR65). This splendid Superb Gem displays fully brilliant silver on both sides with considerable Cameo contrast, nearly a candidate for the Ultra Cameo designation. Census: 9 in 67 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#87322)

1890 Morgan Dollar, PR68 Cameo Near-Perfect Surfaces, Sharp Contrast

**5279 1890 PR68 Cameo NGC.** This amazing Superb Gem proof example has full cameo contrast with highly lustrous silver surfaces surrounded by deeply mirrored fields. All design elements on both sides are sharply detailed. Both sides have bright silver surfaces with faint champagne toning limited to the extreme borders. This date is seldom encountered with significant cameo contrast. Dave Bowers noted in his *Guide Book of Morgan Silver Dollars:* "Above average strike for some, flat centers for others. Medium to low contrast. Better quality workmanship than in 1889, if only slightly."

The present example has above-average contrast and above-average strike, thus must be considered among the finer examples available in the marketplace. Just 590 proof dollars were struck in 1890, the lowest proof mintage of any date through 1904, with the single exception of 1878. Census: 4 in 68 Cameo, 0 finer (3/11). (#87325)

Boldly Struck 1890 Morgan Dollar PR66 Ultra Cameo

**1890 PR66 Ultra Cameo NGC.** Walter Breen writes in his proof reference that "Wayte Raymond had some original [silver proof] sets as late as 1954." From a production of 590 pieces, this 1890 Premium Gem Ultra Cameo proof Morgan dollar is an instantly appealing specimen, boasting crystal-clear fields that exhibit profoundly deep mirrored reflectivity and stark white-on-black contrast. The strike is particularly bold on this outstanding specimen, unlike many similarly dated proof dollars. Certified in an older NGC holder. Census: 2 in 66 Ultra Cameo, 6 finer (3/11).

Ex: FUN Signature (Heritage, 1/2005), lot 30363. From The Slotkin Family Trust Collection. (#97325)

1891 Morgan Dollar, PR67 Cameo Strong Contrast, Tremendous Eye Appeal

**1891 PR67 Cameo NGC.** The 1891 proof Morgan dollar is a challenging issue, from a mintage of just 650 pieces. Even among proof examples of this date, the strike is often subpar, and coins with strong field-device contrast are seldom encountered. The coin offered here is an impressive Superb Gem with breathtaking black-on-white cameo flash. The design elements are frosty and sharply detailed in most areas, but the strands of hair above Liberty's ear show the typical softness associated with this date. The brilliant fields are deeply mirrored and virtually pristine. This coin possesses tremendous eye appeal and will be a welcome addition to a fine collection of Morgan dollars. Census: 16 in 67 Cameo, 1 finer (3/11). *From The Slotkin Family Trust Collection*. (#87326)

1891 Morgan Dollar, PR67 Cameo Only Two Finer NGC Cameo Proofs

**1891 PR67 Cameo NGC.** The obverse has a faint die line from the eye just below the lid, crossing the bridge of the nose. The curved date logotype rises slightly from left to right, with the second 1 a trifle farther from the border than the first 1. Reverse die markers match those illustrated at www.VAMWorld.com.

This Superb Gem Cameo proof is a borderline Ultra Cameo with brilliant and frosty white devices. The fields are deeply mirrored, presenting a black and white appearance, and both sides are entirely untoned. Census: 16 in 67 Cameo, 2 finer (3/11). (#87326)

The South Beach Collection 1894 Morgan Dollar, PR67 Cameo

**5283 1894 PR67 Cameo NGC.** After several years of producing softly struck proofs, the Mint got back on track in 1894 and coined 972 generally sharp proof impressions. These coins are popular and in-demand by collectors not only because of their sharp strike but also because of the scarcity and date demand created by the lack of high-grade business strike dollars. The surfaces of this Superb Gem specimen are sparkling and effectively brilliant throughout, with no obvious or distracting impairments on either side. The fields are deeply mirrored, and a significant amount of mint frost over the devices creates a considerable cameo effect on each side. Census: 25 in 67 Cameo, 4 finer (3/11).

Ex: South Beach Collection (Heritage, 1/2005), lot 30369, which realized \$12,075.

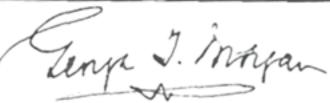

From The Slotkin Family Trust Collection. (#87329)

### AU Details 1895 Proof Morgan Dollar

**5284 1895** — **Scratches** — **NGC Details. Proof, AU.** With a proof-only mintage of just 880 pieces and some of those coins inevitably lost, the 1895 Morgan dollar is the definitive "stopper" of its series, avidly pursued regardless of condition. This example is an impaired proof, lightly rubbed across the high points with significant contact marks and several staple scratches to the left of the portrait. Yet gold-toned surfaces remain appreciably reflective, especially in the protected areas, and the coin's impairment grants it a look closer to a business strike than a proof, an appearance that may make it even more relevant to a set of otherwise Mint State pieces.

#### 1895 Dollar, PR66, A Coin Whose Rarity Transcends Dollar Collectors

**5285 1895 PR66 NGC.** In the narrowest sense, the 1895 proof Morgan dollar is not much rarer or less rare than its cousins — other proof silver dollar issues from the 1890s. The well-known mintage of 880 proof 1895 dollars in percentage terms is not significantly different from either the production of the 1894 proofs, at 972 pieces, nor the 1896 proofs, at 762 coins. But from a broader perspective, what makes the 1895 proof Morgans is not what they possess, but rather what they *lack* — their counterparts, the mythical 12,000 business strike Morgans.

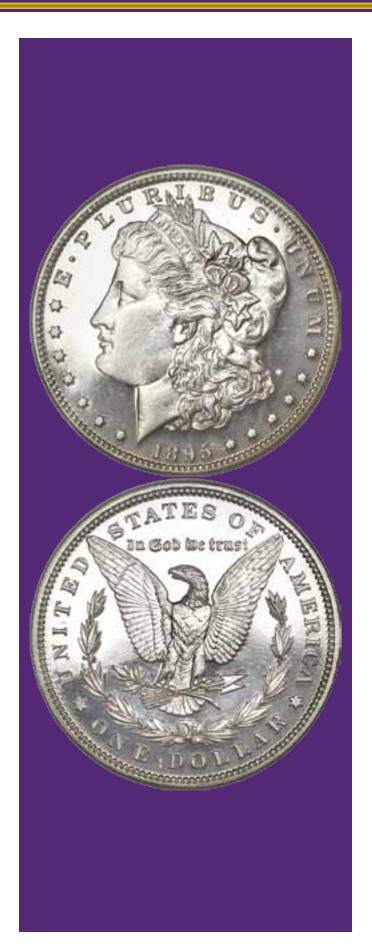

Were the 12,000 business strikes that appear in some Mint records ever produced, and if so, were they dated 1895? If no business strikes were ever made, this puts the 1895 in the category of a proof-only issue, a class of numismatics where it has lots of classmates — the 1875 and 1876 proof-only three dollar gold issues; the three proof-only issues from the three cent nickel series, in particular the low-mintage 1877 and 1878 issues; and the clandestinely made and/or distributed 1884 and 1885 Trade dollar issues.

Even if business strikes were manufactured, all available evidence — or lack of evidence — points either to their bearing a date other than 1895, or else being melted in the Pittman Act furnaces of 1919-1920 (the actual date of the mass meltings). With each passing year it seems increasingly likely that no definitive business strike 1895 Morgan dollar will ever appear in the marketplace — although it would certainly be front-page news if it did.

While some of the proof-only rarities cited above have much-smaller mintages than the 1895 Morgan dollar, it must be remembered that Morgan dollar collectors are *legion*, perhaps numbering 100 times as many as specialists in those series. As a result of the healthy mintage and enormous demand, series specialists know two things: that they can find an example in the grade they want, and that it will be the subject of intense desire on the part of a cadre of dedicated collectors.

This Premium Gem proof is undesignated as a Cameo, although it exhibits strong contrast, with satiny silver devices floating above full and deeply mirrored fields. Delicate champagne color is limited to the outer rims of this otherwise brilliant and untoned piece. A tiny planchet flake above WE on the reverse is the only apparent blemish on the surfaces that are pristine in every other regard. The strike is bold overall, with slight weakness over the ear, as always.

From The B & D Collection. (#7330)

#### PR65 Cameo 1895 Morgan Dollar The Legendary Proof-Only Issue

**5286 1895 PR65 Cameo NGC.** In his article "Philly 1895 Morgan Dollars" for the September 2006 edition of *Coin Values,* Roger Burdette's meticulous research turned up an intriguing set of facts about the dies used to strike the Morgan dollars of 1895. Referencing Mint Engraver Charles Barber's annual report of the dies provided to the coiner of the Philadelphia Mint, Burdette writes:

"There is nothing unusual until we get to dies provided for circulation dollars, where there are none listed, and the Proof silver dollars — five obverse and four reverse. The report suggests that not only were no dollar dies allocated for circulation production, but that it took four die sets plus an additional obverse to strike just 880 usable Proof dollars. Proof coins were struck at higher than normal pressure and carefully inspected for defects. The increased pressure caused dies to fail prematurely, and rigorous inspection resulted in as many as half of all Proofs struck being rejected by the coiner. In previous years, only one or two pairs of dies had been used to strike a similar number of Proof dollars. Clearly, more may have occurred than the raw numbers indicate."

Still, there is no definitive proof that any more 1895 Morgan dollars were made than 880 specimens struck for inclusion in proof sets. Of those coins, this is a remarkable Gem Cameo survivor, amply mirrored with just a few splashes of cloud-gray toning set against the white frost over the center devices. The faintest hint of green-gold visits the peripheral zones, and a small dot of milky patina off Liberty's lower right curls may prove useful as a pedigree marker in the future. Census: 19 in 65 Cameo, 32 finer (3/11).

From The Slotkin Family Trust Collection. (#87330)

1896 Morgan Dollar, PR68 None Certified Finer

**1896 PR68 PCGS.** As a general rule, proof Morgan dollars survive in higher numerical grades than business strikes. That is because proofs were acquired by collectors who took the care necessary to preserve them in the best possible quality. However, even the proofs are extremely rare at grades above PR67. The present example, tied with 12 others certified by NGC and PCGS with none finer, illustrates that rarity. It also exhibits incredible multicolored rainbow toning that further enhances its aesthetic appeal. Clearly evident is its excellent cameo contrast, although the toning prevents a Cameo designation. This highly desirable dollar will please any connoisseur. Population: 7 in 68, 0 finer (3/11). (#7331)

PR67 ★ Cameo 1896 Morgan Dollar Ex: South Beach

5288 1896 PR67 ★ Cameo NGC. We have commented in the past, but it bears repeating again, there are two dates from the 1890s that seem to consistently have been preserved in better condition and show better overall eye appeal than any others, 1896 and 1898. This piece was certainly the beneficiary of such preservation. As one might infer from the grade, the surfaces are virtually perfect. Examination with a magnifier reveals a tiny contact mark on Liberty's cheek, but this has no effect on the overall presentation of this magnificent proof dollar. Virtually black-and-white surfaces show only the faintest evidence of clouding in the fields.

Ex: South Beach Collection (Heritage, 1/2005), lot 30374, which realized \$12,075.

From The Slotkin Family Trust Collection. (#87331)

### Superb Gem Cameo Proof 1896 Dollar

**5289 1896 PR67 Cameo PCGS. CAC.** The Registry collector of proof Morgan dollars will have a particular interest in this PR67 Cameo example of the 1896 issue, tied with just two others for finest in the contrast category according to PCGS (3/11). That said, anyone who appreciates the best in U.S. proof coinage will find this specimen a delight. The obverse presents as Deep Cameo with only minor toning at the margins and gorgeous frost-white devices, while the reverse, though obviously contrasted, has more obvious green and aqua patina veiling the mirrors and the sharply struck eagle. (#87331)

The South Beach Collection 1897 Morgan, PR67 Cameo

**5290 1897 PR67 Cameo NGC.** One of several dates that fall squarely within the "well-made proofs" series of the late 1890s, the 1897 is a Morgan dollar date that naturally "comes nice." In no way does this lessen the pleasure of finding one of the best examples, such as this Superb Gem Cameo specimen. A pale green-gold wash, richer on the reverse, drapes flashy mirrored fields while leaving the lightly frosted devices essentially silver-white. Fantastic eye appeal in all respects. Census: 12 in 67 Cameo, 7 finer (3/11).

Ex: South Beach Collection (Heritage, 1/2005), lot 30376, which realized \$10,925.

From The Slotkin Family Trust Collection. (#87332)

#### 1898 Morgan Dollar, PR67 Ultra Cameo Only Two Finer at NGC

**5291 1898 PR67 Ultra Cameo NGC.** Coin collecting activity was at low ebb in 1898, due to a combination of factors. The Spanish-American War broke out in 1898, distracting collectors from their hobbies and focusing their attention on foreign affairs. There was also much dissatisfaction with U.S. coin designs, which were perceived as pedestrian and uninspired. The weak coin market was reflected in a reduced demand for proof sets, and only 735 proof Morgan dollars were struck. The issue was well produced, and survivors frequently display sharp details and cameo contrast. Michael Fuljenz comments, "This date was probably the best made in the entire series."

The present coin is a stunning Superb Gem, with profound field/ device contrast. The design elements are fully struck throughout, with outstanding frosty texture that provides excellent contrast with the deeply mirrored fields. The surfaces are brilliant and unmarked, with outstanding visual appeal. NGC has certified two Ultra Cameo pieces numerically finer (3/11). (#97333)

#### Popular 1899 Morgan Dollar, PR66 Cameo

5292 1899 PR66 Cameo PCGS. This exquisite Premium Gem Cameo 1899 Morgan dollar has faint champagne toning over black and white surfaces. Lovely cameo contrast adds to the overall appeal of this amazing proof. Beginning about the time of this issue, cameo contrast on proof dollars started to diminish. This is a wonderful exception. The date 1899, of course, is a popular one with Morgan dollar collectors at any rate, due to the low mintage of the Philadelphia business strikes, a memorable 330,000 pieces. As an added bonus, the strike is full throughout, on the eagle's breast, the wreath on the reverse, and even the hair over Liberty's ear. Population: 6 in 66 Cameo, 4 finer (3/11).

Ex: FUN Signature (Heritage, 1/2005), lot 11998. From The Slotkin Family Trust Collection. (#87334)

# 1900 Morgan Dollar, PR67 Cameo Just Five Finer Examples at NGC

**5293 1900 PR67 Cameo NGC.** A new Morgan dollar reverse hub was introduced in 1900 that featured shallower detail on the eagle's breast. The proof mintage was a generous 912 pieces and the issue was well-produced, with many examples displaying a sharp strike and cameo contrast. That said, few surviving specimens match this coin in technical quality and visual appeal. The present example is a delightful Superb Gem with deeply mirrored, virtually unmarked fields and frosty devices with razor-sharp definition, yielding stunning cameo contrast. Census: 13 in 67 Cameo, 5 finer (3/11).

From The Slotkin Family Trust Collection. (#87335)

Challenging 1901 Morgan Dollar PR66 Cameo, Tied for Finest at PCGS

1901 PR66 Cameo PCGS. Ex: JFS Collection. The 1901 Morgan dollar certainly needs no introduction to the legions of series aficionados, who are well aware of how elusive the high-grade business strikes are of this issue. The situation in turn exerts added demand on the high-grade proofs of the issue, which were produced to the extent of 813 pieces. The present Premium Gem Cameo specimen is unusual merely by virtue of having considerable cameo contrast between the fields and devices. Noticeable (if not deep) mint frost coats the devices on both sides, with radiant fields and consistent light-gold coloration throughout. The high grade is consistent with the generous eye appeal. Population: 6 in 66 Cameo, 0 finer (3/11).

From The Slotkin Family Trust Collection. (#87336)

#### Superb Gem Proof 1904 Morgan Dollar

**5295 1904 PR67 NGC.** In 1902 the Mint changed its method of manufacturing proof coins, veering away from the frosted devices-mirrored fields format to one that Breen calls "semibrilliant." This 1904-dated Superb Gem proof Morgan dollar is a typical (in appearance, not condition) product of the era, with gleaming quicksilver surfaces that have a chromelike look and little contrast on either side. The surfaces are silver-white with suggestions of gold, and even under a loupe contact marks are absent. The strike leaves a bit to be desired on the high points of each side. Census: 17 in 67, 1 in 67 ★, 3 finer (3/11).

From The Slotkin Family Trust Collection. (#7339)

#### Near-Gem 1921 'Chapman Proof' Morgan

5296 1921 Chapman PR64 NGC. Henry Chapman and Farran Zerbe, the famous (some would say notorious) coin dealers, finagled special strikings of 1921 Morgan dollars out of the Philadelphia Mint. Of the two, Chapman, who was inspired by — or was that jealous of? — Zerbe, used his influence with the aged George T. Morgan to acquire the so-called "Chapman proofs," which are almost universally recognized as being of better quality than Zerbe's special strikings. This is an important PR64 representative of the "Chapman proof," faintly hairlined but showing all of the important die diagnostics (such as the die line pointing toward star 3 from the rim) and appreciable contrast to boot.

From The Slotkin Family Trust Collection. (#7342)

#### **PEACE DOLLARS**

Double Struck Undated Peace Dollar, MS62 Reverse Indent

**5297** Undated Peace Dollar — Double Struck, Second Strike **80%** Off Center — MS62 NGC. The Type of 1922 with normal or low relief, with the second strike obliterating the date from the first strike. Edge reeds are visible around the entire circumference, indicating a normal first strike, albeit a trifle weak at the peripheries. Then the fun began.

A second planchet was fed partway into the press at the same time this piece was partially ejected. The second strike created a tab on the reverse that obliterated some of the letters from the first strike in that area, leaving others visible. That same strike also left a partial impression from the obverse die, showing the neck, chin, mouth, and lower hair strands at 6 o'clock.

Peace dollar errors are rare, and usually minor, such as broadstrikes, minimal off-center strikes, strike-throughs, and cracked planchets. Major errors such as this example are extremely rare in the Peace dollar series and highly priced by collectors.

Superb Gem 1922 Peace Dollar Remarkable Quality, None Finer at PCGS

**5298 1922 MS67 PCGS. CAC.** The production figure for the 1922 Philadelphia Peace dollar was the largest of the entire series, approaching 52 million pieces in all. Even today, many millions of those coins survive, turning up frequently in well-circulated condition as part of "common" generic silver dollar bags and rolls.

This Superb Gem is a coin of remarkable quality throughout, one of 21 so graded at PCGS with none finer (3/11). The fine-grained, mattelike surfaces show an even mixture of gold and bluish tints along with the prevailing silver-gray, and the strike is extremely sharp on the central high points, if less so around the peripheries. A couple of minor luster grazes on the obverse scarcely dampen the appeal, and only trivial contact marks appear on the lower neck. A marvelous high-grade type or date representative, certified in a green-label holder.

From The Paul Taylor Collection. (#7357)

**5299 1922-S MS66 PCGS.** Ex: Jack Lee. The 1922-S Peace dollar is one of the more available issues overall in the series from San Francisco, an unsurprising fact given its mintage of nearly 17.5 million coins. Despite the voluminous production, however, the 1922-S is an extremely elusive coin at the Premium Gem level, where PCGS has seen only six submissions and none finer (3/11). The typical representative of the 1922-S is challenged in terms of luster, strike, contact marks, or some combination thereof.

The present MS66 piece is a noteworthy exception, boasting thick, creamy satin luster over silver-gray surfaces with an above-average strike and a remarkable paucity of contact marks, large or small. A couple of tiny reeding marks appear on Liberty's face only under a loupe. Certified in a green-label holder with the Jack Lee pedigree, this is another remarkable coin from this special Peace dollar consignment.

From The Paul Taylor Collection. (#7359)

Mattelike MS66 1923-S Peace Dollar

1923-S MS66 PCGS. The 1922-S and 1923-S Peace dollar mintages are far and away the series' largest for San Francisco, totaling 17.5 million and 19 million pieces, respectively. Incredibly, however, both are extreme rarities at the Premium Gem level, where PCGS has seen six submissions of the 1922-S. For the 1923-S there are only two submissions certified in MS66, with a single MS67 finer (3/11). Clearly, the San Francisco Mint's focus during that time was on quantity, not quality. The typically encountered example either has circulation wear, bagmarks, or poor strikes. The present coin is rather well-struck for the issue, with lustrous silver-gray surfaces that have a mattelike texture. There are no mentionable contact marks, although some interesting obverse die cracks and minor surface "pebbling" near the rim are the products of extended die use and apparent die rust, respectively. Certified in a green-label holder. Population: 2 in 66, 1 finer (3/11).

From The Paul Taylor Collection. (#7362)

MS66 1924-S Peace Dollar Tied for Finest Certified

5301 1924-S MS66 PCGS. CAC. Condition rarity is practically commonplace among the various dates in the Peace dollar series, a combination of the scant attention numismatists paid to the coins as they were being struck and naturally low mintages for many issues. In the case of the 1924-S, of which fewer than 1.8 million pieces were struck, Premium Gems are the best coins available, with just six such survivors in the combined certified population (3/11). This is one of them, lightly toned canary-yellow with blue overtones also present on parts of the reverse. Better-defined than usually seen with frost-blossoming luster on the devices and a single small mark near the eagle's talons which precludes an even finer designation.

From The Paul Taylor Collection. (#7364)

Gem 1925-S Peace Dollar None MS66 or Better

**5302 1925-S MS65 NGC.** The Peace dollar series, though short, contains several dates that are genuinely scarce at the Gem level and either unobtainable, or nearly so, any finer. Such is the case with the 1925-S issue, for which 95 MS65 pieces have been graded by NGC and PCGS combined, but none in the MS66 and better grades (2/11). The present example is frosty with mostly silver interiors and an array of gold, crimson, and sage shadings at the margins. A long but shallow graze on Liberty's cheek is the only fault warranting individual mention on surfaces that are otherwise smooth. (#7366)

Gem 1925-S Peace Dollar None Finer at PCGS

**5303 1925-S MS65 PCGS.** The 1925-S Peace dollar is a well-known rarity at the Gem level within the series. Roger Burdette's series reference, *A Guide Book of Peace Dollars,* cites it as "a very poorly struck issue within the series, and along with the 1928-S, is perhaps the most difficult coin to find in high grades."

The present Gem, certified in a green-label holder, boasts superior luster on silver-gray surfaces lightly tinged with amber. The strike, even while showing some weakness on the high points of each side, is still considerably stronger than usually seen. An arcing scrape through the letters TATES OF A on the reverse undoubtedly factored into the grade, although it may be Mint-caused. There is also a tiny edge tick above the A in STATES. Despite these minor drawbacks, this coin appears solidly graded overall, radiating appeal and desirability in equal measure. Population: 36 in 65, 0 finer (3/11).

From The Paul Taylor Collection. (#7366)

Superb Gem 1926-D Peace Dollar

**1926-D MS67 PCGS. CAC.** The 1926-D comes in for high praise from Roger W. Burdette, who writes in his *Guide Book of Peace Dollars*, "The 1926 issue from Denver is one of the best in the entire series, with strong strikes and great luster. ... There are many high-quality coins around, and only a few have unsightly toning or dull luster." This Superb Gem exemplifies the best attributes of the issue, boasting powerful luster and a strong strike. Intermittent gold and violet border-toning supplies a colorful contrast to the near-brilliant interiors. An impressive coin that is housed in a green label holder. Population: 8 in 67, 0 finer (3/11).

From The Paul Taylor Collection. (#7368)

1927 Peace Dollar, MS66 Rarest Philadelphia Issue

**5305 1927 MS66 PCGS.** In *A Guide Book of Peace Dollars,* Roger Burdette writes: "The 1927 issue is the rarest Philadelphia-minted coin in Uncirculated condition, although the 1928 is often given this honor because of its very low total mintage."

The 1927 is a condition rarity with 1,580 examples graded MS64 PCGS, 273 more graded MS65 PCGS, and a mere seven coins graded MS66 PCGS (3/11). This piece is one of those seven coins, displaying full satin brilliance. The strike is excellent, even at the centers, and eye appeal is extremely high. Both sides have pristine, untoned silver surfaces, with minimal and strictly microscopic marks. (#7370)

Premium Gem 1927 Peace Dollar Among the Finest Certified Examples

**5306 1927 MS66 PCGS.** From a small mintage of 848,000 pieces, the 1927 Peace dollar is one of the rarest Philadelphia issues of the series in Mint State condition. Roger Burdette observes, "In MS-64 and higher, it is in the top seven for rarity in the entire series." Burdette further suggests, "The issue is much undervalued in these grades." No examples have been certified above the Premium Gem level at either of the leading grading services (3/11).

The present coin displays vibrant mint luster and mostly brilliant surfaces, with the slightest hint of gold toning. The design elements are sharply detailed, with fine definition on Liberty's hair. Housed in a green label holder. Population: 7 in 66, 0 finer (3/11). From The Paul Taylor Collection. (#7370)

## Outstanding 1927-D Peace Dollar, MS66 Ex: Jack Lee

**5307 1927-D MS66 PCGS. CAC.** Ex: Jack Lee. Series specialists are well aware of the rarity of the 1927-D Peace dollar in all Uncirculated grades, a rarity that becomes particularly acute above the MS64 level. That near-Gem level is where many collectors find their prize representatives of the issue, as Roger Burdette points out in his useful guide to the series, *A Guide Book of Peace Dollars*:

"Within the Peace dollar series, the 1927-D is the second rarest overall in Uncirculated condition, next to the 1934-S. This is not widely known, as some of the San Francisco issues such as the 1924-S and 1925-S are generally thought to be rarer due to dealer promotion. ..."

"The 1927-D is very scarce in Uncirculated condition, but prices at the MS-63 and 64 levels do not yet reflect the scarcity as of this writing [2008] and should be good investments. The MS-64 coin of course will be a more technically superior specimen, and is not much more expensive. This should be the level that most collectors seek. The quality of coins in this issue should result in a nice MS-64 coin. The MS-65 coins from this issue are exceptional and, unfortunately, priced accordingly. There is a quantum leap in price to get to the Gem level, but if one can afford it, this is the place to make extra investment because of the quality of the issue and its scarcity."

Burdette makes no mention of the MS66 grade level, but extrapolation leads one to the inevitable conclusions that such pieces will be extremely rare and quite expensive.

Unsurprisingly, this piece is one of only nine submissions at the MS66 grade level that PCGS has seen. Even at that, the present coin, encapsulated in a green-label holder imprinted with the Jack Lee pedigree, should prove *especially outstanding*. It is certainly the case that its aesthetics match its credentials: Thick, creamy luster encompasses both sides, which boast primarily silver-gray color with a pinkish accent on the upper obverse rim and scattered bluish tints. As demanded of the grade and unusually so this for the issue, mentionable contact marks are not a factor. A special, special coin. Population: 9 in 66, 0 finer (3/11).

From The Paul Taylor Collection. (#7371)

1927-S Peace Dollar, MS66 Tied for Finest Certified

**5308 1927-S MS66 PCGS.** As might be expected from its low mintage of 866,000 pieces, the 1927-S Peace dollar is one of the rarest dates of the series in higher Mint State grades. In addition to the limited mintage, the 1927-S was plagued by poor production values, and almost all examples seen display weak striking details. Currently, PCGS has graded only two coins in MS66, with none finer, while NGC has certified just a single Premium Gem, also with none finer (3/11). Among all Peace dollar issues, only the 1925-S appears less often in MS66, with no Premium Gem specimens certified.

The present coin is a well struck Premium Gem, with the typical softness evident in some of the lettering and the central design elements. The surfaces show few signs of contact, with vibrant mint luster shining under light golden patina. Housed in a green label holder. From The Paul Taylor Collection. (#7372)

Radiant 1928 Peace Dollar, MS66 Ex: Jack Lee, Tied for Finest Graded

**5309 1928 MS66 PCGS.** Ex: Jack Lee. This coin should form a special prize as the backbone of one of the nicest Peace dollar collections *anywhere*. Certified in a green-label holder with the Jack Lee pedigree printed on it, the present Premium Gem 1928 Peace dollar is one of the loveliest and most desirable representatives of the series, regardless of date. This piece is one of only 11 so graded at PCGS, and there are none finer (3/11). NGC has seen a mere two coins at the MS66 level. The surfaces are radiant silver-white yet completely original, accented on each side with just a light tinge of gold and a blush of lilac near the obverse rim at 1:30. The strike is as close to full as ever seen on this issue, and contact marks are trivial, unseen without a loupe.

From The Paul Taylor Collection. (#7373)

Popular Gem 1928-S Dollar Extremely Rare Any Finer

**1928-S MS65 PCGS. CAC.** The 1928-S is a more famous condition rarity than its low-mintage Philadelphia counterpart and nominal key date. While the 1928-S is available for a price in grades up to MS64, it is a borderline condition rarity in Gem and extremely rare any better. This MS65 example, which is in a green label holder and bears a CAC sticker, has pale silver-white surfaces that showcase generous frosty luster. A handful of minor abrasions and a couple of reed marks in the fields are the only significant barriers to an even finer designation. Population: 46 in 65, 1 finer (3/11).

From The Paul Taylor Collection. (#7374)

Premium Gem 1934-S Peace Dollar Among the Finest Certified

5311 1934-S MS66 PCGS. CAC. The 1934-S Peace dollar is widely known as the key to the series today, but the date was definitely underappreciated at its time of issue. Despite the smallish mintage of just over 1 million pieces, few collectors saved the 1934-S in high grade, and most examples seen are in circulated condition. Speaking of the coin's current popularity, Roger Burdette opines, "Quality Uncirculated examples sell for more than any other circulation-strike Peace dollar issue."

The present coin is one of the finest survivors, a spectacular Premium Gem. The design elements display bold detail, with just a touch of softness on the eagle's feathers, as usually seen on this issue. The surfaces are virtually unmarked, with just a hint of golden toning. The most outstanding feature of this coin's visual appeal is the booming mint luster, unusually vibrant and frosty for a Peace dollar. Tremendous eye appeal and the highest available technical grade make this offering an important prize for the advanced Peace dollar collector. Housed in a green label holder. Population: 24 in 66, 0 finer (3/11).

From The Paul Taylor Collection. (#7377)

## PROOF PEACE DOLLAR

## 1921 Peace Dollar, PR62 The Famous Matte or Satin Proof

**5312 1921 Matte PR62 NGC.** Roger W. Burdette does his best to demystify the enigmatic proof Peace dollars in his *Guide Book* on the series, but sometimes his explorations leave more questions than answers. His estimate of three to four satin proofs for the 1921 High Relief version, for example, is utterly at odds with the 17 satin proof certification "events" in NGC's *Census Report*. Yet there is no denying that the proof Peace dollars are rare. The only question is, how rare?

NGC chooses to describe proofs of this nature as "satin" rather than "matte," and considering the amount of life the finely textured surfaces have, the descriptor is better than the dullness implied by the term "matte." A faint golden overtone graces the broad surfaces on each side, and while a handful of long, thin hairlines are visible, the rims are square and the eye appeal is solid. (#7382)

## **EISENHOWER DOLLAR**

Type One 1972 Eisenhower Dollar, MS66 Four in This Grade at PCGS

**1972 Type One MS66 PCGS.** The first of three distinct types identified for the Eisenhower dollar in 1972, distinguished by a low-relief or "weak" Earth in the background of the vignette on the moon. While the Type One is not the key subtype of the date, it is also a significant condition rarity at the MS66 level, where PCGS has graded only four coins with none finer (3/11). Both sides of this Premium Gem are strongly lustrous under light gold-to-orange patina with a squared-off area of darker shading at the reverse interior. Just a few tiny marks on and near the portrait preclude an even finer designation. A prize for the Registry Set collectors of this increasingly popular series. (#87409)

## **GOLD DOLLARS**

1854 Type Two Gold Dollar, MS64 A Highly Collectible Two-Year Type Coin

**1854 Type Two MS64 PCGS.** Are the 1854 and 1855 Type Two gold dollars rare? In an absolute sense, no. Their allure stems from their status as desirable type coins — pieces that are conditionally rare, especially in the higher Mint State grades. It is sometimes forgotten that the Mint struck 855,502 examples of the 1854-dated Type One gold dollars — a total that, numerically speaking, is within 10% of the production figures for both the 1854 Type Two and the 1855 Type Two.

But strike was a persistent problem for Type Two gold dollars, and most examples are seen with weak centers. One would not know that from examining this piece. The hair curls on Liberty show slight softness, but not distractingly so, while the reverse is fully brought up with complete definition on the LL in DOLLAR and all the digits in the date. Each softly frosted side has subtle reddish-gold color, and there are no obvious or detracting abrasions. (#7531)

1854 Type Two Gold Dollar, MS64 Fully Struck Specimen

5315 1854 Type Two MS64 NGC. By May 1854, the three dollar gold piece with its feather-headdress Liberty was in production and released to the wider world. When James B. Longacre, who had designed the three dollar coin, made new dies for the larger-diameter version of the gold dollar that same year, he used a profile strikingly similar to that on the three dollar coin. Those dies were approved in August and put to immediate use, though striking problems were instantly apparent and forced more changes to Longacre's design, which came in just a couple of years.

The striking problems usually encountered on Type Twos are nowhere to be seen on this piece. The centers are fully brought up. The only "typical" aspect of this high-grade Type Two dollar is clash marks in the fields. Die polishing left the fields bright with the back of the hair curls on the obverse and lower right ribbon on the reverse partially effaced by overzealous die polishing. Exceptional quality and rarely found with more pleasing surfaces for the grade. (#7531)

## MS62 1855-O Gold Dollar

**5316 1855-O MS62 NGC.** Type Two gold dollars from the Southern mints pose a challenge for type collectors due to the short-lived design. Such pieces were struck in the South only in 1855, though all three facilities got in on the action. Of the three, the New Orleans Mint produced the most gold dollars by far, 55,000 pieces, but the issue is a condition rarity in MS62 and better grades. This example has a distinctly green-gold appearance and strong luster that takes on reflective elements through the fields, where a number of wispy abrasions combine to account for the grade. Census: 22 in 62, 18 finer (3/11). (#7535)

Singular MS69 1880 Gold Dollar

**1880 MS69 NGC.** What do the years 1851, 1864, 1872, 1880, 1881, 1883, and 1884 have in common? Those seven dates account for all nine of the gold dollars certified by NGC as MS69; 1881 has three such representatives, while each other year, including 1880, has just a single representative at that grade level (2/11). This impeccably preserved survivor is a coin of singular beauty, just as a viewer should expect for the grade level, with partially reflective yellow-gold surfaces tinged in honey-orange and absolutely smooth. Exactingly detailed and beautiful in every respect, a singular achievement for the dedicated gold dollar enthusiast. (#7581)

# DOLLAR 1889

## MS68 1889 Gold Dollar An Ideal Type Selection

**5318 1889 MS68 NGC. CAC.** The gold dollar denomination had languished in obscurity for years by the time the denomination was cancelled by a government act in 1890. Ironically, demand for the gold dollars had spiked in recent years, specifically among the patrician Eastern set which had taken to the tiny gold denomination for gift-giving. In 1889, the last year of circulation strikes, 29,000 regularissue pieces were produced. Many of them were carefully preserved, and MS68 survivors such as the present piece, though conditionally rare, are out there for collectors to find. Pale yellow-gold surfaces with faint greenish accents offer partially reflective luster, crisp detail, and near-impeccable preservation. Census: 16 in 68, 0 finer (3/11). (#7590)

## **PROOF GOLD DOLLARS**

Ultra Cameo 1860 Gold Dollar, PR65 One of the Finest Known

**5319 1860 PR65 Ultra Cameo NGC.** The 1860 proof gold dollar had an impossibly high mintage of 154 pieces. Perhaps Mint Director James Ross Snowden was anticipating larger numbers of collectors to buy proof gold in 1860 as he overanticipated the demand for silver and minor proofs. Only 15 to 20 individual proof gold dollars are believed known today. This is one of the finest with its essentially defect-free surfaces and sharply contrasting fields and devices. A couple of tiny lint marks and planchet voids appear on each side. Census: 4 in 65 Ultra Cameo, 1 finer (2/11). (#97610)

# Gem Proof 1873 Closed 3 Gold Dollar Exceedingly Rare, No More Than 15 Survive

1873 Closed 3 PR65 PCGS. The 1873 Closed 3 variety was unknown until "Mr. 1873," famed collector-researcher Harry X Boosel, discovered it in the late 1960s or early 1970s. All true proof 1873-dated gold dollars are of the Closed 3 variety, save for one possible (and unconfirmed) Open 3 that the Breen *Proof Encyclopedia* notes may be a "clandestine special strike." The estimated proof mintage for the Closed 3 dollars is pegged at 25 coins, although fewer survive today — probably no more than 15 unimpaired proofs.

Garrett and Guth write:

"The 1873, Close 3 gold dollar is one of the most rare Proofs of the era. That is a bold statement for a series of coins with a total mintage of just 606 pieces from 1862 to 1880. There are fewer than 15 coins that are estimated to have survived, and they are seldom offered for sale. The Harry W. Bass Jr. coin was graded only PCGS PF-62. Surely Bass made every effort to obtain a quality example."

This piece, crucially, matches the Breen diagnostics for the sole proof die used, chiefly the incomplete leftmost headdress feather, under AT of STATES. The yellow-gold surfaces beam with rich luster, and would likely merit a Cameo designation had this piece been certified by PCGS at a later time. A loupe reveals only minor slide marks on the cheek and some faint field hairlines. A few tiny lint marks and contact "dots" are unbothersome and typical for the issue. This piece is one of only two examples certified as PR65 at PCGS, and a single PR66 is finer (3/11). There are no Cameo or Deep Cameo examples certified at PCGS. The finest certified at NGC are three PR65 pieces, including two Cameo coins.

From The Slotkin Family Trust Collection. (#7623)

PR66 ★ Ultra Cameo 1876 Gold Dollar

5321 1876 PR66 ★ Ultra Cameo NGC. Though its mintage was a mere 45 proofs, the 1876 gold dollar proofs mark a dramatic increase in the availability of the denomination in proof format, though any example remains an absolute rarity, much less a beautifully preserved specimen such as the present coin. Pale yellow-gold surfaces are boldly mirrored with small pools of orange-peel texture, while the exactingly detailed devices display absolute, blossoming frost that made both the Ultra Cameo and Star designations unavoidable conclusions. Census: 3 in PR66 ★ Ultra Cameo, 1 finer (3/11).

From The Slotkin Family Trust Collection. (#97626)

1881 Gold Dollar, PR64 Deep Cameo Only 87 Proofs Produced

**5322 1881 PR64 Deep Cameo PCGS. CAC.** Unlike later dates of gold dollars from the 1880s, the 1881 is a low-mintage date. Only 87 proofs were produced. Proofs and prooflike business strikes have frequently been confused in the past. There is only one published diagnostic for proofs, a small unfinished area in the die between the lower left part of the D and the wreath. The fields are deeply reflective mirrors, which establish a strong background contrast against the heavily frosted devices. A curious strike-through is present on this piece, which should aid as a pedigree identifier: An oval-shaped, nearly perfect O is seen to the right of the second S in STATES. Population: 6 in 64 Deep Cameo, 6 finer (3/11). (#97631)

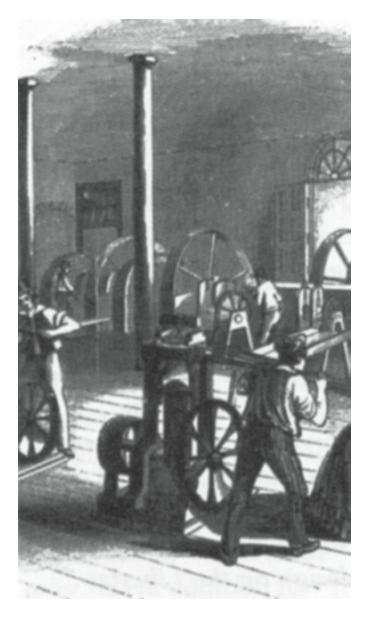

1882 Gold Dollar, PR66 Cameo Ex: Alto, Bass

**5323 1882 PR66 Cameo PCGS.** Bright apricot patina enriches this gorgeously preserved Premium Gem proof. The strike is nearly unimprovable, and the devices have impressive contrast with the mirrored fields. A tiny lintmark (as made) on the lower portion of Liberty's cheek serves as a pedigree. The 1882 proof had a mintage of 125 pieces, although there has been much confusion over the years between proofs and prooflike business strikes. The obverse die for the present specimen has a solitary striation (as made) that connects the bases of ES in STATES. On the reverse, diagonal die polish marks fill the upper loop of the second 8 in the date. The date has a slight but noticeable upward slope.

Ex: Alto Collection (Stack's, 12/1970), lot 48, which realized \$290; Harry W. Bass, Jr. Collection, Part III (Bowers and Merena, 5/2000), lot 70, where it realized \$10,370; New York Signature Auction (Heritage, 11/2003), lot 7111.

From The Orchid Collection. (#87632)

## **EARLY QUARTER EAGLES**

## '1802/1' Quarter Eagle, BD-1, MS64+ With Bright Yellow-Gold Surfaces

1802/1 MS64+ NGC. Breen-6118, BD-1, R.4. Bass-Dannreuther Die State a/a. The *Guide Book* lists the 1802 quarter eagle as an overdate — "1802, 2 Over 1" in the 2011 version — while the Bass-Dannreuther reference lists it as a normal nonoverdate issue. There were no quarter eagles produced dated 1799, 1800, or 1801. It would be strange — but not unprecedented — in U.S. numismatics for there to be an overdated die for which no examples of the "underdate" year are known. In fact, this is exactly the case with the 1802/1 half eagle, and Bass-Dannreuther write that "some have suggested the calling of this quarter eagle an overdate is due to the obvious 1802/1 half eagle — an analogy easily seen. A defective 2 punch or break is now considered the likely culprit for the '1' below the 2 in the date"

Some examples of this phenomenon include:

- —1805/4 half dollar (no 1804 half dollars are known)
- -1802/1 half eagle (no 1801 half eagles exist)
- —1796/5 Draped Bust half dime (the 1795 half dimes are Flowing Hair)
- —1852/1 Humbert tens and twenties (no perfect-date 1851 tens or twenties known).

Whichever it is, the 1802 quarter eagle is the first of the denomination coined in the 19th century, an unsurprising result given the sporadic nature of quarter eagle coinage in the early years of the U.S. Mint. It has been traditionally collected as an overdate.

In fact, one of the most illustrious collections of overdates ever offered at auction was the Dr. Juan XII Soros Collection (Superior, 2/1999), which contained an MS62 PCGS example of the "1802/1" quarter eagle — along with 1817/3 and 1817/4 half dollars; the 1796/5, 1797/5, 1802/1, 1803/2, 1808/7 Wide Date and Close Date, 1809/8, 1814/3, 1825/1, 1825/4, and 1828/7 half eagles; 1798/7 Stars 9x4 and Stars 7x6 eagles; and many others.

The present MS64+ example of the 1802 quarter eagle displays bright mint luster. The strike is a trifle soft in the center of each side, possibly precluding — just barely — a Gem grade. The only "defect" worthy of note is actually Mint-made, a shallow planchet fissure over the high point of Liberty's cheek, just below the eye. Bright yellow-gold surfaces are free of adjustment marks. (#7650)

# 1808 Quarter Eagle, MS61, Only Year of the Capped Bust Left, Large Size Type

**1808 MS61 NGC.** The skimpy mintage of 2,710 quarter eagles dated 1808 was accomplished using a single obverse and reverse die pairing, and today it is among the most widely pursued U.S. type coins. Among U.S. gold type coins, it is probably the second rarest, behind only the 1796 No Stars quarter eagle. The quarter eagle denomination was struck only sporadically throughout its first few decades, until 1834. Token amounts of the denomination were struck dated 1796, 1797, and 1798 (although not necessarily struck in those years), then no more were produced until the so-called 1802/1 coins. Quarter eagles were struck yearly dated 1804, 1805, 1806, and 1807.

The Mint's priorities in 1808 clearly lay elsewhere than in the quarter eagle. John Reich had been hired out of indentured servitude in 1807 to work as an assistant engraver at the Mint. He was given the task of redesigning the U.S. coinage, a direct slap in the face of the aged chief engraver, Robert Scot. Reich turned first to the coins most used by banks, creating new master hubs for half dollars and half eagles. In 1808, Reich's new designs would premiere for the large cent and the quarter eagle. The "secret notch" on star 13, Reich's signature, is plain on all examples of the 1808 quarter eagle, including the present piece.

The mintages of 1808-dated coinage are clear evidence of the Mint's scant support for the quarter eagle. While the coinage factory turned out 400,000 cents, more than 1 million large cents, nearly 1.4 million half dollars, and about 55,000 half eagles, the quarter eagle mintage of 2,710 pieces would constitute the sole production of the Capped Bust Left, Large Size type (in *Guide Book* terminology), and the last quarter eagle production until 1821. In the years from 1796 through 1808, the Mint managed (or chose) to strike only a reported 22,197 pieces, with a face value of \$55,492.50. For comparison purposes, notice that the single-year emission of 1808-dated *half eagles* was 55,578 coins, with a face value of \$277,890.

Mintage comparisons such as these make one realize how truly rare overall the quarter eagle denomination was, even to Americans of its own time. This likely explains another anomaly, the existence of numerous 1808 quarter eagles in near-Mint State grades, a considerable number for the quantity produced. Due to its lower face value and its status as an oddity among American coins, it appears that some nice pieces were saved when they were encountered, in much the same way as Americans today might save a \$2 bill or Buffalo nickel found in circulation. The most common grade among certified survivors is AU58, where NGC has graded 13 pieces and PCGS 14. In MS61, the present coin is one of seven coins so graded, with seven finer (2/11).

This is a simply splendid example for the issue and for the grade, with bright, semireflective fields and gleaming yellow-gold surfaces. The wispy die crack behind Liberty's head, from the cap to stars 8 and 9, is ever-present, as is the virtual lack of dentilation on both sides due to a design flaw. Adjustment marks are absent. Although a few minor ticks appear on each side, this piece is well struck overall, with weakness limited to the lower reverse near the denomination, and its appeal is remarkably high-end for the assigned grade. Another momentous gold rarity from the early days of U.S. Mint history. (#7660)

## Gem Prooflike 1831 Quarter Eagle, BD-1 Tied for Finest Certified

**5326 1831 MS65 Prooflike NGC. Breen-6134, BD-1, R.4.** Bass-Dannreuther Die State a/a or c/c. Due to the highly prooflike, reflective nature of the fields, the die state is difficult to determine with certainty. Is this coin an early strike with pronounced die polish, or is it a later state where die lapping has effaced earlier die clashes? Viewers must decide for themselves. (Bass-Dannreuther write that "the lapping is so light that distinguishing between State a and c is nearly impossible; the clashed state, b, is obvious.")

There are quite a few examples — relatively speaking, and *in the context of the extreme rarity of all early U.S. gold* — of proof-like business strikes that in the past have been called proofs. The situation is exacerbated, as well, by the evolution of the term "proof" itself among numismatists to a much stricter definition than prevailed throughout much of the 19th and early 20th centuries.

John Dannreuther makes some telling comments concerning the Bass specimen in the popular reference:

"There are unequivocal Proofs of this date, but this is not one of them. Since the intent of the coiner is the final arbiter of whether a coin is a Proof or not, we shall never be 100% certain on this coin. Whether it is a Proof without full credentials or one of the first circulation strikes after the Proofs were struck is a moot point."

In the case of the present coin, while the Prooflike designation is applicable in spades, to us there is little doubt that this piece is *not* a proof in the modern sense. The trimming of mint luster around the rims and the lack of the complete rim-to-rim die polish one would expect to see on a proof are the deciding attributes. The pronounced field reflectivity complements the prevailing reddish-gold coloration. The strike is sharp, save for on the eagle's left (facing) wing, next to the shield. This piece is tied with one other as the finest Prooflike certified at NGC; there are four MS66 non-Prooflike specimens numerically finer (2/11). An important and highly attractive specimen of early gold. (#77671)

## 1833 Quarter Eagle, Bass-3030, BD-1, MS64 Rarely Available in Any Grade

5327 1833 MS64 NGC. Bass-3030, BD-1, R.5. Obverse State a, Reverse State c. There is only one die pairing and one die state known for this rare low-mintage date. Both 3s in the date are lightly recut, and the second 3 has faint evidence of a broken punch that looks like a short die crack. The reverse shows broad repunching on the U in UNITED and the I in AMERICA. Only 4,160 pieces were struck, with most of them promptly melted since the bullion value exceeded face value. Only 60 to 80 pieces are believed known today in all grades. It was not until the next year, 1834, that the weight of gold coins was reduced, which allowed the new pieces to enter circulation. PCGS has certified two 1833 quarter eagles in VF grades, but they were likely carried as souvenirs by a 19th century owner. Most survivors are in AU or lower Mint State grades. NGC and PCGS combined have certified only six examples above the MS64 level.

This piece has remarkably smooth, unmarked olive-gold surfaces with a pronounced red accent around the margins. Both obverse and reverse are sharply struck on the central devices with some localized softness on the peripheries, specifically flatness on the stars. There is also slight weakness on Liberty's hair curls and the left side of the shield and adjacent eagle's wing — the usual places one finds softness on these pieces. The open fields are semiprooflike. While rarely encountered in any grade, such a high-grade example as this is seldom seen. This desirable, high-grade near-Gem is worthy of the finest-quality early gold date or type set. Census: 6 in 64, 2 finer (2/11). (#7673)

## **CLASSIC QUARTER EAGLES**

## 1834 Classic Head Two and a Half MS66 Prooflike, Marvelous Type Coin Tied for Numerically Finest at Either Service

1834 MS66 Prooflike NGC. Breen-6138, Variety 1, Small Head, R.1. The Small Head variety is easily distinguished by the straight line of curls at back of the head, while the Large Head style has an interrupted line of curls at that point. The Small Head obverse is always paired with a unique reverse, Reverse A, in a monogamous die marriage. All the letters of UNITED STATES OF are well-spaced, and no letters touch any others. AME and RI are joined, and the right base of the first A is minutely above the left base of M. The lowest arrow solidly joins the right base of the final A. The stem tip is over the right upright of the D, and the lowest arrow feather is over the outer right curve of the primary 2.

The 1834 Classic Head coins in superhigh grades, as here, are today among the truly overlooked areas of 19th century numismatics. Neither fish nor fowl, they lack the cachet of the early era of U.S. gold (1795-1834) and yet are far rarer overall than the Liberty Head types that immediately follow.

In fact, a point we have made before needs stressing again. Variety rarity ratings take no account of conditional rarity. They are merely a shorthand way to account for — or estimate — how many examples survive, in all grades, of a given die pairing. The NGC Census Report reveals that this MS66 Prooflike and one MS66 non-Prooflike example are tied for the finest of the issue. PCGS has also certified one MS66 non-Prooflike example. So if we include conditional rarity as part of the equation and assume that all three examples are different, the "R.1" variety in MS66 suddenly becomes Low R.8.

The strongly mirrored fields are a result of the heavy die striations, with the only noticeable mint frost around Liberty's portrait. The prevailing coloration is bright yellow-gold. The strike is bold, even accounting for a bit of high-point softness on the hair curls surrounding Liberty's face. A few tiny marks appear, the most obvious ones in the reverse fields, two above the eagle's head and one in the lower left field. A marvelous type coin, firmly at the top of the Condition Census. NGC Census: 1 in 66 Prooflike, 0 finer (2/11). (#77692)

## 1839-D Two and a Half, MS62 Only D-Mint Classic Head Issue Just Four Coins Finer at PCGS

**1839-D MS62 PCGS.** Variety 1-A. The only Classic Head quarter eagle from the Dahlonega Mint, the 1839-D is an extremely important issue for mintmark type collectors, as well as series specialists. The 1839-D claims a mintage of 13,674 pieces, and examples in Mint State condition are very rare in today's market. Doug Winter estimates a surviving population of 150-175 specimens in all grades, with seven to nine Mint State pieces still extant. This coincides well with the PCGS population data, which shows six coins certified in MS62 and four examples finer (3/11).

The present coin is a rare MS62 specimen, with attractive orange-gold surfaces and bright mint luster. The design elements are strongly impressed, with razor-sharp detail on Liberty's hair and just a touch of softness at the junction of the shield and eagle's wing on the reverse. The weak branch stem that extends over the right side of the D in the denomination identifies this coin as a representative of the more-available Variety 1-A. (#7700)

## LIBERTY QUARTER EAGLES

## Legendary 1848 CAL. Quarter Eagle, AU50

1848 CAL. AU50 PCGS. Immigrants to the New World, and the United States and its antecedents in particular, usually sought (and to this day still seek) at least one of two goals: economic opportunity or religious freedom. Both have long histories, but the tilt in California in 1848 was decidedly toward fortune, even before the January morning when James W. Marshall first found gold at Sutter's Mill. Word spread rapidly, from the famous cry of "Gold!" in the streets of San Francisco in March, to the U.S. Army in June, to East Coast newspapers by late summer, and to the halls of Congress in early December, when James Polk announced the confirmed discovery in a formal address.

By that time, tangible proof of the rumors had arrived in Washington, D.C., thanks to nearly 230 ounces in California-origin gold sent with Lieutenant Lucien Loeser of the U.S. Army. Aside from a handful of reserved samples, including what is believed to be Marshall's discovery piece (now in the Smithsonian at the National Museum of American History), the rest of the gold was melted down and made into either military medals or celebratory coins: the famous 1848 quarter eagles with incuse CAL. (for California) above the eagle's head.

Just 1,389 of the quarter eagles were struck, and many were kept as pocket-pieces and thus experienced at least a degree of wear. This example is modestly rubbed, but the green-accented yellow-gold surfaces retain considerable brightness in the fields, including a touch of reflectivity on the all-important reverse. A gorgeous piece of history, housed in a green label holder. (#7749)

1855-C Two and a Half, AU58 Among the Most Difficult Series Issues

1855-C AU58 NGC. Variety 1. This legendary Charlotte quarter eagle has the lowest individual mintage in the series (3,677 pieces); it has the second-lowest mintage of any C-mint two and a half, only trailing the 1843-C Small Date; and it is one of the rarest Charlotte quarter eagles overall, with only 85-105 examples believed known. Just over two dozen AU coins are believed to have survived. True to its reputation as "one of the two most poorly struck Charlotte quarter eagles produced in the 1850s," according to Doug Winter, this representative shows virtually all design elements softly defined. However, there is no problem with the AU58 grade when one judges the coin by remaining luster. The surfaces are bright overall with a tinge of reddish patina. Both the fields and devices are remarkably clean for this normally heavily abraded issue. This is one of the finest 1855-C quarter eagles on the market today, and at this grade level it represents excellent value. (#7775)

1855-D Quarter Eagle, AU53 Exceptionally Low-Mintage Rarity Only 1,123 Pieces Struck

5332 1855-D AU53 NGC. Variety 18-M. The rarity of the 1855-D quarter eagle is attributable to its extraordinarily low mintage of only 1,123 pieces. Its rarity is only exceeded by the 1856-D, which had an even lower production run (874 coins). Only 45-55 coins are believed extant in all grades, and predictably AU examples are of the highest rarity with only 10-12 pieces believed known. Several AU55s are tied at the lower end of the Condition Census. This attractive AU53 has slight high-point friction and there are noticeable remnants of mint luster remaining, especially around the reverse devices. The strike is soft in the centers, a somewhat unusual occurrence since most 1855-D quarter eagles are stronger in the centers than the margins. Deep reddish-gold color is seen over most of each side. Each side is minimally abraded, but several planchet voids are scattered over the rims on both sides.

From The Orchid Collection. (#7776)

# 1864 1864 1864 1804 1804

## 1864 Liberty Quarter Eagle, AU58 Condition Census Specimen

5333 1864 AU58 NGC. The Philadelphia Mint coined 2,824 business strike quarter eagles and another 50 proofs in 1864. Eastern coinage of gold and silver coins was extremely limited during the second half of the Civil War, while larger quantities were struck in California, being little affected by the conflict.

NGC and PCGS have certified 17 examples of this issue, including four AU58 submissions and three finer coins. The finer coins include two certified as MS61 and one amazing MS67. In our own sales since 1993, nine appearances of an 1864 quarter eagle include just six different coins. The current offering is the third appearance of this specimen in our sales. Less than two dozen 1864 quarter eagles are known in all grades.

An undeniable Condition Census specimen, the present near-Mint survivor exhibits bold prooflike tendencies in the fields despite scattered abrasions. As befits a low mintage issue from the Philadelphia Mint, the devices are powerfully impressed and free of noticeable striking softness. Both sides display a bright, yellow-gold appearance, but deeper green-gold accents are noted at certain angles.

Ex: FUN Signature Sale (Heritage, 1/2001), lot 8099; Long Beach Signature Sale (Heritage, 9/2002), lot 8005. (#7800)

# PROOF LIBERTY QUARTER EAGLES

## 1887 PR63 Cameo Two and a Half High-Mintage, Low-Availability Issue

1887 PR63 Cameo NGC. Even though the 1887 quarter eagle has a high mintage for proofs struck through 1895, it is still a rare date with probably no more than 40-50 individual coins remaining. In the (now-distant) past heavily polished business strikes were sometimes confused with actual proofs, a confusion that undoubtedly resulted from the low production of only 6,160 strikes for circulation. This is a nicely reflective example whose devices are noticeably frosted, the two-toned effect giving the coin the desirable cameo effect on each side. A few light hairlines and contact marks in the fields account for the grade. Census: 1 in 63 Cameo, 11 finer (3/11). (#87913)

## Choice Proof 1892 Quarter Eagle Rare With Deep Cameo Contrast

5335 1892 PR64 Deep Cameo PCGS. The proof mintage of 105 pieces for this issue complements the business strike emission of only 2,440 examples, providing extra pressure on the small supply of proof coins from date collectors. Many business strikes are understandably prooflike, deceptively so, according to Garrett and Guth. The authors also note that many proof examples are impaired or damaged. Not so the present specimen, with excellently contrasting surfaces, pretty lemon-yellow coloration, and a bold, problem-free strike that brings up all the fine detail to good advantage. Population: 7 in 64 Deep Cameo, 5 finer (3/11).

Ex: FUN Signature Auction (Heritage, 1/2007), lot 3433, realized \$18,975. (#97918)

1899 Quarter Eagle, PR65 ★ Ultra Cameo Starkly Contrasted Example

5336 1899 PR65 ★ Ultra Cameo NGC. There were 150 proof quarter eagles minted in 1899, which ranks it as a type coin among later dates in the series. The draw of this issue is that it is not only an affordable proof, but it also has the charm of the 19th century date. In the PR65 grade category it is difficult to imagine a finer example. The fields are unfathomably deep in their mirrored reflectivity and the devices are heavily frosted on each side, which yields stark cameo contrast. A few tiny contact marks can be made out in the fields with sufficient magnification, but obviously (from the Gem grade) none are of significance. Approximately 100 examples are estimated to exist of the 1899, in a wide range of grades from PR53 to PR68. (#97925)

1902 Quarter Eagle, PR64 Cameo A Contrast Rarity

5337 1902 PR64 Cameo PCGS. Cameo proof coins were frequent emissions of the Philadelphia Mint in the 19th and early 20th centuries through 1901. However, they were rarely seen from 1902 through 1950. Someone at the Mint decided that cameo contrast was undesirable and took steps to eliminate that appearance, which meant that the entire surface of coinage dies required polishing. Nearly 28% of PCGS certified proof quarter eagles from 1896 to 1901 have cameo contrast, compared to less than 14% of those from 1902 to 1907.

This rich yellow-gold proof has satiny luster on the sharply detailed design motifs with deeply mirrored fields. Trivial hairlines and contact marks separate this example from Gem honors. Population: 2 in 64 Cameo, 2 finer (3/11). (#87928)

Yellow-Gold 1906 Two and a Half PR67 Cameo

**5338 1906 PR67 Cameo NGC.** Cameo proof Liberty Heads of any denomination, particularly in the highest grades, are joys to behold and a real treat among the uninitiated. The present Superb Gem has pronounced contrast between fields and devices that is revelatory, enhanced by the evidence of light die striations (from die polishing) in the fields. The surfaces are near-perfect, save for a thin mark between Liberty's hair bun and star 10 and a couple of microscopic planchet voids. The yellow-gold surfaces have a slight, almost imperceptible overlay of light reddish patina. A real keeper for proof gold aficionados. Census: 18 in 67 Cameo, 3 finer (3/11). (#87932)

## 1907 Two and a Half, PR65 Cameo Ex: Amon Carter

**5339 1907 PR65 Cameo NGC.** Ex: Amon Carter Collection. This remarkable Gem Cameo proof has brilliant light yellow surfaces with bold design definition and exceptional field-to-device contrast. Plate matching proof gold coins provides a challenge, and the only markers that we find on this piece to match the Carter catalog plate is a small field mark above the lowest inside leaf of the olive branch on the reverse, and a tiny toning spot at the center of the left wing along its top edge. This extraordinary Gem will be a welcome addition to an advanced proof gold cabinet or type collection.

Ex: Amon Carter Collection (Stack's, 1/1984), lot 583; 2010 June Long Beach Auction (Heritage, 6/2010), lot 1557. (#87933)

## **INDIAN QUARTER EAGLES**

## 1911-D Indian Two and a Half, MS62 Satiny Surfaces and a Strong Mintmark

**1911-D MS62 NGC.** There are a couple of unique attributes to the 1911-D quarter eagle that should help most collectors pick a nice example for their sets. While these criteria are certainly not limited to the 1911-D, it is an unusual issue to which some of them apply to an exceptional degree. Luster is at the forefront. The 1911-D's luster varies widely in all grades, a fact Mike Fuljenz pointed out recently in *Indian Gold Coins of the 20th Century*. Although the luster is usually a bit below par, those seldom-seen pieces with "very good frosty luster" are rare and desirable.

The 1911-D is also seen with Strong D and Weak D varieties, as the mintmark is virtually invisible on some specimens. Collectors should generally opt for the Strong D variant, all else being equal. Original color and eye appeal are also of paramount importance on the 1911-D.

This bright, satiny example exhibits a strong mintmark. The surfaces are light reddish-golden with minimal abrasions present for the grade. Sharply struck as well. (#7943)

1911-D Two and a Half, MS62 Bright, Lustrous Yellow-Gold Surfaces

5341 1911-D MS62 NGC. With an original mintage of just 55,680 pieces, the 1911-D quarter eagle has long been considered the key to this collectible and affordable series. More often seen in XF or AU condition, this issue is scarce in Mint State grades. This solid example has no trace of wear and bright yellow-gold luster. The MS62 grade was apparently assigned because of a number of light, scattered abrasions that are visible with magnification. An attractive coin none-theless, and one that is apt to see a considerable number of bidder cards in the air before the hammer falls. (#7943)

Key 1911-D Indian Quarter Eagle, MS63 A B. Max Mehl Favorite

**5342 1911-D MS63 PCGS.** The Indian quarter eagle series contains only three mintmarked dates, and the 1911-D is first and foremost among them. The 1911-D boasts the smallest mintage of the series, at 55,680 pieces, and the date is just as elusive as the tiny mintage would suggest. B. Max Mehl recognized the importance of the 1911-D at an early date, and his enthusiastic descriptions in several auction catalogs established the issue as the undisputed key to the series.

The present coin is an attractive Select specimen, well detailed, with just a little softness on the central devices. The mintmark is distinct and well formed, but not deeply impressed. The lustrous surfaces exhibit pleasing orange-gold color, with some light green highlights. the visual appeal is quite strong. (#7943)

MS64+ 1914 Quarter Eagle

**1914 MS64+ PCGS. CAC.** While the 1911-D is the obvious key date of the Indian quarter eagle series, those who have tried to assemble the set understand well just how challenging the 1914, which has the second-lowest mintage in the series, can be in high grades. As an MS64+, this coin is one of just three coins so certified with 50 numerically finer (2/11). Glowing honey-gold surfaces are smooth and satiny, the devices well-defined, and the overall eye appeal strong. Just a few faint disturbances on each side, such as a couple of luster grazes over the eagle's head, leave the piece shy of a Gem designation. (#7946)

1914 Quarter Eagle, MS64+ Second-Rarest in the Series

**1914 MS64+ PCGS. CAC.** Although the 1911-D quarter eagle is justly famous, far fewer collectors realize that the 1914 quarter eagle has both the second-lowest mintage and is considered second in overall and high-grade rarity to its illustrious sibling. The Philadelphia mintage plummeted from 722,000 pieces in 1913 to 240,000 in 1914, and Mint State examples are rare in all grades. Even Mint State survivors usually suffer from extensive abrasions. This piece is a pleasing exception, exhibiting only a few stray abrasions, including a couple on the Indian's jawline. The strike is well-executed over copper-gold surfaces. Population: 4 in 64+, 50 finer (3/11). (#7946)

Remarkable Double Struck in Collar 1925-D Indian Two and a Half, MS62 180-Degree Die Rotation

5345 1925-D Indian Quarter Eagle — Double Struck, Rotated 180 Degrees in Collar — MS62 NGC. Ex: Byers Collection. A remarkable error on a 20th century gold coin. The first strike was normal, but the piece was struck a second time, rotated almost exactly 180 degrees from the initial strike. Presumably, the coin did not leave the die chamber between strikes, and the collar die was obstructed for the second strike. Much detail is present from the first strike, including a full date and Indian profile. The top half of the eagle is also well outlined. Both sides are unabraded and satiny with straw-gold color and only a hint of friction on the high points.

A search of our Permanent Auction Archives, which date to 1993, show only one prior appearance of a double struck in collar U.S. gold coin. That was a 1904 double eagle, MS63 PCGS, that realized \$37,375 in our August 2006 Denver Signature. The rotation between strikes on that piece was only a few degrees, and its "look" is significantly less dramatic than for the present lot. Unquestionably unique, and perhaps a once-in-a-lifetime opportunity for the error specialist.

## PROOF INDIAN QUARTER EAGLES

1910 'Roman Gold' Quarter Eagle, PR63

**1910 PR63 PCGS.** The inexplicably high mintage for 1910 proof quarter eagles is not an indication of the availability of this date. The numbers extant for the 1910 are roughly in line with the number of survivors for other matte and Roman Finish proofs from 1908 through 1915. The surfaces of this proof show the expected sharpness in all areas of the design. The brightness common to this two-year proof finish is somewhat subdued here, the result of light hairlining and subsequent reddish-orange patination. There are no singular noticeable contact marks on either side. Housed in a first-generation holder. (#7959)

## Pristine PR66 1910 Quarter Eagle 'Roman Gold' Finish

**1910 PR66 NGC.** The purported mintage figure of 682 proofs, as given in the *Guide Book* and other sources, is almost certainly in error, given the certified populations. Mike Fuljenz estimates in his references on the series that a reasonable number is 175-200 proofs coined, with perhaps 75-90 surviving today. The "Roman gold" finish is only seen on this and the previous year, 1909.

A ring of subtle orange toning appears at the peripheries on both sides of this gorgeous Premium Gem. The design motifs are fully struck, complementing pristine surfaces and satiny yellow luster. A tiny planchet flake at the Indian's chin is the only apparent blemish, likely insufficient to trace a provenance. Census: 26 in 66, 12 finer (2/11).

From The B & D Collection. (#7959)

Select Proof 1911 Quarter Eagle

1911 PR63 PCGS. The logic behind the matte proof finish was that by taking away the reflective surfaces that had characterized past proofs, the viewer would have fewer distractions and thus focus on the design and its detail. In that respect, the texture on this Select proof Indian quarter eagle does an admirable job, channeling attention away from butterscotch-brown fields and toward the sharp details of the portrait and eagle. A couple of small disturbances in the obverse matte surface, including a contact mark high on the cheekbone and another at the throat, account for the grade. Population: 7 in 63, 61 finer (3/11). (#7960)

## 1912 Indian Quarter Eagle, PR67 Nearly Flawless Example of the Matte Proofing Process

**5349 1912 PR67 PCGS.** The 1912 proof Indian Head quarter eagle had a mintage of 197 pieces. Attrition was heavy in that year, however, and the original mintage figure bears little relation to the number of survivors today. Akers was only able to trace 19 auction records for this date in the 30 years he surveyed for his work. We believe the total considerably higher, with the total number of survivors probably in the neighborhood of 65 to 75 pieces.

A matte or sandblast finish was seen on gold proofs of this year, but is different from the matte or sandblast finish of proofs from 1908 and 1911. Writing in his *Encyclopedia of United States and Colonial Proof Coins*, 1722-1989 (1989), Walter Breen commented: "Fine sandblast finish. Different from all previous matte coins; under a microscope the surfaces show millions of minute shiny facets. Much rarer than its mintage figure would suggest."

This piece features fine-grained surfaces that display a beautiful matte texture and even, light khaki coloration. Under a loupe one can see the sparkling individual facets of the sandblast surface. The obverse is virtually flawless, and the reverse also comes close to being pristine. The sharply struck design elements are clear throughout, except only for the slightest weakness on the eagle's breast and left (facing) leg feathers. The specialist in proof Indian Head gold coinage could spend many years searching for a finer example. Population: 4 in 67, 0 finer (3/11). (#7961)

## Superb Gem Proof 1914 Quarter Eagle One of the Finest Examples Obtainable

**1914 PR67 NGC.** The 1914 proof quarter eagle is quite a different issue from the previous year. The mintage is significantly lower — only 117 proofs were produced, as compared to 165 for the 1913 coins. Garrett and Guth write of the issue:

"The Philadelphia Mint again revised the matte Proof process for 1914 quarter eagles, using a darker, coarser sandblast finish than seen on the 1912 to 1913 issues. The microscopic facets are larger than seen in prior years, and thus the reflectivity is less noticeable."

Our in-house records indicate that the average 1914 proof grades 63.5 and Garrett-Guth found an average of 64.2. This splendid coin is among the few finest known of the estimated 60-70 pieces estimated extant today. NGC has certified a mere 12 pieces in PR67 with four coins finer, including possible resubmissions. PCGS, interestingly, has never certified an example in either the PR66 or PR67 grade (3/11).

The prevailing coloration on the present PR67 specimen is greenish-tinged yellow-gold with accents of green, over fine-grained surfaces that exhibit no noticeable contact marks. The surfaces are not perfect, but their only imperfection lies in a Mint-made flaw: On the right side of the reverse, through the TR in TRUST, one can detect a curious, raised diagonal planchet lamination into the right field below. This is really quite interesting and unusual to find on a proof gold coin.

Ex: ANA Signature (Heritage, 7/2008), lot 1917. (#7963)

## THREE DOLLAR GOLD PIECES

**1854 MS64 NGC. CAC.** The 1854 three dollar gold piece represents the first year of the denomination, making it extremely popular with type collectors and series specialists. The 1854 boasts the largest mintage of the series, at 138,618 pieces, and the issue can only be called scarce in Choice condition. However, the population drops off dramatically in higher grades, and anything finer is quite rare. Currently, PCGS has certified only 28 coins in higher numeric grades (3/11).

The coin offered here is an attractive Choice example, with lustrous yellow and rose-gold surfaces. The design elements are sharply detailed, with bold definition on the feathers and Liberty's hair. The fields are remarkably free of contact marks. (#7969)

James Barton Longacre

## Choice AU 1854-D Three Dollar The Lone Dahlonega Three

**1854-D AU55 NGC.** The 1854-D three dollar gold piece has a charm all its own, as Q. David Bowers and Doug Winter explain in *The United States \$3 Gold Pieces*:

"For the specialist the 1854-D \$3 possesses several points of interest. First, it is the only Dahlonega Mint coin of this denomination. As coins from that mint are collected avidly, this is a 'must have' for many. Second, the production quantity of 1,120 is enticingly low — bespeaking rarity from the outset. Few things are more exciting to a numismatist than a low mintage figure. Third, of all coins in the \$3 series this is the most 'rustic,' the poorest struck and the issue with the lowest average eye appeal. The last is not an asset, but certainly a point of interest. Rusticity has its place in numismatics — witness the Charlotte and Dahlonega gold dollars of the late 1850s or, for that matter, the crude copper coins struck by Machin's Mills in the late 1780s that command so much attention today."

In the context of the 1854-D three dollar, a coin that is "not bad" is in fact good or great, and this Choice AU survivor is not bad at all. The margin areas show typical weakness on the rims and dentils, but the interiors are decently detailed with only minor evidence of wear. Orange-accented yellow-gold surfaces retain faint but appreciable luster, and aside from a few small rim nicks, both sides are remarkably abrasion-free. An excellent selection for the Southern gold enthusiast who wants a high-end Dahlonega three dollar gold piece but would rather not wade into the bidding war required to win a Mint State survivor at auction. (#7970)

## Orange-Gold Near-Gem 1859 Three Dollar

5353 1859 MS64 NGC. The mintage of business strike three dollar gold pieces in 1859 was a generous — for the series — production of 15,589 coins, but most of them circulated to one degree or another, and today the average certified survivors grades about AU55. Mint State examples number only 70-90 pieces, according to the Bowers series reference, although we suspect that total is somewhat on the low side. This near-Gem is among the finer survivors, with pleasing orange-gold surfaces that are well-struck throughout. Minor die clashing appears on the reverse, and we note a single straight scrape in the left obverse field, between the chin and U, that helps determine the grade. Other minor contact and light hairlines appear only under a loupe. Census: 20 in 64, 5 finer (3/11). (#7979)

Gem 1878 Three Dollar Excellent Type Representative

1878 MS65 NGC. The 1878 is the last of the great triumvirate of issues within the three dollar gold series that are traditionally considered type coins, due to their relatively plentiful mintages. The 1854 three dollar is the first and highest-mintage, with the 1874 and 1878 productions about one-third and two-thirds the mintage of the 1854, but saved in greater numbers due to their later issuance. But even though the 1878 had a production exceeding 82,000 coins, most circulated to a small degree. Gem specimens such as the present piece are elusive but can be obtained with patience, while Premium Gems are seldom offered.

This coin displays rich orange-red and lilac-tinted coloration throughout, with much luster emanating from satiny surfaces that show only a stray mark or two — including one in the center of the Indian's cheek — that are consistent with the grade. The piece also boasts an excellent strike, save for minor weakness on the bowknot. An excellent type candidate. (#8000)

## Gem 1878 Three Dollar Popular Type Coin

5355 **1878 MS65 NGC.** Three dates in this odd-denomination series are familiar choices for type collectors: the first-year 1854 and the heavily produced but not widely distributed 1874 and 1878 issues. This Gem example comes from the last, and with its magnificent peach-gold and sun-yellow luster, it is an ideal choice to add to a similarly graded type set. Impressive design definition and carefully preserved surfaces further fuel the eye appeal. The MS65 tier is where this issue becomes elusive, and finer examples are scarce; NGC has certified only 53 pieces as numerically superior (3/11). (#8000)

Near-Gem 1879 Three Dollar Gold

**1879 MS64 PCGS. CAC.** Though strikings of three dollar gold pieces spiked to the high five figures in 1878, the demand was driven largely by a single customer, and without his support, business strike production plunged to just 3,000 examples for 1879. This is an attractive near-Gem representative of that low-mintage issue, strongly mirrored on straw-gold and sun-yellow fields with above-average design definition and few significant flaws on the raised devices, though minor marks and a couple of isolated luster scrapes combine to account for the grade. PCGS has certified 38 finer examples (3/11). (#8001)

Elusive 1881 Three Dollar Gold, MS63 Tied for Finest We Have Offered

5357 1881 MS63 PCGS. The impossibly low mintage of 500 pieces ensures that virtually all Mint State pieces will exhibit proof-like surfaces, as here on this Select representative. The coloration is rich reddish-gold, complementing a sharp strike. The numerous small abrasions peppered over each side constitute the grade. Bowers estimates in his reference on the odd denomination that from 20 to 30 Mint State examples survive today. This MS63 piece is tied for the finest certified that we have offered since we began our Permanent Auction Archives in 1993. The last such, lot 4022 in our 2009 FUN Signature, brought \$19,550. Population: 9 in 63, 5 finer (3/11). (#8003)

Reddish-Orange Near-Gem 1882 Three Dollar

**1882 MS64 PCGS.** By 1882, the U.S. Mint manufactured small-denomination gold coins — quarter eagles and half eagles — in the millions of pieces, to the detriment of double eagles and the long-since-unneeded three dollar denomination, whose paltry emission was 1,500 business strikes. the Mint State survivors are unsurprisingly (but delightfully) prooflike to semiprooflike in many instances, as on the present near-Gem, which displays ample prooflike qualities. Rich reddish-orange color is augmented by tinges of greenish-hazel near the rims. This piece is well-struck, and only a few tiny ticks and scrapes away from the Gem level. (#8004)

## Prooflike 1883 Three Dollar Gold, MS63

**5359 1883 MS63 PCGS. CAC.** This sumptuous Select Mint State beauty is one of a recorded 900 business strikes produced for the 1883 three dollar gold issue, so it comes as no surprise that the coin demonstrates much prooflikeness on either side. This coveted surface effect is a function of the polishing to which the dies were originally subjected, imparting a prooflike brilliance and reflectivity that would wear off only over time and repeated blows of the dies to a less-mirrored, more frosty or satiny surface. This piece is primarily yellow-gold, although accents of pink or lilac appear on each side. A few minor contact marks are in keeping with the grade, and the strike is decent but short of complete. Population: 28 in 63, 20 finer (3/11). (#8005)

Low-Mintage 1885 Three Dollar Gold, MS64 801 Pieces Coined

**1885 MS64 NGC.** Ex: Princess Collection. The 1885 three dollar gold had an incredibly low mintage for a business strike gold coin, at 801 pieces the second-lowest of the entire series behind the 1881, with 500 coins. It nonetheless appears as though there were some astute dealers and collectors who were attuned both to the low mintages and to the possibility the series might soon end, as it indeed did in 1889. Examples today are scarce but obtainable, mostly in Mint State grades or thereabouts. This near-Gem specimen is proof-like on both sides, with excellent attractive orange-gold coloration and only a few minor ticks consistent with the grade. Census: 16 in 64, 5 finer (3/11). (#8007)

Gem 1887 Three Dollar Gold The Bass Business Strike

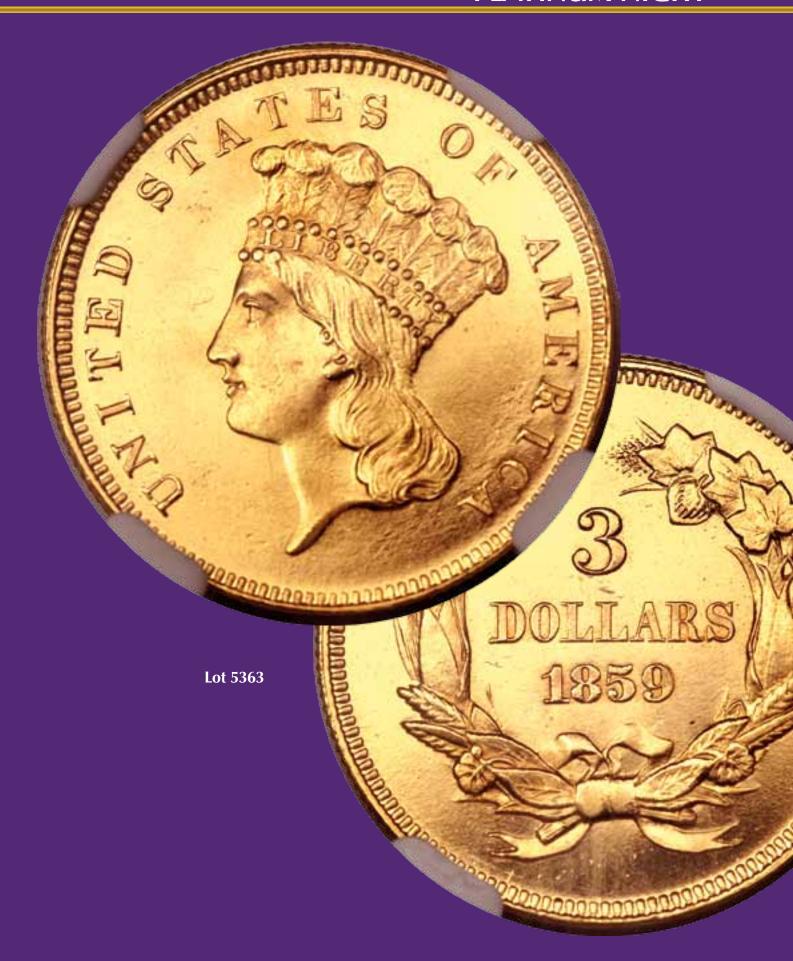

**5361 1887 MS65 PCGS.** Just 6,000 pieces were struck for this late three dollar gold issue, and in the last decade of the denomination, that was the *high* mintage. For the second Bass auction, the cataloger described this Gem representative as follows: "A business strike of remarkable quality, brilliant with much mint lustre, and no prooflike surface. A splendid example of a quality seldom seen." Modern collectors may see the coin as more reflective than that with a mix of straw-gold and sun-yellow color, but if anything, the coin's eye appeal is understated.

Ex: Superior, March 1978; Harry W. Bass, Jr.; Bass II (Bowers and Merena, 10/1999), lot 708. (#8009)

Boldly Struck, Two-Toned 1889 Three Dollar, MS64

1889 MS64 PCGS. The series-ending three dollar gold pieces of 1889 seem to have been saved both by dealers and collectors aware of the low mintages within the series, and perhaps by noncollectors who simply retained the last issue of this odd denomination. This near-Gem is considerably finer than the average survivor nonetheless, and Gem and finer examples seldom appear. This two-toned coin boasts splendid orange-gold color on the obverse, deepening on the reverse to incredible lilac coloration in the center. (Please note that a blemish-fuzzy area that may appear in the photograph in that area is on the holder.) This piece, besides being inordinately attractive, is close to a full strike. A small oval-shaped strikethrough on Liberty's neck provides a pedigree marker. Population: 50 in 64, 38 finer (3/11). (#8011)

### PROOF THREE DOLLAR GOLD PIECES

#### 1859 Three Dollar, PR66 Cameo Possibly the Finest Known Ex: Eliasberg-Trompeter

**1859 PR66 Cameo NGC.** Ex: Kupersmith Collection. The 1859 proof three dollar issue is shrouded in mystery. The original mintage is recorded as 80 pieces in Mint records, although some authors, including David Akers, have stated an unknown mintage. It is probably the case that 80 was the actual proof mintage in 1859. However, mintage figures only tell part of the story.

The number of pieces actually distributed to collectors and other individuals in 1859 is more important than the mintage. Dave Bowers (2005) writes: "Although Mint records indicate 80 Proofs were struck, it must have been the case that no more than a third were ever distributed." A year later, Jeff Garrett and Ron Guth suggested a slightly higher figure: "The number of survivors ... supports a true mintage figure of about three-dozen coins."

The number of known specimens is also uncertain. Our roster shows 17 different pieces, including four in museums, although there is the possibility of duplication among a few listings. Norman Stack estimated six to 10 pieces in 1974, David Akers said six to eight pieces in 1974, revising his estimate upward to 10 to 12 in 1976. Dave Bowers mentioned 11 to 13 proofs in 2005. Regardless of the number known, we believe this piece, from the Eliasberg and Trompeter collections, is the finest or second finest known. NGC and PCGS have certified 17 pieces ranging from PR61 to PR67. The single Superb Gem, certified PR67 Cameo NGC, is currently unlocated.

This lovely specimen has a small lint mark in the field near Liberty's eye, serving as a positive pedigree marker that identifies this coin as the Eliasberg-Trompeter specimen. Both sides have sharp design elements with frosty light yellow surfaces and fully mirrored fields. A few planchet flakes and blemishes are evident on each side but they are inconsequential. A remarkable Premium Gem Cameo proof with a provenance dating back more than 100 years.

#### Roster of 1859 Proof Three Dollar Gold Pieces

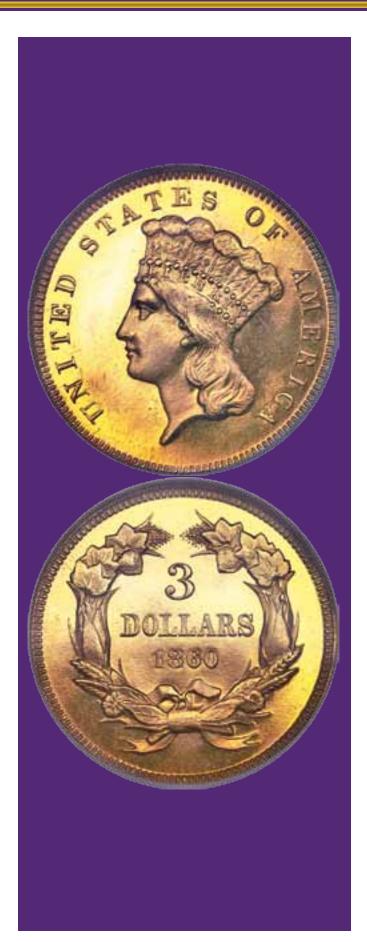

- 1. **PR67 Cameo NGC.** Recorded in the NGC Census Report. Nothing else is known.
- 2. PR66 Cameo NGC. Jewett Collection (S.H. Chapman, 6/1909), lot 909; John H. Clapp; Clapp Estate (1942); Louis E. #### Cameo PR66 1860 Three Dollar

**1860 PR66 Cameo NGC.** The official mintage figures for the three earliest wide-release proof three dollar gold issues — the 1859, 1860, and 1861 — are likely gross mintages rather than net; in the example of the 1860 proof, Garrett and Guth write that despite a stated mintage of 119 pieces, "the true mintage is probably somewhere between 40 and 60 Proofs." That figure is more in line with stated production figures from 1862 to 1864, which ranged 35 to 50 pieces.

The authors make further relevant notes about the 1860 three dollar gold proof, stating that on average, "this date appears at auction less than once a year." While Heritage offered a different example in February 2011 at Long Beach, the knowledgeable collector of proof gold will recognize this as an unusual "bonus" opportunity at the date, since the rest of Heritage's auction history for the issue is sparse indeed.

The mirrors on each side of this Premium Gem specimen have intense sun-yellow color that borders on orange, while the devices show a distinctly lighter tone in addition to their ample frost. The strike is crisp as expected, and though a few tiny lint marks and other imperfections are present (such as a small depression near 3 o'clock on the reverse), the surfaces are carefully preserved overall, with only minor clouding and other flaws precluding an even finer designation. Census: 4 in 66 Cameo, 0 finer (3/11).

Ex: FUN 2005 (Heritage, 1/2005), lot 30433. From The Slotkin Family Trust Collection. (#88023)

#### 1866 Three Dollar Gold, PR64 Deep Cameo A Post-Civil War Rarity in all Grades

**1866 PR64 Deep Cameo PCGS. CAC.** A review of our Permanent Auction Archives, begun in 1993, shows that no proof 1866 three dollar gold pieces have appeared in any of our sales since January of that year. As the public (including the coin collecting public) was recovering from the horrific Civil War, proof gold coins had an extremely limited market. Just 30 proof threes were minted early in 1866, and it is doubtful that all 30 coins found buyers. An unknown quantity was almost certainly melted after remaining unsold. Dave Bowers suggests that only a dozen proofs are known in *The United States \$3 Gold Pieces 1854-1889,* which he co-wrote with Douglas Winter.

Known specimens include a single PR64 Deep Cameo piece in the Smithsonian Institution, and an example in the American Numismatic Society, according to Walter Breen. In addition, the Eliasberg, Garrett, and Brand coins are different, bringing the number of known proofs to five. Beyond those, we know of 22 other auction appearances that may include reappearances of the above, or additional specimens. We concur with the overall proof population of about a dozen different coins, although we are unaware of a specific detailed Census, a near-impossibility for proof gold.

In addition to its proof rarity, the date is also rare in business strike format, with a total estimated population of less than 200 coins in all grades, primarily circulated. Any opportunity to purchase a high-grade 1866 three dollar gold piece, Mint State or proof, is a landmark event. This incredible specimen has brilliant yellow surfaces with deeply mirrored fields and highly lustrous, frosty devices, providing excellent contrast. Slight haze and microscopic hairlines prevent a higher grade. A short mark on Liberty's cheek appears to be a lint mark, and a similar feature is visible on plates of several different examples. Currently NGC and PCGS have combined to grade 16 submissions, undoubtedly representing a much lower number of actual coins. Population: 1 in 64 Deep Cameo, 2 finer (3/11). (#98029)

# Elusive 1867 Three Dollar Gold PR66 Cameo, One Finer at NGC

**5366 1867 PR66 Cameo NGC.** The 1867 three dollar gold has been a rarity within the series in both proof and circulation strike format for quite a long time. The proof production of a recorded 50 proofs complements a meager business strike issue of 2,600 pieces. The useful Q. David Bowers series reference numbers the existing proof coins at only 12 to 15 survivors today. The combined certified populations at NGC and PCGS are certainly padded with resubmissions and the like, but there are 20 certification events combined. The Cameo proofs at PCGS include only two pieces — one each in PR65 and PR66 — while at NGC, this PR66 Cameo is one of two so certified, and a single PR67 Cameo is finer.

Breen proposes in his *Proof Encyclopedia* that there are two die varieties, "possibly identifiable with the earlier and later strikings of 25 apiece." The reverse die here, as Breen describes, shows the left (upright) serif of the 7 under the left tip of the right foot of the A in DOLLARS, but we see no signs on the obverse of minute rust pits that he mentions in D and R. We also note that the 7 in the date is especially heavy in the die compared to the 186, the former individually stamped while the 186 was the product of a gang punch.

Both sides of this stellar and rare three dollar proof are covered in rich, mellow orange-gold coloration, with highly reflective fields and well-frosted devices creating noticeable contrast on each side. To mention any tiny impairments on this coin that may appear under a loupe would overemphasize their importance. This piece should form a real prize for potential bidders, and we expect their cards will fly in the air when it crosses the block. Census: 2 in 66 Cameo, 1 finer (3/11). (#88030)

#### 1876 Three Dollar, PR65 Ultra Cameo Rarely Seen Proof-Only Issue

**1876 PR65 Ultra Cameo NGC.** The 1876 three dollar is an issue analogous to the much-better known 1895 Morgan dollar: Both are only available in proof format. However, the 1876 three is most often compared to the 1875 three dollar, also a proof-only date. The preceding year is distinctly scarcer than the 1876, a situation somewhat muddied by an *official* mintage and speculation about the *actual* mintage of the 1876. Officially only 45 proofs were struck in this year. The first delivery was on February 19, totaling 20 coins. The second delivery came on June 13 with 25 more proofs. Garrett-Guth state: "An unknown number of additional Proofs were made at an unknown date from a different obverse die."

While few collectors care about die varieties of gold coins, especially proof gold coins, Harry Bass was one who did. His study of this issue concluded that there are two dies dated 1876, and the first die has a second die state. The #1 die shows no die rust in the headdress. The second die pair shows rust on the headdress, and no parallel lines are evident in the area of the I in LIBERTY. This particular coin evidences no die rust. A secondary trait of this die pair is graininess in the field or an "aura" around the portrait. This porosity is strongly evident in the obverse fields around the figure of Liberty, and to a lesser degree in the reverse fields. This coin is clearly an original striking, most likely one of the 20 proofs delivered in February, as the June strikings show slight die rust from the same die marriage.

The 1876 three is known to sometimes appear impaired and in lower grades, and it is also unusually available for such a low-mintage issue in high grades and with Cameo and Ultra/Deep Cameo features. This lovely yellow-gold example has the expected depth of mirroring in the fields with sharply contrasting frosted devices. A tiny planchet flake in the field below the bust of Liberty may not be significant enough to aid in tracing the pedigree of this important rarity. Census: 3 in 65 Ultra Cameo, 2 finer (3/11).

From The Slotkin Family Trust Collection. (#98040)

### PROOF FOUR DOLLAR GOLD PIECES

XF Details 1879 Flowing Hair Stella Judd-1635

5368 1879 Flowing Hair, Judd-1635, Pollock-1832, R.3 — Plugged, Harshly Cleaned — NGC Details. XF. The famous pattern, seen here having gone through hard use. One is reminded of Walter Breen's tall tale about stellas appearing on the necklaces of D.C. madams when looking at this coin. It has a prominent plugged hole, which affects the C for "copper" in the obverse legend and much of the word FOUR on the reverse. While the reverse has a decent appearance aside from the obvious plug, the obverse has prominent wear across the portrait, and that side also has the gloss of a harsh cleaning. Yet for many collectors who would otherwise be shut out of owning this famous issue, all the problems taken together won't matter. It's still a stella.

Charles Barber, designer of the Flowing Hair Stellas

### 1879 Flowing Hair Stella, PR63 One of the Most Popular of All U.S. Type Coins

**1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR63 PCGS.** The 1879 Flowing Hair stella is one of the most classic and revered gold rarities in the entire U.S. numismatic series. All four of the 1879-1880 stella issues are patterns in the strict technical sense, a more-or-less-hairbrained numismatic experiment doomed to failure from the outset. But the 1879 Flowing Hair stellas are a special case, with much larger mintages than the three other types and fervidly sought alongside regular-issue U.S. coins by gold type collectors

The 1879 Flowing Hair stellas were produced in an unknown quantity that numbers at least several hundred pieces. For long years the story has circulated that there were 15 "originals" made in 1879 that lack planchet striations on Liberty's head. This was supposedly followed by a second, much larger restrike quantity in 1880 - perhaps 400-700 pieces in all — with those coins showing the planchet striations. As far as we can determine today, the story about the 15 originals has no basis in fact. The latest (10th) edition of the Judd pattern reference diplomatically states, "All gold impressions seen have parallel planchet striations near the top of the hair." Our experience is the same, and we have handled quite a few 1879 Flowing Hair stellas over the years: All show planchet striations on one or both sides, which we believe can be traced to the cut-down, thinner half eagle planchets used in the manufacture of these experimental coins. (The ultimate test would be metallurgical assay tests proving that stellas exist in the nominal metric alloy and weight claimed on the obverse, seven grams total weight that is six-sevenths gold, with the remaining one-seventh alloy that is three-tenths silver and seven-tenths copper. Such coins would almost certainly have to lack planchet striations, as they could not be made from cut-down planchets made of the 90/10 gold/copper standard alloy of federal gold coinage.)

This piece certainly displays the ubiquitous die striations. They are light on the obverse and remarkably strong over the star ("stella") on the reverse. The fields are moderately reflective, and unlike many stellas, there is minimal contrast between the fields and devices. The only two distinctive contact marks are in the lower left obverse field to the left of Liberty's neck. (#8057)

### 1879 Flowing Hair Stella, PR64 A Conservatively Graded Example of This Popular Experimental Gold Coin

1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR64 PCGS. CAC. Prior to the official adoption of the euro, any traveler in Western Europe would have had a similar experience in exchanging the currencies of those nations, during the time when the euro had been officially adopted as an accounting currency but not yet launched as a circulating medium.

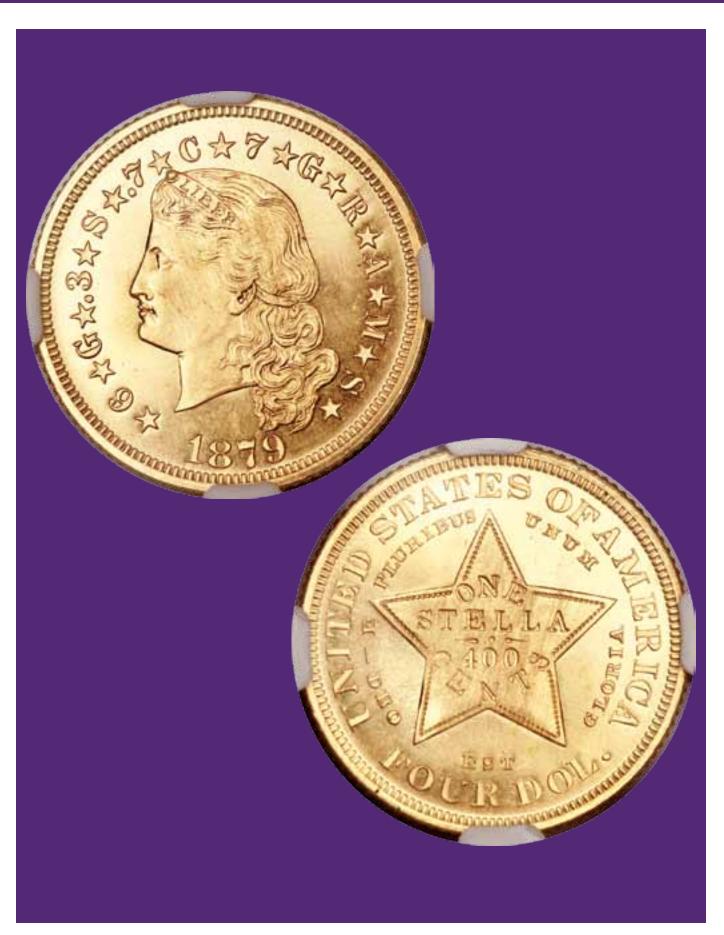

The traveler was likely to pile up a hefty pocket (or purse) full of Dutch guilder, Italian lire, British and Irish pounds, German marks, Swiss and French francs, and fractional equivalents thereof. The shiny new Italian 10- and 20-lire coins were attractive but worth next to nothing — especially with the costs of currency exchanges tacked on. The story was the same for the other nations' fractional currencies, nicer saved (if one is a coin collector) than exchanged at another loss. The elegant French 1999 one franc coins featured *La Semeuse*, the sower. Elizabeth II gazed out from the obverse of the British pounds, with the Welsh, Scottish, Northern Irish, and Royal Arms reverses to distinguish them. The Swiss Helvetia coins were simple and dignified, with classic beauty.

Building up a nifty collection of modern European coins was easy, and often inevitable. On tight timetables, perhaps with no car, business travelers would be forced to do all currency exchanges at airports — first from dollars to Dutch guilder if arriving in Amsterdam, then on to pounds in the United Kingdom, to Swiss or French francs, Italian lire, German marks, Spanish pesetas, on and on the merry-go-round of currency exchanges would go. Each border crossing would create a small pile of leftover small-denomination bills and coins, since none of the exchanges were exact. Striving to maintain intelligible records of how much was spent on business and how much was lost in each mandatory exchange became a near-impossibility.

For centuries until the phased introduction of the circulating euro coins and notes between 1999 and 2002, it was little different for travelers from one European country to another. While the common euro currency at least has solved the cross-border exchange problem within the Euro Zone, the euro today, of course, fluctuates against other countries — sometimes violently so, given the recent European sovereign debt crisis.

The stellas in theory were a purported solution to such dilemmas by introducing an international currency. But in practice, they were fraught with their own problems. They were an effort to produce a currency that would exactly equal a set amount in several other established European denominations. However, those values fluctuated against each other and against any other relative measures, just as currencies do now. *The stella's only success was in equaling none of them.* It also faced the added challenge of being little different from the U.S. five dollar gold coin, which was well established as a tool of international commerce.

The first-generation holder that encases this piece gives no indication of the considerable contrast between the deeply mirrored fields and the frosted devices. At the time this coin was certified, no thought was given to Cameo designation except for Morgan dollars. The surfaces on each side have pronounced reddish-gold color with occasional dashes of lilac interspersed. The shallow striations that are always seen on the figure of Liberty are light and run vertically on this piece. This conservatively graded stella should see considerable interest from bidders and collectors interested in this 19th century experiment in standardized coinage. (#8057)

#### 1879 Flowing Hair Stella, PR65 Cameo Remarkably Well-Preserved Specimen

1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR65 Cameo NGC. In 1866 Congress passed the Metric Act, written by Rep. John A. Kasson, then-chairman of the House Committee on Coinage, Weights, and Measures. In March 1867 William Darrah "Pig Iron" Kelley, a Philadelphia native, would assume the chairmanship of the committee, serving through 1873. Kasson, during the next two decades, would serve in some local lowa state posts as well as on a couple of important European assignments — one to an international postal convention, one as Minister Plenipotentiary to Austria-Hungary.

The 1866 Metric Act is sometimes referred to as the Kasson Act, under which:

"It shall be lawful throughout the United States of America to employ the weights and measures of the metric system; and no contract or dealing, or pleading in any court, shall be deemed invalid or liable to objection because the weights or measures expressed or referred to therein are weights or measures of the metric system."

Kasson laid out his motives for legalizing the metric system in a report to the 39th Congress in 1866, pointing out that the system "is already used in some arts and trades in this country, and is especially adapted to the wants of others." He wrote further, however, that:

"Its minute and exact divisions specially adapt it to the use of chemists, apothecaries, the finer operations of the artisan, and to all scientific objects. It has always been and is now used in the United States coast survey. Yet in some of the States, owing to the phraseology of their laws, it would be a direct violation of them to use it in the business transactions of the community."

Although Kasson is usually credited with the stella proposal, Robert W. Julian in an (undated) article in *Coins* magazine titled "From Goloid pattern to \$4 coins" puts the idea squarely at the feet of eccentric Philadelphia inventor Dr. William Wheeler Hubbell. Hubbell in 1877 received a patent for his "invention" of goloid metal, a mix of gold and silver that was really just a variant of electrum, which the Lydians had used to strike their first coinage around 600-700 B.C.

In early 1878 Hubbell, through his political connections, succeeded in getting goloid and goloid metric dollars produced (Judd-1557, 1560, 1563), which failed miserably. Even though they contained varying amounts of gold, they were indistinguishable from coins made out of normal coin silver.

The 1879 and 1880 stellas, in both Coiled Hair and Flowing Hair designs, also loudly broadcast their content in even metric weights, although the curious net gold fineness is purportedly six-sevenths, or 85.14%. (The stellas do contain an even metric weight of seven grams.) The 1879 Flowing Hair stellas were offered to congressmen — enraging collectors of the day — in three-piece sets with the 1879 metric dollar (Judd-1617/1618) and the 1879 goloid dollar (Judd-1626/1627).

Julian writes:

"For some unexplained reason John Kasson, a former congressman, is given credit for Hubbell's strange ideas. Supposedly Kasson thought that the \$4 coin would exchange nicely with the French 20-franc gold, even though the latter was worth about \$3.86, not \$4. Kasson would have known better. Hubbell did not and should get all the credit, or blame, for the idea of a Stella coin."

This is, of course, in direct contradiction to the Judd reference (edited by Q. David Bowers) and numerous other authorities, including Walter Breen and Jeff Garrett and Ron Guth. Despite the details concerning their genesis, all numismatists today would concur that the stellas are celebrated rarities whose auction appearances are certain to incite spirited bidding.

The wonderfully preserved surfaces of this unusual experimental coin radiate bright yellow-gold color with deeply mirrored fields and sharply contrasting mint frost over the devices. Extremely light die striations traverse the face of Liberty, as always. Close examination with a loupe reveals a few tiny planchet flakes and a thin mark in the left obverse field. Census: 15 in 65 Cameo, 27 finer (2/11). (#88057)

#### **EARLY HALF EAGLES**

### 1796/5 Half Eagle, AU55 Small Eagle Reverse, BD-1 Only Variety of the Date

1796/5 Small Eagle AU55 NGC. Breen-6418, BD-1, High R.4. The 1796/5 Small Eagle five dollar gold piece is one of the important rarities in the early half eagle series. The obverse has a prominent overdate, one of the earliest overdates from the Philadelphia Mint. Two 1796 over 5 overdate varieties were minted in Philadelphia, the half dime and half eagle. They are the first two overdates in American coinage. It is impossible to know exactly when they were each coined, although the Mint's delivery records suggest that the overdate half dime was probably coined before the half eagle. Regardless, this single variety is the first overdate in American gold coinage.

Following 12 1795 Small Eagle varieties, just one was produced in 1796, despite a similar annual mintage. The only explanation is that 1795 dies were still serviceable, and remained in use through most of 1796. Finally, the 1796-dated obverse die was engraved and placed into use. It is impossible to know how many were actually struck, although John Dannreuther estimates that only 1,057 to 2,000 coins carried the 1796 date from the annual production of 6,196 coins.

Less than 10 Mint State 1796/5 half eagles are known, despite a higher certified population. This Choice AU specimen is similar in quality to the Harry W. Bass, Jr. coin that is now on display at the ANA museum in Colorado Springs. Both sides have lustrous greengold surfaces with only a few insignificant blemishes. The strike is sharp and the eye appeal is quite strong. A small color spot is evident at the obverse rim, below the 1 in the date, and a few light adjustment marks show in the cap and hair. Census: 4 in 55, 23 finer (3/11). Ex: Public Auction Sale (Stack's, 6/1995), lot 799; FUN Signature Auction (Heritage, 1/2011), lot 5078. (#8067)

AU BD-4 1800 Five Dollar Distinctive Blundered M Variety

5373 1800 AU50 PCGS. CAC. Breen-6439, BD-4, R.4. The final die state with cuds reaching the NIT in UNITED and the first T in STATES. A widely repunched M in AMERICA identifies the scarce die marriage, one of five known for the 1800 half eagle. Harry W. Bass, Jr. wrote in his journal that the M was "cut over a much larger previous M," a possibility since recutting is visible on both sides of the M. It is more likely, however, that the M was lightly entered two or more times before the die engraver determined the ideal position. A charming lightly circulated yellow-gold example. Luster brightens the stars, legends, curls, clouds, and eagle. A loupe locates only three mentionable marks, two on the right obverse field and the third near the right border of the scroll. Housed in an old green label holder. (#8082)

1802/1 BD-7 Half Eagle, AU58 High Overdate Obverse

**1802/1 AU58 NGC. Breen-6440, BD-7, R.5.** Two different overdate obverse dies were used for the 1802 half eagles, each die earlier readied for a nonexistent 1801 half eagle coinage. The 2 joins the bust on this obverse and is separated from the bust on the other die. The reverse die for BD-7 has defective Ts in the legend, each missing the right base. Delicate clash marks are visible on the obverse of this near-Mint example.

Both sides have satin luster with yellow-gold surfaces and overtones of green and orange. Numerous tiny surface marks are visible but trivial. This pleasing piece, while still a rare die pairing, represents an available one within the series context, ideal for a date or type collection. (#8083)

Choice AU 1804 Capped Bust Right Five Small 8 Over Large 8, BD-6

**5375 1804** Small 8 Over Large 8 AU55 NGC. Breen-6442, BD-6, R.5. More than 30,000 Capped Bust Right half eagles were minted in 1804, with seven die varieties known for the date. The present coin represents the BD-6 variety, recognized by the overpunched 8 in the date and a spine that runs from the tip of a leaf to the upper part of R in AMERICA. John Dannreuther believes the BD-6 variety probably accounted for 2,000-3,000 pieces of the original mintage, with only 35-45 examples surviving today in all grades. This coin is from Die State a/b, with the reverse displaying bisecting die cracks, one from the edge at 7 o'clock to the rim above A in STATES, and another from the edge at 5 o'clock to the rim above O in OF. This specimen is sharply detailed, with just a trace of high-point wear and brightly lustrous greenish-gold surfaces. Census: 8 in 55, 53 finer (3/11).

Yellow-Gold AU58 1805 Five Dollar, BD-1

**5376 1805 AU58 PCGS. Close Date, Breen-6445**, **BD-1, High R.3.** Bass-Dannreuther Die State Obverse a-b/Reverse c. The 1 in the date has a left foot, star 13 touches the bust front, and star 9 touches the Y in LIBERTY. The die state seems transitional, as there is an obverse crack through the date, head, and cap but not yet to the B, and neither is there a die scratch through the cap to star 8. On the reverse a crack joins the letter tops of UNITE. This splendid yellowgold piece is certified in a small-size green-label holder. Minor rub in the fields and light contact evidence are in accord with the grade. The most available die pairing for the year, and an excellent example for type or date purposes. (#8088)

BD-1 1805 Half Eagle, MS61 An Uncommon Early State

5377 1805 MS61 NGC. BD-1, High R.3. Bass-Dannreuther Die State a/a, without the die crack that formed quickly through the third digit in the date. *Early U.S. Gold Coin Varieties* notes that while four Bass coins with varying cracked die states were sold as part of the Bass Collection, the example in the core holdings was uncracked like the present coin.

Orange-inflected yellow-gold surfaces are appreciably reflective, even flashy. The strike is decent and abrasions are generally wispy, though a depression at the upper left part of the shield is ambiguous. Nonetheless, this is a high-appeal coin that displays well. (#8088)

1807 Bust Right Five Dollar, AU55, BD-3 Rare Variety, Higher-Graded Example

5378 1807 Bust Right AU55 NGC. Breen-6450, BD-3, High R.5. Obverse State b/Reverse State c. The mintage for this variety is estimated between 2,500 and 5,000 pieces, but apparently most of this mintage was dropped into circulation and heavily used. As a result, of the 35-45 pieces believed known today, many are lower-grade. This Choice AU example is well-defined and well-balanced from side to side. Pronounced reddish-gold color appears over both obverse and reverse, and the fields display numerous (but individually insignificant) abrasions from contact with other coins in the channels of commerce in the early 19th century. (#8092)

1807 BD-5 Half Eagle, AU58 Rarest Variety of the Issue

1807 Bust Right AU58 PCGS. Breen 3-C, Breen-6451, BD-5, High R.6. This late die state shows extensive obverse and reverse cracks. The obverse has a crack down from the upper border to the upright of the B, the cap, and the hair, with a branch to the eye, mouth, and field, eventually reaching star 12 and the border. Another crack from the lower border between the 1 and 8 continues through the hair and cap to the border at 11 o'clock. The reverse has a crack through the N and arrows, reaching the shield at the junction of the left wing. This appears to be the terminal die state, equal to lot 783 in the Bowers and Merena October 1999 sale of the Bass Collection, although the description of that coin calls the reverse perfect. The reverse crack is visible in the photo of that coin.

The late Harry Bass owned two examples of this extremely rare variety. John Dannreuther suggests that 18 to 22 examples are known, although our own research indicates the actual population is probably only about 10 to 12 pieces. Either population scenario makes it the rarest 1807 half eagle variety. Both of the Bass coins are Mint State, and the present specimen, housed in a first-generation PCGS holder, appears to be third finest.

The surfaces have nearly full luster with brilliant orange-gold color and delicate green overtones. Faint adjustment marks at the right obverse border create some design weakness at that area. Minimal marks on each side include a small reverse rim imperfection, probably a planchet flaw, at 1 o'clock. As the third finest known example of the BD-5 die marriage, and the second finest available to collectors (the finest is retained in the Bass core collection), this piece will appeal to the small number of early half eagle variety enthusiasts. (#8092)

1807 Bust Left Half Eagle, BD-8 AU53 With CAC Gold Label

**5380 1807 Bust Left AU53 PCGS. CAC Gold Label. Breen-6453, BD-8, R.2.** This piece with the CAC Gold Label is an important memento of the John Reich redesign of U.S. coinage, an effort that would begin in 1807 with the half eagle and half dollar, the two most important circulating U.S. coins. (The large cent and quarter eagle would follow in 1808.) On the BD-8, the feather tip points to the flag tip of the 5. The surfaces display medium orange-gold color. Significant mint luster surrounds the devices on each side, enough to suggest an even higher grade when luster alone is considered. The piece is well struck overall and there are no mentionable marks, just a shallow planchet flake at the back of Liberty's jawline. (#8101)

1807 BD-8 Half Eagle, MS63 Capped Bust Facing Left

**1807 Bust Left MS63 NGC. Breen-6453, BD-8, R.2.** Two die varieties are known for John Reich's new half eagle design that made its first appearance in 1807. The BD-8 offered here is plentiful in all grades, while the BD-7 is a rarity. The obverse of this example has prominent clash marks in the hair and around the ear from the horizontal and vertical shield lines, as well as another minor clash mark below the bust from the ribbon.

Examples of this variety are known in all grades, including Mint State, and are prime candidates for type collectors. This piece has sharp central details with some peripheral weakness. Both sides are frosty and brilliant with bright yellow surfaces. It is a lovely coin. Census: 27 in 63, 27 finer (3/11). (#8101)

1810 Small Date, Tall 5 Five Dollar, BD-1 Unc Details, Good Remaining Luster

**5382 1810 Small Date, Tall 5** — **Reverse Damage** — **NGC Details. Unc. Breen-6462, BD-1, High R.3.** Die State b/b, intermediate. This state shows the diagnostic crack from stars 3-6, light clashing at the top of the left wing, but it also shows the faint crack under OF, which is characteristic of die state c. However, there are no traces of die rust that are part of Obverse c/Reverse c coins. It is estimated that 150-225 examples are known today of this variety. This is an interesting coin, and it should prove to be a good buy for some value-conscious collector. The surfaces retain generous amounts of mint luster, the only exception being the reverse fields where there is unnatural brightness above the eagle and in the field in the lower right. Something like smoothing has been done, but it is not immediately obvious to the unaided eye. The strike is well brought up, but not complete with a few faint roller marks across Liberty's hair.

### Select 1812 Wide 5D Half Eagle BD-1, Exceptional Eye Appeal

**5383 1812 MS63 PCGS Secure. Wide 5D, Breen-6466, BD-1, R.3.** A magnificent example of John Reich's Capped Bust type. The rich golden-brown and olive-green toning is clearly original, and both sides are beautifully void of abrasions. A few faint roller marks on the cheek and cleavage are as made, as is the curious curved die line through the shield that is diagnostic for BD-1. Minor die erosion is present on the field beneath the B in PLURIBUS, but this is an early die state, without evidence of clash marks. The strike is sharp throughout, and the eye appeal is superior for the MS63 grade. A wonderful coin that has been carefully preserved since Madison's day. (#8112)

#### 1813 Half Eagle, BD-1, MS65 Fabulous, Swirling Mint Luster None Finer at NGC

**1813 MS65 NGC. Breen-6467, BD-1, R.2.** Bass-Dannreuther Die State a/a. The BD-1 die pairing seems to have produced the lion's share of half eagles for this year, as only two marriages are known and the BD-2's rarity clocks in at R.4. Bass-Dannreuther estimate that the split is somewhere around 70:30 to 80:20 in favor of the BD-1, out of the total mintage exceeding 95,000 coins for the year.

The two varieties share a common obverse, with different reverses. On the BD-1 reverse, the first S in STATES is positioned over the right side of the E on the scroll below. The D in the denomination 5 D. appears to lean left in relation to the 5. The middle arrow points to the left side of the foot of the upright of R, while the lowest arrow points to the center of I.

Although the mintage of the 1813 half eagles is about that of the 1810 and 1811 issues, it appears likely that more of the 1813 fives were saved due to the changeover from the Capped Bust to Left design to the Capped Head to Left style — to use the *Guide Book* terminology. This is a fortunate circumstance, as the date and the BD-1 variety serve as excellent stand-ins for the type, among the most challenging in all of American numismatics.

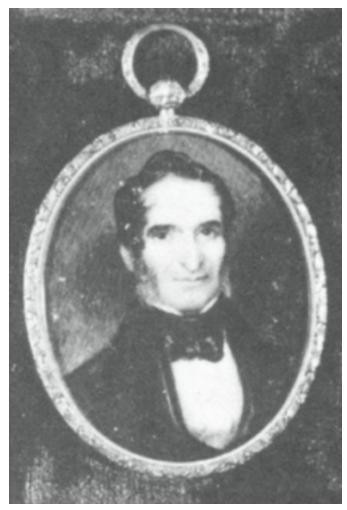

Clearly, this piece is struck from fresh dies early in their useful life, another serendipity. Fabulous, swirling mint luster rolls around both sides, complementing rich orange-gold color interspersed with faint lilac accents. The strike is sharp overall, with minor softness on the eagle's left (facing) wing, an area that also displays shallow roller marks. The only mentionable abrasion is between stars 11 and 12. Census: 5 in 65, 0 finer (2/11). (#8116)

#### LIBERTY HALF EAGLES

1839-D Five Dollar, Choice AU A Pleasing, Problem-Free Example

5385 1839-D AU55 PCGS. CAC. Variety 2-A. Of the 125-150 pieces known of the 1839-D half eagle in all grades, only 25-30 individual coins are believed known in AU. As an Obverse Mintmark type coin and the only year with the Liberty design, this is certainly an attractive example. The striking details are well brought up on each side, and these same design motifs show just a bit of high point wear. Traces of mint luster can be seen surrounding the devices, and the bright yellow-gold surfaces show occasional splashes of deep reddish-gold patina. The 1839-D is rarely offered in mint condition, and this problem-free Choice AU certainly makes a wise choice for the collector of D-mint fives. Population: 8 in 55, 9 finer (3/11). (#8193)

Chief Engraver Christian Gobrecht

# 1842-C Small Date Five Dollar, MS61 Series Key and Third Finest Known

**1842-C Small Date MS61 NGC. Variety 1.** Die State I. The 1842-C Small Date is the rarest Charlotte half eagle, and is the second rarest issue of all Charlotte coins, trailing only 1849-C Open Wreath gold dollar. Only 4,595 pieces were originally struck, and it is estimated that today a mere 60-80 coins are extant in all grades. Current population data from NGC and PCGS (3/11) indicates that seven pieces have been certified in mint condition between the two services. We seriously doubt that represents seven individual coins, as several years ago this issue was considered unique in Uncirculated (the Ex: Elrod coin). In Doug Winter's latest Charlotte reference (2008) this coin is listed as third finest on his Condition Census, a list that begins with AU58 and tops out at MS62.

The striking details are exceptionally well defined on this coin. The hair curls and peripheral stars are strong with the only area of weakness being the feathers on the eagle's neck, as always seen. The few survivors of the 2,555 pieces struck from Die State I are generally sharply struck and they are especially well defined when compared to the Die State II coins. As an aside, approximately three-quarters of the known examples of the 1842-C Small Date are from the Die State II dies, which show a rim cud at 12 o'clock on the obverse. The surfaces overall are quite clean and show only minimal abrasions for this usually extensively abraded issue. As with many Charlotte and Dahlonega coins, the fields are semireflective, no doubt from the minimal usage of the dies, and the coin shows light green-gold coloration overall.

The collector of Charlotte gold would be well advised to bid generously on this coin, as another Mint State example may not be on the market for many years.

Ex: 2004 FUN Auction (Heritage, 1/2004), lot 3021, where it brought \$77,625. (#8208)

1843 Five Dollar, MS64 Early No Motto Type Coin

5387 1843 MS64 NGC. The production of Philadelphia Mint Liberty Head half eagles increased exponentially in 1843, to a whopping total of 611,205 examples (only 27,578 pieces were minted the previous year). Few examples of this prodigious mintage were saved for numismatic purposes, and high-grade specimens are quite rare today. Current data from the grading services reveals NGC has certified 10 examples in MS64, with a single specimen finer, while PCGS has graded only three coins at the Choice level, with none finer (3/11).

The present coin is an attractive Choice specimen, displaying areas of prooflike reflectivity in the fields. The design elements are sharply defined, and the surfaces are a pleasing greenish-gold color, with highlights of rose. (#8213)

1851-C Five Dollar, MS61 Possible Condition Census Coin

**5388 1851-C MS61 NGC. Variety 1.** In overall rarity the 1851-C five is a moderate rarity, but as a high-grade rarity it ranks fifth in the series. This example is atypical for the issue, with a much stronger strike than expected and cleaner surfaces than normally encountered. The only mark of note is a shallow planchet flake between the eagle's right (facing) wing and the upper arrow, hardly a distracting element. The 1851-C is rarely seen in mint condition. This piece may, in fact, be in the Condition Census. The finest two pieces listed in Doug Winter's reference are an MS63 and MS64. Only four pieces have been certified by NGC in MS62 with five in finer grades, including the obvious resubmissions (3/11). (#8247)

1853-D Large D Liberty Five, MS61

5389 1853-D Large D MS61 PCGS. CAC. Variety 29-V. Large D free of the stem and feather. The 1853-D Liberty half eagle is an available date in the context of the series, from a mintage of 89,678 pieces. The date is scarce in higher AU grades, and Mint State examples are rare. Doug Winter estimates 275-325 examples are extant in all grades, with 15-20 coins in Mint State.

The present coin is an attractive Mint State specimen, with lustrous orange-gold surfaces. The design elements are sharply detailed, except for a touch of softness on the star centers and the eagle's claws. Population: 7 in 61, 14 finer (3/11). (#8255)

1856-O Five Dollar, MS61 Third Finest on the Condition Census Ex: DiBello, Bass

5390 1856-O MS61 PCGS. Variety Two. Ex: Bass. This variety is the scarcer of the two known of this issue and is characterized by slight recutting at the top of the 1 in the date. As usual with this variety, the first three stars are weakly defined. Only 10,000 pieces were struck and it is estimated that 80-90 individual coins may still exist today. Doug Winter lists six Uncirculated examples in his latest New Orleans reference. This coin is listed as #3 on his Condition Census. This distinctive piece has bright, shimmering prooflike fields on each side. The strike is strong throughout, except for the first three stars as mentioned. Both sides are peppered with numerous small abrasions, but this coin lacks the heavy marks usually seen. The lemony yellowgold color has an accent of light reddish patina on each side.

Ex: Gaston DiBello Collection (Stack's, 5/1970), lot 906; Bass II (Bowers and Merena, 10/1999), lot 1088.

From The Orchid Collection. (#8269)

1858-C Five Dollar, MS62, Rare Variety 2 Possible Finest Known

**1858-C MS62 PCGS. Variety 2.** Doug Winter reports in the latest edition of his *Gold Coins of the Charlotte Mint* that he "was ready to delist this variety," as he "had not seen any in many years." He credits Heritage's own Mark Borckardt with identifying an example in a September 2008 auction and noting several other auction appearances.

This is not only a high-end 1858-C half eagle, it is also a representative of Variety 2. The obverse is the same as Variety 1, but on the reverse the mintmark is further to the right and closer to the branch. This example's yellow-orange surfaces are luminous, with areas of planchet roughness in the fields tinged in lavender. Better-defined than usually seen with only a few significant marks, though Liberty's brow is abraded. Population: 4 in 62, 0 finer (3/11). (#8277)

1876-CC Five Dollar, AU58 Lower Condition Census Quality

5392 1876-CC AU58 NGC. All gold coins of the Carson City Mint are popular and highly desired, and nearly every issue is a rarity within its series. Certainly that is the case with this issue, from a mintage of just 6,887 coins. Few of those have survived in any grade, and exceedingly few that are nicer than this. NGC has only certified one example of this date in a higher grade. Of the 10 AU58 coins, we firmly believe that only a couple of different coins are represented. This splendid specimen offers pleasing light yellow-gold color accented by wisps of red toning. The surfaces exhibit only a few minor blemishes and retain nearly full luster. This is an important opportunity that the specialist should not miss.

Ex: 2006 FUN Auction (Heritage, 1/2006), lot 3495. (#8340)

High-Grade 1876-S Five Dollar, AU55 San Francisco Mint Rarity

**1876-S AU55 NGC.** A rare, low-mintage S-mint half eagle, the 1876-S has the second lowest mintage of all S-mint fives struck between 1858 and 1876, with only 4,000 pieces produced. The available number of coins is thin in all grades, and AU specimens are of the utmost importance. Showing only a bit of striking softness at the obverse border, the surfaces overall are relatively clean and problem-free, with no overly obvious marks on either side. Generous luster remains throughout, and bright golden color prevails over both sides. Census: 6 in 55, 4 finer (3/11).

Ex: 2006 FUN Auction (Heritage, 1/2006), lot 3496. (#8341)

Near-Mint 1883-CC Five Good Remaining Luster and Well-Struck

**1883-CC AU58 PCGS.** Only slight loss of the mint luster is seen in the fields on each side, and there is little evidence of actual friction or handling from circulation. The striking details are strong on each side with only faint evidence of the usually seen softness on the hair curls around Liberty's face. The 1883-CC is a moderately scarce Carson City five that is rated ninth out of the 19 CC fives in overall rarity and 12th in rarity in high grade. Like the other 1883-CC in this sale, the surfaces on this piece are exceptionally clean for the issue. (#8362)

1883-CC Five Dollar, AU58 Tied at the Lower End of the Condition Census

mintage of 12,958 pieces, but it is much scarcer than suggested by the production numbers. Most 1883-CC fives saw some degree of circulation, most of them stayed in the channels of commerce for a considerable amount of time. Only 100-125 pieces are believed extant in all grades today, and of that paltry estimate a mere 23-28 coins are thought to still exist in AU grades. Mint State coins are very rare with only 3-4 pieces believed known. In Doug Winter's latest work on the Carson City mint gold coins, he lists multiple AU58 coins as tied at the lower end of the Condition Census. Lacking the usual heavy abrasions seen on this issue, the only notable marks are a couple in the lower left obverse field. The surfaces are reddish-gold with considerable mint luster surrounding the devices. The usual slight softness of strike is seen on Liberty's hair around the face and the eagle's neck feathers. (#8362)

1892-O Liberty Half Eagle, MS62+ Just Two Finer PCGS-Certified Coins

**5396 1892-O MS62+ PCGS.** Some might call the 1892-O half eagle a "hidden" rarity in the series from a mintage of only 10,000 coins. Clearly the New Orleans Mint had more pressing matters than the coinage of half eagles in 1892. It was the year that the new Barber design was introduced among smaller silver coins with a production of almost 7 million coins. That same year, nearly 3 million silver dollars were minted. Only half eagles and eagles were minted among gold coins at New Orleans in 1892.

This lovely specimen has frosty yellow luster with a hint of green. Both sides have excellent design definition including sharp central and peripheral details. Surface marks are minimal and consistent with the grade. Population: 1 in 62+, 2 finer (3/11). (#8381)

**5397 1900 MS67 NGC. CAC.** The 1900 Liberty half eagle is popular as the first date of the millennium, from a large mintage of 1.4 million pieces. The date is not difficult to locate in Mint State but, to quote Jeff Garrett and Ron Guth, "Any U.S. gold coin in superb condition is very rare." The present coin is a spectacular Superb Gem, with razor-sharp details on all design elements, including Liberty's hair and the eagle's claws. The surfaces are an attractive yellow-gold color, with subtle reddish highlights. The fields are virtually unmarked, with vibrant mint luster and tremendous eye appeal. Census: 3 in 67, 2 finer (3/11). (#8400)

#### PROOF LIBERTY HALF EAGLES

### 1860 Half Eagle, PR64 Ultra Cameo Only 10-12 Proofs Estimated Extant Ex: Ten Eyck, Clapp, Eliasberg, Trompeter

1860 PR64 Ultra Cameo NGC. The mintage for 1860 proof fives is an unrealistically high 62 pieces. From 1858 through 1861, Mint Director James Ross Snowden ordered many more proofs to be produced on speculation than could actually be sold by the Mint. Coin collecting did indeed grow in popularity beginning in 1858, but not to the extent that Snowden perhaps wished. Undoubtedly wanting to maximize the sale of proofs, and thus increase the popularity of collecting, it was a simple matter to overproduce and at year's end melt the unsold proofs. This is most notable among subsidiary coinage, but it can also be seen on an issue such the 1860 five dollar. It is highly doubtful that there were 62 collectors in the country who could actually set aside a proof half eagle in 1860. The estimate of the number of survivors gives us a better idea of the net proofs sold after melting. It is generally estimated that 10-12 proofs are known today. If we assume a 50% survival rate (a generally accepted percentage for most proof gold coins), then the net mintage would have been around 20-24 pieces, leaving around 40 proofs melted at year's end as unsold.

This is the Ed Trompeter coin, and it is a magnificent example. It is identifiable as the Trompeter specimen by the almost-straight lint mark off of the left point of star 8, and several distinctive planchet depressions and lint marks to the left of the leftmost leaf on the reverse. The surfaces exude rich reddish-gold color. The fields are deeply mirrored and appear "black," giving the frosted devices a strong background which produces the Ultra Cameo contrast. This is the only Ultra/Deep 1860 five dollar certified by either of the major services. Only seven certification events have been recorded by both NGC and PCGS in all grades and with all finishes (3/11). That number is probably close to the total number known in private hands. The Smithsonian has two examples in its permanent collection.

Ex: James Ten Eyck Collection (B. Max Mehl, 5/1922); John H. Clapp Collection, 1942; Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 496; Ed Trompeter Collection, sold privately by Heritage in 1999. From The Slotkin Family Trust Collection. (#98450)

### 1873 Half Eagle, PR65 Ultra Cameo Only 10-12 Pieces Believed Known

**5399 1873 Closed 3 PR65 Ultra Cameo NGC.** All the proofs known for the 1873 five dollar are of the Closed 3 variety. A mere 25 proofs were produced, and this piece is among the finest known. The numbers certified by both NGC and PCGS are clearly enhanced by numerous resubmissions as 21 pieces show to have been certified in all grades and all finishes from PR40 to PR65 Ultra Cameo. The misleading certification numbers for this date were recognized and commented upon by Garrett-Guth in their 2006 reference: "The number of coins certified by the major grading services can be ignored for this issue, as they are high inflated by resubmissions." The 1873 proof five dollar is just as rare as the other low-mintage proofs from the 1860s and 1870s, and probably no more than 10-12 individual coins are known today.

Proof gold from the 1860s and 1870s is extremely rare and seldom offered. Mintages varied from a high of 66 pieces in 1861 to a low of 20 coins, represented by multiple dates in the 1870s. For almost all of these dates the number of survivors is consistent and extremely low, usually from 8 to 12 pieces.

This exceptional proof striking displays intricate detailing, and each side is draped with a significant presence of reddish patina. On the obverse there are five tiny marks that identify this coin, all are either on the chin of Liberty or in the field just in front of the chin. The surfaces have mild orange-peel texture, a common characteristic on proof gold coins in the latter half of the 19th century. Census: 3 in PR65 Ultra Cameo, 1 finer (3/11).

Ex: Atlanta Rarities Sale (Bowers and Merena, 1/2001), lot 378; 2006 Baltimore Auction (7/2006), lot 1614.

From The Slotkin Family Trust Collection. (#98468)

#### 1876 Half Eagle, PR66 Cameo First Proof Offered at Auction Since 2006

1876 PR66 Cameo NGC. We submit that this specimen is almost certainly the finest known proof 1876 half eagle. It is tied with one other example for the finest numerically graded proof of this date, both certified PR66 Cameo by NGC. These are the only two pieces (assuming there are two examples) graded by either service at this grade level, regardless of contrast. Two examples certified as PR64 Deep Cameo are the best that PCGS has certified. Like the other proof gold coinage of 1876, just 45 examples were coined, with 20 of these delivered on February 19, and the other 25 coins delivered on June 13. Possibly 20 examples survive today, probably fewer. It is worth noting that this is the first 1876 proof five, of any grade or finish, to have been offered at public auction since 2006.

How many die varieties are known for the 1876 proof half eagles? In his Proof Encyclopedia, Walter Breen identified a proof variety that he called B-1: "Low date, left base of 1 over left edge [of a dentil], lump on neck just below jaw, vertically above 1." He continued to describe a business strike variety that he called B-2: "lump on cheek, vertically below pupil, on level with earlobe; left base of 1 above space." The coin offered here, clearly a proof example, matches Breen's description for B-2. Further, two examples that we sold in the 2006 FUN Auction, each graded by NGC as PR65 Ultra Cameo, were struck from two different obverse dies, representing each of the two varieties Breen describes. There is no question that those coins were both proof examples. We have now identified two different die varieties and can speculate that one was used for the February delivery and the other for the June delivery, but we clearly cannot assign a specific variety to the two deliveries. Until now, it was believed that all 1876 proof half eagles were struck from a single die pairing.

This example has remarkable aesthetic appeal with lustrous devices and deeply mirrored fields. Both sides have rich orange-gold color in the fields with lighter yellow-gold on the devices. It has a nicely balanced look. The design elements on both sides are fully detailed, including the slightest individual characteristics. The fields have fine die polishing lines visible on close inspection, and these are mixed with a few of the slightest hairlines. A remarkable Premium Gem Cameo proof that will be a prized possession of the successful bidder.

From The Slotkin Family Trust Collection. (#88471)

### 1904 Half Eagle, PR66 Cameo Among the Finest Known

1904 PR66 Cameo NGC. CAC. The 1904 Liberty Head half eagle proofs had slightly higher mintages than earlier issues, 136 recorded pieces, due to an apparent minor increase in proof gold collectors after the turn of the century. Walter Breen called the issue a "sleeper" and "much less often seen" than the 1903 five, but the certified populations at NGC and PCGS are roughly equal, and we estimate that 75-80 pieces survive today. This piece is close to the top end of those survivors, however, with slight but noticeable contrast between the moderately frosted devices and unfathomably deep-mirrored fields. The strike details are pinpoint-sharp throughout, as expected. A couple of tiny contact marks appear, only under a loupe, in the left obverse field. Census: 9 in 66 Cameo, 4 finer (3/11). (#88499)

PR64+ 1906 Half Eagle

**1906 PR64+ PCGS. CAC.** This 20th century proof issue from the tail end of the Liberty half eagle series has a mintage amounting to just 85 specimens. Few of those coins show any level of cameo effect, so the modest contrast visible on this sun-gold example comes as a pleasant surprise. The strike is characteristically sharp, and the overall eye appeal is great for a classic gold proof of the brilliant era. A small lump on the rim to the left of the date is asissued, though the minor yet grade-defining hairlines to the left of the portrait are not. Population: 2 in 64+, 9 finer (3/11). (#8501)

#### **INDIAN HALF EAGLES**

**1908 MS65 PCGS.** An interesting paradox of the 1908 half eagle is that while the innovative Bela Lyon Pratt design had a mixed reception at best, the date was still saved in quantity as the first of its kind, making it a popular type choice today despite a mintage that is not so high as seen for several later Philadelphia issues. This Gem offers bold peach-gold luster, subtly frosted and lighting up remarkably smooth surfaces. The strike is solid in the centers, though the lowest pendant in the necklace is weak. PCGS has certified 17 numerically finer examples (3/11). (#8510)

Sharply Struck 1909-O Half Eagle, AU

**5404 1909-O AU50 PCGS.** The 1909-O half eagle is the final gold coin struck by the New Orleans Mint and is also that mint's only issue in the Indian Head series. With 34,200 pieces struck, it also holds the distinction as the lowest mintage of the series. Lovely apricot patina covers both sides of this key date. The details are sharp, and there are traces of light rub on the headdress, cheekbone, and wing. A shallow mark next to the forehead is noted, but otherwise the abrasions are minimal. The mintmark is clear while not bold. A pleasing example of this scarce issue, and a coin that would be right at home in a mostly Mint State or near-Mint set.

Ex: Baltimore Signature (7/2008), lot 3088. (#8515)

1909-O Five Dollar, AU58 Still-Lustrous Key to the Series

5405 1909-O AU58 NGC. Fully 15 years after the New Orleans Mint struck 16,600 half eagles in 1894, the soon-to-be-shuttered minting operation reprised the denomination in 1909 with a new design but the same smallish New Orleans mintage, this time 34,200 pieces. It is by far the lowest-mintage Indian half eagle, and collectors have long understood it to be the cornerstone of any high-end collection. This example could fill that role readily in a set of similar or slightly higher grade. Little high-point friction is seen on either side of the reddish-gold surfaces. The strike is well brought up for the issue, and the only mark of any note is located just behind the eagle's head. (#8515)

New Orleans Mint, 1838-1909

#### 1909-O Five Dollar Indian, MS63 Remarkable Absolute and Condition Rarity

5406 1909-O MS63 NGC. The 1909-O half eagle is one of the rarest regular-issue coins from the 20th century. Only 34,200 pieces were issued in this final year of production in the New Orleans Mint. While occasionally available in VF through AU grades, the number of Uncirculated pieces is always in extremely short supply. In fact, the number certified in Mint State can only be compared to the legendary 1929.

It is interesting to compare and contrast the 1909-O and the 1929. Both are major rarities, but each for different reasons. The 1929 has even fewer Uncirculated coins known. It also has far fewer examples extant in all grades and is all but unknown in circulated condition. The 1929 had a significant mintage of 662,000 pieces, but virtually the entire production was melted. Today we are left with an estimated 100 or so examples. The 1909-O, on the other hand, apparently was just not saved. Obviously a few were, but others wore out in circulation, some were melted during the 1930s, and others were exported to Europe. As a result, the 1909-O is an attention-grabber in Uncirculated grades, especially Select and better. In MS63 NGC has only certified five other pieces, and just 10 have been graded higher (3/11).

This is an extraordinarily attractive example of this major rarity. The surfaces are obviously original, with each side showing intermixed reddish-gold and lilac patina. As usually seen, the strike is strong throughout; even the lowest feather in the headdress shows almost complete definition. A few small, inconsequential field marks appear on each side, the most obvious a small cluster in the reverse field below AM in AMERICA. Specialists in this highly collectible and challenging series will appreciate the opportunity presented by this exceptionally high-grade key issue. (#8515)

Sharply Struck and Conditionally Rare Near-Gem 1910-D Half Eagle

**1910-D MS64 PCGS. CAC.** A hoard of 1910-D half eagles was discovered in the 1970s, entering the marketplace in 1979. The pieces were, however, mostly low-grade Mint State coins, and the 1910-D remains today an extremely rare issue in MS64 or finer condition, a level where PCGS has seen only 31 submissions, with 10 finer (3/11). This splendid khaki-gold piece is well-struck throughout, including on all of the headdress feathers. Only the lowest pendant on the necklace is weak. A few insignificant contact marks — well-separated from the prime focal points — define the grade while failing to diminish the generous eye appeal. (#8518)

1911-D Indian Five, MS62 An Absolute Rarity

**5408 1911-D MS62 PCGS.** Both sides display bold striking details and softly frosted mint luster that is overlaid in natural olive and reddish patina. Only the presence of a few diagonal marks on the reverse below the AM in AMERICA seem to preclude an even higher rating. The 1911-D, with its low mintage of only 72,500 pieces, is a key issue in the Indian half eagle series both as an absolute and condition rarity. While it may be difficult for many to view this coin as a good value, it certainly is when compared to the staggering prices realized in recent years by Gem coins (only five of which are known). Population: 43 in 62, 48 finer (3/11). (#8521)

# High-End 1911-D Half Eagle, MS62

1911-D MS62 PCGS. The 1909-O, 1911-D, and 1908-S half eagles have the only five-digit mintage figures in the entire series, at 34,200; 72,500; and 82,000 business strikes, respectively. But while the 1909-O and 1911-D rank first and second in overall rarity, according to the Akers Handbook, second edition, the 1908-S comes in eighth place, undoubtedly due to its status as a first-year issue of the new design. Such issues were more likely to be saved, both by numismatists of the time and the general noncollector populace. The 1911-D is elusive even in lower Mint State grades. This MS62 specimen displays immense eye appeal for the grade. The antiquegold surfaces are well-struck overall, despite minor weakness on the lowest pendant on the necklace. All the headdress feathers are well-defined. A few contact marks, on the obverse high points and in the reverse fields, seem to preclude a finer grade, but to us this is a high-end piece for the assigned MS62 level. Population: 43 in 62, 49 finer (3/11). (#8521)

## Uncommonly Colorful 1911-D Five, MS62

**1911-D MS62 NGC.** Though far less famous than its quarter eagle counterpart, the 1911-D half eagle also has a five-figure mintage, and while it is an under-the-radar rarity among Indian half eagles, collectors who tackle the issue become all too aware of the challenge it poses. This MS62 example is uncommonly well-defined for the date, particularly on the reverse, and softly lustrous surfaces are light tan-gold at their base with liberal splashes of green and violet copper toning through the peripheral zones. Lightly abraded yet attractive. Census: 46 in 62, 35 finer (3/11). (#8521)

## Gem Mint State 1912 Indian Half Eagle

**1912 MS65 PCGS.** Both sides of this crisply struck, reddishtinged representative display intense, satiny luster and surfaces that are remarkably smooth for the issue. A tiny mark at the bridge of the portrait's nose is minor in context but ultimately grade-defining. While the 1912 is accurately regarded as one of the more available five dollar Indian issues in Mint State grades, only a minuscule percentage of the original production qualifies for the Gem designation. There are no numerically finer pieces known to PCGS, and there are only three entries for such coins in NGC's *Census Report* (3/11). Housed in a green label holder. (#8523)

1913-S Five Dollar, MS63 A Strike and Condition Rarity

**5412 1913-S MS63 PCGS. CAC.** The 1913-S Indian half eagle is among the most elusive series issues at the Gem and near-Gem levels. A few more examples are available in the lower Mint State grades than previously, owing to the several examples being found in overseas hoards in the past several years. The present Select coin offers a superior strike, putting it in the distinct minority for this poorly impressed date. The mintmark is sharply struck, as well, again unusual for the issue. The only area of noticeable weakness is on the lowest headdress feather on the obverse. Bright, sparkling mint frost gleams from surfaces that display only a few scattered abrasions consistent with the grade, mostly in the left reverse field. The light reddish-gold coloration is both pleasing and typical. Population: 44 in 63, 16 finer (3/11). (#8526)

## Elusive Near-Gem 1929 Half Eagle Only Eight Finer at PCGS

5413 1929 MS64 PCGS. Numismatists have long puzzled over the production, shortly before the onset of the Great Depression, of 662,000 Indian Head half eagles. The Depression in the United States actually began with the decline in the stock market prices starting on Sept. 4, 1929, and the breathtaking drop of Black Tuesday, Oct. 29, quite late in the year. But the production of half eagles, even though it took place earlier in the year, was the first in 13 years, since the 1916-S fives, and was also the largest since the 1913 production of more than 900,000 pieces.

The March 1929 issue of *The Numismatist* reports a January mintage of 175,000 half eagles. The April issue reports 370,000 for February. Another 117,000 are reported in May for March, giving the accepted total of 662,000. An article in August 1929 *The Numismatist* titled "Coinage for the Fiscal Year 1929" gives the "number of pieces of the different denominations coined at the mints of the United States during the fiscal year ended June 30, 1929, as officially reported by the Bureau of the Mint, Washington, D.C." The figure of 662,000 half eagles stands out — confirmation of the earlier reporting, since all of the 1929-dated half eagles were apparently struck in January-March 1929, within both the fiscal and calendar years.

Regardless of the number of pieces struck, it is clear that few were released, and most of the issue was apparently melted soon after its production. Only a handful of circulated survivors of the 1929 half eagle are known.

A much more recent perspective on the issue is given in Mike Fuljenz's *Indian Gold Coins of the 20th Century*, where he ranks the issue as first in overall rarity within the series, even though several other issues are more elusive in high-grade rarity. The present near-Gem boasts rich orange-gold coloration with generous eye appeal. A single contact mark before the portrait and a couple of thin marks on the cheek help account for the grade, as do some thin abrasions on the reverse. The strike is well-executed overall, adding to the appeal. Only minor softness appears on the lowest pendant in the necklace and the lower portion of the braid. This coin will undoubtedly spur some spirited bidding on the auction block, as it may prove a long and arduous task to find another piece finer, technically or aesthetically. PCGS has seen only eight submissions finer, all at the MS65 level (3/11). (#8533)

#### **PROOF INDIAN HALF EAGLES**

#### Bold Gem Proof 1910 Half Eagle 'Roman Gold' Finish

**5414 1910 PR65 NGC.** The Mint issued four-piece gold proof sets in 1910 as well as the odd piece for collectors desiring same, but the purported figure for quarter eagles, 682 coins, defies all reason. The Breen *Proof Encyclopedia* estimates that 167 complete four-piece sets were made, with the complement of strays amounting to perhaps 250 pieces for the half eagle. The second edition of the Akers *Handbook* nonetheless notes that "survivors are still rarer than the original mintage might imply." The gold proofs of this year echo the "Roman gold" surface finish of 1909, a distinctive yellow-gold appearance that Breen calls "surfaces light in color, midway between satiny and mirrorlike, entirely without the granularity of matte or sandblast."

Even though there are a handful of Gem-or-finer examples certified in the marketplace, much of the proof gold of the Pratt and Saint-Gaudens designs is in strong hands. It has been four years since we offered a PR65 example of this issue, according to our Permanent Auction Archives — a PR65 PCGS specimen that realized \$48,875 in our Long Beach Signature (Heritage, 2/2006), lot 3049. Our most recent offering of a proof 1910 half eagle, in our ANA Platinum Night session (Heritage, 8/2010), lot 3530, was the Simpson Collection PR67 ★ NGC example, an impeccable piece that garnered \$63,250.

This amazing Roman finish Gem proof exhibits bright orange peripheral toning that nicely frames the brilliant yellow centers and the design elements are fully struck, as expected. A tiny surface inclusion right of the Y in LIBERTY is the only pedigree marker on either side. Specialists in rare proof gold should recognize this coin as the important opportunity it represents. Census: 3 in 65, 18 finer (2/11).

From The B & D Collection. (#8541)

#### Sandblast PR67 1912 Half Eagle Only Three Coins Graded Finer

**5415 1912 PR67 NGC.** The first sandblast or "matte" (a later contemporary term) proof gold coins of the new Pratt and Saint-Gaudens designs were a function of those new designs, which were totally unsuited to the production of brilliant proof coinage.

An excellent overview of the "Matte Proofing Process" begins on page 36 of *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection*, published by Ivy Press in 2006. A brief timeline, condensed from that article, follows:

- —Pre-1908. Proof coins, whether gold, silver, or bronze, are struck by the Mint using specially prepared, highly polished dies on selected, polished planchets. Sometimes the relief detail in the dies was sandblasted or treated to provide a pleasing two-toned contrasting effect on the coin.
- —1908. The new Pratt and Saint-Gaudens proofs are unsuited to the brilliant proofing process. The Mint, still needing to produce special collector coins, adopts a "sandblast" or "dull" proofing process for all proof gold coins. (The Lincoln cent and Buffalo nickel proofs are somewhat different.) The proofs are created by sandblasting a satin proof.
- —April 1909. The Numismatist comments that "proof coins of the present series, so far as issued, have a very dull appearance, the finish being what is known as 'sandblast,' and are far less pleasing to the eye than the coinage for circulation, which is brighter and of lighter color."
- —1909-1910. The Mint responds with the Satin finish or Roman finish proof gold, a brighter (unsandblasted) finish that is created by nothing more than using the new dies at high pressure in a medal press. Collectors dislike the Roman finish coins even more, as they too closely resemble the finish of normal business strikes.
- —August 1910. Collector extraordinaire (and future Treasury secretary) William H. Woodin and coin dealer Edgar Adams spearhead an effort to get the Mint to revert to the sandblast method. Woodin comments that the "present [satin] proofs of the Saint-Gaudens designs and of the Pratt designs are simply rotten."
- —1911-1915. The Mint reverts to sandblast proofs in 1911, continuing through 1915. "Color variations are typical for these years, but the dull, sandblast finish remains consistent throughout."

The present Superb Gem proof half eagle from 1912 is one of the later sandblast proofs, with even mustard color but a bit more yellow than some specimens from the year. Surprisingly, this piece, while extraordinarily well preserved, is less than fully struck. Some high-point detail is lacking on several of the lower headdress feathers and the eagle's left (facing) leg. The surfaces technically are almost perfect, with a faint alloy spot noted to the right of the Y in LIBERTY. There is a pronounced wire rim around each side. Census: 16 in 67, 3 finer (2/11). (#8543)

#### **EARLY EAGLES**

1797 Capped Bust Right Ten, VF25 Large Eagle, BD-4 Variety

1797 Large Eagle VF25 NGC. Breen-6834, BD-4, High R.4. The reverse design for the ten dollar gold piece was modified in 1797, with the BD-1 variety featuring the old Small Eagle design, while the other three varieties display the Heraldic Eagle motif. The present coin represents the scarce BD-4 die marriage, with a long thick neck on the eagle, and an irregular cross pattern on the reverse stars. The reported mintage for the Heraldic Eagle type was 10,940 pieces, and the BD-4 variety probably accounted for 3,500-5,000 examples of this total. John Dannreuther estimates a surviving population of 90-110 pieces in all grades.

The coin offered here shows considerable wear on the devices, but all lettering and major detail is still present. The fields exhibit a few minor abrasions, but no adjustment marks are evident. This coin is a very acceptable, no problems representative of this early eagle. (#8559)

1799 Capped Bust Right Eagle, AU50 Large Stars Obverse, BD-10

5417 1799 Large Stars Obverse AU50 PCGS. Breen-6841, BD-10, R.3. The large obverse stars and the position of the lowest berry under the right foot of the second A in AMERICA identifies this coin as an example of the BD-10 variety. The 1799 Capped Bust Right eagle claims a substantial mintage of 37,449 pieces, and the BD-10 is the most available of the 10 varieties known for the date, making this issue a popular type coin. John Dannreuther estimates the BD-10 accounted for 12,500-17,500 pieces of the original mintage, with perhaps 300-400 examples extant in all grades.

The present coin is a lightly circulated example, retaining most original detail and mint luster intact. The surfaces display the usual minor abrasions for an AU50 coin, but no adjustment marks or rim bruises are detected. The surfaces are a light greenish-gold color that adds to the considerable appeal of this piece. Housed in a green label holder. (#8562)

1799 Large Stars Ten, BD-10, MS61

1799 Large Stars Obverse MS61 PCGS. Breen-6841, Taraszka-22, BD-10, R.3. Bass-Dannreuther Die State Obverse a/Reverse a. The BD-9 and BD-10 are the only two Large Stars obverses of the year; the remaining eight die pairings are the Small Stars varieties. The BD-10 is by far the more available of the two Large Stars variants, which share the same obverse die. The reverse of BD-10 shows a leaf touching the I in AMERICA at the lower right corner, and the lowest berry is positioned under the right foot of the last A in AMERICA. Soft mint luster prevails on this Mint State coin, which displays subdued yellow-gold color and a bit of strike softness that is most apparent on the right-side obverse stars. Light roller marks appear on the reverse on the two rightmost clouds, but there are otherwise only a few minor, grade-consistent abrasions. (#8562)

1799 Eagle, AU Details Small Stars Obverse, BD-7

5419 1799 Small Stars Obverse — Improperly Cleaned — NGC Details. AU. Breen-6840, BD-7, R.3. Mint records indicate a mintage of 37,449 eagles was accomplished in 1799, quite generous for the time. The 1799 eagle is known in 10 varieties, including both Large Stars and Small Stars types. The total of 10 different varieties is the most for any early eagle. The present coin represents the BD-7 variety, with small obverse stars, the numerals 17 in the date tilted right, and the star away from the eagle's beak on the reverse. John Dannreuther estimates the BD-7 accounted for 10,000-15,000 pieces of the original mintage, with 250-350 examples surviving today.

The coin offered here is a well-detailed specimen, with just a touch of high-point rub on the devices. The pleasing greenish-gold surfaces are lightly abraded, with no adjustment marks. A slight obverse rim bruise is noted at 2 o'clock. This coin retains significant amounts of mint luster in protected areas, despite the noted cleaning. Extensive die cracks and clashing are evident on both sides, Bass-Dannreuther Die State d/d.

#### Important 1800 Eagle, BD-1, MS62 Late Reverse Die State Struck in 1801

**5420 1800 MS62 PCGS. Breen-6842**, **Taraszka-23**, **BD-1**, **High R.3.** Bass-Dannreuther Obverse Die State c/Reverse Die State e. With its turn-of-the-century date and low *recorded* mintage of 5,999 coins, the 1800 eagle has long been a collector favorite, although the early eagles as a whole rank high with gold specialists. From the series' debut in 1795 until the time the 1800 eagles rolled around, both sides of this largest gold denomination saw several evolutionary changes. The major reverse change, after 1797 and lasting through 1804, was the switch from the Small Eagle to the Heraldic Eagle reverse, although there were many other more-minor tweaks on the reverse — 13 Leaves, 9 Leaves, Long Neck, Short Neck, and others.

The obverse of the early eagles between 1795 and 1800 was an even more active canvas, with stars varying in arrangement, number, and size — 10x5 Stars, 8x8 Stars, 12x4 Stars, 10x6 Stars, 9x4 Stars, 7x6 Stars, 8x5 Stars, Small Stars, Large Stars, and other minor variants.

By the 1800 issue, the Mint had settled down a bit from its early experimentations, and the small mintage dictated the requirement for only a single known die pair — the obverse featuring the last 8x5 Stars arrangement noted above, combined with Heraldic Eagle reverse. The reverse die, in fact, is not new but a carryover from the 1799 BD-10. The reverse, with a different, 1801-dated obverse, was also used to strike some examples of the 1801 BD-1.

Die state researcher *par excellence* Harry Bass Jr. was intrigued by this phenomenon, owning three examples each of the 1800 BD-1 and 1801 BD-1. The Bass Core Collection coin is one of the late-state examples, struck in a remarriage after some of the 1801 pieces. From this remarriage numismatists also deduce that some of the 1800-dated pieces were actually delivered in 1801, and that the mintage is larger than the figure reported for the calendar year 1800. Bass-Dannreuther estimate from 6,000 to 12,500 total struck, of which 200-300 pieces survive today.

This high-end piece is struck from the late reverse die state, with the denticles only slightly weak over STAT. The bright, semiprooflike fields exhibit appealing yellow-gold color with none of the usually seen reddish patina. The strike is sharp throughout: the hair curls, eagle's breast, and wing tips. There are no singular contact marks on either side of this intriguing and important early numismatic treasure. Population: 16 in 62, 12 finer (3/11). (#8563)

Smooth Uncirculated 1801 Eagle, BD-2

**1801 MS61 NGC. Breen-6843, Taraszka-25, BD-2, R.2.** BD-2 is identified by a series of curious raised lines within Liberty's cap. At first glance, these appear to be clash marks from the shield, but they are not, and their true origin remains unknown. The Bass-Dannreuther reference ignores the feature except for a quote from the Harry W. Bass, Jr. notebook: "Nine vertical spines in cap." A lovely apricot-gold Mint State representative of this coveted large denomination early gold type. Both sides are refreshingly void of abrasions, and mint-made adjustment marks are limited to the reverse border at 10 o'clock. Struck from lightly rotated dies. (#8564)

Bright BD-3 1803 Ten Dollar, AU Small Stars Reverse

1803 Small Stars Reverse AU50 NGC. Breen-6844, Taraszka-28, BD-3, R.4. Bass-Dannreuther Obverse State b/Reverse State c. The eagle's upper beak near a star point along with the right side of the E in STATES over a space between clouds diagnoses the readily available (in context) BD-3. The Small Stars reverse is a loan from its first use, the BD-2 of 1801. The same 1803-dated obverse is employed for all six varieties of the year. The bright surfaces exhibit pleasing medium orange-gold color, accenting deeper reddish patina around the devices. The strike is somewhat soft through the centers, although the remainder of the coin is relatively well-defined. Numerous small but individually insignificant abrasions are consistent with the grade and a short spate in circulation. (#8565)

## 1804 Crosslet 4 Ten Dollar, AU53 A Magnificent Semiprooflike Example, BD-1

**1804** Crosslet 4 AU53 PCGS. Breen-6847, Taraszka-31, BD-1, High R.4. Bass-Dannreuther Obverse State c (late, unlisted)/ Reverse State b. The 1804 Crosslet 4 eagles were the last in the circulation series, although technically the R.7 1803 BD-6 eagles, which share the same reverse, were the last struck — just not the last in the ordered series of business strikes.

The obverse is identified by the Crosslet 4 in the date. Star 1 has two points toward the lowest hair curl, and star 13 nearly touches the bust tip. Star 7 is well-separated from the Liberty cap. The reverse die was used to strike all the 1804 BD-1, then the 1803 BD-6, according to Bass-Dannreuther, identifiable through die-state information. The reverse shows the large stars without the "extra star" of the 1803 BD-5. The eagle's upper beak touches a star point, and the arrows extend to the right upright of the N in UNITED. The left inner feet of all A's on the reverse are broken or missing.

The authors point out that the total mintage for the 1804 eagles, reported as 3,757 coins, accordingly must contain some 1803-dated eagles of other varieties as well, since the BD-6 is extremely rare.

This piece shows an obverse die state seen on other coins but apparently later than the Bass coin, with the crack beneath 180 extending upward through star 5. Another crack runs just beneath the bust from back to front. The cracks on the reverse are about equal to those of the Bass coin, with a crack through UNITE, the tail, and to the last A in AMERICA.

This piece has a few scattered, minor ticks and abrasions that account for the grade, but they do little to dampen its appeal. The fields are semiprooflike, with beautiful yellow-gold color and lots of radiant luster. Minor adjustment marks appear below star 13 near the obverse rim, and on the reverse through the left (facing) wing and nearby field. Others occur near the right rim under MERIC, but all of them are scarcely seen without a loupe.

The present coin is a wonderful addition to a fine gold type collection, and a superb representative of this historic early gold issue, the last in the circulation series forthcoming from the Mint until 1838. (#8566)

### Historic 1804 Crosslet 4 Eagle, BD-1, MS61 Last Circulating Issue of the Denomination

**5424 1804 Crosslet 4 MS61 NGC. Breen-6847, Taraszka-31, BD-1, High R.4.** Bass-Dannreuther Die State b/b. The 1804 Crosslet 4 eagles are the last circulating issue of this largest U.S. gold denomination until 1838, as President Thomas Jefferson would discontinue it by executive order in this year; its intrinsic value had exceeded its nominal value. The BD-1 issue is justly celebrated not only as the last of the type, but also due to its (loose) association with the proof-only 1804 Plain 4 eagles (BD-2) and the celebrated 1804 silver dollars, for example as found in the King of Siam proof set.

The Crosslet 4 is sufficient to identify the BD-1 variety. The reverse die is a "carryover" from the BD-6 of 1803, although Bass-Dannreuther note that the 1803 BD-6, based on die state evidence, was actually struck *after* the 1804 BD-1. The obverse here shows a die crack from star 1 to the 18 of the date. The reverse displays one crack through the tops of UNITED, and a second crack from the top left of the U, through the eagle's tail, and thence to the top of the last A in AMERICA.

Die polishing has created moderate brightness in the obverse fields of this MS61 specimen. That side also displays pronounced planchet adjustment marks from stars 11-13 upward through the upper portion of Liberty's profile. More adjustment marks appear on the lower bust and the lower hair curls, running into the left field. The strike on the reverse is a trifle irregular, fully defined on the eagle's breast but soft on the right (facing) wing tip and head. There is no evidence of reflectivity on the reverse. Both sides exhibit light, consistent orange-gold coloration, with minimal abrasions. We suspect that the extensive planchet adjustment marks account for much of the grade, yet they fail to detract from the appeal and historic importance of this early gold type example. Census: 13 in 61, 12 finer (2/11). (#8566)

#### LIBERTY EAGLES

AU50 1838 Ten Dollar Short-Lived Subtype

**1838 AU50 NGC.** After a gap of 34 years, the eagle or ten dollar gold coin was made for circulation once again beginning in 1838. The earliest pieces in the Liberty Coronet series feature a distinctly different portrait from later dates, one that shows strands of hair sweeping over Liberty's temple and back toward a beaded hair bun. The "Type of 1838" is increasingly popular with collectors, especially in better circulated grades as seen here. This still-lustrous green-to-gold example has softly struck stars, though the interior definition is better, and wear is minor. Small, scattered marks on each side contribute to the grade. Census: 10 in 50, 19 finer (2/11). (#8575)

Select 1848 Liberty Ten Ex: Stack, Bass

**1848 MS63 PCGS.** The 1848 Liberty eagle enjoyed a large mintage of 145,484 pieces, but the date was heavily circulated, and few survivors grade better than XF. The present coin is a delightful Select specimen, with a pedigree to the famous Bass Collection, one of the finest assemblages of U.S. gold coins ever formed. This coin is sharply detailed in most areas, but a touch of softness shows on the hair above Liberty's ear and a few of the star centers. The surfaces are an attractive honey-gold color, with vibrant satiny mint luster. Population: 4 in 63, 1 finer (3/11).

Ex: James A. Stack Collection (Stack's, 10/1994), lot 1297, realized \$33,000; Harry W. Bass, Jr. Collection (Bowers and Merena, 5/2000), lot 607. (#8599)

## 1862-S Liberty Eagle, MS61 Newly Discovered Specimen Only Certified Mint State Example

**1862-S MS61 NGC.** As of this writing, this coin does not appear on the NGC Census, but it should stand out when that listing is updated in a few days. This specimen is the finest certified 1862-S Liberty eagle at either of the leading grading services by a full three points (3/11). The coin surfaced at the recent Sacramento ANA National Money Show, where the owner walked it through grading at NGC and consigned it to Heritage. The coin was apparently preserved by a single family for many years, and we can find no previous auction appearances for it.

The 1862-S ten dollar gold piece boasts a low mintage of just 12,500 pieces. The entire mintage was released into circulation at the time of issue, and no specimens were saved for numismatic purposes. Collector interest in mintmarked coins did not develop until the 1890s, decades after the 1862-S was released and subjected to the rigors of circulation. Most examples seen grade no better than VF. The coin in the Eliasberg Collection was a VF30, while the Norweb and Smithsonian examples both graded XF45. The Harry Bass coin was tied for finest certified when it sold in May 2000, but even that remarkable piece fades in comparison with the coin offered here, as it only graded AU55 at the time. The fact that even one specimen of the tiny mintage survived in Mint State condition is a numismatic miracle.

The present coin is a well struck Mint State example, with just the slightest softness showing on some of the obverse stars. Fine detail is present on the strands of Liberty's hair and the eagle's claws. The surfaces are a light greenish-gold and retain much original mint luster. The surfaces also reveal a number of minor, grade-consistent contact marks, none worthy of individual mention. As the finest known 1862-S, this recently discovered specimen should find a home in the finest collection of Liberty eagles. (#8636)

1871-CC Liberty Eagle, AU55 Small but Unknown Mintage

**1871-CC AU55 NGC.** The 1871-CC eagle boasts a low mintage of 7,185 pieces, according to Rusty Goe in *The Mint on Carson Street*, and the issue is rare in any grade today. The *Guide Book* records a mintage of 8,085 coins, and Doug Winter places production at 5,908 coins.

Goe estimates a survival of 120 to 150 coins and Winter estimates a surviving population of 90-100 examples. The present coin is sharply struck, showing only slight wear on Liberty's hair. The surfaces are light orange-gold, and traces of satiny mint luster are evident in sheltered areas. A few minor nicks can be detected on Liberty's cheek, and a scattering of insignificant handling marks is present on both sides. Currently, NGC has certified only nine coins in AU55, with 10 finer, while PCGS has graded just three examples in this grade, with two finer (3/11). (#8661)

1877-S Ten Dollar, AU58 Tied With Several Others as Third Finest

**5429 1877-S AU58 NGC.** This issue is relatively common in XF, but it is rare in AU grades, especially AU58. It is almost unknown in mint condition with only two pieces certified, thus making the few near-Gems the finest realistically obtainable. This surfaces display original yellow-gold surfaces with significant traces of bright mint luster surrounding the devices. A mark in the upper left obverse field and another on Liberty's cheek stand out as the most prominent abrasions on each side, although both obverse and reverse are peppered with small marks, typical for the issue. Census: 15 in 58, 2 finer (3/11). (#8679)

#### Gem 1894 Ten Dollar Sole Finest at PCGS

5430 1894 MS65 PCGS. CAC. Any Liberty Head eagle in Gem condition is an uncommon coin, relatively speaking, compared to the large numbers produced for many issues in the late 19th and early 20th centuries. Most of the large mintages either were outright circulated to a great extent, or exported and melted before the great search for overseas hoards began after the Gold Recall of 1933. A quick perusal of the PCGS online *Population Report* reveals that there are only somewhere north of 1,300 survivors in MS65 grade of all With Motto tens combined. And even though there are a sprinkling of Gem P-mint survivors dating from the 1890s, this is the *sole Gem of this date graded at PCGS, with none finer* (3/11). The fields are bright and semireflective, with rich, even reddish-gold color covering both sharply struck sides. A loupe shows a few tiny abrasions and luster grazes, none worthy of mention. (#8729)

#### Premium Gem 1898 Ten Dollar

1898 MS66 NGC. Garrett and Guth write of this date: "Despite its high mintage, the 1898 eagle is nowhere near as common as dates such as 1893, 1897, 1899, 1901, 1901-S, and 1907. Apparently, far fewer of this date were shipped to Europe, or they are still there waiting to be discovered." This effect is especially pronounced above the Gem level, where the date is a condition rarity. This Premium Gem is satiny and beautiful with a strong peachorange tint to the obverse, while the reverse is brighter with a more yellow hue. Excellent detail and eye appeal in spades. (#8740)

1899-S Liberty Ten, MS66 Second Finest Known

**1899-S MS66 PCGS.** The incredible Eliasberg specimen is the finest surviving 1899-S Liberty eagle, graded MS67 PCGS prior to its August 1991 auction appearance, and more recently graded MS69 NGC. The PCGS *Population Report* no longer records the MS67 coin but does list one piece certified MS68, probably a resubmission of the Eliasberg coin before it was sent to NGC.

Next in line is the present Premium Gem, also an amazing survivor from the mintage of 841,000 coins. As usual, nearly all gold coins struck in San Francisco entered circulation or were exported, creating a long line of condition rarities.

This specimen has satiny yellow-gold luster with bold design elements, and brilliant, pristine surfaces. A few tiny marks are inconsequential, and small copper toning splashes will assist the pedigree researcher. Population: 1 in 66, 1 finer (3/11). (#8744)

1903-S Ten Dollar, MS67 Perfect for Type Purposes

**1903-S MS67 NGC.** This date is considered to be one of the most common Liberty eagles issued in the 20th century, although Superb Gem examples are rarely seen. Just eight such coins have been certified, and only three times previously have we sold such a remarkable coin. A survey of auction records over the past 18 years reveals the true rarity of Superb Gem specimens. This particular specimen has bold design details with bright, frosty orange-gold surfaces that are slightly deeper on the reverse. Few abrasions of any significance are evident on the lovely surfaces. Census: 5 in 67, 0 finer (2/11). (#8754)

Gem 1904-O Ten Dollar

**5434 1904-O MS65 PCGS. CAC.** Doug Winter writes in *Gold Coins of the New Orleans Mint:* 

"The 1904-O eagle is often seen with very heavily abraded surfaces. There are often clusters of deep, detracting marks seen in the fields. Some pieces exist that show better quality surfaces with fewer severe abrasions noted."

This coin is one of those beautiful exceptions, carefully preserved and well-defined on the portrait with light orange overtones gracing the sweeping, slightly satiny luster on each side. An ideal choice for the connoisseur of O-mint gold. Population: 6 in 65, 1 finer (3/11). (#8756)

#### **PROOF LIBERTY EAGLES**

#### 1860 Liberty Eagle, PR64 Deep Cameo Tied for Finest Known

**1860 PR64 Deep Cameo PCGS.** The general numismatic consensus is a total population of 10 or fewer proof 1860 Liberty eagles in all grades. Known pieces include two specimens in the Smithsonian Institution and one in the American Numismatic Society, reducing the available population to just over half a dozen coins. In his 1980 auction analysis of the eagles, David Akers wrote that "no more than 10 or 11 can be accounted for today." Our current roster lists nine distinctly different examples with six other appearances that may or may not be included in the first nine. Perhaps the final tally could reach a dozen different pieces, including three in museums.

- **1. PR64 Deep Cameo.** United States Mint; National Numismatic Collection; Smithsonian Institution.
- 2. PR64 Deep Cameo. Smithsonian Institution duplicate.
- Proof. American Numismatic Society, probably ex: Brock, Morgan.
- 4. PR64 Deep Cameo PCGS. DiBello Collection (Stack's, 5/1970), lot 1068; Harry W. Bass, Jr. (Bowers and Merena, 10/1999), lot 1473; Kingswood (3/2001), lot 480; Heritage Internet (4/2001), lot 3496; Heritage Internet (9/2001), lot 4519; American Numismatic Rarities (6/2004), lot 1470. The present specimen.
- PR64 Deep Cameo PCGS. Stack's (1/2009), lot 1118.
- PR64. W. Foster Ely; W. Elliot Woodward (9/5/1883); Garrett Collection (Bowers and Ruddy, 10/1980), lot 1668; Superior (5/1989), lot 5627.
- 7. **PR63 PCGS.** Bowers and Merena (1/1997), lot 333.
- 8. PR63 NGC. Atwater Collection (B. Max Mehl, 1946), lot 1438; Amon Carter Collection (Stack's, 1/1984), lot 762; Ed Trompeter Collection.
- **9. PR60 ANACS.** Superior (2/1987), lot 4195.
- A. Proof. F.C.C. Boyd (Numismatic Gallery, 1/1946), lot 665; Memorable Collection (Numismatic Gallery, 3/1948), lot 559.
- B. Proof. Kreisberg-Schulman (2/1960), lot 2790.
- C. Proof. Wolfson Collection (Stack's, 10/1962), lot 678.
- D. Proof. Kagin's (4/1979).
- E. Proof. Bell Collection (Stack's, 1944).
- **F. Proof.** King Farouk Collection (Sotheby's, 2/1954).

When this specimen was last offered in the June 2004 American Numismatic Rarities sale, they wrote that it "compares easily and favorably to Bass: 1473 (October 1999) for quality and appeal," failing to recognize it as the same coin.

This near-Gem Deep Cameo proof is tied with one other coin for the finest that PCGS has certified. Both sides have rich orange-gold fields with lighter yellow-gold devices that exhibit full design details. Our roster shows that this piece, the other PR64 Deep Cameo PCGS coin, and the two Smithsonian coins are all approximately tied for top grade honors.

From The Slotkin Family Trust Collection. (#98796)

### 1873 Ten Dollar, PR65 Ultra Cameo Probably No More Than 15 Proofs Known Ex: Trompeter

**5436 1873 PR65 Ultra Cameo NGC.** All 1873 tens have a Closed 3 in the date. Both business strikes and proofs are rare and, in fact, are of approximate equal rarity. Only 800 strikes for circulation were produced, plus 25 proofs. It is difficult to estimate the number of proofs known today as there appear to be a large number of resubmissions, especially in the PR63-64 range. However, among Ultra/Deep proofs only two pieces have been certified (the same coin resubmitted?), both PR65. We estimate that 15 or fewer proofs are known today in all grades out of a total of 23 auction appearances in non-Cameo, Cameo, and Deep/Ultra Cameo since 1991.

The Garrett-Guth gold reference makes an interesting observation:

"The Mint made aluminum trial strikes of this date in Proof, and it is possible that some were gold-plated and passed as the more valuable version (most gilt patterns that exist today are the result of such nefarious activities)."

This particular coin was once part of the complete Ed Trompeter Collection. It is identifiable by diagonal mark above star 3. Proofs of this issue are identifiable by the date a little below the center of the exergue; die polishing that has removed the interior of the lowest curl, leaving it dangling; and a plain die file mark slanting down and to the left from Liberty's eye.

The fields show the expected depth of mirroring, and the devices are heavily frosted, which yields strong cameo contrast on each side. There are a few light hairlines, but they fail to diminish the overall attractiveness and desirability of this proof eagle, one of the rarest in the With Motto series.

Ex: Kagin's 325th Sale (Kagin's, 9/1981), lot 2067; 1999 FUN Auction (Heritage, 1/1999), lot 8235.

From The Slotkin Family Trust Collection. (#98813)

## 1876 Ten Dollar, PR65 Cameo Low Total-Mintage Year

1876 PR65 Cameo NGC. Although we cannot be certain, this example appears to be the Trompeter Collection specimen, handled by our firm via private purchase and sale a number of years ago. A catalog for the collection was originally prepared by another auction firm, but the sale did not take place. In the manuscript for that sale, this coin was described: "Identifiable by two lintmarks between first and second stars. Mellow pinkish gold toning with orange overtones gives the coin a well proportioned look. Such nice toning is uncommon. It seems to further enhance the already beautiful cameo appearance." The description mentioned two lintmarks between stars 1 and 2, and, indeed, this coin has two lintmarks at that location. No previous pedigree is available for this example. This example is fully struck with sharply squared rims and fully defined design elements.

Just as the other proof gold coins of this year, the mintage was limited to only 45 coins. Today, approximately 15 examples still survive. Larger denomination gold proofs did not survive in the same numbers as the smaller denomination coins. This is purely a matter of economics, as each coin tied up a substantial amount of money at that time. Ten dollars or 20 dollars was a considerable sum to expend for a single coin at the time, and retaining multiple examples representing various dates was a significant proposition. Cost-of-living calculators available on the Internet tell us that 10 dollars in the year 1913 is equivalent to 200 dollars today. Obviously, 10 dollars in 1876 would be worth even more today. If a collector held some of these gold proofs when falling on economic hard times, the largest denominations would be spent first.

Not only are proof examples of this issue rare, but business strikes are similarly rare. Only 687 examples were coined for circulation, with Mint State survivors virtually unknown. We doubt that even 100 eagles dated 1876 survive in any grade or striking format. Ex: 2006 ANA (Heritage, 8/2006), lot 5560, where it brought \$57,500. From The Slotkin Family Trust Collection. (#88816)

## Near-Gem Proof 1879 Ten Dollar The Bass Specimen

**5438 1879 PR64 PCGS.** If one were to believe the dictum that mintages are always proportionate to rarity, then the proof 1879 ten dollar is obviously a great rarity, as only 30 specimens were struck. Yet even this assumption sells the date short. Walter Breen's *Proof Encyclopedia* claim of perhaps 10 coins surviving has turned out to be surprisingly accurate; the 2006 edition of Garrett and Guth, for example, lists nine PR60 or finer coins in the combined certified population, a group that excludes a handful of museum or impaired pieces but also may include resubmissions.

While the individual specimens of the 1879 ten dollar proof are not individually famous, this example certainly has one of the best-recognized pedigrees: Bass. When this piece was offered in Part II of the now-legendary auction sequence, the cataloger wrote that only a few coins "... could be called desirable for an advanced cabinet. The specimen is one of these. A strong bid is suggested, with the buyer secure in the knowledge that he or she will have a coin with few other equivalents in all of the world."

The present cataloger could not agree more with those words, and a simple glance at the near-Gem Bass coin speaks volumes to the coin's quality. Both sides are strongly mirrored with light sunyellow color under moderate patina. The striking details are razorsharp, and while the coin does not show a strong cameo effect, slight contrast is present. A few light hairlines on each side determine the grade.

Ex: Stack's (10/1970), lot 955; Harry W. Bass, Jr.; Bass II (Bowers and Merena, 10/1999), lot 1571. (#8819)

# 1890 Ten Dollar, PR66 Ultra Cameo Profound Contrast on Each Side

**1890 PR66 Ultra Cameo NGC.** Even though the mintage of 1890 proof tens increased over previous years to a "high" of 63 pieces, it only slightly increased the availability of high-grade survivors. At the PR66 Ultra/Deep Cameo level, only five pieces have been certified by both of the major services, four by NGC and one at PCGS (3/11).

The comments by Walter Breen (1988) and those of Garrett-Guth (2006) reinforce and help explain the comments of the other. Breen states that 1890 proof tens show incomplete curls behind the neck of Liberty (from die polishing). Then he goes on to state, "polish at ear, eye, and usually TY." Garrett-Guth state, "Both cameo and deep cameo examples exist, with the expectation that deep cameos came first, and that, as more Proofs were struck, the dies self-polished, thus reducing the contrast over time." It is the passage "the dies self-polished" that explains Breen's observation about the die polish seen at the ear, eye, and usually TY. This coin was obviously one of the first struck, as evidenced by the profound contrast seen between the fields and devices on each side. However, the die polish Breen mentions is not apparent on this piece. If the dies did indeed "self polish" then subsequent proofs would show the patches of brightness mentioned by Breen.

The yellow-gold surfaces are exceptionally well preserved. The only surface disturbances we see (with the aid of a loupe) are a couple of tiny contact marks on the point of the chin of Liberty. The fields on each side show the crinkly orange-peel effect found on most proof gold struck from the 1870s through the turn of the century. This effect was not a conscious one by the Mint, but rather the result of annealing planchets in a furnace that was too hot from previously annealing copper, nickel, or silver planchets. (#98830)

# PR66+ ★ Ultra Cameo 1895 Eagle Infrequently Offered, Finest Certified

5440 1895 PR66+ ★ Ultra Cameo NGC. Just 56 examples were struck for the proof version of the 1895 ten dollar. The certification services record an unusually high number of grading "events" relative to that original mintage, a fact that prompted the authors of the *Encyclopedia of U.S. Gold Coins* to caution that while certification rates were high, auction appearances were infrequent. A glance through the thin slate of offerings in our Permanent Auction Archives offers ample confirmation of the fact.

In an interesting twist, the highest-graded representatives of the proof 1895 ten dollar issue are all coins in the top contrast category at their respective services. PCGS has two PR66 Deep Cameo specimens that are possible candidates for the finest example known. The three finest examples of this proof issue certified by NGC all rated PR66 and Ultra Cameo: one with no further modification, one with a Star designation, and the present PR66+ ★ Ultra Cameo survivor, which is the finest of them all (3/11).

Both sides of this coin gleam sun-yellow in the fields, while the emergent devices are decisively detailed and amply frosted, yielding an impressive black-and-gold appearance. The surfaces are remarkably smooth and free of post-striking flaws; even typical at-time-of-striking aspects such as orange-peel texture are minimized. A small planchet flake between stars 4 and 5 on the obverse may serve as a pedigree marker for some future second chance at this marvelous coin. (#98835)

#### High-End Gem Ultra Cameo Proof 1898 Ten Dollar

**1898 PR65 Ultra Cameo NGC.** It is a truism of U.S. numismatics that the proof coins dated 1896 and 1898 are among the most well-produced, regardless of which coin series is under discussion. While we mention this most often in the context of proof Morgan dollars, the proposition certainly extends to proof gold as well — as the present coin amply demonstrates.

The 1898 ten dollar gold was minted during an era in which the Mint would sell not only complete gold proof sets, but singletons to collectors desiring only a piece of two of given denominations. Thus it is that the Breen *Proof Encyclopedia* estimates 165 proof quarter eagles produced, compared to 75 each of the half eagle and double eagle and 67 of the eagle.

Even though it is all but certain that the populations are littered with duplicates, the NGC Census shows 18 Ultra Cameo pieces and 12 Cameos. (Interestingly, there are no non-Cameo examples certified, further testament to the quality of the issues.) This Gem Ultra Cameo is one of three so certified, with 11 Ultra Cameo submissions — unlikely to be all *different coins* — finer. At PCGS, there are nearly two dozen non-Cameo examples, but the Deep Cameo coins number only three: two in 65 Deep Cameo, one in 67 Deep Cameo (3/11)

This is a simply marvelous specimen of late-19th century proof gold, with intense field-device contrast on each side, thickly frosted devices and radiant yet profoundly mirrored fields that set up the admired gold-on-black contrast in a thoroughly appealing way. The strike, surface quality, and preservation of this piece are all high-end, to us suggestive of an even finer grade, a coin certain to form a cornerstone of whatever fine cabinet in which it finds an ultimate home. (#98838)

#### Premium Gem Proof 1903 Ten Dollar

5442 1903 PR66 NGC. The matte proof obsession displayed by the Mint for its sequence of new coinage designs starting in 1907 may have set off the final backlash that led to the exile of proofs from its repertoire for two decades, but today's collectors recognize another, earlier change as also being of great importance. Starting in 1902, just as proof gold mintages were hitting their zenith, the Mint altered its procedures for preparing proof dies, creating a new finish that tended toward an all-mirror, low-contrast appearance.

As a result, many of the most accessible classic proof gold issues come with brilliant devices instead of frosted. In a case of "numismatic rarity is relative" in action, Garrett and Guth write about this date:

"The 1903 Proof eagle is one of the most common dates of the period, but only in relative terms, as any coin with a population estimated at 40 to 50 pieces is rare indeed. Like the 1902, this date is usually found with brilliant surfaces and it is rarely found with any kind of cameo contrast."

This Premium Gem specimen displays the overall brilliant appearance that is the signature of most 20th century Liberty gold proofs, though there is considerable field-to-device contrast on the reverse with its sharply struck and subtly textured eagle. Color is pale yellow-gold with a hint of green, and the reflectivity is intense. A minimally flawed survivor with maximum eye appeal. Census: 5 in 66, 2 finer (3/11). (#8843)

## 1907 Liberty Eagle, PR65 Final Brilliant Proof Issue

**1907 PR65 NGC.** This final-year proof delivery was apparently poorly received by the collecting community in 1907. Although 74 proofs were produced, it is unlikely that more than half of those coins are extant. Both the fields and the devices exhibit a glassy reflectivity that seems to swallow every ray of light that falls upon the pristine surfaces. The color is yellow-gold in shade with a tinge of green-gold patina. A small horizontal hairline in the obverse field before Liberty's brow is noted solely for pedigree purposes. All later proof gold coins through 1915 have satin or matte surfaces. This 20th century proof issue is scarcer than the 1900, 1902, and 1904. Census: 4 in 65, 1 finer (3/11).

Ex: FUN Signature Sale (Heritage, 1/2001), lot 8321. (#8847)

#### **INDIAN EAGLES**

## 1907 Wire Rim Ten, MS65 Original, Subtly Patinated Surfaces

5444 1907 Wire Rim MS65 PCGS. When Augustus Saint-Gaudens had an artistic idea that worked, he would often slightly modify and reuse it on other commissions. On the ten dollar gold piece, the head of Liberty is a direct descendent of the allegorical female figure from the Victory on the Sherman Monument. The second generation of the Victory, a small-sized reduction of the head only, is actually based on an earlier, unused study for the head. This is the famous NIKE-EIPHNH (Victory-Peace) bust that was cast between 1892 and 1903. By turning the head of Victory to the side and placing it in a circle, it became his figure for Liberty on the ten dollar gold piece. President Roosevelt made the most significant design modification when he suggested the sculptor replace the laurel wreath with an Indian warbonnet, and then the transformation was complete.

The reverse was almost a complete lift from the special 1905 Roosevelt Inaugural Medal. The eagle on the reverse was based on the ancient Egyptian Ptolemaic eagle. That medal gives equal billing to both Saint-Gaudens and Adolph Weinman (who actually designed the reverse of the medal). The same Ptolemaic eagle was then transferred to the reverse of the ten dollar gold piece, again with only minor modifications.

The surfaces on this piece are worthy of close examination. The original bright yellow-gold has taken on subtle accents of rose and lilac that one sees when the coin is closely examined. The brightness mentioned was created by the swirling die polish lines, an inherent part of the finish on all Wire Rim tens. There are no singularly mentionable contact marks on either side of this Gem, just a few tiny, undistracting abrasions. (#8850)

# Pristine 1907 No Periods Eagle, MS65

**1907** No Periods MS65 PCGS. CAC. The 1907 No Periods eagle business strike is also called the 1907 No Motto, as the two With Periods issues are considered patterns and are quite rare. The redesign by Charles Barber removed the periods and led to strike details that were generally soft, as on this Gem where the high-point hair and feather tips, especially the lower ones, are weak. This coin is distinguished, however, by generous, radiant cartwheel luster over yellow-gold surfaces that are virtually free of mentionable abrasions. An excellent candidate for a high-grade type set or gold date set. (#8852)

Gem 1907 Indian Ten No Motto, No Periods Design

**1907** No Periods MS65 NGC. The 1907 Indian eagle was released to popular acclaim from numismatists and the general public alike. One feature of the design soon stirred controversy, however. Like its double eagle counterpart, the design of the 1907 No Periods Indian eagle omitted the motto IN GOD WE TRUST. The motto was omitted because President Theodore Roosevelt believed it was blasphemy to use God's name on an instrument of commerce. The public felt otherwise, and the design was modified to include the motto on the reverse in 1908. The short-lived No Motto design is especially popular with type collectors today.

The present coin is an impressive Gem with vibrant satiny mint luster and vivid greenish-gold surfaces. A touch of softness is evident on Liberty's hair and the headdress feathers, as usually seen on this issue. This coin possesses terrific eye appeal to accompany its high technical quality. (#8852)

1907 Indian Eagle, MS65 Popular No Periods Type Coin

5447 1907 No Periods MS65 PCGS. The Indian eagle design by Augustus Saint-Gaudens went through several iterations, including Wire Rim and Rolled Edge varieties, before the No Periods design was accepted and released into circulation. The No Periods version proved to be well suited for mass production, and the initial mintage was a respectable 238,864 pieces. The design was popular with collectors and the general public in 1907, and many high-quality examples were saved. Today, the availability of high grade specimens and its status as the first year of the Indian design makes the 1907 No Periods Indian eagle an extremely popular type coin.

The present coin is a delightful Gem, with vivid orange-gold surfaces and vibrant mint luster. The strike is a little soft on the central devices, as nearly always seen on the No Periods issue, but the legends and stars are strongly impressed. We expect spirited competition from type collectors and 20th century gold specialists alike when this lot is called. (#8852)

1907 No Periods Ten, MS66 Only Seven Finer PCGS Coins

**1907 No Periods MS66 PCGS.** Satiny and brilliant, this spectacular and thoroughly delightful example exhibits brilliant yellow-gold luster and pristine, nearly flawless surfaces. Although the 1907 isn't particularly scarce in the MS-60 to 64 range, only a tiny percentage of the Mint State survivors match the Premium Gem offered here. The 1907 is particularly popular because of its status as a two-year design type. Suitable for inclusion in the ultimate type set or date collection, this piece will appeal to the 20th-century gold connoisseur. Population: 72 in 66, 7 finer (3/11). (#8852)

## 1908 Motto Indian Ten, MS66 Conditionally Rare Issue

5449 1908 Motto MS66 NGC. The design of the Indian ten dollar gold piece was modified by an act of Congress in 1908 to include the motto IN GOD WE TRUST on the reverse. The 1908 Motto Indian eagle enjoyed a substantial mintage of 341,370 pieces, and the issue remains readily available in grades up to the Choice level today. Examples in Gem condition are scarce, and Premium Gems are rare. The 1908 is popular with type collectors as the first date of the Motto design.

The present coin is a sharply detailed Premium Gem, with fine definition on Liberty's curls and the headdress feathers. The surfaces display pleasing orange-gold patina with satiny mint luster. Census: 35 in 66, 8 finer (3/11). (#8859)

Superb Gem 1911 Indian Ten Three Coins Finer at NGC

5450 1911 MS67 NGC. The 1911 Indian eagle claims a large mintage of 505,500 pieces, and high-grade examples are usually available, making the date quite popular with type collectors. Of course, the population dwindles above the Gem level, and Superb Gems are very rare. The present coin is an incredible Superb Gem, with razor-sharp definition on all devices, even the usually trouble-some lower feathers. The pristine surfaces display attractive, even greenish-gold color, with vibrant mint luster on both sides. Currently, NGC has certified seven coins at the Superb Gem level, with only three examples finer, while PCGS has graded nine Superb Gems, with none finer (3/11). (#8868)

# Conditional Rarity Gem 1912-S Eagle

**5451 1912-S MS65 NGC.** Swirling, frosty luster ennobles this rare Gem example of one of the extreme conditional rarities in the Indian eagle series. Most specimens of the 1912-S suffer from a weak strike and inferior luster. While this piece does show some strike weakness overall, its superb luster, original yellow-gold color, and relative lack of mentionable marks more than compensate. Some of the feather ends are weak, along with the hair around the face. A small obverse die crack parallels the rim from the 1 in the date upward to about 7:30. The small sprinkling of contact marks on each side is minor in severity and small in quantity, largely away from the focal areas. This issue is extremely rare in Gem grade. Census: 7 in 65, 2 finer (3/11). (#8872)

Frosty, Rich Orange-Gold 1913-S Eagle, MS62

**5452 1913-S MS62 PCGS.** The 1911-D Indian eagle may be more famous (and have half the mintage), but the 1913-S and the 1911-D are basically neck and neck in the rarity race, and at various times one issue or the other has been considered rarer. The 1913-S had a mintage of only 66,000 pieces, and the Akers *Handbook*, second edition, pegs the issue as second in high-grade rarity and fifth overall, noting that "even coins that grade MS-60 to MS-62 are seldom encountered, and MS-63s are very scarce." This piece displays abundant appeal, with rich, frosty luster emanating from orange-gold surfaces on both sides and tinges of hazel on the reverse. A scattering of abrasions is consistent with the grade, but they are minor, and this coin also shows none of the arcing mark through the date that afflicts many examples. Population: 42 in 62, 36 finer (3/11). (#8874)

## Pristine 1914-D Eagle, MS66

1914-D MS66 PCGS. The Indian eagle series in high Mint State grades is one of the incredible glories of U.S. numismatics. Somehow, we feel that Augustus Saint-Gaudens would be extremely proud to see his creation, even as redesigned by lesser hands. Much of the splendor of his original concept certainly appears undiminished on this piece, which boasts extraordinarily deep, intense cartwheel luster over pristine orange-gold surfaces on both sides. Even though the 1914-D is an available issue, few specimens can better the present MS66 example: PCGS has seen only three submissions in higher grades, all MS67 (3/11). (#8876)

Mattelike 1915 Eagle, MS66 Green-Gold Surfaces

**1915 MS66 NGC. CAC.** The 1915 eagle had a nominal mintage of 351,000 business strikes, but it is popular as a well-produced and available issue. Michael Fuljenz, in *Indian Gold Coins of the 20th Century*, calls it "well-regarded for its aesthetic appeal and popular with type collectors." This Premium Gem would certainly achieve regard in the eyes of most collectors, with excellent, near-pristine mattelike green-gold surfaces. The strike is bold — just shy of absolute — and rich luster prevails throughout both sides. Even though NGC has certified a small handful finer, they could hardly be more attractive. A small copper alloy spot appears above the Y of LIBERTY. (#8878)

1915-S Indian Eagle, MS62 Scarce Low-Mintage Issue

5455 1915-S MS62 PCGS. The 1915-S Indian eagle is a scarce coin in high grade, from a small mintage of 59,000 pieces. In addition to the low mintage, the 1915-S has a low survival rate, with few examples saved by collectors and most of the mintage destroyed after the Gold Recall of the 1930s. David Akers estimates perhaps 175-200 coins survive in all Mint State grades, with 140-165 specimens in the MS60-MS63 range.

The present coin is a pleasing MS62 example, with sharply detailed design elements and good, but somewhat subtle mint luster. The surfaces are an attractive orange-gold color, with mottled green highlights. Population: 49 in 62, 59 finer (3/11). (#8879)

Theodore Roosevelt Special Inaugural Medal (1905)

#### **PROOF INDIAN EAGLES**

## Gem Proof 1910 Eagle, Second-Rarest Among the Type Two Issues

**1910 PR65 NGC.** The production figure for the proof 1910 eagles is given as 204 pieces, by far the largest of the Type Two (With Motto) issues. The figure nonetheless seems anomalous, considerably out of context with the remainder of the series. The current thinking, as espoused equally by Mike Fuljenz (2010) and Jeff Garrett and Ron Guth (2006) in their respective references, is that the first-year 1908 is the commonest proof Indian eagle, with the 1911 in second place — at least in high grades.

Garrett and Guth opine concerning the 1910 proof eagles:

"Although the mintage climbed substantially for Proofs in 1910, as compared with 1909, few of these coins were saved in gem grades. In fact, the 1910 issue rates as the second-rarest date of the eight Proof dates that are generally available to collectors, with a total of just 24 coins having been graded PF-65 or finer. This is really splitting hairs though, as all the Proofs from 1909 to 1915 are represented in PF-65 or finer by 22 to 34 coins, except for the 1908 issue which boasts 57 examples in PF-65 or higher."

While the population data have changed since the words above were written — resubmissions in most instances — the relative rarity rankings have not. The 1910 eagle in Gem condition has two coins certified at NGC including the present piece, with 11 finer, while PCGS has graded five submissions in PR65, with a mere two pieces finer. It appears likely that quite a few pieces made at the Mint were melted as unsold at the end of the production run. It also appears that some of the survivors were indifferently cared for, given the relative paucity of Gem-or-finer examples.

Almost all of the 1909- and 1910-dated proofs were produced with what we today call the "Roman gold" finish, although Garrett and Guth note a single "unique" known 1910 matte proof gold set. The devices are boldly rendered on both sides of this lovely Gem proof, which displays satin luster over brilliant yellow surfaces. Traces of light blue add to the eye appeal. A minuscule obverse rim disturbance at 8 o'clock is easily overlooked. This amazing Indian eagle will grace the finest collection of proof gold coins. Census: 2 in 65, 11 finer (2/11).

From The B & D Collection. (#8892)

#### Important Superb Gem Proof 1911 Eagle The 'Saint-Gaudens' Little Sister' Design

**1911 PR67 NGC.** At the PR67 grade level, it matters little that the proof mintage of the 1911 eagle was a nominal production of 95 pieces, as opposed to the 1912's figure of 83 pieces or that of the 1913, at 71 coins. The fact is, all matte proof gold is rare to a considerable degree, and as one moves up the grade scale, the rarity becomes remarkably more pronounced. Generally speaking, the larger-denomination matte proof gold pieces, all else being equal, are also rarer, as they were more subject both to contact marks and financial attrition during an economically turbulent 20th century.

Mike Fuljenz writes in Indian Gold Coins of the 20th Century:

"There were just 95 Proofs minted in 1911 and an estimated 25-30 pieces are known today. Proof 1911 Eagles are seen with two types of finish: dark matte and sandblast. ... Proofs are very rare with most survivors in the PR64 to PR66 range."

We believe the number of survivors is somewhat larger than Fuljenz's estimate, in the range of 30-45 coins. Further confirmation of the extreme conditional rarity of this coin comes from our own records and the certified population data. We know of only a half-dozen or so auction appearances of Superb Gem certified specimens in the last 20-plus years, with none finer. A PR67 NGC example in American Numismatic Rarities' March 2006 auction, lot 1331, brought \$80,500, where the cataloger wrote passively, "No finer example has ever been seen by us."

A couple of months previous to that appearance, we offered another PR67 NGC piece in our FUN Signature (Heritage, 1/2006), lot 3555, a mustard-colored dark matte proof that brought \$69,000. Those are the most recent auction appearances of a Superb Gem 1911 eagle that we can account for. The population data show two PR67 PCGS examples and one PR67+, while NGC has seen nine submissions at the PR67 level and three in PR68 — figures that we believe may be considerably inflated by resubmissions (3/11).

The present example appears to be more of the dark sandblast variety — although the distinctions sometimes drawn here are continuum rather than dichotomy. Even mustard color prevails with just a hint of khaki over both sides, and the surfaces are finely granular throughout. A faint alloy spot in the field just above the end of the eagle's tail feather identifies this piece for provenance purposes, along with a pronounced wire rim around the reverse (none appears around the obverse). A tremendous appealing — and tremendously important — proof representative of the "Saint-Gaudens' little sister" design. (#8893)

# 1913 Indian Eagle, PR67 Rare Sandblast Proof Second-Rarest Date of the Series

5458 1913 PR67 NGC. Only 71 proof Indian eagles were struck in 1913, using the same fine sandblast finish of the year before. Sales of proof sets had declined since the matte proof era began in 1907, because the public favored the old brilliant finish proofs. Many new coinage designs were introduced in this period, including the Indian eagle in 1907. The new designs were generally not suitable for a brilliant finish because they featured high relief devices and convex fields. The sandblast finish was a modification of the darker, coarser matte style used in earlier years, displaying thousands of sparkling facets when the surface is viewed with magnification. Unfortunately, collectors failed to appreciate the sandblast proofs any more than they had the matte finish issues, and the Mint discontinued proof set offerings entirely in 1916.

The 1913 proof Indian eagle is the second-rarest date of the series in higher grades, outdistancing the lower-mintage 1914 for second-place honors. Only the 1915 proof eagle, the final date of the series, is more elusive in grades above PR65. Experts estimate a surviving population of just 20-35 coins in all grades, and Superb Gem specimens are very rare.

The present coin is a spectacular Superb Gem, displaying the needle-sharp details expected of a sandblast proof on all design elements. The fields are virtually perfect, free of contact marks and shiny spots, with an even honey-gold color on both sides. This coin possesses tremendous eye appeal, with an almost medallic appearance and no visible flaws. Census: 5 in 67, 2 finer (3/11). (#8895)

# 1914 Ten Dollar Indian, PR66 Only 50 Matte Proofs Produced

5459 1914 PR66 NGC. The proof 1914 ten dollar has the lowest mintage in the matte proof series, with only 50 pieces produced. The low mintage does not appear to have significantly affected the number of survivors, however. Estimates have varied widely over the years according to which expert has written about the series. In Breen's *Proof Encyclopedia* (1977) he was somewhat vague and stated, "This could almost be called extremely rare." In 1980 David Akers attempted a more precise estimate when he asserted 20-25 coins were known. We believe more have survived. When one adds the total number of PR60-68 1914 tens certified, a surprising 48 pieces have been graded. Factoring out the inevitable resubmissions, we believe that somewhere in the range of 25 to 35 pieces may be known in all grades today.

Much has also been written about the finish of the 1914 proofs compared to previous years. The expected coarser-grain finish is seen on this piece, and it is especially apparent when compared to a 1912 or 1913. The color of matte proof tens from 1914 is similar to that of the previous year, but they tend to have a slightly more greenish tinge. The usually seen wire rim around the reverse is evident on this piece also, with no trace around the obverse, both typical traits for this date. We are not quite certain why this lovely proof "only" grades PR66. There simply are no surface distractions or shiny spots on either side. The only irregularity in the surface is a tiny dot of slightly darker brown in the left obverse field directly in front of Liberty's eye. This tiny dot identifies this coin as the 1914 proof ten in the Danny Arnold Collection of Matte Proof Gold. This was a complete set of matte proof gold issues, sold by Bowers and Merena in 1984. To quote from the catalog:

"To form a collection such as Danny Arnold did required many years of care, patience, and connoisseurship. Deserving credit as well are the efforts of Abner Kreisberg and Jerry Cohen, who helped locate many of the pieces."

This is a stunning example of this rarely seen matte proof ten and sure to be of interest to many advanced collectors. Census: 7 in 66, 8 finer (3/11).

Ex: Arnold and Romisa Collections (Bowers and Merena, 9/1984), lot 276, where it was graded Gem Matte Proof-67. (#8896)

### LIBERTY DOUBLE EAGLES

AU53 1850-O Liberty Twenty Popular and Scarce New Orleans Issue

**1850-O AU53 PCGS.** The New Orleans Mint struck double eagles each year from the inception of the denomination, 1850, to the advent of the Civil War, 1861. When the facility reopened in 1879, a small, final mintage was produced, although eagles and half eagles were struck intermittently until the facility reverted to assay office status in 1909. Despite 12 years of double eagle coinage, New Orleans twenties are scarce, particularly if a date other than 1851-O is desired. The present bright butter-gold example lacks noticeable abrasions, and luster fills the devices and legends. The mintmark is lightly repunched. Population: 21 in 53, 17 finer (3/11). (#8903)

Near-Mint 1851-O Double Eagle From the *S.S. Republic* 

**1851-O AU58 NGC.** Ex: *S.S. Republic*. The *Republic* was sailing from New York to New Orleans on its final fateful voyage, and this scarcely worn O-mint double eagle was headed for its hometown when a hurricane sank the ship. Though it is impossible not to acknowledge the tragic loss of lives and fortunes that took place then, in the present we can also appreciate how the event saved coins such as this for today's collectors. The surfaces are pale yellow-gold with hints of green, appreciably reflective through the fields. The strike is soft on the left-side stars, but definition is better elsewhere. Just a touch of rub on the high points and a few small, scattered digs preclude a better designation. NGC has certified 22 survivors as Mint State (3/11). (#8905)

1853-O Double Eagle, AU53 Last Higher-Mintage New Orleans Issue

**1853-O AU53 PCGS. CAC.** This is the last of the high-mintage New Orleans Mint double eagles with a production of 71,000 coins. From 1850 to 1853, the Louisiana mint coined 717,000 double eagles, for an average of nearly 180,000 per year. From 1854 to 1861, the total was 112,191 pieces, for an average of about 14,000 per year. Just one later year, 1879, saw production of double eagles with 2,325 coins struck. The drastic difference is easy to explain: The San Francisco Mint opened in 1854, so there was no longer a need to send California gold to New Orleans.

This 1853-O double eagle is an impressive piece with satiny luster and the usual green-gold appearance of pieces struck from California gold. The only noticeable blemish is a small scrape in the left reverse field. Otherwise, only minuscule marks are detectable with magnification. Population: 13 in 53, 38 finer (3/11). (#8910)

MS61 1856 Double Eagle Elusive Date in Mint State

**1856 MS61 PCGS. CAC.** Garrett and Guth write:

"The 1856 double eagle is much more difficult to locate than many of the other Philadelphia double eagles of the 1850s. The production for the year was widely distributed, and nearly all of the coins known are low grade. ... The 1856 double eagle is very rare in full Mint State."

In fact, this is only the fourth time that Heritage has auctioned a Mint State representative of the issue since 1993. Well-struck devices sit under heavy patina, as do yellow-orange surfaces with full and satiny luster. Though numerous wispy abrasions cross the surfaces and a few significant abrasions are noted, including one at the top of Liberty's hair, the overall eye appeal is solid. Population: 13 in 61, 11 finer (3/11). (#8917)

Gem 1857-S Spiked Shield Double Eagle From the S.S. Central America

**5464 1857-S Spiked Shield MS65 PCGS. CAC.** Ex: *S.S. Central America. SSCA* 4157. Until the discovery of the *Central America*, the existence of Gem Type One double eagles seemed like a pipe dream, but for collectors today, owning such a coin is an achievable goal. This is one such coin, sharply struck with swirling and slightly frosted luster that boasts the signature *Central America* color, saturated yellow-gold on the outside with pale, almost straw-gold interiors. A single abrasion between stars 5 and 6 on the obverse defines the grade, for the rest of each side is remarkably clean. Comes with box and faux-book case; the customary certificate of authenticity is missing but not really necessary, as the PCGS encapsulation more than suffices. (#70000)

1857-S Double Eagle, MS65 S.S. Central America Treasure Coin

**1857-S Bold S MS65 PCGS.** The obverse of this lovely Gem has a faint hairline on the cheek, while the reverse has a small graze and dark verdigris at the upper right. Otherwise both sides are essentially mark-free with only trivial, microscopic contact marks. The strike is exceptional and the surfaces are brilliant and highly lustrous, with frosty light yellow inside a frame of peripheral lemon.

The 1857-S went from a rarity to a common date almost overnight with the discovery of the *S.S. Central America* treasure off the Carolina coast in the 1990s. Today, the 1857-S is the number one choice of type collectors seeking the Type One double eagle design. (#70001)

1860-S Twenty, MS62, Only Two Finer

5466 1860-S MS62 NGC. The mintage of 544,950 pieces would suggest that the 1860-S twenty was heavily circulated, and that is indeed the case when one looks at the numbers of survivors and their grade distribution. Hundreds of pieces are known in circulated grades, but only a few dozen have survived in Mint State. The present MS62 NGC coin is generally the finest grade one can expect for an 1860-S. Only two coins have been certified finer, both at PCGS (3/11). This piece displays the soft, frosted luster expected but lacks the heavy abrasions often seen on this issue. The striking definition on Liberty's hair curls shows the expected softness, a characteristic that occurs not only on this issue but on many Type One twenties. (#8931)

1862 Liberty Twenty, AU58 Low-Mintage Civil War Date

**1862 AU58 NGC.** With the outcome of the Civil War in doubt, the mintage of double eagles from the Philadelphia Mint dropped from nearly 3 million pieces in 1861 to 92,000+ pieces in 1862; examples are accordingly rare in all grades. Most coins seen are in the XF and the lower AU range. High-end AU and Mint State pieces are infrequently seen.

The present near-Mint State specimen boasts lightly abraded and delightful orange-gold surfaces with just a trace of high-point wear and a generous amount of luster. The design elements are well impressed, including nice detail in all obverse star centrils. A couple of reeding marks are noted on Liberty's cheek. Census: 17 in 58, 11 finer (3/11). (#8937)

# Condition Rarity 1864 Double Eagle, MS62

**1864 MS62 PCGS. CAC.** The 1864 double eagle was considered all but uncollectible in Mint State for many years, though the recovery of the *S.S. Republic* turned up a few dozen additional survivors, some of which are Mint State. The origin of the present example is unknown, but what is indisputable is that the 1864 is a condition rarity this fine and extremely rare any better. Swirling canary-yellow luster with honey overtones is more flashy on the reverse, which also shows fewer of the coin's grade-defining abrasions. On the obverse, several long marks through the fields are of particular concern, though the overall eye appeal is solid for an MS62 coin and out-and-out fantastic for the issue. Population: 9 in 62, 1 finer (3/11). (#8941)

Date in Rim 1865 Double Eagle, MS62 FS-301, Ex: S.S. Republic

**5469 1865 Date in Rim MS62 NGC. FS-301.** Ex: *S.S. Republic.* Listed in the current *Cherrypickers'* Appendix. Unknown to Breen, but the tops of the digits in a misplaced date thread through the bottom denticles of the obverse, most easily visible as the top of a curve where the erroneous 6 is. Quite apart from the variety, this is a well-preserved shipwreck piece that has pleasing detail and astoundingly bright luster that ranges from sun-yellow at the margins to pale straw-gold at the interior. Lightly abraded with luster grazes at left obverse contributing to the grade but no trace of wear. Comes with all the usual *S.S. Republic* trappings: display case, information disc, and slipcover. (#8943)

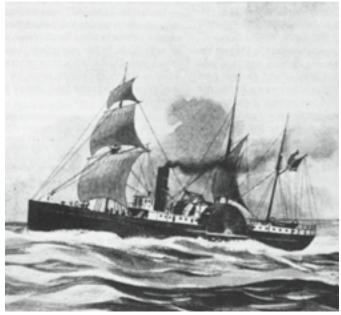

1865-S Double Eagle, MS63 Ex: *Brother Jonathan* 

**5470 1865-S MS63 NGC.** Ex: *Brother Jonathan*. The *S.S. Brother Jonathan* sank in July 1865 off the coast of Crescent City, California, where this coin and many others just like it sat on the ocean floor for 132 years until the treasure was recovered in 1997.

Although no variety studies were conducted at the time, this piece has extensive peripheral die cracks on both sides. The 1 is close to the bust, and the J of J.B.L. is over the inside right curves of the 8. The compact S mintmark is slightly left of center over the N and vertically centered between that letter and the tailfeathers.

Trivial hairlines and other marks are evident on each side. The strike is excellent and the surfaces exhibit frosty yellow luster with splashes of delicate orange toning. (#8944)

S.S. Brother Jonathan

## 1866-S No Motto Twenty, AU55 A Condition and Absolute Rarity

**5471 1866-S No Motto AU55 NGC.** The motto IN GOD WE TRUST first appeared on regular issue coins when it was introduced on the two cent piece in 1864. For most other denominations, those large enough to have extra space, the motto appeared in 1866. That was the transitional year for the double eagle, with No Motto dies used only at San Francisco. Mint records show that six obverse dies for the 1866 double eagle coinage were sent to San Francisco in November 1865, in preparation for the new year. Old reverse dies from 1865 remained serviceable, and were used with the 1866 obverse dies. Once the decision was made to add the motto, new reverse dies followed in March 1866.

The reverse die illustrated on this example remains in excellent condition, with a faint die crack to the left and right from the bottom of the D in the denomination. No other cracks, clash marks, lapping lines, or other die defects are visible. With the number of 1865-S double eagles found in the *S.S. Brother Jonathan* treasure, an interesting and plausible exercise would be a search for an 1865-S with the same reverse die crack.

All 120,000 1866-S No Motto double eagles were coined early in the year. However, the number of surviving specimens suggests a much lower actual mintage. Perhaps a portion of the original mintage was never released, and melted after the new dies arrived. Only about 200 to 250 coins still exist from that mintage, or about two coins per thousand struck (0.2%). Of those that do survive, AU coins are rarities and Mint State coins are extremely rare with a combined NGC and PCGS population of only five coins in MS60 or finer grades. In our sales we have never handled a Mint State example, and have handled only seven pieces equal to this coin or finer.

The frosty light yellow surfaces have deeper honey-gold rims, with scattered bagmarks that are inconsequential and expected on any surviving specimen. Census: 21 in 55, 10 finer (3/11). (#8945)

## 1869 Twenty, Reflective MS62 Example One of the Finest Known

**1869 MS62 NGC.** The 1869's moderate availability makes it a desirable issue for a Type Two twenty. It is sometimes located with a strong strike, which is quite unusual for any Type Two. When usually encountered, though, it is seldom found finer than an upper-end AU. The average grade for 1869 twenties from our data is AU50.7. The present piece soars far above this median grade and ranks among the finest known. Not only is this piece sharply defined on Liberty's hair, but the surfaces are minimally abraded, a feature infrequently seen on any 1869. Perhaps the most attractive feature of all is the brightly reflective prooflike fields on each side. Not only are the fields mirrored, but the frost on the devices sets up a modest cameo contrast. This is an exceptional 1869 twenty and far above-average for an example of the Type Two design. Census: 4 in 62, 1 finer (2/11). (#8955)

# Select Mint State 1869 Double Eagle

**1869 MS63 PCGS. CAC.** The 1869 was struck later than any of the famous shipwreck hoards, such as the *S.S. Republic*, the *S.S. Central America*, and the *S.S. Brother Jonathan*. The year 1869 was also prior to the wholesale export of gold coins to Europe, where they were retained by banks as bullion reserves. Thus, the 1869, along with other early Type Two dates, is confoundedly difficult to locate in quality Mint State. But here is a pleasing apricot-gold example that boasts full luster and lacks the unfortunate abrasions that tend to plague lower graded Uncirculated twenties. A strong bid will be needed to secure this prize. Population: 4 in 63, 2 finer (3/11). (#8955)

# Uncommon MS61 1870 Double Eagle

**1870 MS61 NGC.** The 1870 double eagle is one of several Type Two twenties not represented in the National Numismatic Collection holdings as a business strike, and Garrett and Guth note that "the average grade seen at auction is About Uncirculated, with many famous collections having the date in that state of preservation." The next owner of this MS61 example will be able to do them all one better. Though long abrasions are noted on the cheek and in the field to the left of the portrait, flashy honey-gold luster dominates the eye appeal, especially on the better-preserved reverse. Census: 15 in 61, 18 finer (2/11). (#8957)

MS62 1870 Double Eagle Rare Date in Mint State

**1870 MS62 NGC.** The 1870 double eagle, like a number of its Type Two fellows, is a confirmed condition rarity at the MS62 level and takes that state to extremes any finer; there are only six Select-or-better coins in the combined certified population (2/11). This is a particularly impressive example of the date, pale canary-gold with softly frosted central devices and solid peripheral detail. Cartwheel-lustered fields have the usual minor abrasions, as well as a handful of sharper marks that account for the grade, the most notable of which appears to the left of IN GOD WE TRUST. All things considered, though, this is a beautiful coin. (#8957)

# Challenging MS61 1870-S Double Eagle

5476 1870-S MS61 NGC. Though the "gold economy" of the United States faltered east of the Rocky Mountains because of the Civil War, the metal did not fall out of use on the West Coast during that time, and so coins such as the double eagle remained workhorses of commerce in post-Civil War California and Oregon. In fact, the denomination circulated so heavily that many Type Two double eagles from San Francisco are now condition rarities in Mint State. The 1870-S is among them, but we are privileged to offer a great representative here. The strike shows an element of softness on the portrait, but the honey-gold surfaces with their bold orange overtones offer immense luster. Scattered wispy abrasions and a few deeper marks, including one under Liberty's chin, contribute to the grade. Census: 21 in 61, 8 finer (2/11). (#8959)

1871-CC Twenty, Almost Uncirculated Second Rarest Carson City Double Eagle An Absolute and Condition Rarity

5477 1871-CC AU50 NGC. Variety 1-A. The 1871-CC is easily the second rarest Carson City twenty, after the legendary 1870-CC. The mintage was 17,387 pieces, but apparently attrition took a heavy toll, as only 200-250 examples are believed known today in all grades. An AU example, such as this, is an important offering for the CC gold collector. As Doug Winter succinctly expressed it in his latest CC reference: "For most collectors, a nice example of this date represents their single greatest expenditure on a Carson City double eagle."

This particular double eagle has an interesting history, being preserved in the same family for nearly a century. The coin was originally purchased by the current consignor's grandmother in 1917, as a graduation gift for her sister, who had just completed her studies at Slippery Rock State Normal School. The coin was presented in a "Best Wishes" envelope from the People's Bank of Unity, in Unity, Pennsylvania, with a special pocket to hold the coin. From a note on the envelope, we gather the new owner passed the gift on to her daughter in 1927. The coin was subsequently passed down through the family until the present time. These records are preserved by the consignor's family.

The striking details seen here are average for the issue, which is to say far above average when compared to the 1870-CC. The stars and eagle's plumage are well-detailed. The only area of softness is the hair curls around Liberty's face, a weakly struck area on most Type Two twenties. The surfaces are light reddish-gold, with good remaining luster around the devices. The only mentionable flaw is a shallow scratch in the field above Liberty's head. Census: 21 in 50, 72 finer (3/11). (#8961)

# Elusive MS62 1874-S Double Eagle

**5478 1874-S MS62 PCGS. CAC.** With the recovery of the *S.S. Central America* double eagles, the Type Two Liberty has emerged as the most challenging twenty dollar design for type collectors seeking a Mint State representative. Of the Type Two twenties, late S-mints are the most accessible in such grades, yet the 1874-S is a borderline condition rarity at the MS62 level, as seen here. Yellow-orange surfaces display great luster as well as subtle lilac overtones. The obverse stars are better-defined than usually seen, though scattered abrasions are present on and near the softly struck portrait. Population: 45 in 62, 4 finer (3/11). (#8972)

Select Mint State 1875 Twenty

**5479 1875 MS63 PCGS.** The 1875 double eagle is the only readily obtainable gold coinage denomination of the year. The gold dollar and quarter eagle business strikes numbered 400 each, the half eagle and eagle saw productions of 200 and 100 pieces, respectively — the latter the single smallest business strike gold coin production in U.S. numismatic history — and the three dollar gold was a proofonly issue amounting to 20 pieces. The twenty dollar, on the other hand, saw a generous emission of nearly 296,000 coins, most of which circulated to greater or lesser degrees. This Select Mint State example displays deep, rich orange-gold surfaces that are well-struck and show mostly minor luster grazes and abrasions. We note a small scrape on the reverse through the upper glory of rays. Population: 52 in 63, 3 finer (3/11). (#8973)

1875-CC Twenty Dollar, MS62

**1875-CC MS62 PCGS.** The mintage of Carson City double eagles in 1875 was a generous 111,151 pieces, making it an available issue within the series context. Most of those pieces, however, circulated extensively in the West of the late 19th century, and today the average certified survivor grades only AU50 to AU53. This coin in MS62 is very scarce, and anything finer is rare. Extensive luster radiates from both sides, with orange-gold coloration prevailing and small abrasions on both sides consistent with the grade. A few dark toning spots appear on the reverse, along with some nifty and extensive die doubling. PCGS has certified only 26 submissions finer (3/11). (#8974)

1875-CC Double Eagle, MS62 Seldom Seen Finer

**1875-CC MS62 NGC.** Substantial double eagle mintages at Carson City in the mid-1870s provide collectors an opportunity to acquire an attractive example for a date or type collection. This nicely defined example has frosty light yellow luster on each side with a single reverse copper spot below the F. Both sides have light abrasions, more so on the obverse, but none are significant. The 1875-CC is plentiful up to MS62, with more than 300 pieces certified at NGC and PCGS (3/11), but rare in higher grades, with just 49 finer coins (26 at PCGS, 23 at NGC). (#8974)

## 1876 Liberty Twenty, MS64 None Certified Finer

**1876 MS64 PCGS. CAC.** Just 25 examples of the 1876 Liberty double eagle, representing the final year of the Type Two design, are certified MS64, including 10 at NGC and 15 at PCGS. None have received a higher grade, not even MS64+. Those 25 recorded MS64 certifications undoubtedly include some resubmissions from individuals hoping to achieve the single MS65-certified coin. These coins are the finest available Centennial double eagles, and this is only the second appearance of an MS64 in any of our auctions since January 1993. It is also the only appearance of a CAC MS64, one of just two pieces that have been awarded the coveted CAC label. In fact, CAC has only approved seven examples in MS64 or finer grades for the entire Type Two design issued from 1866 to 1876.

This near-Gem specimen represents the "Heavy Motto" hub described in *A Guide Book of Double Eagle Gold Coins,* the style used on most Philadelphia Mint coins and all branch mint coins. A second style dubbed the "Light Motto" only appears on 1876 Philadelphia Mint double eagles. Otherwise, there are no variety studies for these coins, with the primary difference between dies being the date location.

Sharply struck as usual, this example has impressive surfaces with frosty mint brilliance and lovely orange-gold color. Only a few scattered marks are evident on each side, and they are inconsequential. Tiny copper spots attest to its originality. Population: 15 in 64, 0 finer (3/11). (#8976)

# Select Mint State 1878 Double Eagle

**5483 1878 MS63 NGC.** This second-year Type Three issue is relatively accessible in circulated grades and even lesser Mint State tiers such as MS61. Though MS62 examples are available with a little searching and for a price, Select survivors are a different story. This is just such a piece, lightly abraded overall but without the significant marks seen on so many lesser representatives. Only a few rim nicks scattered around the obverse are of any concern. The strike is solid, the orange-gold luster generous, and the overall eye appeal pleasing. Census: 27 in 63, 4 finer (3/11). (#8985)

Select 1879 Liberty Twenty Rare in Mint State Grades

**1879 MS63 NGC.** Production of double eagles declined at the Philadelphia Mint in 1879, with a reported mintage of 207,600 pieces. Many circulated survivors are available in today's market, but Mint State coins are rare. The present coin is a pleasing Select example with sharply detailed design elements. All star centrils are complete, and fine detail shows in Liberty's hair and the eagle's claws. The surfaces are lightly abraded, except for a few minor contact marks on the bust. The surfaces display vibrant satiny mint luster and rich intermingled green and rose-gold color. Census: 12 in 63, 7 finer (3/11). (#8988)

# 1883-CC Liberty Twenty, MS61 Only 14 Finer PCGS Coins

5485 1883-CC MS61 PCGS. The Carson City Mint continued stable double eagle coinage in 1883 with a mintage of 59,962 coins. The major gold producer for the year was San Francisco with a production of more than 1 millions coins, while Philadelphia only minted 92 proofs during the year.

This coin is a candidate for a high-grade Mint State collection of Carson City gold. PCGS has certified a total of 61 Mint State 1883-CC double eagles including 12 in MS60, 35 in MS61, 12 in MS62, and two in MS63 (3/11). That population data includes submission events as opposed to actual coins; the latter is certainly smaller.

A pleasing Mint State specimen, this piece has frosty greenish-yellow luster with myriad marks, none of any significance. The strike is above-average for the issue and for Carson City twenties in general. (#8999)

# Select Mint State 1888 Double Eagle

**1888 MS63 PCGS. CAC.** The year 1888 marked a resurgence for the double eagle denomination in Philadelphia, as the date saw a six-figure mintage at that facility for the first time since 1879. That resurgence was for decidedly commercial purposes, however, leaving most survivors worn to some degree. MS60 to MS62 examples exist, but Select coins such as the present piece are conditionally rare. This sharply impressed example has a wonderful "skin" over satiny surfaces that shift from yellow-gold to orange depending on the light. Great surface quality for the grade and eye appeal in spades. Population: 17 in 63, 6 finer (2/11). (#9008)

# Near-Mint 1892 Double Eagle

**1892 AU58 PCGS. CAC.** Garrett and Guth sum up the appeal of this business strike: "This issue is the last of the low-mintage Philadelphia double eagles. Of those minted, just 150 to 200 coins remain. Many of the great collections assembled in the past did not have an example of a circulation-strike 1892 double eagle. The date was usually represented by Proof examples."

Today's collectors separate the two, of course, and appreciate survivors such as this scarcely circulated AU58 example. Prominent yellow-orange luster is flashy, and though the coin is lightly abraded with a small dig near the date and a horizontal line of reed marks on the upper cheek, the overall eye appeal is solid. An important and fundamentally pleasing piece. Population: 21 in 58, 24 finer (3/11). (#9019)

Pristine MS66 1904 Double Eagle

**1904 MS66 NGC.** Both the 1904 and 1904-S double eagles saw record mintages for the Liberty Head series, of about 6.3 million and 5.1 million pieces, respectively — multiples of the second-largest issues. The 1904 is accordingly the ideal type coin, available for a price up to even the Superb Gem level. This Premium Gem example displays superlative luster over two-toned orange-gold and green-gold surfaces. The top-notch eye appeal is further enhanced by a near-total absence of abrasions. NGC has certified only a single piece at the MS67 level, along with two other submissions at PCGS (3/11). (#9045)

# MS65+ 1907 Liberty Double Eagle Single Finest PCGS-Certified

**5489 1907 MS65+ PCGS. CAC.** By 1907, the Liberty double eagle was well on its way to being replaced by the Saint-Gaudens design, as indeed it was before the year was out. In the time available, the Philadelphia Mint produced more than 1.4 million examples bearing Longacre's design. Yet no PCGS-certified example is finer than this MS65+ coin, which stands alone as the only Plus-graded piece among that service's Gems (2/11). Swirling yellow-orange luster pierces a veil of patina, and only a handful of stray marks are visible on each side, though a short line of reed marks is noted close to star 5 on the obverse. (#9052)

# Premium Gem 1907-D Twenty Dollar

5490 1907-D MS66 PCGS. The Denver Liberty double eagle series is short, containing just two issues. Of the pair, the 1907-D is more accessible in both low grades and high; the date is specifically notable for its high population in near-Gem and even Gem condition. At the Premium Gem level, though, the date becomes a condition rarity. This MS66 representative has a crisp strike and lightly patinated, satiny surfaces with color that shifts from wheat-gold to yellow-orange depending on the angle to the light. Smooth and beautiful with only a handful of grade-defining luster grazes. Population: 14 in 66, 1 finer (3/11). (#9053)

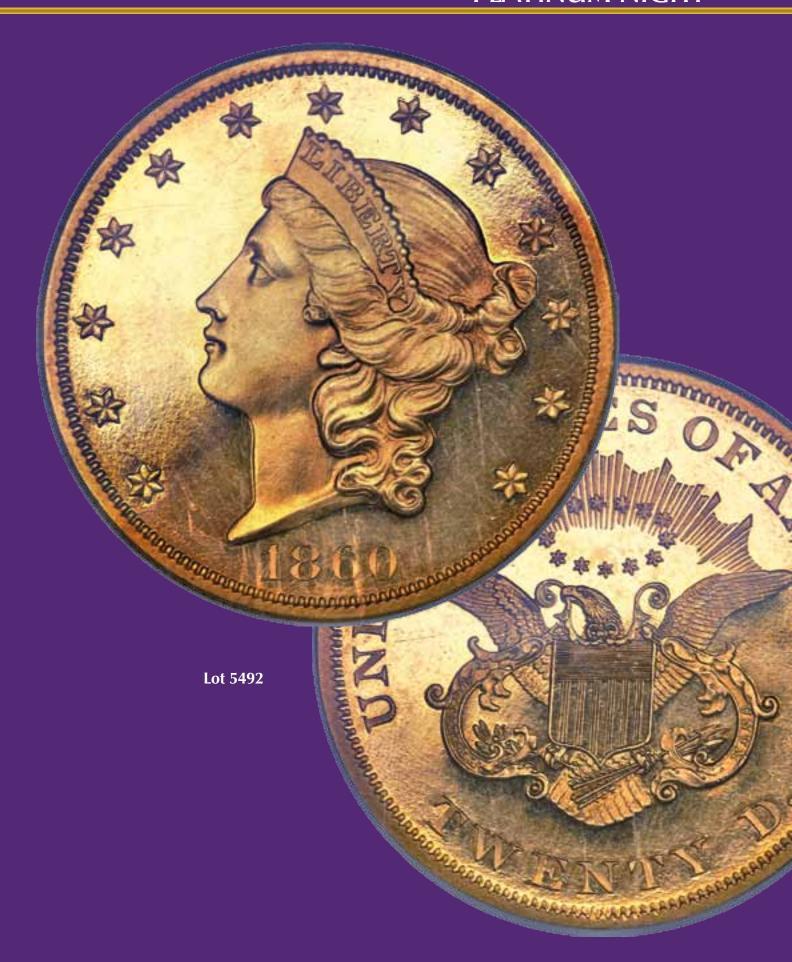

# Premium Gem 1907-D Twenty

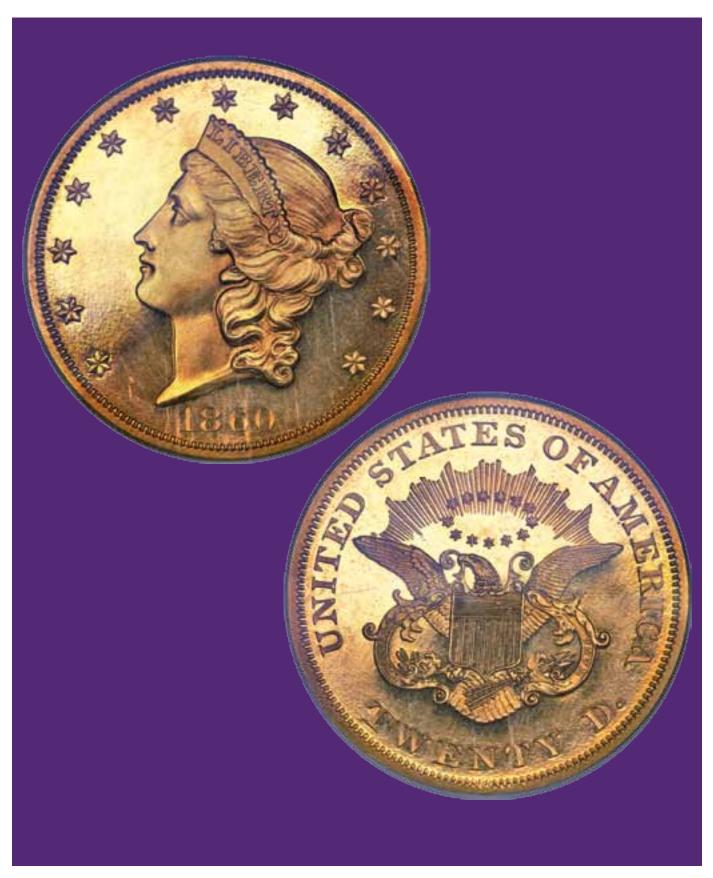

**5491 1907-D MS66 NGC.** The Denver Mint began production of regular U.S. coinage in 1906, but the change to the Saint-Gaudens design in 1907 means that the D-mint Liberty double eagle series amounts to just two issues. This is the second of the two, represented by a remarkably well-preserved Premium Gem with unusual surface texture that is at once flashy but with an element of satin. The strike is crisp, and aside from a few small disturbances such as one just to the left of Liberty's ear, each side is remarkably abrasion-free. Fantastic eye appeal. Census: 26 in 66, 2 finer (3/11). (#9053)

Denver Mint, 1906 to Present

# PROOF LIBERTY DOUBLE EAGLES

## Remarkable 1860 Double Eagle, PR64 Cameo Likely Only Seven Pieces Available Publicly

**1860 PR64 Cameo NGC.** The Breen *Proof Encyclopedia* records something north of 30 complete gold proof sets minted for 1860, although the Mint during this period would also provide individual denominations upon request. The net production of the 1860 double eagle is reported as 59 proofs. Notwithstanding that amount, the current numismatic thinking — espoused by Akers, Breen, Garrett and Guth — is that 10 or fewer identifiable proof specimens survive today in all grades. As Garrett and Guth put it, "In 1860, \$20 was a hefty sum of money, and only a few well-heeled collectors could have saved an example."

This is the kind of coin that makes history-minded numismatists (and there are many of them) marvel, to think of all the hardships and economic challenges this coin's owners must have endured for this piece to survive to the present in such pristine condition. A short list of those events would, of course, start with the Civil War hostilities that broke out the following year after this piece was minted, in 1861. But many catastrophes would follow, including Reconstruction, the Panic of 1893, the Panic of 1907, two World Wars, the Great Depression, innumerable recessions and stock market booms and busts, any one of which might have been the cause for attrition of a proof double eagle, whether for profit or mere survival.

As a further gauge of specimens existing today, the combined NGC and PCGS population data include 12 submissions (up considerably from the eight in the Garrett-Guth first edition, and leading us to believe that many of those new pieces are duplications). NGC enumerates one in PR64; five in PR64 Cameo; and one in PR65 Cameo, while PCGS shows one PR64; one PR63 Cameo; and two PR64 Cameo (3/11). It bears repeating, however, that we think those figures are inflated, due both to resubmissions and crossovers from one service to another.

The present coin, formerly housed in a PR63 Cameo PCGS holder, displays rich, mellow orange-gold coloration throughout, with splendid eye appeal abundant throughout. With the remarkable popularity and resultant price increases of proof gold (and gold in general) in recent years, we cannot help but believe that this piece may result in a standout performance when it crosses the auction block. For pedigree purposes we mention a curling lintmark between star 1 and the forward bust truncation; a slightly curved, short mark near the rim between stars 9 and 10; and a hair-thin, straight contact mark in the reverse field below the I in UNITED. All of the above are mere quibbles compared to the remarkable aesthetic appeal.

Based on our provenance research presented below, we believe that there may be 10 specimens surviving — although some duplication may be present in the lists below, and three of the survivors are nonetheless ensconced in museum collections, presumably off the market forever.

#### **Auction Appearances**

- **PR64 Deep Cameo PCGS.** Wolfson; Stack's (10/1962), lot 872; ANA Signature (Heritage, 4/2006), lot 2294, \$201,250.
- —PR64 Cameo NGC. Ed Trompeter Collection (Superior, 3/1992); Heritage (2/2000), lot 6883, \$71,300; Heritage (8/2004), lot 7683, PR64 Cameo PCGS, \$132,250; 2006 ANA (Bowers and Merena, 8/2006), lot 4397, PR64 Cameo NGC, \$189,750.
- —PR64 NGC. CAC. Henry Miller Collection (Heritage, 1/2011), lot 5276, \$230,000.
- —PR64 Cameo NGC. Heritage (9/2004), lot 7983, PR63 Cameo PCGS, \$94,875. The present specimen.
- —PR64. Father Flanagan (Superior, 5/1990), lot 5737, \$148,500.
- **PR63 PCGS.** Heritage (4/1999), lot 6259, \$54,625.
- -Choice Brilliant Proof. W. Foster Ely; W. Elliot Woodward (9/5/1883); Garrett Collection, Part II (Bowers and Ruddy, 3/1980), lot 789.

#### **Museum Collections**

- -Proof. B. Max Mehl (12/1930), lot 614; Alto Collection (Stack's, 12/1970), lot 418; Harry W. Bass, Jr. Core Collection, ANA.
- —PR63 Deep Cameo. Smithsonian Institution.
- -Proof. American Numismatic Society.

From The Slotkin Family Trust Collection. (#89072)

# 1870 Type Two Twenty, PR65 Ultra Cameo Only Four Confirmed Specimens in Collectors' Hands Ex: DiBello, Bass

1870 PR65 Ultra Cameo NGC. CAC. Like all dates in the Type Two series of proofs, the 1870 also had an impressively low mintage. Only 35 pieces were struck, but distribution seems to have remained low. Breen estimates that 10-20 pieces exist today; however, when one subtracts the number of institutionally held examples of this date, the actual number available to private collectors appears to number only four specimens. This is an unusually low number of survivors for proof gold, indicating several pieces were most likely dropped into circulation because of their high face value. The most complete roster we have been able to assemble accounts for nine examples with a single unattributed appearance.

- 1. Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 924; Ed Trompeter Collection; Orlando Sale (Stack's, 1/2007), lot 1410, which realized \$368,000. PR66 PCGS.
- 2. Probably Ex: David S. Wilson (S.H. Chapman, 3/1907), lot 330, which brought \$170 as a complete gold set; Atwater Collection (Mehl, 6/1946), lot 1262; Eliasberg; "H.R. Lee"/New Netherlands 49th Sale (10/1947), lot 119; Gaston DiBello Collection (Stack's, 5/1970), lot 1238; Bass II (Bowers and Merena, 10/1999), lot 1801; 2004 ANA Auction (Heritage, 8/2004), lot 7686. PR64 Deep Cameo; 2011 FUN Auction (Heritage, 1/2011), lot 5281, which realized \$189,000. **The present coin.** PR65 Ultra Cameo.
- 3. Smithsonian. PR64 Deep Cameo.
- 4. Smithsonian duplicate. PR64 Deep Cameo.
- 5. Samuel Wolfson (Stack's, 10/1962), lot 896; Spring Sale (Stack's, 4/1978), lot 913; Rarities Sale (Bowers and Merena, 8/1995), lot 372. PR61 PCGS.
- 6. ANS; ex: Brock. Proof.
- 7. Heman Ely to W. Elliot Woodward, 1883; Garrett Collection (Stack's, 3/1976), lot 434, part of an original 1870 gold proof set. Brilliant

#### Other Appearance:

A. Waldo Newcomer; F.C.C. Boyd; WGC (Numismatic Gallery, 1/1946), lot 873; "Memorable"/J.F. Bell (Numismatic Gallery, 3/1948), lot 693; Menjou (Numismatic Gallery, 6/1950), lot 1808. Brilliant proof. There is no known illustration of this specimen.

One curious attribute common to all proof 1870 twenties is mentioned in the 2007 FUN Sale by Stack's. A complex lintmark is seen through the letters IBE on Liberty's coronet; apparently this was impressed into the master hub.

The rarity and importance of Type Two twenties as proofs are difficult to overstate. When one compares Type Two to Type Three proofs, there are approximately eight times as many Type Three proof twenties available. Of course, there are many more dates available in the Type Three series, but the mintages of Type Twos are uniformly low, ranging from a low of 25 proofs to a high of 50.

This glittering, deeply mirrored proof displays heavy mint frost over the devices, giving the coin a stark cameo contrast on both sides. Unbelievable quality in a rare early date in the Liberty double eagle series. (#89085)

# 1873 Liberty Double Eagle, PR65 Ultra Cameo Closed 3 Date Logotype Probably the Finest Known Specimen

1873 Closed 3 PR65 Ultra Cameo NGC. Our review of auction offerings shows that the 1873 proof double eagle may be rarer than previously thought. In 1980 David Akers suggested that not more than 10 proofs survive. More recently, Jeff Garrett and Ron Guth placed the number of survivors at 10 to 12 coins. The mintage was a mere 25 pieces, and we have only traced eight distinctly different specimens, although a couple of others may still exist. In addition to those eight coins, there are nine older auction appearances that are most likely included among the eight in our list, and there are also two other pieces that Walter Breen mentioned in his *Proof Encyclopedia*. Our roster also shows that the present specimen is the finest of those eight pieces, and it is probably the finest known 1873 proof double eagle.

Certified pieces include the following: PR65 Ultra Cameo NGC; PR65 Cameo NGC; PR64 Ultra Cameo NGC; PR64 Cameo NGC (2); PR64 PCGS (2); PR63 Ultra Cameo NGC; PR63 PCGS; PR62 Ultra Cameo NGC; and PR61 PCGS (2). The 12 certified coins clearly represent some resubmissions. Interestingly, none of the PCGS-certified examples appear in our roster.

Numismatist Harry X Boosel made the year 1873 famous through his study of die varieties in an era when few numismatists made note of such things. He was especially keen on the date variations, and made famous the Closed 3 (Close 3) and Open 3 variations. Through the course of his study, he also formed a world-class collection of coins issued during the year, including a proof double eagle that Harry Bass acquired from the 1972 sale.

Harry Boosel was born in Chicago in 1912 and served the government for 36 years including four years with the U.S. Army Counter-Intelligence Corps. He was also active in numismatics, including service to the ANA Board of Governors, membership in the ANS, president of the Chicago Coin Club, and president of the Central States Numismatic Society. He also served on the 1964 Assay Commission. He was of Russian heritage, his parents immigrating in 1901. He was the only son of his parents, with three sisters. He lived another 22 years after the sale of his collection and died in Miami in 1994. Boosel was married to Tillie Sicher in 1950.

- 1. **PR65 Ultra Cameo NGC.** Amon Carter Collection (Stack's, 1/1984), lot 895; Ed Trompeter Collection; American Numismatic Rarities (1/2005), lot 1023 as PR65 Cameo NGC. **The present specimen.**
- 2. PR64 Ultra Cameo NGC. Harry X Boosel (RARCOA, 4/1972), lot 674; Harry W. Bass, Jr. (Bowers and Merena, 10/1999), lot 1815; Heritage (1/2010), lot 2274.
- 3. PR64 Cameo NGC. W. Foster Ely; W. Elliot Woodward (9/5/1883); Garrett Collection (Bowers and Ruddy, 3/1980), lot 792; Heritage (8/1992), lot 780; Superior (1/1993), lot 1520.
- **4. PR63 Ultra Cameo NGC.** Heritage (1/2011), lot 5282.
- 5. PR63 Cameo. U.S. Mint; National Numismatic Collection; Smithsonian Institution.
- **6. PR63.** Bowers and Ruddy (2/1974), lot 783; Superior (2/1987), lot 4313; Superior (2/1992), lot 3027.
- 7. PR62 Ultra Cameo NGC. Bowers and Merena (3/2006), lot 2210.
- 8. Proof. American Numismatic Society, ex: Brock, Morgan.

### **Additional Appearances**

- A. RARCOA (5/1977).
- **B.** Stack's (5/1957), lot 651
- C. Baldenhofer (Stack's, 1955), lot 1538
- D. Atwater Collection (B. Max Mehl, 1946), lot 1264.
- E. Bell Collection (Stack's, 1944).
- F. Kreisberg-Schulman (3/1965), lot 185. Plate unavailable.
- G. Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 1811. No photo.
- H. Memorable Collection (Numismatic Gallery, 3/1948), lot 695. No photo.
- I. F.C.C. Boyd (Numismatic Gallery, 1/1946), lot 876. No photo.
- J. Lansing, Michigan, cornerstone, per Walter Breen.
- **K.** Government of India Set, per Walter Breen.

As we noted earlier, we believe the present Gem Ultra Cameo proof is the finest known 1873 Closed 3 double eagle. It is a highly appealing piece with fully brilliant yellow surfaces and "black and gold" contrast. This nearly flawless piece shows a few lint marks mostly hidden in the design elements, along with a few planchet flakes in the fields that appear to be as struck. The strike is absolutely bold on both sides, with full design elements that perfectly reflect the detail in the dies. This piece is everything that the connoisseur could hope to obtain in a Type Two Liberty twenty, destined to be a showpiece in a world-class collection.

From The Slotkin Family Trust Collection. (#99088)

## 1876 Centennial-Issue Twenty PR62 Cameo, Rarely Seen in Any Grade

5495 1876 PR62 Cameo NGC. A splendid and desirable specimen of this Centennial-year rarity. This is a lovely Cameo proof example of the Type Two double eagle, produced only from 1866 to 1876. A total of 45 proofs were struck in 1876. In the Bass catalog, Bowers speculates that this was "perhaps in anticipation that visitors to the Centennial Exhibition of American Independence in nearby Fairmount Park would sally over to the Philadelphia Mint." If this was the case, they did not save them in higher numbers. Numismatic researcher Walter Breen, in his *Encyclopedia*, published in 1988, said only eight to 10 proofs are thought to exist. The rarity of this coin is probably underrated. In fact, Breen also makes the same estimate of eight to 10 pieces surviving for the 1875 proofs, of which only 20 were made.

The fields are highly reflective and provide excellent cameo contrast against the frosted devices. Improper storage, however, has led to numerous contact marks, digs, and other distractions, the most obvious on the obverse in the exposed, highly reflective areas surrounding the cameo of Liberty; there are also some minor marks on the cheek and neck. The reverse at first glance appears cleaner, but examination with a glass reveals a scrape running from the F and above AME. The strike is bold with star centrils, hair details, and the eagle's feathers and shield all well brought up. Even with the obvious flaws, this remains an appealing and desirable Cameo proof of one of the rarest double eagle types. NGC reports a proof population of one in 62 Cameo (this coin), with seven higher, while PCGS has certified none in 62 Cameo, with only two finer (3/11).

Ex: 2006 FUN Auction (Heritage, 1/2006), lot 3579. (#89091)

# 1878 Twenty, PR64 Cameo Only 20 Proofs Minted

**5496 1878 PR64 Cameo NGC.** In all grades and all designations, PCGS and NGC have combined to grade just 13 proof 1878 double eagles, from a total mintage of just 20 coins. It is probably reasonable to estimate a true population of less than 10 coins for this issue. We are aware of examples in the Smithsonian Institution and the American Numismatic Society. In addition to these, both the Garrett and Eliasberg collections included examples, and another was in the F.C.C. Boyd Collection. One additional example appeared in the Bass Collection, acquired from Stack's in 1973. The Bass specimen may or may not be the same as the Boyd example. Most others that have appeared in auctions over the past 25 years are probably duplicates of the privately held coins discussed above.

This is an impressive Cameo proof with extraordinary eye appeal. The central obverse and reverse designs are executed in bright yellow-gold with fully mirrored fields. Darker reddish-gold color is limited to the rims on each side, and this serves as a nice frame for the balance of the coin. The fields have the expected light orange-peel texture that is usually seen on proof gold from this period. The surfaces exhibit a few faint hairlines that do little to limit the overall appeal of this impressive proof twenty. Few blemishes are of any significance. The most notable pedigree marker is a small field nick just over the rays below D of UNITED. All of the design elements on each side are fully impressed. A visual treat. Census: 1 in 64 Cameo, 2 finer (3/11).

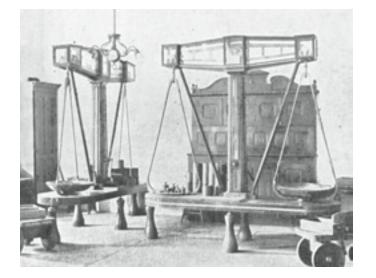

From The Slotkin Family Trust Collection. (#89094)

**1899 PR61 PCGS.** An undeniably rare proof striking from an original production of just 84 coins. This specimen has been rather obviously mishandled, perhaps being a victim of the Great Depression or inadvertently venturing into European holdings. There are numerous scuffy abrasions on the obverse, most notably under Liberty's chin and to the left of star 12, and the entire coin is draped in milky patina. For those wishing to own a more affordable proof double eagle, here is a definite opportunity. Population: 1 in 61, 11 finer (3/11).

Ex: 2005 ANA Auction (Heritage, 7/2005), lot 10420. (#9115)

# 1901 Liberty Twenty, PR64 Lovely Cameo Contrast

**5498 1901 PR64 PCGS.** The Philadelphia Mint coined 96 proof double eagles in 1901, and most students believe that about half of those (45 to 50 coins) still exist today in a wide range of grades. In 1982 David Akers wrote that about 30 to 35 proofs are known. More recently in 2006, Jeff Garrett and Ron Guth wrote: "The 1901 issue is one of the more available Type 3 double eagles in Proof, even though there are only 40 to 50 examples known."

The certified population reports include 40 proofs submitted to PCGS and 38 at NGC. Those 78 submissions include four Deep or Ultra Cameo coins, 41 Cameo proofs, and 33 undesignated pieces. The average grade of all 78 submissions is 62.5, characterizing this piece as slightly above average.

The lemon-yellow surfaces of this Choice proof combine deeply mirrored fields and frosty, lustrous devices that exhibit full detail, creating a delightful cameo appearance, despite the lack of a Cameo designation on the holder. The astute bidder may want to consider resubmitting this piece to attain that coveted designation. This is an important opportunity to acquire a relatively plentiful proof Liberty double eagle with excellent eye appeal. We expect considerable bidding activity when this beauty crosses the auction block at our Platinum Night event during the Central States Numismatic Society convention in Chicago in April. Population: 8 in 64, 1 finer (3/11). (#9117)

## 1901 Liberty Twenty, PR64 Cameo High-Quality Survivor, Only 96 Pieces Struck

5499 1901 PR64 Cameo PCGS. The 1901 proof Liberty double eagle has a reported mintage of 96 pieces, but that figure only indicates how many coins were struck, not the number officially released. There were certainly not 96 collectors of large-denomination gold coins in this country in 1901. Many proof double eagles probably went unsold and were melted after the end of the year.

The few numismatists who did collect double eagles in the early 20th century almost always purchased them as part of complete gold proof sets. Gold proof sets were not a hot item at the time, as evidenced by the 1901 dated set featured in lot 85 of the James B. Wilson Sale (Thomas Elder, 10/1908). The lot, including four gold coins containing \$37.50 in face value, sold for \$39. As the popularity of proof coins declined during the matte proof era, many collectors broke up their sets, keeping the more popular lower-denomination coins and spending the eagles and double eagles for face value. It is likely that only about 40 1901 proof double eagles survive from the original mintage.

The number of Cameo survivors is even smaller, and 1901 is the last year that any considerable number of coins was produced with a cameo finish, as the Mint changed to an all-brilliant finish in 1902. Currently, PCGS has certified seven examples in PR64 Cameo, with five coins in PR65 Cameo, and one specimen in PR66 Cameo. A single piece has been graded in PR64 Deep Cameo (3/11).

The present coin is a magnificent Choice example, with razorsharp striking details on all design elements. The devices have a frosty texture that contrasts dramatically with the brightly mirrored fields to produce the coveted cameo effect. The surfaces are an attractive greenish-gold color, and only a handful of minor hairlines and contact marks prevent a higher grade. (#89117)

## Near-Gem Cameo Proof 1906 Liberty Double Eagle Rare With Cameo Finish, Two Finer at PCGS

5500 1906 PR64 Cameo PCGS. Mint records indicate a mintage of just 94 coins for the 1906 proof Liberty double eagle, quite low for a 20th century proof issue. The business-strike coinage was also small that year, adding some pressure to the demand for high-grade proofs. It is unlikely that all of the 94 pieces minted were actually sold in 1906, and the popularity of gold proofs declined drastically after 1907, because the public rejected the matte proof finish used on the new coinage designs. Many double eagles purchased as part of complete gold proof sets were later spent for face value because the premiums paid by coin dealers, and the prices realized at public auction, were quite low. It is doubtful that more than 45-50 examples survive today in all grades.

While all 1906 proof double eagles are rare, specimens with cameo contrast are especially elusive. Starting in 1902, the Mint employed an all-brilliant finish on proof coins, abandoning the old frosty devices that provide the cameo contrast with the mirrored fields. A few early strikes from fresh dies, like the present coin, have some degree of frosty texture on the devices, but few examples display the kind of contrast seen on coins from the 19th century. At present, PCGS has certified only four coins in PR64 Cameo, with two examples finer (3/11). Deep Cameo coins are unknown at either of the leading grading services, and none have appeared at public auction.

The coin offered here is a delightful Choice specimen, with deeply reflective fields and unusually frosty devices. The proof dies were excessively polished in 1906, resulting in some loss of detail in certain areas. This piece exhibits the well known "broken nose" effect, where the line of Liberty's profile has been nearly erased between her nose and eye brows. The reverse shows some loss of detail on the eagle's head, as well. This coin possesses tremendous eye appeal, absolute rarity, and historic appeal. It should find a home in one of the finest collections of Liberty double eagles. (#89122)

# Radiant 1907 Liberty Head Twenty, PR64 Rare Last-of-Type Issue

5501 1907 Liberty PR64 PCGS. Even at Heritage, where we are accustomed to seeing some extremely rare coins, the appearance of a second 1907 Liberty Head twenty in the same Platinum Night auction is fairly remarkable. The original mintage was only 78 pieces in this last year of the long-running James B. Longacre design, a total considerably lower than the proof productions for the few years preceding. It does appear that more examples were likely saved through the decades due to their status as last-year-of-type examples, and we believe, along with Garrett and Guth, that somewhere between 40 and 50 pieces survive today, a figure that includes some impaired proofs and lower-grade coins.

Given the paucity of Cameo and Deep/Ultra Cameo certified specimens within this timeframe — a factor of the Mint's changing its manufacturing method for proof gold to the "semibrilliant" approach — it also appears that the certified population data at NGC and PCGS are more than normally inflated, with collectors seeking not only to upgrade in terms of points but also in terms of contrast levels.

At the near-Gem non-Cameo level of the present piece, PCGS has seen 16 submissions, with three finer — certainly including a complement of resubmissions. Even though this piece is not certified as a Cameo coin, it does exhibit considerable field-device contrast, with radiantly mirrored fields and a modicum of mint frost on the devices. The orange-gold surfaces display splendid eye appeal. As it is and regardless of whether it is ever resubmitted, this is a splendid and rare proof gold type coin that will always form the centerpiece of a fine collection. Population: 16 in 64, 3 finer (3/11). (#9123)

# Richly Contrasted 1907 Liberty Twenty, PR64 Cameo Only Three Finer at PCGS

5502 1907 Liberty PR64 Cameo PCGS. The 1907 Liberty Head double eagles are simultaneously the last of their design and numismatic anachronisms, as the first proofs of the Saint-Gaudens designs, the Ultra High Relief twenties, were struck in February of that same year. The 1907 Libertys are popular with the many type collectors who focus on last-year issues. They are also in demand because they can occasionally be found in high proof grades, as here, due to their original mintage of 78 recorded pieces. It is likely that the Mint actually sold most of the issue to collectors, who were in turn more likely to hang onto them as the last of their kind.

The Breen *Proof Encyclopedia* notes of the issue, "Popular final year of the design; becoming appreciated as such. Date almost centered, slants up; 'broken nose' as in 1906."

Given the combined certified populations at NGC and PCGS, we concur with Garrett and Guth's assertion that about 40 to 50 specimens survive today, including a few impaired proofs and all contrast levels, although 60 examples is not out of the question.

The "broken nose" feature is an area of brilliance at the top or bridge portion of Liberty's nose. The feature is clearly visible on the examples in this auction as well as the piece depicted in the Breen reference.

The U.S. Mint after 1901 altered the way in which it manufactured proof gold coins, which earlier featured deeply mirrored fields, created through polishing the dies to high brilliance, and (usually) frosted devices, the areas in the die that were recessed. The later style, which Breen's *Proof Encyclopedia* called "semibrilliant," was created merely by polishing the devices — the recessed areas of each die — which greatly reduced the contrast between them and the fields.

As such, the noticeable field-device contrast present on this piece is a "rarity on a rarity," as few survivors boast such surfaces. The devices are well-frosted on both sides and the fields well-mirrored, with rich orange-gold coloration prevailing when the coin is viewed straight on, and the desired gold-on-black contrast when the piece is angled. A small toning spot near the rim between stars 2 and 3 is scarcely perceptible on this piece, which is fully struck. We also note a small area of gray patina just above the eagle's right (facing) wing. Population: 9 in 64 Cameo, 3 finer (3/11). (#89123)

### HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, Wire Rim, AU55 Significant Mint Luster Around the Devices

1907 High Relief, Wire Rim AU55 PCGS Secure. When Theodore Roosevelt died in 1919, journalist William Allen White said, "The man was gigantic." He was larger than life in so many ways, from San Juan Hill to a retirement that began with a yearlong African safari. In numismatics we know him primarily as the president who enlisted Augustus Saint-Gaudens' talents to redesign the nation's coinage. Those efforts resulted in larger-than-life coins, the ten and twenty dollar gold pieces. This is a lovely, still partially lustrous example of his "pet crime," the double eagle. The design elements are sharply defined and surrounded by significant mint luster on each side. The only problem we see are a few shallow scrapes in the left obverse field. (#9135)

MS62 1907 High Relief Twenty Prominent Wire Rim

**5504 1907 High Relief, Wire Rim MS62 PCGS.** Famed artists Auguste Rodin and Augustus Saint-Gaudens were well-acquainted with each other and their respective works. Both sculptors were naturalists, and both captured the physical and intellectual force of their subjects. Yet the two sculptors differed widely in the results they achieved; Rodin was more concerned with character and emotion and turned away from idealism, while the last masterwork of Saint-Gaudens, his High Relief double eagle, is inherently idealistic. Offered here is an MS62 example, yellow-gold with moderate patina. The interiors are well-preserved for the grade assigned, though the rims show a number of nicks. (#9135)

### MCMVII Wire Rim High Relief Twenty, MS63 A Bright, Dazzling Example

5505 1907 High Relief, Wire Rim MS63 PCGS. The High Relief Saint-Gaudens double eagle is generally considered the most beautiful (and popular) U.S. coin design ever produced, aside from a handful of artistic pattern issues. This example has bright, satiny yellow-gold surfaces throughout with no variation in hue. Every detail is sharp with the swirling die polish of most known pieces evident in the fields of this example. This is a splendid — one might say dazzling — representative of the MS63 grade, with only a few of the scattered tiny abrasions that are expected at the Select grade level. (#9135)

## Select 1907 Wire Rim High Relief Twenty

Theodore Roosevelt wanted to transform American coinage, he took inspiration from the ancient Greeks, and the gifted sculptor Augustus Saint-Gaudens followed this cue. Both Roosevelt and Saint-Gaudens also looked back to the Greeks for inspiration in producing coins struck in high relief. Because of the difficulty in striking such coins in high relief, only 12,367 pieces were produced. They proved to be instant classics and instant collectibles, bringing more than face value even when they were new. Of course, it will take far more than \$20 to take home this MS63 example, a moderately patinated sun-gold beauty with a prominent wire rim around the upper obverse. Surface quality is decent for the grade, though a small nick is noted on Liberty's left (facing) leg. (#9135)

High Relief, Wire Rim 1907 Twenty, MS63

1907 High Relief, Wire Rim MS63 NGC. An emblem of the "Renaissance of American Coinage," the High Relief Saint-Gaudens double eagle was also symbolic of America's emergence as a true world power. As the three-dimensional figure of Liberty strides forward toward the viewer, with the rays of the sun behind, one immediately senses this is the representation of the dawn of a new age. While production of the High Relief twenties was short-lived, the impact of the design has been far more lasting, and the issue's popularity has endured. This Select example, gleaming sun-yellow with a strong wire rim, offers an excellent balance of rarity and quality that should appeal to many collectors. (#9135)

# 1907 Wire Rim High Relief Twenty, MS65 Extraordinary Quality and Satiny Luster

**1907 High Relief, Wire Rim MS65 PCGS.** The dynamic quality and sheer beauty of the High Relief twenties can be explained by the personal credo of Augustus Saint-Gaudens:

"A sculptor's work endures for so long that it is next to a crime for him to neglect to do everything that lies in his power to execute a result that will not be a disgrace ... It is plastered up before the world to stick and stick for centuries, while men and nations pass away."

Several generations have passed and more than a century has gone by since these coins were produced, and yet their beauty and collectability not only endures but grows with each succeeding generation of collectors. The other commissions that Augustus Saint-Gaudens is most celebrated for, the Sherman Monument, the Shaw Memorial, and the Farragut Monument all commemorate Union heroes from the Civil War. While their artistry is still relevant today, the heroes that depicted are less well-known 140+ years after the end of the Civil War. However, the more abstract concept of Liberty, as embodied in the High Relief twenties from 1907, is one that is just as relevant to collectors and non-collectors today as it was more than a century ago.

This High Relief perfectly preserves that concept of Liberty in coin form with no visible imperfections. The thick, satiny mint luster shows a few tiny contact marks, but magnification is needed to discern them. Each side displays the usual light reddish cast, and the striking details are fully brought up throughout.

Ex: October Stamford Coinfest (Heritage, 10/2010), lot 5096. (#9135)

Flat Rim 1907 High Relief Twenty, MS61

5509 1907 High Relief, Flat Rim MS61 NGC. When Augustus Saint-Gaudens attended the École de Beaux Arts in Paris in the late 1860s and early 1870s, he was confronted with concepts about art that were unconventional in America at that time. One of the concepts he encountered in those early years is, "Marble, gold and granite are not real. The only thing that is real is an idea." Saint-Gaudens worked in all those media. Throughout his career he sought to translate ideas and feelings using the "unreal" media of marble, gold and granite. But it was with the High Relief twenty, designed in the last two years of his life, that he came closest to realizing an actual idea in sculptural form — the idea of Liberty. Offered here is a yellowgold example of the popular Flat Rim type, lightly abraded through the fields with a nick on the eagle's wing but also with Liberty's figure remarkably untouched. (#9136)

Near-Gem Flat Rim, High Relief 1907 Saint-Gaudens Double Eagle

**5510 1907 High Relief, Flat Rim MS64 NGC.** Mint officials considered the initial Wire Rim variant of the High Relief double eagle to be a problem because of its propensity to abrade, thus reducing the coin's weight below legal standard. They also thought it was aesthetically unpleasing, and thus the Flat Rim replaced the Wire Rim. Jeff Garrett and Ron Guth, in the *Encyclopedia of U.S. Gold Coins, 1795-1933,* say: "The Flat Rim coins are much scarcer than the Wire Rim by a margin of nearly 5 to 1 ...."

Peach-gold surfaces on this near-Gem Flat Rim variety exhibit subtle olive-green tints and great luster. The usual powerful strike imparted bold definition to the design features, giving them a medallic appearance. Some remnants of the "fin" are noted on each side, which is not unusual. Many Flat Rim coins display traces of a localized wire rim, and a fin may not be complete on a Wire Rim coin. A few minor marks on the eagle define the grade. (#9136)

Near-Gem 1907 High Relief Twenty Flat Rim Type

5511 1907 High Relief, Flat Rim MS64 NGC. High Relief double eagles have been popular with collectors since first appearing on the scene a century ago, not strictly for reasons of rarity — although they are by no means common in an absolute sense — but because the beauty of Augustus Saint-Gaudens' depiction of an advancing Liberty transcends numismatics into fine art. These coins are known with two different edge variations — Wire (or Knife) Rim, and Flat Rim, although the latter is a bit of a misnomer, as most such coins, including the present example, carry more than a trace of raised metal around the rim.

This piece has an impressive metallic sheen under pale gold color on the obverse, with the reverse showing a bit of an orange tint. A couple of minor, grade-defining marks appear in the sun's rays above the Capitol building, but the overall eye appeal is unquestionably impressive. (#9136)

# SAINT-GAUDENS DOUBLE EAGLES

1908 With Motto Twenty, MS65 Scarce in High Grades

5512 1908 Motto MS65 PCGS. Struck late in the year, the 1908 Motto double eagle issue had a mintage of 156,258 coins and is a condition rarity in Gem grades, although lower-grade coins are rather common. It is believed that a large percentage of the mintage was either exported or melted. Those exported have slowly returned to the United States in recent decades and are usually in lower Mint State grades. The few high-grade coins were probably preserved in coin collections since the time of issue. This lovely Gem has darker patina over the high points and trivial surface marks that are mostly hidden in the design elements. It is a splendid example with frosty yellow luster. Population: 52 in 65, 10 finer (3/11). (#9147)

## 1909/8 Double Eagle, MS64 Only Saint-Gaudens Overdate

**1909/8 MS64 PCGS Secure. FS-301.** The only overdate in the Saint-Gaudens double eagle series, and one of just two for the denomination alongside the 1853/2, the 1909/8 is popular with collectors and elusive in higher grades. This overdate was quickly discovered with Edgar Adams reporting the variety in the May-June 1910 issue of *The Numismatist*.

Mint records show that 161,282 double eagles were coined in Philadelphia in 1909, although no records exist for the individual dies. Today, populations are about equal for the overdate and normal date varieties, suggesting that the original mintage was probably about the same, or about 80,000 each. Dave Bowers suggests that about 40%, or about 65,000 coins, were the overdates in *A Guide Book of Double Eagle Gold Coins*.

This Choice Mint State specimen exhibits frosty yellow luster with faint orange overtones. The strike is excellent, with the overdate feature clearly visible. PCGS has only certified 21 finer examples (3/11). (#9151)

Multihued Gem 1911 Double Eagle

**1911 MS65 NGC.** The two sides of this Gem 1911 double eagle are equally attractive but present distinct appearances. The obverse has a peach-orange tint to yellow-gold surfaces and appreciable cartwheel luster with a little flash, while the reverse displays a greenish overtone at certain angles while presenting as peach-gold otherwise. The luster on the reverse is also a touch more intense. Aside from a few tiny marks and a small scrape hidden in the reverse rays, this is a carefully preserved example. NGC has certified a mere 14 numerically finer pieces (3/11). (#9157)

Sharp Superb Gem 1911-D Double Eagle None Finer at Either Service

**1911-D MS67 NGC.** The 1911-D double eagle is one of the more easily encountered Saint-Gaudens double eagles in high Mint State grades. This is a function not only of the survival of a larger percentage than most issues in the series, but also of the excellent production values under which the pieces were produced. The Akers *Handbook,* second edition, notes that "the strike is invariably sharp" and that "the eye appeal is above average," due to the large number of high-quality survivors. The present Superb Gem is an absolutely stunning coin, with superlative luster emanating from orange-gold surfaces with a greenish rim accent. the surfaces are fine-grained and fairly mattelike, and show an almost total lack of abrasions of any size. A super example for a type or date run. Census: 32 in 67, 0 finer, excluding the 1911-D/D coins (3/11). (#9158)

1914 Double Eagle, MS65 Five-Figure Mintage

**5516 1914 MS65 PCGS.** The 1914 Saint-Gaudens issue is one of the many series entries that confirm that there is absolutely no relation between the initial mintage figures and the subsequent survival rates. Hoarding, exporting, repatriation, mass meltings, and happenstance have all played major roles in the survivorship of one issue over another. In the case of the 1914 twenty, while only 95,200 coins were produced, judging from the population figures it appears as though somewhere from 6% to 10% of that original mintage survives today, including both certified and "raw" specimens.

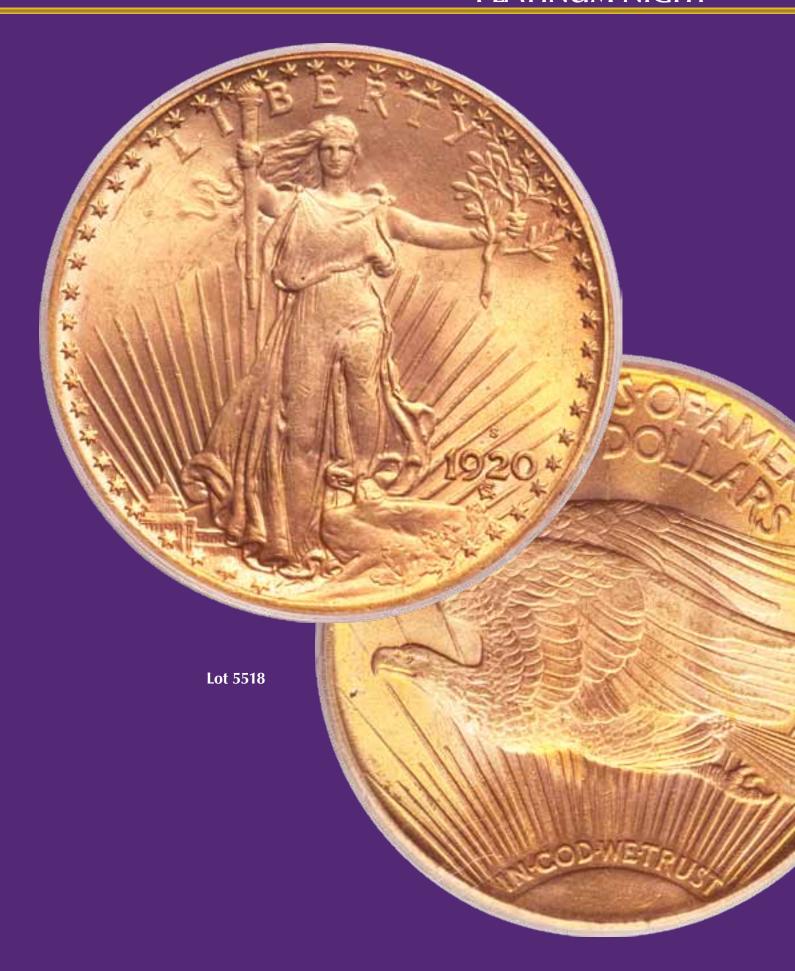

PCGS has certified 36 coins as MS65, including the present example, with two pieces numerically finer (3/11). Intermingled greenish-gold and hazel-gray combine delightfully on both sides of this Gem, with wonderful bright-frosted luster radiating from distraction-free surfaces. A real treat for the Saint-Gaudens enthusiast. (#9164)

## Iridescent 1915 Double Eagle, MS65

5517 1915 MS65 NGC. This Gem Saint-Gaudens twenty from Philadelphia has distinctive coloration, primarily orange-gold over sun-yellow with a significant greenish overtone that appears when the surfaces are tilted away from the light. Features such as Liberty's torch hand are a trifle softly struck, but the definition is better elsewhere. While the 1915 double eagle defies its lower mintage to be a relatively accessible date in grades through MS64, better examples such as the present piece prove far more elusive, almost condition rarities. Census: 40 in 65, 1 finer (3/11). (#9167)

#### Choice 1920-S Saint-Gaudens Double Eagle Important Series Rarity Ex: Reed Hawn

**1920-S MS64 PCGS.** The 1920-S Saint-Gaudens double eagle is one of the most important rarities of the series, and this particular example has an illustrious pedigree in terms of historical interest and financial success. This coin was once a highlight of the celebrated Reed Hawn Collection, in the company of other rarities like the 1804 dollar and the 1913 Liberty Head nickel. Hawn was a prominent collector from Texas whose success has been studied by several financial analysts. On pages 100-102 of his 2010 investment study *Rare Coin Investing,* David Ganz singles out this particular 1920-S double eagle as an example of a coin that has done well financially over the years.

A prized rarity in the Saint-Gaudens double eagle series, the 1920-S holds a unique historical position in that assemblage. Before the United States entered the First World War, gold twenties actually circulated in the western part of the country. Coins from that early period are more available today than many later dates, such as the 1920-S. The war brought inflation, with consequent rising prices in gold and other metals. Double eagle production in San Francisco was halted in 1916 and did not resume until 1920. A large mintage of 558,000 pieces was produced at the San Francisco Mint that year, but the commercial role of the double eagle had changed. The big gold coins no longer circulated freely, and ordinary citizens seldom saw them. Instead, the government and the banking system kept the coins in reserve.

They served two purposes: The government used some, stored in mint bags, to redeem Gold Certificates. Other coins were used as specie payments to foreign governments and banks. Private ownership of gold was essentially illegal after the Gold Recall Act of 1933. Most of the government-held coins were melted in 1937, converted into gold bars, and transported to Fort Knox. The coins used in international trade largely escaped this fate, and many of them were found decades later in European banks. Enough circulated specimens of the 1920-S exist to suggest that a few bags may have reached circulation, but examples have never been readily available. Almost all of the mintage was melted. The 1920-S was the earliest issue subject to this wholesale destruction, and it is very scarce today.

In recent times, many numismatic scholars have studied the rarity of the 1920-S. Walter Breen estimated that less than a dozen examples survived, a figure demonstrably too low in view of current population data. David Akers considers the issue to be the fifth rarest in the Saint-Gaudens double eagle series. In his 2006 reference on double eagles, Q. David Bowers estimated that there were 45-60 circulated specimens extant, and perhaps 40-60 examples in Mint State grades. The current population reports from NGC and PCGS reflect a combined total of 21 examples in MS64, with only eight finer. The roster of known specimens in the Ganz reference lists 12 examples in MS64 or finer, suggesting the population data may include a few duplications from crossovers and resubmissions. Clearly, at the near-Gem level, the date is rare.

The present coin is a dazzling Choice example of this rare and popular date. The surfaces display soft, frosty luster with a better than average strike. Crisp detail appears on the berries on the olive branch, and the pillars of the Capitol building can be individually counted — areas frequently soft on this issue. Few abrasions show for the grade, although a planchet void near the eagle's beak serves as a pedigree marker. The surfaces have attractive, reddish patina yielding to olive at the rim. Outstanding eye appeal, rarity, and historical importance make this a prize for the discerning collector. Population: 10 in 64, 6 finer (3/11).

Ex: Reed Hawn Collection (Stack's, 10/1993), lot 1118, not certified at the time, graded Choice Brilliant Uncirculated by the cataloger; Long Beach Signature Auction (Heritage, 6/2000), lot 7702; Philadelphia ANA (Heritage, 8/2000), lot 7599; Benson Part II (Goldberg, 2/2002), lot 2271; Dallas Signature Auction (Heritage, 10/2008), lot 2486; Los Angeles ANA (Heritage, 7/2009), lot 1128; CSNS Signature Auction (Heritage, 4/2010), lot 2352. (#9171)

Gem 1922-S Saint-Gaudens Twenty Only Two Examples Finer at PCGS

**5519 1922-S MS65 PCGS.** At one time, the 1922-S Saint-Gaudens double eagle was considered one of the most challenging dates of the series. In 1949, B. Max Mehl described the 1922-S as "one of the rarest of all Branch Mint Double Eagles," and estimated "Probably not more than a dozen specimens known to exist." Fortunately for today's collectors, the availability of this issue increased in later years, as examples surfaced in European holdings in the 1950s and a Central American hoard in 1983. However, the 1922-S is still a scarce date in general, and examples in Gem condition are very rare.

The present coin is an impressive Gem, with sharply detailed devices and few signs of contact in the fields. The surfaces display vibrant frosty mint luster and pleasing greenish-gold color. Population: 11 in 65, 2 finer (3/11). (#9174)

Flashy 1923-D Twenty Dollar, MS67

**1923-D MS67 PCGS.** The 1923-D double eagle merits its reputation as among the most splendidly produced issues in the Saint-Gaudens series. The present Superb Gem certainly bears that truism out, as its radiant cartwheel luster would shame many a Morgan dollar. The two-toned surfaces are primarily orange-gold, but generous and unpredictable accents of jade appear here and there as the coin is "flashed" — and flashing is certainly something that this coin's new owner will want to do a lot of. The strike is uniformly bold. Among the few dozen finest certified at PCGS. Population: 61 in 67, 0 finer (3/11). (#9176)

1924 Superb Gem Twenty Amazing Mint Frost

5521 1924 MS67 PCGS. The 1924 Saint-Gaudens twenty may be a common issue in lower grades, but there is nothing "common" about this lovely, high-grade example. The mint luster is noticeably "thick" on this piece and clearly frosted rather than satiny. The nearly perfect surfaces are instantly recognizable as belonging to a Superb Gem, as there are no obvious or mentionable abrasions on either side. This impression of quality is reinforced by the uniformly crisp striking details and the attractive and original peach-gold and lime coloration. (#9177)

1924-D Saint-Gaudens Twenty, MS64 A Branch Mint Rarity

**1924-D MS64 PCGS.** A key to the series, the 1924-D is especially elusive in higher grades with full Gem specimens rarely encountered. This near-Gem is destined for a high-grade collection while saving the buyer thousands over the price of an MS65. Beginning in 1924, all of the Denver and San Francisco Mint Saint-Gaudens double eagles share a common story.

Most examples have high mintages, such as the 3 million 1924-D twenties, and all are rarities. Those coins remained in Mint or Treasury vaults without being released into circulation. A few pieces reached collectors through special arrangement with their bankers, while all others remained in storage for several years until they were melted in the mid- or late 1930s.

This near-Gem, undoubtedly preserved by a progression of now unidentified collectors, exhibits frosty yellow luster with faint pink overtones and a few minor surface marks that limit the grade. Population: 166 in 64, 10 finer (3/11). (#9178)

**1924-D MS64 PCGS.** It is no longer considered a great rarity as it was a few decades ago, but the 1924-D is still scarce in the higher Mint State grades. The increased supply is due to overseas repatriations, in large part. Bowers, noting that despite the issue's scarcity it is offered with some regularity, wrote an especially *bon mot* in his series *Guide Book*: "Sometimes a rare double eagle will do quite a bit of flitting around before it finds a lasting perch." This lustrous near-Gem should soon find a lasting home, due to its rich luster over warm, orange-gold surfaces that exhibit excellent eye appeal. PCGS has seen only 10 submissions in finer grade levels, likely including some duplications (3/11). (#9178)

Bold Two-Toned 1924-D Double Eagle, MS64

**1924-D MS64 PCGS.** This scarce near-Gem 1924-D double eagle is a tale of two sides, as the reverse is a consistent medium yellow-gold coloration. The obverse, conversely, boasts a rich two-toned color palette, with deep, rich orange-red tones — and an occasional patch of deeper lilac — cutting a diagonal swath through the sun's rays above the date upward through LIB and Liberty's torch. The contrasting greenish-gold tints prevail elsewhere on the obverse. A few marks on Liberty's midsection are consistent with the grade, and some minor strike weakness appears near the obverse rims, affecting the 4 in the date and some of the peripheral stars. A pleasing example of the issue. PCGS has certified only 10 submissions finer (3/11). (#9178)

MS64+ 1924-D Double Eagle Famous Melt Rarity

5525 1924-D MS64+ NGC. Just over 3 million 1924-D double eagles were struck, but just over 3 million were melted as well, leaving only a handful of survivors to be distributed among the many Saint-Gaudens enthusiasts of today. In the context of the known population, this is a high-end example that comes remarkably close to Gem status. Bright yellow-gold luster with a hint of green takes on a more overt sun-yellow hue in an arc along the upper reverse. Well-defined with excellent all-around eye appeal, though an abrasion crossing two of the left-side obverse rays keeps the coin just shy of an even finer designation. Census: 1 in 64+, 10 finer (3/11). (#9178)

Superb Gem 1925 Double Eagle

5526 1925 MS67 NGC. The 1925 double eagle is a relatively common date, if not "1924 or 1927" common, and Gems and even Premium Gems are available with just a little searching. Tracking down a Superb Gem takes far more effort, though with the offering of this example, Heritage has had a Superb Gem representative of the issue in three consecutive auctions, an unusual feat and privilege.

In any event, this MS67 example compares well to the two preceding pieces, as well as any other survivors of the date. Lightly patinated yellow-gold fields are frosted on the high points, and only a few tiny rim irregularities and interior grazes preclude an even finer designation. Census: 19 in 67, 0 finer (2/11). (#9180)

Low-Survival 1925-S Double Eagle, MS61 Nice Color and Luster

5527 1925-S MS61 PCGS. The 1925-S Saint-Gaudens double eagle claims a deceptively large mintage of nearly 3.8 million pieces. The great majority of this high-production issue was melted after the Gold Recall of the 1930s, and the 1925-S is scarce to rare in all grades today. Experts estimate a surviving population of 275-330 coins in all Mint State grades, with a like number extant in circulated condition.

The present coin is a well-struck Mint State specimen, with a touch of softness evident on the Capitol building. The pleasing greenish-gold surfaces are lightly abraded for the grade, with vibrant mint luster. (#9182)

1925-S Double Eagle, MS63 Extensively Melted Issue

**5528 1925-S MS63 PCGS.** An above-average strike with satiny yellow luster and iridescent overtones. The surfaces show scattered ticks from handling, but none warrant particular description. Most of the nearly 4 million coins minted were exported or stored in Treasury vaults, only to be melted a decade later. Many specimens were found in French banks about 50 years ago; without those Mint State coins, this date would be all but unobtainable in this condition, despite a plentiful mintage. PCGS has only certified 24 finer coins (3/11), hardly adequate for the hundreds of active Saint-Gaudens collectors. (#9182)

## Gem 1926-S Double Eagle, Melt Rarity

**5529 1926-S MS65 PCGS.** The records claim more than 2 million 1926-S double eagles were struck; while the records are correct, they also have little bearing on today's collecting reality, which reflects the near-total destruction of the date during the government gold melts of the 1930s. Only a relative handful of survivors waited out the confiscation and prohibition periods to make it to today, this Gem among them. The luster is warm, lightly patinated yelloworange with copper spotting along the left obverse and reverse. The strike is San Francisco soft along the margins, but the interiors are better-impressed. A couple of marks along Liberty's upper legs preclude an even finer designation. Population: 30 in 65, 2 finer (3/11). (#9185)

Unimprovable MS67 1927 Double Eagle

5530 1927 MS67 NGC. The 1926 through 1928 Philadelphia Mint double eagles are among the most common of the series in superhigh grades — up to the Superb Gem level. Beginning in 1929, the series takes a sharp 180-degree turn, as collectors encounter the heavily melted (or never largely released) late-series issues. This MS67 1927 twenty boasts generous cartwheel luster over goldenyellow surfaces that are well-struck and abrasion-free for the most part, although we note a single thin mark in the field just to the right of Liberty's head. A coin that is numerically unimprovable at either service. Census: 48 in 67, 2 in 67 ★, 0 finer (3/11). (#9186)

1927 Saint-Gaudens Twenty, MS67 Radiant Yellow-Gold Surfaces

**1927 MS67 NGC.** This coin is frosty rather than satiny, with radiant yellow-gold cartwheel luster bursting forth from each side. The striking details are well-defined throughout, and there are none of the usually seen distracting abrasions. The availability of 1927 double eagles, even in high Mint State grades such as the present example, ensures a good supply — for a price — of lovely examples of this popular and well-designed U.S. type coin. However, Superb Gem specimens such as this example push the upper bounds of certified examples, as there are currently none finer at either NGC or PCGS. Census: 48 in 67, 0 finer (3/11). (#9186)

MS67 1928 Twenty Dollar With Rich Cartwheel Luster

**1928 MS67 NGC.** The 1928 double eagle issue is, along with the 1924, among the most available Saint-Gaudens twenties. The substantial mintage was nearly 9 million pieces, and today examples are available in all grades up to the top of the certified populations, which comprise a few dozen each at NGC and PCGS. This is an incredibly attractive example whose prime attribute is the swirling, rich cartwheel luster that radiates from each side. Areas of orange-gold and green-gold alternate, the strike is nearly full on each side, and contact marks are inconsequential. Census: 81 in 67, 5 in 67★, 0 finer (3/11). (#9189)

## Gem 1932 Saint-Gaudens Double Eagle Rare Late-Date Issue High Quality and Outstanding Eye Appeal

**1932 MS65 PCGS Secure.** The 1932 Saint-Gaudens double eagle is a fabulous coin that combines the appeal of aesthetic beauty with the thrill of absolute rarity. As a date, experts consider the 1932 the most attractive issue of the rare late-date Saints, with only the 1930-S as a serious challenger. As David Akers states in his *Handbook of 20th Century United States Gold Coins:* 

"High-grade 1932 double eagles are exceptionally attractive coins with outstanding luster and color. The 1932 is superior in this regard to all other late-date issues in this series with the possible exception of the 1930-S."

As to rarity, numismatists of the 1930s and 1940s believed the 1932 was the rarest of the later dates, and often paid significant premiums to secure an example of the 1932 when it was offered at auction with specimens of the other issues. In recent years, this perception has changed, and even the experts are divided in their estimates of relative rarity among the later dates of the series. Q. David Bowers (2004) estimates a surviving population of 60-80 pieces of the 1932, placing it ahead of the 1929, 1931, and 1931-D, and trailing only the 1930-S in the rarity rankings of collectible late-date double eagles. David Akers postulates an extant population of 75-95 examples, placing the 1932 squarely in the middle of the rankings, rarer than the 1929 and 1931-D but more available than the 1930-S and 1931 issues. A search of auction records over the last 20 years seems to support Bowers' position, as the 1932 has appeared less often than the 1929, 1931, and 1931-D. On the other hand, population data from the grading services favors Akers' theory, as the 1932 has significantly more submission events than the 1931 and 1931-D. In our opinion, the last three dates of the series are of nearly equal rarity, while the 1930-S is clearly the rarest date and the 1929 is the easiest to locate.

The disparity between the high number of submission events and the relatively low number of auction appearances for the 1932 is probably the result of the issue's general high quality. We suspect the attractive appearance of many 1932 double eagles has influenced their owners to submit them to the grading services multiple times, seeking higher numeric grades for their specimens. At the same time, the owners are less likely to try to improve their extraordinary, high-quality coins at auction (and subsequently offer their duplicate pieces in other auctions), thus accounting for the relatively low total of auction appearances of the 1932. No matter what the exact position the 1932 occupies in the final rarity tables, the date is undeniably one of the most elusive and beautiful issues of this storied series.

The present coin is a delightful Gem, with razor-sharp details throughout. Fine definition is present on the Capitol building and Liberty's facial features. The fields exhibit remarkably smooth surfaces, with only the most minor contact marks visible on close inspection. The surfaces are a vivid greenish-gold, with red patina in the centers and vibrant frosty mint luster. Eye appeal is extraordinary. Population: 30 in 65, 8 finer (3/11). (#9194)

#### PROOF SAINT-GAUDENS DOUBLE EAGLE

#### Rare 'Roman Finish' PR64 1910 Double Eagle

1910 PR64 NGC. Completing the marvelous four-piece 1910-dated gold proof set in this Platinum Night session is the 1910 double eagle graded PR64 by NGC. Although the Mint during this time period would sell both complete sets and singletons to collectors as they desired, a good rule of thumb is that the total produced (not necessarily sold) would decrease as the denomination increased. Thus, proof double eagle mintages are generally lower than proof eagle mintages, and so forth.

The proof gold mintages of 1910 in particular — and especially for the quarter eagle and eagle — seem out of alignment when compared with relative rarities today. Breen guesses in his *Proof Encyclopedia* that no more than 167 double eagles were made, but he adds the issue is "far more rarely offered at auction than one would expect with this mintage."

A trip through our Permanent Auction Archives reveals that it has been more than two years since we offered a Gem-or-finer example of the 1910 double eagle, with many such more than a half-decade ago — and this despite the existence of specimens certified up to the PR68 level (two at NGC). Much of the high-grade proof gold seems to be going into strong hands, often to reappear only many years later.

A single horizontal hairline in the left obverse field limits the grade of this near-Gem proof. Both sides have bright reddish-orange surfaces with the Roman gold finish and satin luster. Tiny dark blue spots on and between rays over the right side of the N of IN are the only provenance markers on either side of this amazing coin.

From The B & D Collection. (#9207)

#### **COMMEMORATIVE SILVER**

MS66 ★ 1926 Sesquicentennial Half

5535 1926 Sesquicentennial MS66  $\star$  NGC. With no Superb Gems in the combined certified population, there is considerable pressure on the Premium Gem survivors for this commemorative issue famous for condition rarity. Offered here is an unusually attractive example, boldly lustrous through pink-gray and green-gold patina. The strike is above-average, and aside from a single shallow mark along Washington's jawline, the obverse is marvelously well-preserved. A tiny nick just inside the reverse circle, near the SE in SESQUICENTENNIAL, similarly contributes to the technical grade but has little bearing on the great eye appeal. Census: 5 in 66  $\star$ , 1 66+  $\star$ , 0 finer (2/11). (#9374)

Iridescent-Toned 1926 Sesquicentennial Premium Gem, None Finer at Either Service

**1926 Sesquicentennial MS66 NGC.** With a combined population of less than 30 coins at NGC and PCGS in MS66 and none finer, the 1926 Sesquicentennial issue has a well-deserved reputation as a major conditional rarity in the commemorative silver series. Only under a loupe do a few minor ticks appear on Washington's cheek, but the most appealing feature of this Premium Gem is the lovely iridescent toning, comprising pale yellow-gold, pinkish-gold, jade, and amber-gold, deepest at the lower obverse. The reverse is more demure but equally attractive, and generous satin luster prevails throughout. Census: 12 in 66, 5 in 66  $\bigstar$ , 1 in 66+  $\bigstar$ , 0 numerically finer (3/11). (#9374)

Richly Toned 1946-D Booker T. Washington Half Dollar, MS67+ ★

5537 1946-D Booker T. Washington MS67+ ★ NGC. CAC. Booker T. Washington, the brilliant educator who was the first leader of the Tuskegee Institute, received recognition in his lifetime and long after his death. In Heritage's world headquarters city of Dallas, for example, his name graces the Booker T. Washington High School for the Performing and Visual Arts, a prominent magnet school. Here at Heritage, we frequently see another tribute to Washington: the commemorative coins which bear his likeness. Offered here is a remarkable example of the 1946-D Booker T. Washington issue, strongly lustrous and impressively preserved beneath a rich cloak of green-gold, jade, lavender, and maroon patina. Eye appeal is fantastic. Census: 2 in 67+ ★, 5 finer (3/11). (#9405)

1936 Wisconsin Half, MS68+ With Incredible Patina

**1936 Wisconsin MS68+ PCGS.** The Plus grade can be interpreted in many ways for many coins, but the incredibly attractive patina on this coin to us is what garnered the lagniappe. Vivid jade at the upper obverse cedes almost immediately in the center to swatches of gold, amber, and magenta, through all of which radiant luster permeates. The reverse alternates pinkish-gold with jade, magenta, amber, violet, and canary-yellow in incredible profusion. A coin that must be held in hand to be truly appreciated. As required at this grade level, impediments of any kind are simply a nonissue. Population: 4 in 68+, 0 finer (3/11). (#9447)

#### **COMMEMORATIVE GOLD**

#### Premium Gem 1904 Lewis and Clark Commemorative Gold Dollar

5539 1904 Lewis and Clark MS66 PCGS. CAC. The earliest gold dollars in the commemorative series had remarkably similar portraits; those of Jefferson and McKinley in 1903, as well as those of Lewis and Clark in 1904 and 1905, are traditional, almost staid. It is only with the Panama-Pacific gold dollar of 1915 that a bold and less-traditional portrait takes over.

Of course, the 1904 Lewis and Clark gold dollar distinguishes itself in other ways, such as its low net mintage and scarcity in better grades. Indeed, anything numerically finer than this Premium Gem is a condition rarity. Yellow-orange surfaces are flashy with peach overtones and few marks of any significance. (#7447)

Gem 1905 Lewis and Clark Gold Dollar With Consistent Golden-Yellow Color

5540 1905 Lewis and Clark MS65 NGC. The various Lewis and Clark commemoratives are an especially interesting series. They span not just the usual 100-year observance of the Lewis and Clark expedition in the form of the 1904- and 1905-dated gold dollars, but an extra 200-year commemoration in the form of the various 2004-dated Jefferson nickel designs and the Lewis and Clark Bicentennial silver dollar of the same year. The series in this way spans both the "classic" and "modern" commemorative eras.

The 1905 Lewis and Clark gold dollar is much more elusive in high grades than its 1904 counterpart, a disparity that widens markedly — according to the combined population reports — above the Gem level of the present piece. Both sides are an even, consistent golden-yellow color, showing little actual contact but some microscopic chatter in the fields that likely limits an even finer grade. NGC has seen 55 submissions finer than this coin (3/11). (#7448)

5541 1905 Lewis and Clark MS66 PCGS. As recounted by Garrett and Guth, "A total of 55,000 Lewis and Clark gold dollars dated 1905 were struck at the Philadelphia Mint, but sales at \$2.50 to \$3.00 per coin were disappointing and the net mintage for the date was just 10,041 pieces. The remaining, unsold coins were melted." The authors go on to call it "one of the key issues of the series," a statement especially true at the Premium Gem level. This boldly impressed example has considerable reflectivity in lemon-yellow fields that show lavender and violet overtones on either side of the portraits. PCGS has graded just three coins in numerically finer grades (3/11). (#7448)

MS66 1905 Lewis and Clark Gold Dollar Rarely Seen High-Grade Example

5542 1905 Lewis and Clark MS66 NGC. Only 10,000 pieces were struck of the 1905 Lewis and Clark gold dollar. As the second year of issue, far fewer collectors were interested in the 1905 than the first year. Far fewer examples of the 1905 were well-preserved when compared to the 1904 with approximately half as many 1905s certified in MS66 compared to the 1904. This is a strongly struck example that displays stunning green-gold surfaces with additional splashes of orange brilliance that heighten its eye appeal. Trivial marks do little to limit its grade.

From The B & D Collection. (#7448)

5543 1905 Lewis and Clark MS66+ NGC. The Lewis and Clark commemorative gold dollar was promoted by Faran Zerbe and first issued with a 1904 date. Commemorative gold dollars were decidedly unpopular with numismatists because collectors had been burned by the high priced Louisiana Purchase dollars in 1903, and more than half the original mintage of the 1904 issue was eventually melted. Despite the lack of collector enthusiasm, Zerbe tried again with the 1905 gold dollar, with similar results. The 1905 issue enjoyed a limited distribution of 10,041 pieces, and is about 20% rarer in today's market than the 1904.

The present coin is a high-end Premium Gem, with vibrant mint luster and attractive greenish-gold surfaces. The design elements exhibit bold details, and a minor contact mark on Lewis' cheek is the only mark of note. Census: 1 in 66+, 4 finer (3/11). (#7448)

## 1905 Lewis and Clark Gold Dollar Extremely Rare Superb Gem

**5544 1905 Lewis and Clark MS67 NGC.** The 1905 Lewis and Clark gold dollar is a heavily melted and elusive commemorative gold issue, the second date of a design that was unpopular even in its first go-round. Farran Zerbe, the famous early numismatist who is so prominently associated with the early commemorative gold issues he promoted, made a serious miscalculation when he overanticipated demand for the Lewis and Clark gold dollars, even when *every single previous commemorative design* had either been released to circulation or partially melted. The latter was the fate of both Lewis and Clark dates, leaving both elusive today, but the 1905 especially so.

This focus on melting and overall rarity does not even begin to cover the rarity of the early gold commemoratives in high grades, of course. The 1905 Lewis and Clark gold dollar is especially susceptible to the trend; at the Superb Gem level, for instance, there are only seven coins in the combined certified population, none of them modified by Plus or Star designations, and there are zero coins numerically finer (2/11).

This example is one of the seven, and by extension it is one of the most magnificent Lewis and Clark gold dollars a collector will ever see. Swirling luster is primarily canary-yellow with hints of honey and peach, and the sharply detailed devices are as carefully preserved as the smooth fields. The few grade-defining faults on each side are the merest quibbles. An excellent choice for the commemorative gold enthusiast who collects at the highest levels. (#7448)

# 1915-S Panama-Pacific Fifty Dollar Round, MS64 Among the 'Great Numismatic Treasures' of the 20th Century

5545 1915-S Panama-Pacific 50 Dollar Round MS64 NGC. Writing on PCGS' CoinFacts website, Ron Guth ranks the 1915-S Panama-Pacific fifty dollar round coins as one of the "great numismatic treasures" of the 20th century. Both the round and octagonal versions are tied for number 26 among the 100 Greatest U.S. Coins, also by Guth accompanied by Jeff Garrett. In that volume, the authors make an excellent case for the broad appeal these coins generate among the collecting public:

"The 1915-S Panama-Pacific \$50 gold coins were designed to commemorate the opening of the Panama Canal. Weighing in at nearly 2.5 ounces of gold each, these magnificent coins, also known as 'slugs,' are very popular with collectors. Their size along is a compelling reason to admire them. The Panama-Pacific 'Fifties' are also very scarce. The Round has a surviving mintage of only 483 pieces, the lowest of any commemorative coin ever produced. ..."

As incredible as it may seem to modern-day collectors, at one time some of the Pan-Pac fifties were apparently carried as pocket pieces; circulated examples can be found today in appreciable numbers. (About 10% of the total round and octagonal fifties certified at PCGS are in circulated grades.)

Although Gem examples of the round and octagonal are both quite elusive, extremely attractive specimens in the lower Mint State grades appear at auction with some regularity. As model representatives of gold's enduring popularity and today's heightened interest in commemorative issues of all kinds, the Pan-Pac fifties are the subject of intense collector demand that seems certain to continue.

This Choice Mint State specimen exhibits yellow-gold luster with satin surfaces. Although a few hairlines subdue the surfaces, there are no mentionable marks on either side. A single tiny spot attached to the pellet following AMERICA may serve to trace the provenance of this piece. NGC has certified 70 finer examples of this variety, including resubmissions (2/11).

From The B & D Collection. (#7451)

## 1915-S Panama-Pacific Fifty Dollar Round, MS64 Impressive, Reddish-Gold Surfaces Only 11 Pieces Finer at PCGS

5546 1915-S Panama-Pacific 50 Dollar Round MS64 PCGS. One of the most magnificent gold coins ever struck, by any country, emanated from the first-ever world's fair held on the American West Coast: the Panama-Pacific International Exposition held in San Francisco, which opened on February 20, 1915. The fair celebrated dual events: the historic and commercially vital opening of the Panama Canal (linking the Atlantic and Pacific oceans) in August 1914, as well as the 400th anniversary of the discovery of the Pacific Ocean by the Spanish explorer Vasco Núñez de Balboa (he claimed it for Spain in 1513)

This mammoth exposition was a showcase for mankind's achievements, including the first-ever use of nighttime lighting at a fair, enjoyed and visited by some 18 million people from all over the world. For 257 days, the PPIE hosted pavilions of exhibits, reproductions of classical buildings, luxurious gardens, carnivals, visits by celebrities, even nighttime fireworks — all the wonders of the world (the official brochure proclaimed) displayed on the 635 beautifully landscaped acres alongside San Francisco Bay.

The rarest and arguably the most beautiful coins of this world's fair are the two varieties of gold fifties — called "quintuple eagles" on the printed inserts accompanying the coins, which were sold within copper frames housing the rare sets. Each fifty sold for \$100 or double face-value at the time; remembering that approximately \$1,250 was the average American's annual income in 1915, it is no wonder that the U.S. Mint's authorized mintage of 1,500 pieces each of these fifty dollar gold pieces was never sold.

The rarer of the two types today is the round version, of which a mere 483 pieces were sold, many of which have never appeared on the numismatic market. The size and shape are said to have been inspired by the Wass, Molitor fifties of the Gold Rush era. Robert Aitken's deft engraving depicts on the obverse the Greek goddess Athena (symbol of wisdom and invention, of the arts and of warfare) wearing a plumed helmet, while the date 1915 appears as MCMXV (with "round stops") in Roman numerals on the top edge of a shield held in front of her torso. The reverse shows yet another allusion to antiquity, the owl of Minerva (the Roman name for Athena), but this is a decidedly modern bird of prey, vigilantly seated upon a branch surrounded by pinecones of the native California Ponderosa tree — a wise "watch bird" for the Republic. As befits its unveiling at the Panama-Pacific fair, this coin is the very best in Neoclassical art.

This truly exceptional specimen has the usual soft, satiny mint luster that characterizes these coins. The surfaces are reddish-gold with the slightest accent of lilac on each side. The piece seems conservatively graded, as only a couple of tiny marks on each side (which require magnification to see) preclude an even higher grade. Although PCGS has certified several dozen round examples in this grade including resubmissions, there are only 11 finer (2/11). (#7451)

# Octagonal 1915-S Panama-Pacific Fifty Dollar, MS64 A Tangible Reminder of the Exposition

5547 1915-S Panama-Pacific 50 Dollar Octagonal MS64 NGC. Almost a century after its opening, the Panama-Pacific International Exposition has few tangible reminders left in San Francisco. The Palace of Fine Arts is the most visible survivor today of the dozens of palaces, structures, courts, gardens, and fountains that occupied the 625 acres of the original exposition.

Fortunately for collectors, some numismatic commemorations in precious metal tend to be preserved for decades — even centuries — after the subjects they depict are long gone to posterity. The fifty dollar Panama-Pacific octagonal coins were both commemorations of the exposition and its remarkable confluence of art, architecture, cultural and scientific innovation, as well as subtle homage to the quaint, quasiofficial fifty dollar octagonal Augustus Humbert/U.S. Assay coins of 1851 and 1852, also struck in San Francisco.

The U.S. Mint had no idea how many of the round and octagonal fifty dollar coins they would actually sell, originally manufacturing 1,509 octagonal and 1,510 round specimens. Even though the fifty dollar coins and accompanying commemorative denominations were offered in a variety of options and packaging choices, in the end only 645 of the octagonal and 483 of the round pieces were sold to the public, with the remaining coins melted.

As is the case with the older Humbert/Assay Office fifties, the Pan-Pac fifties are subject to surface marks on their broad faces, along with the occasional bump and bruise that can keep many examples out of Gem territory. Nice pieces are available for a price, nonetheless. "Their fame precedes them," as the saying goes, and many examples both in high circulated grades and lower Mint State grades, where most pieces tend to cluster, still offer remarkable aesthetic appeal.

Perfection is rarely achieved on these massive fifty dollar gold pieces. This Choice Mint State piece is close, with satiny orange-gold luster and only faint blemishes that include a small mark below the A in STATES. A single splash of dark toning below the S in SAN may serve to identify the past or future provenance of this example. NGC has certified 53 finer examples of this variety, including resubmissions (2/11).

From The B & D Collection. (#7452)

## Satin-Surfaced 1915-S Pan-Pac Octagonal, MS64

1915-S Panama-Pacific 50 Dollar Octagonal MS64 NGC. Octagonal fifty dollar slugs were struck by the U.S. Assay Office of Gold in the years preceding the San Francisco Mint. However, there is only one octagonal issue from the U.S. Mint. That is the octagonal variety of the Panama-Pacific gold fifty dollar commemorative. A round fifty dollar variety was also struck, and its mintage of 483 pieces makes it even more rare than the octagonal version, which has a tiny production of 645 pieces. The designs for the two issues are similar. Both show Minerva, a.k.a. Athena, adorned with an Athenian helmet and shield. The shield bears the date in Roman numerals, MCMXV. This classical but alert military pose was suitable, considering World War I was raging in Europe and could bring in the United States at any time. The reverse features Athena's owl, symbolic of wisdom. The octagonal variety shows these motifs in slightly reduced scale, relative to the round issue. The octagonal variety adds eight dolphins across both peripheries, symbolizing freedom of the waterway between the Atlantic and Pacific oceans.

The present near-Gem has full satin luster and seamless canary-gold color. The strike is complete. The unaided eye can locate only a single thin mark, located on the reverse field just left of the owl. Once a glass is used, patient observation finds a wispy pin scratch on the obverse above the G in GOD. These two imperfections are of little relevance, particularly given the large diameter of this hefty gold commemorative. The eye appeal is significant. The fifty dollar gold Panama-Pacific varieties are the two keys of the entire U.S. commemorative series, and the present near-Gem is a worthy representative that would highlight any collection. (#7452)

1926 Sesquicentennial Two and a Half, MS66 Rarely Found in This Condition

**1926 Sesquicentennial MS66 PCGS.** The Sesquicentennial quarter eagle is relatively available in lower grades. There is an especially large number of MS62-65 examples always available on the market. However, above the Gem level the availability drops off sharply. This exceptional coin displays a few scattered reverse marks that limit the grade of this otherwise nearly flawless Premium Gem. Both sides have frosty light yellow luster with delicate rose overtones. The strike is bold with strong details on the Art Deco obverse design and on Independence Hall at the center of the reverse.

From The B & D Collection. (#7466)

#### PROOF COMMEMORATIVE GOLD

#### 1925 Norse Gold Medal PR68 Matte, Finest Known

5550 1925 Norse Gold Medal PR68 Matte NGC. Ex: Bingham Collection. This Norse gold medal is from the collection of Gregg Bingham, the well-known Houston Oilers linebacker from 1973 to 1985 who is now a numismatic connoisseur with wide-ranging interests including Morgan dollars (he assembled the famous NFL Set) and commemoratives.

Often collected alongside classic commemorative gold and silver coins, these pieces were struck in both metals and commemorated the centennial of Norse immigration to the United States. The issue was sponsored by Minnesota Congressman O.J. Kvale of Minneapolis, who planned for an actual commemorative coin, revising his proposal to a medallic issue following controversy surrounding other coinage issues, notably the Huguenot-Walloon issue of the previous year.

Just 100 of the one-inch gold medals were struck and 53 were later melted, leaving a net production of just 47 specimens. The 1925 Norse issue also included thick and thin silver medals and a large bronze medal that was silver-plated.

The present piece is undoubtedly the finest of the few survivors in gold. NGC and PCGS have each certified 12 of these pieces, and this PR68 example is the single finest certified specimen (3/11). A fine-grained matte surface is presented, similar to the earlier matte proof gold coins struck during the previous decade. The strike is sharp and the surfaces are pristine, with no marks evident on either side. An incredible opportunity to acquire the single finest surviving Norse gold medal. (#9452)

#### **TERRITORIAL GOLD**

Lustrous High-End AU C. Bechtler Five Dollar, 134G, With Star, K-20

**PCGS. K-20, R.4.** The Christopher Bechtler five dollars of this series show why the Bechtler family was successful in not only producing, but keeping in circulation, private gold coinage over a period approaching two decades: The issues, as here on this 134G, Star example, were scrupulous about proclaiming both their weight in grams and their fineness in carats. Any suspicion of underweight coins or lower finenesses than advertised would have been the kiss of death for such pieces.

This golden-orange AU50 example, certified in a green-label holder, actually gives the impression of being a bit finer than the stated grade. Much luster remains on both sides, and only a few minor ticks and scrapes appear under a loupe. Listed on page 365 of the 2011 *Guide Book.* (#10097)

Undated C. Bechtler K-31 Five Dollar Henry Chapman Restrike Proof 65 ★ Ultra Cameo

5552 Undated C. Bechtler PR65 ★ Ultra Cameo NGC. K-31, High R.7. Listed on pages 264-265 of Donald Kagin's *Private Gold Coins and Patterns of the United States*, the Bechtler five dollar restrikes were minted from original dies circa 1908. Henry Chapman located the dies at about that time and had a limited number of these pieces produced. Rarity estimates suggest that just four to six of the A. Bechtler restrikes are known, and a similar number of the C. Bechtler pieces.

The obverse die is similar to that used for K-29 and the reverse die is similar to that used for K-16, although it is unknown if these are the identical dies used for the original coins in the 1830s and 1840s, or if they are unused "remainder" dies. The single obverse die that Henry Chapman used for both varieties has a die crack upward from the border at 6 o'clock. Tiny raised rust dots are visible on both sides of this piece.

A beautiful Ultra Cameo Gem proof, this piece has deeply mirrored fields with frosty devices and borders. The edge is plain and also exhibits a mirrored finish. The actual fineness that Chapman used for these pieces is unknown. Elemental analysis might prove to be a fascinating exercise. Mentioned in a note on page 366 of the 2011 *Guide Book*, where it is stated they were made about 1920. (#10124)

Choice XF 1851 Reeded Edge Humbert Fifty 887 Thous., K-6

5553 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. XF45 NGC. K-6, R.4. The reverse variant with outer ribbon close to the edge, rather than the interior geometric pattern. This fifty dollar octagonal Humbert survivor has a distinct and evocative appearance: Faintly luminous yellow-gold surfaces have a distinctly greenish tint, and while the high points of the devices show clear wear, this is light and not especially distracting. A few small corner bumps visible from the obverse and a number of small digs scattered around the eagle further suggest the brief but doubtless important role that this piece played in California's economy during early statehood. Listed on page 368 of the 2011 *Guide Book*. (#10214)

K-7 1851 Humbert Fifty Dollar, AU50 Reeded Edge, 887 Thous.

1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. AU50 NGC. K-7, R.4. The massive fifty dollar octagonal ingots are numismatic icons, inspiring the shape of the Panama-Pacific octagonal commemoratives and sparking the imaginations of generations of numismatists. This example of the K-7 variety clearly saw some use, as the softly struck high points are worn and the surfaces show numerous light abrasions as well as a number of rim bumps on the exposed corners. Nonetheless, the luminous overall character of the yellow-orange surfaces offers a vital clue to this AU50 example's true condition. The date at the bottom obverse is weak but readable. Listed on page 368 of the 2011 *Guide Book*. (#10214)

## High-Grade 1851 Humbert Fifty Dollar, AU55 Reeded Edge, 887 Thous., K-6 Seldom Offered Only Six Finer at PCGS

1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. AU55 PCGS. CAC. K-6, R.4. The 1851 Humbert fifty dollar coins may be divided into two different major groups, the Lettered Edge pieces and the Reeded Edge coins that followed in the same year and continued with minor variations into 1852. The Lettered Edge pieces were cumbersome, labor-intensive coins, requiring the manual placement or stamping of the legend AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA 1851, or some facsimile thereof, around the edges of a large, soft, eight-sided gold coin.

The production of the Lettered Edge fifties, and their subsequent circulation, were fraught with difficulties. Hand-stamping the legends onto the edge made the coins error-prone — some examples are known with inverted words or parts of words — and the legends, including the all-important assayer endorsement, were of course more difficult to observe on the edge, therefore less apt to be accepted freely.

The Reeded Edge fifties that came soon after were a marked improvement, moving the legend and date to the obverse around the rim in a much more visible location. The regular Reeded Edge design was also less susceptible to "sharpers" or those who might try to shave a sliver or three of nearly pure gold before passing the fifty in commerce. The 1851-dated Reeded Edge fifties can be further broken down into the .880 and .887 fineness coins, with the .880 Reeded Edge coins, K-5, a bit rarer overall.

The Choice AU grade of the present K-6 piece makes it a major conditional rarity, even though all of the Humbert fifties are very scarce, at a minimum. Seldom does *any* Humbert fifty appear in so high a grade and with such excellent aesthetic appeal. Copious quantities of luster appear on the surfaces. The deep, mellow orange-gold coloration is obviously original and likely little changed since this historic coin was produced 160 years ago. A few rim bumps are expected on these large, heavy gold coins, but other surface impairments, while not all negligible, are in keeping with the assigned grade level. This piece is one of six so certified at PCGS, with six finer (3/11). Listed on page 368 of the 2011 *Guide Book*. (#10214)

AU50 Miners Bank Ten Dollar Dentilated Border, K-1

5556 (1849) Miners Bank Ten Dollar AU50 PCGS. Normal (Dentilated) Border, K-1, R.6. The San Francisco firm Wright & Co. did business as Miners' Bank (or Miners Bank), and it joined Territorial gold history by issuing gold coins denominated at ten dollars in the fall of 1849. The coins were alloyed with copper, unusual for the time, and found to be significantly underweight, which led rapidly to discounting, disuse, and destruction. This lightly circulated example retains significant orange-gold luster (the reddish element indicating copper) and a handful of scattered surface abrasions. The dentils on each side are generally well-formed. An important and seldom-seen piece of California gold history. Listed on page 372 of the 2011 *Guide Book*. (#10236)

XF40 1855 Wass Molitor Ten, K-6, R.5

**1855 Wass Molitor Ten Dollar XF40 PCGS. K-6, R.5.** It would seem counterintuitive that the Wass Molitor coins of 1855 — in denominations of 10, 20, and 50 dollars — were produced and circulated in the year *following* the April 1854 opening of the U.S. Mint in San Francisco, but such was the case. Even after the official establishment opened, it suffered from sporadic shortages of the parting acids required to separate unrefined gold from its alloys.

The S.M.V. on the reverse stands for "Standard Mint Value," a design similar to that first used by Dubosq & Co., whose coins were soon to be discredited in the James King of William-Augustus Humbert hubbub. The present XF40 Wass Molitor ten dollar displays a typical appearance, with sharper details on the obverse than reverse, particularly in the centers. Both sides show numerous abrasions of all sizes, mostly small, with a distinct greenish-gold cast that likely stems from silver alloy in the gold. Certified in a green-label holder. (#10354)

1855 Wass Molitor Fifty, K-9

5558 1855 Wass Molitor Fifty Dollar Genuine PCGS. K-9, R.5. The PCGS number ending in 98 suggests damage as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Good specimen that has had the surfaces smoothed. The Wass Molitor fifty dollar gold pieces were issued at the request of local businessmen, at a time when the newly established San Francisco Mint was unable to supply the needs of the regional economy. Thousands of fifty dollar pieces were produced, along with other denominations, but the operation shut down by 1856. Examples are scarce-to-rare in all grades today.

The present coin is a well worn example, with slightly granular greenish-gold surfaces. Most design elements are still recognizable in outline, but the denomination has been largely erased. Extensive tooling is evident in the fields. Listed on page 377 of the 2011 Guide Book. (#10363)

### Historic 1855 Wass Molitor Fifty Dollar, K-9, R.5, VF30

5559 1855 Wass Molitor Fifty Dollar VF30 PCGS. K-9, R.5. Donald Kagin's introduction to Chapter 7 of *Private Gold Coins and Patterns of the United States,* a chapter titled "The Third Series of Private Gold Coins, 1852-56," aptly sums up the political and economic circumstances that led to the production of this Wass, Molitor fifty dollar gold piece and its companions:

"During the period immediately following the closing of the United States Assay Office on December 14, 1853, and prior to the commencement of mint operations the following April, there was no government mint in operation in California. Private coinage also had ceased by December and many of these (Moffat & Co.) coins had been melted or shipped out of the country. These factors caused yet another monetary stringency.

"The long refusal of the Secretary of the Treasury to grant permission to the United States Assay Office to issue denominations of less than \$50 had resulted in a continued shortage of lower denomination coins in California. Consequently, the California merchants were losing a great deal of money through the stifling of commercial transactions.

"On January 14, 1854, a group of bankers and merchants petitioned the assay office of Kellogg & Richter to coin gold, and on February 9th, Kellogg began issuing \$20 gold pieces. It is rather ironic that one of the men to petition coiner Kellogg was none other than James King of William!"

James King of William and U.S. Assayer Augustus Humbert had, of course, been responsible for the unfair discrediting in 1851 of several early private coiners, to their own gain. Kagin goes on to say that there was also a shortage of large-denomination coins, a void that Kellogg & Co. and Wass Molitor & Co. endeavored to fill. The Kellogg pieces never got beyond the experimental stage, but "thousands of Wass, Molitor & Co. \$50 pieces were circulated the year after the United States Mint [at San Francisco] was established."

The present Wass Molitor piece, certified VF30 in a green-label PCGS holder, is one of those pieces that circulated extensively. The canary-yellow surfaces, however, show no singular impairments, just wear consistent with the grade and many abrasions, mostly on the small side, consistent with a good spate in commerce, likely in and around San Francisco for a year or two before being snatched out of circulation. Despite the 30 points of wear, this piece has lots of eye appeal and muted luster remaining. Listed on page 377 of the 2011 *Guide Book*. (#10363)

### S.S. CENTRAL AMERICA GOLD BAR

# Kellogg and Humbert Gold Ingot 56.25 Ounces

Recovered from the S.S. Central America

**5560 56.25-Ounce Kellogg and Humbert** *S.S. Central America* **Gold Ingot. CAGB-456.** Serial number 552; 908 fine, stamped face value \$1055.81. Pale yellow-gold surfaces are wavy with irregularities and casting bubbles. One of the more unusual ingots recovered from the *S.S. Central America*, at least by Kellogg and Humbert standards, thanks to several irregularities in the casting and punching. In his landmark *A California Gold Rush History*, Q. David Bowers notes for this ingot: "Large size ingot. Inscriptions on face. Vertically oriented. \$ sign high, out of place, above the 1 and leans sharply right, giving a very distinctive appearance."

One suspects that the fineness was not expected by the assayers to be so high; even a small decrease in the fineness would have been enough to give this ingot a three-figure face value, permitting room for the dollar sign on the same line as the rest of the ingot. The corner cuts (lower right on the top face and its opposite on the bottom) said otherwise, creating the unusual arrangement of dollar sign and value.

This was not the only awkward aspect of the creation of this Kellogg and Humbert ingot, however. Bowers continues: "Part of KELLOGG & HUMBERT logotype not imprinted due to depression in surface at this point. Reverse stamped with repetition of serial number, but in different font." The point about the logotype is worth expanding upon, and it is true that a sizable depression wipes out much of the middle of "& HUMBERT ASSAYERS" and also mildly affects the 2 in the record of the ounces.

What Bowers does not mention is that the logotype was also punched multiple times, with at least four bottoms of rectangles visible at the lower left of the logotype and prominently overlapping lettering. It is easy to imagine a worker trying several times to punch the logotype into this ingot and being frustrated each time by the deep casting depression, until finally he abandoned the effort. The gold ingot would be melted down in New York; who would care that he let this stamping of the logotype go? Fate, of course, intervened, and this bar, loaded onto the S.S. Central America, lost to a hurricane, and brought back to the land more than a century later, is now an at-times-rough but thoroughly endearing and historic link back to the great challenges and golden hopes of 1850s California.

### **COINS OF HAWAII**

### 1881 Pattern Hawaii Nickel, AU50 Medcalf 2CN-1, A Major Rarity

5561 1881 Hawaii Five Cents AU50 NGC. Medcalf 2CN-1, KM-2. This major Hawaiian rarity is a pattern, struck two years before regular coinage. To paraphrase the Medcalf reference, in 1881 King Kalakaua took a trip around the world while his new palace was being built. The owner of a nickel mine in New Caledonia was able to get in touch with him and offered to have five cent pieces struck as patterns at the Paris Mint. Approximately 200 such pieces were minted and later sent to the king when he returned to Hawaii. Nothing happened to advance the patterns to official status, but they were given out and many were carried as pocket pieces or ended up in jewelry. Later strikings from copy dies can easily be distinguished from originals by the absence of the cross on top of the crown.

This is apparently one of the pocket pieces. The surfaces display even, light wear over the high points, and there are no obvious or detracting abrasions on either side. The surfaces have the typical nickel-gray patina of a lightly circulated but uncleaned coin. *From The Michael A. Tongg Collection.* (#10975)

### 1883 Hawaii Eighth Dollar, PR63 Cameo One of Just 20 Patterns Struck

**1883 Hawaii Eighth Dollar PR63 Cameo NGC. KM-4, Medcalf-Russell 2CS-2, R.7.** In a December 1, 2008 article for *Coin World* on Hawaiian numismatics, Cindy Brake writes about the Kalakaua coinage, the first silver issues of the Kingdom of Hawaii:

"The four different denominations originally authorized were the hapawalu (eighth dollar or 12 1/2 cent piece), hapaha (quarter dollar), hapalua (half dollar) and the dala (dollar).

"The 12 1/2-cent piece was never issued for circulation, with just a few Proof examples struck for use in Proof sets. Instead, a dime was issued without legal authority."

The influence of the U.S. Mint, which actually struck the coins, is apparent here; instead of making new planchets for the odd hapawalu size, the Mint could simply use regular dime planchets. (The relationship between the Kingdom of Hawaii and the U.S. was close but growing more contentious by 1883, and within 15 years, Hawaii's monarchy would be overthrown and the kingdom annexed as a U.S. territory.)

Breen records that just 20 proofs were made of the hapawalu, all for inclusion in proof sets, and the design is one of the chief rarities of Hawaiian numismatics. This marks only the third time that Heritage has offered an example of the 1883 Hawaiian hapawalu at auction. Neither of the previous offerings was a Cameo specimen such as the present piece, which shows moderate field-device contrast through toning that is milky over the interiors, with gold-orange and blue-green elements at the margins. Hairlines are visible in the reverse fields and a fingerprint is noted to the left of the portrait, but the overall eye appeal is solid and more than satisfactory in the context of an issue where rarity is far more important than condition. *From The Michael A. Tongg Collection.* (#810985)

### **PATTERNS**

## 1865 Transitional Dollar in Copper Judd-435, PR66 Red and Brown Ex: Taylor, Queller

5563 1865 One Dollar, Judd-435, Pollock-508, Low R.7, PR66 Red and Brown NGC. The obverse die is the design adopted for regular-issue coinage of silver dollars in 1865. The reverse die is the design adopted for use in 1866, with a scroll containing the motto IN GOD WE TRUST added above the eagle's head. Struck in copper with a reeded edge.

Traditionally listed as a transitional pattern, Judd-435 has become a controversial issue with pattern collectors. Many researchers now feel that the coins were struck in the late 1860s by unscrupulous Mint employees for sale to collectors. An argument for the issue's authenticity is the fact that the obverse die was used to strike regular proofs in 1865, so we can be sure it was available to strike patterns in that year. Against the traditional view is the fact that many complete sets of copper patterns were sold to collectors circa 1870. There are approximately one dozen examples of Judd-435 extant, a larger number than one would expect from a dies trial issue. An early auction appearance was in the Fewsmith Collection (Mason, 10/1870), lot 1328. In the description for a related pattern (Judd-430), the cataloger stated that only five specimens of the silver dollar had been struck in copper. Perhaps the coins referred to were true transitional patterns, and the balance of the population represent later restrikes.

A spectacular strike complements virtually unblemished fields. The natural mint color is highlighted with glints of violet and blue. NGC and PCGS combined have certified only this PR66 specimen in the Red and Brown category, with none finer (3/11).

Ex: The Frederick Taylor Collection (Bowers and Merena, 3/1987), lot 586; Queller Family Collection (Heritage, 1/2009), lot 1642; 2011 FUN Auction (Heritage, 1/2011), lot 5350, where it brought \$12,650. (#70620)

# **PLATINUM NIGHT**

### Gem Proof Judd-664 Pattern in Aluminum Struck from 1868 Ten Dollar Regular Dies

1868 Ten Dollar, Judd-664, Pollock-739, Low R.7, PR65 PCGS. The regular dies for the 1868 eagle, struck in aluminum with a reeded edge. There are two distinct ten dollar patterns in aluminum for 1868, and the Judd-664, made with regular dies, is rarer than the Judd-663 (which bears an experimental design). The Judd reference lists the Judd-664 as a "Low R.7," which would imply a known population of close to a dozen pieces, yet expert Web site USPatterns.com claims "about a half dozen are known." At least four were issued as part of aluminum pattern sets. Whether this Gem specimen was part of such a set is unknown, but the surfaces of the present lot— in parts pale aluminum-blue and mirrored, in other places more hazy with a green-gold tint— are readily appreciated regardless. (#60882)

# 1869 Aluminum Seated Dollar, Gem Proof Judd-764, Unacknowledged Cameo Contrast

5565 1869 Dollar, Judd-764, Pollock-849, Low R.7, PR65 PCGS. Regular issue design for the Seated Liberty dollar. Struck in aluminum with a reeded edge. The 1869 aluminum patterns of all denominations were almost certainly struck for sale to collectors, although they have been called dies trial pieces in the past. They were sold in cased sets, at least two of which survive intact. The other sets have long since been broken up. About half a dozen examples of Judd-764 still exist, per USPatterns.com. The splendid, bright, unoxidized surfaces of this piece have undoubtedly remained that way because the coin was lacquered at one time (as seen by the pale iridescence on each side). While the insert does not specify the coin is a Cameo, there certainly is strong field-device contrast on each side. The strike is slightly soft in the centers.

Ex: 2011 FUN Auction (Heritage, 1/2011), lot 5355. (#60995)

PR66 Deep Cameo 1869 Quarter Eagle Judd-770 Pattern in Aluminum

1869 Quarter Eagle, Judd-770, Pollock-855, Low R.7, PR66 Deep Cameo PCGS. CAC. Regular dies trial of the 1869 quarter eagle. Struck in aluminum with a reeded edge. There was probably no real need for an aluminum quarter eagle dies trial in 1869; USPatterns.com states "these were actually deliberately struck for sale to collectors as part of complete sets." It is also worth noting that while aluminum has a reputation as an inexpensive metal today, it was considered precious from its discovery until the invention of the Hall-Héroult commercial process in 1886. The present coin has outstanding field-to-device contrast and powerful mirrors with only slight evidence of clouding. Carefully preserved and beautiful, and easily among the finest survivors known. (#61001)

1870 William Barber Seated Liberty Half Judd-934, PR65 Deep Cameo

1870 Half Dollar, Judd-934, Pollock-1040, Low R.7, PR65 5567 Deep Cameo PCGS. CAC. William Barber's seated figure of Liberty faces left on the obverse. Thirteen stars surround Liberty with the date below. Liberty supports a shield with her right hand, and holds an olive branch in her left hand. A Liberty pole is behind the shield, a scroll crosses the shield and is inscribed LIBERTY in raised letters. The reverse is the type used for regular issue Seated halves. Struck in silver with a plain edge. Struck in a wide variety of metals, both with and without edge reeding, including silver, copper, and aluminum, but each issue is individually scarce. Only a dozen or so examples are known of this variant. The fields display evidence of heavy die polish that has given each side deeply reflective mirroring, this is then the background for the frosted white devices. Each side also is accented in peripheral rose and cobalt-blue toning. An exceptional Barber half dollar pattern. (#61180)

# PLATINUM NIGHT

1870 Pattern Dollar, PR64 Cameo Judd-997, Standard Silver Series

5568 1870 Judd-997, Pollock-1128, R.7, PR64 Cameo PCGS. CAC. Liberty is seated left with 13 stars arranged around the periphery and the date 1870 below. Liberty's left hand holds an olive branch, and her right hand supports a shield over which is draped a scroll inscribed LIBERTY. A freestanding Liberty pole is behind. On the reverse, the denomination 1 DOLLAR is centered within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a plain edge.

Fully detailed design motifs on both sides host frosty luster with deeply mirrored silver fields inside a frame of delicate gold toning. This stunning piece is only the fourth Judd-997 pattern in any of our auctions since we began our archives in January 1993. It is also tied with a PR64 Cameo NGC coin for the finest we have seen. A remarkable example. PCGS has certified just three examples of Judd-997, including this coin and two PR62 pieces (2/11). (#61244)

1870 Seated Dollar Pattern in Copper Judd-1005, PR65 Red

**1870 Dollar, Judd-1005, Pollock-1137, R.6, PR65 Red PCGS. CAC.** Ex: The New Millennium Collection. Liberty is seated left and supports a shield with her right hand and holds an olive branch in her left hand. A Liberty pole is present behind the shield, and a scroll crosses the shield inscribed LIBERTY. Paired with a regular Seated Liberty dollar reverse. Struck in copper with a plain edge. Bold copper-orange and gold surfaces are dusky yet reflective on this very rare pattern. A patch of pumpkin at the upper reverse verges on violet, but there is no obstacle to calling the well-preserved surfaces fully Red. A few light fingerprints are noted at the margins. Population: 2 in 65 Red, 0 finer (3/11).

Ex: 2011 FUN Auction (Heritage, 1/2011), lot 5362. (#81252)

1870 Indian Princess Dollar in Copper Judd-1011, PR64 Red and Brown

1870 Standard Silver Dollar, Judd-1011, Pollock-1144, R.7, PR64 Red and Brown PCGS. Ex: New Millennium Collection. James B. Longacre's Indian Princess design features Liberty seated beside a globe, wearing an Indian headdress. The word LIBERTY is inscribed across the center of the globe and Liberty is holding a pole topped with Phrygian cap. The reverse features the word STANDARD at the top with 1 DOLLAR encompassed by a wreath of cotton and corn. This design was apparently based on a sketch Longacre made prior to 1852, but it was not until 1870 that he made use of it and adapted it on a number of different pattern coins. Struck in copper with a reeded edge. The obverse shows full red color while there are just a few dabs of brown and blue patina in the fields on the reverse. Magnification shows numerous specks of carbon on each side, which accounts for the less-than-Gem grade.

Ex: New York Signature Auction (Heritage, 11/2003), lot 11164. (#71259)

1871 Longacre-Designed Seated Dollar Judd-1142, PR64 Red

**5571 1871 Standard Silver Dollar, Judd-1142, Pollock-1284, R.7, PR64 Red PCGS.** The obverse features the first Seated Liberty design by Longacre with 22 stars on the flag. There are also 13 stars arranged around the periphery on the obverse. The reverse displays 1 DOLLAR as the central motif, surrounded by a wreath of cotton and corn, with STANDARD above. Struck in copper with a plain edge. This design was struck in silver, copper, and aluminum — both reeded and plain edge variants of each. Only five or so examples are believed known of the copper, plain edge dollars. The cherry-red surfaces have a few tiny carbon specks, the most notable of which is on the globe. The strike is complete throughout.

Ex: 2011 FUN Auction (Heritage, 1/2011), lot 5367, where it realized \$10,350. (#81404)

# **PLATINUM NIGHT**

1873 Bailly Trade Dollar in Silver Judd-1281, PR65 Cameo

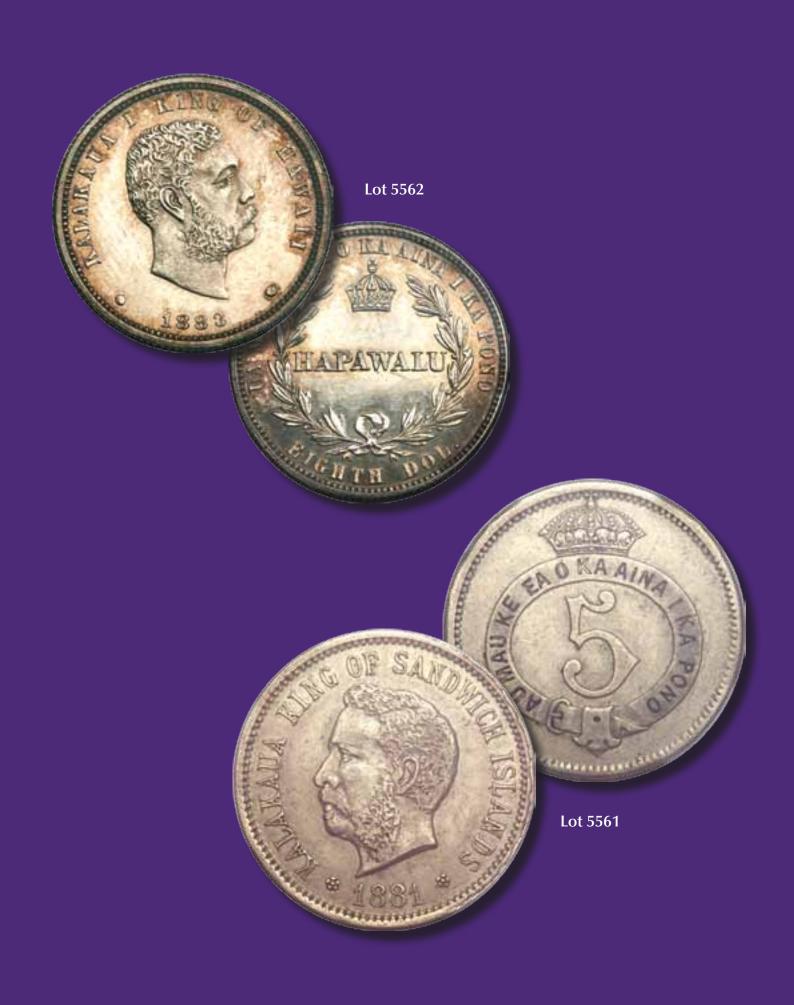

5572 1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR65 Cameo PCGS. CAC. The obverse, designed by J.A. Bailly, features a coiled hair bust of Liberty facing left. The reverse mimics the Amazonian pattern silver dollar save for a smaller eagle and the added motto E PLURIBUS UNUM above and the weight and fineness below. Struck in silver with a reeded edge. This design was struck in silver (with reeded and plain edge), copper, and aluminum, but notably not in white metal. This design was included in six-piece sets the Mint sold for \$30. This is an exceptional pattern. The fields show unfathomable depth of reflectivity and the devices are heavily frosted, the combination yielding a strong cameo effect. (#61566)

1883 Pure Nickel Pattern, Judd-1704 A Spectacular PR67 Ultra Cameo

5573 1883 Liberty Head Five Cents, Judd-1704, Pollock-1908, Low R.6, PR67 Ultra Cameo NGC. The obverse is similar in design to the Liberty nickel adopted this year, except the stars are replaced with the legend UNITED STATES OF AMERICA. The reverse has a central inscription that reads PURE NICKEL, surrounded by a wreath of cotton and corn. FIVE CENTS is separated above and below with seven stars left and six right. Struck in nickel with a plain edge. These fascinating coins are struck in pure nickel, which must have been very difficult to strike up properly. They also are magnetic. At least a dozen pieces are known. From examining this coin one would never suspect pure nickel was difficult to strike up or hard on the dies. The devices are fully struck, the fields show deep reflectivity, and the design motifs are heavily frosted. There are no contact marks we can find, only a single tiny planchet flake in the field above the right side of the U in PURE could be used as a reliable identifier. NGC has certified two pieces as PR67 Ultra Cameo, and it appears there actually are two coins rather than one coin resubmitted. (#62120)

#### **MORGAN DOLLARS**

5574 1878 8TF VF20 ANACS, VAM-16, R.4, stone-gray, a diagonal scratch on the cheek; 1878 8TF — Cleaned — ANACS, VF30 Details, VAM-14.1A, R.5, dull from dipping; 1878 8TF -Cleaned — ANACS, XF45 Details, VAM-14.1A, R.5, lightly cleaned, faint facial marks; 1878 8TF XF45 ANACS, VAM-14.10, R.6, partly lustrous, a rare VAM; 1878 8TF —Spot Cleaned— ANACS, MS60 Details, VAM-12, R.4, a blush of orange toning, parallel hairlines near Liberty's nose; 1878 8TF MS62 ANACS, VAM-3, R.4, lightly toned and lustrous; 1878 8TF MS62 ANACS, VAM-18, R.4, medium rose-gold toning; 1878 8TF MS62 ANACS, VAM-21, R.4, light golden-brown peripheral toning; 1878 8TF MS62 ANACS, VAM-21, R.4, moderate autumn-gold patina; 1878 7/8TF Weak — Cleaned ANACS, VAM-33, R.4, the reverse border is hairlined from an attempt to efface russet toning; 1878 7/8TF Weak MS62 ANACS, VAM-33, R.4, peach-gold borders with a couple of small dark blue spots; 1878 7/8TF Weak MS63 ANACS, VAM-33, R.4, light red-brown toning near the rims; 1878 7/8TF Strong MS62 ANACS, VAM-37, R.4, deep mauve and navy-blue toning conceals moderate obverse abrasions; 1878 7TF Reverse of 1878 AU53 ANACS, VAM-31, R.4, light golden-brown toning; 1878 7TF Reverse of 1878 MS60 ANACS, VAM-144A, R.5, lustrous with facial marks and mottled blue-brown reverse toning; 1878 7TF Reverse of 1878 MS61 ANACS, VAM-31, R.4, attractive powder-blue and russet patina, smooth but subdued luster; 1878 7TF Reverse of 1879 MS62 ANACS, VAM-201, R.6, light chestnut toning; 1878 7TF Reverse of 1879 MS63 ANACS, VAM-201, R.6, rich golden-brown and stone-gray patina.(Total: 18 coins)(#7072)

- 5575 1878 8TF Scratched ANACS, XF40 Details, VAM-6, R.4, silver-gray toning, five wispy pinscratches on the cheek; 1878 8TF XF45 ANACS, VAM-7, R.4, olive-gray toning, much peripheral luster; 1878 8TF XF45 ANACS, VAM-14.10, R.6, problem-free with substantial luster; 1878 8TF — Cleaned -ANACS, AU50 Details, VAM-16, R.4, lightly cleaned but still pleasing; 1878 8TF — Scratched — ANACS, AU50 Details, VAM-23, R.4, A Top 100 Variety, both sides display many light pinscratches; 1878 8TF — Cleaned — ANACS, AU53 Details, VAM-2, R.4, polished; 1878 8TF — Cleaned — ANACS, AU58 Details, VAM-14.1A, R.4, partly lustrous but hairlined; 1878 8TF MS62 ANACS, VAM-1, R.4, prooflike obverse, semiprooflike reverse, the left obverse is moderately abraded; 1878 8TF MS62 ANACS, VAM-21, R.4, lustrous, beautiful, lightly toned; 1878 8TF MS62 Prooflike ANACS, VAM-3, R.4, lightly toned, pleasing preservation; 1878 8TF MS63 ANACS, VAM-10, R.4, brilliant, lustrous; 1878 8TF MS63 ANACS, VAM-12, R.4, semi-prooflike, dusky blue-gray obverse toning; 1878 8TF MS63 ANACS, VAM-18, R.4, flashy luster, essentially brilliant, very nice; 1878 8TF MS63 ANACS, VAM-4, R.4, highly lustrous, only minimally abraded; 1878 8TF MS63 ANACS, VAM-14.2, R.4, lustrous and lovely with a couple of blushes of navy-blue and golden-brown patina; 1878 7/8TF Weak MS63 Prooflike ANACS, VAM-33, R.4, tobacco-brown and steelblue toning along the reverse border; 1878 7/8TF Strong MS61 Deep Mirror Prooflike ANACS, VAM-36, R.4, autumn-gold toning across portions of the obverse margin; 1878 7/8TF Strong MS62 ANACS, VAM-37, R.4, a well preserved reverse, peach toning near the obverse rim; 1878 7/8TF Strong MS62 ANACS, VAM-38, R.4, medium orange-gold toning; 1878 7/8TF Strong MS62 Prooflike ANACS, VAM-40, R.5, lightly toned, one horizontal mark on the cheek; 1878 7/8TF Strong MS63 ANACS, VAM-42, R.5, light orange peripheral patina; 1878 7TF Reverse of 1878 — Cleaned — ANACS, XF40 Details, VAM-195, R.3, suspicious dusky rose-red and sea-green toning; 1878 7TF Reverse of 1878 MS61 ANACS, VAM-144A, R.5, lustrous, moderate facial marks; 1878 7TF Reverse of 1878 MS62 ANACS, VAM-31, R.4, peripheral orange toning with a few small brown and blue spots; 1878 7TF Reverse of 1878 MS62 ANACS, VAM-84A, R.5, A Super CD Variety, faint partial clashed E in LIBERTY beneath tailfeathers, only lightly abraded; 1878 7TF Reverse of 1878 MS63 ANACS, VAM-130C3, R.6, golden toning across borders; 1878 7TF Reverse of 1878 MS63 ANACS, VAM-131C2, R.6, n clash from IN near Liberty's neck, light rose-gray toning; and an 1878 7TF Reverse of 1879 MS63 ANACS, VAM-201, R.6, lustrous and brilliant. (Total: 28 coins) (#7072)
- 5576 1878 8TF Cleaned ANACS. XF40 Details. VAM-14.15. VAMworld.com describes VAM-14.15 as "one of the terribly rare 8 tailfeather varieties." This moderately circulated example is slate-gray from cleaning but retains luster within the reverse legends.
- 5577 1878 8TF MS63 PCGS. VAM-5. A Top 100 Variety. The Doubled RIB 8TF VAM, well known to first-year specialists of the series. E PLURIBUS UNUM is strongly die doubled. This virtually untoned example has a prooflike obverse and vibrant cartwheel luster on the reverse. The fields are well preserved, and the cheek displays moderate grazes.(#7072)

- 5578 1878 8TF MS64 PCGS. VAM-20. A Hot 50 Variety. Prominent die doubling on the date distinguishes this 8TF VAM. The reverse is die doubled as well, strongest on DOLLAR. This boldly struck and lustrous Choice silver dollar has medium walnut-brown and stone-gray obverse toning, although the reverse is close to brilliant. (#7072)
- 5579 1878 8TF MS65 NGC. VAM-14.2. Light to medium sun-gold patina visits the centers of this lustrous first-year Morgan dollar. Crisply struck and splendidly preserved with exceptional eye appeal. (#7072)
- 5580 1878 8TF MS65 NGC. VAM-18. VAM-18, 19, and 20 are all from the same obverse die with strong doubling on the date. The reverse die doubling is also prominent, especially on the O in OF. Lightly toned and sharply struck with dazzling luster and exemplary preservation.(#7072)
- 5581 1878 8TF MS65 PCGS. VAM-14.1A. The "Alligator Eye" 8TF VAM, reminiscent of the well known 1887 VAM-12 Top 100 Variety. Although designated as VAM-14.1 on the insert, this is the "A" state with a faint clashed n from IN near Liberty's neck. Beautifully preserved and lustrous with a precise strike and a small alloy streak on the reverse at 6:30.(#7072)
- 5582 1878 8TF MS65 NGC. VAM-4. An obverse die chip at 1:30 identifies this popular 8TF die pairing. Honey-gold toning graces the rims, while the fields and devices are brilliant. Thoroughly lustrous and impressively unabraded with a good strike and imposing eye appeal. In a former generation holder.(#7072)
- 5583 1878 8TF MS65 PCGS. VAM-17. The "Diagonal in 8" VAM, as noted on the PCGS insert. The diagonal line is within the lower loop of the first 8 in the date. Booming luster and a bold strike confirm the quality of this minimally toned and attractively preserved Gem.(#7072)
- 5584 1878 8TF MS65 PCGS. VAM-3. The "Spiked Eye," not a Top 100 or Hot 50 variety but one that has grown in popularity. A semi-prooflike Gem with dazzling luster and delicate tan toning. Nicely struck and only lightly abraded.(#7072)
- 5585 1878 8TF MS65 PCGS. VAM-21. The bases of the R and B in PLURIBUS are broken. This Gem 8TF dollar has light golden toning and a prooflike reverse. The obverse displays cartwheel luster. Well struck and impressively preserved.(#7072)
- 5586 1878 8TF MS65 PCGS. VAM-21. The lightly doubled letters P,U,R, and B in PLURIBUS, with small defects apparent at the base of R and B, identifies this specimen as a VAM-21. The popular 8 Tail Feathers variety was discovered by Leroy Van Allen in 1965. This well detailed specimen displays bright mint luster and hints of light gold toning.(#7072)

#### 1878 8 Tailfeathers Dollar, MS66 Dazzling Surfaces

5587 1878 8TF MS66 NGC. VAM-21. The first-year 1878 Morgan dollar was widely saved in circulated and Uncirculated condition. However, few have survived in such a superior state as this piece. Each side is brilliant and the fields are borderline mirror-like. As one can almost always expect from an 1878, the strike is full in the centers. Census: 18 in 66, 0 finer (3/11). (#7072)

# Important VAM-14.8 Eight Tailfeather MS63 Prooflike 1878 Morgan Dollar

- 5588 1878 8TF MS63 Prooflike NGC. VAM-14.8. Per VAMworld. com, "VAM-14.8 is one of the ultra rare 8TF coins. VAM-14.8 was struck as a proof and the dies were reused as a business strike. Because of rarity, the business strike typically sells for higher premiums than the proof." Most survivors are in circulated grades. Brilliant save for light rose toning near the rims. Crisply struck and flashy with a few moderate marks on the left obverse. (#7073)
- 5589 1878 8TF MS64 Prooflike PCGS. VAM-19. Sun-gold patina invigorates the margins of this sharply struck near-Gem. The obverse is deeply mirrored, and the reverse is highly lustrous. Minor marks on the left obverse determine the grade.(#7073)
- 5590 1878 8TF MS65 Prooflike NGC. CAC. VAM-2. A slender band of golden-brown resides near the rims, and the centers of this flashy Gem display light tan toning. Beautifully preserved and alertly struck with impeccable eye appeal. (#7073)
- 5591 1878 8TF MS63 Deep Mirror Prooflike PCGS. VAM-23. A Top 100 Variety. Liberty's lips are die doubled, hence the "Crazy Lips" notation on the PCGS insert. The mirrored and untoned fields exhibit contrast with the white motifs. The obverse field is uncommonly smooth, although the cheek displays faint grazes. (#97073)

# 1878 7/8 Tailfeathers Dollar, MS64 DMPL VAM-33, Doubled Eagle's Legs

- 5592 1878 7/8TF Weak MS64 Deep Mirror Prooflike PCGS. CAC. VAM-33. The eagle's legs are widely die doubled on this 7/3TF variety. Clashmarks are present near the lips despite lapping that weakens Liberty's nostril. A stone-white near-Gem with prominently reflective fields and a smooth cheek. The strike is full, and the eye appeal is significant. Population: 30 in 64 Deep Mirror Prooflike, 4 finer (3/11). (#97071)
- 5593 1878 7TF Reverse of 1878 MS65 NGC. Gorgeous orange-gold and rose-red toning consumes the obverse and shares the upper left reverse with an arc of navy-blue. Fully struck with potent luster and splendidly smooth fields. (#7074)
- 5594 1878 7TF Reverse of 1878 MS65 PCGS. CAC. This 1878 Gem Morgan dollar features the Reverse of 1878, with parallel arrow feathers and 7 Tail Feathers. Pinpoint definition shows on all design elements, and the mint luster is vibrant and frosty. (#7074)

- 5595 1878 7TF Reverse of 1878 MS65+ PCGS. CAC. This sharply detailed Gem has frosty silver luster with pristine surfaces, especially the reverse. Both sides are brilliant and untoned. Population: 1 in 65+, 34 finer (3/11).(#7074)
- 5596 1878 7TF Reverse of 1878 MS64 Prooflike PCGS. VAM-82. The many doubled stars and letters, and the die chip to the right of the lowest cotton leaf, indicates the VAM-82 variety. This well struck Choice example exhibits reflective prooflike surfaces, with rings of dark green, gold, and violet toning. Population for the variety: 1 in 64 Prooflike, 0 finer (3/11).(#7075)
- 5597 1878 7TF Reverse of 1879 MS65 PCGS. Rich orange, plummauve, and aquamarine patina fill both sides, save for a window of brilliance on the lower right obverse. This crisply struck Gem has a pristine reverse and only a few hair-thin marks on the portrait. (#7076)
- 5598 1878 7TF Reverse of 1879 MS65 PCGS. Frosty and essentially untoned overall. The striking characteristics are excellent, and include above average details on the eagle's breast feathers and talons, as well as over Liberty's ear. The obverse and reverse are also very clean, as expected for the assigned grade.(#7076)
- 5599 1878-CC MS65 PCGS. CAC. Fully brilliant and frosty silver luster shines brightly on both sides of this Gem. Traces of delicate gold toning are barely visible. An impressive piece with sharp design motifs. (#7080)

#### Bold Premium Gem 1878-CC Morgan

- 5600 1878-CC MS66 NGC. The frosty surfaces on this perennially popular issue appear to verge on an even finer grade, with a clean cheek on Liberty, a bold strike, and good semiprooflike field-device contrast. A series of small linear marks on the eagle's breast is likely the only grade-limiting factor. NGC has graded only nine pieces finer (3/11). (#7080)
- 5601 1878-CC MS65 Prooflike NGC. The 1878-CC is a popular mintmark type coin, from the first year of the Morgan design. This sharply detailed Gem displays brightly reflective fields, and boldly contrasted frosty devices.(#7081)
- 5602 1878-CC MS65 Prooflike PCGS. Reflective fields and frosty motifs combine for moderate cameo contrast on each side. This brilliant Carson City dollar is well struck, and relevant contact is limited to the base of the chin. PCGS has only certified 10 finer prooflike examples (3/11).(#7081)
- 5603 1878-CC MS62 Deep Mirror Prooflike PCGS. VAM-11. A Top 100 Variety. A series of die gouges forming a rough "Z" on the lower left (facing) eagle's wing identifies the VAM-11 variety. This well detailed specimen exhibits frosty devices and boldly contrasting reflective fields. A scattering of minor contact marks explains the grade. Population: 2 in 62 Deep Mirror Prooflike, 10 finer (3/11). (#97081)

#### Gem Deep Mirror Prooflike 1878-CC Morgan Dollar

1878-CC MS65 Deep Mirror Prooflike NGC. The "triple threat" allure of this first-year 1878 Morgan dollar, with CC mintmark and Deep Mirror Prooflike certification from NGC, should prove irresistible to the legions of series fans. The blinding white, deeply contrasted surfaces certainly back up those credentials, as does the relative paucity of contact marks. Minor roller marks appear in the hair above the ear and the lower chin, and some of the details on the lower reverse are a bit softly struck. The gleaming Deep Prooflike surfaces, however, are this coin's most memorable attributes. Census: 30 in 65 Deep Mirror Prooflike, 0 finer (3/11). (#97081)

#### Deep Mirror Prooflike 1878-S Morgan, MS65 Die Doubled Obverse

- 5605 1878-S MS65 Deep Mirror Prooflike PCGS. CAC. Frosty devices exhibit contrast with the flashy fields, especially on the reverse. The cheek and reverse field are remarkably devoid of contact. As is often the case for 1878-dated Morgans, the obverse is die doubled, most prominently on the R in PLURIBUS. Housed in an old green label holder. Population: 16 in 65 Deep Mirror Prooflike, 3 finer (3/11). (#97083)
- 5606 1879 MS66 PCGS. Brilliant and fully struck with thick, frosted mint luster. An exceptionally attractive high-grade example of this popular early issue.(#7084)
- 5607 1879-CC XF45 PCGS. The 1879-CC Morgan dollar is the second rarest Carson City issue of the series. The present coin is lightly worn, with traces of mint luster, and a patina of gold and silver-gray hues. (#7086)

#### Select 1879-CC Morgan Dollar Elusive Carson City Issue

5608 1879-CC MS63 PCGS. The 1879-CC Morgan dollar is always in demand because of the popular CC mintmark and its low mintage of 756,000 pieces. Among Carson City Morgans, the 1879-CC is the second most difficult issue to locate, behind the 1889-CC. The present coin is a well struck Select specimen, with vibrant, cartwheel mint luster and a few touches of gold toning. From The Summit Collection. (#7086)

#### 1879-CC Dollar, MS61 Deep Mirror Prooflike Scarce, Semikey Issue

5609 1879-CC MS61 Deep Mirror Prooflike ANACS. The 1879-CC is second only in rarity to the 1889-CC dollar. This is a deeply reflective example that has thick, frosted devices that create sharp cameo contrast on each side. There are remarkably few abrasions for the grade, the most obvious ones on the cheek of Liberty. Both obverse and reverse display a light accent of golden patina. (#97087)

# Silver-White 1879-CC Dollar MS62 Deep Mirror Prooflike

5610 1879-CC MS62 Deep Mirror Prooflike PCGS. The combination of Deep Mirror Prooflike surfaces and the famed 1879-CC Morgan dollar should prove to be irresistible for the legions of series fans. This sumptuous MS62 example is profoundly mirrored with silverwhite surfaces that show no trace of discernible color otherwise. Numerous abrasions, more prominent on the obverse and including some in the prime focal areas, preclude an even finer grade, but generous eye appeal is the rule. Population: 17 in 62 Deep Mirror Prooflike, 40 finer (3/11). (#97087)

5611 1879-CC Capped Die XF45 NGC. VAM-3. A Top 100 Variety. The Capped Die variety is identified by the large CC mintmark punched over a partially effaced smaller CC. This example is lightly worn, with much original mint luster remaining, and a moderate number of contact marks.(#7088)

- 5612 1879-CC Capped Die AU50 PCGS. VAM-3. A Top 100 Variety. An almond-gold and cream-gray better date Carson City Morgan that possesses a bright band of luster throughout both margins. Luster also bathes the eagle and Liberty's curls.(#7088)
- 5613 1879-CC Capped Die AU50 ANACS. VAM-3. A Top 100 Variety. The popular repunched mintmark, offered here as a lightly worn yet strongly lustrous AU50 example. Lavender-blue and gold border toning on the obverse extends across most of the reverse. Housed in a small-format ANACS holder. From The Summit Collection. (#7088)

#### 1879-CC Morgan Dollar, MS62 Capped Die Variety

5614 1879-CC Capped Die MS62 PCGS. VAM-3. A Top 100 Variety. The Capped Die variety, also known as the Large CC Over Small CC, was created when the mintmark was initially impressed into the die with a small letter punch, then partially effaced, and overstruck with a large punch. The Capped Die variety is less available than the variety with a perfect mintmark, but historically it has not been appreciated by nonspecialists. The present coin is a well struck MS62 example, with vivid green, gold, and lavender patina on both sides. (#7088)

#### VAM-3 1879-CC 'Capped Die' Dollar, MS62

5615 1879-CC Capped Die MS62 NGC. VAM-3. A Top 100 Variety. Softly frosted luster is most prominent on the portrait, where the hair over Liberty's ear is weak but the rest of her features are better-defined. Light gray on the interiors with the coin's visible cobalt, electric-blue, and violet edge toning creeping over into parts of the rims. (#7088)

#### Gem 1879-O Morgan Dollar Vibrant Mint Luster

- 5616 1879-O MS65 PCGS. The 1879-O Morgan dollar claims a substantial mintage of 2.9 million pieces, and the issue is easy to locate in lower Mint State grades. However, the 1879-O is scarce at the Gem level, and examples in finer grades are very rare. The present coin is sharply detailed in most areas, with just the slightest softness on the hair above the ears. The surfaces are brilliant, with vibrant frosty mint luster. Only 13 coins have been certified in higher numeric grades by PCGS (2/11). (#7090)
- 5617 1879-O MS63 Deep Mirror Prooflike PCGS. The 1879-O Morgan dollar is a very scarce issue With Deep Mirror Prooflike surfaces. The present coin features sharply detailed devices that contrast boldly with the mirrored fields. Population: 44 in 63 Deep Mirror Prooflike, 31 finer (3/11).(#97091)
- 5618 1879-S MS67 NGC. Dramatic arcs of cherry-red, lemon-yellow, powder-blue, and forest-green dominate the right reverse of this lustrous and well struck Superb Gem. The obverse field is pristine, and the reverse shows only unobtrusive marks.

  Ex: FUN Signature (Heritage, 1/2006), lot 6345, which realized \$805. (#7092)

#### Rainbow-Toned 1879-S Dollar, MS68 ★

- 5619 1879-S MS68 ★ NGC. CAC. Not only is this dollar close to technical perfection, as the grade would indicate, but it has unparalleled beauty from rainbow toning. The upper right of the obverse and lower right of the reverse display gradations of color that give this dollar superb eye appeal. Fully struck. Census: 6 in MS68 ★, none are finer (3/11). (#7092)
- 5620 1879-S MS65 Deep Mirror Prooflike PCGS. Icy devices and flashy fields ensure the eye appeal of this nicely struck Gem. The reverse is practically pristine, and the obverse displays only minor marks. Housed in a green label holder. From The Orchid Collection. (#97093)
- 5621 1880-CC MS65 PCGS. GSA. Light frosted areas are prominent through the centers on well struck devices. Hints of gold and peach patina visit cartwheel-luster fields that show delicate layers of cloud-gray toning.(#7100)
- 5622 1880-CC MS65 PCGS. Amply frosted on the devices with flashy (though not prooflike) fields. The centers are minimally toned with a yield toward gold and cobalt-blue close to the rims. (#7100)
- 5623 1880-CC MS65 PCGS. Light gold-orange elements at the borders with swirling silver luster at the interiors. Almost certainly of GSA origin and housed in a green label holder. From The Dr. Donald M. Gilner Collection. (#7100)

- 5624 1880-CC MS65 PCGS. Partial green-gold rim toning accents lustrous medium-gray surfaces. This decently struck and charming Carson City Gem is housed in a green label holder. From The Dr. Donald M. Gilner Collection. (#7100)
- 5625 1880-CC MS65 PCGS. The obverse is largely frosty, though the reverse has better-defined cartwheels through the fields. Scattered golden-tan elements in the fields are more concentrated around the eagle.(#7100)
- 5626 1880-CC MS66 NGC. Fantastic luster is frosty on the devices and cartwheeled in the fields. Gold-orange border toning extends deepest toward the center at the lower left reverse. In a prior generation holder. From The Dr. Donald M. Gilner Collection. (#7100)
- 5627 1880-CC MS66 PCGS. Delicate yellow and champagne elements at the margins lend a touch of color to this bright silver-white Carson City dollar. Smooth on the obverse with softly frosted devices, though a scrape at the eagle's neck is grade-defining. (#7100)
- 5628 1880-CC MS66 PCGS. CAC. Yellow, peach, and plum toning is prominent at the borders on each side. The interior obverse is pearl-gray with a touch of frostiness, while the reverse has gold-gray patina there. PCGS has graded 28 numerically finer examples (3/11).(#7100)

#### 1880-CC Morgan Dollar, MS66 Bold 8 Over High 7 Overdate

- 5629 1880-CC 8 Over High 7 MS66 PCGS. VAM-5. A Top 100 Variety. Remains of a 7 are obvious within the second 8 in the date. Courtesy of the GSA hoard, any Carson City collector can acquire a high grade example of this interesting overdate. The present Premium Gem has vibrant luster, a bold strike, and only a hint of tan toning. Population: 69 in 66, 5 finer (3/11). (#7102)
- 5630 1880-CC 8 Over Low 7 MS65 PCGS. VAM-6. A Top 100 Variety. The base of the 7 is well below the lowest curve of the second 8 in the date. Bright, semireflective luster with faint golden overtones that are stronger on the reverse. Central devices are well struck and amply frosted. (#7104)

#### Overdated 1880-CC Silver Dollar, MS66 VAM-6, 8 Over Low 7

5631 1880-CC 8 Over Low 7 MS66 PCGS. VAM-6. A Top 100 Variety. Ex: Larry Shapiro. Beautiful autumn-gold and ocean-blue toning brightens the left obverse, although the remainder of this overdated Carson City Morgan remains brilliant. Crisply struck despite faint mint-made roller marks near Liberty's ear. A few delicate obverse grazes cannot deny the eye appeal. (#7104)

- 5632 1880/79-CC Reverse of 1878 MS65 PCGS. VAM-4. A Top 100 Variety. The boldest of the overdated obverses is paired with a Reverse of 1878 die. This fully struck Gem offers incredible eye appeal with whispers of frost on the rose-inflected devices. Minimally toned otherwise. PCGS has certified 62 finer examples (3/11).(#7108)
- 5633 1880-O MS64 PCGS. CAC. Micro O. This sharply struck silver dollar has dynamic luster and merely a wisp of tan toning. The fields are well preserved, and the cheek displays only wispy grazes. (#7114)
- 5634 1880-O MS64 NGC. Micro O. Lightly toned overall, although the margins display moderate navy-blue and mahogany patina. The centers are incompletely brought up, but the fields are exceptionally preserved. Certified in a former generation holder. From The Orchid Collection. (#7114)
- 5635 1880-O MS64 PCGS. VAM-3. Medium O, dash under second 8 in date. Slender bands of butter-gold, ruby-red, and powder-blue adorn the margins of this nicely struck near-Gem. Impressively unabraded save for a single reeding mark beneath the branch stem. Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6793, which realized \$1,495.(#7114)
- 5636 1880-S MS67+ ★ NGC. CAC. Large S. A stone-white and precisely struck Superb Gem that presumably was given the Star designation due to its fully prooflike reverse. The obverse exhibits dazzling cartwheel sheen.(#7118)

#### 1880-S Dollar, Outstanding MS68

- 5637 1880-S MS68 PCGS. CAC. Large S. Like most Uncirculated 1880-S dollars, the present piece is sharply struck and highly lustrous. What distinguishes it from its peers is the uncommon preservation. Gorgeously smooth surfaces are further distinguished by hints of tan color. As of (3/11), just five pieces have been certified in finer grades by PCGS. (#7118)
- 5638 1880-S MS67 Prooflike NGC. Large S. The 1880-S Morgan dollar is an ideal type coin, with impressive high-grade examples available at all times. The present coin is a sharply detailed Superb Gem, with reflective brilliant surfaces. Only seven Prooflike coins have been certified in higher numeric grades at NGC (3/11). (#7119)
- 5639 1880-S MS67 Prooflike PCGS. CAC. Medium S. Exquisitely struck and essentially untoned. This silver dollar type coin has flashy fields and a well preserved reverse. PCGS has graded 17 finer Prooflike coins (3/11).

  Ex: West Palm Beach Signature (Heritage, 6/2008), lot 1314, which realized \$1,725.(#7119)
- 5640 1880-S MS66 Deep Mirror Prooflike PCGS. CAC. Flashy and deeply reflective with heavy frost on the devices. A nearly brilliant Premium Gem that has exceptionally clean fields. Certified in a green label holder.(#97119)
- 5641 1880/9-S MS67 PCGS. VAM-11. A Hot 50 Variety. Die fill within the 0 is suggestive of an underdigit 9. Faint almond-gold toning visits thoroughly lustrous and exceptionally clean surfaces. Population: 27 in 67, 6 finer (3/11).(#7122)
- 5642 1881-CC MS65 PCGS. Solidly struck with swirling, softly frosted luster. The obverse is largely silver with two fingerprint patterns in tan at the right, a color that is repeated on the right reverse. (#7126)

- 5643 1881-CC MS65 PCGS. VAM-2. Prominent die fill is noted in the loops of the 8s. Faint tan toning visits this highly lustrous Carson City Gem. The strike is virtually full, and the eye appeal is unassailable. Certified in a first generation holder. (#7126)
- 5644 1881-CC MS65 ★ NGC. Mounted reverse-up in the holder, the better to showcase the broad swaths of plum, jade, ocean-blue, ruby, yellow-green, and aqua toning covering all but the top of that side. A richly frosted and lustrous Gem that shows a hint of similar color at the left obverse. Silver-gray elsewhere.(#7126)
- 5645 1881-CC MS66 PCGS. The 1886-CC Morgan dollar is an ideal choice for a mintmark type collection, combining high quality and ready availability. The present coin is a well struck Premium Gem, with a hint of light golden toning and vibrant mint luster. (#7126)
- 5646 1881-CC MS66 PCGS. Pearl-gray with infrequent hints of tan patina. This well struck and lustrous Premium Gem has nearly pristine fields. The popularity of this low mintage Carson City issue remains a constant within the hobby.(#7126)
- 5647 1881-CC MS66+ PCGS. CAC. The 1881-CC Morgan dollar boasts a low mintage of 296,000 pieces, though the GSA holdings ensure its high-grade availability. On this subtly frosted MS66+ example, the obverse is richly toned gold with arcs of peach and blue at the top, while the reverse has more subdued and isolated color.(#7126)
- 5648 1881-CC MS66+ PCGS. CAC. Thickly frosted on the central devices with bold cartwheels through the fields. Minimally toned save for faint suggestions of peach around the eagle. (#7126)

#### Minimally Abraded 1881-CC Dollar, MS67

5649 1881-CC MS67 PCGS. The 1881-CC, despite its low mintage of 296,000 pieces, is easy to find in Mint State due to the dispersal of former Treasury holdings. Highly attractive satiny luster invigorates the minimally abraded silver-gray surfaces of this Superb Gem. Boldly struck design features enhance the overall eye appeal. Ex: Signature (Heritage, 10/2008), lot 946. (#7126)

#### Superb Gem 1881-CC Dollar Smooth, Uninterrupted Mint Luster

5650 1881-CC MS67 PCGS. Carson City dollars are often found nicked from decades of storage and transport in canvas bags. Undoubtedly this was a former GSA dollar, but this is one of the nicest we have seen in some time. Both sides are brilliant, and smooth, creamy luster flows over the surfaces uninterrupted by the usual abrasions. Fully struck. (#7126)

- 5651 1881-CC MS65 Prooflike NGC. The fantastic frost on the devices gives this coin contrast more reminiscent of Deep Prooflike fields. Near-brilliant silver surfaces are edged in golden-tan. Census: 56 in 65 Prooflike, 10 finer (3/11).(#7127)
- 5652 1881-CC MS66 ★ Prooflike NGC. Untoned surfaces offer exquisitely struck design elements, including virtually complete delineation in the hair over Liberty's ear and on the eagle's breast feathers. The field-device contrast is especially pronounced on the reverse. A few light obverse grazes likely preclude an even higher numerical grade. Census: 2 in 66 ★ Prooflike, 0 finer as Star Prooflike (3/11).

Ex: Long Beach Signature (Heritage, 2/2008), lot 1173, which realized \$1,955.(#7127)

#### Quicksilver 1881-CC Dollar, VAM-2 MS65 Deep Mirror Prooflike

- 5653 1881-CC MS65 Deep Mirror Prooflike PCGS. VAM-2. "Doubled CC and Top Reverse," according to VAMWorld.com. Both 8s show artifacts inside, with doubling visible on the reverse upper legends and a thin die line from the olive branch to the leaves just above the arrow feathers. The 1881-CC Morgan dollar in Deep Mirror Prooflike is among the commoner series issues with that feature, but that fact in no way detracts from the aesthetic appeal of these coins. This Gem DMPL is deeply reflective and exhibits the requisite silver-on-black effect. The quicksilver surfaces are lovely and display only minor ticks that preclude an even finer grade. PCGS has certified 46 submissions finer in DMPL (3/11). (#97127)
- 5654 1881-O MS65 NGC. Frosty and bright through the interiors with flashy cartwheel luster and gold-orange and blue border-toning of varying density and intensity. Elusive any finer; NGC has graded just eight numerically superior examples (3/11).(#7128)
- 5655 1881-O MS65 NGC. Bright and flashy luster is largely silver with a few areas of cloudy gray that show as peach when turned into the light. An attractive Gem example from an issue that is conditionally rare any finer. (#7128)
- 5656 1881-O MS65+ PCGS. Bright silver luster with just the faintest hint of canary-yellow near the borders precluding full brilliance. Carefully preserved even by Gem standards and well-defined for an O-mint. PCGS has graded just 12 numerically finer examples (3/11).(#7128)
- 5657 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. Sharply detailed frosty devices and deeply reflective fields provide intense cameo contrast on this high-end Choice Morgan dollar. Only 12 coins have been certified finer within the designation at PCGS (3/11).(#97129)
- 5658 1881-S MS67 ★ NGC. Outlandishly toned on the obverse with stripes of yellow-orange, pale emerald, blue, plum, and ruby with occasional strawberry splashes. The reverse of this Superb Gem has considerably less color, though the borders are lightly toned gold. (#7130)

#### Glorious 1881-S Morgan Dollar MS66 Deep Mirror Prooflike

- 5659 1881-S MS66 Deep Mirror Prooflike PCGS. CAC. The 1881-S issue is among the finest-produced in the entire Morgan dollar series, making those few Deep Mirror Prooflike specimens certified in high grade among the glories of the series. This Premium Gem DMPL coin offers blinding mirrors and thickly frosted devices. A few small scuffs on the cheek may preclude the next-higher grade level. (#97131)
- 5660 1882 MS66 PCGS. Flashy and frosty with pale silver color that is essentially unbroken. Exactingly detailed on the central devices and in all respects a great example of this Philadelphia issue. PCGS has graded just six numerically finer representatives (3/11). (#7132)

#### 1882 Morgan Dollar, MS66+ Only Six Coins Finer at PCGS

- 5661 1882 MS66+ PCGS. CAC. The 1882 Morgan dollar was a highmintage issue, with more than 11 million pieces produced. Even at the Premium Gem level, the date can only be called scarce. The population declines precipitously above MS66, however, and finer grades are virtually unobtainable. The present coin is a high-end Premium Gem, with sharply detailed devices and vibrant mint luster. Population: 7 in 66+, 6 finer (3/11). (#7132)
- 5662 1882 MS64 Deep Mirror Prooflike PCGS. Outstanding reflectivity with champagne border-toning deepening to peach on the reverse. Light frost over well struck devices adds to the contrasted appearance of this near-Gem. PCGS has graded just 20 numerically finer Deep Mirror Prooflike pieces (3/11). (#97133)
- 5663 1882-CC MS66 PCGS. A remarkably flashy example that offers a mix of frosty fields and sweeping cartwheel patterns. Crisply detailed with pale gray surfaces that show little color and few flaws. PCGS has graded 53 numerically finer examples (3/11). (#7134)
- 5664 1882-CC MS66+ NGC. CAC. This impressive Carson City type coin has booming luster and an exemplary strike. The center of the cheek is pristine, and thorough inspection beneath a loupe fails to locate any distracting contact.(#7134)
- 5665 1882-O MS65 PCGS. CAC. Excellent cartwheel luster drapes over both sides of this silver-white Gem, which boasts few abrasions on frosty surfaces and excellent eye appeal. The strike is strong for an O-mint Morgan, with better definition throughout than usual. (#7136)

- 5666 1882-O MS65 PCGS. CAC. This attractive Gem exhibits sharply detailed devices, brilliant surfaces, and frosty mint luster. Only 23 coins have been certified in higher numeric grades at PCGS (3/11). (#7136)
- 5667 1882-O/S MS64 PCGS. VAM-4. A Top 100 Variety. The "O/S Recessed" with the center stroke of the "S" distinctly lower than the "O" around it. Silver interiors are lustrous, as are margins toned gold and blue-green.(#7138)
- 5668 1882-O/S Weak MS64 NGC. VAM-5. A Top 100 Variety. The "Broken S" overmintmark. Light sun-gold toning enriches this boldly struck and minimally abraded near-Gem. An eye-appealing example of this popular variety.(#87138)
- 5669 1882-S MS67+ NGC. CAC. Booming luster and delicate almond-gold toning combine with a bold strike and a clean appearance to proclaim the eye appeal of this San Francisco Superb Gem. An exceptional example of the issue.(#7140)

#### 1882-S Morgan Dollar, MS68 Tremendous Eye Appeal

- 5670 1882-S MS68 NGC. CAC. A virtually perfect example of this popular Morgan dollar, with pinpoint definition on all design elements and booming frosty mint luster. The brilliant surfaces are devoid of mentionable flaws and the visual appeal is fantastic. Although more than 9 million Morgan dollars were minted at San Francisco in 1882, none have been certified in grades above the MS68 level by NGC or PCGS (3/11). (#7140)
- 5671 1882-S MS65 Deep Mirror Prooflike NGC. Rose-red toning graces the margins of this decidedly mirrored and fully struck Gem. The reverse is pristine, as is Liberty's cheek. Housed in a former generation holder. Census: 71 in 65 Deep Mirror Prooflike, 10 finer (3/11).(#97141)
- 5672 1883 MS66+ PCGS. CAC. Obverse toning is key to this coin's eye appeal, as waves of pale green, aqua, cobalt, plum, peach, and citrine sweep in from the left. The right side of the obverse and the reverse are luminous with little color influencing the gray patina. (#7142)

#### Superb Gem 1883 Morgan Dollar Well-Preserved Surfaces

5673 1883 MS67 PCGS. CAC. This spectacular Superb Gem displays razor-sharp details on all design elements and virtually pristine fields. The mostly brilliant surfaces exhibit bright satiny mint luster, with just a hint of golden toning. Eye appeal is extraordinary. Population: 67 in 67, 3 finer (2/11). (#7142)

#### Superb Gem 1883 Morgan Dollar Just Three Specimens Finer at PCGS

- 5674 1883 MS67 PCGS. The 1883 Morgan dollar is scarce at the Superb Gem level, despite the huge mintage of more than 12 million pieces. The present coin is sharply detailed, with brilliant surfaces and vibrant mint luster. A thin die crack runs from star 2, through the stars on the left, to the rim at 10 o'clock. Housed in a green label holder. Population: 68 in 67, 3 finer (3/11). (#7142)
- 5675 1883-CC MS66+ PCGS. Strong luster flashes beneath a light layer of gray patina. This crisply detailed Carson City dollar also shows glimpses of golden-tan color close to the rims.(#7144)
- 5676 1883-CC MS66+ Prooflike PCGS. CAC. This high-end Premium Gem exhibits sharply detailed frosty devices and brightly reflective brilliant fields. Visual appeal is tremendous. Population: 3 in 66+ Prooflike, 8 finer (3/11).(#7145)
- 5677 1883-CC MS65 Deep Prooflike NGC. The obverse has a signature Deep Prooflike appearance with a thickly frosted portrait, strong surrounding mirrors, and deep orange-russet rim toning. The reverse shows similar characteristics but also numerous bold die polishing lines, practically die scratches, in the fields around the eagle. (#97145)
- 5678 1883-CC MS66 Deep Mirror Prooflike PCGS. The 1882-CC and 1883-CC Morgan dollars were the most plentiful in the GSA sales of the late 1970s. They are, due to their plentiful survival rates up to that time, among the most glorious Morgans in high-grade Deep Mirror Prooflike. This Premium Gem is certainly no exception, silver-white and radiant with exceptional reflectivity and abundant eye appeal. PCGS has graded only two DMPL coins finer (3/11).(#97145)
- 5679 1883-O MS65 Deep Mirror Prooflike PCGS. CAC. Thickly frosted on the central devices with a sharp strike. Only tiny dots of dark toning add color to each side, though the shining fields do show a thin veil of silver-gray toning. Housed in a green label holder. PCGS has graded only 13 finer Deep Mirror Prooflike examples (3/11).(#97147)
- 5680 1883-S MS63 NGC. Remarkably flashy luster on each side. The obverse is particularly impressive, where a veil of orange-gray over the middle gives way to deep blue, lavender, and violet toning near the rims. The reverse has similar colors only at the borders, and the center is given over to brilliance.(#7148)
- 5681 1883-S MS63 NGC. A well detailed Select specimen, with light golden-tan toning and bright mint luster, this pieces exhibits few contact marks for the grade. The 1883-S is a challenging date in Mint State grades.(#7148)
- 5682 1883-S MS63 PCGS. This conditionally scarce and attractively preserved Morgan dollar exhibits dynamic luster and peripheral golden-brown toning. A good strike despite slight inexactness at the centers. Encapsulated in a green label holder.(#7148)
- 5683 1883-S MS63 PCGS. Well struck, lustrous, and minimally toned. Minor marks are consistent with the assigned grade. Significantly conditionally scarcer than its 1878-S through 1882-S predecessors. (#7148)
- 5684 1883-S MS63 PCGS. Although not designated as Prooflike, this Select 1883-S Morgan dollar has mirrored fields in most areas, with some satiny luster on the reverse. The devices are well detailed, and the surfaces are lightly abraded for the grade. (#7148)

#### 1883-S Dollar, MS64 High-Mintage, Low-Availability Issue

- 5685 1883-S MS64 PCGS. CAC. In spite of a generous mintage of 6.2 million pieces, almost all 1883-S dollars were dropped into circulation, and such coins are easy to locate today as well as inexpensive. This near-Gem has bright, untoned, shimmering surfaces and show significant reflectivity in the fields. Sharply defined throughout. (#7148)
- 5686 1884-CC MS65 PCGS. CAC. VAM-4. Similar to VAM-4A, but the die gouge through the E in STATES is absent. Spectacular jade-green, fire-red, apricot-gold, and powder-blue toning makes the obverse memorable. The reverse displays only faint chestnut parina.

Ex: Milwaukee Signature (Heritage, 8/2007), lot 8737; Houston Signature (Heritage, 12/2010), lot 8329, which realized \$920. (#7152)

#### Superb Gem 1884-CC Silver Dollar

- 5687 1884-CC MS67 NGC. A brilliant Carson City type coin that boasts an immaculate reverse field and only unimportant obverse contact. Sharply struck and bathed in luster. The 1884-CC was featured in the GSA auctions of the 1970s, and is more available in Mint State than its mintage suggests. However, most examples are significantly more abraded than the present Superb Gem. (#7152)
- 5688 1884-CC MS66 Prooflike PCGS. CAC. Outstanding field-to-device contrast dominates the eye appeal on this Prooflike Premium Gem. The thick frost over the devices is even more impressive than the reflectivity in the flashy silver-white fields. Population: 82 in 66 Prooflike, 1 finer (3/11).(#7153)
- 5689 1884-CC MS66 Prooflike PCGS. CAC. VAM-2. The 1 in the date is widely repunched. A virtually brilliant Carson City Premium Gem that has flashy fields and solid eye appeal. PCGS has graded only one finer Prooflike example of the issue (3/11). (#7153)
- 5690 1884-CC MS65 Deep Mirror Prooflike PCGS. Outstanding contrast on each side. The obverse is particularly striking, thanks to snow-white frost on the portrait and bold mirrors surrounding. A gorgeous Carson City coin with minimal patina aside from a few dots of milky toning. (#97153)
- 5691 1884-CC MS65 Deep Mirror Prooflike PCGs. A stunning Gem, this 1884-CC has excellent contrast with deeply mirrored fields and frosty devices that show fully brilliant silver luster. There is no toning on either side. Although the date is plentiful thanks to the GSA sales of the 1970s, highly contrasted examples like this piece are comparatively elusive. (#97153)

- 5692 1884-CC MS65 Deep Mirror Prooflike PCGS. Ex: GSA. This piece must have come as a delightful surprise to the lucky recipient! Deeply mirrored and crisply struck with thick frost and small patches of pale, hazy toning. A small patch of roller marks appears on Liberty's cheek. (#97153)
- 5693 1884-CC MS66 Deep Mirror Prooflike NGC. Sharply detailed devices, with white frosty texture, stand out boldly against the reflective prooflike fields of this delightful Premium Gem. Only three coins have been certified in higher numeric grades within the designation at NGC (3/11).(#97153)

#### 1884-O Morgan Dollar, MS66 Deep Mirror Prooflike Only One Finer at PCGS

5694 1884-O MS66 Deep Mirror Prooflike PCGS. Prooflike examples of the 1884-O Morgan dollar are not hard to locate, but examples with the contrast displayed by this coin are rare. The well struck, frosty devices stand out boldly against the mirrored fields. A few wisps of golden-tan toning are evident, and a few minor hairlines can be detected on both sides. Housed in a green label holder. Population: 51 in 66 Deep Mirror Prooflike, 1 finer (3/11). From The Orchid Collection. (#97155)

#### 1884-S Morgan Dollar, MS61 Scarce Issue in Mint State

- 5695 1884-S MS61 PCGS. The 1884-S Morgan dollar claims a substantial mintage of 3.2 million pieces, but most examples saw extensive circulation in the 19th century. Specimens in Mint State condition are scarce in today's market. The present coin is a sharply detailed MS61 example, with frosty mint luster, and a moderate number of contact marks for the grade. (#7156)
- 5696 1885 MS67 PCGS. The 1885 Morgan dollar is quite scarce at the Superb Gem level. This specimen features vibrant mint luster, brilliant surfaces, and sharply detailed devices. Eye appeal is outstanding. Population: 69 in 67, 1 finer (3/11).(#7158)
- 5697 1885 MS67 PCGS. Incredible eye appeal accompanies the high technical grade of this magnificent Superb Gem. The centers display sharply detailed, brilliant devices, while the peripheries are graced by rings of vivid green and violet toning. (#7158)
- 5698 1885 MS67 NGC. The brilliant surfaces are graced by areas of vivid gold and greenish-gray patina, and the devices of this Superb Gem are sharply detailed. The mint luster is vibrant and frosty, adding to the outstanding eye appeal.(#7158)
- 5699 1885-CC MS65 ★ NGC. CAC. Boldly struck, appreciably frosted, and outlandishly toned. Aqua, cerulean, antique-gold, orange, and silver-gray shadings progress mostly in lines but also show blending and dappling.(#7160)

- 5700 1885-CC MS65 PCGS. Splashes of orange and powder-blue patina ensures the appeal of this lustrous and low-mintage Carson City Gem. The reverse is exceptionally well preserved. Only 228,000 pieces struck.(#7160)
- 5701 1885-CC MS65 PCGS. Fantastically frosty with sumptuous silver-white surfaces. Well-defined with a luster graze across the lower neck truncation that contributes to the grade. Housed in a green label holder.
  From The Dr. Donald M. Gilner Collection. (#7160)
- 5702 1885-CC MS65 PCGS. Excellent striking definition and ample cartwheel luster. A few dots of deep patina punctuate silver surfaces with faint golden overtones. Housed in a green label holder. From The Dr. Donald M. Gilner Collection. (#7160)
- 5703 1885-CC MS65 PCGS. A decisively struck low-mintage Carson City Gem that boasts comprehensive luster and attractive preservation. Brilliant save for a mere hint of gold and green toning, and encased in an old green label holder.

  From The Orchid Collection. (#7160)
- 5704 1885-CC MS65 PCGS. A gorgeous Gem example of this low-mintage, high-preservation issue. Dabs of gold-orange at the lower reverse periphery add color to otherwise silver and cloud-white surfaces.(#7160)
- 5705 1885-CC MS65 PCGS. This well detailed Gem offers brilliant surfaces and bright mint luster, with only minor evidence of contact. Some light hints of gold toning are evident on close inspection.(#7160)
- 5706 1885-CC MS65 PCGS. Always popular because of the low mintage of 228,000 pieces, the 1885-CC is a favorite of mintmark type collectors. This well struck Gem exhibits vibrant mint luster and few signs of contact on the brilliant surfaces. Housed in a green label holder.(#7160)
- 5707 1885-CC MS65+ PCGS. CAC. Frosted on the high points with gorgeous cartwheels sweeping through the fields on each side. Minimally toned save for a few dots and streaks of dark color. A couple of narrow scrapes near Liberty's chin keep this coin from Premium Gem status.(#7160)
- 5708 1885-CC MS64 Deep Mirror Prooflike PCGS. CAC. Among the highest-survival Morgan dollars, the 1885-CC in circulated grades is a conditional rarity for low-ball Registry Set collectors. This near-Gem Deep Mirror Prooflike coin is a horse of a different color, with fantastically radiant mirrors and arctic frost on the devices. Minor ticks determine the technical grade.(#97161)
- 5709 1885-CC MS65 Deep Mirror Prooflike PCGS. Moderately contrasted but deeply mirrored. The border zones have light green-gold toning that adds color to otherwise near-white surfaces. A few shallow field marks preclude an even finer designation. (#97161)
- 5710 1885-O MS66 ★ NGC. CAC. With the crazy-quilt celery, metallic-blue, magenta, and yellow toning on the obverse, a Star designation was a foregone conclusion for this Premium Gem. The luminous reverse has comparatively little color, an arc of goldorange along the right rim.(#7162)
- 5711 1885-O MS67 PCGS. Vibrant mint luster and well detailed design elements contribute to the outstanding visual appeal of this attractive Superb Gem. The 1885-O was heavily represented in the Treasury releases of the 1960s, but Superb Gem specimens are still scarce today.(#7162)
- 5712 1885-O MS67 PCGS. This sharply detailed Superb Gem displays mostly brilliant surfaces, with just a touch of gold patina. The surfaces exhibit vibrant mint luster and ample eye appeal. No coins have been certified in higher numeric grades at PCGS (3/11). (#7162)

5713 1885-O MS67+ PCGS. When tilted in the light, this O-mint beauty shows bold cartwheel luster and frosty high points on the devices. A scrape in the denticles at the bottom of the reverse is the only appreciable flaw. Population: 8 in 67+, 0 finer (3/11). (#7162)

#### 1885-O Morgan, MS66 Deep Mirror Prooflike Only One Coin Finer at NGC

- 5714 1885-O MS66 Deep Mirror Prooflike NGC. CAC. The 1885-O Morgan dollar was produced in large numbers and well represented in the Treasury releases of the 1960s. That being said, the issue is rare in Premium Gem condition, with the Deep Mirror Prooflike designation. The present coin features razor-sharp devices that display unusual contrast with the brightly reflective fields. Dark violet and green toning highlights the rims. Census: 21 in 66 Deep Mirror Prooflike, 1 finer (2/11). (#97163)
- 5715 1885-O MS66 Deep Mirror Prooflike NGC. This high-mintage issue was well produced, and tens of thousands of examples have been certified at the Gem and Premium Gem grade levels by NGC and PCGS. In Deep Mirror Prooflike condition, by contrast, there are only a few hundred graded at MS65 and MS66. This Premium Gem exhibits amazingly deep reflectivity in the fields. Well struck and nicely preserved, it only shows a few small marks on either side. Hints of yellow-gold patina cling to the obverse margins. Census: 21 in 66 Deep Mirror Prooflike, 1 finer (3/11).(#97163)
- 5716 1885-S MS65 PCGS. VAM-2A. The 5 in the date is repunched north, and the wreath has a small die break near the NI in UNITED. Golden-brown and ocean-blue borders ensure the eye appeal of this lustrous better date dollar. The fields are smooth, and the strike is good despite some softness at the centers.(#7164)
- 5717 1886 MS66 ★ NGC. Dramatic cherry-red, forest-green, and lemon-gold toning encompass the obverse. The reverse displays only faint caramel patina. Lustrous and precisely struck with a few delicate grazes on the left obverse.(#7166)
- 5718 1886 MS67 PCGS. CAC. Bold and swirling luster with minimal patina over silver surfaces. A trifle softly struck at the centers but a gorgeous coin nonetheless. Housed in a first-generation holder. PCGS has graded just three coins in numerically finer grades (3/11).(#7166)
- 5719 1886 MS67 PCGS. CAC. High technical quality and tremendous eye appeal go together on this Superb Gem Morgan dollar. The devices show razor-sharp definition and the unmarked fields are brilliant and lustrous.(#7166)
- 5720 1886-O MS62 PCGS. A surprisingly smooth example for the grade with a decent strike and luster and minimal color. The most significant flaw is a scrape under the S in PLURIBUS which affects the lower serif of that letter.(#7168)

#### 1886-O Dollar, MS63 High-Mintage, Low Availability in Better Uncirculated Grades

5721 1886-O MS63 PCGS. A well struck, lustrous example of this popular date, from a mintage of 10.7 million pieces. Even though produced in staggering numbers, high-grade specimens are difficult to locate and quite expensive. An attractive MS63 example makes a good balance of quality and value. A scattering of minor abrasions on the obverse explains the grade. (#7168)

#### Condition Rarity 1886-O Morgan Dollar Near-Gem, Only Two Finer at PCGS

- 5722 1886-O MS64 PCGS. One of the most remarkable condition rarities in the Morgan dollar series, the high-mintage (10.7 million coins) 1886-O is extremely common in lower grades but a rarity even at the near-Gem level of the present coin. A few thin roller marks appear on Liberty's lower cheek and the eagle's breast, but the strike is good overall and there are minimal abrasions consistent with the grade. PCGS has certified only two finer (3/11). (#7168)
- 5723 1887/6 MS64 Prooflike PCGS. VAM-2. A Top 100 Variety. This brilliant overdated near-Gem exhibits flashy fields and nicely struck motifs. Marks are difficult to find, even when studied beneath a loupe, although the portrait has a few small struck-through areas, as coined.(#7175)
- 5724 1887 MS67 NGC. Vibrant frosty mint luster and a razor-sharp strike create tremendous eye appeal, and the technical quality of this Superb Gem approaches perfection. Only two coins have been certified in higher numeric grades by NGC (3/11). (#7172)
- 5725 1887 MS67 PCGS. A magnificent Superb Gem, with vibrant mint luster, brilliant surfaces, and sharply detailed devices, this specimen possesses tremendous eye appeal. Population: 68 in 67, 1 finer (3/11).(#7172)

#### Deep Mirror Prooflike Superb Gem Binion 1888 Morgan Dollar

- 5726 1888 MS67 Deep Mirror Prooflike NGC. Ex: Binion Collection. This razor-sharp Superb Gem has flashy fields and only a hint of golden patina. Exceptionally devoid of marks, especially on the all-important cheek. The Binion pedigree is interesting. Gangster Benny Binion opened the Horseshoe Casino in Las Vegas in 1951, and it was inherited by his son, Ted Binion, who was murdered by the man he hired to build an underground vault for his silver dollar hoard. The 1888 is plentiful in Uncirculated condition, but is extremely rare at the MS67 level with deeply mirrored fields. In fact, NGC and PCGS combined have graded only four such pieces with none finer (3/11). (#97183)
- 5727 1888-O MS66 PCGS. Ex: David S. Emery. Strongly lustrous on each side with a thin layer of patina, pale gray on the obverse with a gold-orange reverse. PCGS has graded no Superb Gems (2/11). (#7184)
- 5728 1888-O MS66 PCGS. A radiant, clean-cheeked Mint State example that is fully brilliant and enjoys much sharper definition in the centers than is normally seen. No coins have been certified in higher numeric grades in the designation at PCGS (3/11). (#7184)

#### Sharp 1888-O Morgan Dollar Gem Deep Mirror Prooflike

- 5729 1888-O MS65 Deep Mirror Prooflike PCGS. CAC. The 1888-O Morgan dollar is an issue whose strike is widely variable, but this piece is far sharper than normal for an O-mint coin, with considerable detailing on the hair above the ear and gold definition at the center of the center of the eagle's breast. Splendidly deep contrast enriches both sides of this Gem piece, with largely silverwhite surfaces. Population: 57 in 65 Deep Mirror Prooflike, 4 finer (3/11). (#97185)
- 5730 1888-O Doubled Die Obverse AU53 PCGS. VAM-4. A Top 100 Variety. The popular "Hot Lips" Guide Book variety with prominent die doubling on Liberty's profile. VAM-4 is rarely seen in Mint State, and most advanced Morgan collectors settle for a partly lustrous and problem-free AU example, such as the present lot. (#7308)

#### 1888-S Dollar, MS65 Prooflike Scarce Issue With Mirrored Fields

- 5731 1888-S MS65 Prooflike NGC. The 1888-S is one of the less-available S-mints from the Redfield hoard. It is decidedly rare with prooflike fields, as only six other pieces have been so graded by NGC, two by PCGS, and only one coin is finer (3/11). This brightly mirrored example has interiors that are nearly brilliant and are surrounded by russet toning at the margins. Sharply struck. (#7187)
- 5732 1889 MS66 PCGS. VAM-16. A Hot 50 Variety. Liberty's ear and the stars on the right show light doubling, indicating the VAM-16 variety. This sharply detailed Premium Gem displays lustrous surfaces, with vivid rings of golden-brown and violet toning. (#7188)
- 5733 1889-CC VF25 PCGS. Moderately worn but attractive for the VF grade range. The wear is largely on the devices, leaving gold-infused fields surprisingly luminous.(#7190)
- 5734 1889-CC VF30 NGC. The 1889-CC Morgan dollar is the rarest Carson City issue of the series. This moderately worn example preserves most original detail and displays pleasing light gray patina. No problems are observed.(#7190)
- 5735 1889-CC VF30 ANACS. Simply gorgeous for the grade with considerable field luster through rich gold-orange, rose, and violet patina. Moderately worn but greatly appealing and housed in a small-format ANACS holder.(#7190)
- 5736 1889-CC VF30 PCGS. The 1889-CC is the rarest Carson City Morgan. This specimen displays the typical amount of wear for the date, as most examples seen are in VF grades. The surfaces exhibit a pinkish-gray patina and a few minor handling marks. (#7190)
- 5737 1889-CC VF35 PCGS. Only honest, even wear shows on the design elements of this key date. A dark line of color crosses the eagle's left wing on the reverse, but both sides are free of distracting contact marks.(#7190)
- 5738 1889-CC XF40 ANACS. Luminous and richly toned blue, violet, and dusty-rose with additional gold elements. A few small cuts on Liberty's cheek contribute to the grade. Housed in a small-format ANACS holder.

  From The Summit Collection. (#7190)
- 5739 1889-CC Improperly Cleaned NGC Details. XF. Pastel olive-green and chestnut toning adorns this glossy silver dollar. A few small marks are scattered, and the centers exhibit expected moderate wear. The rarest Carson City Morgan issue.
- 5740 1889-CC Improperly Cleaned NGC Details. XF. Silvergray surfaces have partly retoned from a past cleaning, though the fields still appear glossy. Light wear is concentrated on the high points of the devices, which also show a number of digs, particularly on the portrait.

#### 1889-CC Morgan Dollar, XF45 Most Elusive Carson City Morgan

5741 1889-CC XF45 PCGS. This lightly circulated Morgan dollar shows little actual wear, with only high-point details softened by friction. The fields display areas of prooflike reflectivity, with hints of gold and lavender toning. A moderate number of abrasions are present, including some roller marks in the left obverse field. The 1889-CC is a prized date, from a mintage of just 350,000 pieces. (#7190)

#### 1889-CC Dollar, XF45 Challenging Carson City Issue

5742 1889-CC XF45 NGC. Most original detail remains intact on this important key Morgan dollar, and the fields are remarkably free of abrasions. However, three short scratches are evident on Liberty's face. The surfaces display natural gold and powder-blue toning, with traces of mint luster under the patina. Only 350,000 Morgan dollars were struck at the Carson City Mint in 1889. (#7190)

#### 1889-CC Dollar, Partially Lustrous AU50

- 5743 1889-CC AU50 PCGS. There seem to be a large percentage of surviving 1889-CC dollars that are impaired in some way. This is a pleasing, lightly worn example that retains noticeable traces of luster around the devices. Only slight toning is present on the minimally marked surfaces. The only mentionable abrasion is an upside-down Y-shaped mark on the lower portion of Liberty's face. (#7190)
- 5744 1889-CC Whizzed NGC Details. AU. Lightly worn with artificial, disturbed luster in largely silver fields. A slender crescent of orange-and-violet retoning is noted along the upper obverse.

- 5745 1889-O MS64 PCGS. VAM-6. A Top 100 Variety. The 1, first 8, and 9 in the date are strongly doubled, indicating the VAM-6 variety. This well struck Choice example exhibits vibrant mint luster and a touch of gold toning at the rims. Population for the variety: 14 in 64, 0 finer (3/11).(#7192)
- 5746 1889-S MS65 PCGS. From a low mintage of 700,000 pieces, the 1889-S Morgan dollar is a scarce issue in high grade. This sharply detailed Gem exhibits traces of light gold toning and vibrant mint luster.(#7194)
- 5747 1890 MS65 PCGS. Well struck with vibrant luster beneath rich patina. The obverse has a melange of green-gold, sky-blue, sage, and silver-gray toning, while the reverse has similar colors in a ring around a minimally toned center.(#7196)
- 5748 1890-CC Tail Bar MS63 NGC. VAM-4. A Top 100 Variety. Unlike most VAM varieties, the Tail Bar can be attributed at a glance by the unaided eye. It is also very scarce, as it constitutes approximately 5% of the better date 1890-CC issue. This essentially untoned and highly lustrous example is sharply struck and boasts well preserved fields. (#87198)
- 5749 1890-CC MS64 NGC. Bright luster with just the faintest layer of patina over each side, largely colorless until delicate honey hues grace the margins. Well-defined for the date with great eye appeal. (#7198)
- 5750 1890-CC MS64 NGC. A well preserved Choice example of this popular Carson City dollar, the design elements are sharply defined and the lustrous surfaces show only minor signs of contact. The surfaces are graced by highlights of gold and violet toning. (#7198)

#### 1890-CC Dollar, MS65+ Remarkably Lustrous, Clean Surfaces

- 5751 1890-CC MS65+ PCGS. CAC. The 1890-CC is a cut above the more common dates from the early 1880s. Gems are especially elusive, and this is a splendidly preserved example. Each side is brilliant, the only exceptions are a couple of dots of grease that were struck into the lower cheek of Liberty. This is a remarkably clean 1890-CC, and a fully struck piece also. Population: 5 in 65+, 9 finer (3/11). (#7198)
- 5752 1890-CC MS64 Prooflike PCGS. CAC. This well detailed Choice Morgan dollar possesses outstanding eye appeal, due to the brilliant reflective fields and contrasting frosty devices. Population: 91 in 64 Prooflike, 13 finer (3/11).(#7199)
- 5753 1890-CC MS64 Prooflike PCGS. The mirrored fields of this Choice specimen show a few scattered contact marks, but the reflective surfaces produce dramatic contrast with the sharply detailed frosty devices. Population: 91 in 64 Prooflike, 13 finer (3/11).(#7199)

#### Radiant 1890-CC Silver Dollar MS64 Deep Mirror Prooflike

5754 1890-CC MS64 Deep Mirror Prooflike PCGS. The 1890-CC is, fortunately for collectors, a fairly available issue even in Deep Mirror Prooflike, although specimens graded finer than the present near-Gem are extremely elusive. This silver-white coin is splendidly mirrored throughout, with intense contrast and only a minor sprinkling of small contact marks. The eye appeal is excellent. PCGS has seen only 20 Deep Mirror Prooflike submissions finer (3/11). (#97199)

#### Choice Deep Mirror Prooflike 1890-CC Silver Dollar

- 5755 1890-CC MS64 Deep Mirror Prooflike PCGS. This better date Carson City Morgan is brilliant and boasts prominently mirrored fields. The well struck devices exhibit cameo frost. A few minute bagmarks confirm the business strike status. A splendid representative of the perennially popular Western facility. (#97199)
- 5756 1890-O MS65 PCGS. CAC. The obverse is lightly patinated but essentially silver-white, while the reverse has a more streaky appearance and is a touch more dusky. Appreciable cartwheel luster is a great asset. PCGS has certified 19 numerically finer examples (3/11).(#7200)

#### 1890-S Morgan Dollar, MS66 Light Golden Toning

5757 1890-S MS66 PCGS. Delicate tan toning adorns this boldly struck and uncommonly clean Morgan dollar. The '90-S trades as a type coin in circulated grades, but is slightly scarce in typical Mint State and becomes a conditional rarity at the MS66 level. Only faint contact on the left obverse precludes an even finer numerical assessment. (#7202)

#### Well Struck 1890-S Morgan, MS66

- 5758 1890-S MS66 PCGS. Delicate tan-gray toning graces this precisely struck and highly lustrous high grade silver dollar. Occasional minor grazes on the devices correspond to the MS66 level. Most certified '90-S Morgans are in the range from MS62 to MS64. A mere six pieces are certified finer by PCGS than the present coin (3/11). (#7202)
- 5759 1891 MS64 PCGS. CAC. The 1891 Morgan dollar was produced in large quantities, but high-quality specimens are elusive. The present coin is a well struck Premium Gem, with bright mint luster and hints of light gold toning.(#7204)
- 5760 1891 MS64+ PCGS. CAC. A minimally toned and highly lustrous silver dollar that has minor grazes but no consequential contact. A good strike overall despite blending on the hair above the ear.(#7204)
- 5761 1891 MS64 Prooflike PCGS. Delicate rose-gold tints appear when the obverse is tilted under a light. The moderate mirrors have few significant marks, though a pair appear below the S of PLURIBUS on the obverse. Population: 16 in 64 Prooflike, 0 finer (3/11).(#7205)
- 5762 1891-CC MS63 NGC. VAM-3. A Top 100 Variety. Ex: The Redfield Collection. Sharply struck and lustrous with light peripheral golden-brown toning. The fields are clean, and the cheek displays faint grazes. Housed in a red Mint State 65 Paramount International Coin Corp. Redfield holder, with a label affixed by NGC that states their grade.(#7206)
- 5763 1891-CC MS64 PCGS. VAM-3. A Top 100 Variety. Light chestnut-gold toning visits this well struck Choice Carson City Morgan. Booming luster sweeps refreshingly undisturbed surfaces. Housed in a green label holder.(#7206)
- 5764 1891-CC MS64+ PCGS. CAC. VAM-3. A Top 100 Variety. The popular but readily available "Spitting Eagle" VAM, also noteworthy for nice repunching on the first C in the mintmark. Sharply struck and lustrous with a well preserved obverse. The golden-brown and cobalt-blue toning is more prominent on the reverse.(#7206)
- 5765 1891-CC MS64+ PCGS. Thickly toned on the obverse with green-gold at the borders and succeeding blue, rose-violet, and sea-green colors at the interior. The reverse has far less color in its patina, a touch of peripheral yellow-orange set against a broad expanse of lustrous gray.(#7206)

# Beautifully Toned Gem 1891-CC Dollar VAM-3, The Popular 'Spitting Eagle' Variety

5766 1891-CC MS65 NGC. VAM-3. A Top 100 Variety. The well-known "Spitting Eagle" constitutes a sizeable percentage of Uncirculated 1891-CC Morgans, since the variety was included in the GSA hoard. Advanced numismatists will instead pay attention to the beautiful toning of the present lustrous example, as it is draped in apricot-gold, lime-green, and cream-gray shades. (#7206)

#### Gem 1891-CC Morgan Dollar In-Demand Carson City Issue

5767 1891-CC MS65 PCGS. The 1891-CC Morgan dollar is not too difficult to locate in Gem condition, but the demand for high-grade Carson City dollars is always great, and only 26 coins have been certified in higher grades at PCGS (3/11). The present coin is a sharply detailed Gem, with brilliant surfaces and vibrant mint luster. (#7206)

#### Gem 1891-CC Silver Dollar Conditionally Rare in Finer Grades

5768 1891-CC MS65 NGC. The surfaces of this well struck Gem are patinated in shades of gold, gray, blue, and lavender. Strong luster is evident under the toning. The 1891-CC is always in demand from mintmark type collectors and Morgan dollar specialists alike. Only 10 coins have been certified in higher numeric grades by NGC (3/11)

From The Orchid Collection. (#7206)

#### 1891-CC Dollar, MS65 Remarkably Smooth Surfaces

5769 1891-CC MS65 PCGS. CAC. The hard, satiny finish on this coin is uninterrupted by the abrasions usually seen on this and other Carson City dollars. The fields are bright and semireflective on each side, and the strike is strong overall. A wonderful example of this better-date Carson City dollar. (#7206)

5770 1891-CC MS63 Deep Mirror Prooflike PCGS. Thickly frosted central devices stand out from powerfully mirrored fields. Orange-gold rim toning adds a colorful accent to each side. Lightly abraded overall with a few cuts noted on the eagle's breast. (#97207)

#### 1891-CC Dollar, MS64 Deep Mirror Prooflike Sharply Contrasted Fields and Devices

5771 1891-CC MS64 Deep Mirror Prooflike PCGS. The deeply mirrored fields establish substantial contrast on each side from a generous endowment of mint frost over the devices. That side is also essentially untoned with a brilliant-white sheen. The obverse, on the other hand, displays some golden patination. There are a few wispy abrasions, as well as a tiny spot on the forward part of Liberty's cheek. A shallow depression on Liberty's neck is a planchet depression (as struck). The 1891-CC is rare not only as a Gem, but also with a Deep Mirror Prooflike finish. Perhaps unsurprisingly, precious few examples with this finish are extant at or near the MS65 level. Population: 47 in 64 Deep Mirror Prooflike, 1 finer (3/11). (#97207)

#### Gem 1891-CC Dollar, Deep Mirror Prooflike

5772 1891-CC MS65 Deep Mirror Prooflike ANACS. The mirrors on this Gem piece are deep looking-glasses, with frosty devices on both sides. The rims are lightly tinged in shades of pink and gold, and neither side displays any abrasions of significance. A few field hairlines appear under a loupe, and a small planchet defect occurs between OL in DOLLAR. (#97207)

- 5773 1891-S MS65 PCGS. CAC. Faint olive-gold toning denies full brilliance. This well struck Gem displays vibrant luster and is free of serious marks. Encapsulated in a green label holder.

  Ex: Los Angeles Signature (Heritage, 8/2009), lot 1959, which realized \$1,495.(#7210)
- 5774 1891-S MS65 NGC. This attractive Gem displays pinpoint definition on all design elements, with brilliant surfaces and bright mint luster. Only 20 nonprooflike coins have been certified in higher numeric grades at NGC (3/11).(#7210)
- 5775 1892 MS64 NGC. This Choice Morgan dollar possesses great visual appeal, with lightly marked brilliant surfaces and vibrant mint luster. The well struck devices show just a touch of softness on the hair above the ear. (#7212)
- 5776 1892-CC MS61 NGC. Light pink and peach overtones grace the brightly lustrous surfaces of this Carson City dollar. Prominently abraded on the portrait but better-preserved on the reverse. (#7214)
- 5777 1892-CC MS62 PCGS. Well struck with strong luster that is largely pale silver-gray. The obverse shows a number of wispy abrasions, while the reverse adds a handful of more serious field marks; nonetheless, the overall eye appeal is solid. (#7214)
- 5778 1892-CC MS63 NGC (MS65 Paramount). Ex: Redfield. Frosty silver interiors with gold-orange and blue-violet toning at the borders. A lightly abraded but appealing Select coin that is housed in an old Paramount holder and sticker-sealed by NGC with exterior grade label.(#7214)
- 5779 1892-CC MS63 NGC. Bold, flashy luster is strongly cartwheeled in the fields with rippling frost over the devices. A great Select example of this later Carson City Morgan issue.(#7214)
- 5780 1892-CC MS63 NGC. Bold, flashy luster with hints of frost on the devices. Minimally toned save for a hint of gold on the rims and greatly appealing despite luster grazes on the portrait. From The Summit Collection.(#7214)
- 5781 1892-CC MS63 NGC. Appreciably frosted on the high points of the devices with a strong sweep of flashy luster across minimally toned fields. Lightly abraded overall, though the flaw below the eagle's beak is in the planchet and is not a post-striking defect. (#7214)
- 5782 1892-CC MS64 NGC. A well struck Choice example of this popular Carson City issue, the surfaces are remarkably free of contact marks. The fields are brilliant and brightly lustrous, with extraordinary eye appeal.(#7214)
- 5783 1892-CC MS64 PCGS. Lightly but distinctly frosted on the well-defined devices. The fields have wonderful, sweeping luster with hints of golden peripheral color that set off the otherwise silverwhite surfaces.

  From The Summit Collection. (#7214)
- 5784 1892-CC MS64 NGC. Strong cartwheel luster with frost on well struck devices and partial rim toning in deep steel-blue and gray shadings. Highly appealing with just a few small marks and grazes on Liberty's portrait.(#7214)
- 5785 1892-CC MS64 PCGS Secure. Always popular because of the charismatic CC mintmark, the 1892-CC Morgan dollar is a challenging issue in higher Mint State grades. The present coin has a full strike and essentially immaculate fields. A few faint grazes on the cheek are all that limit the grade. (#7214)
- 5786 1892-CC MS64 PCGS. CAC. Thick frost dazzles on the devices. The fields are semireflective, which adds even more appeal to its appearance, and the coin is virtually toning-free. The strike is sharp, if not completely full, and there are no singularly mentionable marks. Housed in a green label holder.(#7214)
- 5787 1892-CC MS64 PCGS. The 1892-CC Morgan dollar is always popular because of the charismatic mintmark. This well struck Choice specimen is brightly lustrous, with gold highlights on the mostly brilliant fields.(#7214)

#### Minimally Marked 1892-CC Dollar MS63 Deep Mirror Prooflike

- 5788 1892-CC MS63 Deep Mirror Prooflike PCGS. One-sided Prooflike 1892-CC Morgans are found occasionally, but Deep Mirror Prooflike examples with a minimum of bagmarks are the exception. This silver-white piece is one such, with a strong strike to boot and engagingly deep contrast. It is perhaps only a trio of reeding marks on the cheek away from an even finer grade. Population: 41 in 63 Deep Mirror Prooflike, 29 finer (3/11). (#97215)
- 5789 1892-S AU53 PCGS. This key date example displays smooth, untoned surfaces that are free of serious abrasions, though they have a number of light, wispy hairlines in the fields. A pleasing, relatively high-grade coin that is sure to draw serious interest from many collectors.

  From The Summit Collection. (#7218)
- 5790 1892-S AU53 NGC. Considerable luster remains in gold-toned fields. Rubbed on the high points with a splash of deep violet-blue patina centered on the I in PLURIBUS.

  From The Summit Collection. (#7218)
- 5791 1892-S AU53 NGC. The 1892-S Morgan dollar is a challenging issue in Mint State, making an attractive AU53 example a logical choice for most date collectors. This specimen exhibits few signs of circulation and retains much original detail and mint luster. (#7218)
- 5792 1892-S AU53 NGC. Ample luster is largely pale silver as it clings to this lightly worn 1892-S dollar, though the borders show dappled toning in gold and charcoal with the former color extending partway into the reverse. Lightly abraded but appealing for an issue that poses a challenge any finer.(#7218)
- 5793 1893 MS62 PCGS. A well struck example of this low-mintage date, the hair strands above the ear show just a touch of softness. The fields are brilliant, with vibrant mint luster and ample eye appeal.(#7220)
- 5794 1893 MS63 NGC. A nice silver Select example of this low-mintage issue, from the year that the World's Columbian Exposition opened in Chicago and Augustus Heaton published his seminal pamphlet on mintmarks. This piece displays radiant cartwheel luster, with grade-consistent abrasions chiefly limited to the obverse.(#7220)
- 5795 1893 MS63 PCGS. Warm luster filters through silver-gray and gold-orange patina on this Select piece, lighting up modestly abraded but fundamentally appealing surfaces. A solid example of a lower-mintage Philadelphia issue.(#7220)
- 5796 1893 MS63 PCGS. Flashy cartwheel luster with surprisingly little patina or color. Though lightly abraded on the cheek, this well struck Select piece from a low-mintage Philadelphia issue offers solid eye appeal for the grade.(#7220)
- 5797 1893 MS64 NGC. Excellent detail for this lower-mintage date. Strong luster on medium-gray surfaces with little patina save for splashes of orange and sage at the obverse margins. (#7220)

#### Gem 1893 Morgan Dollar Only Three Coins Finer at PCGS

- 5798 1893 MS65 PCGS. The 1893 Morgan dollar is a better date in the series, from a mintage of just 378,000 pieces. The present coin is a well struck Gem, with vibrant mint luster and just a few minor handling marks on each side. The 1893 is scarce in Gem condition, and only three coins have been certified in higher numeric grades at PCGS (3/11). (#7220)
- 5799 1893-CC XF45 PCGS. From a small mintage of 677,000 pieces, the 1893-CC Morgan dollar is always in demand as the last issue from the Carson City Mint. This example shows light wear on the high points of the devices and a few minor contact marks on Liberty's neck and jaw.(#7222)
- 5800 1893-CC XF45 NGC. Honey-gold and lime-green visit dusky problem-free surfaces. The centers are better struck than is customary for this scarce final-year CC-mint issue. (#7222)
- 5801 1893-CC AU53 NGC. Surprisingly bright with ample remaining luster despite the minor wear concentrated at the high points. Numerous wispy abrasions appear in the fields of this final-year Carson City dollar, including a pinscratch on Liberty's chin. (#7222)
- 5802 1893-CC AU55 NGC. Though lightly worn, this Carson City dollar has remarkably flashy fields that fall just shy of Prooflike status. Lightly gold-toned at the borders with a few isolated dots of brown. A great example of this final-year CC-mint issue. (#7222)

#### Mint State 1893-CC Morgan Last Carson City Issue

5803 1893-CC MS61 PCGS. A small mintage of 677,000 Morgan dollars was achieved by the Carson City Mint in 1893, in the last year of coinage for the famous facility. The present coin is a well struck Mint State example, with lustrous surfaces, and a moderate number of contact marks for the grade. Housed in a green label holder. From The Summit Collection. (#7222)

#### Popular 1893-CC Morgan Dollar, MS62

5804 1893-CC MS62 NGC. The 1893-CC Morgan dollar is prized by mintmark type collectors as the final date of the denomination from the Carson City Mint. The present coin is a well struck MS62 example, with the usual softness evident on the hair above the ear and the eagle's breast. The surfaces display bright satiny luster on both sides, with a ring of light golden toning at the peripheries. (#7222)

#### 1893-CC Morgan Dollar, MS64 Rare in Finer Grades

5805 1893-CC MS64 PCGS. Popular as the final issue from the Carson City Mint, the 1893-CC is plentiful through MS64 but rare in finer grades. This highly lustrous example presents frosty mint brilliance with a tinge of gold toning along the lower obverse border. PCGS has only certified 10 finer pieces (3/11). (#7222)

#### 1893-CC Dollar, MS63 Prooflike Seldom-Seen Mirrored Example

5806 1893-CC MS63 Prooflike PCGS. While the 1893-CC is widely recognized as an absolute as well as a condition rarity in the Morgan dollar series, Prooflike examples are seldom seen and as a result their rarity is often overlooked by many. This is a brightly reflective coin with a couple of obvious field marks on the obverse that limit the grade to the MS63 level. As with most of the prooflike 1893-CC dollars we have seen, the central striking details are weak on this coin. Each side is mostly brilliant, and there is just the slightest hint of color around the outer margins of each side. Population: 23 in 63 Prooflike, 2 finer (3/11). (#7223)

#### Select Prooflike 1893-CC Dollar

5807 1893-CC MS63 Prooflike ANACS. Richly toned gold-orange at the borders and edged in violet, this coin has lighter grayish patina through the centers that permits the coin's natural reflectivity to shine. Better-defined than usually seen with the grade largely determined by wispy abrasions. Housed in a small-format ANACS holder. (#7223)

5808 1893-O AU55 PCGS. Pale silver-blue at the lightly worn interiors with suggestions of gold and ink-blue scattered on each side but most concentrated at the margins. A handful of abrasions and a number of lighter marks combine to account for the Choice AU designation.(#7224)

5809 1893-O AU58 NGC. Faint golden overtones grace amply lustrous, even flashy surfaces. This notable near-Mint example displays just a trace of rub on the highest design elements. Light abrasions near Liberty's temple are noted largely for accuracy.(#7224)

#### Mint State 1893-O Morgan Dollar Lowest-Mintage O-Mint Issue

5810 1893-O MS61 NGC. The 1893-O Morgan dollar claims the lowest mintage of any O-mint Morgan, at 300,000 pieces. Mint State coins are rare in the context of the series. The present coin is colorfully toned in shades of gold, green, lavender, and violet, with slightly subdued mint luster shining through the patina. The strike shows typical softness on the hair above the ear and the eagle's breast. (#7224)

#### 1893-O Morgan Dollar, MS62 Only 300,000 Pieces Coined

5811 1893-O MS62 NGC. This attractive 1893-O Morgan dollar displays sharply detailed devices on the reverse, but the obverse shows just a touch of softness on the hair above the ears. The surfaces of both sides are brilliant, with vibrant mint luster and areas of prooflike reflectivity on the reverse. Only 300,000 Morgan dollars were struck at the New Orleans Mint in 1893. (#7224)

- 5812 1893-S AG3 NGC. Gold and rose overtones are prominent on medium-gray surfaces. Extensively worn with the expected scattered marks and a rim nick near 12 o'clock on the obverse. (#7226)
- 5813 1893-S Improperly Cleaned NGC Details. Good. Extensively worn with surfaces too bright for the details grade, though peach and gold overtones on medium-gray surfaces soften the appearance. Two dots of purple are noted at the left reverse.
- 5814 1893-S Good 4 PCGS. The rims are worn smooth in a few places, but all lettering and the date remain legible. Light gold, gray, and blue patina blankets both sides, and a minor reverse rim bruise at 7 o'clock is the only mentionable distraction. The 1893-S is the key to the series, from a mintage of 100,000 pieces.(#7226)
- 5815 1893-S Good 4 PCGS. A well-worn but fundamentally pleasing example of the famous key, gold-gray with strong coffee overtones. Faintly luminous surfaces are minimally abraded, particularly on the reverse, which is toned more deeply.(#7226)

#### 1893-S Morgan Dollar, VG8

- 5816 1893-S VG8 ANACS. This problem-free 1893-S Morgan dollar displays well worn surfaces, with light green and gray patina, and just a few abrasions in the fields. The major design elements are all complete in outline, but much interior detail has been worn smooth. A couple of minor rim bruises are detected on the reverse. This coin remains an acceptable representative of one of the most popular issues in U.S. numismatics. (#7226)
- 5817 1893-S Cleaned ANACS. VF Details, Net Fine 12. The oft-seen details grade of VF, though here with a cleaning that reduces the net grade to Fine 12 in ANACS' estimate. Partial antique-gold retoning softens the appearance. From The Summit Collection.
- 5818 1893-S Rim Damage, Cleaned NGC Details. Fine. A worn, but serviceable example of this key date, the reverse rim shows several minor dents, while the surfaces exhibit the normal number of minor contact marks and abrasions.

#### 1893-S Morgan Dollar, VF Details Low-Mintage Key

5819 1893-S — Reverse Improperly Cleaned — NGC Details. VF. The 1893-S Morgan dollar boasts the lowest mintage of the series, at 100,000 pieces. The 1893-S is usually seen in VF grades, and the present coin shows the typical amount of wear for the issue. The surfaces are patinated in shades of bluish-gray, with hints of gold. Despite the noted cleaning, this coin remains an attractive representative of this key date.

#### 1893-S Morgan Dollar, VF20 Prized Key Issue

5820 1893-S VF20 ANACS. The surfaces of this sought-after Morgan dollar are smooth and problem-free, with no mentionable abrasions and even wear on the devices. The 1893-S is seen most often in VF condition and Morgan dollar collectors consider a coin with this much definition a prize. Pleasing gold and pink patina enlivens the surfaces of both sides. (#7226)

#### 1893-S Morgan Dollar, VF Details

5821 1893-S — Improperly Cleaned — NGC Details. VF. The surfaces of this key-date Morgan dollar show moderate wear, with some loss of detail on the high points of the design elements. The date, mintmark, and major design features all remain intact. A minor rim bruise is evident at 9 o,clock, but the surfaces are lightly abraded for the grade. Signs of a previous cleaning include subdued mint luster, but the fields are retoning in shades of green and bluesteel.

#### 1893-S Morgan, VF25 In-Demand Key in Average Condition

5822 1893-S VF25 PCGS. Gray centers yield to dark green patina at the rims on this attractive 1893-S Morgan dollar. Like most examples seen, this 1893-S is in mid range VF condition, with some devices worn, but the major features remaining bold. A few minor rim bruises are evident at 4 o,clock and 8 o'clock on the obverse. (#7226)

#### Amber-Gold 1893-S Dollar, Choice VF

5823 1893-S VF35 PCGS. Faint glimmers of luster still glow beneath the moderate patina, a consistent deep amber-gold with steel-gray accents. A loupe reveals a few marks on each side, mostly light, and wear consistent with the grade, while confirming the eye appeal of this representative of the most popular Morgan issue. (#7226)

#### Choice VF 1893-S Morgan Dollar

5824 1893-S VF35 PCGS. The 1893-S Morgan dollar is the key to the series, with a low mintage and incredibly high demand from collectors. The issue is seen in VF condition more often than any other grade range. The present coin is an attractive Choice VF example, with moderate even wear on the devices and traces of mint luster in protected areas. From The Summit Collection. (#7226)

#### 1893-S Morgan, VF35 Classic Key Date

5825 1893-S VF35 PCGS. A Choice VF example of the most coveted issue in the Morgan dollar series, this attractive 1893-S displays little wear on the high points of the design, with just a few spots on Liberty's hair and the eagle's breast worn smooth. The pleasing surfaces are graced by hints of gold and pink toning. (#7226)

#### XF Sharpness 1893-S Morgan

5826 1893-S —Improperly Cleaned— NGC Details. XF. This moderately circulated key date Morgan dollar is subdued by a cleaning, perhaps performed to reduce the effect of scattered marks. Most abrasions are minor, although we note a thin scratch on Liberty's neck. Luster shimmers from the legends, wings, and hair.

#### 1893-S Morgan Dollar, XF40 Sought-After Key Date

5827 1893-S XF40 ANACS. There is no doubt that the 1893-S Morgan dollar, with a mintage of only 100,000 coins, is the rarest and most popular business strike in the series. Although this example has a short vertical scratch on the cheek, that blemish is blended with the surrounding surface and is nearly invisible. Deeply toned with hints of iridescence on the gray-brown surfaces. (#7226)

#### 1893-S Morgan, AU Details Only 100,000 Pieces Minted

5828 1893-S — Whizzed — NGC Details. AU. The surfaces of this important key Morgan dollar show few signs of actual wear, with just the high points of the hair above the ear and the eagle's breast lacking complete definition. The surfaces are glossy, with gold and violet-gray patina, and satiny mint luster in the fields. An appropriate choice for an otherwise high-grade collection of Morgan dollars.

#### Key 1893-S Morgan Dollar, AU Details

- 5829 1893-S Whizzed NGC Details. AU. The high points of this sought-after key Morgan dollar display incomplete detail due to friction, but the surfaces retain much of their visual appeal. The fields appear lightly abraded and brilliant at the centers, with a vivid ring of green and violet toning at the obverse rim. Lighter hints of gold can be detected on the reverse. An aesthetically pleasing representative of this elusive date, despite the noted flaws.
- 5830 1894 VF20 NGC. This low-mintage Philadelphia specimen displays light gold and gray surfaces with a ring of blue-steel patina on the obverse. The devices are moderately worn, and the fields show a few minor contact marks.(#7228)
- 5831 1894 VF25 NGC. This cream-gray rare date silver dollar retains substantial inner detail within the curls and wings. A loupe reveals only a pair of thin marks above the beak and on the base of the cap. (#7228)
- 5832 1894 VF30 PCGS. Faintly luminous surfaces are subtly blue-gray with brown peripheral overtones. Moderately worn with a few long, thin abrasions in the portrait area which preclude a finer designation.(#7228)
- 5833 1894 VF35 ANACS. Still-luminous gold-gray surfaces show a few shiny grazes on the obverse, along with a rim bump at 3 o'clock. The reverse has moderate wear as well as blue accents along the right rim.(#7228)
- 5834 1894 VF35 NGC. The 1894 boasts the lowest mintage of any Philadelphia Mint Morgan dollar. This VF35 representative shows only moderate wear and relatively few abrasions. The surfaces are covered by light pinkish-gray patina.(#7228)
- 5835 1894 XF40 ANACS. Faintly luminous surfaces alternate between golden-tan and pale pearl-gray. A number of long, shallow abrasions contribute to the grade, but the overall eye appeal is solid. A desirable example of a low-mintage issue.(#7228)
- 5836 1894 Improperly Cleaned NGC Details. XF. Traces of luster cling to this slate-gray key date silver dollar. The eagle's breast displays wear, but most design detail is present. Slightly subdued, but relevant marks are limited to the field above ES OF.
- 5837 1894 XF45 PCGS. Delicate apricot tints visit the still-lustrous margins. The color at the interiors is light to medium-gray. Several digs on the lower part of Liberty's jaw contribute to the grade. (#7228)
- 5838 1894 XF45 NGC. A lightly worn example of this low-mintage Philadelphia date, the surfaces display light pinkish-gray patina, with a few streaks of amber. A minor rim bruise is noted at 5 o'clock on the reverse.(#7228)
- 5839 1894 AU50 NGC. Luster fills the margins, wings, and hair of this desired low-mintage Philly Morgan. Mostly untoned, although glimpses of autumn-brown visit the obverse periphery. (#7228)

- 5840 1894 Cleaned ANACS. AU55 Details. Substantial luster and just a hint of friction at the centers indicate that this key date Morgan dollar only momentarily circulated. Close to brilliant with a mere whisper of golden-brown at the margins. The cleaning is hardly noticeable.(#7228)
- 5841 1894 AU55 NGC. Lightly rubbed on the hair over Liberty's ear but otherwise a strongly lustrous silver piece with generally minor abrasions. A few reed marks are noted near the eagle. From The Summit Collection. (#7228)
- 5842 1894 AU55 PCGS. Only 110,000 Morgan dollars were struck in 1894, the second-lowest business-strike total of the series. This lightly circulated example exhibits a touch of high-point rub on the devices, with lightly abraded surfaces and much original mint luster. (#7228)
- 5843 1894 AU55 NGC. Pale silver luster remains bright on this Choice AU piece from a famously low-mintage Philadelphia issue. Scattered hints of green-gold accent surfaces which show a number of wispy abrasions and a long, thin mark descending from Liberty's ear. (#7228)
- 5844 1894 AU58 PCGS. A whisper of friction on the eagle's breast confirms a momentary stint in circulation, but the essentially brilliant surfaces still shimmer with cartwheel luster. Minor field grazes and reeding marks are consistent with the near-Mint level. (#7228)
- 5845 1894 AU58 NGC. A light blush of gold-peach toning settles over otherwise silver surfaces which remain bright. Modestly abraded but with just a touch of rub on the high points. A small rim nick is noted near 12 o'clock on the reverse.(#7228)
- 5846 1894 —Improperly Cleaned— NGC Details. Unc. Decently struck with no trace of wear. The luster shows obvious disturbances, but the basic swirling pattern holds fast under gold-infused retoning. (#7228)

#### 1894 Dollar, MS61 Only 110,000 Minted

- 5847 1894 MS61 NGC. The 1894 has a memorably low mintage of only 110,000 pieces. Undoubtedly even that low mintage was further reduced by later meltings, and as a result coins in Uncirculated grades are seldom seen. This is an untoned example with thin, satin-like mint luster, and numerous small, but individually insignificant abrasions. (#7228)
- 5848 1894-O MS62 NGC. The fields and devices are essentially silver, though blue-violet rim toning is noted around the upper obverse. Decently detailed for the date but with too many wispy abrasions on Liberty's cheek to qualify for Select status.(#7230)
- 5849 1894-O MS62 NGC. A well detailed MS62 specimen, with just a touch of softness on the hair above the ear and the eagle's breast, this example exhibits a scattering of grade consistent minor contact marks on both sides.(#7230)

#### 1894-O Morgan, Satiny MS64 Highly Attractive for the Issue

- 5850 1894-O MS64 NGC. The mint luster on this 1894-O is worthy of note, and quite unusual on this issue. The surfaces exhibit thick, satiny mint luster and there are only minimal abrasions present. The striking details are a bit soft in the centers, but then that is characteristic of all 1894-O dollars we remember handling. (#7230)
- 5851 1894-S MS63 NGC. Strong, slightly frosted luster with hints of golden color scattered at the margins. Luster grazes and light marks accumulated on the portrait account for the grade. (#7232)
- 5852 1894-S MS64 PCGS. Powerful flashy luster dominates this S-mint near-Gem. A delicate layer of patina is pale gray in general but has small streaks and patches of dusky gold-orange.(#7232)
- 5853 1894-S MS64+ PCGS. CAC. The 1894-S Morgan dollar is quite elusive in Gem condition, making this high-end Choice example a particularly attractive balance of quality and value. This well struck specimen displays especially vibrant mint luster, and only minor contact marks. (#7232)

#### Toned Gem 1894-S Morgan

- 5854 1894-S MS65 PCGS. Lavish apple-green, gunmetal-blue, orange-gold, and fire-red patina embraces this lustrous and intricately struck Gem. Examination beneath a loupe reveals only inconspicuous contact beneath the rich palette of colors. Although the 1894-S will always be in the shadow of its rare 1893-S predecessor, it is nonetheless surprisingly elusive in MS65 and higher grades. PCGS has only certified 11 finer pieces (2/11). (#7232)
- 5855 1895-O AU50 NGC. Both sides have a soft, pillowy appearance. The luminous obverse has blue-green peripheral toning around a pearl-gray center, while the flashy reverse has more yellow and orange color at the borders.(#7236)
- 5856 1895-O AU53 NGC. Luster fills the legends, stars, and plumage of this untoned key-date New Orleans Morgan. No marks are remotely consequential. Wear is slight and mostly seen on the eagle's breast and the hair above the ear. (#7236)
- 5857 1895-O AU53 PCGS. Delicate champagne toning graces the obverse and reverse surfaces of this original and pleasing 1895-O Morgan dollar. Only a trace of high point wear prevents an even higher grade. (#7236)

- 5858 1895-O AU53 NGC. Worn across softly struck high points but with considerable luster remaining in fields toned reddishgold. A great example of this lower-mintage New Orleans issue. (#7236)
- 5859 1895-O AU53 NGC. Considerable luster remains on pale silver surfaces, lightly toned with color turning toward gold-orange at the rims. Lightly worn with a number of long, wispy abrasions at lower obverse.(#7236)
- 5860 1895-O AU55 NGC. Considerable reflective luster remains in relatively untouched fields, light blue-gray with greenish-gold elements toward the borders. Light rub is concentrated on the high points.(#7236)
- 5861 1895-O AU55 NGC. Better-defined than usually seen with only minor wear on the high points. Amply lustrous with minimal patina aside from a touch of gold-orange near the rims. A line of reed marks is noted on the cheek.(#7236)
- 5862 1895-S XF45 NGC. Variegated powder-blue and chestnut-gray blanket this well defined example. A couple of minor reed marks do not distract. A much better San Francisco issue, and the stopper within a date set of Morgan dollars.(#7238)
- 5863 1895-S XF45 ANACS. Both sides are faintly luminous beneath dappled gold-orange and pearl-gray patina. Lightly rubbed with scattered minor marks and a few darker toning accents. Housed in a small-format ANACS holder.

  From The Summit Collection. (#7238)
- 5864 1895-S AU53 PCGS. The 1895-S Morgan dollar claims a mintage of just 400,000 pieces, and the date is often seen with heavily bagmarked surfaces. The present coin shows some of the usual contact marks, but this example is superior to most in this regard. The devices are well detailed, and the lustrous surfaces are blanketed in mottled gray and steel-blue patina. (#7238)
- 5865 1895-S AU55 PCGS. VAM-3. A Hot 50 Variety. An obvious repunched mintmark VAM. Lightly rubbed with a handful of significant abrasions at the centers, most notably on the eagle's breast. The fields of this piece remain amply lustrous under a light layer of gold and beige patina.

  From The Summit Collection.(#7238)

# 1895-S AU58 Morgan Dollar Brilliant Overall, Semireflective Fields

5866 1895-S AU58 PCGS. This curious, and curiously attractive coin, shows light friction, and at the same time the fields retain bright reflectivity. The surfaces are brilliant throughout and the striking definition is strong overall. This minimally abraded near-Mint coin should see considerable interest on the part of date and mintmark collectors. (#7238)

#### 1895-S Morgan Dollar No Trace of Wear

5867 1895-S — Cleaned — ANACS. MS60 Details. VAM-3. A Hot 50 Variety. The mintmark is widely repunched. No trace of wear is present on this Morgan dollar from a lower-mintage San Francisco issue, though the hair over Liberty's ear is soft. Flashy fields show hairlines under a thin layer of golden toning that sticks to the margins, yet the piece retains significant originality. Housed in a small-format ANACS holder.

#### Mint Details 1895-S Silver Dollar S Over Horizontal S, Top 100

5868 1895-S — Improperly Cleaned — NGC Details. Unc. VAM-4. A Top 100 Variety. The "S over Horizontal S" VAM, although undesignated as such on the insert. Any '95-S with Uncirculated detail is desirable, due to the low mintage and conditional scarcity of the issue. Brilliant, prooflike (as usual for VAM-4), and somewhat abraded with delicate hairlines on the glassy fields.

#### 1896 Morgan Dollar, MS67 None Certified Finer

5869 1896 MS67 NGC. This fully brilliant and highly lustrous Superb Gem shows no toning on either side. Slight softness of the strike is noted above Liberty's ear, typical of the issue and of Morgan dollars in general. This highly appealing piece will be a nice addition to an advanced collection. Census: 51 in 67, 0 finer (3/11). (#7240)

#### Superb Gem 1896 Morgan Dollar Iridescent Obverse Toning

- 5870 1896 MS67 ICG. Lovely electric-blue, plum-red, and peach dominate the obverse. The reverse is only faintly toned gray and chestnut. This lustrous and magnificently smooth Superb Gem has delightful eye appeal. After four years of low mintages, the Philadelphia Mint returned to full production for the 1896 Morgan dollar with a mintage approaching 10 million pieces. (#7240)
- 5871 1896-O MS61 NGC. The 1896-O Morgan dollar is one of the most challenging issues of the series in high grade. This attractive Mint state example offers well detailed design elements and lustrous surfaces, with a hint of gold patina.(#7242)
- 5872 1896-O MS61 NGC. Well struck with only minor softness at the hair over Liberty's ear. Strong, full luster with tinges of gold but also a number of light to moderate abrasions on each side. (#7242)
- 5873 1896-S MS61 PCGS. CAC. The 1896-S Morgan dollar is a better date in high grade, and Mint State examples are prized by collectors. This well detailed piece offers lustrous surfaces and light gold patina, with an average number of abrasions for the grade. (#7244)
- 5874 1896-S MS62 NGC. Flashy yet frosty luster with light peach overtones that are more prominent on the obverse. The reverse appears well-preserved, though numerous light abrasions on and near the portrait preclude a finer designation.(#7244)
- 5875 1896-S MS62 NGC. Myriad marks are evident on the obverse with relatively few marks on the reverse. This brilliant and lustrous example has full mint frost with a few splashes of delicate gold toning on the reverse. A lovely representative of a scarce issue that is often found on collector want lists.(#7244)

#### 1896-S Morgan Dollar, MS63 Challenging Issue in High Grade

5876 1896-S MS63 PCGS. The 1896-S Morgan dollar is more difficult to locate in high grade than its mintage of 5 million pieces would suggest. Many examples seen have subpar striking details and insipid luster. The present coin features a better-than-average strike, with just a touch of softness on the hair above the ears and the eagle's breast. The surfaces exhibit frosty cartwheel mint luster, with hints of golden toning on both sides.

From The Summit Collection. (#7244)

#### Select 1896-S Morgan Dollar Strong Luster and Eye Appeal

5877 1896-S MS63 NGC. The 1896-S Morgan dollar is most often seen with a soft strike and below-average mint luster. This attractive Select specimen is superior to the usual 1896-O in this regard, as the details are sharp on the devices and the mint luster is vibrant and frosty. The fields are largely free of contact marks as well, but a couple of minor marks below Liberty's eye explain the grade. (#7244)

5878 1897 MS66 PCGS. VAM-6A Pitted Reverse. A Top 100 Variety. The reverse die used to strike the VAM-6A was badly rusted, causing the coins to show many rust pit pimples on the lower reverse, particularly noticeable around the ribbon bow. This sharply detailed Premium Gem displays unmarked surfaces and booming mint luster. (#7246)

#### Beautiful Prooflike Premium Gem 1897 Silver Dollar

5879 1897 MS66 Prooflike PCGS. CAC. A flashy high grade silver dollar that boasts an exceptional strike and remarkably clean fields. Both sides are brilliant except for one small blush of dark brown and blue toning on the reverse at 3 o'clock. Only a small percentage of 1897 dollars are prooflike, and among those, MS63 is the median grade. (#7247)

#### Select 1897-O Morgan Dollar

5880 1897-O MS63 NGC. CAC. The 1897-O Morgan dollar was produced in large numbers, with little regard for quality. As a result, few examples are seen with the boldly defined details and softly frosted mint luster of the present coin. The surfaces display iridescent green, gray, and lavender patina on both sides. (#7248)

5881 1897-S MS65 Deep Mirror Prooflike NGC. Fantastic reflectivity with ample contrast thanks to the standout frost on well struck devices. This Gem has liberal splashes of border toning in various blues. Housed in a prior-generation NGC holder. Census: 40 in 65 Deep Mirror Prooflike, 5 finer (3/11).(#97251)

5882 1898-S MS64 NGC. Ex: The Redfield Collection. This boldly struck and lustrous Choice silver dollar has pleasing and original sea-green and golden-russet obverse toning. The reverse shows only a whisper of tan toning. Housed in a red Mint State 65 Paramount International Coin Corp. Redfield holder, with a label affixed by NGC that states their grade.(#7256)

#### 1899 Morgan Dollar, MS66+ Only Four Coins Finer at PCGS

5883 1899 MS66+ PCGS. CAC. The 1899 Morgan dollar is known as a relatively available date in the series, despite its low mintage of 330,000 pieces. However, the issue is very rare in high-end Premium Gem condition. The present coin is sharply detailed, with brilliant surfaces and vibrant frosty mint luster. Population: 1 in 66+, 4 finer (2/11). (#7258)

#### Superb Gem 1900 Morgan Dollar

5884 1900 MS67 NGC. While this turn-of-the-century issue is accessible in lesser Mint State grades, at the Superb Gem level it is a condition rarity, and there are no known numerically finer pieces (3/11). This smoothly preserved coin has strong cartwheel luster with hints of peach in its pale patina. (#7264)

5885 1900-O MS65 Prooflike PCGS. VAM-15. A Top 100 Variety. The two stars near 5 o'clock are strongly die doubled. Boldly struck, brilliant, and flashy. Well preserved, but we note a brief, narrow mint-made alloy streak behind the eagle's head and a tiny obverse rim nick at 1 o'clock.(#7267)

5886 1900-O MS66 Prooflike PCGS. CAC. Faint hints of blue settle over otherwise silver surfaces. A moderately reflective and highly appealing example of this turn-of-the-century O-mint issue, tied for numerically finest among Prooflikes graded by PCGS (3/11). (#7267)

5887 1900-O/CC MS64+ PCGS. CAC. VAM-11. A Top 100 Variety. The 1900-O/CC variety has been known since the 1920s, but it has only become popular in recent times. This high-end Choice example exhibits sharply defined design elements, with bright mint luster and a few touches of gold toning. Extensive die cracks are apparent on both sides.(#7268)

5888 1900-O/CC MS65 PCGS. VAM-11. A Top 100 Variety. Remarkable arcs of cherry-red, peach-gold, and navy-blue consume the left reverse and also visit the left obverse border. Crisply struck and lustrous with visible marks limited to the eagle's breast and the field near star 5.(#7268)

5889 1900-S MS65 NGC. A popular S-mint from the turn of the century, the 1900-S is a generally well-produced issue whose populations thin markedly above the Gem level. Little contrast appears on this silver-gold piece, but neither do any mentionable marks. A few roller marks above the ear detract little.(#7270)

5890 1901 MS61 NGC. An important Mint State representative of one of the most famous condition rarities in the Morgan dollar series. Faintly blue-tinged surfaces are amply lustrous with touches of green-gold at the margins.(#7272)

## 1901-O Morgan Dollar, MS67 Just 11 NGC Certified Examples

5891 1901-O MS67 NGC. This lovely Superb Gem New Orleans Mint dollar exhibits frosty silver luster and strong design details with weakness only over Liberty's ear. Both sides have full brilliance with no evidence of toning. A wonderful piece for the condition conscious collector. Census: 11 in 67, 0 finer (3/11). (#7274)

## 1901-S Morgan Dollar, MS66 Important Condition Rarity

5892 1901-S MS66 NGC. Here is an important condition rarity in the Morgan dollar series. The obverse has frosty silver luster and the reverse has satiny luster. Both sides are fully brilliant with no toning, and the strike is sharp in all areas except over the ear. A tiny spot is visible in the left branch of the wreath. Census: 7 in 66, 0 finer (3/11). (#7276)

#### Appealing 1902-O Silver Dollar, MS67

5893 1902-O MS67 NGC. Brilliant save for a wisp of caramel-gold on each side. Coruscating luster sweeps carefully preserved fields and devices. Well struck given its New Orleans origin. The 1902-O is plentiful in most Uncirculated grades, but emerges as a significant conditional rarity at the MS67 level. Census: 21 in 67, 0 finer (3/11). (#7280)

- 5894 1902-S MS64 NGC. The die striations that appear above Liberty's ear are typical of this date, which often displays weak strikes. This piece has mottled silver-gray and amber obverse patina, contrasting with a largely untoned reverse, save for a bit of gold at the rim. A better-date near-Gem.(#7282)
- 5895 1902-S MS64 NGC. Fantastic luster under successive layers of patina which range from pink to peach, antique-gold, pale yellow, and near-silver. Minor striking softness noted at the hair over Liberty's ear. (#7282)
- 5896 1902-S MS64 NGC. Ex: The Redfield Collection. Streaks of caramel gold congregate near the rims of this lustrous and well preserved better date near-Gem. The centers show moderate inexactness of strike. Housed in a red Mint State 65 Paramount International Coin Corp. Redfield holder, with a label affixed by NGC that states their grade.(#7282)
- 5897 1902-S MS64+ NGC. Delicate chestnut-tan toning adorns this lustrous and attractively preserved near-Gem. The centers show slight incompleteness of strike. A better date in all grades, as are all S-mint issues from the 1900s.(#7282)

#### MS65+ 1902-S Morgan Dollar

5898 1902-8 MS65+ NGC. Clearly of high quality for the Gem range, with the smoothness of Liberty's cheek particularly commendable. Gold-tinged at the margins with silver interiors that show a measure of striking softness at the hair over the ear, a trait shared by some of the obverse stars. NGC has graded just nine numerically finer representatives (3/11). (#7282)

## Superb Gem 1903 Morgan An Affordable Condition Rarity

5899 1903 MS67 PCGS. Ex: Larry Shapiro. A splendid Superb Gem, this Morgan dollar has satiny brilliance with exceptionally sharp design details, including fully defined hair strands over Liberty's ear. Wispy champagne toning is evident primarily on the obverse. Population: 66 in 67, 0 finer (3/11). (#7284)

## 1903-O Dollar, MS67+ The Finest Certified

5900 1903-O MS67+ NGC. This extraordinary 1903-O is so clean one could literally count the marks on each side. The hard, satiny mint luster has a bright sheen and is completely brilliant. The strike is complete in the center of each side. This appears to be THE FINEST 1903-O dollar known. Census: 1 in 67+, 0 finer (3/11). (#7286)

5901 1903-S AU50 PCGS. Considerable luster is visible on this pleasing light gray Morgan dollar with attractive peripheral iridescence. This scarce issue is always in demand. (#7288)

5902 1903-S AU55 ANACS. Light gold-to-gray toning settles over still-lustrous surfaces on this scarcely worn 1903-S dollar. Slight striking softness and minor abrasions on the portrait are entirely consistent with the typical appearance for the issue and grade. Housed in a small-format ANACS holder.(#7288)

## Near-Mint 1903-S Morgan Challenging Better Date

5903 1903-S AU58 NGC. The 1903-S Morgan dollar is surprisingly difficult to locate for an issue with a mintage of more than 1.2 million pieces. Many collectors opt for an attractive AU or near-Mint example in an otherwise high-grade collection because Mint State specimens are so elusive and expensive. The present coin is a lightly circulated example, well detailed and lustrous, with few signs of actual wear.

From The Summit Collection. (#7288)

## Scarce XF45 Small S VAM-2 1903-S Silver Dollar

5904 1903-S Small S XF45 PCGS. VAM-2. A Top 100 Variety. Any 1903-S is scarce, but VAM specialists particularly prize VAM-2, which carries a small mintmark intended for use on Barber quarters. PCGS has yet to certify any examples of VAM-2 as Mint State, and the median grade at PCGS is VF20. The present lightly abraded piece has dappled golden-brown and cream-gray toning. Luster fills design recesses. (#7306)

5905 1904-S Genuine PCGS. VAM-4. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen with altered surfaces. A better date dollar with chestnut-gray toning and subdued but unbroken cartwheel luster. A two olive reverse variety.

## Satiny MS64 1904-S Morgan Dollar

5906 1904-S MS64 PCGS. The 1904-S is seldom available in the better grades of Uncirculated, most such coins were absorbed into collections many years ago. This mostly brilliant example has irregular swatches of pale golden on the bottom of the obverse, otherwise it is untoned. The mint luster is satiny, as usual, and there is slight central softness on each side, also as usual. (#7294)

#### 1904-S Dollar, MS64, Minimally Abraded

5907 1904-S MS64 NGC. Most post-1901 dollars were struck from the C4 reverse hub, and as such they lack complete definition because the detail was never in the hub in the first place. This brilliant 1904-S is as sharply struck as one is ever going to find. The brilliant, satiny surfaces are only slightly abraded and there is a spot of grease that was struck into the obverse field in front of Liberty's mouth. (#7294)

## Choice 1904-S Morgan Dollar Elusive in High Grade

5908 1904-S MS64 PCGS. The 1904-S Morgan dollar is a better date in the series, from a medium-sized mintage of 2.3 million pieces. The present coin is a well struck Choice example, with a touch of softness on the strands of hair above Liberty's ear and the eagle's breast. The surfaces are mostly brilliant, with hints of golden-tan patina, and frosty mint luster.

From The Summit Collection. (#7294)

## 1904-S Dollar, MS64 Prooflike Rarely Encountered With Reflective Fields

5909 1904-S MS64 Prooflike NGC. The Prooflike 1904-S is a coin that is rare across the grading spectrum, and it is so infrequently seen that collectors are often not familiar with its true rarity or value. Only seven other Prooflike MS64s have been certified by NGC, and a mere five coins are finer (3/11). The entire coin is brilliant and there is virtually no contrast between the fields and devices, but the fields nevertheless show intense, deeply reflective mirrors. Sharply struck. (#7295)

5910 1921-S MS65 PCGS. CAC. Softly struck but impressively appealing thanks to dappled green-and-gold luster that is lit up by above-average patina. PCGS has graded 26 numerically finer examples of this final S-mint Morgan dollar issue. (#7300)

#### PROOF MORGAN DOLLARS

## Choice Cameo Proof 1878 Morgan Second Reverse

5911 1878 7TF Reverse of 1878 PR64 Cameo NGC. Icy motifs compare favorably with reflective fields. This brilliant Choice proof is crisply struck and unabraded. Brilliant save for a glimpse of gray toning near Liberty's nose. A very scarce proof subtype, since only 200 pieces were struck. Census: 5 in 64 Cameo, 11 finer as Cameo, none as Ultra Cameo (3/11).

From The Slotkin Family Trust Collection. (#87312)

# Fully White 1879 Morgan Dollar PR66 Cameo, Exemplary Contrast

5912 1879 PR66 Cameo NGC. Ex: Excalibur. This brilliant high grade proof Morgan exhibits a razor-sharp strike, and the glassy fields provide outstanding contrast with the frosty motifs and legends. Free from hairlines, and planchet imperfections are limited to a brief lintmark at 4 o'clock on the reverse. From The Slotkin Family Trust Collection. (#87314)

## 1880 Morgan Dollar, PR65 ★ Strong Contrast

5913 1880 PR65 ★ NGC. This brightly mirrored Gem displays full details on all design elements, with brilliant surfaces that show only a few minor hairlines in the fields. Although not designated as a Cameo, the field/device contrast is dramatic. This coin possesses outstanding eye appeal. Census: 1 in 65 ★, 1 finer (3/11). (#7315)

## Gem Proof 1880 Morgan Dollar Spectacular Toning, Reflective Fields

5914 1880 PR65 NGC. Vivid gold, green, and violet toning blankets the reflective surfaces of this Gem proof Morgan dollar. The popular speculation in Trade dollars caused a large demand for proof sets in 1880, as the Trade dollar was only minted in proof format that year. As a result, the 1880 Morgan dollar enjoyed a generous proof mintage of 1,355 pieces. Sharply struck Gems are scarce in today's market. Census: 55 in 65, 72 finer (2/11). From The Orchid Collection. (#7315)

## 1881 Morgan Dollar, PR66 ★ Spectacular Patina

5915 1881 PR66 ★ NGC. A nominal mintage of 984 proof Morgan dollars was achieved in 1881, and few examples can match the quality of the coin offered here. This razor-sharp Premium Gem displays spectacular green and violet patina on the obverse, with violet and brilliant silver on the reverse. The surfaces are brightly reflective under the toning. Census: 2 in 66 ★, 1 finer (2/11). (#7316)

5916 1883 — Improperly Cleaned — NGC Details. Proof. Rotation at extreme angles beneath a light reveals wispy hairlines throughout this sharply struck and untoned specimen. The eagle and Liberty's hair display cameo frost.(#7318)

#### Fully Contrasted 1885 Dollar, PR66 Cameo

5917 1885 PR66 Cameo NGC. The surfaces of this well-preserved Premium Gem are fully contrasted yet only moderately so, sufficiently for a Cameo designation. Neither side reveals any trace of patina save for the prevailing silver-white appearance, but a loupe also reveals a notable lack of contact marks, even the smallest ones. Census: 14 in 66 Cameo, 9 finer (3/11). From The Slotkin Family Trust Collection. (#87320)

## Gem Cameo Proof 1886 Morgan Dollar With a Light Gold Overlay

5918 1886 PR65 Cameo PCGS. CAC. VAM-15. Repunched date. In a curious numerological phenomenon, the proof mintage of 1886 Morgan dollars is recorded as 886 pieces. This Gem Cameo proof is nonetheless among the few finest graded of the issue, with six in this Cameo grade and six finer (3/11). The well-contrasted, silvery surfaces sport a considerable overlay of gold. Minor slide marks on the cheek and faint field hairlines apparently preclude a finer grade (3/11). (#87321)

#### Brilliant 1886 Silver Dollar, PR66 Cameo

5919 1886 PR66 Cameo NGC. Moderately contrasted and fully brilliant silver-white surfaces characterize this Premium Gem proof, with no discernible trace of other color. A loupe reveals some subliminal microflecks of color and a few minor slide marks that help explain the grade. Census: 6 in 66 Cameo, 7 finer (3/11). From The Slotkin Family Trust Collection. (#87321)

## VAM-15 1886 Morgan Dollar Repunched Date, PR66 Cameo

5920 1886 PR66 Cameo PCGS. VAM-15. The 18 in the date is lightly repunched, and the second 8 has a small dash beneath it. Silvery centers cede to pinkish-amber rim patina on both sides of this well-contrasted Premium Gem dollar. The reverse appears to verge on the Deep Cameo contrast level. Population: 5 in 66 Cameo, 1 finer (3/11). (#87321)

## Gold-Tinged 1887 Dollar, PR64 Cameo

5921 1887 PR64 Cameo NGC. A single small scrape on Liberty's cheek is all that appears to separate this piece from the Gem grade (or finer), as little contact evidence appears elsewhere. Field hairlines are minor, and the contrast on the reverse seems close to an Ultra Cameo designation. Silvery surfaces show slight tinges of gold. Census: 4 in 64 Cameo, 25 finer (3/11). (#87322)

5922 1888 PR53 PCGS. Though the high points are rubbed and show contacts, this example's partial reflectivity and pinpoint detail make its proof origin undeniable. Gold, orange, and cobalt-blue hues are splashed along the margins.(#7323)

### Repunched Date 1888 Dollar, PR65 Cameo

5923 1888 PR65 Cameo PCGS. VAM-25. Doubled date, 8 in denticles (?), according to VAMWorld.com Repunching shows most prominently at the top of the 1 and the bottom of the first 8, although the second 8 also shows a remnant at the bottom and the top loop of the last 8 displays some artifact. This is a gold-tinged, well-contrasted piece with a few minor high-point marks on each side that explain the grade. (#87323)

## Brilliant PR66 Cameo 1888 Morgan Strong White on Black Contrast

- 5924 1888 PR66 Cameo NGC. VAM-25. The 18 in the date is nicely repunched. White on black contrast is undeniable between the icy motifs and jet-black fields. An untoned and immaculate Premium Gem. The grade is limited solely by minor planchet granularity retained after the strike, most apparent on the central high points. From The Slotkin Family Trust Collection. (#87323)
- 5925 1889 PR60 PCGS. Sharply detailed, with slightly hazy reflective fields, this attractive proof displays unusually brilliant, low-contrast devices, and touches of golden-brown toning. From a proof mintage of 811 pieces.(#7324)

## Cameo PR65 1889 Silver Dollar Only 811 Proofs Struck

- 5926 1889 PR65 Cameo PCGS. Light and even honey toning adorns this fully struck Gem. No contact marks or hairlines are evident, and the sole mint-made imperfection is a brief lintmark near the left wreath end. The cameo contrast is impressive. Population: 8 in 65 Cameo, 5 finer (3/11).

  From The Slotkin Family Trust Collection. (#87324)
- 5927 1890 PR62 NGC. The 1892 proof Morgan dollar boasts an extremely low mintage of 590 pieces. The present coin displays well detailed design elements and brightly mirrored fields, with just a touch of gold toning. (#7325)
- 5928 1892 —Artificial Toning— NGC Details. Proof. This fully struck specimen displays deep violet-red, lavender, and orange shades with glimpses of navy-blue and jade-green near the rims. (#7327)

## Snow-White PR66 Cameo 1892 Silver Dollar

- 5929 1892 PR66 Cameo NGC. This fully struck proof Morgan dollar shows absolute definition on the hair above the ear and on the eagle's breast and claws, unlike any business strike of the series. Snowy devices compare favorably with glassy, seamless fields. Ideal for an advanced silver proof type set.

  From The Slotkin Family Trust Collection. (#87327)
- 5930 1893 PR62 PCGS. Light silver-gray patina shows touches of violet, orange, and sky-blue. Lightly hairlined under the toning, as expected for the grade, with typically soft centers that are a signature of this proof issue.(#7328)

## 1893 Morgan Dollar, PR66 Cameo Popular Proof Issue

- 5931 1893 PR66 Cameo NGC. Pleasing contrast appears on both sides of this Premium Gem Cameo proof, with brilliant silver surfaces and hints of champagne toning. A popular issue with proofs in demand due to the rarity of business strikes from all four mints. Census: 10 in 66 Cameo, 6 finer (3/11).
  From The Slotkin Family Trust Collection. (#87328)
- 5932 1896 PR62 NGC. Powerfully mirrored under dappled patina, gold-orange, blue-green, and silver. A staple scratch to the left of Liberty's forehead defines the grade.(#7331)
- 5933 1898 PR45 PCGS. The fields remain flashy despite light circulation. Faintly hairlined with scattered handling marks. Encapsulated in a green label holder. A mere 735 proofs were coined.(#7333)

## 1898 Morgan Dollar, PR66 Cameo Deeply Reflective and Well-Produced

5934 1898 PR66 Cameo NGC. This is a highly attractive Cameo Proof that nearly qualifies as a Deep or Ultra Cameo. The fields are deeply mirrored with noticeably frosted devices. There is no evidence of toning on either side, save for the slightest gold color around the rims. This is an important opportunity for the collector of highgrade 19th century type. Census: 9 in 66 Cameo, 5 finer (3/11). From The Slotkin Family Trust Collection. (#87333)

## 1898 Morgan Dollar, PR63 Deep Cameo Excellent Eye Appeal

5935 1898 PR63 Deep Cameo PCGS. A stunning Select proof, this Deep Cameo piece has amazing contrast with frosty and sharply defined devices, fully mirrored fields, and attractive peripheral gold toning on otherwise brilliant obverse and reverse surfaces. Population: 4 in 63 Deep Cameo, 37 finer (3/11). (#97333)

5936 1899 PR55 PCGS. This scarce proof Morgan dollar displays only a trace of friction on the eagle's breast. Toned medium lilac-gray with glimpses of aqua near the borders. The fields display hairlines but there are no obtrusive marks.

Ex: Dallas Signature (Heritage, 7/2006), lot 3011; Long Beach Signature (Heritage, 5/2008), lot 2734, which realized \$1,092.50. (#7334)

5937 1901 PR62 PCGS. Strongly mirrored and low-contrast with numerous spots of peach and blue-violet toning, the most prominent of which covers the eagle's breast, parts of the surrounding wings, and an extension to the right. Several long hairlines along the left side of the obverse contribute to the grade.(#7336)

## 1902 Morgan Dollar, PR65 **Untoned Proof Surfaces**

5938 1902 PR65 NGC. This fully brilliant Gem proof was coined at the beginning of diminished cameo contrast within the Mint, dies being completely polished in the fields and design crevices. The hair strands over Liberty's ear are merged on this piece, as they always are on business strikes. An impressive, untoned example. Census: 43 in 65, 52 finer (3/11).

From The Slotkin Family Trust Collection. (#7337)

#### 1903 Morgan Dollar, PR65 Cameo Reverse

5939 1903 PR65 NGC. The chrome-like proof surfaces of this lovely Morgan dollar are brilliant and untoned, with deeply mirrored fields and reflective devices. The reverse has light field-to-device contrast. Faint hairlines are visible on the cheek, with otherwise pristine surfaces. Census: 41 in 65, 60 finer (3/11). From The Slotkin Family Trust Collection. (#7338)

## PR63 1904 Silver Dollar Noticeable Cameo Contrast

5940 1904 PR63 PCGS. CAC. Essentially brilliant, although a trace of green-gold toning is evident. The strike is full except for the strand of hair above the ear. Most of this proof silver dollar is uncommonly undisturbed for the Select level, although we note a few horizontal hairlines on the upper reverse. Cameo contrast is present on both sides, and is strongest on the reverse. Housed in a green label holder. (#7339)

#### Deeply Toned Gem Proof 1904 Morgan Dollar

5941 1904 PR65 PCGS. Today the average grade of certified survivors of this issue is near the Select proof level. This Gem, certified in a green-label holder, shows some traces of original silver remaining amid the deep toning, which features deep purple, skyblue, and steel-gray. Minor strike weakness over the ear is of little consequence. Population: 27 in 65, 19 finer (3/11). (#7339)

## Gem Proof 1904 Morgan Dollar Bright, All-Brilliant Finish

5942 1904 PR65 NGC. Only 650 proof Morgan dollars were struck in 1904, a modest mintage for the series. The Philadelphia Mint used an all-brilliant finish in 1904, with none of the frosty field-device contrast of earlier years. The present coin is a brightly mirrored Gem, with typically soft detail at the centers, and a few hints of gold toning. Census: 42 in 65, 54 finer (2/11). (#7339)

## 1904 Morgan Dollar, PR66 Final Year of the Regular Design Type

5943 1904 PR66 PCGS. The obverse of this piece is all but devoid of color, with a quicksilver appearance and only scattered tiny flecks of lilac. The reverse displays considerable pinkish-gold and blue-gray patina, with considerable reflectivity in the fields. An appealing Premium Gem proof from a mintage of 650 pieces. Population: 15 in 66, 4 finer (3/11). (#7339)

## Elusive Near-Gem Zerbe Proof 1921 Morgan Dollar

5944 1921 Zerbe PR64 NGC. VAM-1AG. Struck for leading numismatic dealer Farran Zerbe, the exact status of this issue varies from one dollar expert to another. Some consider them true proofs, others presentation strikes. The fields lack the depth of reflectivity of the Chapman proofs, but the Zerbe proofs are nonetheless special and undeniably scarce. This is an untoned specimen that boasts a full strike, which includes the leaves of wreath. Census: 13 in 64, 20 finer (3/11).

From The Slotkin Family Trust Collection. (#7341)

## PEACE DOLLARS

## 1921 Line Through L Peace Dollar, MS65, VAM-3

5945 1921 MS65 PCGS. VAM-3. A Top 50 Variety. The rare Line Through L, with the first L in DOLLAR on the reverse passing beneath a ray. This luminous Gem is softly struck in the centers, as usual, but nicely preserved beneath rose-gold toning. Great eye appeal. Population: 9 in 65, 0 finer (2/11). (#7356)

5946 1921 MS65 PCGS. CAC. Gold-orange and crimson toning runs along the borders and outlines much of the central devices. Softly frosted pearl-gray luster lights up each side of this first-year Peace dollar, struck in high relief with typically soft centers. (#7356)

#### Scarce 1921 Peace Dollar, MS66

5947 1921 MS66 PCGS. CAC. Ice-blue and chestnut toning graces lustrous Premium Gem. The cheek and obverse field are especially smooth. The strike is good for this scarce high relief issue, although it is inevitable that the hair over the ear shows selected softness. Housed in a green label holder. As of (3/11), PCGS has certified just eight pieces finer.

From The Paul Taylor Collection. (#7356)

- 5948 1922-D MS66 NGC. Well-defined on the obverse with strong luster, though both of these take a back seat to the irrepressible gold-orange, pink, and ocean-blue toning on that side. Bordertoned in similar hues on a reverse that appears frosty. NGC has graded just 14 numerically finer pieces (3/11).(#7358)
- 5949 1922-D MS66 PCGS. CAC. Well struck for the date and warmly lustrous beneath rich patina, silver-gray in the centers with dappled green-to-gold hues at the margins. Two abrasions just right of the L in LIBERTY contribute to the grade. PCGS has graded just three Superb Gems (3/11).(#7358)
- 5950 1922-D MS66 PCGS. CAC. A flashy Premium Gem that possesses delicate stone-gray and almond-gold patina. Evenly struck with booming luster and a remarkably preserved obverse. Certified in a green label holder. As of (3/11), PCGS has certified just six examples finer.

  From The Paul Taylor Collection. (#7358)

## Well Struck MS67 1923 Silver Dollar Light Green-Gold Toning

5951 1923 MS67 PCGS. This lustrous honey-gold Superb Gem features fully struck devices, an uncommon event for a Peace dollar. Lightly toned in olive-gold shades, and the fields are refreshingly void of contact. Encapsulated in a green label holder. Population: 47 in 67, 0 finer (3/11).

From The Paul Taylor Collection. (#7360)

## 1923-D Peace Dollar, MS66 Exemplary Eye Appeal

5952 1923-D MS66 PCGS. CAC. Nicely struck and thoroughly lustrous with lightly dappled caramel-gold toning on the portrait. An outstanding example of this relatively high mintage but conditionally difficult early Denver issue. Certified in a green label holder. Population: 73 in 66, 0 finer (3/11). From The Paul Taylor Collection. (#7361)

#### Frosty Gem 1923-S Peace Dollar

5953 1923-S MS65 PCGS. At the Gem level the 1923-S Peace dollar is a conditional rarity, since most examples are too softly struck or display too many bagmarks to qualify. This frosty-silver piece has a grade-limiting scrape on the cheek, and an interesting die crack runs through the base of the bust, but abrasions otherwise are of little concern. (#7362)

#### Conditionally Rare 1923-S Dollar, MS65

5954 1923-S MS65 PCGS. Rose-gold borders frame the olive-gray fields and devices. The strike is good, and the surfaces are exemplary aside from a pair of hair-thin marks near Liberty's ear. As of (3/11), PCGS has certified a scant 3 pieces finer, including a single MS67 example that last appeared at auction more than 23 years ago. (#7362)

## Top-Notch 1924 Peace Dollar, MS67

5955 1924 MS67 NGC. This is simply stunning example of a Peace dollar, one of the finest-graded and most attractive that most collectors could ever have the privilege of laying eyes on. The cartwheel luster could be compared to that of a Morgan dollar, and there is no trace of toning on either side. The surfaces display a fine-grained, frosty texture, with an impeccable strike and overthe-top eye appeal. Census: 74 in 67, 1 finer (3/11). (#7363)

## 1924 Silver Dollar, MS67 Well Struck, Faint Olive Toning

5956 1924 MS67 PCGS. Medium sea-green fields encompass the dovegray devices. Sharply struck with potent luster and occasional minor surface grazes. The 1924 is plentiful in most Mint State grades, but becomes an important condition rarity at the MS67 level. Housed in a green label holder. Population: 21 in 67, 1 finer (3/11). From The Paul Taylor Collection. (#7363)

5957 1924-S MS64 PCGS. CAC. Delicate tan toning graces this lustrous and crisply impressed near-Gem. The obverse is beautifully void of marks, and the reverse has only moderate abrasions. (#7364)

5958 1924-S MS64 NGC. Rich yellow-green patina dominates the eye appeal of this lustrous near-Gem. The lower obverse adds variety to the color with a crescent of dappled blue and green nestled along the rim.(#7364)

5959 1924-S MS64 NGC. This well struck Choice Peace dollar displays brilliant surfaces and especially vibrant mint luster. The 1924-S is an elusive date in high grade, and this example possesses extraordinary eye appeal. (#7364)

5960 1924-S MS64 PCGS. The 1924-S Peace dollar is a low-mintage, challenging issue in high grade. Like most examples of the date, this specimen displays some softness of detail on Liberty's hair. The attractive surfaces are lustrous, with a light golden patina on the obverse.(#7364)

#### 1925 Peace Dollar, Immaculate MS67 Quality

5961 1925 MS67 PCGS. CAC. There is nothing "typical" about this 1925 Peace dollar, but because of its immaculate preservation and outstanding mint luster it would make a perfect type coin. Peace dollars are seldom encountered in Superb condition. Only 72 pieces of this issue have been certified in MS67 with a single coin finer (3/11). Each side is brilliant, the mint luster is bright and softly lustrous, and the strike is complete. (#7365)

## Lovely 1925 Peace Dollar Conditionally Scarce Superb Gem

5962 1925 MS67 PCGS. This lightly toned and thoroughly lustrous Superb Gem is crisply struck except for the tops of the TY in LIBERTY. Exceptionally smooth despite a small tick on the right border of the eagle's front wing. Housed in a green label holder. Population: 72 in 67, 1 finer (3/11).

From The Paul Taylor Collection. (#7365)

## 1925 Peace Dollar, MS67 Perfect Type Coin

5963 1925 MS67 NGC. CAC. Over 10 million examples of this date were struck, and today it is considered one of the three most common of all Peace dollars. That was not always the case, however, for prior to the mid-1950s, this date was considered to be quite scarce, and among the rarest of all P-Mint Peace dollars. In fact, collectors today might be surprised to learn that, in 1945, the two rarest issues of the Philadelphia Mint were 1923 and 1925. That situation soon changed, as pointed out by Dave Bowers in his Silver Dollar Encyclopedia: "By the mid to late 1950s, the 1925 Peace dollar was so common that specimens were a nuisance for dealers searching for rare dates." This Superb Gem example is an amazing coin, with brilliant, untoned silver surfaces and satiny luster. It is essentially mark-free, save for a few of the most trivial nicks hidden in the devices, and it is also exceptionally well struck. Population data indicates that PCGS and NGC have each graded a single finer example, which we believe represents just one actual coin. Census: 57 in 67, 1 finer (3/11).

Ex: Jack Lee Collection, III/2005 Dallas Auction (Heritage, 11/2005), lot 3750. (#7365)

5964 1925-S MS64 PCGS. VAM-2. A Top 50 Variety. The doubled olive branches on the left side identifies the VAM-2 variety. This well struck Choice example shows the customary weakness on Liberty's hair and the eagle's feathers. The lustrous surfaces are imbued with spotty golden-tan patina. (#7366)

5965 1926 MS66 PCGS. Light olive-green throughout save for blushes of lavender and powder-blue on the lower reverse. Sharply struck and lustrous with a clean appearance. Encapsulated in a green label holder. None have been certified finer by PCGS (3/11). From The Paul Taylor Collection. (#7367)

5966 1926-S MS65 NGC. Bright and subtly frosted with only the slightest evidence of toning or color. A few pinpoint marks and shallow luster scrapes on the sharply struck portrait contribute to the grade.(#7369)

## MS66 1926-S Silver Dollar Elusive Top 50 'Dot' VAM-4

5967 1926-S MS66 PCGS. VAM-4. A Top 50 Variety. The "Dot" VAM, known for a curious raised button-like element southwest of the eagle's claw. The VAM is undesignated on the green label holder, since it predates the advent of the Top 50 reference. Lightly freckled golden-brown toning graces both sides, but is more apparent on the obverse. Smooth, well struck, and lustrous. Population: 63 in 66, 2 finer (3/11).

From The Paul Taylor Collection. (#7369)

## 1927-D Peace Dollar, Gem Uncirculated Semikey Issue, Scarce in High Grades

5968 1927-D MS65 PCGS. The 1927-D still qualifies as a semikey issue, even after 2,500 pieces were sold at auction in 1992. Few of those qualified as Gems by today's market standards. The finest coins known grade MS66, placing this example as tied for second finest. The mint luster is thick and frosted and each side has a layer of light, even gray-golden toning. Sharply defined throughout. (#7371)

5969 1928 MS64 NGC. The famous low-mintage key, seen here as a bright near-Gem which appears silver at most angles but takes on gold-to-peach color at an angle, more visibly on the reverse. A few small flaws, including a tiny horizontal abrasion under Liberty's eye, account for the grade.(#7373)

5970 1928 MS64 PCGS. The 1928 Peace dollar is a scarce date in high grade, from a mintage of 360,649 pieces. This sharply detailed Choice example displays bright mint luster and light golden patina. (#7373)

## Gem 1928 Peace Dollar Lowest Mintage of the Series

5971 1928 MS65 PCGS. CAC. The 1928 Peace dollar boasts the lowest mintage of the series, at 360,649 pieces. Gem examples are scarce, and PCGS has certified only 11 coins in higher numeric grades (3/11). The present coin is a well detailed Gem, with above-average mint luster, and a blanket of greenish-gold toning on both sides. (#7373)

5972 1928-S MS64+ PCGS. CAC. The 1928-S is the rarest Peace dollar in Gem condition, making this high-end Choice example an especially attractive option from the standpoint of price versus quality. This attractive well struck example displays vibrant mint luster and light golden toning.(#7374)

## Low-Mintage MS66 1934 Silver Dollar Green Label Holder

5973 1934MS66 PCGS. This fully struck Premium Gemdisplays sweeping luster and delicate jade-green toning. The cheek and fields are refreshingly free from contact. Encapsulated in a green label holder. As of (3/11), a mere three pieces are certified higher by PCGS. From The Paul Taylor Collection. (#7375)

5974 1934-D MS65 NGC. The 1934-D is a better date in the series, from a mintage of 1.5 million pieces. This well struck Gem displays vibrant mint luster and mottled gray and gold toning. Only 29 coins have been certified in higher numeric grades at NGC (3/11). (#7376)

## 1934-D Peace Dollar, MS66 Bold Strike, Original Light Patina

5975 1934-D MS66 PCGs. Micro D. Light green-gold toning enriches the boldly struck and carefully preserved surfaces of this lower mintage Denver Mint dollar. The cartwheel luster is vibrant, and the eye appeal is attractive. Population: 59 in 66, 2 finer (3/11). From The Paul Taylor Collection. (#7376)

## Gem 1934-S Peace Dollar Well-Preserved Key Issue

5976 1934-S MS65 PCGS. CAC. The 1934-S is the cornerstone of a Peace dollar collection, from a small mintage of 1 million pieces. Few examples were saved by collectors, and specimens in Gem condition are quite scarce. The present coin is an attractive Gem, with strong satiny mint luster and wispy gold and lavender toning. The devices are well detailed, with just a touch of flatness on Liberty's hair and the eagle's feathers. Currently, PCGS has certified only 24 coins in higher numeric grades (3/11). (#7377)

## MS66 1935 Peace Dollar Lustrous and Unabraded

5977 1935 MS66 PCGS. CAC. Lime-green and butter-gold blend across this lustrous and beautifully preserved low mintage final-year Premium Gem. The strike is good, although the centers lack a complete impression. Encased in a green label holder. Despite the advent of Plus grading, PCGS has yet to certify any examples finer (3/11).

From The Paul Taylor Collection. (#7378)

5978 1935-S MS65 NGC. Four rays beneath ONE. Splashes of pastel sun-gold alternate with ice-blue and cream-gray. This nicely struck and lustrous Gem has a clean cheek and attractive eye appeal. (#7379)

5979 1935-S MS65 PCGS. Three rays below ONE. Powerful frosty luster offers plenty of flash. The interiors are smooth and bright silver. The gold-orange toning that is prominent at the obverse margins is more muted on the reverse.(#7379)

## 1935-S Silver Dollar, MS66 Sharply Struck, Lightly Toned

5980 1935-S MS66 PCGS. Three rays below ONE. Traces of autumngold visit the obverse and the lower reverse periphery. Lustrous and sharply struck with a pristine cheek and only distributed wispy grazes on the reverse. Certified in a green label holder. From The Paul Taylor Collection. (#7379)

## **EISENHOWER DOLLARS**

## Top-Graded 1972-S Silver Ike, MS69 Registry Set Essential

5981 1972-S silver MS69 PCGS. A Registry Set prize for the Eisenhower series aficionado, this 40% silver "blue Ike" — as they are known in the trade due to their original Mint packaging — is one of only 13 examples of the 1972-S so certified at PCGS. The grade is fully in keeping with the quality, as this untoned example shows essentially no contact, even under a loupe. Far finer than the usual specimen, and an essential for a top Registry Set. (#7411)

## 1973-D Eisenhower Dollar, MS67 Mint-Set-Only Issue

5982 1973-D MS67 PCGS. The 1973-P and 1973-D Ike dollars were issued only in Mint Sets, severely limiting the numbers available to about 2 million each. In high grades both issues are elusive even at the Premium Gem level, much less the Superb Gem level of the present 1973-D. This piece boasts superior technical and aesthetic quality, with brilliant luster over lightly gold-toned surfaces. For a coin so large, this piece displays remarkably few signs of contact. Population: 10 in 67, 0 finer (3/11). (#7413)

## Top Registry Set Candidate 1974-D Ike Dollar, MS67

5983 1974-D MS67 PCGS. The 1974-D Ike dollar mintage was a mostly lackluster, huge production exceeding 45 million pieces, and the survivors usually show far too many signs of contact and/ or other surface problems to qualify for the highest certified grade levels. This Superb Gem is one such, tied with 13 other submissions at PCGS for the finest graded (3/11). Radiant luster emanates from virtually mark-free surfaces that are pinkish-tinged on the obverse, the reverse more golden-colored. Another Registry Set essential. (#7416)

## Wonderfully Toned 1976 Type Two Ike MS67, Tied for Finest at PCGS

5984 1976 Type Two MS67 PCGS. This Guide Book variety is picture on page 225 of the 2011 edition and aptly described, "Sharp design, delicate lettering on reverse." This Superb Gem is one of only nine submissions so certified, an unsurprisingly low number to series specialists acquainted with the generally lackluster surface quality of this enormous emission of 113 million coins. This wonderful Superb Gem boasts appeal at the outset, displaying pristine, wonderfully toned surfaces — a ring of pinkish-gold near the obverse rims, pinkish-gold centers with a hint of peripheral jade on the reverse. A Registry Set prize and a super acquisition for toning enthusiasts as well. Population: 9 in 67, 0 finer (3/11). (#7419)

## SACAGAWEA DOLLARS

## 2000-P 'Cheerios' Dollar, FS-401, MS67 Reverse Hub Variant

5985 2000-P Cheerios MS67 PCGS. FS-401. "Your 2000-dated coin is one of the first 10,000,000 to be produced by the Mint and has been packaged by Cheerios as a special memento of the new millennium." What this Sacagawea dollar's certificate of authenticity did not say was that the "Cheerios" dollars are distinctly different from their mass-distributed counterparts on the reverse. This bright example shows only a few minor disturbances along the rims that are entirely consistent with the MS67 designation. Population: 17 in 67, 19 finer (2/11). (#147231)

5986 2009 Native American, Missing Edge Lettering MS66 NGC. The 2009 Sacagawea dollar is a major rarity with missing edge lettering. The design calls for the date and mintmark to appear on the edge of the coin, but this example shows no trace of those details. This Premium Gem is sharply detailed, with virtually unmarked fields and bright mint luster.(#408373)

#### PRESIDENTIAL DOLLAR

5987 (2007) Jefferson —Missing Edge Lettering— MS66 PCGS. This coruscating honey-gold Presidential dollar differs from the vast majority of its peers in that it bypassed the edge lettering machine and retains a plain edge. Thus, we don't know whether it was struck at Denver or Philadelphia, but we do know it was struck in 2007, since that was the sole year of the Jefferson type. (#390499)

## **COMMEMORATIVE SILVER**

5988 1893 Isabella Quarter MS64+ PCGS. CAC. Peach and lavender-violet border-toning is key to this Isabella quarter's eye appeal. Well struck with decidedly above-average luster and great surface preservation that falls just short of Gem standards. (#9220)

## Beautifully Patinated Premium Gem 1893 Isabella Quarter

5989 1893 Isabella Quarter MS66 NGC. Swirling mint luster radiates from beneath lovely amber-red patina on the obverse, while the central reverse displays more subdued (but equally attractive) olive tones with an amber rim. A well-struck and virtually mark-free representative of this popular odd-denomination commemorative silver coin. (#9220)

## Superb Gem 1893 Isabella Quarter Splendid Border Toning

5990 1893 Isabella Quarter MS67 NGC. Original and attractive, the fully frosted surfaces are adorned with crescents of cobalt-blue and copperruset peripheral toning. While we typically offer multiple Isabella Quarters in our Signature Sales, seldom does an example possess surfaces that are smooth enough to warrant a Superb Gem rating. Ex: FUN Signature (Heritage, 1/2003), lot 9499, which realized \$3,910. (#9220)

5991 1893 Isabella MS64 Prooflike NGC. Golden-brown fields accompany sea-green borders. This exquisitely struck Choice commemorative quarter is splendidly unabraded with satin luster and pleasing eye appeal. Census: 37 in 64 Prooflike, 16 finer (3/11). (#89720)

5992 1900 Lafayette Dollar MS62 PCGS. The 1900 Lafayette dollar is the first commemorative silver dollar, with a distribution figure of 36,026 pieces. This sharply detailed MS62 example offers bright mint luster and brilliant surfaces.(#9222)

- 5993 1900 Lafayette Dollar MS64 NGC. DuVall 2-C. Faint almondgold toning clings to the margins of this carefully preserved and coruscating Choice commemorative dollar. The strike is good, although Washington's cheek retains some planchet chatter, as coined.(#9222)
- 5994 1900 Lafayette Dollar MS64 PCGS. CAC. DuVall 2-C. A splendid near-Gem of this singleton, the only silver dollar in the classic commemorative era of U.S. coinage. Radiant luster prevails over powder-gray surfaces that are high-end and relatively mark-free for the assigned grade. (#9222)
- 5995 1921 Alabama MS65 NGC. Pale pink peripheral accents influence this otherwise silver-white Alabama Gem. Well struck for the type, though with a measure of the usual central softness. NGC has graded 78 numerically finer pieces (3/11).(#9224)
- 5996 1921 Alabama MS65 PCGS. A lovely Gem, this Alabama half dollar is sharply defined with frosty silver luster beneath light gold toning. Representing the "Plain" variant, PCGS has certified a mere 71 finer examples.(#9224)

## MS66 1921 Alabama Half Dollar Scarce 2x2 Variety

- 5997 1921 Alabama 2x2 MS66 PCGS. Dappled jade-green and orange-red embrace the margins of this lightly to moderately toned Premium Gem. Slate and olive shades adorn the major motifs. The fields appear pristine, and eagle's leg feathers are nicely struck. Population: 72 in 66, 5 finer (3/11). (#9225)
- 5998 1937 Antietam MS66 NGC. Silver-gray and gold-orange are the primary undertones on this Antietam Premium Gem. Deeper claret hues dot the margins, to a greater extent on the obverse. From The Dr. Donald M. Gilner Collection. (#9229)
- 5999 1937 Antietam MS66 PCGS. The 1937 Antietam commemorative half dollar claims a distribution figure of 18,028 pieces. This sharply detailed Premium Gem radiates vibrant mint luster, and the brilliant surfaces are touched by areas of dark green patina at the rims.(#9229)
- 6000 1938 Arkansas MS66 PCGS. This lustrous Premium Gem offers soft, frosty silver surfaces beneath pale gold and iridescent toning on the obverse, ivory on the reverse, and excellent design definition. Population: 70 in 66, 7 finer (3/11).(#9245)
- 6001 1939-D Arkansas MS66 NGC. This fully brilliant Premium Gem has satiny silver surfaces with full mint brilliance. Faint amber toning is evident along the obverse periphery with tiny dots of iridescence on both sides. Census: 30 in 66, 8 finer (3/11). (#9250)
- 6002 1935/34-S Boone MS66 PCGS. Dappled light chestnut-tan and powder-blue patina graces this satiny and well struck Premium Gem. Close to pristine, although we note a small mark on the Indian's shoulder. The 1935/34-S is famous as the second lowest mintage classic silver commemorative. Only 2,004 pieces were struck, one assay coin more than its Denver Mint counterpart. (#9264)
- 6003 1938-S Boone MS67 NGC. CAC. Boldly toned with impressive luster. This well-defined Superb Gem has subtle patterns in the lilac-blue central toning with more overt shifts within the orange and ruddy patina near the rims. Census: 30 in 67, 1 finer (3/11). (#9276)

- 6004 1925-S California MS67 NGC. A flashy Superb Gem, boldly struck as usual with distinctive border toning. Dappled blue, gold, orange, and red elements are prominent on each side, especially to right. NGC has graded eight numerically finer pieces (3/11). (#9281)
- 6005 1925-S California MS67 NGC. Strong gold-to-orange toning washes over most of this immensely lustrous Superb Gem, while the borders show additional turquoise elements. Fantastic all-around eye appeal for an issue seldom found finer.(#9281)
- 6006 1936-D Cincinnati MS67 NGC. The 1936-D Cincinnati commemorative half dollar claims a modest distribution figure of 5,005 pieces. This well detailed Superb Gem displays light gold and lavender toning, and satiny mint luster. Census: 27 in 67, 0 finer (3/11).(#9284)
- 6007 1936 Cleveland MS67 PCGS. CAC. A Superb Gem Cleveland commemorative half dollar, with a distribution figure of 50,030 pieces. The devices are well struck and the surfaces display bright mint luster and attractive gold and ice-blue toning. (#9288)

#### 1936-D Columbia Half, Immaculate MS68

- 6008 1936-D Columbia MS68 NGC. Toned with deep russet-gold at the periphery on the obverse, almost certainly from the original "tab" holders. Boldly struck throughout and highly appealing for this issue. The combined NGC and PCGS population data shows 35 pieces graded this high with none seen finer by either service (3/11). (#9292)
- 6009 1936 Columbia PDS Set MS66 NGC. All three pieces tab-toned in navy and gray on the obverse with deeper rose-infused patina over much of the reverse. Comes with the original cardboard holder, as well as a custom plastic holder.

  From The Dr. Donald M. Gilner Collection. (Total: 3 coins) (#9294)
- 6010 1893 Columbian MS66 PCGS. CAC. A satiny Premium Gem, this Columbian half dollar has fully mirrored fields and lustrous devices, creating excellent contrast despite the lack of a Prooflike designation. No toning is visible on either side. PCGS has only certified eight finer examples (3/11).(#9297)
- 6011 1935 Connecticut MS67 NGC. A deeply toned Superb Gem, this Connecticut half dollar exhibits frosty underlying luster with an attractive blend of light gray, gold, and iridescent toning. Census: 55 in 67, 1 finer (3/11).(#9299)
- **6012 1936 Delaware MS67 PCGS. CAC.** Lovely gold and champagne toning with accompanying peripheral iridescence creates incredible eye appeal on this Superb Gem. Both sides have satin luster with pristine surfaces. Population: 71 in 67, 0 finer (3/11). (#9301)
- 6013 1936 Delaware MS67 NGC. A lovely Superb Gem, this Delaware half dollar exhibits satiny silver luster over most of its surface, with iridescent toning over one-fourth of the obverse to the right. Census: 80 in 67, 3 finer (3/11).(#9301)
- 6014 1928 Hawaiian Obverse Scratched NGC Details. Unc. Bright and minimally toned. The obverse has a thin scratch at right behind the portrait, but the reverse is perfectly suitable for display, and neither side has negative visual appeal. From The Michael A. Tongg Collection.

- 6015 1928 Hawaiian Improperly Cleaned NGC Details. Unc. No trace of wear appears on this example of the low-mintage Hawaiian half dollar. Cleaned once, though the golden retoning over each side softens the appearance. From The Michael A. Tongg Collection.
- 6016 1928 Hawaiian Obverse Improperly Cleaned NGC Details. Unc. Light gold, rose, and blue-violet toning over most of each side. The obverse has subdued luster from an old cleaning, perhaps as simple as a wipe, while the reverse is a touch brighter. From The Michael A. Tongg Collection.
- 6017 1928 Hawaiian Harshly Cleaned NGC Details. Unc. The 1928 Hawaiian half dollar is the key to the silver commemorative series, with a distribution figure of 9,958 pieces. The present coin is a sharply detailed specimen, with unnaturally bright surfaces. From The Michael A. Tongg Collection.
- 6018 1928 Hawaiian Improperly Cleaned NGC Details. Unc. Considerable luster remains even after a past cleaning. Lightly retoned gold since that event and a fundamentally pleasing coin despite its impairment.
- 6019 1928 Hawaiian MS62 ANACS. This satiny Mint State piece has faint heather toning over lustrous surfaces with peripheral iridescence to heighten its eye appeal. (#9309)

## 1928 Hawaiian Half Dollar MS63 Light Golden Toning

6020 1928 Hawaiian MS63 NGC. Faint almond-gold and lime patina visits this coruscating and boldly struck representative. A dash of ebony toning is noted on the obverse border near 11 o'clock. A loupe reveals a few minor obverse marks, but none remotely impact the imposing eye appeal. The key type of the silver commemorative series. Encapsulated in a former generation holder. From The Dr. Donald M. Gilner Collection. (#9309)

## Gem 1928 Hawaiian Half

6021 1928 Hawaiian MS65 NGC. An attractive and important Gem example of the Hawaiian half dollar, a commemorative issue famous for its four-figure business strike mintage and the number of examples distributed to non-collectors. This example received decidedly above-average care, and light golden-tan color visits parts of the warmly lustrous surfaces. NGC has graded 67 numerically finer representatives (3/11).

From The Michael A. Tongg Collection. (#9309)

#### Lustrous MS65 1928 Hawaiian Half

6022 1928 Hawaiian MS65 NGC. The Hawaiian is well known as the key to a 50-piece classic silver commemorative type set. The mintage is similar to the Hudson and Spanish Trail, but the Hawaiian was struck earlier, and a sizeable portion of the distribution was to local non-numismatists. This precisely struck Gem possesses dynamic luster, and marks are absent aside from the field near Captain Cook's shoulder. (#9309)

High-End 1928 Hawaiian Half Dollar Gem

- 6023 1928 Hawaiian MS65 PCGS. CAC. This key-date commemorative silver half dollar is not yellow-toned like the typical survivors (numbering 137 pieces in all) of the Bank of Hawaii; in fact, the surfaces are almost entirely untoned, with gleaming luster and premium, high-end eye appeal recognized by CAC. PCGS has seen 70 submissions finer (3/11). (#9309)
- 6024 1935 Hudson MS65 NGC. The Hudson half dollar commemorates the Sesquicentennial of the City of Hudson, New York. This frosty champagne toned Gem has lovely surfaces with trivial and inconsequential marks.(#9312)

## Superb Gem 1935 Hudson Half Rich Obverse Peripheral Toning

6025 1935 Hudson MS67 NGC. Peach-gold, ruby-red, and jade-green illuminate the obverse border, while the remainder of this lustrous Superb Gem is pearl-gray. Lustrous and immaculate with above-average sharpness on whale-rider Poseidon. A magnificent representative of this low mintage type. Census: 26 in 67, 3 finer (3/11). (#9312)

- 6026 1925 Lexington MS66 PCGS. A few speckles of gold appear on the highly lustrous surfaces of this well-struck Premium Gem. No significant marks appear on either side of this Revolutionary War commemorative, which boasts excellent eye appeal. An interesting collecting challenge is the subset of commemorative halves (and the 1900 Lafayette dollar) relating to the various U.S. military battles of the Revolutionary and Civil wars. PCGS has seen eight finer (3/11).(#9318)
- 6027 1925 Lexington MS66+ PCGS. CAC. The left obverse and lower reverse have ample apricot, gold, and peach toning, while the rest of the coin is under a light layer of gray toning. Pleasingly lustrous and incredibly close to Superb Gem quality. PCGS has graded just eight numerically finer examples (3/11).(#9318)
- 6028 1918 Lincoln MS67 NGC. A stunning Superb Gem, this 1918 Lincoln half dollar, or more properly the Illinois Statehood Centennial half dollar, is fully brilliant and sharply detailed with satin luster and delicate iridescent toning. Census: 66 in 67, 3 finer (3/11).(#9320)

#### Incredibly Toned 1936 Long Island, MS67

- 6029 1936 Long Island MS67 NGC. Both sides of this Superb Gem Long Island are characterized by deep orange-purple patina, accented with jade, blue, and traces of canary more prominent near the rims. Excellent luster nonetheless radiates from beneath the moderate toning, and the eye appeal is startling. Perhaps improvable some day from a numeric standpoint, but not so among collectors of incredible toning. (#9322)
- 6030 1936 Long Island MS67 NGC. Deep cherry-red and orange peripheral toning surrounds the cream-gray devices. Well struck and unmarked with comprehensive satin luster. An exquisite representative of this tercentenary type. Census: 51 in 67, 4 finer (3/11).(#9322)
- 6031 1936 Lynchburg MS67 NGC. Delicate light gold and iridescent toning visit the surfaces of this frosty and highly lustrous Superb Gem. An appealing specimen with few finer certified examples. Census: 85 in 67, 3 finer (3/11).(#9324)

## 1920 Maine Commemorative Half, MS67 Superbly Preserved and Nicely Toned

6032 1920 Maine MS67 NGC. A wonderful Superb Gem, this example has bright, satiny silver luster with splashes of gold, cobalt-blue, emerald-green, and lavender toning on each side. This impressive piece will surely find a happy home when it crosses the auction block. Census: 24 in 67, 1 finer (2/11). (#9326)

- 6033 1921 Missouri MS64 PCGS. The 1921 Missouri commemorative half dollar claims a low distribution figure of 10,428 pieces. This sharply detailed Choice example displays delightful golden-brown and steel-blue patina. (#9330)
- 6034 1921 Missouri MS65 NGC. The excellent eye appeal of this Gem example is undeniable, and proceeds from a combination of shimmering luster, fine surface preservation, and subtly variegated coloration. A popular early commemorative issue. (#9330)

## 1921 Plain Missouri Half, MS66 Scarce Early Silver Issue

- 6035 1921 Missouri MS66 NGC. A lovely pearl-gray representative of this elusive issue. The reverse is pristine, and the obverse displays only faint grazes on the field and cheek. The Plain variety of the Missouri half is nearly as scarce as its 2x4 counterpart, and in fact, NGC has certified more examples of the latter at the MS66 level. Census: 31 in 66, 2 finer (3/11). (#9330)
- 6036 1921 Missouri 2x4 MS64 NGC. CAC. Honey-gold and powderblue embrace this coruscating and carefully preserved near-Gem. The strike is precise aside from the upper portion of the shoulder strap. A scarce low mintage variety. Encapsulated in a prior generation holder.(#9331)
- 6037 1921 Missouri 2x4 MS64 NGC. The Mint created two varieties of the Missouri half dollars, unwittingly promoting additional sales just a few years before "commemorative abuses" were subject to Congressional investigation. This near-Gem has gold and iridescent toning over its grayish-silver surfaces. Both sides are nicely detailed with satin luster. (#9331)
- 6038 1921 Missouri 2x4 MS64 NGC. Bright and slightly frosted luster dominates the eye appeal on this near-Gem. Light golden patina over much of each side with a line of deep green-gray at the bottom of the obverse.(#9331)
- 6039 1936 Norfolk MS68 PCGS. This intricately detailed 1936 Norfolk commemorative half dollar displays a patina of gold and ice-blue colors, enhanced by vibrant mint luster. No coins have been certified in higher numeric grades by PCGS (3/11). (#9337)
- 6040 1936 Norfolk MS68 NGC. Due to its complicated design, the Norfolk half dollar shows few marks on either side. The surfaces are frosty and lustrous with delicate gold toning on a light gray background. Census: 67 in 68, 1 finer (3/11).(#9337)
- 6041 1925 Norse Thick Planchet MS66 PCGS. CAC. Technically a medal, the Norse Centennial emissions have traditionally been collected with the commemorative series. This Thick Planchet specimen is a sharply detailed Premium Gem, with brilliant surfaces and bright mint luster. Population: 31 in 66, 0 finer (3/11). (#9450)
- 6042 1926-S Oregon MS67 PCGS. CAC. The Oregon Trail commemorative half dollar is held in high esteem for its beautiful design. This sharply detailed Superb Gem displays satiny mint luster and a patina of gold and ice-blue colors. Only five coins have been certified in higher numeric grades by PCGS (3/11). (#9341)

- 6043 1926-S Oregon MS67+ NGC. This highly lustrous Superb Gem has satiny silver surfaces with full mint brilliance and delicate peripheral iridescence. A bold strike and pristine surfaces create exceptional eye appeal. Census: 1 in 67+, 11 finer (3/11). (#9341)
- 6044 1939-S Oregon MS67 NGC. The Oregon Trail design is justly considered the most beautiful commemorative half dollar. This spectacular Superb Gem displays vibrant mint luster, sharply detailed devices, and a patina of light gold and ice-blue colors. (#9354)
- 6045 1939 Oregon PDS Set MS66 NGC. The NGC inserts have consecutive serial numbers. The set includes: 1939, pristine and precisely struck; 1939-D, immaculate and satiny; and a 1939-S, mark-free and fully struck. Each coin displays similar light peach and lime toning. The three lowest-mintage issues of the intermittently struck Oregon type.

From The Dustinn (Dusty) Lee Gibson Collection. (Total: 3 coins)

(#9355)

- 6046 1915-S Panama-Pacific MS64 PCGS. Rich peach and plum shadings sweep across each side of this softly lustrous Panama-Pacific near-Gem. Solid eye appeal with few serious marks. (#9357)
- 6047 1915-S Panama-Pacific MS65+ PCGS. An exceptionally preserved and satiny Gem that displays consistently blended almond-gold, stone-gray, and olive-green toning. A faint graze on the cherub is all that denies an even finer grade. (#9357)

#### Premium Gem 1915-S Panama-Pacific Half

6048 1915-S Panama-Pacific MS66 NGC. A richly toned, remarkably lustrous Premium Gem example of this popular early silver commemorative. Deep blues and greens prevail at the margins, while the interiors mix gold, orange, and peach shadings with elements of light silver. A beautiful coin that is housed in a priorgeneration holder.

From The Dr. Donald M. Gilner Collection. (#9357)

## 1915-S Panama-Pacific Half Dollar Near-Pristine MS66

6049 1915-S Panama-Pacific MS66 PCGS. CAC. Autumn-gold and sea-green illuminate the borders, with the deeper shades on the reverse. The fields and centers are essentially brilliant. A well preserved and sharply impressed example of this scarce early silver commemorative issue. (#9357)

## Beautifully Toned MS67 1915-S Panama-Pacific Half

6050 1915-S Panama-Pacific MS67 PCGS. CAC. Golden-brown, apple-green, and cream-gray embrace this shimmering and essentially pristine Superb Gem. The strike is sharp despite slight incompleteness on the lower right obverse. The mintmark is repunched east, visible as an extra upper serif. Certified in a green label holder. Population: 73 in 67, 5 finer (3/11). (#9357)

## Toned Superb Gem 1920 Pilgrim

6051 1920 Pilgrim MS67 PCGS. CAC. The 1920 Pilgrim Tercentenary is generally regarded as the more-available of the two issues (along with the 1921), but that relationship is narrowed at the highest (MS66-67) grade levels, where the issues are virtually neck-andneck. This radiant piece boasts silver centers accented with ambergold and sapphire near the rims. Population: 32 in 67, 0 finer (3/11). (#9359)

## Colorful 1921 Pilgrim Half, MS67

6052 1921 Pilgrim MS67 NGC. Apple-green and apricot-gold endow this coruscating and fully impressed Superb Gem. The second and better date of the silver type. Pristine aside from inconsequential grazes on the upper left obverse field. Struck from a clashed reverse die. Census: 20 in 67, 6 finer (3/11). (#9360)

## 1921 Pilgrim Half Dollar, MS67 ★ Attractive Border Toning

- 6053 1921 Pilgrim MS67 ★ NGC. A ring of tobacco-brown enriches the peripheries of this highly lustrous Superb Gem. Only tiny marks are apparent, and the strike is precise aside from minor incompleteness on the legends near the rims. The lower mintage and scarcer of the two Pilgrim issues. Census: 6 in 67 ★, none finer with or without a Star designation (3/11). (#9360)
- 6054 1935 Spanish Trail MS64 NGC. Well-defined with strong luster for the design. The obverse has a clean appearance for the MS64 designation, though the gold-tinged reverse shows a handful of luster scrapes.(#9376)
- 6055 1935 Spanish Trail MS65 NGC. Lavender-to-blue hues dominate the obverse, while the reverse offers lighter gold-influenced color with the blue pushed more to the margins. Well-defined with attractive luster. From The Dr. Donald M. Gilner Collection. (#9376)
- 6056 1935 Spanish Trail MS65 NGC. Pale gold-gray hues are dominant on this Gem, though a patch of lilac-heather is noted at the left obverse. Additional deeper shadings dot the borders. Lustrous and appealing.

  From The Dr. Donald M. Gilner Collection. (#9376)
- 6057 1935 Spanish Trail MS65 NGC. The Old Spanish Trail spanned several states in the southeast, from Florida to Texas. This commemorative marks the 400th anniversary of the trail. Both sides of this Gem are frosty and highly lustrous with delicate gold toning. (#9376)
- 6058 1935 Spanish Trail MS66 PCGS. CAC. A mostly brilliant silver Premium Gem that shows traces of pale gold toning on its light gray surfaces, this Old Spanish Trail half dollar has pristine surfaces and excellent design definition.(#9376)
- 6059 1925 Stone Mountain MS67 NGC. Mingled green, olive, sage, violet, and antique-gold hues cover most of each side, though a prominent diagonal stripe of mostly silver graces the obverse. A gorgeous Superb Gem that is housed in a prior-generation holder. From The Dr. Donald M. Gilner Collection. (#9378)
- 6060 1925 Stone Mountain MS67 NGC. Gold, orange, peach, and violet toning covers most of each side, though the right obverse has a considerable window of silver-gray. A well struck and carefully preserved Superb Gem. NGC has graded just nine numerically finer representatives (2/11).
  From The Dr. Donald M. Gilner Collection. (#9378)
- 6061 1925 Vancouver MS66 NGC. Flashy interiors are mainly silver, while the margins show prominent patches of reddish-orange and violet patina. Well struck with pleasingly preserved surfaces. NGC has graded 37 numerically finer examples (2/11). From The Dr. Donald M. Gilner Collection. (#9399)

#### Toned Superb Gem 1925 Vancouver Half

- 6062 1925 Vancouver MS67 PCGS. CAC. Glorious silvery luster throughout competes for territory with an area of purplish and electric-blue patina at the lower-left fields on each side. Tied for the finest obtainable of this Superb Gem, save for one MS68 in higher grade at PCGS. A well—struck and thoroughly attractive example. Population: 44 in 67, 1 finer (3/11). (#9399)
- 6063 1946 Booker T. Washington MS66 PCGS. CAC. This well detailed Premium Gem is patinated in attractive shades of powder-blue and gold, with strong satiny mint luster shining through the toning. Only 40 coins have been certified in higher numeric grades at PCGS (3/11).(#9404)
- 6064 1948-D Booker T. Washington MS66 PCGS. CAC. Only 8,005 1948-D Booker T. Washington commemorative half dollars were distributed, and the issue is scarce at the Premium Gem level. This sharply detailed specimen displays lustrous brilliant surfaces, with highlights of gold toning at the rims.(#9413)
- 6065 1948-D Booker T. Washington MS67 NGC. Silver interiors with dappled golden-tan along the margins. This well struck Superb Gem is tied for numerically finest in the combined certified population (3/11).(#9413)
- 6066 1949-S Booker T. Washington MS67 NGC. CAC. Faint hints of golden color visit a softly lustrous and silvery obverse, while the reverse has a minor peach tint. Impressively preserved all around and tied for numerically finest in the combined certified population (3/11).(#9418)
- 6067 1950 Booker T. Washington MS66 PCGS. CAC. The 1950 Booker T. Washington commemorative half dollar claims the low distribution figure of 6,004 pieces. This fully detailed Premium Gem displays virtually pristine surfaces and extraordinary vibrant mint luster. (#9420)
- 6068 1951-S Washington-Carver MS67 NGC. A lustrous almondgold Superb Gem with exemplary preservation and only minor incompleteness of strike at the centers. 1951 was the only year that Booker T. Washington appeared on two different silver commemorative types. Census: 16 in 67, 0 finer (3/11). (#9432)

## MS67 ★ 1952-S Washington-Carver Fully and Attractively Toned

6069 1952-S Washington-Carver MS67 ★ NGC. CAC. Exquisite jade-green and rose-red patina embraces lustrous and immaculate surfaces. The strike is superior for the type, with only minimal planchet chatter apparent on Texas and the cheek of George Washington Carver. Census: 3 in 67 ★, none finer with or without a Star designation (3/11). (#9436)

- 6070 1953 Washington-Carver MS66+ PCGS. CAC. This green-gold commemorative half has a hint of rose-red at the centers. Dazzling cartwheel luster illuminates well struck and immaculate surfaces. Population: 2 in 66+, 3 finer (3/11).(#9438)
- 6071 1954-D Washington-Carver MS66 PCGS. From a distribution figure of 12,000 pieces, the 1954-D Washington-Carver commemorative half dollar is undervalued in relation to its small mintage. The present coin is a delightful Premium Gem, with strong mint luster and delicate gold and lavender toning. (#9443)

## MS68 Wisconsin 1936 Half Dollar Marvelous Multicolor Patina

6072 1936 Wisconsin MS68 NGC. Peach-gold, cherry-red, emerald-green, and lilac-gray toning blankets this lustrous and fully struck classic silver commemorative. Only a graze beneath the L in TERRITORIAL precludes numismatic perfection. Those in search of a gorgeously toned Wisconsin need look no further. (#9447)

#### Delightful Wisconsin Half Dollar, MS68

6073 1936 Wisconsin MS68 NGC. A whisper of honey toning visits this satiny and unmarked high grade commemorative half. All design details are fully present. A fleck of carbon to the left of the 1 in the date will help confirm any future auction appearances. Census: 23 in 68, 8 finer (3/11). (#9447)

## **COMMEMORATIVE GOLD**

- 6074 1903 Louisiana Purchase/Jefferson MS65 PCGS. CAC. A pleasingly detailed and charming Jefferson gold dollar, luminous with pale straw-gold on the portrait and a richer yellow in the fields. Great overall eye appeal. (#7443)
- 6075 1903 Louisiana Purchase/Jefferson MS66 PCGS. Yellow-gold interiors are lustrous, as are more reddish-orange margins. A carefully preserved Premium Gem survivor of the Jefferson design. PCGS has graded 71 numerically finer representatives (3/11). (#7443)
- 6076 1903 Louisiana Purchase/Jefferson MS66 PCGS. The Louisiana Purchase Exposition was the name of the world's fair held in St. Louis in 1904. This wonderful Premium Gem gold dollar marks the anniversary of the Louisiana Purchase and serves as a wonderful souvenir of the St. Louis event. This sharply struck example displays rich yellow-gold luster and faint blemishes. From The B & D Collection. (#7443)

- 6077 1903 Louisiana Purchase/McKinley MS64 NGC. A softly lustrous near-Gem with a faint orange tinge to the butter-yellow surfaces. The strike is uncommonly crisp and key to this commemorative's eye appeal.(#7444)
- 6078 1903 Louisiana Purchase/McKinley MS66 NGC. This Premium Gem McKinley gold dollar was issued in conjunction with the 1904 St. Louis World's Fair, and commemorates the centennial of the Louisiana Purchase. Both sides are highly lustrous with brilliant, satiny yellow-gold surfaces and bold design details. From The B&D Collection. (#7444)

## MS64+ Lewis and Clark 1904 Gold Dollar Original Green-Gold Surfaces

6079 1904 Lewis and Clark MS64+ NGC. A khaki-gold near-Gem of the scarce two-headed Lewis and Clark type. The strike is intricate except on the right-side dentils, and the fields and portraits display only minor faint grazes. A lustrous and lovely example, issued for the 1905 Portland, Oregon Exposition instead of the ongoing 1904 St. Louis Exposition. (#7447)

## Gem Lewis and Clark 1904 Gold Dollar Only Two-Headed U.S. Type

6080 1904 Lewis and Clark MS65 PCGS. Attractive peach fields are framed by peripheral sun-gold. The portraits are fully struck, and any incompleteness is confined to the left-side dentils. This Gem appears pristine save for a single faint vertical graze on the cheek of Lewis. Although dated 1904, the issue commemorates a Portland, Oregon exposition held the following year, 1905. (#7447)

## Prooflike 1904 Lewis and Clark Gold Dollar, MS66

6081 1904 Lewis and Clark MS66 NGC. Even though this is a business strike, at first glance the deeply reflective surfaces and cameoed devices radiate notable prooflikeness. As NGC has certified numerous Prooflike examples, we fail to understand why this piece is absent from those coins. Yellow-gold surfaces are nearly contact-free, save for a curved lintmark above Lewis' head. Census: 98 in 66, 23 finer (3/11). (#7447)

## 1904 Lewis and Clark Gold Dollar, MS66 Only 23 Finer at NGC

6082 1904 Lewis and Clark MS66 NGC. Extraordinary, shimmering brilliance with no distractions of any consequence on either side. The low-mintage Lewis and Clark issues are often found slightly mishandled, and an MS66 must be considered far above average. Each side presents a slightly grainy finish due to excessive metal flow and a pronounced green-gold appearance. Specimens in this remarkable state are very scarce. Census: 98 in 66, 23 finer (2/11). From The B & D Collection. (#7447)

## Intensely Toned Orange-Gold 1904 Lewis and Clark, MS66

6083 1904 Lewis and Clark MS66 PCGS. As time passes, events worthy of celebration a century ago inspire new commemoratives in the current era. The quincentenary of the first Christopher Columbus voyage merited a three-coin set, and in 2004, a new Lewis and Clark dollar entered the modern commemorative pantheon. This time the dollar was silver, not gold, and the two famed explorers appeared on the same side.

Intense orange-gold color characterizes this spectacular 1904 Lewis and Clark dollar. Both sides exhibit excellent definition and carefully preserved surfaces. The luster is strong, and the overall eye appeal is stellar. A wonderful representative that could find a home in the finest of sets. PCGS has graded only 16 pieces finer (3/11). (#7447)

- 6084 1905 Lewis and Clark Improperly Cleaned NGC Details. Unc. No hairlines are readily evident, but the fields are prooflike without corresponding reflectivity. This straw-gold example is fully struck aside from a few dentils.
- 6085 1905 Lewis and Clark Improperly Cleaned NGC Details. Unc. A faintly hairlined but still attractive example of this scarcer second-year example. Cartwheel luster sweeps the periphery, while the open fields are prooflike. The strike is bold except on the dentils near 3 o'clock.
- 6086 1905 Lewis and Clark MS63+ PCGS. CAC. Strong sun-yellow color and luster. A well-defined piece with a number of wispy abrasions that preclude Choice status, though the coin is better-preserved than the usual Select example.(#7448)

## 1905 Lewis and Clark Gold Dollar A Well-Preserved Gem

- 6087 1905 Lewis and Clark MS65 PCGS. A lovely sun-gold Gem whose coruscating fields and devices are free from visible abrasions. A good strike that shows only minor softness within the hair of our intrepid explorers. The 1905 is scarcer than its 1904 predecessor, since many type collectors of the day had already acquired the design. (#7448)
- 6088 1915-S Panama-Pacific Gold Dollar MS64 PCGS. This attractive Choice Panama-Pacific gold dollar displays lustrous yellow-gold surfaces, with light orange highlights. The design elements are sharply detailed and the mint luster is vibrant and satiny.(#7449)
- 6089 1915-S Panama-Pacific Gold Dollar MS66 PCGS. A hint of rose toning graces the brilliant and frosty yellow-gold surfaces of this lovely Premium Gem. Faint copper spots attest to the originality of this popular gold commemorative issue that marks completion of the Panama Canal. PCGS has only certified 49 finer examples (2/11). From The B & D Collection.(#7449)
- 6090 1915-S Panama-Pacific Gold Dollar MS66 NGC. Rich and unusual color is a highlight of this Panama-Pacific Premium Gem. Deep orange-gold hues are distinctive enough, but the prominent pink accents put this piece over the top. From The Dr. Donald M. Gilner Collection. (#7449)
- 6091 1915-S Panama-Pacific Gold Dollar MS66 NGC. From a small distribution of 15,000 pieces, the 1915-S Panama-Pacific gold dollar is quite elusive in grades above MS66. This delightful Premium Gem exhibits light orange-gold surfaces, with sharply detailed devices and bright mint luster.(#7449)
- 6092 1915-S Panama-Pacific Gold Dollar MS66 NGC. CAC. This 1915-S Panama-Pacific gold dollar is a sharply detailed Premium Gem, with vivid orange-gold surfaces and vibrant mint luster. Only 15,000 specimens were distributed.(#7449)
- 6093 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Orange-red highlights accent the lustrous surfaces. There is a notable absence of mentionable distractions on this lovely and popular Premium Gem specimen. PCGS has graded only 49 coins in higher numeric grades (3/11).

  Ex: The Troy Wiseman Collection. (#7449)
- 6094 1915-S Panama-Pacific Quarter Eagle —Improperly Cleaned—NGC Details. Unc. Softly struck but with no trace of wear. Like a number of early commemoratives sold to the public, the Panama-Pacific quarter eagle was subject to mistreatment, and this example's dulled yellow-gold surfaces are evidence of a well-meaning but ultimately misguided cleaning.

## Superbly Designed 1915-S Panama-Pacific Quarter Eagle, MS66

6095 1915-S Panama-Pacific Quarter Eagle MS66 NGC. This imaginatively designed gold dollar represents one of the high points in the careers of both Charles Barber and George Morgan. Both sides of this Premium Gem have intense reddish-yellow surfaces with delicate blue patina in the center of the obverse. The frosty surfaces are highly lustrous with a few scattered marks of little consequence.

From The B & D Collection. (#7450)

## Engaging 1915-S Pan-Pac Two and a Half, MS66

- 6096 1915-S Panama-Pacific Quarter Eagle MS66 NGC. The 1915-S Pan-Pac is generally the most appealing of the four commemorative coins to most collectors, as the gold dollar with the "baseball cap" design is too small for many, and the two fifty dollar gold issues are simply out of reach of all but the most well-heeled. This Premium Gem quarter eagle boasts subtle but complete luster over yellowgold surfaces that are distraction-free. (#7450)
- 6097 1916 McKinley MS65 PCGS. Lustrous with an interesting mix of colors in yellow-gold and tan. This well struck Gem hails from the first of two years for the McKinley Birthplace design. (#7454)
- 6098 1916 McKinley MS66 NGC. An absolutely stunning Premium Gem that has the reverse rotated a few degrees clockwise, this gold dollar has strong design definition with frosty yellow-gold luster and gorgeous rose toning on each side. The McKinley gold dollars of 1916 and 1917 feature the handiwork of two Mint engravers who were hardly friends. Charles Barber designed the obverse and George Morgan designed the reverse.

  From The B & D Collection. (#7454)

## Beautifully Patinated MS67 1916 McKinley Gold Dollar

- 6099 1916 McKinley MS67 PCGS. Wonderful pastel patina graces the surfaces of this Superb Gem 1916 McKinley, the more available, grade-for-grade, of the two issues and therefore popular for commemorative gold type collectors. Pinkish-gold, jade, and ice-blue decorate the obverse, with the reverse rims adding deep sunset-orange. Contact marks are virtually absent on this well-struck piece. (#7454)
- 6100 1917 McKinley MS64 PCGS. The antique-gold surfaces have a slight greenish tint on this near-Gem, and waves of lilac appear on the reverse. There are few singular signs of contact, although a single slide mark on the cheek may preclude an even finer grade. Excellent luster prevails on both sides.(#7455)

## 1917 McKinley Gold Dollar, MS66 Impressive, Original Patina

- 6101 1917 McKinley MS66 PCGS. In addition to the wonderful state of preservation of this coin, the other distinctive element is its color. The frosted surfaces show variegated reddish-gold and lilac patina on each side, making this an impressive, original, and highly appealing Premium Gem.

  From The B & D Collection. (#7455)
- 6102 1922 Grant No Star MS62 PCGS. Strong orange overtones accent the yellow-gold surfaces of this lustrous "Plain" Grant dollar. Well-defined but with a number of wispy, grade-defining abrasions. (#7458)
- 6103 1922 Grant No Star MS63 PCGS Secure. This lemon-gold Grant dollar has immaculate fields, and the strike is precise aside from the usual incompleteness on the tree near the frame house window. A tiny strike-through on the right obverse field is of mint origin.(#7458)

## 1922 Grant No Star Gold Dollar, MS66 Rich Color and Satiny Mint Luster

6104 1922 Grant No Star MS66 PCGS. Only 5,000 pieces were struck of No Star gold dollar, plus another 5,000 of the With Star variant. Each side has satiny mint luster and the otherwise even reddishgold color. The design elements of this Premium Gem are fully defined just as Laura Gardin Fraser intended. From The B & D Collection. (#7458)

#### Original 1922 Grant With Star Dollar, MS66

6105 1922 Grant With Star MS66 PCGS. Both the gold dollar and half dollar were first issued with a star in the obverse field. Since this star did not represent anything in particular, it was removed on later issues. This had no effect on the relative rarity of the gold dollars since each was issued in equal numbers, but there is a terrific difference in value in the half dollars. This boldly detailed Premium Gem exhibits bright frosty yellow-gold luster with faint green and rose overtones on each side. A few small splashes of copper toning ensure original surfaces.

From The B & D Collection. (#7459)

6106 1926 Sesquicentennial MS64 NGC. A well struck Choice example of the American Sesquicentennial commemorative quarter eagle, this specimen displays lustrous greenish-gold surfaces, with light orange highlights.(#7466)

#### Radiant Gem 1926 Sesqui Two and a Half

6107 1926 Sesquicentennial MS65 NGC. CAC. Gem Sesquicentennial quarter eagles are high on the list of commemorative gold collectors' wants for the simple reason that it is difficult to find them in superlative condition. This MS65 specimen should produce a check box for some fortunate collector, with excellent orange-gold coloration, CAC approval, radiant luster, and a better strike than typical. (#7466)

#### Reddish-Gold Gem 1926 Sesquicentennial

6108 1926 Sesquicentennial MS65 PCGS. CAC. A pleasing reddishgold Gem with bright satiny luster, bold details, and premium eye appeal, this piece is certified in a green-label holder. A much more difficult gold commemorative issue at the next grade level, leading many collectors to choose a nice Gem such as this coin. Ex: Atlanta Signature (Heritage, 8/2001), lot 7538. (#7466)

## Antique-Gold 1926 Sesquicentennial Quarter Eagle

6109 1926 Sesquicentennial MS65 NGC. Antique-gold surfaces show tinges of deeper reddish-gold color in some of the device crevices, and subtle yet complete luster adds to the appeal of this Gem. Few signs of contact appear even under a loupe. Among the most elusive of the small-denomination gold commemoratives in high grade. (#7466)

## **MODERN ISSUES**

6110 1996-W Smithsonian Gold Five Dollar MS70 NGC. Ex: US Vault Collection L/M. A technically perfect example of the Uncirculated version of the Smithsonian five dollar. The net mintage was just 9,068 pieces.(#9744)

## MS69 2000-W Library of Congress Ten Scarce Modern Commemorative

6111 2000-W Library of Congress Bimetallic Ten Dollars MS69 PCGS. A mintage of 7,261 pieces makes this issue among the scarcest within the modern commemorative series. The Library of Congress is significant as the sole ringed bimetallic U.S. type, as well as the only commemorative type to contain platinum. The present specimen is pristine and exhibits blended steel-gray and tan toning on the reverse gold ring. (#9784)

#### MODERN BULLION COINS

- 6112 1986 Four-Piece Gold American Eagle Set MS70 NGC. One each of the four gold American Eagle coins, each certified MS70 by NGC, including the one-tenth ounce, quarter-ounce, half-ounce, and one-ounce coins. Each piece is a problem-free and essentially pristine example of these popular pure gold bullion coins, from the first year that the U.S. Mint offered them.(Total: 4 coins)
- 6113 1986-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC. A glowing and essentially pristine example of this one-ounce pure gold bullion coin, introduced by the Mint in this year along with its lesser counterparts.(#9807)
- 6114 1986-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. The gold American Eagle obverse design in the *Guide Book* is still ascribed to Augustus Saint-Gaudens, although we wonder how he would react to the slimmed-down, modernized design. This piece is a pristine, highly contrasted proof example from the first year of the new pure gold issue, with reverse designed by Miley Busiek. (#9807)

## 1995-W Proof Silver American Eagle Part of a 10th Anniversary Set

6115 1995-W Proof Silver Eagle in a 10th Anniversary Set. The fivepiece 10th Anniversary Set of American Eagle proofs, made famous by the low-mintage one-ounce silver coin which is the series key. The 1995-W silver shows elongated milk spots on and to the left of the T in LIBERTY but is effectively as issued otherwise. The four gold coins, tenth-ounce, quarter-ounce, half-ounce, and one ounce, are also present in this set, which is housed in the original government packaging. (Total: 5 coins)

## Government-Packaged 1995-W American Eagle Proof Set Featuring One-Ounce Silver

6116 1995-W Silver Eagle Proof in a 10th Anniversary Set. In addition to the four gleaming gold proofs (in one ounce, halfounce, quarter-ounce, and tenth-ounce sizes), this government-cased set contains the famous one-ounce silver 1995-W American Eagle. That coin shows very minor milk-spotting in the fields but is otherwise effectively as issued. (Total: 5 coins)

## 1995-W Silver American Eagle Proof Part of a Five-Coin Cased Set

- 6117 1995-W Proof Silver American Eagle in a Five-Coin Set. The star attraction is the one-ounce silver proof American Eagle, key to its series, modestly milk-spotted with a narrow strike-through above the obverse stars but solid overall eye appeal. Also comes with the tenth-ounce gold and its quarter-ounce, half-ounce, and one ounce cousins. The set is housed in the government soft-lined hard case and comes with half an outer cardboard box. (Total: 5 coins)
- 6118 1995-W Silver Eagle in a Five-Piece Set. The 10th Anniversary 1995-W American Eagle proof set, which includes the four gold denominations (tenth-ounce, quarter-ounce, half-ounce, and one ounce) in addition to the one ounce silver coin, which is the key to its series. All coins uncertified in the original government packaging, including literature and outer box.(Total: 5 coins)

## PR69 Ultra Cameo 1995-W Silver Eagle Unusual Mint Issue, Series Key

6119 1995-W Silver Eagle PR69 Ultra Cameo NGC. The Mint's unusual release of these "10th anniversary" coins only in sets containing the expensive four-piece Gold American Eagle coins ensured the low mintage, later pegged at 30,125 pieces. As expected of the grade, this piece has blinding silver-white surfaces that appear contact-free and extraordinarily eye-appealing. (#9887)

#### Popular 1995-W Silver Eagle, PR69 Deep Cameo

6120 1995-W Silver Eagle PR69 Deep Cameo PCGS. The key to the American Silver Eagles set, due to the exclusive — and for many collectors, infuriating — way the Mint released the coins. This piece boasts crystal-clear, deep mirrors on surfaces that are silverwhite and pristine throughout. A popular issue that has also ridden the silver wave to some degree. (#9887)

- 6121 1999-W Half-Ounce Gold Eagle PR70 Deep Cameo PCGS. Fabulous black-and-gold contrast between the impeccably mirrored fields and the strongly frosted devices. At an angle, the surfaces take on a butter-yellow cast. Perfectly appealing. Population: 92 in 70 Deep Cameo (3/11).(#9944)
- 6122 2000 Four-Piece Gold American Eagle Set MS70 NGC. One each of the four gold American Eagle coins, each certified MS70 by NGC, including the one-tenth ounce, quarter-ounce, half-ounce, and one-ounce coins, each a splendid and impeccable example. (Total: 4 coins)
- 6123 2000 Four-Piece Gold American Eagle Proof Set PR70 Ultra Cameo NGC. One each of the four gold American Eagle coins, each certified PR70 Ultra Cameo by NGC, including the onetenth ounce, deeply contrasted surfaces; quarter-ounce, startling gold-on-black contrast; half-ounce, pristine and glowing; and one-ounce, a lovely and unimprovable example. The bimillennial dating is a lagniappe. (Total: 4 coins)
- 6124 2003 One-Ounce Gold Eagle MS70 NGC. A virtually perfect specimen, with Saint-Gaudens classic design showing to best advantage on the obverse. Both sides show full definition and matte-like surface quality.(#9968)
- 6125 2006 Three-Piece American Silver Eagle 20th Anniversary Set. The introductory year for the reverse proofs and "burnished Mint State" coins, this set is certified in the NGC Eagle 20th Anniversary holders. Includes: 2006-P reverse proof, PR70 NGC, brilliant reflective devices and silver frosty fields; 2006-W burnished circulation strike, MS70 NGC, problem-free and thickly frosted; and 2006-W regular proof, PR70 Ultra Cameo NGC, splendid and pristine. (Total: 3 coins)
- 6126 2006-W Three-Piece One-Ounce Gold American Eagle Set. Three one-ounce .9999 fine gold coins, issued originally by the U.S. Mint in 2006, the introductory year for the three-piece gold and silver sets that included the novel reverse proof and the "burnished Mint State" coins. This gold set includes three one-ounce gold American Eagle coins, each in the PCGS First Strike holders with the "Eagle-20th Anniversary" notation: regular proof, PR70 Deep Cameo, impeccable and splendidly contrasted; burnished "business strike," MS70, typical fine-grained copper-gold surfaces, a lovely example; and reverse proof, PR70, pristine, fine-grained frosted fields and radiant, highly polished devices as usual, another pristine coin.(Total: 3 coins)
- 6127 Four-Piece 2006-W Platinum Eagle Set MS70 PCGS. The set includes the tenth-ounce \$5, quarter-eagle \$25, half-ounce \$50, and one-ounce \$100. Each coin is immaculate, fully struck, and separately certified in a First Strike holder.(Total: 4
- 6128 Four-Piece 2006-W Platinum Eagle Set MS70 PCGS. The set includes the tenth-ounce \$5, quarter-eagle \$25, half-ounce \$50, and one-ounce \$100. Each coin is separately certified in a First Strike holder. All coins appear flawless and untoned. (Total: 4
- 6129 2007-W Four-Piece American Gold Eagle Set PR70 Deep Cameo PCGS. All coins designated by PCGS as "First Strikes." Includes the tenth-ounce, quarter-ounce, half-ounce, and oneounce sizes.(Total: 4 coins)
- 6130 2007-W One-Ounce Platinum Eagle, First Strike PR70 Deep Cameo PCGS. A technically flawless specimen of the highest-denomination coin produced by the U.S. Mint. John Mercanti obverse with the Executive or "Freedom" one-year reverse. (#149580)

- 6131 Four-Piece 2008-W American Buffalo Set PR70 Ultra Cameo NGC. All four described by NGC as "Early Releases." Includes the tenth-ounce, quarter-ounce, half-ounce, and one ounce sizes. (Total: 4 coins)
- 6132 2008-W One-Ounce Gold Eagle MS70 PCGS. Incredible craftsmanship goes into the production of these beautiful bullion coins. Every nuance of the classic design is fully brought up, and the surfaces are technically flawless.(#393068)
- 6133 2008-W One-Ounce Gold Eagle MS70 PCGS. With fully-struck design elements and flawless golden surfaces, this coin has been deemed perfect by PCGS. Tremendous eye appeal combined with the highest possible technical quality.(#393068)
- 6134 2008-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. A FIRST STRIKE proof example, with incredibly detailed design elements and unmarked reflective surfaces. The frosty texture of the devices provides profound cameo contrast with the glistening fields.(#393077)
- 6135 2008-W One-Ounce Gold Buffalo MS70 PCGS. A technically perfect representative of this one ounce American Buffalo issue, combining James Earl Fraser's classic design with the malleable qualities of a pure gold composition. (#400037)
- 6136 2009 Ultra High Relief Twenty Dollar, First Strike MS70 PCGS. The basined fields of this technically perfect specimen are entirely unmarked, while the classic design elements are fully brought up. The surfaces shine with a prooflike reflectivity, but this specimen is definitely coined in regular-issue format (#407405)

#### COINS OF HAWAII

- 6137 1883 Hawaii Ten Cents MS62 PCGS. Delicate caramel-gold and stone-gray toning encompasses this coruscating and precisely struck Hawaiian dime. The reverse is exceptionally preserved, and the obverse displays only infrequent trivial field marks. Certified in an old green label holder.
  - From The Michael A. Tongg Collection. (#10979)
- 6138 1883 Hawaii Dollar AU58 PCGS. CAC. Light almond-gold and pearl-gray toning embraces this mildly prooflike but momentarily circulated silver dollar. Neither side shows any consequential marks. The scarcest of the circulating 1883 Hawaiian denominations. (#10995)
- 6139 Five-Piece "Aloha Gold" Privately Issued Trial Strike Set. Trial Strike set #50 of ".999 Fine" gold private restrikes, per the custom plastic holder and accompanying documentation. Sizes are one ounce, half-ounce, quarter-ounce, tenth-ounce, and twentiethounce, all of which bear legends stating weight and fineness. Minor spotting on the one ounce obverse, otherwise excellent condition. From The Michael A. Tongg Collection. (Total: 5 pieces)

## **HOBO NICKELS**

6140 Pair of Hobo Nickels. Indian Portrait. Believed to be a "Bo" carving. It certainly resembles his pre-1957 style. Superior workmanship, especially on the headdress. VF host coin. Deep cherry-red patina. Rabbi Portrait. The hair and beard are punched into the coin to good effect. Above Average quality. VF 1936-S host coin. Golden-brown patina.

From The Dr. Donald M. Gilner Collection. (Total: 2 items) (#10995)

#### **ERRORS**

## Unusual 1943 Cent on a Dime Planchet VG Details

6141 1943 Lincoln Cent — Struck on a Dime Planchet, Altered Surface — NCS. VG Details. 2.5 gm. Certainly an unusual error, this is a well-worn 1943 Lincoln cent with a gray appearance of bright silver rather than the dullness of steel. The surface texture is "off" due to an unknown alteration and the wear-striking patterns are radically uneven, but this is an error that offers plenty of intrigue.

## Superb Gem '11 Cents' Error 1965 Cent on a 1965 Dime

6142 1965 Lincoln Cent — Struck on a 1965 Dime — MS67 NGC. First in an impressive series of similar double-denomination Lincoln cent-Roosevelt dime errors that form something remarkably close to a date set from 1965. On the obverse of the cent, oak leaves from the dime reverse cover Lincoln's shoulder like an epaulet, and impressions from Roosevelt's portrait are noted above and below the Lincoln Memorial.

## Gem Double-Denomination 1966 Cent Struck on a 1966 Dime

6143 1966 Lincoln Cent — Struck on a 1966 Dime — MS65 NGC. All four digits of the Roosevelt dime's date are upside-down and mashed but readable in the field to the left of Lincoln's head. On the reverse, a torch-top and laurel leaves seem to descend the steps of the Lincoln Memorial. A hint of peach toning graces impressively lustrous surfaces.

## '11 Cents' 1967 Cent Error On a 1967 Dime, MS68

1967 Lincoln Cent — Struck on a 1967 Dime — MS68 NGC. If the bright nickel color on this Lincoln cent were not enough to convince the viewer that this error is something special, perhaps the laurel leaves that seem to crown Lincoln's head or the curves of the Roosevelt portrait engulfing the reverse memorial would be enough. An impressively preserved and desirable "11 cents" error.

#### 1968 Cent Error on a 1968 Dime, MS64

6145 1968 Lincoln Cent — Struck on a 1968 Dime — MS64 NGC. Green-gold and orange toning is more prominent on the reverse, where Roosevelt's eye is embedded in the top of the Lincoln Memorial. On the obverse, a torch-flame and oak leaves overlap Lincoln's head, an eye-catching arrangement of the kind only found on dual-denomination errors.

#### Select 1972 Cent Struck on a 1972 Dime

6146 1972 Lincoln Cent — Struck on a 1972 Dime — MS63 NGC. A sharp impression of the Lincoln cent overtype has eliminated most traces of the dime design, though most of the letters in ONE DIME are visible along the lower part of Lincoln's portrait and a partial Roosevelt impression dips into STATES OF AMERICA and ONE CENT. Lightly abraded but impressively lustrous.

#### 1973 Cent on a 1973 Dime, MS66

6147 1973 Lincoln Cent — Struck on a 1973 Dime — MS66 NGC. Distinct golden-apricot patina enriches the eye appeal of this error, which was already impressive thanks to the jumble of designs on each side. The portraits of Lincoln and Roosevelt tangle on the obverse, where the dime's date is actually clearer than that of the cent, and the placement of the torch on the Lincoln Memorial makes it look as if the roof is on fire.

## 1974 Cent on a Dime of the Same Date Popular Dual-Denomination Error, MS64

6148 1974 Lincoln Cent — Struck on a 1974 Dime — MS64 NGC. The obverse has a clear Roosevelt outline nearly encircling Lincoln's portrait. The reverse is more ambiguous, though fragments of leaves and letters are visible in the gap above the Lincoln Memorial. Light gold and peach toning settles over immensely lustrous, minimally abraded surfaces.

## Remarkable 1975 Cent-on-Dime '11 Cents' Error, MS66

6149 1975 Lincoln Cent — Struck on a 1975 Dime — MS66 NGC. Rich peach, rose, violet, and blue hues sweep the copper-nickel surfaces of this dime which was later fed into a cent press and overstruck. The back of Roosevelt's head arcs up and around Lincoln's portrait, and the later president's nose and mouth appear on his predecessor's shoulder.

## 1976 Cent Struck on a 1976 Dime Two Clear Dates, MS66

6150 1976 Lincoln Cent — Struck on a 1976 Dime — MS66 NGC. Matched obverse to obverse with the dime undertype rotated about 90 degrees counterclockwise relative to the cent. Sharply struck with strong luster under apricot toning and a pair of entirely readable dates, an all-too-rare occurrence that should please error collectors seeking a great dual-denomination example.

## Superb Gem 1977 Cent Error Struck on a 1977 Dime

6151 1977 Lincoln Cent — Struck on a 1977 Dime — MS67 NGC. NGC puts both dates in parentheses, but both are visible and take only a moderate level of thought to puzzle out. The obverse of the cent was struck over the dime's reverse, and oak leaves appear within Lincoln's hair while laurel drapes his shoulders like a shawl. Well-defined, carefully preserved, and satiny.

## 1978 '11 Cents' Cent on Dime Error, MS62 Two Close, Readable Dates

6152 1978 Lincoln Cent — Struck on a 1978 Dime — MS62 PCGS. Particularly pleasing as far as dual-denomination or "11 cents" errors go, since the two dates are both entirely readable and practically on top of one another. The undertype is especially prominent on the mutual obverse, where Roosevelt's underlying head has an unbroken outline. Strong gold-orange toning covers glossy surfaces.

## Dual-Denomination Error, MS67 1979 Cent on Dime of Same Date

6153 1979 Lincoln Cent — Struck on a 1979 Dime — MS67 NGC. The reverse of the dime matches up to the obverse of the cent and vice versa on this dual-denomination error. The minimally toned obverse has overlap between oak leaves and hair along with jacket-folds and laurel, while the reverse has the Lincoln Memorial contained almost entirely within the enormous outline of Roosevelt's head.

## 1980 Cent Struck on a 1980-P Dime '11 Cents,' MS66

6154 1980 Lincoln Cent — Struck on a 1980-P Dime — MS66 PCGS. Light green-gold and peach toning graces smooth and pleasingly preserved surfaces. On the obverse, the cent's date is missing the last digit, though the dime's date (and mintmark, then a novelty) are squashed but readable. An unusual textured pattern through parts of the obverse suggests another possible layer in creating this error.

## MS66 Dual-Denomination Error 1981 Cent on a 1981-P Dime

6155 1981 Lincoln Cent — Struck on a 1981-P Dime — MS66 PCGS. Whether due to a strong undertype or a weak cent striking, this dual-denomination error is a mass of glorious confusion. The laurel branch of the dime covers Lincoln's eyes, while flame and oak overlap much of the jacket. The reverse is a similarly jumbled affair, though the date on the dime undertype is plain here.

## Select 1981-D '11 Cents' Error Same Date on Cent and Dime

6156 1981-D Lincoln Cent — Struck on a 1981-D Dime — MS63 NGC. An unusual branch mint dual-denomination error; by far the majority of such pieces, at least those which can be identified by date, come from Philadelphia. The cent's date and mintmark are bold, while those of the dime are flattened and upside-down but readable just above the word LIBERTY.

## 1982 Large Date Cent on a 1982-P Dime MS66 Example of the '11 Cents' Error

6157 1982 Large Date Lincoln Cent — Struck on a 1982-P Dime — MS66 NGC. Brass planchet or copper-plated zinc? This Large Date example takes a third option, and a 1982-P dime (mintmark and 82 in date visible in the area of the cent's date) is the planchet on this "11 cents" error. Dramatic overlap between portraits and reverse devices is key to the appeal.

## Superb Gem Dual-Denomination Error 1983 Cent on a 1983-P Dime

6158 1983 Lincoln Cent — Struck on a 1983-P Dime — MS67 NGC. The cent date is clear enough, though pinpointing the date of the dime takes a bit more creativity. The "P" mintmark is plain, though, embedded in the top right part of Lincoln's hair. On the reverse, leaves appear above and below the Lincoln Memorial, the clearest evidence of the undertype on that side.

## MS68 1984 '11 Cents Error' 1984-P Dime Undertype

6159 1984 Lincoln Cent — Struck on a 1984-P Dime — MS68 NGC. The dime's date, embedded in the front half of the word AMERICA from the reverse of the cent, is far clearer than the cent's date, which is obscured by a torch-top and the words STATES OF. Sharply struck and exquisitely preserved with minimally toned surfaces that shift between satin and reflectivity.

## Superb Gem 1985 Cent on a 1985-P Dime

6160 1985 Lincoln Cent — Struck on a 1985-P Dime — MS67 NGC. Both dates are readily readable, if flattened in places, with the dime's date entrenched in the folds on the left side of Lincoln's jacket. Bright nickel luster shows areas of satin and traces of peach patina, both attractive. A great Superb Gem example of the "11 cents" error.

## 1986 Cent on a 1986-P Dime, MS66 The Popular '11 Cents' Error

6161 1986 Lincoln Cent — Struck on a 1986-P Dime — MS66 NGC. The final digit in the dime date is nearly lost in a fold of Lincoln's jacket, though with great discernment the left curve of a 6 appears. Roosevelt's upper profile is far more obvious, and his brow and nose appear to provide an artificial "top" for Lincoln's head. A pleasingly preserved "11 cents" coin.

## 1987 Lincoln Cent, MS67 Struck on a 1987-P Roosevelt Dime

6162 1987 Lincoln Cent — Struck on a 1987-P Roosevelt Dime — MS67 NGC. Roosevelt is nearly perfectly inverted on the obverse of this double denomination piece. The date and mintmark from the dime are visible beneath IN on the cent design. A splendid Superb Gem with frosty mint brilliance.

## 1988 Lincoln Cent, MS64 Struck on a 1988-P Roosevelt Dime

6163 1988 Lincoln Cent — Struck on a 1988-P Roosevelt Dime — MS64 NGC. This example has the top of Roosevelt's head positioned at about 7 o'clock on the obverse of the Lincoln design, with the date and mintmark from the dime visible at the top of Lincoln's head, below D WE. This attractive Choice Mint State piece has brilliant and untoned surfaces.

## 1989 Cent on a 1989-P Dime, MS67 Popular Double Denomination Error

6164 1989 Lincoln Cent — Struck on a 1989-P Dime — MS67 NGC.

Three of the four digits in the cent date are sharp, including the final 9. The dime date and mintmark are clear, and located near Frank Gasparro's initials. Roosevelt gazes southwest relative to the Lincoln Memorial. Brilliant and lustrous with pristine preservation.

## MS67 1990 Cent on a 1990-P Dime Desirable Double Denomination Error

6165 1990 Lincoln Cent — Struck on a 1990-P Dime — MS67 NGC. The cent date is sharp, and the upper portions of the dime mintmark and 199 are evident. Roosevelt is nearly inverted relative to the Civil War President. Light tan-gray toning graces this lustrous Superb Gem. A minute aqua speck is noted on Lincoln's yest.

## Gem 1991 Cent Over a 1991-P Dime Scarce '11 Cent' Piece

6166 1991 Lincoln Cent — Struck on a 1991-P Dime — MS65 NGC. This lustrous Gem has a sharp cent date, and the dime mintmark is clear. The dime date is faint, but the first three digits are readily identifiable when viewed beneath a lens. Roosevelt faces south in relation to the Memorial, and the left olive branch is bold and horizontally placed across the portrait of Lincoln.

## 1992-D Cent Struck Over a 1992-D Dime MS66, Double Denomination Error

6167 1992-D Lincoln Cent — Struck on a 1992-D Dime — MS66 NGC. Roosevelt faces due north, with his profile just above Lincoln's ear. The cent mintmark and date are sharp except for the tail of the 2. The dime mintmark is bold, and rests on Lincoln's shoulder. The dime date is mostly effaced. A high grade and lightly toned example of this challenging yet collectible mint error category. (#3099)

## 1993 Cent Struck on a 1993-P Dime Clear Dime Date, MS66

6168 1993 Lincoln Cent — Struck on a 1993-P Dime — MS66 NGC. A satiny mint error with light caramel-gold patina. The cent date is bold save for the tail of the second 9. All four digits of the dime date are readable, as is the Philadelphia mintmark, near ONE on the reverse. Roosevelt faces northwest, although only a partial outline of his portrait remains.

## Gem 1994 Cent Struck on a 1994-P Dime Bold Underlying Types

6169 1994 Lincoln Cent — Struck on a 1994-P Dime — MS65 NGC. The 994 in the cent date is sharp, as is the dime mintmark and 199 in the date. The 4 in the dime date is faint yet distinct. Roosevelt's portrait has unusual remaining detail, with a clear profile located just above the Lincoln Memorial. Minimally toned, lustrous, and unabraded.

## 1995 Cent Overstruck on a 1995-P Dime Sharp Dime Date and Mintmark, MS62

6170 1995 Lincoln Cent —Struck on a 1995-P Dime — MS62 NGC. Traces of tan toning visit lustrous, unmarked surfaces. The dime date and mintmark are clear to bold due to their location on the higher relief of Lincoln's vest. The cent date is sharp except for the first 9. Roosevelt faces northwest in relation to the portrait of Lincoln.

## 1996 Cent Struck on a 1996 Dime The Popular '11 Cents,' MS64

6171 1996 Lincoln Cent — Struck on a 1996-P Dime — MS64 NGC. Though a variety of "11 cents" errors are on offer in this auction, few have the absolute clarity of undertype seen on this 1996 cent-1996 dime example's reverse, where Roosevelt's portrait has not only an outline but a measure of hair detail. Light gold-peach patina settles over lustrous surfaces.

## 1996 Cent Struck Over a 1996-P Dime MS66 '11 Cent' Piece

6172 1996 Lincoln Cent — Struck on a 1996-P Dime — MS66 NGC. This brilliant and lustrous double denomination error has pristine preservation and excellent eye appeal. The mintmark and both dates are clear, aside from the tails of the 9s in the dime date. Roosevelt gazes southwest relative to Lincoln, with Roosevelt's ear over Lincoln's cheek.

## Premium Gem 1997 Lincoln Cent Struck on a 1997-P Dime

6173 1997 Lincoln Cent — Struck on a 1997-P Dime — MS66 NGC. Just off the overlapping tangle of portraits created by the juxtaposition of Lincoln and Roosevelt, the dates of both the cent and dime are visible (the last digit of the latter just barely) and the dime's mintmark is bold. A brightly lustrous Premium Gem dual-denomination error with green-gold elements at the borders.

## 1998 Cent on a 1998-P Dime Dual-Denomination Error, MS67

6174 1998 Lincoln Cent — Struck on a 1998-P Dime — MS67 NGC. The holder mistakenly calls the undertype a "1988-P" dime, but close inspection of the dime's date (visible in and around the letters NT in CENT on the cent's reverse) reveals a clear second 9 in the middle of the date. This frosty Superb Gem is minimally toned and a carefully preserved example of the popular "11 cents" error.

## 1998-D Lincoln Cent, MS67 Struck on a 1998-D Roosevelt Dime

6175 1998-D Lincoln Cent — Struck on a 1998-D Roosevelt Dime — MS67 NGC. Roosevelt's head is inverted relative to Lincoln's bust, with the date and mintmark from the Roosevelt striking visible at the upper left part of Lincoln's head. Double denomination "11-cent pieces" from the Denver Mint are infrequently encountered.

## 1999 Lincoln Cent, MS67 Struck on a 1999-P Roosevelt Dime

6176 1999 Lincoln Cent — Struck on a 1999-P Roosevelt Dime — MS67 NGC. The obverse on obverse image is cross-wise with the date and mintmark from the Roosevelt dime located just above 3 o'clock on the Lincoln cent. This Superb Gem is highly attractive with brilliant, untoned nickel-gray surfaces.

## 2000 Lincoln Cent, MS62 Struck on a 2000-P Roosevelt Dime

6177 2000 Lincoln Cent — Struck on a 2000-P Roosevelt Dime — MS62 NGC. The impression of Roosevelt is tilted to the right in relation to the Lincoln Memorial on this lustrous double denomination piece. The date and mintmark from the dime is visible at CE of the denomination on the reverse of the Lincoln cent. Both sides are brilliant and untoned.

## 2001 Cent on a 2001-P Dime, MS66 Double Denomination '11 Cent Piece'

6178 2001 Lincoln Cent — Double Denomination on Struck Dime — MS66 PCGS. The cent date is bold. The dime date and mintmark (2001-P) are faint but readable near GOD. Roosevelt gazes east relative to the portrait of Lincoln. Lustrous and unabraded with light tan and steel-gray toning.

## 2001-D Lincoln Cent, MS65 Struck on a 2001-D Roosevelt Dime

6179 2001-D Lincoln Cent — Struck on a 2001-D Roosevelt Dime — MS65 ANACS. Roosevelt's head is inverted relative to the Lincoln Memorial. The Denver mintmark from the dime is present near the N in UNITED, and much of the dime date is also visible. A popular double denomination combination.

## 2002 Cent Struck over a Dime, MS67 One of Two Known

6180 2002 Lincoln Cent — Struck on a Struck Dime — MS67 NGC.

One of just two 2002 cent errors known to have been struck over a dime, this is a Superb Gem flipover double denomination with light impressions of foliage around Lincoln's portrait. The reverse has a bold undertype of Roosevelt's portrait, though the dime's date area is obscured. Gold-to-tan toning graces the margins, while the interiors are light gray.

## MS66 2003 Cent on a Struck Dime Believed to Be Unique

6181 2003 Lincoln Cent — Double Denomination on a Dime — MS66 PCGS. At least one noted error expert considers the 2003 issue to be unique as an error struck over a dime. This is the singular coin, lightly toned olive-gold overall and softly lustrous. The overstriking was obverse-to-obverse so that Roosevelt's head frames Lincoln's portrait and leaves appear around the Lincoln Memorial.

# 2005 Cent on a 2005-P Dime MS68, Considered Unique

6182 2005 Lincoln Cent — Struck on a 2005-P Dime — MS68 NGC. This unique 2005 cent struck over a dime has a singularly striking appearance that sums up the appeal of double-denomination errors. The Lincoln cent obverse has the words ONE DIME arcing up and to the right from 6 o'clock to 3 o'clock, while the reverse has a bold impression of Roosevelt's head framing the Lincoln Memorial. Luster is frosty and bright in turns, and there is a touch of peach patina.

#### Uncentered Broadstrike on an AU53 1887-S Seated Dime

6183 1887-S Seated Dime — Uncentered Broadstrike — AU53 PCGS. A broad band of unstruck surface is widest at 1 o'clock. All design details are present, which precludes an off center error. The collar die was presumably blocked, and that allowed expansion of the coin during its strike. Satiny, well defined, and unabraded with gunmetal-gray and forest-green toning.

## AU58 1964-D Washington Quarter Error Double-Struck on a Nickel Planchet

6184 1964-D Washington Quarter — Double-Struck on a Nickel Planchet — AU58 NGC. 4.9 gm. An intriguing, barely rubbed "compound error." Not only was this 1964-D Washington quarter struck on a nickel planchet by mistake, the prominent distortion on certain peripheral elements indicates that the piece was actually struck twice in-collar. A simply fascinating piece.

#### Very Rare 90% Silver 1965 Quarter, XF45

6185 1965 Washington Quarter -Struck on a Silver Quarter Planchet-XF45 PCGS. Breen-4416. Breen called this error variety "extremely rare." A transitional planchet error, similar to the 1943 copper Cent or the 1977-D Ikes struck on silver-clad planchets. Silver quarters dated 1964 and clad quarters dated 1965 were both struck during 1965, and inevitably, a 90% silver planchet apparently lodged within a bin that was later filled with clad planchets destined for 1965-dated dies. This piece circulated for a while before a sharpeyed collector noted that the edge did not reveal any clad layers. Ex: FUN Signature (Heritage, 1/2004), lot 9789, which realized \$5,750.

## 1965 Washington Quarter, AU50 Details Struck on a 90% Silver Planchet

6186 1965 Washington Quarter—Struck on 90% Silver Blank—Cleaned ANACS AU50 Details. 6.24 grams, the proper weight for a silver quarter. The Mint continued striking silver quarters in 1965 but they were all supposed to carry the 1964 date. Examples on silver blanks dated 1965 are rare. This piece has been cleaned with bright silver surfaces and a polished appearance. (#5878)

## MS63 1976 Bicentennial Quarter Struck Through Dime Planchet

6187 1976 Bicentennial Quarter — Struck Through Dime Planchet — MS63 PCGS. A dime and quarter planchet were simultaneously fed between quarter dies, with the dime flan between the quarter flan and the reverse die. The dime planchet was struck into the reverse of the quarter, overlapping the drummer but retaining most of UNITED STATES OF AMERICA. The dime flan was just thin enough that a "ghost" of the drummer is present. Presumably, a uniface dime exists somewhere that displays a partial Bicentennial quarter reverse design, but it is not included with this lot.

## 1951 Franklin Half on a Quarter Flan MS63 Full Bell Lines

6188 1951 Franklin Half Dollar — Struck on a Quarter Blank — MS63 Full Bell Lines NGC. 6.3 gm. The Liberty Bell and all but the top of Franklin's head are present. The date is full, and most of IN GOD WE TRUST and much of UNITED STATES OF AMERICA are intact. Nearly all of HALF DOLLAR is off the flan. Lustrous and mark-free with a crescent of peripheral russet and violet toning on each side. The right obverse has an interesting wire-like strike-through, as made.

## 1956 Half Dollar Struck on a Quarter Planchet, MS64

6189 1956 Franklin Half Dollar — Struck on a Quarter Planchet — MS64 NGC. 6.14 gm. Franklin and the Liberty Bell are virtually perfectly centered and are fully intact. The date is also complete, as is the eagle and E PLURIBUS UNUM. All peripheral legends are partly absent. This lustrous and well preserved near-Gem displays medium golden-tan and olive toning.

## 1958-D Franklin Half on a Quarter Planchet MS64 Full Bell Lines

6190 1958-D Franklin Half — Struck on a Quarter Planchet — MS64 Full Bell Lines NGC. 6.25 gm. Uncentered toward 2:30, although most of the date, portrait, and Liberty Bell are present. The right-side peripheral letters are largely off the flan. Light chestnut and cream-gray toning enriches this smooth and coruscating near-Gem. A scarce type for such a spectacular mint error.

## 1960 Franklin Half Dollar, MS64 Struck on a Quarter Planchet

6191 1960 Franklin Half Dollar — Struck on a Quarter Planchet — MS64 NGC. 6.25 Grams. Nicely centered on the smaller quarter planchet with all of Franklin's bust visible save for the extreme top of the head. The Liberty Bell is also complete, along with the date. A brilliant Choice Mint State piece with frosty silver luster and wisps of toning.

## 1962-D Franklin Half Dollar, MS64 Struck on a Quarter Planchet

6192 1962-D Franklin Half Dollar — Struck on a Quarter Planchet — MS64 NGC. 6.3 Grams. This fully brilliant piece is nicely centered with nearly all of Franklin's bust visible, along with a full date, bell, and mintmark. The surfaces are brilliant and untoned with satiny silver luster.

## Uniface Obverse, Reverse Die Cap 1964 Kennedy Half, MS63

6193 1964 Kennedy Half Dollar — Reverse Die Cap, Uniface Obverse — MS63 PCGS. Type Two Reverse. This half dollar likely had a normal first strike, but failed to eject from the dies. A second half dollar flan, not included, was then fed in between the obverse die and the present coin. The next strike forced the present coin to partly wrap around the reverse die, and largely effaced the obverse impression from the first strike. The absence of a mintmark by the branch stem, combined with the 90% silver alloy, indicates the issue is a 1964. Short scratches on the nearly featureless obverse flatten the opposite area beneath the eagle's left (facing) wingtip.

## Undated Off Center O-Mint Morgan Dollar Love Token Engraved PET

6194 Undated Morgan Dollar Love Token—Struck 35% Off Center—AU Details Uncertified. Struck about 35% off-center at 6 o'clock, with no visible date but a clearly visible O mintmark for New Orleans. A faint diagonal die line is visible at the upper part of the upright of the T in LIBERTY, which may actually allow an avid Morgan dollar die variety collector to identify the date of this piece. Off-center Morgan dollars are rarely encountered, and are usually only slightly off center when they are located. Those that are 35% off center as here are extremely rare.

This piece has considerable detail and has been cleaned, although it carries a natural dark gray patina with splashes of light blue toning. The letters PET appear in the unstruck portion of the obverse, with an antique pin attached to the reverse. Numismatic students will undoubtedly greet this coin with mixed emotions of sadness and amazement.

## 45% Off Center 1978 Ike Dollar, MS65

6195 1978 Eisenhower Dollar — Struck 45% Off Center — MS65 PCGS. Widely off center toward 12:30. The date and mintmark area are present, while LIBERTY, ONE DOLLAR, and the lunar surface are absent. Medium amber-gold enriches lustrous mark-free surfaces. The ideal off center error on a much better modern type.

#### MS61 1979-D SBA Dollar on a Quarter Planchet

6196 1979-D Anthony Dollar — Struck on a Quarter Planchet — MS61 PCGS. It is well known that the public had difficulty telling Susan B. Anthony dollars and quarters apart, and errors such as the present piece, an SBA dollar on a quarter planchet, suggest that the Mint may have had similar issues. Warmly toned gold-orange with the 11-sided inner rim weak or nonexistent on each side.

#### MS64 1999-P SBA Dollar on Quarter Planchet

6197 1999-P Anthony Dollar — Struck on a Quarter Planchet — MS64 PCGS. A subtle error unless one knows where to look, but on close inspection it is clear that this Susan B. Anthony dollar was struck on a slightly smaller quarter planchet, as parts of the 11-sided inner rim are missing. Lightly gold-toned with soft, warm luster and just a few scattered abrasions.

#### MEDALS AND TOKENS

6198 Four 1896 Bryan Dollars. The lot includes: Zerbe-60, white metal, cleaned, minor corrosion, lamination on upper left obverse field, graffiti on reverse indicates Leslie Hause was a former owner; Zerbe-70, white metal with dark gray verdigris; Zerbe-80, white metal, small hole inside rim at 12 o'clock, light peripheral scratches, pinscratch on cheek; and a Zerbe-94, white metal, smooth edge, porous fields and polished devices.(Total: 4 medals)

#### **GSA DOLLARS**

## Select Mint State 1879-CC Dollar Band-Certified in GSA Holder

6199 1879-CC MS63 NGC. Faintly gold-toned at the margins with strong and pleasing luster in both the fields and on the lightly frosted devices. Lightly abraded with several scrapes but a well struck and generally pleasing coin. Band-certified in the black GSA holder of issue along with vintage information sheet and box (the two halves separated). (#7086)

## Select 1879-CC Morgan Dollar Housed in GSA Holder

6200 1879-CC MS63 NGC. Lightly gold-toned at the margins with the color more prominent on the reverse. The luster is strong, though Liberty's portrait shows a number of light horizontal abrasions. Band-certified in the GSA holder of issue with outer box and information card but no certificate of authenticity. (#7086)

## 1879-CC Morgan Dollar, MS63 GSA Black Holder

- 6201 1879-CC GSA Hoard MS63 NGC. The popular and elusive 1879-CC Morgan dollar, offered here as a Select GSA example. Frosted devices and cartwheel-lustered fields are veiled in a heavy layer of medium-gray patina. Two scrapes at the base of the eagle's body contribute to the grade. Band-certified in the black GSA holder of issue, but does not come with a box or certificate. (#7086)
- 6202 1880-CC 8 Over Low 7 MS65 NGC. CAC. VAM-6. A Top 100 Variety. The overdate and VAM are undesignated on the NGC band. A faint golden overtone visits the light gray obverse, while the reverse has bold yellow-green, peach, and cyan-to-blue toning in a crescent at bottom and right. Band-certified in the black GSA holder with no box or other items included.(#7104)
- 6203 1880-CC Reverse of 1878 MS64 NGC. VAM-4. A Top 100 Variety. The popular overdated variant, seen here as a near-Gem with considerable frosty luster under light cream patina. Bandcertified in the black GSA holder with box but no certificate. (#7108)
- 6204 1883-CC MS66 Prooflike NGC. Moderately reflective and strongly contrasted, a well-preserved Premium Gem from this popular Carson City issue with a faint gold-gray aura overall and a splash of reddish toning at the right reverse. Band-certified in the black GSA holder of issue with box and numbered certificate. (#7145)
- **6205 1885-CC MS65 NGC.** This impressively preserved GSA Gem has strong silver luster that is frostier on the obverse. Band-certified in the holder of issue with outer box and certificate number 85118292. (#7160)
- 6206 1885-CC MS66 NGC. CAC. Bright, swirling luster with minimal patina aside from delicate layers of white-gray. Band-certified in the black GSA holder, no other documents or ephemera included. (#7160)
- 6207 1885-CC MS66 NGC. CAC. Amply frosted surfaces are silverwhite on this 1885-CC dollar, an issue known almost exclusively by its GSA survivorship. Band-certified in the black GSA holder, coin only (no box or certificate).(#7160)
- 6208 1890-CC MS62 NGC. Moderately abraded but with strong silver luster that shows hints of gold and rose. Band-certified in the black GSA holder of issue with box and certificate (number 90001349). (#7198)
- 6209 1891-CC MS62 NGC. Moderately marked on the obverse with a dig behind Liberty's head. The lustrous and faintly gold-tinged reverse has fewer abrasions but does show a scrape near the let wingtip. Band-certified in the black GSA holder with box and certificate (serial number 91000538).(#7206)
- **6210 1891-CC MS63 NGC.** An attractive Select example that is minimally toned with few serious abrasions. Band-certified in the black GSA hard-case with box and certificate number 91003976. (#7206)

#### **MISCELLANEOUS**

- 6211 "Proposed Motto" Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. Reverse with motto rendered as OUR TRUST IS IN GOD, a design sketched by Longacre but not executed until this private 2007 issue. NGC-certified as an "Ultra Cameo Gem Proof." Comes with hard-cover case, outer box, and certificate noting this item as #362 of 600.
- 6212 "Proposed Motto" Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. A private striking of a one-ounce gold object based on a James B. Longacre sketch of a reverse bearing the motto "Our Trust Is in God." Comes with paperwork and hard case.
- 6213 "Proposed Motto" 2007 Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. A private striking from 2007, one ounce pure gold, based on a James B. Longacre sketch of a reverse bearing the motto "Our Trust Is in God." Comes with documents and display case.
- 6214 "Proposed Motto" Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. The Longacre sketch with motto OUR TRUST IS IN GOD was the inspiration for this one-ounce private gold striking in 2007. Comes with documents and hardcover display case.
- 6215 "Proposed Motto" 2007 Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. Privately struck in 2007, this one-ounce gold round (claimed ".999 gold" and an "Ultra Cameo Gem Proof" by the holder) takes its inspiration from a never-produced James B. Longacre sketch of a reverse with motto OUR TRUST IS IN GOD. Comes with hard case and paperwork.
- 6216 Private Issue "1876 \$100 Gold Union" Ultra Cameo Gem Proof NGC. One ounce of 999 Fine gold. Struck by the private New York Mint in 2007. The designs are based on sketches by Mint engraver George T. Morgan for a proposed \$100 gold coin. Immaculate with flashy fields and luminous devices. Accompanied by a hard-cover case
- 6217 "Union" Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. A George T. Morgan sketch for a \$100 gold coin is the subject of this 2006 private striking, made with one ounce of pure gold. Comes with documentation and hard case.
- 6218 "Union" Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. A private issue of 2006, struck in one ounce of pure gold, themed around a George T. Morgan sketch for a "gold union" or \$100 coin. Comes with hard case and paperwork.
- 6219 "Union" Private One-Ounce Gold Issue Ultra Cameo Gem Proof NGC. Designed by George T. Morgan in 1876, and privately struck 2005 with one ounce of gold. Described by NGC as an "Ultra Cameo Gem Proof." Comes with papers and display case.

#### **PATTERNS**

## 1838 Half Dollar Pattern, PR62 Judd-72, Pollock-75

6220 1838 Half Dollar, Judd-72, Pollock-75, R.5, PR62 NGC. CAC. One of many half dollar patterns struck in 1838, as the Mint began its search for a new design that eventually culminated in Gobrecht's immortal Seated Liberty motif. The present coin features a regal head of Liberty facing left, with stars and the date on the obverse. The reverse portrays the eagle with arrows and olive branch in the center, with the legend and denomination around. Struck in silver, with a reeded edge. This specimen is sharply detailed, with traces of green and lavender toning on the reflective surfaces. Census: 1 in 62, 14 finer (3/11). (#11282)

## Choice Proof Judd-125 Original 1850 Three Cent Silver

6221 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR64 PCGS. CAC. The design for this three cent silver is similar to the famous Judd-67 gold dollar pattern from 1836, but the date has been moved to the obverse below the cap, and the denomination within the palm frond is expressed with a large Roman numeral III. Struck in silver with a plain edge. This popular design was executed by Franklin Peale from designs by James Longacre. Fully struck except for the E in LIBERTY, and attractively toned with a golden-gray obverse and a cobalt-blue and lavender reverse. Population: 10 in 64, 1 finer (3/11). (#11536)

## 1854 Judd-160, Pollock-187 Cent, PR64 Brown Popular With Large Cent Collectors

6222 1854 One Cent, Judd-160, Pollock-187, R.4, PR64 Brown NGC. The obverse shows Liberty with a Braided Hair design and the date below, all in a plain field. The reverse has a small laurel wreath around the denomination ONE CENT with the exterior legend UNITED STATES OF AMERICA. Struck in copper with a plain edge. The moderately reflective brown surfaces show an accent of faint blue around the devices. An interesting, long oval-shaped strike-through is seen on the left part of Liberty's face and into the left field, possibly the outline of a thread that fell on the die at the time of striking.

Ex: Stack's Sale #26 (2/1939), lot 47, where it brought \$4.50. (#11659)

## 1854 Judd-161, Pollock-187 Cent, PR58 Reduced-Diameter Large Cent

6223 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR58 PCGS. Reduced-size large cent with the obverse showing the head of Liberty wearing a diadem inscribed LIBERTY, while the reverse depicts ONE CENT in a small laurel wreath. Struck in bronze with plain edge. Streaky woodgrain light and medium brown toning embraces this specimen, which exhibits slight friction on the leaves and a few faint obverse handling marks, including an inconspicuous pinscratch on the forehead. (#11663)

## PR64 Brown 1855 Flying Eagle Cent Judd-167 Original

6224 1855 Flying Eagle Cent, Judd-167 Original, Pollock-193, R.5, PR64 Brown PCGS. CAC. A flying eagle and stars dominate the obverse, while the reverse is similar to the contemporary large cent. The diameter is midway between a large and small cent. Struck in copper with a plain edge. A virtually fully struck Choice proof with undisturbed chocolate-brown mirrored fields that display rich powder-blue, golden-brown, and ruby-red undertones. (#11709)

#### 1855 Flying Eagle Cent Pattern, Proof, Judd-168 Original

6225 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4 — Genuine PCGS — Proof. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen this corroded and has been cleaned. Thirteen stars surround an eagle that is flying slightly upward, a variation of the adopted flying eagle design for the Gobrecht dollars (and soon the Flying Eagle cents). The reverse design is similar to the issued large cent. The diameter is intermediate between the large cents struck for commerce in 1855 and the small cents that were first produced in 1856. Struck in bronze with a plain edge. The surfaces of this piece have received some rough treatment with the cleaning and corrosion. Both sides are bright from cleaning and the design elements are slightly soft. (#11720)

# 1855 Flying Eagle Cent Pattern, PR61 Judd-170a, 86% Copper, 14% Nickel

6226 1855 Flying Eagle Cent, Judd-170a, Pollock-196, Low R.7, PR61 PCGS. 111.9 grains. A turkey-necked eagle flies west, while the reverse has a design similar to the contemporary large cent. Struck in copper-nickel with a plain edge. This example consists of 86% copper and 14% nickel, according to PCGS. An elusive pattern whose actual rarity is inconclusive because the design was struck in many different but similar compositions. Mirrored light tan surfaces host iridescent toning on each side. Somewhat ill-defined due to the composition, with clash marks evident on each side. A few small marks are expected. (#11732)

## Attractive PR63 1858 Indian Cent Scarce Judd-211 Dies

6227 1858 Indian Cent, Judd-211, Pollock-262, Snow-PT26, R.4, PR63 PCGS. The obverse is similar to the issued Indian cent, but is dated 1858. The reverse is similar to the issued 1860 cent reverse, except there is no shield between the ends of the laurel wreath. The broad bust point Pollock variant. Olive-green and peach toning enriches well struck and unabraded specimen. Certified in an old green label holder. Population: 17 in 63, 29 finer (3/11). (#1893)

# 1858 Cent in Copper-Nickel Centered Date Judd-211, PR64

6228 1858 Indian Cent, Judd-211, Pollock-255, 262, R.4, PR64 PCGS. The regular-issue Indian Head obverse is here combined with the Laurel Wreath reverse. Struck in copper-nickel with a plain edge. Two date variants exist, one a Centered Date and the other a Low Date. This is the more frequently seen Centered Date. Each side has a layer of light even rose patina, but the underlying honey-gold of the copper-nickel alloy is abundantly evident. The fields are moderately reflective and the piece overall seems conservatively graded. (#11893)

## 1859 Judd-235, Pollock-282 Half Dollar, XF Details Perfect Ribbon Subvariety

6229 1859 Half Dollar, Judd-235, Pollock-282, R.6 — Improperly Cleaned — NGC Details. Proof, XF. Anthony Paquet's design for the Seated Liberty series, here in the half dollar format. Liberty is seated left. Her left hand rests on an upright shield, and right arm extends to support a fasces. The reverse features an eagle with outstretched wings, a scroll inscribed E PLURIBUS UNUM in its beak, and the usual statutory legends above and below. The "Prefect Ribbon" Pollock subvariety. Struck in silver with a reeded edge.

Two reverse dies are known for Judd-235, identified as Pollock-282 and 284. This piece is Pollock-282, which appears to be slightly rarer. This lightly hairlined light gray example has a splash of iridescence at 11 o'clock on the obverse. It shows light wear, possibly from a short time in circulation or as a pocket piece.

# 1859 Judd-239 Half Dollar, PR61 So-Called 'French Head' Obverse

6230 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR61 NGC. The so-called "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse has 1/2 DOLLAR in the center and is surrounded by a wreath of cotton, tobacco, corn, sugar cane, wheat, and oak. Struck in silver with a reeded edge. Despite the modest numerical grade, this is a very attractive pattern half dollar and should be a pleasant addition to any collection. Numerous tiny abrasions and hairline scratches are hidden within the toning on each side. The centers are lighter silver and ivory with rose, gold, lilac, and iridescent toning nearer the borders. A delightful presentation. (#11972)

## 1862 Copper With Motto Half Dollar Judd-294, PR64 Red and Brown

6231 1862 Half Dollar, Judd-294, Pollock-352, Low R.7, PR64 Red and Brown PCGS. CAC. The obverse has the regular issue design for the 1862 Seated Liberty half dollar. The reverse is similar to the regular issue design with the motto GOD OUR TRUST on a ribbon in the field above the eagle. Struck in copper with a reeded edge. Also struck in silver and bronzed copper, about a dozen copper examples are believed known. Lovely blue-green iridescence covers most of each side with significant mint red still surrounding the devices. The only significant patch of carbon is located at 9 o'clock near the obverse rim. (#70444)

Judd-319 Restrike 1863 Three Cent PR65 Red and Brown

6232 1863 Three Cents, Judd-319 Restrike, Pollock-384, R.5, PR65 Red and Brown PCGS. CAC. The obverse is similar to the Braided Hair large cent design that was discontinued seven years earlier, only with much smaller digits in the date. The reverse has a design similar to the issued 1864 two cent piece, but the wreath is smaller and the legend UNITED STATES OF AMERICA is larger. Struck in bronze with a plain edge. This intricately struck and unabraded Gem has ample fire-red, while the centers are toned plum-red, navy-blue, and sea-green. Population: 3 in 65 Red and Brown, 0 finer (3/11). Ex: Madison Collection (Heritage, 1/2008), lot 3573, which realized \$4,312.50. (#70476)

# 1864 Cent in Copper, No L, Judd-356a MS64 Red and Brown, Finest at PCGS

6233 1864 Cent, Judd-356A, Pollock-427, Low R.6, MS65 Red and Brown PCGS. CAC. Struck from the regular Indian cent dies of 1864 on a thick planchet, supposedly in copper, and lacking the L in the ribbon. This piece is certified accordingly as Judd-356a by PCGS, but it would require elemental analysis, as www.USPatterns. com points out, to distinguish the various experimental alloys used. The site also notes that these pieces are "extremely rare showing any red color." The generous red appearing on this piece certainly puts it in the minority, as the first we have cataloged in Red and Brown, the only Gem in the color designation at PCGS, and the finer of only two so certified there; the other is MS64 Red and Brown (3/11). This piece is fairly well-struck, with minor flecks and good eye appeal. (#72299)

# 1865 Copper Dies Trial for the Half Dime Judd-420, PR64 Brown About Six Pieces Known

6234 1865 Half Dime, Judd-420, Pollock-492, High R.7, PR64 Brown PCGS. Regular dies trial piece for the half dime of 1865. Struck in copper with a reeded edge. Like so many other dies trial pieces from this period it was probably made for sale to collectors. The issue is extremely rare, however. USPatterns.com estimates that about six examples are extant. This is an infrequently offered pattern that comes up at auction about every four years. The last example we offered was the Queller piece in January 2009. The surfaces are chocolate-brown and generally problem-free. The strike is strong on the obverse, but shows the usual softness on the upper wreath on the reverse. (#60602)

# 1866 Judd-470 Nickel, PR53 Popular George Washington Motif

6235 1866 Five Cents, Judd-470, Pollock-562, Low R.6, PR53 PCGS. A bust of George Washington faces right on the obverse, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses a large numeral 5 with the legend UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. A nicely detailed light gray piece that shows light wear. Housed in a green-label PCGS holder. (#60666)

# Transitional 1866 Shield Nickel in Nickel Judd-507, PR65+ Cameo

6236 1866 Shield Five Cents, Judd-507, Pollock-591, R.5, PR65+ Cameo NGC. CAC. A transitional pattern that lacks the rays found on non-pattern 1866 Shield nickels. Struck in nickel with a plain edge. The reverse differs slightly from 1867 No Rays business strikes, since a star points to the center of the first A in AMERICA, rather than between AM. However, some 1867 proofs were struck from this reverse subtype. Struck also in copper or bronze and white metal. This is a deeply reflective Cameo that has light, even reddish patina over both sides of this Gem. (#60703)

#### Rare 1867 Judd-570 Five Cent Pattern, PR66 Cameo

6237 1867 Five Cents, Judd-570, Pollock-638, R.5, PR66 Cameo NGC. The obverse closely resembles that of the contemporary three cent nickel. The denomination within a laurel wreath is close to the reverse edges, with a tiny IN GOD WE TRUST above. Struck in nickel with a plain edge. This is the Pollock-638 variant of Judd-570 with the 7 in the date distant from the curl. Lovely electric-blue patina graces carefully preserved surfaces along with elements of green from the left side of the reverse. (#60780)

#### 1869 Standard Silver Quarter, Judd-727, PR55

6238 1869 Standard Silver Quarter Dollar, Judd-727, Pollock-808, R.5, PR55 PCGS. The obverse features a head of Liberty, with hair bound, and no stars on the tiara. UNITED STATES OF AMERICA around with a ribbon bearing the motto IN GOD WE TRUST below. The reverse displays a centered denomination, surrounded by a wreath, with STANDARD SILVER and the date at the peripheries. Struck in silver with a reeded edge. This example is sharply detailed and pleasingly toned in shades of golden-brown and silver-gray. Population: 1 in 55, 33 finer (2/11). (#60954)

# 1870 William Barber Seated Liberty Quarter Judd-882, PR61

6239 1870 Quarter Dollar, Judd-882, Pollock-980, High R.7, PR61 PCGS. A regular issue Motto quarter reverse is paired with a William Barber rendition of the seated Liberty. She faces left and holds an olive branch and a Federal shield. A Liberty pole ascends behind her arm. Struck in silver with a reeded edge. A well struck stone-white specimen that has minor die rust on the reverse. The glassy fields provide noticeable contrast with the radiant devices. (#61126)

## 1870 Standard Silver Quarter, Judd-918 Struck in Silver, Lightly Toned PR62

6240 1870 Standard Silver Quarter Dollar, Judd-918, Pollock-1022, Low R.7, PR62 PCGS. The obverse exhibits a bust of Liberty facing right with the legend UNITED STATES OF AMERICA around the upper border. Liberty wears a ribbon inscribed LIBERTY, and the motto IN GOD WE TRUST is on a scroll near the lower border. The reverse displays the denomination 25 CENTS within a wreath of laurel and oak. STANDARD SILVER is at the top, the date 1870 is below. Struck in silver with a reeded edge. A lightly toned and flashy specimen that lacks hairlines, but both sides have several interesting Mint-made lintmarks, the most prominent above the hair bun. (#61162)

# 1875 Judd-1392, Pollock-1535 Pattern, PR64 Sailor Head Twenty Cent Piece

6241 1875 Sailor Head Twenty Cents, Judd-1392, Pollock-1535, Low R.6, PR64 Cameo NGC. CAC. Designed by William Barber and nicknamed the Sailor Head design, it is nearly identical to the design of certain 1875 half eagle and eagle patterns. A coronet inscribed LIBERTY adorns a head of Liberty, her hair tied back with a ribbon. The reverse has a shield with 20 and the word CENTS at the lower border. Arrows, leaves, and a glory of rays embellishes the shield with UNITED STATES OF AMERICA around. Struck in silver with a plain edge.

This Choice Cameo Proof is brilliant at the centers with excellent contrast. The fields are fully mirrored and serve to frame the brilliant and lustrous central devices. The obverse has delicate peripheral iridescence with less toning on the reverse. (#61699)

## Red and Brown Superb Gem 1878 Judd-1562 Goloid Dollar in Copper

6242 1878 Goloid Dollar, Judd-1562, Pollock-1753, R.6-7, PR67 Red and Brown NGC. Ex: Simpson. Goloid dollar that features Liberty on the obverse, E PLURIBUS UNUM above and the date below. Description of the composition within a solid wreath on the reverse: GOLOID./ 1 GOLD./ 24 SILVER./. 9 FINE./ 258 GRAMS. Around the wreath are the legends UNITED STATES OF AMERICA and ONE DOLLAR. Struck in copper with a reeded edge. This highly reflective Superb Gem displays two-toned color, with bright blue in the fields and original red around the devices and peripheries. The surfaces are essentially flawless except for a few tiny, almost invisible spots on the obverse. (#71924)

## Copper Striking of the 1879 Metric Dollar Judd-1619, PR63 Red and Brown

6243 1879 Metric Dollar, Judd-1619, Pollock-1814, R.6-7, PR63 Red and Brown PCGS. William Barber's Metric Dollar with Liberty wearing a coronet with a border of pearls. The reverse is quite elaborate with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in copper with a reeded edge. The obverse design is similar to that used on the fifty dollar half union (Judd-1546). This design was also struck in silver, goloid, aluminum, white metal, and lead. Each side shows mostly red mint luster with a faint addition of bluebrown, generally seen around the margins. Light dots of carbon are seen on both obverse and reverse. (#71997)

# 1882 Nickel Pattern, Judd-1679, PR65 Tied for Finest Certified

6244 1882 Liberty Head Five Cents, Judd-1679, Pollock-1881, Low R.7, PR65 NGC. The devices are similar to the issued 1883 No Cents Liberty nickel, but the country name is on the obverse instead of stars, while the reverse has IN GOD WE TRUST in small letters instead of UNITED STATES OF AMERICA and E PLURIBUS UNUM. The portrait is slightly smaller, and the wreath significantly larger, relative to the eventually issued type. Struck in aluminum with a plain edge. This is the third appearance (two different specimens) of Judd-1679 in any of our auctions since the beginning of our archives in 1993. Faint bluish hues grace the lovely and virtually pristine surfaces of this Gem proof. Census: 2 in 65, 0 finer (2/11). (#62084)

# Prooflike Gem Martha Washington Dollar Judd-2184, Experimental Edge

6245 "1759" (1999) Martha Washington "Dollar", Judd-2184, Pollock-Unlisted, R.8 -Experimental Edge- MS65 Prooflike NGC. Struck with an intermittently reeded edge from the familiar 1759-dated Martha Washington designs. The unusual edge was an attempt, per USPatterns.com, "to help the blind differentiate this from the quarter dollar." The NGC insert lists the alloy as 74% copper, 25% nickel, and the weight as "(5.22g)layer." Our Permanent Auction Archives indicate several prior appearances of Martha Washington dollars, but all were struck in the manganese-brass alloy of the Sacagawea dollar. This is an untoned high-grade example with smooth, glossy fields and intricately struck designs.

# MS66 '1759' Martha Washington Dollar Judd-2185, Struck Circa 1999

6246 "1759" (1999) Martha Washington "Dollar," Judd-2185, Pollock-Unlisted, Low R.7, MS66 NGC. 7.97gm. The 1759-dated obverse has a portrait of Martha Washington facing right, while the reverse shows a view of Mount Vernon. These dies, which omit a denomination and the UNITED STATES OF AMERICA, have been used by the Mint to test coinage alloys since 1965. The NGC insert lists the metallic composition as 77% copper, 21% zinc, and 2% nickel, but the brassy color is similar to that of a Sacagawea dollar. Struck with a plain edge. Prooflike and essentially pristine with a powerful strike.

# (1999) Martha Washington Dollar MS66 Intermittently Reeded Edge, Judd-2186

6247 "1759" (1999) Martha Washington "Dollar", Judd-2186, Pollock-Unlisted, R.8 -Experimental Edge- MS66 NGC. 8.11gm, similar to the issued Sacagawea dollar. Struck from the 1759-dated Martha Washington designs used since 1965 to test new compositions and diameters. The edge is intermittently reeded, with six-reed sections followed by blank sections. The NGC insert describes the alloy as 94% copper, 5% zinc, and 1% tin, but the color is yellow-gold, like the Sacagawea dollar, despite the absence of manganese. The 10th edition of Judd refers to the alloy as "manganese-brass coated copper-clad metal," but one presumes that this conclusion was based on the color instead of a metallurgical test. Fully struck, satiny, and unabraded with minute strike-throughs (as made) determining the grade.

# **GOLD DOLLARS**

- **6248 1849 Open Wreath AU58 NGC.** Pale green-gold radiance is scarcely dimmed by the minor friction on this Open Wreath gold dollar. Softly struck on the hair below the coronet but with few serious abrasions.(#7502)
- 6249 1849 Open Wreath MS63 PCGS. Breen-6002. The star at 5 o'clock is widely repunched. Lustrous and attractive with rich caramel-gold, jade-green, and russet-tan toning. Well struck save for the upper right stars, and encapsulated in an old green label holder.(#7502)
- 6250 1849 Closed Wreath MS63 NGC. The tips of both branches nearly touch the 1 on this Closed, or Close, Wreath gold dollar. Frosty yellow surfaces display full mint brilliance on each side, with only a few scattered marks.(#7503)
- 6251 1849-O Open Wreath MS62 NGC. Cracked bust-to-rim and elsewhere on the obverse, which has semireflective areas at the margins. The reverse of this green-gold piece shows more diffuse, satiny brightness.(#7508)
- 6252 1850 MS64 PCGS. A boldly struck and lustrous near-Gem that has pleasing preservation and impressive eye appeal. The cheek is nearly pristine. A difficult P-mint issue to obtain in better Mint State grades. Population: 30 in 64, 18 finer (3/11).

  Ex: Santa Clara Signature (Heritage, 11/2002), lot 7452, which realized \$2,760.(#7509)

#### Sharp Mint State 1850-O Gold Dollar

6253 1850-O MS61 NGC. The 1850-O is the first New Orleans gold dollar and one of the most elusive Type One issues, seldom seen above XF condition. This sharply struck piece displays deep orangegold patina, with a sprinkling of abrasions that account for the grade. Census: 38 in 61, 30 finer (3/11). (#7512)

- 6254 1851 MS64 PCGS. This well detailed Choice gold dollar shows a little softness on the reverse, and on a few of the obverse stars. The surfaces are a light orange-gold color, and the mint luster is slightly subdued.(#7513)
- 6255 1851 MS64 NGC. A needle-sharp near-Gem with dusky greengold toning and an absence of noticeable marks. Gold dollars were issued in great quantity between 1851 and 1853, to replace silver coinage hoarded from circulation. Struck from moderately rotated dies.(#7513)
- 6256 1851-C AU50 PCGS. Variety 3. The scarcer of the two confirmed reverse dies for this popular Charlotte issue. Sharply struck and unblemished with glimmers of luster across the greengold surfaces. Housed in a green label holder.

  From The Orchid Collection. (#7514)
- 6257 1851-C AU58 NGC. Variety 1. A well struck peach-gold Charlotte type coin. Only lightly abraded, and considerable luster can still be seen throughout the borders. Traces of wear on Liberty's hair prevent a Mint State grade assessment.

  Ex: San Francisco ANA (Heritage, 7/2005), lot 7278, which realized \$1,900.(#7514)
- 6258 1851-O MS63 NGC. Hints of green grace the frosty yellow surfaces of this lovely gold dollar. Central weakness is evident with minor surface marks consistent with the grade. Struck during a time of large California gold deposits at the New Orleans Mint. (#7516)
- 6259 1852-O MS61 NGC. Slight central weakness is noted on the obverse of this pleasing Mint State piece. Both sides have brilliant yellow surfaces with a hint of light green to suggest California as the source of the gold.(#7520)

#### 1853 Gold Dollar, Reddish-Gold MS66

- 6260 1853 MS66 NGC. CAC. The 1853 is among the most plentiful dates of Type One gold dollars in mint condition. Its generous mintage exceeds 4 million pieces and the presence of nearly 1,000 examples (mostly Uncirculated) of the issue from the 1934 "Baltimore Hoard" make it a top favorite for collectors seeking highend Mint State examples. The mint luster is softly frosted, and both sides exhibit strong striking definition and even reddish-gold color. Census: 57 in 66, 10 finer (3/11). (#7521)
- 6261 1853-O MS62 PCGS. CAC. Strongly struck with rich yellow-to-orange luster and few serious abrasions. This Type One issue is among the most accessible Southern gold issues and thus is popular with collectors.(#7524)
- 6262 1854 Type One MS63 NGC. A satiny gold-orange representative from the end of the Type One gold dollar series. Select and well struck but with a handful of tiny faults which collectively account for the grade.(#7525)

# Near-Mint 1854-D Gold Dollar Minimally Abraded Surfaces

6263 1854-D AU58 NGC. Variety 6-H. The final Type One Dahlonega gold dollar issue is extremely scarce, as suggested by its minute mintage of 2,935 pieces. This pale gold representative shows moderate softness of strike at the centers, as is common for the variety, but no abrasions are consequential, and luster fills the legends and outlines the wreath. Census: 34 in 58, 26 finer (3/11). (#7526)

6264 1854-S AU55 NGC. A first-year gold dollar for San Francisco and the only Type One issue from that mint. Amply lustrous despite light wear with a distinctly green-gold cast to the surfaces. (#7527)

#### Historic 1854-S Gold Dollar, MS61

6265 1854-S MS61 NGC. This is a well struck coin with bright sungold and color and flashy peripheral luster. The surfaces have only light abrasions that are appropriate to the grade have surprisingly little impact on the eye appeal. One of just 14,632 pieces struck for this historic first San Francisco Mint gold dollar issue. Census: 24 in 61, 36 finer (3/11). (#7527)

# 1854 Type Two Gold Dollar, MS62 Popular, Short-Lived Type Coin

6266 1854 Type Two MS62 NGC. The 1854 Type Two gold dollar, coming from a relatively large mintage approaching 800,000 pieces, is an available date and a favorite choice of type collectors. The Mint State population, estimated by David Bowers (2011) to be between 2,500 and 3,200 pieces, can be attributed, at least in part, to the 1934 "Baltimore Find" that apparently included more than 200 specimens. This well-struck example has full digits and letting on the reverse, and the usual die clash marks. Even orange-gold color coats each side. (#7531)

## MS62 1854 Type Two Gold Dollar Struck From Unclashed Dies

6267 1854 Type Two MS62 NGC. Among the most elusive of 19th century gold coin types, the Type Two is a popular issue in all Mint State levels. This MS62 specimen shows attractive luster over yellow-orange surfaces. A small patch of scrapes beneath the date is worth mentioning, with some smaller abrasions on the reverse. Unusual for the issue, no clash marks appear on either side. (#7531)

## 1855 Type Two Gold Dollar, MS62 Briefly Produced Gold Issue

6268 1855 MS62 NGC. Cornelius Vermeule, in his *Numismatic Art in America*, titled a subchapter of his book "Pre-Civil War Quaintness and Mediocrity." As might be expected from such a title, Vermeule had little love for James B. Longacre, who was responsible for all three of the gold dollar designs, including the technically inferior and ill-fated Type Two gold dollar, which he criticized for simplicity and lack of originality. Yet Longacre's simple designs offer plenty of charm for the right collector, as generations of numismatists can attest. This example shows the usual softness in the centers of each side and die clashing in the fields. The lightly abraded surfaces display rich reddish-gold color over each side. (#7532)

# Almost Uncirculated 1855-C Gold Dollar Better-Struck Variety 2

6269 1855-C AU50 PCGS. Variety 2. With a mintage of only 9,803 pieces and the only Type Two Charlotte issue, it is not difficult to imagine the type demand for the 1855-C gold dollar. Of the 250-350 pieces believed known in all grades, only 10% or so grade AU. The advantage to owning a Variety 2 is most examples are sharply defined in the center of the reverse. The obverse, however, is softly defined over Liberty's hair. The always-present die clashing and slight planchet flaws are seen on this piece also, but good remaining luster is also present along with rich reddish-gold color. (#7533)

- 6270 1855-C Scratched NCS. AU Details. Variety 2. Olivegreen and golden-brown toning embrace this lightly circulated and evenly struck example. The obverse field has a few pinscratches, and a faint X is pinscratched near the right ribbon end of the wreath. The sole Type Two Charlotte Mint issue, and key to a type set from the Southern facility.(#7533)
- 6271 1855-O AU53 NGC. An important Type Two O-mint gold dollar with rich peach and apricot luster embracing each side. Lightly rubbed yet fundamentally pleasing with a solid strike for the issue. (#7535)
- 6272 1855-O AU55 NGC. Yellow-orange surfaces retain considerable watery reflectivity on this Type Two O-mint gold dollar. Well struck for the type with only minor wear and few significant abrasions. (#7535)

#### Nearly Unabraded AU58 1855-O Gold Dollar

6273 1855-O AU58 PCGS. Many of the O-mint gold coins from the 1850s, as here, show a significant greenish tint from the silver alloy that was not always refined out of the gold. This Type Two O-mint saw a modest mintage of only 55,000 pieces for circulation, nonetheless the largest of the four mintmarked issues. This piece boasts smooth, relatively unabraded surfaces with no clash marks. Population: 31 in 58, 32 finer (3/11). (#7535)

# Reddish-Gold 1855-O Gold Dollar, AU58 Sole Type Two New Orleans Issue

- 6274 1855-O AU58 NGC. The 1855-O is the sole Type Two gold dollar from the New Orleans Mint and the last of the denomination from that facility. AU coins are scarce and worthwhile, when found. This near-Mint coin displays slight evidence of friction on each side of this near-Mint coin, and the central strike details are somewhat weak, as usual for the issue and the type. The reddishgold surfaces enhance the charm and visual appeal.

  Ex: Dallas Signature (12/2004), lot 6460; Palm Beach Signature (3/2005), lot 6811. (#7535)
- 6275 1855-O Improperly Cleaned NGC Details. Unc. This Type Two O-mint gold dollar shows no evidence of wear, though light yellow-gold surfaces have obviously unnatural luster. A pinscratch doubles back on itself in a path from the rim to the lowest feathers of the headdress. Despite these faults, knowledgeable collectors will recognize the issue's scarcity in unworn condition.

# Challenging 1856-S Type Two Gold Dollar, Choice AU

- 6276 1856-S Type Two AU55 NGC. The 1856-S is much more challenging than any Type Two gold dollar issue, even the 1855-O. In 1856 only the San Francisco Mint produced gold dollars with this design, giving the issue cachet with gold type collectors. This piece is typically struck for a Type Two, with weak central details on each side and evidence of clashing. The green-gold surfaces show numerous small, scattered abrasions, none singularly mentionable, from this coin's limited time spent in the channels of commerce. Ex: Long Beach Signature (Heritage, 2/2005), lot 7495. (#7536)
- 6277 1857-D Improperly Cleaned NGC Details. AU. Variety 9-L. Sole dies for the year. With a mintage of just 3,533 pieces, the 1857-D is among the more elusive Dahlonega gold dollars. This example, though only lightly worn, is also entirely too glossy as a result of a past cleaning. Nonetheless, the present yellow-gold piece will appeal to a number of Southern gold enthusiasts.
- 6278 1857-S AU53 PCGS. CAC. Lightly rubbed but with plenty of flash remaining in yellow-gold fields. This S-mint gold dollar also shows minor greenish accents, particularly on the reverse. One of just 10,000 pieces produced. Population: 13 in 53, 25 finer (3/11). (#7547)
- 6279 1858-D Bent NGC Details. XF. Variety 10-M. The 1858-D gold dollar is a popular type issue, from a mintage of 3,477 pieces, with a single variety known for the date. This example shows some wear and a slight bend that is most noticeable on the central reverse. The surfaces retain much original mint luster.(#7549)
- 6280 1858-S AU58 PCGS. Orange overtones enrich the yellow-gold surfaces of this immensely lustrous near-Mint representative. Great eye appeal for a challenging but underrated San Francisco issue. Population: 12 in 58, 10 finer (3/11).(#7550)

# 1859 Gold Dollar, MS66 An Important Condition Rarity

6281 1859 MS66 PCGS. The 1859 gold dollar, with a mintage that approaches 170,000 coins, enjoys a surprisingly high survival rate, possibly because specimens were pulled from circulation and hoarded during the Civil War. The population begins to thin out in Mint State, however, and Gem and finer specimens are rare. PCGS and NGC have certified only 12 coins in MS66, the grade of the present offering, and 10 examples finer (3/11). The mint luster is thickly frosted and each side shows even, rich reddish-gold color. The only "defect" are a couple of areas of minor porosity on the reverse. (#7551)

#### Choice AU 1859-C Gold Dollar Planchet Defect on Reverse

1859-C — Defective Planchet Reverse — AU55 PCGS. Variety 1. Only 5,235 pieces were produced of the 1859-C gold dollar, the lowest mintage in the entire C-mint gold dollar series, except for the extremely rare 1849-C Open Wreath. Glimpses of mint luster remain around the devices and rims of this AU55 coin. The strike is weak, as always. On the reverse, a small but deep vertical planchet defect runs from the bottom of the 1 in the denomination to just above the 8 in the date. This error is an unusual feature on any gold coin, and it is especially difficult to locate an error of any type on a Charlotte product. An unusual and worthwhile coin for the Charlotte or error specialist.

Ex: Palm Beach Signature (Heritage, 3/2005), lot 6819, which realized \$4,025. (#7552)

# Scarce 1859-D Gold Dollar Variety 11-O, Choice AU

6283 1859-D AU55 NGC. Variety 11-O. The scarcer of two known die pairings of the date, distinguished by the placement of the 5 in the date, which for this variety is centered beneath the second L in DOLLAR. This canary-gold example exhibits some strike softness on portions of the wreath, date, denomination, and headdress, unavoidable for the issue. Ample luster is present, and the reverse is refreshingly clean. A couple of minor peripheral pinscratches on the obverse are of little import. A mere 4,952 pieces were struck, with high-grade examples surviving unimpaired.

Ex: ANA Signature (7/2005), lot 7298. (#7553)

6284 1860-S AU58 NGC. The 1860-S gold dollar is a scarce issue, from a mintage of 13,000 pieces. This pleasing near-Mint example is well detailed, with vibrant mint luster and light greenish-gold surfaces. (#7557)

## 1860-S Gold Dollar, MS61 Uncommonly Lustrous Example

6285 1860-S MS61 NGC. The low mintage of 13,000 pieces and the West Coast's constant need for circulating lower denomination gold and silver coins account for the absolute and especially the condition rarity of the 1860-S gold dollar. Only a few pieces have been certified in mint condition with an obvious swelling of resubmissions among MS61 examples. This piece has terrific, original mint frost. Lovely reddish-gold and occasional lilac patina is seen on each side, and the strike is strong throughout. The only mark of note is a shallow scratch below DOLLAR that extends to the rim at 9 o'clock. (#7557)

6286 1862 MS64 PCGS. Nearly 1.4 million 1862 gold dollars were coined, and that total was the second highest of the Type Three design. This Choice Mint State piece has frosty yellow surfaces with hints of light rose toning.(#7560)

6287 1862 MS65 PCGS. Rich yellow-orange color with generous rose overtones to the blossoming luster. A gorgeous Civil War-era Gem from an underrated issue. PCGS has graded just 30 numerically finer examples (3/11).(#7560)

6288 1873 Open 3 MS64 NGC. A frosty Choice Mint State piece, this Open 3 gold dollar has brilliant lemon surfaces with sharp design features and minuscule marks. An attractive piece for an advanced collection. NGC has only certified 55 finer pieces (3/11). (#7573)

Open 3 1873 Gold Dollar, MS67

6289 1873 Open 3 MS67 NGC. An exquisite Superb Gem representative of the 1873 gold dollar. Smooth and swirling centers are pale yellow-gold with a yield to more orange hues close to the rims. This carefully preserved beauty is the single finest Open 3 example known to NGC with just one coin finer in the combined certified population (3/11). (#7573)

6290 1874 MS64+ ★ NGC. CAC. Strongly struck with distinct reflectivity to pale yellow-gold fields. A post-Civil War gold dollar that is high-end for the near-Gem grade band, as implied by the Plus, and flat-out gorgeous, as suggested by the Star.(#7575)

#### Elegant Superb Gem 1879 Gold Dollar

- 6291 1879 MS67 NGC. This Superb Gem is a splendid little twotoned jewel, perfect for a type set or high-grade date set. Given
  the low mintage of only 3,000 pieces in 1879 (and for many similar
  issues of the era), we feel these gold dollars in high grade could be
  considerably underrated. Hazel and rich orange-gold grace both
  sides of this coin in about equal measure, an unusual but elegant
  treat for the eyes. Evidence of die clashing appears on the reverse.
  (#7580)
- **6292 1881 MS65 PCGS. CAC.** Swirling wheat-gold luster with flashes of brighter yellow. A lovely Gem representative from late in the series, housed in a green label holder.(#7582)

# Superb Gem 1883 Gold Dollar Excellent Type Coin

- 6293 1883 MS67 NGC. CAC. Pale yellow-gold luster swirls on the obverse, while the reverse offers a richer, more wheat-influenced hue. Strongly appealing and an excellent type selection from a late-date issue of just 10,800 pieces. NGC has certified a mere 10 numerically finer representatives (3/11). (#7584)
- 6294 1886 MS63 NGC. This sharply detailed Select gold dollar offers light greenish-gold surfaces, with satiny mint luster. Only 5,000 gold dollars were minted in 1886, accompanied by 1,016 proofs. (#7587)
- 6295 1886 MS65 NGC. Fully struck and flawless with original greengold toning. Only 5,000 pieces were struck, and although a number of Uncirculated examples were saved, most of those are in lesser Mint State grades. In a prior generation holder. Census: 21 in 65, 30 finer (2/11).

From The Orchid Collection. (#7587)

# 1887 Gold Dollar, MS66 Bright, Sparkling Surfaces

- 6296 1887 MS66 PCGS. CAC. Although the mintage of 1887 gold dollars was just 7,500 pieces, many were apparently saved at or near the time of issue. Consequently, the estimated Mint State population is in the 600 to 900-coin range. Even Gems can be located with relatively little trouble, but better than that examples are quite scarce. The surfaces of this Premium Gem are remarkably bright with sparkling yellow-gold mint luster, and the devices are fully struck. Population: 56 in 66, 22 finer (3/11). (#7588)
- 6297 1888 MS64 NGC. This attractive Choice specimen displays well struck design elements and light greenish-gold surfaces. The fields exhibit prooflike reflectivity, with few signs of contact. (#7589)
- 6298 1889 MS64 PCGS. A sharply detailed Choice example, with attractive rose-gold surfaces, and satiny mint luster. This pieces possesses outstanding eye appeal. The gold dollar was discontinued after 1889.(#7590)
- 6299 1889 MS66+ PCGS. CAC. A high-end Premium Gem, from the last year of the denomination, this example is sharply detailed, with vibrant satiny mint luster. The gold dollar went out with a bang, as 28,950 pieces were struck.(#7590)

#### PROOF GOLD DOLLAR

#### Accessible 1884 One Dollar, PR63 Cameo

6300 1884 PR63 Cameo PCGS. Although a few minor field contact marks preclude an even finer grade, they also make this piece much more accessible than otherwise for collectors of proof gold, from the mintage totaling only 1,006 coins more than a century and a quarter ago. The orange-gold surfaces show considerable contrast, a bit deeper on the reverse. Population: 2 in 63 Cameo, 12 finer (3/11). (#87634)

# **EARLY QUARTER EAGLES**

## 1802 BD-1 Quarter Eagle, AU Details Most Plentiful Die Variety

6301 1802 — Improperly Cleaned — NGC Details. AU. Breen-6118, BD-1, R.4. This is the most available variety of the 1802 quarter eagles, incorrectly called overdates by many. All three varieties are from a single obverse die that has a closed digit, the loop connected to the diagonal. The reverse of BD-1 has a horizontal die line from the left corner of the shield to the wing.

This green-gold example has numerous fine scratches on each side from improper handling. However, considerable detail remains and it is still an attractive piece overall. The reverse has additional light orange toning.

## BD-1 1802/1 Two and a Half AU Sharpness

6302 1802/1 — Mount Removed — NGC Details. AU. Breen-6118, BD-1, R.4. Formerly mounted to jewelry at 3 and 9 o'clock, this early quarter eagle displays edge and rim damage near those two areas. Otherwise, this is lightly marked example with ample goldenbrown luster in design recesses. A good strike for the type despite softness on the eagle's neck plumage.

# CLASSIC QUARTER EAGLES

6303 1835 AU53 NGC. Breen-6141, Variety-7, R.5. A golden-brown representative, typically struck at the centers but intricately detailed across the borders. The left obverse field has a thin vertical mark, otherwise undisturbed and attractive. The vast majority of 1835 quarter eagles are variety-6, and variety-7 is many times scarcer. Ex: Central States Signature (Heritage, 5/2005), lot 8423, which realized \$920.(#7693)

# Scarce Uncirculated 1836 Classic Head Quarter Eagle, Second Head of 1837

6304 1836 Block 8 MS61 NGC. CAC. Second Head of 1837, Breen-6144, Variety-15, R.2. This design type is seldom found in mint condition, and when located examples are worthy of consideration. This piece displays better-than-average striking details on the eagle's plumage, but the hair curls around Liberty's face show the usual softness. The slight reddish-gold surfaces are lightly abraded, the only mentionable mark located above and to the right of the eagle's head. (#97694)

# Choice AU 1839 Quarter Eagle Excellent Type Specimen

6305 1839 AU55 NGC. Breen-6148 Variety-21, R.3. All of the 1839 Classic Head quarter eagles, a mintage exceeding 27,000 pieces, appear to have been produced from the same die pair, with the lowest hair curl atop the 9 in the date. This Choice AU coin displays excellent eye appeal over greenish-gold surfaces and would be an outstanding type specimen. The surfaces are virtually markfree, with a strong strike. Census: 15 in 55, 22 finer (3/11). (#7698)

# LIBERTY QUARTER EAGLES

6306 1840 AU50 NGC. Glimmers of peach-red luster outline design elements. No marks are consequential, and the soft detail at the centers is due primarily to the typical strike. A scant 18,859 pieces were struck.(#7717)

# Choice XF 1842-D Quarter Eagle Unblemished Surfaces

6307 1842-D XF45 PCGS. Variety 3-F. The sole die pairing. This is a well defined Choice XF Dahlonega two and a half that displays rich olive and peach toning. Glimpses of ebony debris in design crevices attest to the originality. A meager 4,643 pieces were struck. Population: 14 in 45, 18 finer (3/11). (#7725)

6308 1842-D — Improperly Cleaned — NGC Details. AU. Variety 3-F. The 1842-D quarter eagle is a rare issue in any condition, from a mintage of 4,643 pieces. The surviving population probably numbers between 75 and 85 examples in all grades. This lightly worn specimen displays greenish-gold surfaces that are unnaturally bright, indicating a previous cleaning.(#7725)

# 1843-C Liberty Quarter Eagle, AU53 Large Date, Plain 4

6309 1843-C Large Date, Plain 4 AU53 PCGS. CAC. Variety 1. Only variety for the date. From a mintage of 23,076 pieces, the 1843-C Large Date quarter eagle is elusive in high grade, but somewhat more available than its Small Date counterpart. Like all examples seen of this issue, the present coin is softly detailed on the central devices, especially on the reverse. The lustrous surfaces are a pleasing greenish-gold color. Population: 6 in 53, 33 finer (3/11). (#7728)

### Choice AU 1843-C Quarter Eagle Variety 1, Large Date

- 6310 1843-C Large Date, Plain 4 AU55 PCGS. CAC. Variety 1. Only variety for the date. The 1843-C Liberty quarter eagle with the Large Date is an available issue in the context of the series, but examples in Choice AU condition are quite scarce. The present coin displays sharp details on the peripheral elements, but the typical softness is noted on the central devices. The lustrous surfaces are an attractive orange-gold color. Doug Winter estimates 250-350 specimens are extant in all grades, from the mintage of 23,076 pieces. Population: 14 in 55, 19 finer (3/11). (#7728)
- 6311 1843-D Small D Bent NGC Details. XF. Variety 4-F. This green-gold Dahlonega quarter eagle has ample definition and is void of obtrusive marks. Mildly wavy, visible mostly as a slight bulge on the denomination.
- 6312 1843-D Small D Improperly Cleaned NGC Details. AU. Variety 4-F. A common Small D variety with the arrow feather visible inside the D at the upper left. Faint hairlines are indicative of light cleaning on this still lustrous yellow-gold specimen. (#7730)
- 6313 1843-O Small Date, Crosslet 4 AU53 NGC. The more common of the two variants for this date (the other has a plain 4 in the date). This example is moderately worn with muted luster and light greenish coloration. The most common New Orleans Mint quarter eagle, and a good choice for type purposes.(#7731)

- 6314 1844-C Heavily Damaged ANACS. XF40 Details. Variety 1. This challenging Charlotte Mint quarter eagle is from a low mintage of 11,622 pieces. The obverse field has two clusters of scratches, and the upper portrait also displays multiple scratches. The lower half of the eagle exhibits a wide scrape that extends toward the rim, and a scratch is also noted on the upper reverse field. Both sides have traces of green residue in protected areas. (#7735)
- 6315 1845-D Fine 12 NGC. CAC. Variety 6-I. The only die pair for the issue, utilized to coin 19,460 pieces. Although well worn, this example is pleasing with deep rose toning on light yellow surfaces. This piece should prove affordable for many collectors. (#7738)

## 1845-D Two and a Half, AU53 Difficult Dahlonega Issue

6316 1845-D AU53 PCGS. CAC. Variety 6-I. A partly lustrous straw-gold example of this challenging low mintage Dahlonega emission. Neither side displays consequential marks, and the strike is good despite the usual incompleteness on the eagle's neck feathers. An important addition to an advanced holding of the series. Population: 11 in 53, 37 finer (3/11). (#7738)

# Rare AU 1845-O Two and a Half 4,000 Pieces Struck

- 6317 1845-O AU50 NGC. The 18 in the date is obviously repunched, as always on this ultra low mintage issue. A scant 4,000 pieces were coined, only two of which have been certified as Mint State by NGC. This lightly circulated straw-gold example is typically struck but appears devoid of any relevant marks. (#7739)
- 6318 1847-O AU58 NGC. This charming near-Mint 1847-O half eagle is sharply detailed on the obverse, with a touch of highpoint rub, more apparent on the reverse. The lustrous surfaces are a rich greenish-gold color. Census: 46 in 58, 29 finer (3/11). (#7747)
- 6319 1847-O AU58 NGC. With some weakness among the lower hair curls and eagle, this piece retains nearly full luster with green-gold surfaces. The fields are mildly reflective, adding to its overall eye appeal. Census: 46 in 58, 29 finer (3/11).(#7747)

# 1848-C Two and a Half, AU50 Scarce Variety 2, Struck From Buckled Dies

6320 1848-C AU50 NGC. Variety 2. Two die marriages were used for the 1848-C, and this is the scarcer of the two. It is most easily distinguished by the date positioned closer to the bust than on Variety 1. The dies on this variety are also known to have buckled, which accounts for much of the central weakness seen on each side. The surfaces are peppered with numerous small abrasions, and there is a significant presence of reddish patina on each side, especially around the devices. Probably no more than 15% of the total number of survivors in all grades (100-250 pieces) are believed to exist today in AU condition. (#7750)

# 1849-C Quarter Eagle, XF40 Scarce Low-Mintage, Low-Survival Issue

6321 1849-C XF40 NGC. The 1849-C quarter was long overlooked by collectors, but it seems to have come into its own now and is much better appreciated for the scarce issue it is. Only 10,220 pieces were struck with an estimated 125-150 coins believed extant in all grades. The green-gold surfaces of this coin show even wear over the high points. The only marks worthy of note are T-shaped intersection of two abrasions between stars 10 and 11 and a planchet flaw on the reverse rim between 12 and 1 o'clock. (#7753)

# 1850-D Quarter Eagle, AU58 Variety 13-M

6322 1850-D AU58 NGC. Variety 13-M. The top of the 1 strongly overlaps the bust, and there appears to be a slight "cut-out" area of the bust to accommodate the upper left serif of that digit. The mintmark completely overlaps the lowest arrow feather, so that the feather is only visible inside the opening of the small D.

This splendid near-Mint example just misses the Condition Census for the date as listed in Doug Winter's reference. It is a brilliant and highly lustrous green-gold example with delicate rose overtones. A trace of wear visits the high points of the design and surface marks are entirely trivial. Census: 41 in 58, 16 finer (3/11). (#7757)

- 6323 1851 MS64 NGC. The 1851 Liberty quarter eagle was produced in large numbers, but few examples survive in high grade. This impressive Choice example is sharply detailed, except for some flatness on the lowest stars. The lustrous surfaces are a light rose-gold color. Census: 33 in 64, 9 finer (3/11).(#7759)
- 6324 1851-C Improperly Cleaned NCS. AU Details. Variety
  1. This straw-gold Charlotte quarter eagle has a good strike and a
  few scuffs on the reverse field above the eagle's head and beneath
  the left (facing) wing. Both devices display vertical roller marks, as
  made.(#7760)

# Sharply Struck Greenish-Gold 1851-O Two and a Half, AU58

6325 1851-O AU58 PCGS. CAC. The 1851-O is an available quarter eagle issue until the Mint State level is reached. This near-Mint coin displays a sharp strike on greenish-gold surfaces that are lightly abraded, in keeping with a short spell in circulation. As an antebellum O-mint issue, this historic piece should find a ready buyer. Population: 10 in 58, 15 finer (3/11). (#7762)

### 1851-O Quarter Eagle, MS62 Rare in Uncirculated Grades

6326 1851-O MS62 PCGS. This sharply struck sun-gold two and a half shimmers with luster, and is minimally abraded save for a small reverse rim nick at 9 o'clock. Although a few hundred examples are known in AU, the 1851-O is decidedly rare in Mint State. Population: 5 in 62, 4 finer (3/11). (#7762)

6327 1852-C VF35 PCGS. Variety 1. Sole dies for the year. An exemplar of "dirty gold" in the best sense, this Choice VF example has rich orange-gold patina that should appeal to collectors who value originality. A line of copper spots at the lower right obverse may not get so warm a reception.(#7764)

## 1852-D Two and a Half, AU55 Mintage of 4,078 Pieces

6328 1852-D AU55 NGC. Variety 15-M. A minimally abraded and glossy Choice AU rare date Dahlonega quarter eagle. The strike is sharp on the stars and wings, while the lower half of the eagle shows moderate bluntness. A charming better grade example. Only 4,078 pieces were struck. Census: 14 in 55, 19 finer (3/11). (#7765)

# Partial Collar on an 1853 Liberty Quarter Eagle, AU55

6329 1853 Liberty Quarter Eagle — Partial Collar — AU55 NGC. Upon first glance this appears to be a well struck and lightly circulated Liberty gold type coin. Then one notices the tall, prominent wire rim along the left and upper rims, and a partial absence of reeding on the left edge, where the coin was struck partly above the collar die. The partial collar feature is readily observed due to the new-style NGC holder, which allows examination of the edge. Gold errors are very rare and prized by specialists.

#### 1853 Quarter Eagle, Seldom-Seen MS65 None Finer at NGC

6330 1853 MS65 NGC. The 1853 quarter eagle had a relatively large mintage (approaching 1.5 million pieces), the result of a large influx of California gold bullion. It is readily available in circulated condition, but Mint State coins become more difficult to locate, especially in the higher levels. The distinct reddish-tinted surfaces distinguish this piece, whose only drawback is a mark near the chin of Liberty. Census: 19 in 65, 0 finer (3/11). (#7767)

# Choice 1854 Two and a Half Only Six Finer at PCGS

6331 1854 MS64 PCGS. CAC. The 1854 Liberty quarter eagle was produced in large numbers, but high-grade survivors are rare. The present coin is an impressive Choice specimen, with bright mint luster and yellow and rose-gold surfaces. The design elements are strongly impressed, but evidence of lapping can be seen in the vertical stripes of the shield. Population: 22 in 64, 6 finer (3/11). (#7769)

# 1854-C Quarter Eagle, Choice AU Sixth in Rarity in the C-Mint Series

- 6332 1854-C AU55 ANACS. Variety 1. The 1854-C two and a half is a scarce issue in all grades, but especially so in AU. The mintage was a lowly 7,295 pieces, and only 105-145 examples are believed known in all grades today. In AU an estimated 34-43 coins are extant. This bright orange-gold piece has noticeable traces of luster around the devices, the centers are softly struck as usual, and there are few marks or planchet depressions on either side. (#7770)
- 6333 1854-O MS61 NGC. CAC. Aside from localized weakness on a few stars, this is a well-defined O-mint quarter eagle. Orange-tinged yellow-gold luster is strong, marks generally few and wispy for the grade. Census: 21 in 61, 8 finer (3/11).(#7772)
- 6334 1855 MS63 PCGS. Housed in a green-label PCGS holder, this beautiful Select Mint State piece has brilliant and frosty yellow luster with pleasing surfaces showing only trivial marks. Delicate rose overtones add to its eye appeal. Population: 22 in 63, 18 finer (3/11).(#7774)

# Scarce 1855 Two and a Half, MS64

6335 1855 MS64 NGC. CAC. Impressively detailed through the centers and margins alike. Pale yellow-gold surfaces offer lovely luster, a wonderful backdrop to the relatively smooth devices. Great eye appeal for this issue with a mintage three-fifths lower than its prior-year Philadelphia counterpart. Census: 18 in 64, 5 finer (3/11). (#7774)

- 6336 1856 MS63 PCGS. A lustrous and lightly abraded example. Sharply struck except for the lower half of the eagle. The reverse is struck from a clashed die. While the 1856 is a readily available date in circulated grades, it is infrequently encountered above basal Mint State grades. Population: 35 in 63, 22 finer (3/11). (#7777)
- 6337 1856-O AU55 NGC. A mere 21,100 pieces were produced of this scarce O-mint quarter eagle. Several dozen pieces have been certified in the various AU grades, with many resubmissions undoubtedly included in the population data. Judging from the pieces that have appeared in auctions over the past five years or so, there are probably no more than two dozen pieces actually known of this issue. This is a well defined coin that has lovely reddish-gold and lilac color over each side. Several small marks are scattered over the obverse and reverse, the most notable being a thin, vertical scratch behind Liberty's temple that extends into the hair curls below the I in LIBERTY.(#7780)
- 6338 1857-O AU58 NGC. As the San Francisco Mint increased its coining production, California mined gold tended to remain on the west coast. The result was a diminished supply in New Orleans. Only 34,000 quarter eagles were coined at the Louisiana facility in 1857, and survivors are elusive. This piece has bright green gold luster with average design definition and reflective fields. (#7784)

#### Elusive Near-Mint 1857-S Quarter Eagle

6339 1857-S AU58 NGC. CAC. A hint of orange color visits yellowgold surfaces with swirling luster. A well struck and attractive near-Mint example from a year and mint that are well-represented in high grades by double eagles but precious few other denominations. NGC has graded 20 numerically finer pieces (3/11). (#7785)

# Mint State 1857-S Quarter Eagle Important Antebellum Issue

6340 1857-S MS61 NGC. This important early antebellum S-mint quarter eagle issue is sharply struck, with highly lustrous yellow-gold color and hints of pink toning. Walter Breen wrote in the Complete Encyclopedia that "flat strikes are the rule." The present example is a lovely exception, one of few Mint State specimens known. Note the curiously large mintmark, characteristic of the era. Census: 13 in 61, 6 finer (3/11).

Ex: St. Louis Signature (5/2005), lot 8464. (#7785)

# 1859 Liberty Quarter Eagle, MS63 New Reverse Type

- 6341 1859 New Reverse, Type Two MS63 PCGS. CAC. This boldly defined quarter eagle is fully brilliant and highly lustrous with outstanding eye appeal. The surfaces are exceptional for the grade. The new reverse design hub has long, slender arrows that nearly reach the letters. This is a condition rarity that should prove to be a nice addition to an advanced collection. Population: 13 in 63, 4 finer (3/11). (#7788)
- 6342 1860 Old Reverse, Type One XF45 NGC. An unusual Old Reverse quarter eagle of 1860, struck with an unmodified reverse that should have been retired in 1859. This lightly worn and lavender-infused example comes from a small minority of the already small 1860 quarter eagle mintage of 22,563 pieces. Census: 1 in 45, 21 finer (3/11).(#97791)

# Unabraded Choice AU 1860-C Quarter Eagle

- 6343 1860-C AU55 NGC. Variety 1. Sole die marriage for this small issue of only 7,400 pieces, with the large C mintmark jammed into the area between the branch above and the denomination below. This piece shows a lot of luster remaining over orange-gold surfaces that are well-struck and relatively unabraded. Census: 19 in 55, 39 finer (3/11). (#7792)
- 6344 1861 New Reverse, Type Two MS64 PCGS. The "New Reverse" or Type Two, which should have been used for all 1861 quarter eagles (and was with only a few valuable exceptions). This near-Gem has a decent strike, though a few stars and the eagle's legs show softness, and orange-kissed yellow-gold luster is powerful and bright. PCGS has graded 30 numerically finer examples (3/11). (#7794)
- 6345 1861 New Reverse, Type Two MS64 PCGS. CAC. This sharply defined and lustrous piece has brilliant yellow surfaces with excellent eye appeal. Minor surface marks are expected at the grade. The fields are reflective, generating slight contrast. NGC has certified a mere 23 finer pieces (3/11).(#7794)

#### Low-Mintage 1866 Quarter Eagle, XF40

- 6346 XF40 NGC. This post-Civil War quarter eagle issue had a tiny mintage of 3,080 business strikes, and finding an attractive example is a challenge regardless of grade. This mustard-gold XF40 example shows faint glimmers of luster in fields that show few significant marks. A degree of striking softness is noted at the upper portrait and lower eagle. Census: 5 in 40, 28 finer (3/11). (#7803)
- 6347 1866 Repaired, Cleaned ANACS. AU50 Details. The upper reverse field is smoothed, a few short marks are noted above the coronet tip, and both sides are glossy from cleaning. Nonetheless, a lightly circulated example of this rare date. Only 3,080 business strikes were issued, and it is likely that fewer than 100 examples have survived.
- 6348 1868 AU58 NGC. The 1868 Liberty quarter eagle boasts a low mintage of just 3,625 pieces. The present near-Mint example is sharply detailed, and the light yellow-gold surfaces show many areas of prooflike reflectivity. Census: 73 in 58, 21 finer (3/11). (#7807)
- 6349 1868-S AU58 NGC. From a mintage of just 34,000 pieces, the 1868-S quarter eagle is most often seen in lower grades or damaged condition. This near-Mint specimen is well detailed, with only light wear on the devices, and pleasing rose-gold surfaces. Census: 82 in 58, 19 finer (3/11).(#7808)
- 6350 1869-S AU50 NGC. Yellow-gold surfaces remain lustrous despite light wear and show a faint greenish overtone. Strongly appealing for the grade and for the issue of just 29,500 pieces. (#7810)
- 6351 1869-S AU58 NGC. The strongly impressed design elements show just the slightest touch of high-point rub on this attractive near-Mint specimen. The light greenish-gold surfaces are brightly lustrous. Census: 53 in 58, 16 finer (3/11).(#7810)
- 6352 1870-S AU55 NGC. Yellow-gold with subtle orange overtones to still-lustrous surfaces. This S-mint quarter eagle issue, mintage 16,000 pieces, poses a challenge in the better circulated grades. Census: 16 in 55, 37 finer (3/11).(#7812)
- 6353 1874 AU58 NGC. Reflective fields are evident on both sides of this light yellow example, with a trace of wear that defines the grade. The 1874 quarter eagle is a low-mintage issue that is elusive in higher grades. Census: 54 in 58, 29 finer (3/11). (#7821)
- 6354 1878 MS64 PCGS. A splendid Choice Mint State specimen, this 1878 quarter eagle has fully brilliant light yellow luster with exceptional surfaces showing only minor marks on each side. PCGS has only certified 36 finer examples of this conditionally rare issue.(#7828)
- 6355 1878-S MS63 PCGS. Well struck with flashy fields, not the most common state for this frequently circulated quarter eagle issue. Scattered light to moderate abrasions appear in the yellow-gold fields. Population: 34 in 63, 10 finer (3/11).(#7829)

## Two-Toned 1893 Quarter Eagle, MS66 Tied for Finest at PCGS

6356 1893 MS66 PCGS. CAC. A gorgeous Premium Gem example of this lower-mintage issue, one of only a few surviving from the production of 30,000 coins. This example is tied for the finest certified by PCGS, one of only 16 at this grade level (3/11). The sharp strike and excellent luster create abundant eye appeal, but the two-toned light-pink and greenish-gold coloration puts this piece over the top in desirability. A superlative type coin. Ex: Dallas Signature (Heritage, 7/2006), lot 948. (#7845)

#### Crisply Detailed Gem 1896 Quarter Eagle

6357 1896 MS65 PCGS. CAC. A crisply detailed Gem with fantastic luster that ranges from canary-yellow to bold sun-gold as it sweeps across each side. A fantastically appealing piece made all the more impressive by the date's business strike mintage of just 19,000 pieces. PCGS has graded 22 coins finer (3/11). (#7848)

## Premium Gem 1897 Quarter Eagle Sharply Struck, Attractive Color

6358 1897 MS66 NGC. CAC. The 1897 Liberty quarter eagle boasts a fairly small mintage of 29,768 pieces, and the issue is very scarce in Premium Gem condition. The present coin is an impressive Premium Gem, with needle-sharp definition on all devices, vibrant mint luster, and attractive rose-gold surfaces. Census: 48 in 66, 17 finer (2/11). (#7849)

### 1897 MS66 Quarter Eagle Remarkably Lustrous Surfaces

6359 1897 MS66 PCGS. CAC. Though the 1897 Liberty Head quarter eagle has a low business strike mintage of just under 30,000 pieces it is not as scarce as most other issues from the 1890s. However, examples in the finer Mint State grades become much more challenging to acquire. PCGS has seen only 25 Premium Gems, and a mere seven specimens are finer (3/11). This remarkably lustrous example boasts bright fields, a full strike, and rich, reddishgold surfaces. (#7849)

#### MS66+ ★ 1898 Quarter Eagle

6360 1898 MS66+ ★ NGC. CAC. Simply fantastic eye appeal on this coin that comes incredibly close to Superb Gem status. The devices are exquisitely detailed, and the pale yellow-gold fields show considerable reflectivity which doubtless contributed to the Star designation. A small copper spot is noted behind the eagle's head. (#7850)

#### Premium Gem 1901 Two and a Half

6361 1901 MS66 PCGS. CAC. Blended orange-gold and apple-green toning enriches this lustrous and well preserved high grade Liberty type coin. The strike is intricate except for the dentils, which slope slightly toward the field. The base of the second 1 in the date is clearly repunched. Population: 76 in 66, 9 finer (3/11). (#7853)

# Superb Gem 1901 Quarter Eagle Only a Single Specimen Finer at NGC

- 6362 1901 MS67 NGC. The 1901 Liberty quarter eagle is an available date, and a popular type coin, from a mintage of 91,100 pieces. The present coin is a magnificent Superb Gem, with razor-sharp devices and blazing mint luster. The surfaces are a pleasing yellowgold color, with attractive rose highlights. Census: 25 in 67, 1 finer (2/11). (#7853)
- 6363 1902 MS65 PCGS. Lime-green borders encompass pumpkinorange centers. This outstanding Gem provides a full strike and potent luster. Housed in a first generation holder. From The Orchid Collection. (#7854)
- 6364 1903 MS64 NGC. This needle-sharp Choice Liberty type coin is carefully preserved and exhibits sweeping cartwheel luster. The centers are butter-gold, while the margins display traces of lime. (#7855)
- 6365 1903 MS65 NGC. This impressive Gem 1903 Liberty half eagle is sharply rendered throughout, and the lustrous surfaces display attractive yellow-gold color, with rose highlights.(#7855)
- 6366 1904 MS64 NGC. An impressively detailed near-Gem that is well-suited for a type set of similar appearance. Butter-yellow surfaces are satiny, yet undeniably lustrous.(#7856)
- 6367 1904 MS64 NGC. Rich apricot toning, booming luster, and uncommonly clean surfaces only begin to describe the appeal of this Choice Liberty type coin. A few dentils slope slightly toward the field, but the strike is otherwise absolute. In a former generation holder. From The Orchid Collection. (#7856)
- 6368 1904 MS65 NGC. This attractive Gem 1904 Liberty half eagle exhibits pinpoint definition on all design elements, and the light rose-gold surfaces radiate vibrant mint luster. Eye appeal is quite strong.(#7856)

# 1904 Liberty Quarter Eagle, MS67+ Only Four Coins Finer at NGC

- 6369 1904 MS67+ NGC. CAC. This high-end Superb Gem 1904 quarter eagle approaches perfection, with a combination of razor-sharp devices, vibrant mint luster, and attractive greenish-gold surfaces. No handling marks are apparent without the use of a glass, and eye appeal is tremendous. Census: 6 in 67, 4 finer (3/11). (#7856)
- 6370 1904 MS63 Prooflike NGC. The well struck and luminous devices contrast with the surprisingly mirrored fields. This well preserved quarter eagle likely traded as a proof prior to third party certification. Census: 4 in 63 Prooflike, 5 finer as Prooflike (3/11). (#77856)

6371 1905 MS65 NGC. Crisply detailed with rich, swirling luster that is largely peach and orange. A shallow shiny planchet defect is noted between stars 11 and 12 on the obverse. (#7857)

#### 1905 Two and a Half, MS67 Only One Finer at PCGS

- 6372 1905 MS67 PCGS. CAC. A stunning beauty, this Superb Gem has frosty orange-gold luster with bold design definition and pristine surfaces, displaying only a few microscopic marks on the reverse. The Liberty quarter eagles of the early 20th century are plentiful in lower grades but are rarely seen as fine as this piece. Population: 49 in 67, 1 finer (3/11). (#7857)
- 6373 1906 MS65 PCGS. A delightful Gem specimen, this 1906 quarter eagle is sharply detailed in all areas. The rich greenish-gold surfaces display highlights of rose color, with ample mint luster. (#7858)
- 6374 No lot.
- 6375 1907 MS64 NGC. A sharply detailed near-Gem, this Liberty quarter eagle has light yellow surfaces with satiny luster. The fields are lightly prooflike. An attractive piece, destined for a gold type set or specialized Liberty quarter eagle collection.(#7859)

# 1907 Liberty Quarter Eagle MS67 An Ideal Gold Type Coin

6376 1907 MS67 NGC. A butter-gold Superb Gem with unabraded fields and imposing eye appeal. The strike is sharp despite slight incompleteness on the feathers of the left (facing) leg. The final issue of the long-lived Coronet type, which had graced the denomination since 1840. NGC has certified a mere five coins finer (3/11). (#7859)

# PROOF LIBERTY QUARTER EAGLE

## PR61 1904 Quarter Eagle Mintage 170 Specimens

6377 1904 PR61 PCGS. Outstanding mirrors and detail are as expected for this 20th century proof issue of 170 specimens. While a number of hairlines and contacts are visible on each side, this still makes for a collectible entry into the rarefied world of classic proof gold. Population: 10 in 61, 56 finer (3/11). (#7930)

# INDIAN QUARTER EAGLES

# Unabraded Near-Gem 1909 Quarter Eagle

6378 1909 MS64 NGC. CAC. The 1909 Indian Head quarter eagle is much more elusive than generally recognized in high Mint State grades, much more so than the later P-mint issues in the series. This well-struck near-Gem boasts original antique-gold color on both sides, with good eye appeal and minimal contact. (#7940)

#### Near-Gem 1910 Quarter Eagle

- 6379 1910 MS64 PCGS. CAC. Luminous yellow-orange surfaces have soft, sweeping luster and offer generous eye appeal. The well struck obverse shows few marks of any significance, though a handful of tiny digs are present in the reverse fields. PCGS has certified 80 numerically finer representatives (3/11). (#7941)
- 6380 1910 MS64 NGC. An impressive near-Gem, this 1910 quarter eagle has strong design motifs and frosty yellow-gold luster. It possesses considerable aesthetic appeal for the grade. (#7941)

#### Sun-Yellow MS65+ 1910 Quarter Eagle

- 6381 1910 MS65+ NGC. Impressive sun-yellow color is a match for the equally impressive preservation on this Indian quarter eagle, which surpasses the usual Gem standards. Pleasingly detailed, if a touch weak on the lowest pendant, with circular lines near the edges suggesting the die erosion that granted this piece its great luster. (#7941)
- 6382 1911 MS64 NGC. CAC. Light sun-yellow luster with aspects of orange at the margins. This well-defined near-Gem has a few small marks, as expected for the grade, but the overall eye appeal is solid. (#7942)
- 6383 1911 MS64 NGC. CAC. Yellow-gold luster is bright with a frosty undercurrent on this well-defined near-Gem. Excellent eye appeal makes the piece a great type selection.(#7942)
- 6384 1911 MS64+ NGC. CAC. Bold sun-yellow luster fuels the eye appeal of this coin which puts the "near" in "near-Gem." Excellent design definition is a further credit, and the few marks present are not distracting.(#7942)

# 1911 Indian Quarter Eagle, MS65 A High-Mintage Condition Rarity

6385 1911 MS65 PCGS. The 1911 quarter eagle has one of the highest mintages of the Indian Head series, but Gems and finer pieces are nonetheless elusive, and nearly as difficult as better-known issues such as the 1914 and 1914-D. This piece offers marvelously smooth yellow-orange surfaces, particularly on the Indian's cheek and the field before it. The strike is also somewhat stronger than usually seen on this type and date. Population: 70 in 65, 1 finer (2/11).

# AU Details 1911-D Quarter Eagle

6386 1911-D — Improperly Cleaned — NGC Details. AU. With a mintage less than one-fifth that of its nearest rival, the 1911-D quarter eagle is an obvious choice for key date of its series. The present example, though lightly rubbed with orange-gold luster disturbed by cleaning, is still sure to get a warm reception from interested bidders.

#### 1911-D Quarter Eagle, AU Details

6387 1911-D — Improperly Cleaned — NGC Details. AU. This sharply detailed 1911-D quarter eagle shows few signs of circulation, but the light greenish-gold surfaces display an unnatural brightness, indicative of a previous cleaning. With its series-low mintage and long-established key status, collectors prize examples of the 1911-D in any condition.

#### 1911-D Two and a Half, Near-Mint Example

6388 1911-D AU58 NGC. Only slight disruption of the mint luster in the fields indicates that this coin is not Uncirculated. From the point of view of appearance alone, this piece would fit nicely in an Uncirculated set of Indian quarter eagles. The surfaces are even reddish-gold and the mintmark is boldly struck up. (#7943)

# 1911-D Indian Quarter Eagle, Unc Details

6389 1911-D — Improperly Cleaned — NGC Details. Unc. The low-mintage key to the Indian quarter eagle series, the 1911-D is always popular with series enthusiasts. The present coin is sharply detailed, with attractive orange-gold surfaces. The mint luster is slightly subdued by a light cleaning, but this coin remains an attractive example of this sought-after date.

## 1912 Quarter Eagle, MS64 Upper-End Example

6390 1912 MS64 PCGS. CAC. The 1912 quarter eagle, from a large mintage of 616,000 business strikes, is surprisingly difficult to locate in grades above MS64. Indeed, Jeff Garrett and Ron Guth contend in their *Encyclopedia of U.S. Gold Coins* that "the 1912 quarter eagle is one of the key dates to the series." The surfaces of this coin are bright yellow-gold with hints of red in the recesses of the design. A definite upper-end example. (#7944)

### MS64 1912 Quarter Eagle Great Luster

- 6391 1912 MS64 PCGS. Powerful yellow-gold luster takes on occasional sun-gold hues. This is an important near-Gem example of an Indian quarter eagle issue that is available for a price in MS64 but emerges as a borderline condition rarity any finer. PCGS has certified only 59 such examples (3/11). (#7944)
- 6392 1913 MS64+ PCGS. CAC. Assigned the Plus designation at PCGS, this Indian quarter eagle has bright yellow luster and sharp design features with pristine surfaces and delicate pinkish overtones. Trivial blemishes on each side limit an even finer grade. (#7945)
- 6393 1913 MS64+ PCGS. CAC. This sharply defined piece is frosty with light yellow luster and bold design elements. Both sides show the usual trivial, grade-limiting marks that are always seen. Here is an outstanding example for the specialist or type collector. (#7945)
- 6394 1914 MS62 NGC. Pale rose-gold color graces the surfaces of this attractive MS62 specimen. The design elements are well defined and the surfaces display subtle mint luster. The 1914 Indian quarter eagle boasts a low mintage of 240,000 pieces.(#7946)
- 6395 1914 MS62 NGC. Hints of rose enhance the eye appeal of this satiny example. Both sides have darker overtones that are visible in the fields. This issue is elusive in higher grades, with an average certified grade of just 60.(#7946)
- 6396 1914-D MS63 PCGS. Sun-yellow surfaces are lustrous with only slight subdual at the margins. A boldly struck example with the usual wispy but grade-defining abrasions around the devices. (#7947)
- 6397 1914-D MS63 PCGS. A lovely Select Mint State piece, this 1914-D has bright orange-gold luster with sharp design motifs. Trivial surface marks include a small nick below the L in LIBERTY. (#7947)

- 6398 1914-D MS63+ PCGS. Although a few small marks limit the technical grade, this piece has exceptional eye appeal with its combination of pale green and rose tones over frosty yellow luster. (#7947)
- 6399 1914-D MS63+ NGC. The 1914-D Indian quarter eagle is a leading condition rarity in the series, with high grade examples becoming quite elusive at the Gem level. This attractive high-end Select specimen makes an appropriate Choice for most collectors seeking a balance of quality and availability. The devices are well detailed, and the yellow-gold surfaces are highlighted by hints of rose.(#7947)

## 1914-D Indian Two and a Half, MS64 An Underrated Issue

- 6400 1914-D MS64 PCGS. CAC. The 1914-D is an underappreciated issue in the short Indian Head quarter eagle series. Near-Gem is the finest level of preservation that most collectors might expect to locate. PCGS and NGC have each graded fewer 40 specimens finer than MS64 (3/11), and many of these are likely resubmissions or crossovers. This reddish-gold example is remarkably clean on the obverse and shows just a few shallow marks on the reverse. (#7947)
- 6401 1915 MS64 NGC. CAC. Light orange and pink accents grace lustrous yellow-gold surfaces. Well struck overall with few of the usual abrasions and solid visual appeal.(#7948)
- 6402 1915 MS64 PCGS. CAC. The light yellow-gold surfaces display attractive rose highlights, with subtle mint luster. The devices are well detailed, and the fields show few signs of contact. (#7948)
- 6403 1925-D MS64+ PCGS. CAC. A wonderful Choice Mint State specimen, this quarter eagle just misses the Gem category due to some trivial surface marks. The strike is sharp and the yellow-gold surfaces are highly lustrous.(#7949)
- 6404 1925-D MS64+ PCGS. CAC. A coruscating golden-green near-Gem with undisturbed surfaces and a good strike save for the usual moderate incompleteness on the headdress.(#7949)

# 1925-D Quarter Eagle, MS65+ Scarce High-Grade Example

6405 1925-D MS65+ NGC. CAC. The 1925-D Indian quarter eagle was produced in large numbers, but many pieces were struck from buckled or eroded dies. The issue is known as one of the most poorly struck dates of the series, and attractive high-grade coins are quite scarce. The present coin is a high-end Gem, with frosty mint luster and pleasing rose-gold surfaces. The design elements are well detailed, with some typical softness apparent on the headdress feathers. Evidence of die buckling can be detected near the rims. Census: 5 in 65+, 41 finer (3/11). (#7949)

# 1926 Quarter Eagle, MS65 Thick, Frosted Mint Luster

- 6406 1926 MS65 PCGS. CAC. The 1926 quarter eagle, with a mintage of 446,000 pieces, is one of the most plentiful in the Indian Head series, in Mint State. Gem specimens, such as that in the present lot, can be located occasionally with patience and searching. The mint luster on this piece is thick and frosted, and the only mentionable abrasions are a couple of tiny ones in the area of the motto on the reverse. (#7950)
- 6407 1926 MS65 PCGS. Peach and olive toning alternate across this boldly struck and refreshingly mark-free Gem. Unlike its highermintage half eagle counterpart, the final-year 1926 was set aside in quantity, but examples of the present quality are nonetheless elusive.

From The Orchid Collection. (#7950)

# Antique-Gold Gem 1926 Quarter Eagle

- 6408 1926 MS65 PCGS. CAC. A nice, clean Gem of this issue, relatively available within the series but much more elusive only one grade point finer, making the CAC label important on this piece. Lustrous antique-gold surfaces with glints of hazel in the device interstices show only trivial abrasions, mostly away from the focal points, and the strike is bold save on the lowest pendant of the necklace. PCGS has seen only 40 submissions finer (3/11). (#7950)
- 6409 1928 MS64 NGC. Sharp definition for this later issue with bright yellow-gold luster. This near-Gem Indian quarter eagle is housed in a prior-generation holder. (#7952)
- 6410 1928 MS65 PCGS. An instantly appealing, no-nonsense Gem coin, with beautiful, intensely lustrous yellow-gold surfaces. No visible distractions can be seen. Under a loupe only a couple of light scrapes before the Indian's face are noted, along with a couple of tantalizing glimpses of copper-gold in the protected areas around the devices. The strike is bold, although the hair under the headband is not entirely full. The satiny surfaces further the overall attraction. PCGS has graded 10 pieces finer (3/11). (#7952)
- 6411 1929 MS64 NGC. A frosty and fully lustrous yellow -gold near-Gem, this piece is destined for a 20th century gold type collection. Delicate orange overtones add to the eye appeal. (#7953)
- 6412 1929 MS64+ PCGS. CAC. Softly frosted luster has rich apricot and peach-gold hues. A lovely near-Gem from the last circulating issue of the denomination, well struck with few serious flaws. (#7953)

#### THREE DOLLAR GOLD PIECES

- 6413 1854 AU53 PCGS. CAC. Splashes of copper toning appear on both sides of this still lustrous green-gold example. The strike is adequate to provide good detail through the light wear that defines the grade.(#7969)
- 6414 1854 AU55 NGC. A first-year example of the three dollar denomination that circulated briefly before being pulled from commerce. Sun-yellow surfaces retain considerable luster, particularly close to the margins.(#7969)
- 6415 1854 AU55 ANACS. A lightly rubbed example from the popular first year of this odd denomination. Yellow-gold surfaces with orange overtones remain largely lustrous. (#7969)
- 6416 1854 AU58 NGC. The hair and corn stalks show a whisper of wear, but the peripheries are lustrous, as is the wreath and coronet. Minor abrasions are distributed, but none require singular description.(#7969)

# 1854 Three Dollar, MS62 Single-Year Subtype, Small DOLLARS

6417 1854 MS62 PCGS. This three dollar piece has peach-gold patina along with subtle hints of underlying lime-green. The surfaces exhibit generally pleasing luster, and reveal a few minute contact and slide marks on Liberty's cheek and neck, and several luster grazes in the fields on both sides. The design elements are essentially well brought up, though some softness is apparent in the hair beneath the headband, as is usually the case for this issue. Overall, a decent coin for the grade level. (#7969)

# Rare 1854-D Three Dollar, Fine Details

- 6418 1854-D Ex-Jewelry ANACS. Fine 12 Details. The 1854-D three dollar has a number of records going for it within the series: lowest first-year mintage; among the lowest mintages in the entire series, at 1,120 pieces; and only D-mint three. This piece represents an important opportunity to acquire a rare coin by collectors who might otherwise be priced out of the market. This yellow-gold piece was cleaned long ago and the devices are well-worn. All major types are clear, however, including the all-important mintmark, beneath which remnants of the original mount appear, now repaired.
- 6419 1854-O Damaged ANACS Details. AU50. The only New Orleans Mint three, the 1854-O is extremely popular as a type coin, from a mintage of just 24,000 pieces. This lightly circulated example shows a deep, curving cut in the field between T and A in STATES, into the headdress feathers. (#7971)
- 6420 1855 XF45 NGC. Luminous yellow-orange with peach and pink suggestions. This Choice XF coin is lightly abraded and hails from the second year of the denomination.(#7972)

#### Second-Year 1855 Three Dollar, MS61

- 6421 1855 MS61 NGC. Production of three dollar gold pieces in 1855 was less than half the quantity for the denomination's debut, an ominous sign of events to come. This example from the second year has a number of wispy abrasions in luminous gold-orange fields but also excellent design definition. (#7972)
- **6422 1856 AU55 NGC.** Subtle peach overtones settle over parts of otherwise canary-gold surfaces. A lightly worn representative from the third year of three dollar strikings. An abrasion is noted to the left of the truncation of the bust.(#7974)
- 6423 1857 Reverse Improperly Cleaned NGC Details. AU. The obverse of this lightly worn three dollar piece is yellow-gold and displays well. The reverse is hairlined from cleaning and shows a handful of pinscratches. Still, a readily collectible representative.
- 6424 1857 AU53 NGC. Considerable luster remains on the light yellow surfaces of this pleasing three-dollar gold piece. Both sides have trivial grade-consistent marks.(#7976)
- 6425 1857-S VF25 NGC. This is a scarce issue in all grades whose original mintage is only 14,000 pieces. The coin offered here has yellow-gold surfaces that are lightly abraded. The design elements reveal nice definition for the grade. (#7977)

#### Orange-Gold AU58 1860 Three Dollar

6426 1860 AU58 NGC. The 1860 three dollar gold issue was struck to the extent of 7,036 business strikes, in the year preceding the inception of the Civil War. Even that mintage would seem generous, compared to the skimpy emissions of most of the issues later in the series. This lovely near-Mint State piece boasts orangegold surfaces with pinkish accents around the devices. Minor field chatter rather than major marks are evidence of a short spate in circulation. (#7980)

#### 1860 Three Dollar, MS62

6427 1860 MS62 PCGS Secure. Ex: South Texas. Probably no more than a few hundred three dollar gold coins exist of this date, most of which are likely in circulated grades. David Bowers in his series reference estimates only 45 to 60 specimens extant in Mint State. Lustrous yellow-gold surfaces swirl with wheat and orange elements. (#7980)

# 1860-S Three Dollar, XF45 Scarcest of the Collectable S-Mints

6428 1860-S XF45 NGC. The 1860-S three dollar gold piece is the rarest of the early San Francisco issues. David Bowers (2005) suggests that 2,592 examples of the original 7,000-piece mintage were melted, leaving a net total of 4,408 coins. He also estimates that 100 to 135 specimens survive today in all grades, virtually all in circulated condition. This example has remarkably clean surfaces for 15 points of circulation, and each side has just a bit of reddish patina. (#7981)

# 1862 Three Dollar, Choice XF Popular, Moderately Available Date

6429 1862 XF45 NGC. The 1862 three dollar is a moderately available date in this popular series. The mintage was only 5,750 pieces for circulation, and of that number it is estimated that 160-210 individual coins exist today. The orange-gold surfaces of this coin are mildly abraded; the only mark of note is a shallow planchet flaw in the field in front of the nose. Even with 15 points of wear, striations in the fields are still apparent in the more protected areas around the devices. (#7983)

### Near-Mint 1864 Three Dollar Overlooked Civil War Issue

6430 1864 AU58 NGC. CAC. The 1864 three dollar gold piece is an overlooked, underappreciated issue from the historic Civil War era. From a mintage of 2,600 pieces, the 1864 is scarce-to-rare in all grades today. The present coin is lightly circulated, with touches of high-point rub on the hair and wreath. The surfaces are a pleasing greenish-gold color, with satiny mint luster. Census: 44 in 58, 39 finer (3/11). (#7985)

# 1866 Three Dollar, AU53 Mintage of Only 4,000 Pieces

6431 1866 AU53 PCGS. Luster brightens the obverse legends and outlines design elements on the reverse. No marks merit even passing mention. A scant 4,000 pieces were struck, and unlike later dates in the series, few were set aside by East Coast dealers. A majority of PCGS-graded examples are in AU grades. Ex: Long Beach Signature (Heritage, 9/2006), lot 3436, which realized \$2,875. (#7987)

# Near-Mint 1867 Three Dollar Gold Rare Date in Higher Grades

6432 1867 AU58 PCGS. A small mintage of 2,600 three dollar gold pieces was achieved in 1867, and experts believe fewer than 150 examples survive today in all grades. The present coin is a lightly circulated specimen, with just a touch of high-point rub on the devices. The pleasing orange-gold surfaces display prooflike reflectivity in sheltered areas. Population: 8 in 58, 19 finer (3/11). (#7988)

- 6433 1874 AU50 NGC. A splendid example of the plentiful 1874, this piece exhibits reflective fields with slight contrast on the lustrous yellow surfaces.(#7998)
- 6434 1874 AU55 NGC. A lightly circulated Choice AU gold type coin with ample pumpkin-gold luster in protected regions. Minimally abraded save for a thin mark or two near DOLLARS. (#7998)

6435 1874 MS60 ANACS. Well struck and friction-free. Honey-gold save for a slender obverse area of powder-blue and rose toning between 5 and 6 o'clock. Housed in an ANA cache holder. From The Michael A. Tongg Collection. (#7998)

## 1874 Three Dollar, MS62 Bright Orange-Gold Surfaces

6436 1874 MS62 PCGS. The 1874 is one of the most common dates of the three dollar gold series. David Bowers (2005) estimates up to 3,500 circulated pieces extant and between 1,700 and 2,200 Mint State coins have survived. This bright orange-gold surfaces are peppered with numerous small abrasions, none of which deserve individual mention. (#7998)

# Reddish-Orange 1874 MS62 Three Dollar With Lustrous Surfaces

6437 1874 MS62 NGC. The 1874 three dollar saw two deliveries: 21,800 on March 21, and 20,000 on April 25. Much of the metal for these is thought to have come from worn coins of various denominations taken in by the Treasury Department and the melting of gold dollars that were no longer needed (Bowers, 2005). This rich reddish-orange gold coin has good mint luster and minimal abrasions. (#7998)

# 1874 Three Dollar Gold Piece Attractive MS63 Example

6438 1874 MS63 PCGS. CAC. While high-end About Uncirculated and Mint State 60 to 62 three dollar gold pieces of 1874 are frequently seen in the marketplace, Select Uncirculated and better examples are located with increasing difficulty. The present MS63 specimen is a wonderful opportunity for the collector desiring to acquire a higher-grade piece with outstanding quality for the grade. The strike is a bit soft over the high points, but the luster is complete and shows good color. (#7998)

# Near-Gem 1874 Three Dollar Extremely Elusive Any Finer

6439 1874 MS64 PCGS. When it comes to 1874 three dollar gold coins, the near-Gem level of preservation is the highest grade most collectors can hope to locate. Full Gems are extremely elusive, as evident from PCGS/NGC population figures. Each service has seen only 13 examples higher than MS64 (3/11), and some of these are likely resubmitted or crossover coins. This lustrous, reddishorange example is just a few ticks on the reverse from a Gem grade. (#7998)

# Choice 1874 Three Dollar Gold In-Demand Type Coin

6440 1874 MS64 NGC. From a mintage of 41,800 pieces, the 1874 three dollar gold piece is an available date and a popular type coin. The coin offered here is an attractive Choice specimen, with greenish-gold surfaces and vibrant mint luster. The devices are well struck, with a touch of softness evident on Liberty's hair and the ribbon bow. Only 12 coins have been certified in higher numeric grades by NGC (3/11). (#7998)

# 1874 Three Dollar Gold, MS64 With Strong Luster

6441 1874 MS64 PCGS. This gorgeous Choice example is an ideal selection for the type collector looking to own an example of three dollar gold. Orange-infused yellow-gold surfaces have the strong, swirling luster that collectors have come to appreciate, and both sides are smooth with more wispy abrasions than significant marks. PCGS has graded 13 numerically finer examples (3/11). (#7998)

6442 1878 — Improperly Cleaned — NGC Details. AU. Luster dominates protected regions, and Liberty's hair shows only moderate wear. Lightly hairlined, but many collectors would be pleased to possess this scarce and attractive gold type coin.

- 6443 1878 AU58 NGC. CAC. A common date in the series, this piece has a trace of wear on the high points with pleasing surfaces and nearly full luster. Delicate rose toning enhances the eye appeal. (#8000)
- 6444 1878 AU58 PCGS. Pale yellow-gold luster shows only slight disturbance at the rubbed high points. Scattered minor abrasions are of little consequence to the eye appeal of this three dollar type coin.(#8000)

# 1878 Three Dollar Gold, MS62 A Well-Struck Type Coin

6445 1878 MS62 NGC. The 1878 three dollar gold piece, boasting a mintage of 82,304 circulation strikes, is the most common date of the series. Numismatists attribute its high mintage, at least in part, to anticipation of the U.S. Treasury's intent to resume the redemption of legal tender notes in specie (gold) as of January 1, 1879. This well-struck piece has bright yellow-gold color and just a tinge of red on each side. (#8000)

## 1878 Three Dollar, MS63 Superb Color and Luster

6446 1878 MS63 PCGS. Thousands of the more than 80,000 three dollar gold pieces of 1878 remained in the Mint and were later apparently melted (according to a Henry Chapman note in the R.B. Leeds catalog, November 1906, lot 49, stating that many 1878, 1879, and 1880 pieces had been melted). The surfaces of this piece are remarkably clean, and the only detraction is slight softness over the high points. The mint luster is excellent and there are no mentionable abrasions. (#8000)

## 1878 Three Dollar, MS64 Superlative Luster and Surfaces

6447 1878 MS64 PCGS. It is a happy coincidence that the 1878 is the most frequently seen three dollar gold piece in high grades and it also is the best-produced date in the series. No other issue comes close to the swirling mint luster seen on original, high-grade examples such as this one. In addition, the surfaces display a slight accent of reddish patina. A few tiny abrasions are present, which undoubtedly explain why this superlative coin is "only" an MS64. (#8000)

#### Top-Notch 1878 Three Dollar, MS64

6448 1878 MS64 PCGS. This splendid 1878 three dollar gold in near-Gem condition would be a prize in even the fussiest collector's cabinet, with engaging luster and orange-gold and reddish-gold competing for territory over each side. The strike is as sharp as the contact marks are minimal. One of the Big Three three dollar gold type issues, here in top-notch condition. (#8000)

#### 1879 Three Dollar, MS63, With Reflective Fields

6449 1879 MS63 NGC. The mintage for the 1879 three dollar was 3,000 pieces, a quantity that was diminished by an unknown number that were melted in later years. This appears to be an early striking as the fields are brightly reflective with just a faint tracing of mint luster around the devices, as one would expect from a new pair of dies. The color is light reddish-golden, and there is just a bit of softness of strike over the high points of the design, most notably on the hair curls of Liberty on the obverse. (#8001)

#### Flashy MS62 1888 Three Dollar Gold

6450 1888 MS62 PCGS. In 1888, the penultimate year of the three dollar gold denomination, just 5,000 business strikes were produced, this MS62 survivor among them. The obverse is well-defined on Liberty's hair with flashy canary-yellow fields surrounding, though the reverse shows a degree of weakness on the knot of the wreath. (#8010)

#### **EARLY HALF EAGLES**

# 1795 Capped Bust Right Five, BD-9 First Year of Gold Coinage

6451 1795 Small Eagle — Holed and Plugged — PCGS Genuine. Breen-6415, BD-9, High R.5. The PCGS number ending in .84 suggests Holed and Plugged as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been holed and plugged, with tooling in the fields. The BD-9 variety is indicated by the position of star 10 with one point at the cap, and the berries on the reverse, one inside and outside at about the same level on both sides of the wreath. John Dannreuther estimates 35-45 specimens of the BD-9 are still extant in all grades. Despite the noted flaws, this coin retains much of its original detail and remains an interesting example from the first year of U.S. gold coinage. (#8066)

6452 1807 Bust Left — Scratches — NGC Details. VF. Breen-6453, BD-8, R.2. The design of the half eagle was modified in 1807, and two varieties of the new Capped Bust Right design were introduced. This specimen represents the BD-8 variety, with the arrow feather pointing to the end of the flag of the 5. The BD-8 is relatively available, with a surviving population of 500-750 examples in all grades. This well-worn, but serviceable piece displays a few long, thin scratches on the obverse.

#### 1808 Bust Left Half Eagle, BD-3, AU Details

6453 1808 — Scratches — NGC Details. AU. Breen-6456, BD-3, R.4. There are four known die varieties for the 1808 half eagles, including two overdates and two normal dates. The BD-3 is relatively plentiful in all grades. In fact, only one of the overdate varieties is truly rare.

This orange and lemon-yellow example has nearly full detail with only slight wear. Luster is excellent and the overall eye appeal is quite nice. Both sides have light blemishes, although there are no readily apparent scratches as the NGC holder suggests. (#8102)

6454 1809/8 — Mount Removed — Genuine PCGS. Breen-6458, BD-1, High R.3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has had a mount removed. The mount was at 11:30, and the coin is slightly wavy there and opposite at 6:30 on the moderately rotated reverse. The surfaces are slightly granular but retain ample luster.

#### **CLASSIC HALF EAGLES**

6455 1834 Plain 4 AU58 NGC. Breen-6502, McCloskey 4-C, R.2. The position of the 4 in the date near the curl, together with the flag of the 5 in line with the end of the arrow fletching, indicates the McCloskey 4-C variety. This piece is lustrous and well preserved, with just a touch of high-point wear. (#8171)

# MS62 1834 Classic Head Five With Quadruple Obverse Die Crack

6456 1834 Plain 4 MS62 PCGS. First Head, Breen-6501, McCloskey 1-A, R.3. Script 8; 34 close. This is a beautiful MS62 example of this Classic Head five dollar with an original appearance. An interesting quadruple series of die cracks makes lazy arcs between star pairs 2-3, 3-4, 4-5, 5-6, and 6-7, clearly an obverse die close to failure. The green-gold interiors of this piece cede to tawny-gold at the rims. Mostly minor ticks and scrapes are grade-consistent. A nice specimen of this underrated series. Population: 43 in 62, 84 finer (3/11). (#8171)

# 1835 McCloskey 1-D Half Eagle, AU58+ Rare Die Marriage

- 6457 1835 AU58+ NGC. CAC. Breen-6504, McCloskey 1-D, R.5. This rare die marriage is seldom encountered in any grade. Both sides have lustrous green-gold surfaces with trivial surface marks. The fields are reflective and nearly prooflike, and the devices are frosty, with resulting cameo contrast on each side. This sharply detailed piece has little evidence of wear. (#8173)
- 6458 1836 AU58 NGC. Small Date, Breen-6508, McCloskey 5-D, R.3. A couple random marks in the right obverse field come together in the shape of a Y, although there is no evidence of intentional graffiti. This lemon-yellow piece has frosty luster with hints of green overtones.(#8174)
- 6459 1837 AU53 NGC. Small Date, Breen-6513, McCloskey 3-C, R.4. The Small Date, which has a script 8, is noticeably scarcer than its Large Date, block 8 counterpart. The *Guide Book* does not currently distinguish the varieties, unlike the 1836 quarter eagle. This is a lightly circulated piece with noticeable luster but no relevant marks.(#8175)

# Problem-Free 1837 Classic Five, AU58 Short-Lived Classic Head Series

6460 1837 AU58 PCGS. Large Date, Small 5, Breen-6511, McCloskey 1-A, R.4 The 1837 in near-Mint condition represents an excellent value when compared to the much less-available and much higher-priced coins in Uncirculated grades. This especially attractive coin exemplifies why Classic fives are such an attractive buy at this grade level. The surfaces retain significant mint luster around the devices, and there are no obvious or detracting abrasions. The strike is well-defined throughout. A lovely example of this scarcer date in the short-lived Classic Head series. (#8175)

#### 1838-C Half Eagle, Obverse Mintmark

6461 1838-C — Surface Damage — Genuine PCGS. Breen-6147, Variety 20, R.3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been damaged — in fact, the PCGS holder also notes "Surface Damage," the first we have seen like it. The profile of Liberty and the obverse fields show a few hits, but the limiting factor is clearly the date, where some ne'er-do-well has succeeded in effacing most of the bottom of the 1 and part of the lower 8 and 3. The reverse is in better shape, save for small pock marks at AT(ES). This piece may still fill the bill for some budget minded collectors seeking an Obverse Mintmark quarter eagle, as much detail remains elsewhere, with good overall eye appeal despite the noted flaws.

# LIBERTY HALF EAGLES

6462 1839 AU55 NGC. The first year of the Liberty half eagle is a oneyear type coin according to some. This piece has light green-gold surfaces with nearly full luster and good eye appeal. Census: 42 in 55, 70 finer (3/11).(#8191)

# 1839-C Five Dollar, VF25 One-Year Obverse Mintmark Type

6463 1839-C VF25 PCGS. Variety 1. Die State 1. The charm of the obverse mintmark lasted only one year on the Liberty design. Aside from the mintmark placement, the 1839-C is a moderately scarce issue as well with a mintage of 17,205 pieces, of which only 150-200 coins are believed known today. The devices show even wear and each side is well balanced. There are numerous small abrasions scattered over both obverse and reverse, but the only abrasions worthy of note are a couple of milling marks in the lower right obverse field. (#8192)

# Choice XF 1839-C Half Eagle Ephemeral Single-Year Portrait Subtype

6464 1839-C XF45 NGC. Variety 1. The only dies. 1839 is the sole year for the First Head design of the long-lived Liberty series, which makes the 1839-C the only Charlotte issue for the subtype. Although the differences from the 1840 are subtle, the bust truncation is more pronounced, and Liberty possesses a sleepy, less alert expression. This is a well-detailed Choice XF example with moderately abraded pale green-gold surfaces. (#8192)

# 1839-D Five Dollar, VF25 Variety 1-A, Rarer of Two Obverses

6465 1839-D VF25 NGC. Variety 1-A. This is the rarer of the two obverses known for this important issue. The 1839-D and the 1839-C are the only obverse mintmark Liberty half eagle issues, and the portrait of Liberty also differs slightly from later dates. The mintage was only 18,939 pieces and of that number it is estimated that today 125-150 examples survive in all grades. This bright canarygold representative shows wear throughout the hair, but the eagle's feathers retain rich detail. (#8193)

# 1839-D Half Eagle, XF40 First Year of Liberty Head Design

6466 1839-D XF40 NGC. Variety 2-A. The 1839-D half eagle represents the first year of the Liberty Head design, and the motif was subtly revised in 1840, making the design a one-year subtype. A small mintage of 18,900 pieces was achieved, and Doug Winter estimates only 125-150 examples survive today in all grades. The mintmark is centered over the space between 3 and 9 in the date, indicating Variety 2-A. The slightly granular greenish-gold surfaces retain much original detail and luster. Census: 12 in 40, 81 finer (2/11). (#8193)

6467 1840 Narrow Mill AU55 NGC. The thin outer rims indicate the Narrow Mill or smaller diameter that became standard the following year. This pleasing example has light wear on the high points, with nearly full greenish-yellow luster and faint rose overtones.(#8194)

- 6468 1840 Narrow Mill Improperly Cleaned NGC Details. Unc. The more common Narrow Mill or normal-diameter type for the year. While this early Coronet half eagle has no trace of wear, the sun-gold luster on each side is disturbed by a past cleaning. Nonetheless, this coin will appeal to a significant segment of the collector base.(#8194)
- 6469 1840 Broad Mill AU58 PCGS. The Broad Mill variant of half eagles is distinctive thanks to the widened rims on each side and far rarer than the Narrow or Normal Mill versions of any given issue, such as the 1840 from Philadelphia. On this near-Mint example, pale green-gold surfaces remain immensely lustrous despite a touch of rub on the high points.

# 1840-C Five Dollar, AU50 Probably Fewer Than Two Dozen Known in AU

- 6470 1840-C AU50 NGC. Variety 1. First year the mintmark was moved to the reverse, the 1840-C is also one of the most difficult Charlotte fives to find in both high grade and with problem-free surfaces. Of the 125-150 pieces believed known in all grades, only 20-25 examples may exist in Almost Uncirculated. As with almost all pieces, this one is weakly defined and there are numerous small to medium abrasions scattered over both sides. Pronounced reddish-gold color. (#8196)
- 6471 1840-O Broad Mill AU53 PCGS. This lower mintage No Motto New Orleans five has more luster than is expected of the AU53 grade. The green-gold color is original, and a few faded wispy marks are noted on the field near Liberty's chin. Certified in a first generation holder.(#8200)
- 6472 1841 AU58 NGC. The 1841 Liberty half eagle is a scarce date, from a mintage of 15,833 pieces. The present coin is a sharply detailed near-Mint specimen, with light yellow-gold surfaces and bright mint luster. A short scratch between stars 12 and 13 is the only mentionable flaw. Census: 34 in 58, 21 finer (3/11). (#8202)

# Seldom-Seen Choice AU 1841-D Small D Five Dollar

6473 1841-D Small D AU55 NGC. Variety 5-D. The Small D reverse can also be distinguished by a small hollow spot at the top of the second vertical shield stripe. The other reverse found on D-mints from this year employs a reverse of 1840 with a medium-sized mintmark. Of the 29,392 pieces struck, only 150-175 examples are believed known today in all grades with 32-40 estimated in AU. This still-lustrous example is well defined with delicate reddish accents over both sides. Census: 12 in 55, 33 finer (3/11). (#8204)

# Near-Mint State 1842 Small Letters Five With Reverse Die Cracks

- 6474 1842 Small Letters AU58 NGC. The Small Letters five dollar of 1842, showing a wide space between FIVE and D., is much more available than the rare Large Letters, with little space intervening. This Small Letters example is appealing due to its scarcely circulated status, lovely orange-gold color, and bold strike, and it is interesting due also to the numerous die cracks that appear at the lower reverse, through much of UNIT, FIVE D., and ERICA. This near-Mint State specimen is far finer than usually seen for this issue, which usually appears well-circulated. Census: 4 in 58, 5 finer (3/11). (#8207)
- 6475 1842-D Small Date, Small Letters XF40 ANACS. Variety 8-E. This bright sun-gold Dahlonega half eagle has the sharpness of an AU example, and the reverse legends display flashy luster. A reeding mark on the cheekbone merits passing mention. (#8210)

# 1842-D Variety 6-E Half Eagle, AU58 Small Date Logotype

- 6476 1842-D Small Date AU58 PCGS. Variety 6-E. The only known dies. The Small Date variant is certainly the more obtainable of the two date sizes of this year, representing approximately two-thirds of the survivors known of this issue. However, in AU grades only 20-22 coins are believed extant today with this piece just outside the Condition Census. This example shows a number of small marks on each side and the surfaces overall have a pronounced yellow-gold color. Fully struck throughout, and very unusual as such. Population: 11 in 58, 8 finer (3/11). (#8210)
- 6477 1843-C VF25 NGC. Variety 2. The original apricot-gold surfaces are free from the noticeable abrasions usually encountered on circulated gold coins. The curls are worn, but ample wing plumage remains. Ex: FUN Signature (Heritage, 1/2008), lot 4195, which realized \$1,552.50.(#8214)
- 6478 1843-C Improperly Cleaned NGC Details. XF. Variety 2. The 1843-C Liberty half eagle is a scarce issue, with a surviving population of 225-250 examples in all grades. The present coin displays lightly worn devices and rich greenish-gold surfaces. Traces of mint luster are still present, despite the noted cleaning. (#8214)

## Choice XF 1843-C Five Attractive, Reddish-Tinted Surfaces

6479 1843-C XF45 NGC. Variety 2. The 1843-C is a scarce issue in spite of its "high" mintage of 43,277 pieces. Only 225-250 individual coins are believed known today, including a small number of lower-end Uncirculated pieces that surfaced several years ago. This Choice XF has even wear over Liberty's hair curls, the eagle's neck, and shield. The reddish-gold surfaces are outlined in occasional bits of deeper russet patina. Pleasing overall for the grade. (#8214)

# 1843-C Five Dollar, AU55 Ex: Eliasberg

6480 1843-C AU55 PCGS. CAC. Variety 2. Ex: Eliasberg. The 1843-C five is a scarce coin for the specialist in high grades. This Choice AU retains faint portions of mint luster around the devices on each side, and the color is a pronounced green-gold with a slight overlay of reddish patina. The central devices are well detailed on the obverse, but the reverse shows soft on the head of the eagle. The only abrasion worthy of note is a long, diagonal mark across the horizontal shield lines.

Ex: Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 426. (#8214)

6481 1843-D Medium D — Reverse Damage — NGC Details. XF. Variety 10-H. The 1843-D is a popular mintmark type coin, from a mintage of 98,452 pieces. Doug Winter estimates the surviving population at 225-250 examples in all grades. This coin shows several reverse rim cuts at 3 o'clock, and a couple of minor punctures below the eagle's beak.

# Popular AU 1843-D Half Eagle Medium D Mintmark

6482 1843-D Medium D AU50 NGC. Variety 10-H. Although this Dahlonega type coin has witnessed brief circulation, the pale gold surfaces are without any noticeable abrasions. Liberty's curls are lightly struck, but the eagle's plumage is generally sharply impressed. A gold rush in Georgia during the 1830s led to a small, remote branch mint near the mining fields, which operated until the Civil War. (#8215)

## 1844 Liberty Half Eagle, MS62 No Motto Condition Rarity

6483 1844 MS62 PCGS. Housed in a green-label PCGS holder, this lovely Mint State piece is fully brilliant with satiny yellow-gold luster. A small splash of orange toning is evident on the obverse border at about 8 o'clock. A small concentration of trivial marks is noted above the olive branch. This important No Motto half eagle is rarely seen in Mint State grades. Population: 9 in 62, 8 finer (3/11). (#8219)

#### Borderline Uncirculated 1844-D No Motto Five

6484 1844-D AU58 NGC. Variety 11-H. A lovely Borderline Uncirculated Dahlonega type coin. Vibrant luster fills the devices and borders, and the strike is crisp throughout. Small marks are present but are trivial for the grade. The original apricot toning favorably compares with the colorless examples typically encountered. Ideal for the value-conscious Southern gold collector. (#8221)

## 1845-D Half Eagle, AU53 Unusual Visual Appeal

6485 1845-D AU53 NGC. Variety 12-I. The 1845-D Liberty half eagle is a scarce issue in AU53, from a mintage of 90,629 pieces. Doug Winter estimates a surviving population of 225-250 examples in all grades, with AU pieces accounting for about 20% of this total. The present coin is sharply detailed, with rich orange-gold color, and bright mint luster.

From The Orchid Collection. (#8224)

6486 1845-O AU50 PCGS. A lemon-tinged example of an elusive New Orleans No Motto issue. Despite light wear, luster glimmers from the legends, eagle, and curls. Void of consequential marks. Only 41,000 pieces were struck. Population: 12 in 50, 24 finer (3/11). (#8225)

# 1845-O Five Dollar, Choice AU Only Two Dozen or so AUs Believed Known

6487 1845-O AU55 NGC. The 1845-O five dollar is a median scarcity in the New Orleans series in terms of both absolute and condition scarcity. Interestingly, it is actually scarcer than the much better-known C and D-mint issues from this year. Only 5-6 Uncirculated pieces are believed known with two dozen or so AU coins extant. This well-struck Choice AU has slightly bright surfaces with the only mentionable surface flaws being a V-shaped scratch in the field below the TA in STATES. (#8225)

# 1846-C Five Dollar, AU50 Few Available in Any Grade

6488 1846-C AU50 NGC. After a fire closed the Charlotte Mint in 1844, it did not reopen until October 1846 and then only produced 12,995 five dollar gold pieces. Only 100-125 examples are believed known today, with 20-24 pieces estimated in AU. The small number of survivors as a percentage of the mintage is most likely attributable to higher demand created by the mint's closure for more than a year. This is a bright yellow-gold five that is surprisingly well detailed. The only mentionable marks are both on the reverse: There is a scratch across the left (facing) leg of the eagle, and a series of skipping milling marks in the field below the eagle's right (facing) wing. (#8227)

#### Sharply Struck MS62 1847 Half Eagle

6489 1847 MS62 PCGS. Bright sun-gold luster with elements of lighter yellow and deeper orange scattered on each side. Excellent detail with no trace of wear, though this pre-California Gold Rush piece does show a number of light to moderate abrasions. The piece retains considerable eye appeal despite those faults. Population: 47 in 62, 22 finer (3/11). (#8231)

# 1847 Liberty Five, MS63 Only 13 Finer Submissions

6490 1847 MS63 NGC. The 1847 half eagle is relatively common in circulated grades, but becomes a more challenging issue in Mint State, especially MS63 and above. The present coin displays attractive brass-gold surfaces and bright luster. The design elements are well impressed, and exhibit excellent definition in the star centrils and the eagle's feathers. A handful of light scuffs define the grade. Census: 29 in 63, 13 finer (3/11). (#8231)

6491 1848-D XF40 NGC. Variety 18-M. Reverse with die crack through arrowheads and the A in STATES as well. Softly struck but still luminous with orange elements gracing moderately abraded sun-gold surfaces. A solid introductory Dahlonega half eagle. Census: 5 in 40, 93 finer (3/11).(#8238)

# 1849-C No Motto Half Eagle, AU55 Prooflike Remaining Luster

- 6492 1849-C AU55 NGC. Variety 1. The usual die state with a radial crack before the U in UNITED. This Charlotte Mint gold type coin displays much prooflike luster, especially along the reverse border. Most marks are trivial, although we note contact on the nose, upper shield, and on the obverse rim at 7 o'clock. (#8241)
- 6493 1849-D Improperly Cleaned NGC Details. XF. Variety 22-L. From a mintage of 39,036 pieces, the 1849-D half eagle is a rare date in all grades, with a surviving population of 125-150 pieces. This coin shows light wear on the devices, but the surfaces are an unusually bright greenish-gold color.
- 6494 1850-C Weak C Obverse Scratched NGC Details. AU. Variety 4. The mintmark is barely perceptible unless one knows where to look, but it is visible to the discerning unaided eye. Luminous yellow-orange with a scratch down the portrait but a better-preserved reverse which shows only minor wear.
- 6495 1850-D Improperly Cleaned NGC Details. XF. Variety 24-P. The 1850-D Liberty half eagle is the third rarest D-mint issue of the series, from a mintage of 43,984 pieces. The surviving population is thought to number between 110 and 120 pieces in all grades. This specimen shows the "Weak D" mintmark, with extensive peripheral die cracks.
- 6496 1851 MS61 NGC. Despite the high mintage of 377,505 coins, few Mint State pieces survive today. This example has brilliant yellow luster with frosty surfaces and minuscule marks. Census: 30 in 61, 33 finer (3/11).(#8246)

#### Sharp AU55 1851-C Five Dollar

- 6497 1851-C AU55 NGC. Variety 1. The "earlobe punch" variety, although nowadays the "pierced ear" might be more appropriate. The 1851-C is a much rarer issue than one might imagine from the mintage of 49,176 pieces, one that Doug Winter calls "somewhat forgotten and clearly underrated." This specimen shows the numerous abrasions that 1851-C fives are known for, with only one significant mark, above the eagle's head on the reverse. The strike is good but incomplete, as expected. The surfaces are rich light-yellow with small areas of prooflike surface around the device edges.

  Ex: Palm Beach Signature (Heritage, 3/2005), lot 6946. (#8247)
- 6498 1852 MS62 PCGS. A lovely example that survives from a mintage of more than half a million coins, this half eagle has brilliant yellow surfaces and sharp details with trivial grade-limiting marks. Population: 39 in 62, 24 finer (3/11).(#8250)

- 6499 1852-D VG8 PCGS. CAC. Variety 28-U. The obverse has the 1 well right of the bust tip, and the reverse has a vertical die line through the right side of the final S. This piece has considerable wear, but some internal device detail is visible on each side. Trivial scratches are consistent with the grade. (#8252)
- 6500 1852-D Scratches NGC Details. AU. Variety 28-U. The left obverse and upper reverse fields show a number of scratches. Otherwise, this D-mint half eagle is a luminous and pleasing coin with light wear and great yellow-orange patina.
- 6501 1853-C Improperly Cleaned NGC Details. XF. Variety 3. The Weak C reverse, although undesignated as such by NGC. The mintmark is fully outlined but has low relief, as it was lightly punched into the reverse die. The olive-green and chestnut surfaces are cloudy from hairlines, but no distracting marks are evident.

# Uncirculated 1853-C Half Eagle Rare Die Variety

6502 1853-C MS60 NGC. Variety 3. A rare die pairing (Variety 1 is usual) with the mintmark centered above the E in FIVE instead of the V. The date is left aligned with the bust truncation. The mintmark on this variety is usually weak, since it was lightly entered on the reverse die. However, the present coin has a nearly full mintmark, along with substantial sun-gold luster and a few moderate obverse abrasions. Certified in a former generation holder. (#8254)

# 1853-C Five Dollar, MS61 Mint State Charlotte Type Coin

6503 1853-C MS61 NGC. Variety 1. Prooflike luster fills the legends and outlines the stars of this Mint State Charlotte five. The strike is above average for the issue, although the curls show moderate incompleteness. Minimally abraded, although to provide identification, we note a pinscratch beneath OF. Census: 6 in 61, 13 finer (3/11). (#8254)

# 1853-D Large D Five Dollar, AU53 Perfect for Type Purposes

6504 1853-D Large D AU53 PCGS. Variety 29-V. There are three Large D varieties known of this frequently seen date and one Medium D variant. The latter must be a major rarity as we have no records of such a coin in our auctions and only five examples have been certified. The 1853-D is the logical choice for type purposes as it is easily locatable in XF and occasionally even in AU and Uncirculated. This attractive AU example displays even reddishorange color over each side, the devices are sharply defined, and there are no abrasions that merit mention.

From The Dr. Donald M. Gilner Collection. (#8255)

1853-D Large D Five Dollar Bright AU53 Example

6505 1853-D Large D AU53 PCGS. Variety 29-T. This Large D variant is easily attributable by the placement of the mintmark far to the left of the other two mintmarks. The large mintage for a D-mint five of 89,678 pieces led to a relatively large number of survivors. It is estimated that 275-325 examples are known in all grades of the 1853-D. This pleasing AU has bright, semireflective fields and only small abrasions scattered over each side. The striking details are soft on both obverse and reverse, a normal occurrence on this issue. (#8255)

6506 1854-D Large D — Improperly Cleaned — NGC Details. VF. Variety 31-X. A moderately worn piece with yellow-orange surfaces that show an obvious gloss from cleaning. The reverse has the better appearance and is acceptable for display.

#### Choice AU 1856-C Five Dollar Partial Mint Luster

6507 1856-C AU55 NGC. Variety 1. Sharply impressed for a Charlotte issue, and luster fills the reverse legend as well as the eagle and hair. Generally unabraded for the grade, aside from a single thin mark above the eagle's neck. A mere 28,457 pieces were struck. Census: 30 in 55, 41 finer (3/11). (#8267)

6508 1856-O XF45 PCGS. Considerable luster is still visible on this pleasing piece, despite noticeable wear on the design elements. The light yellow surfaces host modest marks that are consistent with the grades. The 1856-O is a scarce, low-mintage date that is seldom encountered in any grade. Population: 11 in 45, 19 finer (3/11). (#8269)

#### AU53 1857-C No Motto Five

6509 1857-C AU53 NGC. Variety 1. The present coin exhibits much more luster than the typical AU53 Charlotte Mint half eagle, and although small marks are distributed, none are worthy of individual description. The strike shows moderate softness on Liberty's curls and the eagle's neck, perhaps the reason for the conservatively assessed third party grade. (#8272)

6510 1857-S AU55 NGC. The straw-gold surfaces are only moderately abraded, and a bright band of luster outlines individual stars. Just 87,000 half eagles were struck at San Francisco in 1857, since double eagles were more convenient for bank reserves and foreign trade. Census: 24 in 55, 26 finer (3/11).(#8275)

6511 1858-C XF40 PCGS. Variety 1. This 1858-C half eagle is a well detailed piece that shows moderate wear on the devices and a normal number of contact marks in the fields. The light greenish-gold surfaces display darker patina around the devices. (#8277)

6512 1858-C — Cleaned — ANACS Details. AU58. Variety 1. This is the usual variety for the 1858-C half eagle with the mintmark over the right top of the V in FIVE. Light hairlines are evident on the medium yellow surfaces of each side, but the overall appearance is excellent.

### Still-Lustrous 1858-D Five, AU53 Scarcer D-Mint Issue

6513 1858-D AU53 NGC. Variety 35-CC. The 1858-D is seldom seen in any grade and is especially elusive in Almost Uncirculated. Only 125-150 pieces are estimated known in all grades, and of that number only 30-36 examples are believed extant in AU. This piece has little wear and noticeable traces of bright mint luster around the margins and devices. The centers are slightly soft, as almost always seen, and each side is peppered with numerous small, but individually insignificant abrasions.

From The Michael A. Tongg Collection. (#8278)

6514 1859 AU58 NGC. Only 16,734 pieces were struck for this scarce and conditionally rare Philly issue. A nicely struck peach-gold example with substantial luster and slight struck-in grease near the Y in LIBERTY. Census: 18 in 58, 6 finer (3/11).(#8280)

## 1859-D Large D Half Eagle, AU55 Scarce, Low-Mintage Issue

- 6515 1859-D Large D AU55 PCGS. CAC. Variety 37-EE. The 1859-D has a memorably low mintage of only 10,366 pieces, second lowest in the series. Only 120-140 examples are believed to exist today, and most examples are no better than XF. Few are known in AU, and the 1859-D is a major rarity in Uncirculated. The reddishgold surfaces show the usual softness of strike on the eagle's neck and the curls around Liberty's face, but only slight abrasions are scattered over each side, none of which are worthy of mention. A curious spot of green is located just below star 7. (#98282)
- 6516 1860-C Improperly Cleaned NGC Details. AU. Variety 1. Sole dies for the year. Though cleaned, this well struck and minimally worn example is an important survivor from a latedate Charlotte issue. Small digs are noted on each side, and a rim abrasion is present at the bottom reverse.
- 6517 1863-S VF20 NGC. The 1863-S Liberty half eagle is a rare issue in all grades. The small mintage of 17,000 pieces was released into circulation, with no examples saved by collectors. This piece shows significant wear, but the surfaces are lightly abraded, with no problems. Census: 2 in 20, 52 finer (3/11).(#8295)

# 1864 Five Dollar, XF45 A Low-Mintage, Heavily Melted Date

6518 1864 XF45 PCGS. The mintage of 4,100 pieces only partially explains the rarity of the 1864 five. Not only were few produced, but of those that were struck many were melted. This date is rarely seen above Choice XF and there are only a couple of Uncirculated pieces known. The reddish-gold surfaces retain only the slightest traces of luster, and there are numerous small to medium-sized abrasions on each side. (#8296)

## Choice AU 1864 Half Eagle Low-Mintage Civil War Issue

- 6519 1864 AU55 NGC. Jeff Garrett and Ron Guth describe the 1864 Liberty half eagle as "very rare and underrated." Only 4,170 Philadelphia half eagles were minted in 1864, reflecting the economic uncertainties of the Civil War. The coin offered here is an attractive Choice AU piece, with a few contact marks below Liberty's chin and just a touch of high-point wear on the devices. The light green and rose-gold surfaces retain much original mint luster. (#8296)
- 6520 1866 Polished NGC Details. AU. The introductory Motto issue has a tiny mintage of 6,700 pieces, since gold coins did not circulate in 1866 except on the West Coast, where double eagles were preferred. This sharply struck rare date half eagle has minimal actual wear, but is bright and glossy from a thorough cleaning.

# Borderline Uncirculated 1869 Five Ultralow 1,760-Piece Mintage

6521 1869 AU58 NGC. Although the Civil War ended in 1865, gold coins remained absent from East Coast circulation for a number of additional years, since Federal currency could not be redeemed for specie. Thus, mintages of most gold denominations dwindled to token levels. The 1869 five has a particularly low production of just 1,760 pieces. This honey-gold near-Mint example likely resides within the Condition Census, as it is sharply struck and only lightly abraded. (#8317)

#### Deeply Toned 1869-S Five, AU53

6522 1869-S AU53 PCGS. A deeply toned and lovely survivor of this postbellum S-mint half eagle. Mellow orange-gold centers cede to lilac, blue, and violet near the rims on each side, an unusual but engaging effect that nonetheless appears completely original. This piece, from a mintage of 31,000 coins, shows quite a few small abrasions but no singular impairments, and some of the central high-point detail is a bit softly struck. But this piece retains compelling eye appeal. Population: 6 in 53, 7 finer (3/11). (#8318)

6523 1871-S AU50 PCGS. A pleasing example of a scarce issue that is usually found in lower grades. This piece has considerable luster with scattered grade-consistent marks. Population: 9 in 50, 16 finer (3/11).(#8324)

#### Scarce AU 1872-S Half Eagle Substantial Luster

6524 1872-S AU50 NGC. Double eagles dominated San Francisco gold production prior to 1878, which suggests that merchants and bankers preferred the payment convenience of large denominations. Thus, S-mint half eagles from that era are scarce, particularly with generous portions of remaining luster. This is a lightly worn and typically struck piece with minor scuffs on the upper left obverse field. (#8327)

6525 1873 Closed 3 MS61 NGC. This well detailed Mint State representative shows a little softness on the central devices, but the light greenish-gold surfaces are quite lustrous. The Closed 3 is the rarer of the two major varieties for this date. Census: 35 in 61, 26 finer (3/11).(#8329)

#### Two-Toned 1874-CC Five, AU

6526 1874-CC AU50 PCGS. The two-toned toning approach on this AU 1874-CC five is an engaging combination of hazel and rich orange-gold, competing for territory in equal proportion. Despite the smallish mintage of about 22,000 pieces, this issue can be found with regularity, although those certified survivors are only Choice VF or so. This piece shows grade-consistent wear and a sharp strike that add up to grand eye appeal. Population: 4 in 50, 30 finer (3/11). (#8334)

#### Partly Lustrous AU 1874-S Five

6527 1874-S AU50 PCGS. CAC. Canary-gold luster fills the margins and plumage of this much better date San Francisco half eagle. The open fields are olive-gold. Relatively unabraded aside from a brief slender mark near star 2. Neither PCGS nor NGC have certified any examples as Mint State. Population: 7 in 50, 10 finer (2/10). (#8335)

6528 1875-CC Fine 15 PCGS. Bright canary-yellow surfaces host light green overtones on this green-label PCGS certified piece. Both sides have minor marks and scratches consistent with the grade. Here is an opportunity to acquire an affordable example of this scarce Carson City issued half eagle.(#8337)

### Historic 1876-S Half Eagle, XF Centennial San Francisco Issue

6529 1876-S XF40 PCGS. A historic antebellum S-mint from America's Centennial year, the 1876-S is also a low-mintage issue, produced to the extent of a skimpy 4,000 coins. This XF example displays well, with muted luster remaining on surfaces that are well-struck if not fully so. A tad nicer than usually seen for the issue. Population: 4 in 40, 8 finer (3/11). (#8341)

6530 1878 MS63+ PCGS. A surprising condition rarity in the Liberty half eagle series from a mintage of 131,720 coins, the 1878 is rarely seen in grades above MS63. This pleasing piece exhibits frosty light yellow luster with splashes of deeper yellow on each side. Population: 1 in 63+, 14 finer (3/11).(#8345)

### Near-Gem 1878 Five Dollar Significant Condition Rarity

6531 1878 MS64 PCGS. The generous mintage of more than 131,000 circulation strike 1878 half eagles makes the issue quite plentiful in the lower states of preservation. Mint State examples are scarce through MS63 and rare any finer. PCGS and NGC combined have graded slightly more than 20 near-Gems and fewer than 10 coins finer (3/11). The sparkling reddish-gold surfaces on this piece are well-struck and show minimal abrasions. (#8345)

#### 1879 Five Dollar, MS64 Elusive in This Grade

- 6532 1879 MS64 NGC. The 1879 half eagle mintage exceeded 301,000 pieces. While circulated coins are easily obtainable, Mint State examples can be found through MS63 only with patience and searching. Near-Gems such as the present offering are elusive and higher-grade specimens are seen only rarely. The semireflective fields on this piece suggest an early strike from a new pair of dies. The striking details are strong throughout, and each side displays bright yellow-gold color. Census: 20 in 64, 2 finer (3/11). (#8348)
- 6533 1880 MS64+ PCGS. A lovely near-Gem specimen, this sharply struck Liberty five exhibits brilliant and frosty luster with faint iridescent overtones. The lower reverse has heavy die cracks through the peripheral elements. Population: 1 in 64+, 10 finer (3/11).(#8351)

#### High-End 1880-CC Five Dollar, Choice AU

6534 1880-CC AU55 NGC. This is a beautiful, high-end example of this available Carson City issue exceeding 50,000 business strikes. The yellow-gold surfaces show light rub with vibrant luster remaining, and the strike is good, despite minor weakness on the fletchings. A delightful and mostly unabraded example. (#8352)

## 1880-CC Liberty Half Eagle, AU58 Rare in Finer Grades

6535 1880-CC AU58 PCGS. A scarce CC half eagle that is more difficult than its deceptively high mintage of 51,017 pieces might indicate. Well struck on the obverse with intricate detailing on the hair curls and star radials, the reverse shows just a bit of softness on the eagle's neck, as always. A few scattered marks and scratches are noted on the obverse. Bright orange-gold surfaces overall with most of the original mint luster still remaining. Population: 22 in 58, 7 finer (3/11). (#8352)

- 6536 1882-CC AU53 PCGS. CAC. Yellow-orange luster clings to the fields on this satiny and lightly worn Carson City half eagle. A few small digs scattered on each side contribute to the grade assigned. (#8359)
- 6537 1885 MS64 PCGS. CAC. Bold and flashy luster with pools of reflectivity in parts of the fields. This near-Gem has a small purplish copper spot near star 9 on the obverse. Population: 65 in 64, 2 finer (3/11).(#8367)

#### Well-Produced Gem 1885 Half Eagle

- 6538 1885 MS65 NGC. The 1885 half eagle production was a generous one of more than 600,000 coins, and a well-manufactured one to judge by the quality of this Gem survivor. The strike is full or nearly so, save for perhaps a tad of softness on the high-point hair. Both sides show evidence of long-in-use dies, the obverse in the form of wispy die cracks through the bottoms of 1885 and stars 1 and 2, the reverse via die clashing on each side of the eagle's outstretched wings. The appealing surfaces are free of all but the most picayune marks. Census: 12 in 65, 1 finer (3/11). (#8367)
- 6539 1885-S MS65 PCGS. Strongly detailed and attractive with orange accents against yellow-gold surfaces. Both sides are impressively smooth, as befits a Gem example of any issue. This San Francisco half eagle is scarce at the MS65 level and a rarity any finer, with just four such coins known to PCGS (3/11).(#8368)
- 6540 1886-S MS64 PCGS. This well detailed Choice specimen displays slightly subdued mint luster on light orange-gold surfaces. Housed in a green label holder. Only 13 coins have been certified in higher numeric grades at PCGS (3/11).(#8370)
- 6541 1886-S MS64 PCGS. The peach-red centers are framed by apple-green margins. Sharply struck and minimally abraded with vibrant luster and pleasing eye appeal. As of (3/11), PCGS has certified only 16 pieces finer.(#8370)
- 6542 1888 MS62 PCGS. Frosty and fully lustrous with sharp design motifs, this 1888 half eagle has deep yellow surfaces with reddish-violet overtones on each side. Trivial surface marks are expected at this grade. Population: 51 in 62, 27 finer (3/11).(#8372)
- 6543 1889 MS60 NGC. At 7,520 pieces, the 1889 has the second-lowest mintage of any post-1877 half eagle. This boldly impressed Mint State example has orange-gold borders and is void of singularly mentionable marks. Luster is prominent across the margins and devices. (#8374)
- 6544 1889 MS61 NGC. Bright orange toning enhances the eye appeal of this frosty and fully lustrous yellow-gold specimen. Myriad but tiny marks on each side limit the grade. This low-mintage issue is seldom found in any Mint State grade. Census: 24 in 61, 27 finer (3/11).(#8374)

## 1890-CC Half Eagle, MS63 Elusive Grade Rarity

6545 1890-CC MS63 PCGS. The 1890-CC half eagle has a longstanding reputation as one of the most available Carson City fives. In Select condition, however, even this "common" issue becomes elusive. The present piece, primarily yellow-gold with a blush of peach at the rims, has good luster and a sharp peripheral strike, though the centers lack a complete impression. Minimally marked and delightful. Population: 33 in 63, 29 finer (3/11). Ex: Central States Signature (Heritage, 4/2008), lot 3503. (#8376)

# Well-Struck Orange-Gold 1891-CC Five, MS63+

- 6546 1891-CC MS63+ NGC. The enormous mintage, for Carson City, of 208,000 half eagles in 1891 represents the zenith of production for the denomination, ensuring that collectors today can obtain nice examples for a reasonable price. This deeply patinated orange-gold example is well-struck, with only a few small marks that barely precluded the near-Gem level. Census: 2 in 63+, 69 finer (3/11). From The Michael A. Tongg Collection. (#8378)
- 6547 1892 MS64 NGC. The central devices are sharply detailed, but some stars are a little weak on this Choice 1892 Liberty half eagle. The obverse displays satiny mint luster, while the reverse exhibits prooflike reflectivity.(#8379)
- 6548 1893 MS64 PCGS. CAC. Housed in a green-label PCGS holder, this Choice Mint State piece exhibits bold design definition with frosty yellow and rose luster and hints of pale blue toning. PCGS has only certified 27 finer pieces (3/11).(#8383)
- 6549 1893-CC AU50 PCGS. Pale wheat-gold luster with reddish elements isolated at parts of the margins. Lightly abraded with a few reed marks on the cheek but few serious abrasions otherwise. Well struck.(#8384)
- 6550 1893-CC AU58 NGC. CAC. This scarce issue, representing the end of an era as the Carson City Mint closed, shows only a trace of wear on the high points, with frosty yellow and orange surfaces. Finer examples are seldom encountered in the marketplace. (#8384)

# Uncirculated 1893-CC Half Eagle Scarce Lower-Mintage Issue

6551 1893-CC MS61 PCGS. An impressively detailed final-year Carson City example with light yellow-gold luster that is especially vibrant on the reverse. The fields and portrait exhibit only minimal marks, and the eye appeal is impressive for the designated grade. Population: 26 in 61, 42 finer (3/11). (#8384)

# Sharply Struck 1893-CC Half Eagle MS61 Prooflike

6552 1893-CC MS61 Prooflike NGC. The well-mirrored surfaces on each side of this yellow-gold Mint State piece are well-deserving of the Prooflike appellation. Only minor field chatter, rather than mentionable contact, seems to preclude an even finer grade. This specimen is extremely well-struck but just shy of full. From a production of 60,000 pieces. Census: 1 in 61 Prooflike, 1 finer (3/11).

From The Michael A. Tongg Collection. (#78384)

# 1893-O Five Dollar, MS63 An Infrequent Collecting Opportunity

6553 1893-O MS63 PCGS. The 1893-O five dollar is scarce in all grades. When it does make an auction appearance it is usually in Extremely Fine or About Uncirculated. Mint State coins usually grade no better than MS62. Examples such as the present MS63 are therefore an important collecting opportunity. Indeed, this might be an extremely infrequent opportunity, as PCGS and NGC have seen a mere three pieces finer! The bright mint luster is softly frosted, and there is a slight trace of peripheral lilac color around the obverse. Population: 10 in 63, 1 finer (3/11). (#8385)

6554 1895 MS64 NGC. CAC. Crisply detailed with pink overtones on satiny yellow-orange surfaces. A few small grazes and wispy abrasions account for the grade assigned. NGC has graded 79 numerically finer pieces (3/11).(#8390)

- 6555 1895-S MS61 NGC. Deep orange-gold color lends itself to luminous surfaces that show light to moderate abrasions. Well-defined with better eye appeal than the MS61 grade might suggest. Census: 17 in 61, 7 finer (3/11).(#8391)
- 6556 1896 MS64 PCGS. CAC. Orange and peach overtones blossom on butter-yellow surfaces. Luster on this well struck near-Gem is largely frosty but with a brilliant patch at the right side of the reverse scroll. Population: 17 in 64, 3 finer (3/11).(#8392)

## 1896-S Liberty Five, MS62 Rare Issue in Mint State

- 6557 1896-S MS62 PCGS. CAC. A moderate mintage of 155,400 half eagles was accomplished at the San Francisco Mint in 1896. The issue was circulated heavily, and few Mint State examples have survived. The present coin is a boldly detailed MS62 specimen, with lustrous orange-gold surfaces. Population: 13 in 62, 13 finer (3/11). (#8393)
- 6558 1898 MS64 PCGS. CAC. A yellow-gold near-Gem with great central detail and satiny fields. The reverse shows more of an orange cast and has fewer of the small marks which account for the grade. Population: 43 in 64, 5 finer (3/11).(#8396)
- 6559 1898-S MS63 PCGS. Well struck and thoroughly lustrous with apple-green borders and honey-gold interiors. Tiny obverse abrasions are unimportant for the grade. Population: 56 in 63, 39 finer (3/11).(#8397)

### Fully Struck Orange-Gold Gem 1899 Half Eagle

- 6560 1899 MS65 NGC. CAC. This well-produced Gem half eagle joins a few hundred of its brethren in the Condition Census of the 1899 issue, an enormous production of more than 1.7 million coins that puts this piece and its kin in perfect type set territory. Here, the orange-gold surfaces are fully struck and nigh on to pristine. (#8398)
- 6561 1899-S MS64 NGC. CAC. Much of the '99-S mintage must have entered circulation, since the issue is available in AU but becomes very scarce above the MS63 level. This is a well preserved sun-gold example with an uncommonly smooth appearance. Census: 48 in 64, 17 finer (3/11).(#8399)
- 6562 1900 MS64 NGC. The devices of this Choice 1900 half eagle are well detailed, with just a little softness on some of the stars. The attractive surfaces show pleasing yellow and rose-gold hues. (#8400)
- 6563 1901 MS64 NGC. The light yellow and rose-gold surfaces show few signs of contact on this well detailed Choice example. The central devices are strongly impressed but a few stars are weak. Vibrant satiny mint luster is present on both sides .(#8402)

- 6564 1901/0-S MS64+ PCGS. CAC. FS-301. The overdate feature is clearly visible, especially at the upper right corner of the 1. This lovely piece has frosty lemon-yellow luster with bold design elements and exceptional eye appeal. Population: 2 in 64+, 17 finer (3/11).(#8403)
- 6565 1901-S MS64 PCGS. Although this issue is plentiful in all grades, the present Choice Mint State piece is a lovely example with bold design elements and frosty lemon-yellow surfaces. It is an ideal piece for a gold type set.(#8404)

# 1901-S MS66 Half Eagle An Important Condition Scarcity

6566 1901-S MS66 PCGS. CAC. The 1901-S Liberty half eagle (3.6 million pieces) is considered one of the most common dates of the series. Indeed, population data indicates availability right through MS64. Gems are a bit more difficult, but Premium Gems are scarce and finer pieces are quite rare. This is a marvelous type coin that displays satiny mint luster and a strong strike. Population: 44 in 66, 2 finer (3/11). (#8404)

## 1902-S Five Dollar, MS65 Attractive Green-Gold Patina

- 6567 1902-S MS65 NGC. Lime-green fields encompass pumpkin-gold devices. The strike is sharp aside from a few of the lower stars, and the reverse is well preserved, while the obverse displays only several wispy grazes. An available issue in Mint State, but the typical example grades MS62, and full Gems are scarce. (#8406)
- 6568 1902-S MS65 NGC. Rich apricot toning blankets this highly lustrous and minimally abraded half eagle. The strike is sharp except on the first three stars. An available issue overall, but scarce as a full Gem.(#8406)
- 6569 1903-8 MS64+ PCGS. CAC. This precisely struck canary-gold near-Gem offers impressively smooth surfaces and exemplary cartwheel sheen. A splendid addition to a quality gold type set. (#8408)
- 6570 1906 MS64+ PCGS. Impressively detailed with strong yellowgold luster that shows a touch of satin. Carefully preserved by near-Gem standards with just a few tiny peripheral and central faults. Population: 2 in 64+, 78 finer (3/11).(#8413)

#### Frosted Yellow-Gold 1906-D Five, MS66

6571 1906-D MS66 NGC. The 1906-D half eagle, with a mintage of 320,000 pieces is an available issue in lower Mint State grades, but Premium Gems such as the present piece are elusive. This specimen is one of only a dozen so graded at NGC, a richly frosted yellowgold survivor that is free of most distracting abrasions, save for a tiny mark on Liberty's chin. This piece boasts an excellent strike save for the extreme high points, and this coin's originality adds to a long list of positive attributes. Census: 12 in 66, 0 finer (3/11). (#8414)

## MS65 1907 Liberty Five Lightly Repunched Date

6572 1907 MS65 NGC. This gorgeously preserved Liberty gold type coin is precisely struck and exhibits immense eye appeal. Olive-gold borders frame the canary-gold centers. The date is lightly repunched, visible on the base of the 1 and the peak of the 07. Encapsulated in a prior generation holder.

From The Orchid Collection. (#8416)

6573 1907-D MS63 PCGS. Bold gold-orange luster blossoms on each side of this powerfully lustrous Select example. Lightly abraded throughout but a decently detailed and attractive survivor. (#8417)

## Gem 1907-D Half Eagle Exceptionally Clean Surfaces

6574 1907-D MS65 NGC. Vibrant luster and uncommonly smooth surfaces confirm the Gem status of this well struck Liberty five. The second and final Denver Mint issue is common in typical Mint State grades, although examples of the present quality are nonetheless elusive. The peak of the 7 is lightly repunched. (#8417)

6575 1908 MS64 NGC. This attractive Choice specimen displays pinpoint definition on all devices, with lustrous yellow and rosegold surfaces. This 1908 Liberty half eagle would make an ideal type coin.(#8418)

# PROOF LIBERTY HALF EAGLE

## Proof 1906 Liberty Five Dollar Only 85 Pieces Struck

6576 1906 PR61 NGC. A mintage of 85 pieces confirms the rarity of the proof 1906 half eagle. The present specimen was likely loosely stored by a prior owner, since the fields display scattered tiny marks and hairlines. Where protected by the design, the luster remains reflective. A collectible yet problem-free example of a rare proof date. (#8501)

#### **INDIAN HALF EAGLES**

6577 1908 MS63 NGC. Faint traces of bluish patina add to the eye appeal of this lustrous yellow half eagle. A popular issue, the 1908 represents the debut of a distinctive 20th century coin design. (#8510)

## Choice 1908 Indian Five Vivid Color

6578 1908 MS64 PCGS. Popular as a first-year type coin, the 1908 Indian half eagle claims a mintage of 577,845 pieces. The present coin is a well struck near-Gem example, with vibrant mint luster and vivid orange-gold surfaces. A small grease spot near star 4 is the only mark of note. Housed in a green label holder. (#8510)

## 1908-D Five Dollar Indian, MS64+ Only 10 NGC-Certified

6579 1908-D MS64+ NGC. CAC. The 1908-D five dollar (148,000 mintage) can be located with little difficulty through the near-Gem level of preservation. Pieces with the Plus designation are a different matter, however. Currently, NGC has certified only 10 coins in MS64+, with none finer in that designation. Four pieces rate NGC MS65 and none finer (3/11). This is truly an upper-end coin with bright mint luster throughout, only a few tiny abrasions are scattered over the reverse. (#8511)

### Boldly Struck MS62 1908-S Half Eagle Antique-Gold Surfaces

6580 1908-S MS62 PCGS. The 1908-S half eagle is a low-mintage (82,000 pieces) but high-survival coin issue, likely due to its status near the series inception. This richly lustrous antique-gold example is close to a full strike and offers surfaces suggestive of a finer grade, were it not for two or three abrasions: a tick on the high point of the Indian's cheek and a thin scrape through star 2, and on the reverse in the field back of the eagle's neck. Nonetheless an appealing coin of classic beauty. (#8512)

## MS64 1909 Half Eagle Green Label Holder

6581 1909 MS64 PCGS. Ample yellow-orange luster dominates the conversation on this second-year Indian half eagle. By the obverse alone, this coin could aspire to Gem status, and while the abrasions at the left reverse are grade-defining, the coin remains attractive as a whole. Housed in a green label holder. (#8513)

6582 1909-D MS64 NGC. The 1909-D Indian half eagle is a favorite with type collectors because the date is easy to locate in high grade. This sharply detailed Choice example offers attractive rose-gold surfaces and bright mint luster. (#8514)

6583 1909-D MS64 NGC. The highest-mintage Indian half eagle with countless survivors in all grades, the 1909-D is ideal for type collectors, and this near-Gem is a marvelous example with frosty light yellow surfaces and sharp design motifs. (#8514)

#### 1909-D Indian Five, MS64+

6584 1909-D MS64+ NGC. CAC. The 1909-D Indian eagle was produced in large quantities, and the date can usually be located with little difficulty in all grades up to the Gem level. Examples in Gem condition are scarce, making this high-end Choice specimen a good combination of quality and availability. The devices are sharply detailed throughout, and the lustrous surfaces exhibit attractive rose-gold color. Census: 46 in 64+, 81 finer (3/11). (#8514)

### MS61 1909-S Half Eagle Uncommon in Mint State

6585 1909-S MS61 PCGS. CAC. A luminous example of the challenging 1909-S half eagle, well struck overall but with the lowest pendant in the necklace weak. Scattered small to moderate abrasions appear on each side. A copper spot covers much of the B in LIBERTY, and the left reverse has two short copper streaks. (#8516)

### MS62 1909-S Half Eagle Bold Mintmark

6586 1909-S MS62 PCGS. CAC. The central high points of the obverse are a bit softly struck on this example although not overmuch, and the greenish-gold surfaces display subtle but complete luster. A couple of scrapes in the reverse field seem to account for the grade, but there is much appeal present. The mintmark is bold, the same style found on the 1909-S Lincoln cents of this year. Population: 72 in 62, 40 finer (3/11). (#8516)

6587 1910-D MS62 PCGS. Peach-gold and lime-green compete for territory across this nicely struck and shimmering Indian five. Minor marks on the cheekbone and reverse field are of little import. Certified in a green label holder.

Ex: FUN Signature (Heritage, 1/2008), lot 10382, which realized \$1,150.(#8518)

## Choice 1911 Indian Half Eagle

6588 1911 MS64 NGC. This well struck Choice Indian half eagle shows just a little softness on the headdress feathers, as usually seen on this date. The lustrous surfaces display attractive yellow and rose-gold color. Despite its high mintage of 915,000 pieces, the 1911 becomes very scarce in grades above MS64. (#8520)

6589 1911-D AU55 PCGS. CAC. Orange-gold luster shows light rub in random patterns from brief circulation. The less celebrated of the two Pratt gold issues of 1911-D, though it also has a five-figure mintage not much higher than that of the quarter eagle. (#8521)

6590 1911-D AU55 NGC. The 1911-D Indian half eagle is a scarce date in high grade, from a small mintage of 72,500 pieces. This lightly circulated example is well detailed, with pleasing orange-gold surfaces, and slightly subdued mint luster. (#8521)

#### Mint State 1911-D Indian Five

6591 1911-D MS60 NGC. The rich olive toning is accompanied by occasional darker patina, particularly near the rims. Lightly abraded and nicely struck, and thus an important representative of this five-figure mintage Indian half eagle issue.

Ex: Long Beach Signature (Heritage, 3/2011), lot 4506, which realized \$6,612.50. (#8521)

6592 1911-S MS62 PCGS. Strong honey-gold luster with orange overtones. Well struck with all pendants on the necklace outlined, though the lowest one is shallow. Scattered abrasions in the fields account for the grade.(#8522)

## 1911-S Indian Five, MS62 A High-Mintage Rarity

6593 1911-S MS62 PCGS. This nicely detailed 1911-S half eagle has lovely honey-gold surfaces with satiny luster that shows hints of reflectivity in the protected areas. The mintmark is a trifle weak but still completely visible. Moderate surface marks on each side limit the grade of this pleasing specimen. Even though the 1911-S had the second highest mintage of the entire series, examples are elusive in Mint State grades. (#8522)

## 1912-S Half Eagle, MS61 Rare Issue in High Grade

6594 1912-S MS61 PCGS. Although the 1912-S Indian half eagle enjoyed a substantial mintage of 392,000 pieces, the issue is a prime condition rarity in the series. David Akers considers the 1912-S the rarest Indian half eagle in high grade, and even lower Mint State examples are quite elusive.. The present coin is a well struck MS61 specimen, with bright mint luster and attractive yellow-gold surfaces. Population: 42 in 61, 84 finer (3/11). (#8524)

#### MS62 1912-S Indian Half Eagle

6595 1912-S MS62 NGC. CAC. A predominantly yellow-orange coin that shows more toning and "personality" than many of its fellows, thanks to reddish-brown variations at the margins that end in copper spotting in isolated areas. Decently detailed but with a cut on the portrait's cheek which accounts for the grade. (#8524)

# 1913-S Five Dollar, MS62

6596 1913-S MS62 NGC. CAC. A distinctly orange-gold example that also shows a suggestion of green at certain angles. The strike is solid, particularly on the necklace, and while there are an assortment of abrasions on each side (such as those between the word LIBERTY and the top of the headdress), the coin is well within the bounds of the MS62 designation. (#8526)

6597 1914 MS63 NGC. A brilliant and lustrous greenish-gold example, this 1914 half eagle has frosty surfaces with trivial marks of little consequence.(#8527)

6598 1914 MS63 PCGS. This impressive Select Mint State piece has frosty yellow luster in shades from light to dark. Both sides are boldly defined and the whole presents excellent eye appeal. (#8527)

#### Reddish-Gold 1914 Five Dollar, MS64+

6599 1914 MS64+ PCGS. CAC. The 1914 five dollar, with a mintage of 247,000 pieces, is available through the near-Gem level of preservation. While PCGS has graded nearly 250 examples in MS64, only 14 have been assigned the Plus designation, including the present specimen. Only 24 pieces have been certified finer by PCGS. This is a sparkling, reddish-golden example whose only (slightly) noticeable abrasions are located on the right side of the reverse. (#8527)

## 1914 Five Dollar, MS64+ A Suitable Alternative to a Full Gem

6600 1914 MS64+ PCGS. CAC. Collectors should have little difficulty in acquiring a 1914 half eagle through the near-Gem level of preservation as PCGS and NGC have certified several hundred examples in this range Those desiring somewhat better quality but not wanting to pay the price for a full Gem may want to consider an MS64+ specimen such as that in the present lot. This high-end Choice specimen is sharply detailed, with lustrous orange-gold surfaces. (#8527)

6601 1914-D MS62 PCGS. Sharply struck with honey-gold surfaces yielding soft, pleasing luster. Scattered small handling marks in the exposed fields contribute to the grade. (#8528)

## 1914-D Indian Half Eagle, MS64+

6602 1914-D MS64+ NGC. CAC. The 1914-D Indian half eagle is not difficult to locate in Choice condition, but examples in any higher grade are rare. A high-end Choice example, like the present coin, provides a good balance of quality and availability. This well detailed specimen displays light orange-gold surfaces and ample mint luster. Census: 8 in 64+, 15 finer (3/11). (#8528)

# 1914-S Indian Half Eagle, MS61 Challenging Issue in High Grade

6603 1914-S MS61 PCGS. Due to a mintage of 263,000 pieces, the 1914-S Indian half eagle is an available issue in lightly circulated condition, but emerges as one of the most difficult of the series to locate above the MS62 level. The present unabraded example has a suitable strike, and the devices shimmer with yellow-gold luster. Ex: Long Beach Signature (Heritage, 2/2011), lot 4514, which realized \$3,450. (#8529)

6604 1915 MS62 PCGS. A pleasing light yellow example of this plentiful issue, with only trivial surface marks on its satiny surfaces. This sharply defined piece is an excellent candidate for a type set or specialized collection. (#8530)

6605 1915 MS63+ NGC. From sun-gold to sunset shadings, this Select example is attractively lustrous. Pleasingly detailed with abrasions that are generally light or wispy. (#8530)

#### Choice Mint State 1915 Half Eagle

6606 1915 MS64 PCGS. CAC. Warm orange overtones enhance the eye appeal of this yellow-gold near-Gem with sweeping luster. The well-defined obverse is impressively preserved, and while a few abrasions are noted in the fields around the eagle, the overall appearance is well within the bounds of the MS64 range. PCGS has graded 40 numerically finer examples (3/11). (#8530)

6607 1915-S AU58 NGC. Only slight traces of wear are apparent on this vivid orange-gold near-Mint specimen. The surfaces retain most of the original mint luster. The 1915-S Indian half eagle is a scarce date, from a mintage of 164,000 pieces.(#8531)

## 1915-S Five Dollar Indian, MS61 Bright Overall Surfaces

6608 1915-S MS61 NGC. The 1915-S is conditionally scarce, since the lion's share of survivors are in circulated grades. This example has ample luster and displays distributed minute marks. The strike is a bit soft on the lowest feathers of the headdress and top of the eagle's wing. (#8531)

6609 1916-S MS61 PCGS. Wheat-gold and orange surfaces are luminous on this S-mint half eagle from the last such regular issue. Decently detailed with a few small marks and more wispy abrasions which combine to account for the grade.(#8532)

### 1916-S Indian Five, MS62 Final Branch Mint Issue

6610 1916-S MS62 NGC. The 1916-S trades as a type coin in circulated grades, but like other San Francisco issues within this widely held series, it is scarce in Mint State, and very scarce above the MS62 level. Many Indian fives at this grade level are abraded or lackluster, but the present canary-gold example shimmers with luster, and the only noticeable mark is a pinscratch between the final three stars. Ex: John Stimson, Sr. Collection, Part Two (Heritage, 2/2008), lot 2604, which realized \$2,760. (#8532)

## **EARLY EAGLES**

#### 1801 BD-2 Eagle, AU Details

6611 1801 — Reverse Damage — NGC Details. AU. Breen-6843, Taraszka-25, BD-2, R.2. The obverse of this greenish-gold example is lustrous and attractive with light wear and few blemishes. The reverse has pale orange toning, possibly from an external heat source, but only minor marks that are mostly of little concern. We see no readily apparent damage as NGC describes.

## 1803 Small Stars Reverse Ten Dollar BD-3, Very Fine Details

6612 1803 Small Stars Reverse — Improperly Cleaned — NGC Details. VF. Breen 6844, Taraszka-28, BD-3, R.4. Six varieties of ten dollar gold coins were minted in 1803. The BD-3 variety, characterized by the placement of the foot of the E in STATES above a cloud space, is the most available of the six varieties. An estimated 150-200 examples are known today, from an estimated mintage of 7,500-10,000 coins. The present coin retains most of the original detail on all design elements. The surfaces are only lightly abraded, if somewhat muted and slightly granular. Eye appeal is strong for the grade.
Ex: Houston Signature (Heritage, 12/2009), lot 1746.

## LIBERTY EAGLES

# 1839 Large Head (Type of 1838) Ten, XF45 Second Year of This Two-Year Type

6613 1839 Type of 1838, Large Letters XF45 NGC. A highly popular and desirable example representing the first design type that was only produced in 1838 and 1839. The differences are distinctive enough that advanced type collectors aspire to own an example of this subtype. This lightly abraded piece has pale green-gold surfaces with violet patina in the protected areas. The surfaces are peppered with numerous small to medium-sized abrasions. (#8576)

#### AU55 Details Large Letters 1839 Head of 1838 Ten Dollar

6614 1839 Type of 1838, Large Letters — Cleaned — ANACS. AU55 Details. The two-year Head of 1838 subtype is among the rarest U.S. gold types, far more elusive than the Type Two gold dollar. The differences between the first and second Gobrecht portraits are apparent upon first glance. The head leans forward, the truncation has a prominent curve, and the ear is mostly covered. The reverse legends have larger letters. This lightly circulated example has subdued surfaces and scattered minor to moderate abrasions.

# Very Rare 1842-O Eagle, Near-Mint State

6615 1842-O AU58 NGC. New Orleans' 1842 production of eagles, at 27,400 coins, was more than tenfold the previous year's total, but survivors of the 1842-O are very rare, particularly at or approaching Mint State, as here. This near-Mint specimen boasts wonderful eye appeal over canary-yellow surfaces that are well-struck and faintly prooflike. The minor abrasions and a considerable dig beneath the 4 in the date fail to detract in a significant way. Census: 22 in 58, 3 finer (3/11). (#8587)

#### Choice AU 1844-O Ten Dollar

6616 1844-O AU55 NGC. Pale yellow-gold luster with ample reflectivity is the rule on this modestly abraded O-mint ten dollar. Occasional hints of green-gold in the fields add to the piece's character, as do scattered flat stars among the otherwise decently detailed obverse devices. NGC has graded 61 numerically finer examples (3/11). (#8591)

## Choice AU 1844-O Ten Dollar Lightly Repunched Mintmark

6617 1844-O AU55 NGC. A sun-gold antebellum New Orleans ten that boasts pleasing luster about the stars and throughout the reverse border. The devices also shimmer with remnants of the initial mint bloom. The fields display mint-made clashes but are only minimally abraded. A thin mark on the chin provides an identifier. (#8591)

# 1846 AU53 Ten Dollar Scarce and Underrated Issue

6618 1846 AU53 NGC. CAC. The typical 1846 ten dollar grades Extremely Fine or lower. About Uncirculated examples are extremely difficult to locate, and Mint State pieces are virtually unobtainable. Indeed, NGC has certified just five Mint State coins, none higher than MS62 (3/11). This is one of the few AU pieces available. The surfaces are bright and slight amounts of mint luster remain around the devices. The devices show only slight, even high-point friction. (#8594)

## Seldom Seen Choice AU 1846 No Motto Eagle

6619 1846 AU55 NGC. The eagle's plumage is bold, and bits of reflective luster outline the devices and legends. Numerous minor handling marks show on each side but are of little consequence. A scant 20,095 pieces were struck. Census: 11 in 55, 8 finer (3/11). Ex: Palm Beach Signature (Heritage, 3/2005), lot 7017. (#8594)

## 1847 MS62 Ten Dollar Among the Finest Certified

- 6620 1847 MS62 NGC. CAC. The 1847 ten dollar, from a hefty mintage exceeding 862,000 business strikes, is readily available in circulated grades. Mint State examples are scarce, but can be found with patience, if only in MS60 and MS61. MS62 specimens are elusive with only 25 pieces graded by NGC and PCGS combined. A total of six coins have been seen by both services (3/11). This orange-gold example displays surprisingly good luster and there are no mentionable abrasions on either side. (#8597)
- 6621 1847-O AU55 NGC. CAC. Luminous yellow-gold surfaces show faint undercurrents of orange. This O-mint eagle has numerous fine abrasions on each side, but wear is minor and there are few sharp marks on the well struck devices.(#8598)
- 6622 1847-O AU58 NGC. Although the surfaces of this near-Mint example have myriad marks, both sides retain bright luster with reflective fields and distinct green-gold color. NGC and PCGS have only graded 29 finer Mint State pieces combined (3/11). (#8598)
- 6623 1848 AU55 NGC. A canary-yellow example that has subtle sky-blue hues about the borders. Glimpses of moderately prooflike luster outline the stars, shield, and legends. A small ring, as made, is atop the second vertical shield stripe. A few unobtrusive handling marks do not distract.

Ex: Central States Signature (Heritage, 5/2005), lot 8756. (#8599)

# 1848-O Ten Dollar, AU50 Only Two Dozen Believed Known in AU

6624 1848-O AU50 PCGS. Variety 1. Of the two known varieties this one is most easily distinguished by the die file marks above the juncture of the eagle's neck and left (facing) wing. The 1848-O is a moderately available issue in the run of O-mint tens. A couple of dozen AU pieces are believed known. As one would expect, the centers are somewhat softly detailed. Each side has bright yellowgold color and numerous small to medium-sized abrasions are scattered about. (#8600)

## 1848-O Liberty Eagle, AU53 Original Color

- 6625 1848-O AU53 NGC. A fully original green-gold example with dark highpoint patina. The strike is somewhat soft as usual, and the surfaces are lightly abraded, yet this is still an attractive example of a rare date. Only 35,850 were minted and most survivors are in much lower grades. Census: 16 in 53, 45 finer (3/11). (#8600)
- 6626 1850 Small Date XF45 PCGS. CAC. The more challenging "Small Date," which seems to float within the exergue under the bust. Moderately abraded yellow-gold with a blunt strike on the peripheral elements but better-defined centers. For the variety, Population: 23 in 45, 38 finer (3/11).(#8604)
- 6627 1850 Small Date AU55 NGC. The challenging Small Date variant is particularly elusive in AU grades and above. This Choice AU example is amply lustrous yellow-gold with scattered moderate abrasions and green-gold enhancements. For the Small Date variety, Census: 15 in 55, 21 finer (3/11).(#8604)

# 1850-O Ten Dollar, AU55 Bright Surfaces, Scarce in AU

- 6628 1850-O AU55 NGC. The 1850-O is seldom seen with only 150-175 pieces estimated in all grades, but it is more notable as a condition rarity with at most two dozen pieces known in AU. This Choice example has exceptionally bright surfaces, in part due to the partially reflective finish found in the fields of most 1850-O tens. The striking details are above average for the issue and there are none of the usually seen heavy abrasions this issue is so well known for. (#8605)
- 6629 1851-O AU55 PCGS. Saturated yellow-gold color has a touch of remaining flash and prominent orange elements. This O-mint eagle is lightly abraded but fundamentally pleasing with little wear on well-defined central devices. Population: 33 in 55, 25 finer (3/11).(#8607)

#### Lustrous Near-Mint 1851-O Eagle

6630 1851-O AU58 NGC. Surprisingly intense yellow-gold luster with only minor wear across the high points of well struck devices. The margins are a touch softer, as sometimes seen on New Orleans eagles, but the overall visual appeal is solid. NGC has certified just a dozen Mint State representatives (3/11). (#8607)

# Borderline Uncirculated 1851-O Ten Popular No Motto New Orleans Issue

- 6631 1851-O AU58 NGC. The surfaces of this attractive near-Mint 1851-O eagle are remarkably free of abrasions, which is unusual for the No Motto type. There is just a touch of wear on the sharply detailed devices. Shimmering luster fills protected areas. As always for the issue, a shield ring is present atop the second vertical shield stripe. (#8607)
- 6632 1853/2 AU50 NGC. FS-301. The curls and wings show slight wear, but luster outlines individual stars and dominates the reverse border. The smattering of small marks is customary for the type and grade.(#8611)
- 6633 1853-O AU55 NGC. Light yellow-gold at the still-lustrous centers with a touch of orange closer to the rims. Scattered abrasions overall but only minor wear at the highest points of the design. The variety without a shield ring atop the second vertical shield stripe. (#8612)
- 6634 1854 AU55 NGC. This better date No Motto ten has a mintage of just 54,250 pieces. Sharply struck except for a few of the star centers. Lightly abraded despite faint hairlines and a thin diagonal mark left of the ear. (#8613)
- 6635 1854-O Small Date AU55 PCGS. CAC. The Small Date version of the 1854-O eagle is scarce as a Choice AU coin and a condition rarity any better. This AU55 example has pale yellow luster that is largely intact in the fields. A rim nick is noted close to the eagle's right (facing) wingtip. Population: 11 in 55, 8 finer (3/11). (#8614)

## Near-Mint 1854-O Small Date Eagle Rare in High Grade

6636 1854-O Small Date AU58 PCGS. The mintage of 52,500 New Orleans Mint Liberty eagles is split between two varieties in 1852, the Small and Large Date types. The 1854-O Small Date eagle is scarcer than its Large Date counterpart in high grade, though the other variety may have an edge in the rarity rankings in terms of total pieces known. Probably 150-175 Small Date examples survive in all grades, and specimens in AU58 condition are rare. This well struck near-Mint example displays bright mint luster and attractive greenish-gold surfaces. Population: 7 in 58, 1 finer (3/11). (#8614)

6637 1854-S AU53 NGC. Unlike its half eagle and quarter eagle counterparts, the 1854-S Liberty eagle is relatively easy to locate. This pleasing AU53 example features lustrous yellow-gold surfaces, with only some high-point rub on the devices.(#8615)

# AU53 1854-S Ten Dollar Ex: S.S. Republic

6638 1854-S AU53 NGC. Ex: S.S. Republic. This steamship salvage piece was struck in the first year of operation for the San Francisco Mint, and production of ten dollar coins there was in the low six figures. This AU53 survivor has uneven definition on the stars, but the centers are bold and the luster through the yellow-gold fields is strong. Light wear on the moderately abraded portrait accounts for the grade. Comes with wood presentation box, informative disk, and outer slipcover. (#8615)

6639 1855 AU58 PCGS. A small mark behind the neck is the only noticeable blemish on this fully lustrous near-Mint specimen. The surfaces are lemon-yellow with delicate orange highlights. Although some stars are weak, the central details are bold. Population: 22 in 58, 18 finer (3/11).(#8616)

## 1855 Liberty Eagle, MS61 A Mint State Rarity

6640 1855 MS61 PCGS. A substantial mintage of 121,701 coins was the 12th highest of the No Motto type, making this issue a seemingly common one, although Mint State specimens are rarely seen. This piece has brilliant green-gold luster with frosty surfaces and excellent design definition showing only slight peripheral weakness on the obverse. Both sides have the usual quota of trivial marks that are almost entirely insignificant. Population: 7 in 61, 9 finer (3/11). (#8616)

6641 1856-O — Obverse Scratched — NGC Details. AU. The influx of West Coast gold at New Orleans dwindled after the advent of the San Francisco Mint. As a result, the '56-O ten has a mintage of just 14,500 pieces. This partly lustrous green-gold example displays pinscratches on the upper left obverse, from an attempt to efface a series of small mint-made strike-throughs.

6642 1856-S AU50 PCGS. Breen-6923, "very rare." The Large S mintmark variety, which is several times scarcer than its Medium S counterpart. The mintmark location is also different, since the Large S does not fit in the customary location above the EN in TEN. A light golden-brown piece with ample luster and scattered moderate marks.

Ex: Central States Signature (Heritage, 5/2005), lot 8776, which realized \$1,495.(#8621)

6643 1856-S AU55 NGC. Breen-6923. The "very rare" Large S mintmark variety, which is scarcer than its Medium S counterpart. The mintmark location is also different, since the Large S does not fit in the customary location above the EN in TEN. A lovely apricot-gold Choice AU No Motto eagle with abundant peripheral luster and no obtrusive marks.(#8621)

## AU 1858-S No Motto Ten Rare in Any Grade

6644 1858-S AU50 PCGS. CAC. Honey-gold overall with glimpses of peach in protected areas. Luster dominates the peripheries, and is extensive for the AU50 level. Crispy struck and lightly abraded with slight high point wear. A scant 11,800 pieces were struck, since double eagles were preferred by hard money West Coast bankers. Population: 8 in 50, 6 finer (3/11). (#8627)

## 1860-O Ten Dollar, AU53 Bright Semireflective Fields

6645 1860-O AU53 NGC. The 1860-O ten is moderately available in AU grades, even though only 11,100 pieces were struck. But in overall rarity only 115-135 examples are estimated extant in all grades. This piece is typical of many 1860-O tens as it displays bright semiprooflike fields. The lemony-yellow surfaces are lightly abraded and there is no notable softness of details in the centers, just light high point friction. (#98631)

6646 1861 AU55 NGC. Rounded Bun subtype. Luster illuminates the peripheries of this briefly circulated sun-gold Civil War ten. Abrasions are inconsequential for the grade save for a pair of bagmarks near the right (facing) wing. (#8633)

## 1865 Ten Dollar, XF40 Only 3,980 Pieces Produced

6647 1865 XF40 PCGS. The end of the Civil War lessened the uncertainty that led to the melting of many silver and gold coins struck during that bloody conflict. The result for the 1865 ten dollar is that despite its mintage of only 3,980 pieces it is occasionally available. The greatest number of pieces is in the XF grade range, with very few available in AU (only two Uncirculated coins are known). The reddish-gold surfaces shine with the brightness in the fields commonly seen on low-mintage coins. Each side is peppered with small, but individually insignificant abrasions. Softly struck in the centers. (#8641)

6648 1869-S VF20 NGC. An apricot-gold rare date ten from a mintage of only 6,430 pieces. Liberty's curls are worn, but the plumage on the left wing is extensive, and no marks are noticeable. (#8656)

### 1874 Ten Dollar, MS62 Seldom Found in This Grade

6649 1874 MS62 PCGS. CAC. The 1874 ten dollar (53,160 circulation strikes) is a scarce date overall and is difficult to locate in mint condition. In fact, one is most likely to locate Uncirculated examples only in MS60 or MS61. MS62 and finer specimens are rare with only seven pieces graded by PCGS and seven finer (3/11). This lustrous example is problem-free for the grade with only small abrasions scattered in the fields. (#8669)

### Challenging Choice XF 1874-S Ten Substantial Remaining Luster

6650 1874-S XF45 PCGS. CAC. Like most other S-mint tens from its pre-1878 era, the 1874-S is low mintage and unknown in Uncirculated grades. This example has moderate wear on the wingtips and the hair above the ear, but luster dominates the reverse legends and the eagle motif. Field marks are scattered, and are most noticeable above the D in TEN D. Population: 19 in 45, 17 finer (3/11). (#8671)

6651 1874-S — Whizzed — NGC Details. AU. The fields display unnatural luster from myriad fine hairlines. Although San Francisco produced more than 1.2 million double eagles in 1874, a scant 10,000 eagles were struck, and none have been certified as Mint State by either major service.

## XF45 Sharpness 1875-CC Ten Rare Carson City Issue

6652 1875-CC — Cleaned — ANACS. XF45 Details. The rarity of the 1875-CC is only partly explained by its tiny mintage of 7,715 pieces. No one collected gold coins in the Old West, and examples carried no premium above face for more than 15 years. The present Carson City ten has been lightly polished, and the somewhat bright surfaces are peppered with small marks. The strike is a bit soft on the curls, but the eagle is well defined.

## 1876-S Ten Dollar, AU55 Only One Certified Finer

6653 1876-S AU55 NGC. All three mints then in operation struck eagles in 1876, but only in small quantities. The combined production of the denomination at Philadelphia, Carson City, and San Francisco barely exceeded 10,000 pieces. About half of these coins were from San Francisco, but little of the mintage of 5,000 pieces was saved, and no examples have been certified in Mint State by either NGC or PCGS. NGC has certified one coin as AU58, and next in line are four AU55 pieces, one of which is the present example. This well-struck Choice AU piece has bright surfaces with numerous small abrasions scattered over each side, as one would expect. (#8676)

6654 1879 MS62 NGC. This boldly struck better date eagle displays ample luster and is without any mentionable abrasions. The obverse has a wire rim, as does the right reverse border. (#8683)

## Elusive Near-Gem 1879 Ten Dollar Sharply Defined

6655 1879 MS64 PCGS. The 1879 ten dollar, with its generous mintage in excess of 380,000 pieces, is readily located in circulated grades. Even Mint State coins through MS63 can be found without too much difficulty. Near-Gems, on the other hand, are elusive and higher-grade specimens are virtually unobtainable. This sharply defined example has soft, frosted mint luster and minimal abrasions. The obverse is peach-gold, with deeper reddish-gold patina on the reverse. Population: 6 in 64, 2 finer (3/11). (#8683)

6656 1879-S MS61 PCGS. The '79-S is the earliest San Francisco issue that is collectible in Mint State. It is nonetheless very scarce in such condition. This orange-gold and gunmetal example has noticeable luster and no individually distracting marks. Population: 34 in 61, 22 finer (3/11).(#8686)

## 1880-CC Ten Dollar, Choice AU Well-Struck Two-Toned Example

6657 1880-CC AU55 NGC. This Choice AU eagle has an interesting mix of mint-green and orange on the obverse, with a sharp strike throughout and excellent eye appeal. A small tick above the mintmark and one between star 12 and 13 on the obverse are the only mentionable abrasions. An appealing example of this early Carson City product. Census: 48 in 55, 45 finer (3/11). (#8688)

### Reflective Choice AU 1880-O Ten Dollar

6658 1880-O AU55 NGC. An appreciable orange blush graces prominently mirrored yellow-gold surfaces that show few effects from the light wear on the devices. Both sides of this O-mint ten are well-defined save for a degree of weakness on the lower right stars of the obverse. Census: 34 in 55, 42 finer (3/11). (#8689)

6659 1881 MS63+ PCGS. CAC. Solidly struck on all but a handful of the obverse stars. Wheat-gold surfaces are lightly abraded but with a better appearance than the typical Select coin.(#8691)

6660 1881-CC AU55 NGC. This Carson City issue has a low mintage of 24,015 pieces, and is generally collected in XF or AU grades. The present example is housed in a prior generation holder, and exhibits a broad band of luster across both peripheries. Abrasions are trivial save for bright areas near the first star.(#8692)

# 1882-CC Liberty Eagle, AU55 Low-Mintage Carson City Issue

6661 1882-CC AU55 NGC. Only 6,764 Liberty eagles were struck at the Carson City Mint in 1882, and experts estimate a surviving population of 125-150 specimens in all grades. This makes the 1882-CC eagle about as rare as the famous 1794 silver dollar. The present coin is an impressive Choice AU example, with just the slightest trace of wear on the high points of the devices. The pleasing greenish-gold surfaces are lightly abraded, with prooflike reflectivity in sheltered areas. Census: 45 in 55, 39 finer (3/11).

- 6662 1883 MS62+ PCGS. Bold design definition accompanies the frosty yellow luster of this pleasing piece. Wisps of greenish overtones appear near the borders. Population: 8 in 62+, 72 finer (3/11).(#8699)
- 6663 1883-CC XF40 PCGS. The 1883-CC Liberty eagle is an available date in the context of the series, from a mintage of 12,000 pieces. This attractive specimen displays light orange-gold surfaces, with light wear on the devices, and areas of prooflike reflectivity around the design elements. (#8700)

#### Two-Toned 1883-S Eagle, MS62 With Prooflike Surfaces

6664 1883-S MS62 PCGS. The surfaces are fairly prooflike on this lovely two-toned eagle, from a small mintage of only 38,000 pieces. Lovely jade hues appear at the rims, with orange-gold dominating the interiors. A few small abrasions are in keeping with the grade, but the strike is nearly complete and the eye appeal is grand. (#8702)

## 1884-CC Ten Dollar, AU55 A Middle Carson City Date

6665 1884-CC AU55 NGC. Bold yellow-gold luster is appreciably reflective on each side, though the obverse leans more toward "flashy" than "mirrored." Lightly rubbed with a decent strike, albeit one that is uneven at the margins. A long abrasion to the left of Liberty's neck contributes to the grade. Census: 37 in 55, 53 finer (3/11). (#8704)

## Pleasing Select 1884-S Ten Tied for Finest Certified

6666 1884-S MS63 NGC. Unknown above the MS63 level, the 1884-S is a lower mintage issue often encountered in circulated grades. The present piece provides unbroken cartwheel luster, and is far less abraded than the usual heavily bagmarked survivor. Boldly struck and bathed in honey-gold toning. Census: 5 in 63, 0 finer (3/11). (#8705)

# 1885 Ten Dollar, MS63 Surprisingly Scarce in This Grade

6667 1885 MS63 PCGS. Once considered very scarce in Mint State, the 1885 ten dollar's population has been boosted by recent minihoards from Europe. Most Uncirculated examples grade MS61 or MS62. The population drops significantly in MS63, a level where the 1885 is very scarce. Higher-grade coins are rare. The frosted surfaces on this Select example show a significant overlay of reddish-gold, with deeper color around the margins. The strike is sharp throughout. Population: 38 in 63, 12 finer (3/11). (#8706)

- 6668 1885-S MS62+ PCGS. Deep gold-orange luster with a prominent ring of patina around the peripheral obverse. The well struck reverse has a brighter appearance and fewer of the grade-defining abrasions that leave this coin just shy of Select status.(#8707)
- 6669 1885-S MS63 PCGS. CAC. The 1885-S Liberty eagle is a scarce date at the Select level, and extremely rare in any finer grade. The present coin is sharply detailed and lustrous, with pleasing orange-gold surfaces. Population: 71 in 63, 2 finer (3/11).(#8707)
- 6670 1889-S MS63 PCGS. This khaki-gold scarcer date ten dollar piece displays vibrant luster and a bold strike. Wispy marks are present, but are fewer than expected for the MS63 level. An excellent value for the intrepid series collector.(#8716)

# Choice 1889-S Liberty Eagle Only One Coin Certified Finer

- 6671 1889-S MS64 PCGS. CAC. From a large mintage of 425,400 pieces, the 1889-S Liberty eagle is surprisingly difficult to locate in high grades. Currently, PCGS has certified only 16 coins in MS64, with a single specimen finer, while NGC has graded nine examples in Choice condition, with none finer (3/11). The present coin is a sharply detailed Choice specimen, with bright satiny mint luster and attractive orange-gold surfaces. (#8716)
- 6672 1890 MS62 PCGS. A scarce issue due to a low mintage of 57,980 pieces. This crisply struck representative has peach-gold fields and an olive-gold portrait. Distributed marks on the obverse field are consistent with the grade. Population: 80 in 62, 14 finer (3/11). Ex: Long Beach Signature (Heritage, 9/2005), lot 4815, which realized \$1,437.50.(#8717)

#### Eye-Appealing 1890-CC Eagle, MS61

- 6673 1890-CC MS61 NGC. This is a lovely and lustrous Mint State coin, despite the numerous small abrasions that appear under a loupe, seemingly precluding an even finer grade. The moderate 1890-CC eagle mintage was only 17,500 pieces. This piece is well-struck, with attractive orange-gold surfaces and good eye appeal. Census: 75 in 61, 47 finer (3/11).

  From The Michael A. Tongg Collection. (#8718)
- 6674 1891-CC AU50 PCGS. Rich orange-gold luster shows deep ruby accents that run in thin skeins close to the rims. Lightly worn with a few abrasions of note, including a couple of scrapes behind Liberty's head, but decent eye appeal. Housed in a green label holder. (#8720)
- 6675 1891-CC MS61 NGC. Sharply struck with bright yellow luster and no trace of wear. Appealing despite the numerous fine abrasions which account for the grade.

  From The Michael A. Tongg Collection. (#8720)
- 6676 1891-CC MS61 NGC. FS-501. Both Cs within the mintmark are clearly repunched. The variety is undesignated on the NGC insert. A satiny example with only a single noticeable mark, between stars 1 and 2.(#8720)
- 6677 1891-CC MS61 NGC. FS-501. The variety is undesignated on the NGC insert, but the mintmark is obviously repunched. A lovely straw-gold representative of a popular CC-mint issue. (#8770)
- 6678 1891-CC MS61 NGC. A lustrous apricot-gold Carson City type coin with eye appeal beyond its numerical grade. Marks are scattered but of little import. Slight bluntness of detail is noted above the ear. (#8720)
- 6679 1891-CC MS62+ NGC. A splendid piece with a few small marks on Liberty's bust that limit the grade, but with brilliant yellow and pink luster and bold design elements. The fields are reflective, imparting a slight cameo appearance.(#8720)
- 6680 1892-CC Cleaned ANACS. AU Details, Net XF40. A hairlined but well-defined example of this slightly better Carson City issue. Minor rim nicks are noted at 11 o'clock on the obverse and 1 o'clock on the reverse. IN GOD WE TRUST is die-tripled, a variety recently featured on the front page of Coin World
- 1892-CC Triple Die Reverse AU55 NGC. A majority, and perhaps all, 1892-CC eagles are from the same reverse die, which exhibits die tripling on IN GOD WE TRUST. Tripled or not, this Carson City issue is much scarcer than its 1891-CC predecessor, especially in Mint State. This partly lustrous apricot-gold example is smooth except for one moderate thin mark near the profile. (#8722)

### Mint State 1892-CC Liberty Ten Nice Color and Luster

6682 1892-CC MS61 NGC. The 1892-CC Liberty eagle claims a respectable mintage of 40,000 pieces, and circulated examples are not difficult to locate in today's market. However, Mint State specimens are rare. The present coin is a sharply detailed MS61 piece, with frosty mint luster and attractive green and orange-gold surfaces. Census: 21 in 61, 10 finer (3/11). (#8722)

## Original Mint State 1892-CC Eagle Conditional Rarity

- 6683 1892-CC MS61 NGC. The 1892-CC is surprisingly rare in Mint State, given its common status in circulated grades. This piece has excellent mint luster and strong strike details. The original surfaces show orange-gold coloration overall with deeper hues around the devices. Census: 21 in 61, 10 finer (3/11).

  Ex: (#8722)
- 6684 1892-O MS62 NGC. Crisply struck with good luster and the expected distributed moderate marks. NGC has yet to grade an 1892-O above the MS62 level, an indication of its conditional rarity. Only 28,688 pieces were struck.

  Ex: Central States Signature (Heritage, 4/2008), lot 3624. (#8723)
- 6685 1892-O MS62 NGC. A low New Orleans issue that is collectible in Mint State yet is unknown above the MS63 level. Nicely struck and original with rich peach-gold color. There are no distracting abrasions.(#8723)
- 6686 1893 MS64 NGC. CAC. Boldly struck save for stars 6 and 7, and the lustrous fields and devices display no more than the expected number of wispy grazes. The 1893 is conditionally rare above the MS64 level.(#8725)
- 6687 1893-O MS61 NGC. A sharply struck ten dollar piece that has good luster and a smattering of marks across the cheek and both fields. A low mintage New Orleans issue, unavailable in grades above MS63 from either service.(#8727)
- 6688 1894 MS62 Prooflike NGC. CAC. Powerfully reflective fields are pale wheat-gold, while the similarly colored devices supply frosty contrast. Sharply struck with abrasions that seem more severe than they are due to the reflectivity. Census: 25 in 62 Prooflike, 10 finer (3/11).(#78729)
- 6689 1895-S MS60 NGC. When Liberty eagle rarities are discussed, the 1895-S is barely mentioned, yet it is one of the important condition rarities in the series, partly due to a total mintage of a mere 49,000 coins. This Mint State piece displays the moderate abrasions expected of the grade, with bright yellow luster and hints of peripheral orange toning. Census: 6 in 60, 11 finer (3/11). (#8734)

6690 1897-S MS62 PCGS. CAC. Well-defined with swirling luster that has apricot accents on otherwise yellow-gold surfaces. Both sides show more wispy abrasions than deep marks, though together they combine to account for the grade. Population: 24 in 62, 20 finer (3/11).(#8739)

#### Richly Colored 1898-S Eagle, MS63

6691 1898-S MS63 PCGS. CAC. The 1898-S eagle has a reasonable mintage of 473,600 pieces, but most must have entered West Coast commerce: Uncirculated survivors are scarce, and most of them are bagmarked. The present richly colored orange-gold example sports unencumbered cartwheel luster, and the sharply struck surfaces display surprisingly few marks. Population: 33 in 63, 10 finer (3/11).

Ex: Los Angeles Signature (7/2009), lot 2609. (#8741)

- 6692 1899 MS64 NGC. CAC. Sharply struck through the centers with satiny and gorgeous yellow-gold surfaces. The fields show a number of small marks and grazes, but the portrait is well-preserved. (#8742)
- 6693 1899 MS65 NGC. Ex: Las Vegas Collection. The 1889 Liberty eagle is a rare date, from a tiny mintage of 4,440 pieces. This impressive Gem is sharply detailed, with vibrant mint luster radiating from the yellow and rose-gold surfaces.(#8742)

# 1899 Ten Dollar, MS66 A Significant Condition Scarcity

6694 1899 MS66 NGC. The 1899 eagle is a high-mintage issue, with more than 1.26 million pieces produced. Several thousand coins have been certified through the MS64 level. The numbers drop precipitously in MS65, however, and Premium Gems such as this one are extremely scarce. The reddish-gold mint luster has just a tinge of greenish patina, and the surfaces are free of any mentionable abrasions except for the occasional luster break. The strike is razors-sharp, with a single dark fleck on the reverse between TEN and D. Census: 25 in 66, 4 finer (3/11). (#8742)

- 6695 1901 MS65 NGC. A sharply detailed Gem, with delicate rosegold patina and vibrant satiny mint luster. The 1901 Liberty eagle was produced in large numbers and enjoys great popularity as a type coin.(#8747)
- 6696 1901-S MS64 PCGS. This well struck near-Gem exhibits blended sea-green and pumpkin-gold shades. No marks are consequential, and luster illuminates the design. Traces of planchet texture remain near TRUST, as coined.(#8749)

## 1901-S Liberty Ten, MS65+ Ideal Type Coin

6697 1901-S MS65+ PCGS. CAC. The 1901-S Liberty eagle is an ideal type coin, with a huge mintage of 2.8 million pieces and many high-grade specimens available for collectors. The present coin is a prime example, with razor-sharp details on all design elements, vibrant mint luster, and pleasing orange-gold surfaces. This highend Gem possesses outstanding eye appeal. (#8749)

## 1902 Liberty Eagle, MS64 Low-Mintage Condition Rarity

6698 1902 MS64 PCGS. The 1902 is perhaps underappreciated due to its proximity to the 1901, the most common Philadelphia issue of the series. But the 1902 has a mintage of just 82,400 pieces and is very scarce at the MS64 level. This is a lovely canary-gold near-Gem with unmarked surfaces and a hint of aqua patina near the IB in LIBERTY. Population: 19 in 64, 3 finer (2/11). (#8750)

6699 1902-S MS65 PCGS. Light pink and pale green overtones enhance the lustrous yellow-gold surfaces of this sharply defined Gem. The date is conditionally rare and seldom seen this nice, rarely nicer. Population: 66 in 65, 5 finer (3/11).(#8751)

- 6700 1903-O MS62 PCGS. The 1903-O Liberty eagle is a favorite choice of mintmark type collectors, as Mint State examples are not difficult to locate. This charming MS62 example features eyecatching orange-gold surfaces, with strong luster, and well detailed devices. (#8753)
- 6701 1904 MS62 NGC. CAC. Brilliant lemon-yellow surfaces and sharp design elements provide considerable eye appeal to this piece, despite minor marks on each side. An excellent choice for a 20th century gold type set.(#8755)
- 6702 1904-O MS62 PCGS. CAC. A coruscating green-gold New Orleans ten with a crisp strike and scattered unimportant marks. The obverse rim has an inconspicuous ding at 5:30. (#8756)

#### 1904-O Eagle With Rich Cartwheel Luster, MS63

- 6703 1904-O MS63 NGC. This gorgeously toned Select Mint State piece boasts mellow, deep apricot-gold coloration over surfaces that exhibit rich cartwheel luster that would not be out of character on a Morgan dollar. The strike is good while lacking on the obverse hair, and a sprinkling of abrasions on each side precludes an even finer grade. Census: 42 in 63, 14 finer (3/11). (#8756)
- 6704 1905 MS63 NGC. Peach-gold and olive toning embrace lustrous and minimally abraded surfaces. A precisely struck example of this lower mintage Philadelphia issue.(#8757)
- 6705 1905 MS63 NGC. CAC. A sharp strike complements slightly satiny yellow-orange luster on this Select coin. Lightly abraded overall with a copper spot noted below the 1 in the date. (#8757)
- 6706 1906 MS63 PCGS. CAC. This attractive Select Liberty eagle displays sharply detailed central devices, but a few of the stars are a little flat. The light orange-gold surfaces are brightly lustrous and show few signs of contact. (#8759)

# Choice 1906 Liberty Ten Rare in High Grade

- 6707 1906 MS64 PCGS. The 1906 Liberty eagle is something of a condition rarity, from a mintage of 165,497 pieces. The issue is reasonably available at the Select level, but MS64 coins are rare, and higher grades are very rare. The present coin is a sharply detailed Choice specimen, with lustrous surfaces and vivid greenish-gold color. Population: 25 in 64, 8 finer (3/11). (#8759)
- 6708 1906-S MS62 NGC. Bold yellow-gold and wheat luster is this S-mint eagle's greatest asset. Lightly abraded overall with a pair of rim faults at the upper obverse. (#8762)
- 6709 1907 MS64 PCGS. CAC. Beautiful peach-gold toning cedes to olive-green near the rims. Lustrous and precisely struck with scattered light field grazes. The final year of the Christian Gobrecht design, which remained in production for more than 60 years after his 1844 death. (#8763)

#### Softly Frosted Near-Gem 1907-D Eagle

6710 1907-D MS64 PCGS. Warm yellow-orange luster graces this softly frosted, subtly satiny near-Gem from the early days of the Denver Mint. Well-defined in the centers, if unevenly detailed on the obverse stars, and a generally attractive coin with just a few luster scrapes to the left of the portrait. Population: 47 in 64, 0 finer (3/11). (#8764)

#### PROOF LIBERTY EAGLES

#### Proof 1898 Ten Dollar

6711 1898 — Impaired Proof — Genuine PCGS. The PCGS number ending in .GN suggests an unknown reason why PCGS deemed this coin not gradable. In our opinion, this coin has the details of a PR60 specimen that has environmental damage from being lacquered and later exposed to heat, possibly from a fire. The obverse displays a few patches of bubbles, and exhibits raised dark speckles on the lower left quadrant. The reverse has better eye appeal, although the left border also displays dark speckles. A mere 75 proofs were struck.

## Briefly Circulated Proof 1901 Eagle

6712 1901 PR55 PCGS. The 1901 ten dollar is a seldom-seen date with only 85 proofs struck. Of that number, it is reliably estimated that today probably no more than two dozen pieces exist in all grades as recognizable proofs. The uniform depth of mirrored reflectivity in the fields of this coin leave no doubt about its proof status. Exposed areas display chatter from a short period of handling in the channels of commerce.

Ex: New York Signature (Heritage, 6/2005), lot 6620, which realized \$5,750. (#8841)

#### Collectible PR55 1901 Ten Dollar

6713 1901 PR55 PCGS. The proof 1901 ten dollar is seldom encountered. Only 85 proofs were struck, and many examples were eventually spent, since ten dollars went far in commerce during the early 20th century. Even coin dealers of the day often deposited proofs, since such pieces were out of collector budgets and difficult to sell at a premium. This well struck example retains considerable flashy luster throughout the borders. Scattered moderate marks are typical for a lightly circulated larger denomination gold piece. Ex: Central States Signature (Heritage, 4/2008), lot 3646, which realized \$8,050. (#8841)

#### Seldom-Seen Proof 1904 Liberty Ten

6714 1904 — Altered Surface — NCS. Proof. The obverse field has been carefully smoothed, perhaps with the aid of a laser. The modified field provides exceptional cameo contrast with the portrait. The reverse has a pleasing, original appearance and has lightly toned peach-red. A stingy 108 proofs were produced.

## **INDIAN EAGLES**

- 6715 1907 No Periods MS62 NGC. Better-defined than usually seen, especially on the reverse. Orange-kissed apricot-gold surfaces have a touch of gloss to the luster. Appealing, though the portrait shows a number of small marks.(#8852)
- 6716 1907 No Periods MS62 NGC. Lovely lemon-yellow surfaces have splashes of dark patina on this original No Periods eagle. Both sides have frosty luster and the usual grade-consistent marks. (#8852)
- 6717 1907 No Periods MS62 PCGS. A frosty and fully lustrous example, this No Periods eagle exhibits bright yellow surfaces with excellent eye appeal for the grade. Trivial marks include a small scrape on Liberty's cheek.

### 1907 No Periods Eagle, MS63 Strong Visual Appeal

6718 1907 No Periods MS63 NGC. Like most examples seen, this attractive 1907 No Periods Indian eagle displays some softness of detail on Liberty's hair and the lower headdress feathers. The surfaces are a bright greenish-gold, with vibrant satiny mint luster. A few minor contact marks on Liberty's face are the only marks of note. Eye appeal is outstanding. (#8852)

## Select 1907 No Periods Saint-Gaudens Ten Well-Preserved Example

6719 1907 No Periods MS63 ANACS. The low relief or "No Periods" variety, first Saint-Gaudens eagle in the circulating series. This effusively lustrous honey-gold representative has a pillowy strike in the centers but remarkable surface preservation and all-around appeal. Housed in an ANA-era ANACS holder with six-character ID. From The Dustinn (Dusty) Lee Gibson Collection. (#8852)

## 1907 No Periods Indian Ten, MS63 Popular First-Year Type Coin

6720 1907 No Periods MS63 NGC. CAC. The 1907 No Periods Indian eagle is extremely popular with type collectors as the first issue of this design released into general circulation. The present coin is a well struck Select specimen, with some typical softness on the hair and eagle's feathers. The surfaces are light greenish-gold, with soft satiny mint luster. (#8852)

## Select 1907 No Periods Ten Dollar With Strong Eye Appeal

6721 1907 No Periods MS63 PCGS. CAC. Bold sun-yellow luster with elements of orange. This first-year Saint-Gaudens ten has a characteristically soft strike in the centers, yet the overall eye appeal is strong. Only a few wispy abrasions, these mostly at the rims, preclude a finer designation. Housed in a green label holder. (#8852)

#### Exemplary 1907 No Periods Eagle, MS63

- 6722 1907 No Periods MS63 NGC. CAC. This Select type coin should prove popular with multiple bidders, as an exemplary specimen of this first-year issue. Orange-gold surfaces are alive with handsome luster, and since a loupe fails to reveal mentionable abrasions, this piece certainly suggests an even finer grade assessment. Apparently CAC concurs. (#8852)
- 6723 1908 No Motto MS61 PCGS. Softly struck and luminous, this No Motto 1908 eagle has moderate abrasions and a prominent scrape on Liberty's cheek. It nonetheless retains considerable eye appeal, and as part of a low-mintage issue, any Mint State example is important. (#8853)
- 6724 1908-D No Motto AU58 PCGS. Just a touch of rub is noted on high points such as the hair over Liberty's ear and the upper ridge of the eagle's wing. Soft apricot-gold luster is largely intact. (#8854)
- 6725 1908-D No Motto MS61 PCGS. A beautiful orange-gold example, this lustrous 1908-D No Motto ten displays frosty surfaces and trivial marks on each side. A small mark is evident on Liberty's chin. From The Dustinn (Dusty) Lee Gibson Collection. (#8854)

## 1908-D Indian Ten, MS62 Underrated No Motto Type

6726 1908-D No Motto MS62 PCGS. An underrated issue, the 1908-D No Motto Indian eagle is much more difficult to locate in high grade than its 1908 No Motto counterpart, despite its higher mintage of 210,000 pieces. The present coin is a well struck MS62 example, with light orange-gold surfaces and frosty mint luster. (#8854)

# 1908-D No Motto Eagle, MS62 Last Year of Design

6727 1908-D No Motto MS62 PCGS. Popular with type collectors and series specialists alike, the 1908-D No Motto Indian eagle represents the second, and last, year of the No Motto design. The present coin is a pleasing MS62 specimen, with the typical soft strike on the central obverse, light greenish-gold surfaces, and frosty mint luster. (#8854)

## 1908-D No Motto Eagle, MS62 Difficult Any Finer

6728 1908-D No Motto MS62 PCGS. The 1908-D No Motto eagle is an interesting issue from the standpoint of its mintmark location. It is the only branch mint issue to have the mintmark placed to the upper left of the olive branch. On subsequent dates it appears to the left of the arrow points. The present coin is in a highly collectible Mint State grade that is difficult to locate any finer. (#8854)

## Conditional Rarity Second-Year Issue 1908-D No Motto Ten Dollar, MS62

- 6729 1908-D No Motto MS62 NGC. A conditionally rare second-year issue that is occasionally found in high-end AU grades, including a limited number of Uncirculated pieces that almost always fall into the MS60 to MS62 range. A mix of greenish, orange, and peach toning overlays bright surfaces. Sharply struck on the devices, and a few minute marks on each side. NGC has certified 73 pieces finer (3/11). (#8854)
- 6730 1908-D Motto MS62 PCGS. Yellow-gold overall with wheat and honey-orange accents. This early Motto ten dollar has decent detail with few significant abrasions for the grade.(#8860)

# 1908-D Ten Dollar, MS62 Popular With Motto Issue

- 6731 1908-D Motto MS62 PCGS. CAC. The 1908-D with Motto ten dollar, with a mintage of more than 800,000 pieces, can be found fairly easily in MS60 and MS61 grades. Examples in MS62 are found more infrequently but can still be located with patience. The mattelike surfaces on this piece tend to conceal the numerous but small abrasions present on each side. The satiny mint luster has a deep orange-gold hue. (#8860)
- 6732 1908-S AU55 PCGS. An impressive example of the low mintage 1908-S eagle, surviving from a production of only 59,850 coins. This piece has excellent luster with frosty yellow surfaces and light high-point wear that defines the grade.(#8861)
- 6733 1908-S Obverse Scratched NGC Details. Unc. This lustrous rare-date Indian ten has a solitary vertical hairline on the left obverse field. The hairline would be imperceptible on a circulated or toned silver coin, but because this is a gold coin and would otherwise command a high grade, it is noted on the NGC insert. Nonetheless, expect a premium bid to be required to secure the present lot, since the eye appeal is significantly greater than the NGC designation suggests.
- 6734 1909 MS62+ PCGS. Yellow-orange surfaces are satiny and attractive. A small cut on the cheek precludes Select status, but the rest of each side is surprisingly well-preserved.(#8862)
- 6735 1909-D MS61 NGC. Warm orange and peach elements prevail on this luminous D-mint Saint-Gaudens eagle. Lightly abraded for the grade assigned, though a significant mark is hidden in the feathers just above Liberty's headband.(#8863)

## 1909-D Indian Eagle, MS62 With Greenish-Gold Highlights

6736 1909-D MS62 NGC. An attractive MS62 specimen, this 1909-D Indian eagle displays light orange-gold surfaces, with greenish-gold highlights and frosty mint luster. The design elements are well detailed, with a touch of softness on the lower headdress feathers. The surfaces are lightly abraded for the grade. (#8863)

### 1909-D Indian Eagle, MS62 Elusive in Finer Grades

- 6737 1909-D MS62 NGC. CAC. Although myriad surface marks are present on this piece, it retains excellent orange-gold luster and strong design details. Splashes of deep olive toning attest to its originality. This relatively common date is still hard to find in higher grades. A splendid specimen with only 83 finer NGC coins (3/11). (#8863)
- 6738 1909-S AU58 NGC. Just a touch of rub separates this yelloworange S-mint eagle from a more expensive Mint State designation. Lightly patinated with several small digs scattered in the reverse fields.(#8864)
- 6739 1909-S MS61 PCGS. Luminous yellow-to-orange with heavy patina and a few coppery areas on the high points. Minimally abraded for the grade assigned, though scattered marks are present. (#8864)
- 6740 1910 MS63 PCGS. CAC. A pleasing, original yellow-gold specimen, this Select Mint State piece has frosty luster with splashes of dark toning on each side. Minor surface marks are consistent with the grade. (#8865)

#### Uncommon MS64 1910 Saint-Gaudens Eagle

6741 1910 MS64 NGC. CAC. A pleasingly detailed yellow-gold near-Gem with generous luster. Liberty's face shows a few small marks, but there are no serious distractions on either side. By 1910, the novelty of the Saint-Gaudens gold designs had faded away, and the survival of better-grade examples came down to the masses of coins held in Europe and other overseas locations. (#8865)

#### 1910 Ten Dollar, MS64, Ideal Type Coin

- 6742 1910 MS64 NGC. CAC. The 1910 ten dollar (318,500 mintage) is one of the more available dates in all levels of preservation, especially through the MS63 grade. Even near-Gem and Gem examples can be found without too much trouble, making them ideal for type purposes. Higher-grade coins become quite scarce. The mattelike surfaces have a significant overlay of frosted mint luster, and the devices are sharply struck. Each side has reddishorange patina with lilac interspersed. (#8865)
- 6743 1910-D MS64 PCGS. CAC. Light pink graces the frosty yellow-gold surfaces of this attractive Indian eagle. The 1910-D is a plentiful date and one of the few branch-Mint Indian eagles that can be obtained in higher grades.(#8866)
- 6744 1911-D AU53 NGC. Diffuse flash-luster is largely yellow-gold with aspects of orange. Lightly worn with shallow abrasions on the portrait and in the reverse fields close to the eagle. (#8869)

#### Antique-Gold 1912 Gem Ten Dollar

- 6745 1912 MS65 NGC. From a mintage of 405,000 pieces, the 1912 Indian Head ten dollar coin is an available date in the series short of MS65, a level at which the certified populations thin out markedly. This Gem shows antique-gold coloration over the mattelike fine-grained surfaces. Swirling luster is evident throughout, although a few minor marks on Liberty's cheek and chin are consistent with the grade assigned. Census: 62 in 65, 16 finer (3/11). (#8871)
- 6746 1912-S AU58 NGC. From a mintage of 300,000 pieces, the 1912-S Indian eagle is an elusive date in high grade. This well detailed AU58 example displays attractive yellow-gold surfaces and bright frosty mint luster.(#8872)

## 1912-S Ten Dollar, MS62+ Difficult Any Finer

- 6747 1912-S MS62+ PCGS. The 1912-S ten dollar, with a mintage of 300,000 pieces, is one of the more difficult grades to locate in the better Mint State grades. MS63 and MS64 examples are quite scarce and Gem and finer coins are quite rare. This upper-end MS62 has soft mint frost over noticeably granular surfaces. The striking details are strong throughout, and the few small abrasions that are present tend to blend in with the mattelike finish. (#8872)
- 6748 1913-S AU55 PCGS. A scarce date in the series, the 1913-S had a mintage of only 66,000 coins, and survivors are infrequently encountered. This Choice AU piece has light yellow surfaces with myriad marks but nearly full frosty mint luster. (#8874)

## 1914 Eagle, Select Mint State Low-Mintage Wartime Issue

6749 1914 MS63 PCGS. The 1914 Indian Head eagle's mintage was only 151,000 coins, smaller than most of the P-mint productions of the decade. But survivors are plentiful today, perhaps because of repatriations from overseas hoards. This pleasing Select Mint State piece is a little finer than the average certified grade of MS61. Both sides have bright lemon-yellow luster and trivial, grade-limiting marks. (#8875)

## 1914 Ten Dollar, MS63 Bright Mint Luster

6750 1914 MS63 NGC. CAC. The 1914 ten dollar is common in most grades, including the better levels of Mint State. This likely results, at least in part, from a large number of this date being hoarded with the start of the First World War. Jeff Garrett and Ron Guth suggest that many survivors spent their first 40 to 60 years in European bank vaults. The surfaces are brightly lustrous and the design motifs are sharp throughout. (#8875)

## 1914 Indian Ten, MS64 Conditionally Rare Any Finer

- 6751 1914 MS64 PCGS. CAC. The modest mintage of 151,000 eagles in 1914 was still high enough that any collector can obtain one. However, MS64 coins are scarce and finer pieces are rarely seen. This Choice Mint State coin has frosty luster with honeygold surfaces and a few dark spots on the reverse. PCGS has only certified 38 finer pieces (3/11). (#8875)
- 6752 1914-D MS62+ PCGS. Excellent design definition through the centers with slightly satiny gold-orange luster. Lightly abraded with a couple of nicks under the eye but a coin that comes remarkably close to Select status.(#8876)
- 6753 1914-D MS63 PCGS. Bluish-violet overtones accompany the brilliant yellow-gold luster of this frosty Indian eagle. A few tiny marks on each side prevent a higher grade.(#8876)
- 6754 1914-S AU58 NGC. Though near-Mint, this S-mint eagle has powerful yellow-gold luster with orange accents. Appreciably abraded on each side with a dig under Liberty's hair and several to the right of the eagle's head.(#8877)

#### 1914-S Indian Ten, MS61

- 6755 1914-S MS61 PCGS. From a nominal mintage of 208,000 pieces, the 1914-S Indian eagle can be located in Mint State condition with a little patience. The present coin is a well struck MS61 example, with vivid greenish-gold surfaces and highlights of rose color. Bright frosty mint luster is evident on both sides. (#8877)
- 6756 1915 MS63 PCGS. Bold yellow-gold with orange elements near the flashy borders. This Saint-Gaudens eagle has a clean appearance for the Select grade and solid eye appeal. (#8878)
- 6757 1915-S AU55 PCGS. A mintage of just 59,000 pieces ensures the scarcity of the '15-S ten. A majority of survivors are in circulated grades, including a solitary outlier certified as Fine 15 by PCGS. The present lustrous example has only slight wear on the eagle's plumage, and both sides exhibit surprisingly few abrasions. (#8879)
- 6758 1926 MS65 PCGS. Profoundly lustrous with bold cartwheels on surfaces that shift from rich honey-gold to pale yellow in color. Smooth eye appeal offers great allure for the high-end gold type or date enthusiast. PCGS has graded a mere nine pieces in MS66 and better grades (3/11).(#8882)

#### 1926 Indian Ten Dollar, MS66 Tied for Finest NGC-Certified

- 6759 1926 MS66 NGC. This high grade olive-gold type coin exhibits exemplary luster and is crisply struck. Only a few feathers near the eagle's shoulder lack a full impression. The occasional minor field abrasion limits the grade. Census: 52 in 66, 0 finer (3/11). Ex: Baltimore Signature (Heritage, 3/2009), lot 3194, which realized \$12,650. (#8882)
- 6760 1932 MS64 PCGS. Rich sun-yellow luster has considerable orange overtones on this well struck near-Gem. An excellent type selection that is housed in a green label holder.(#8884)
- 6761 1932 MS64 PCGS. A well detailed Choice example, from the penultimate year of the Indian eagle design, this attractive orange-gold specimen displays highlights of rose color, and vibrant mint luster.(#8884)
- 6762 1932 MS64 PCGS. Shallow chatter marks in the left obverse field prevent a higher grade to this gorgeous and frosty yellow-gold example. A few other marks are entirely inconsequential. (#8884)
- 6763 1932 MS64+ PCGS. CAC. Rich satin-frost luster is primarily wheat-gold and entirely gorgeous. A great near-Gem that is ideal for the type enthusiast collecting similarly graded pieces. (#8884)
- 6764 1932 MS64+ PCGS. CAC. The 1926 and 1932 Indian eagles are the two dates most often chosen for type collections, and the 1932 is popular as the only collectible U.S. gold coin of the decade. This brilliant and highly lustrous near-Gem has bright green-gold surfaces with faint pink overtones.(#8884)
- 6765 1932 MS65 PCGS. CAC. One of the all-time most popular gold type coins and one of the few gold dates from the decade of the 1930s that can actually be acquired at reasonable cost, the 1932 eagles were produced in record quantities during the dark days of the Great Depression. This splendid Gem boasts scintillating luster radiating from yellow-gold surfaces on both sides. The CAC endorsement is spot-on.(#8884)

## Appealing MS66 1932 Eagle Exemplary Type Coin

6766 1932 MS66 NGC. Along with the 1926, the 1932 ranks as one of the most popular type coins, not merely among Saint-Gaudens eagles, but for any U.S. gold series. Examples in grades through Choice are readily available and even Gems can be had for a price, but demand substantially exceeds supply for anything finer. This lovely Premium Gem offers a precise impression and lustrous limegreen and orange-gold surfaces. Minor contact on the reverse field corresponds to the grade. NGC has graded just eight numerically finer examples (3/11).

Ex: Houston Signature (Heritage, 12/2008), lot 2230, which realized \$10,350. (#8884)

#### LIBERTY DOUBLE EAGLES

6767 1850 — Improperly Cleaned — NGC Details. AU. A minimally worn example from the first year of business strike double eagle production. Lightly abraded butter-yellow surfaces have dulled luster from a past cleaning and a reddish patch just to the left of the date.

# 1850 Double Eagle, AU53 Premier Date in the Series

6768 1850 AU53 PCGS. CAC. This lightly circulated Liberty double eagle displays a few signs of high-point rub on the devices, but almost all original detail remains intact. The lustrous surfaces display an attractive mix of orange and greenish-gold color. The year 1850 was the first for the design and denomination. (#8902)

## 1850 Liberty Twenty, AU53 First Regular-Issue Double Eagle

6769 1850 AU53 NGC. Always popular as the first date of the denomination, the 1850 Liberty double eagle boasts a large mintage of 1.1 million pieces. This lightly circulated example features strongly impressed design elements, with just a touch of high-point rub on the hair and the eagle's head. The light orange-gold surfaces retain much original mint luster. (#8902)

# 1850 Double Eagle, AU55 Popular First-Year Type Coin

6770 1850 AU55 PCGS. In 1850, the first year of regular-issue production for the double eagle, the Philadelphia Mint achieved a large mintage of 1.1 million pieces. The date saw heavy circulation at the time of issue, and most examples seen are in circulated grades, with Choice AU specimens becoming quite scarce. The present coin is sharply detailed, with few signs of actual wear. The pleasing orange-gold surfaces are lustrous and moderately abraded for the grade. Population: 58 in 55, 99 finer (3/11). (#8902)

# 1850 Liberty Twenty, AU58 First Year of Issue

6771 1850 AU58 NGC. This is a fully lustrous and highly attractive example with brilliant greenish-yellow-gold color. An unusually high degree of eye appeal makes this an important example for the date or type collector. Although not mark-free, the surfaces have relatively few blemishes. (#8902)

## 1850-O Double Eagle Minimally Circulated

6772 1850-O Genuine PCGS. The PCGS number ending in .95 suggests Scratched or Rim Dent as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been scratched. There are no singularly distracting marks, but the fields display patches of light scuffs from cleaning. Luster nonetheless outlines design elements of this popular introductory O-mint issue.

## Historic 1850-O Twenty Dollar, AU Details Coined From California Gold?

6773 1850-O — Improperly Cleaned — NGC Details. AU. The first-year O-mint issue of the new "double eagle" denomination. (Imagine that for a period of 55 years, from 1795 to 1850, the phrase "double eagle" was likely unheard-of by the U.S. populace, even though it is ubiquitous today.) The big new twenty dollar denomination was enabled only through the vast treasures from El Dorado, the California gold fields. In the early Gold Rush years, California miners had little choice except to use private West Coast assayer-coiners or to transport their gold dust to distant New Orleans for federal coinage — as a recent Heritage foray through New Orleans Mint records confirmed, often waiting years to make the return trip and pick up their round treasures.

This orange-gold piece retains much appeal — aesthetic as well as historic — despite the NGC caveat. Some field hairlines, scattered marks, and a few reeding contacts nonetheless appear. One of those revered "if only this piece could talk" coin issues.

6774 1851 XF45 PCGS. CAC. The 1851 double eagle represents the second year of the denomination, and examples are not too difficult to locate in lower circulated grades. This Choice XF example has held its own over the years, showing only minor contact marks and honest wear on the devices.(#8904)

#### 1851 Double Eagle, AU58

6775 1851 AU58 PCGS. CAC. This well detailed near-Mint Liberty double eagle displays attractive orange-gold surfaces, with bright mint luster on both sides. The surfaces are moderately abraded for the grade. The 1851 double eagle was produced in large numbers, but examples in AU58 condition are scarce today. (#8904)

#### 1851 Liberty Double Eagle, Unc Details

6776 1851 — Improperly Cleaned — NGC Details. Unc. The 1851 Liberty double eagle is a popular type coin, from a large mintage of 2 million pieces. The present coin is a well detailed specimen, with a scattering of minor contact marks on both sides, as usually seen on these big gold coins. The light greenish-gold surfaces are attractive, despite some signs of a previous cleaning.

## 1851-O Double Eagle, XF45 Undoubted California Gold Source

6777 1851-O XF45 PCGS. CAC. A splendid representative of the New Orleans Mint, this green-gold double eagle retains traces of luster with minor marks that are consistent with time spent in circulation. This piece is undoubtedly a product of California gold brought to Louisiana for conversion to coinage. (#8905)

#### 1851-O Double Eagle, AU50 Details

6778 1851-O — Cleaned — ANACS. AU50 Details. Few signs of wear are evident on this lightly circulated 1851-O double eagle. The design elements retain almost all their original detail, although a touch of softness shows on some of the obverse stars. The attractive orange-gold surfaces display areas of prooflike reflectivity but also exhibit signs of a light cleaning.

#### 1851-O Double Eagle, AU53 Details

- 6779 1851-O Cleaned ANACS. AU53 Details. The 1851-O Liberty double eagle is the most available twenty dollar issue from the New Orleans Mint, with a reported mintage of 315,000 pieces. Doug Winter estimates 450-550 examples are extant in all grades, but high-grade specimens are elusive. The present coin is a lightly circulated example, with traces of wear apparent on Liberty's hair and the eagle's head. The attractive greenish-gold surfaces retain much bright mint luster, only slightly subdued by the noted cleaning.
- 6780 1852 AU50 NGC. Strong orange-gold luster clings to each side of this lightly worn but distinctly appealing early double eagle. Well-defined but with a number of light to moderate marks which contribute to the grade.
- 6781 1852 AU53 PCGS. CAC. This lightly circulated 1852 double eagle shows just a touch of wear on the devices and few contact marks. The mint luster is a trifle subdued, and the surfaces area pleasing orange-gold color.(#8906)

#### AU Sharpness 1852-O Twenty

6782 1852-O — Improperly Cleaned — NGC Details. AU. This early New Orleans double eagle is well struck and is essentially free from circulation wear, but the fields are hairlined, subdued, and a bit bright. Flashy luster emerges from much of the reverse. Despite its cleaning, the present piece will undoubtedly please many Southern gold collectors.

## Bold AU 1852-O Double Eagle Available Early O-Mint Twenty

- 6783 1852-O AU50 ANACS. The 1852-O double eagle is among the few available O-mint issues from the 1850s, the first decade of the new denomination. However, few examples are seen above the AU level of the present piece, a bold and glossy yellow-gold example. Muted luster emerges from the recessed areas, and the abrasions are more in the form of field chatter than noticeable marks, save for a short vertical tick to the right of the date. Ex: Dallas Signature (Heritage, 12/2005), lot 1590. (#8907)
- 6784 1853 AU53 NGC. The 3 in the date is repunched, but the variety is neither Breen-7161 nor the 1853/2 Breen-7162. This is a briefly circulated butter-gold double eagle with original color and no distracting abrasions.(#8908)

## Guide Book Variety 1853/2 Twenty, AU53

6785 1853/2 AU53 NGC. FS-301. The only Liberty Head double eagle overdate, with a confirming diagnostic of a die lump beneath the R of LIBERTY. The variety is eagerly pursued by *Guide Book* collectors and cherrypickers of all stripes. This yellow-gold example radiates good luster, with a few abrasions characteristic of a short spate in mid-19th century commerce. (#8909)

## Choice AU 1853/2 Double Eagle Rare Issue in High Grade

6786 1853/2 AU55 NGC. FS-301. The 1853/2 double eagle was discovered in the 1950s. The variety is most easily identified by a die bump below the R in LIBERTY, as the remains of the 2 are difficult to identify on low grade specimens. This well detailed Choice AU specimen displays much original mint luster on the pleasing orange-gold surfaces. Census: 29 in 55, 45 finer (3/11). [#8909]

#### Elusive Choice XF 1853-O Double Eagle

6787 1853-O XF45 PCGS. CAC. Despite a stated mintage of 71,000 pieces, the 1853-O is an elusive date in XF45 and finer grades. Offered here is an uncommonly sharp yellow-gold example that retains significant luster in lightly abraded fields. A short line of reed marks is noted under the eagle's right (facing) wing. PCGS has graded 87 numerically finer examples (3/11). (#8910)

6788 1854 Small Date XF45 PCGS. Two different date logotypes are known and the Small Date is the one that is normally encountered. This green-gold example has noticeable wear on the high points, including the cheek, hair curls, and top of the head. As expected for these large gold coins, the surfaces are considerably marked. Still an appealing example.(#8911)

## 1855 Liberty Twenty, AU55 Seldom Seen Finer

6789 1855 AU55 PCGS. CAC. The 1855 Liberty double eagle is a high-grade condition rarity, with nearly all examples seen in lower circulated condition. The present coin is an attractive Choice AU specimen, with just a touch of high-point wear, light orange-gold surfaces, and much original mint luster. A few streaky grease marks are noted on the reverse. Population: 27 in 55, 38 finer (3/11). (#8914)

## Scarce Choice AU 1855 Twenty

6790 1855 AU55 PCGS. The 1855 Liberty double eagle claims a mintage of 364,666 pieces, but the issue circulated widely and few coins were saved by collectors. The 1855 is almost always seen in lower grades, and Choice AU specimens are quite scarce. The present coin is sharply detailed, with light greenish-gold surfaces and only a few signs of circulation. Population: 27 in 55, 38 finer (2/11). (#8914)

## 1855 Type One Twenty, AU58 A Mint State Rarity

6791 1855 AU58 PCGS. CAC. Frosty luster and bold design details characterize this lovely orange-gold and olive example with trivial surface marks on each side. A short scratch is evident in the right reverse field and actually appears raised on the surface of this piece. This issue is rarely seen in Mint State grades, with just 30 finer PCGS and NGC examples. Population: 24 in 58, 14 finer (3/11). (#8914)

#### Near-Mint 1856-S Liberty Twenty

6792 1856-S AU58 NGC. CAC. The 1856-S Liberty double eagle was well represented in recent shipwreck finds, so high grade examples are not as rare in today's market as they were in previous years. The present coin is a well detailed near-Mint example, with lustrous greenish-gold surfaces. Only 37 coins have been certified in higher numeric grades at NGC (3/11). (#8919)

6793 1857 AU55 NGC. A few tiny marks on each side are consistent with the grade. This Choice AU piece displays nearly full mint frost with brilliant yellow surfaces and light wear on the high points. (#8920)

#### Orange-Gold 1857 Twenty Dollar, AU58

6794 1857 AU58 NGC. This near-Mint State orange-gold example shows a few high-point abrasions from its short spell in circulation, along with some minor grease marks from the minting process. Much excellent luster remains, however, and the fields are somewhat prooflike underneath the minor drawbacks. (#8920)

# 1857-O Twenty Dollar, XF40 Historic Early O-Mint Issue

6795 1857-O XF40 PCGS. CAC. The 1857-O double eagle saw a moderate production of 30,000 pieces, far higher than some of the O-mint issues from earlier in the decade. Most of them circulated; this XF40 example is about a typical grade for the issue. The surfaces are greenish-gold with deeper orange-gold around the devices, and the piece shows some moderate, undistracting abrasions consistent with a brief time in circulation. A pleasing example of this historic early O-mint twenty. Population: 10 in 40, 74 finer (3/11). (#8921)

6796 1857-S AU53 NGC. Variety 20D. Bold S, which suggests this coin was among those recovered from the S.S. Central America. A majority of the Bold S pieces were certified by PCGS in AU grades. This partly lustrous apricot-gold representative can be identified by a curved pinscratch near the shoulder curl.

Ex: Long Beach Signature (Heritage, 9/2008), lot 4050. (#8922)

6797 1857-S AU55 NGC. Not from the S.S. Central America, since the reverse die does not match any of the varieties listed by Robert Evans in his July 2000 Numismatist article. The mintmark is entered high and tilts slightly to the right. A partly lustrous and unblemished yellow-gold Choice AU Type One twenty. (#8922)

6798 1857-S AU55 NGC. A lightly rubbed 1857-S double eagle of likely terrestrial origin. Yellow-gold surfaces are dusky with a heavily patinated appearance. Lightly abraded overall with a heavy dig under Liberty's chin.(#8922)

## S.S. Central America 1857-S Twenty, MS63 Variety 20C, Narrow Serif

6799 1857-S Narrow Serif MS63 PCGS. Variety 20C. Narrow Serif SSCA 3944. This is a glittering orange-gold example of this Central America undersea treasure, certified with the gold SSCA special PCGS label. This well-struck example shows a few minor ticks consistent with the grade, but the superlative, radiant luster and eye appeal put this piece in the top end for the assigned grade. Comes with outer box, book-style presentation case, and certificate of authenticity. (#70002)

# 1858 Double Eagle, AU53 Scarce, Lightly Circulated Example

6800 1858 AU53 NGC. The 1858 Liberty double eagle is a condition rarity in the series, from a mintage of 211,714 pieces. Easy to locate in lower circulated condition, high-grade specimens are quite elusive. The present coin is an attractive AU53 example of this Type One date, with lustrous surfaces and fewer than average abrasions. There is a touch of wear on the eagle's head and Liberty's hair. (#8923)

#### Choice AU 1858 Double Eagle

6801 1858 AU55 NGC. Substantial luster brightens the motifs and legends of this lightly circulated Choice AU twenty. The strike is sharp, and wear is confined to high points such as the wingtips. Minor marks are scattered, none of which merit mention aside from a pinscratch above the TWEN in TWENTY. (#8923)

6802 1859-S XF45 ANACS. Small surface marks and light wear on the high points are expected at the Choice XF grade. This example has light yellow surfaces and offers considerable luster for the grade. (#8928)

# 1860 Double Eagle, AU58 Exceptional Value at This Grade Level

6803 1860 AU58 NGC. The 1860 twenty dollar is reasonably plentiful in circulated condition. Examples that grade About Uncirculated to the lower levels of Mint State can be located by collectors with a degree of patience. This high-end AU looks at first glance like a Mint State coin. The surfaces retain generous amounts of mint luster, and there are very few marks on either side. Exceptional quality and value. (#8929)

#### Lustrous 1861 Type One Twenty, AU55

6804 1861 AU55 PCGS. This Civil War double eagle has essentially full luster, and the khaki-gold toning is attractive. The strike is pleasing down to the eagle's wingtips, and the sole abrasion of consequence is a diagonal scratch on Liberty's jaw. The 1861 was among the dates recovered from the S.S. Republic, although the past provenance of the present piece is unknown. (#8932)

# Near-Mint 1861 Double Eagle Popular Type Coin

6805 1861 AU58 NGC. The 1861 Liberty double eagle enjoyed a large mintage of nearly 3 million pieces, making it an available date in high grade and an ideal 19th century type coin. This well struck near-Mint example offers lustrous orange-gold surfaces, with highlights of green color. A number of minor abrasions in the obverse field do not affect the grade. (#8932)

#### 1861-S Liberty Twenty, AU50

6806 1861-S AU50 NGC. Like most San Francisco Mint twenties of the Civil War era, this piece has light wear and myriad marks with hints of violet toning around the devices. Both sides have light yellow surfaces with considerable remaining luster. A lovely piece despite the surface impairment. (#8935)

## Choice AU 1862-S Double Eagle Challenging Civil War Date

6807 1862-S AU55 NGC. Though the Civil War locked down circulation of gold and silver coinage in the East, Western economies such as California continued to circulate hard money. This 1862-S double eagle came out of that time better-preserved than most of its fellows, lightly rubbed but with pleasing yellow-gold luster touched in wheat and orange. A few stars and the hair under the coronet are soft. (#8938)

# Near-Mint 1862-S Double Eagle From the S.S. Republic

6808 1862-S AU58 NGC. Ex: S.S. Republic. This butter-gold double eagle has a lustrous reverse, and obverse luster is prominent near the rim and with the hair and coronet. Many twenties with limited circulation display rough abrasions, but the present piece has minimal contact aside from faded marks above the chin. Ex: Long Beach Signature (9/2010, lot 5571. (#8938)

#### Yellow-Gold AU58 1862-S Twenty

6809 1862-S AU58 NGC. The large mintage of this issue, nearly 900,000 pieces, circulated extensively, so that today most certified examples average Choice XF or so. This near-Mint piece boasts lustrous yellow-gold surfaces that show a scattering of high-point abrasions, mostly inconsequential save for some reeding marks before Liberty's neck. (#8938)

## Near-Mint 1863-S Twenty Large S, Rare Any Finer

6810 1863-S AU58 NGC. Breen-7216. Large S, one of two mintmark sizes known for the issue. This partly lustrous Borderline Uncirculated Type One twenty is sharply struck and has only a single noticeable abrasion, located on the field in front of Liberty's nose. The 1863-S is typically encountered in XF-AU grades, while Mint State examples are highly elusive. (#8940)

6811 1865 AU50 PCGS. The last No Motto Philadelphia issue, struck during the final year of the Civil War. Luster illuminates protected areas. The obverse rim is slightly raised at 10 o'clock. In an old green label holder.

Ex: Long Beach Signature (Heritage, 9/2008), lot 4085, which realized \$1,610.(#8943)

### Near-Mint 1865 Double Eagle Lustrous Civil War Issue

6812 1865 AU58 NGC. Civil War-dated gold coins of any denomination always garner an extra level of collector interest, due to their historic appeal and (sometimes) low mintages. This 1865 double eagle was produced to the extent of 351,175 circulation strikes, however, certainly not a low number. This piece sports generous luster prevailing over moderately abraded, fairly prooflike orange-gold surfaces. Excellent eye appeal. (#8943)

# 1866 Twenty Dollar, AU58 Popular First-Year Type Two Issue

6813 1866 AU58 NGC. CAC. The 1866 double eagle is popular as the first year of the Type Two design with the motto IN GOD WE TRUST on the reverse. With a plentiful mintage approaching 700,000 pieces the date can be obtained fairly easily in Very Fine and Extremely Fine grades. About Uncirculated pieces are scarce, especially in the higher levels, and Mint State specimens are rare. The orange-gold surfaces on this piece retain noticeable amounts of mint luster, and the strike is strong for a Type Two. (#8949)

### Mint State 1867 Double Eagle Lustrous Surfaces

6814 1867 MS61 NGC. From a nominal mintage of 251,065 pieces, the 1867 Liberty double eagle is a scarce issue in Mint State grades. This attractive MS61 example is sharply detailed, with light orange-gold surfaces that display highlights of lavender at the rims. The mint luster is vibrant and appealing on both sides. Census: 92 in 61, 38 finer (2/11). (#8951)

## 1867-S Liberty Double Eagle, AU58 Scarce Issue in High Grade

6815 1867-S AU58 NGC. The 1867-S Liberty double eagle boasts a large mintage of 920,750 pieces, but the issue was widely circulated and few high quality examples are extant today. The present coin is a well detailed near-Mint specimen, with lustrous greenish-gold surfaces. Only 20 coins have been certified in higher numeric grades at NGC (2/11). (#8952)

### Choice AU 1868-S Liberty Twenty Scarce Date in AU Grades

6816 1868-S AU55 PCGS. CAC. The 1868-S Liberty double eagle claims a large mintage of 837,500 pieces, and the issue is not difficult to locate in lower circulated grades. However, the 1868-S becomes scarce at the Choice AU level. This attractive specimen shows just a touch of high-point wear on the devices, and the light orange-gold surfaces retain much original mint luster. Population: 58 in 55, 63 finer (3/11). (#8954)

## 1868-S Double Eagle, AU55 Original Reddish-Tinted Surfaces

6817 1868-S AU55 PCGS. CAC. Double eagles of 1868 from the San Francisco Mint, sporting a large mintage of 837,500 pieces, are readily located in Very Fine and Extremely Fine grades. About Uncirculated pieces, while more difficult, can still be found with a little patience and searching. Uncirculated coins are elusive, especially in the higher levels. This slightly handled coin has even reddish-gold color over both sides, and numerous small abrasions are scattered about. (#8954)

# Near-Mint 1871 Twenty Low-Mintage Type Two Philly Issue

6818 1871 AU58 NGC. The 1871 Liberty double eagle is a rare date from a mintage of just 80,150 pieces, the lowest production total of any Type Two Philadelphia twenty. The present coin is a lightly circulated near-Mint specimen, with well detailed devices and pleasing greenish-gold surfaces. Vibrant mint luster enlivens both sides. Census: 68 in 58, 10 finer (2/11). (#8960)

## 1871-S Double Eagle, MS61+ Scarce in Mint Condition

6819 1871-S MS61+ NGC. CAC. The 1871-S double eagle comes from a mintage of nearly 1 million coins. As a large number entered circulation, the typical grades found today are in the Very Fine to About Uncirculated range. Mint State coins are rare and when seen are usually between MS60 and MS62. The mint luster is complete, but just a bit thin on each side, and the surfaces are remarkably clean for an MS61. Census: 1 in 61+, 21 finer (3/11). (#8962)

### MS61 1872-S Double Eagle Scarce Issue in Mint State

- 6820 1872-S MS61 NGC. The 1872-S Liberty double eagle is a popular Type Two issue, from a large mintage of 780,000 pieces. The present coin is a very scarce MS61 example, with yellow and rose-gold patina and lustrous surfaces. The devices are well detailed, with just a touch of softness evident on Liberty's hair and the mintmark. A few contact marks on Liberty's face are the only mentionable flaws. Census: 66 in 61, 9 finer (3/11). (#8965)
- 6821 1873 Open 3 MS61 NGC. CAC. Strong, swirling luster is sunyellow with distinct orange overtones. The obverse shows a number of shallow but ultimately grade-defining marks, while the reverse is better-preserved.(#8967)
- 6822 1873 Open 3 MS61 PCGS. A well detailed Mint State example of this popular issue, with vibrant mint luster, and vivid orange-gold surfaces. The Open 3 variety is the most available type for the date. (#8967)

## 1873 Open 3 Double Eagle, MS62 A Lustrous Type Two Type Coin

6823 1873 Open 3 MS62 PCGS. CAC. The 1873 Open 3 double eagle is somewhat scarce in Mint State, with most examples grading MS60 to MS62. Higher-grade specimens are seen less frequently, especially MS64 and MS65 that are extremely rare. The mint luster on this piece is thick and frosted with rich, original orange-gold color. Several small to medium-sized abrasions on the obverse account for the grade. (#8967)

## 1873 Open 3 Twenty Dollar, MS62 An Excellent Type Coin

6824 1873 Open 3 MS62 PCGS. Large numbers of the 1873 Open 3 variety can still be found today, especially in circulated grades. In Very Fine to About Uncirculated condition the issue is common for the type (Jeff Garrett and Ron Guth, 2006). The present MS62 example will make a nice addition to a high grade type collection with its deep orange-gold mint luster that has deeper reddish accents. Well-balanced with approximately the same number of abrasions on each side. (#8967)

# Brilliant MS62 1873 Open 3 Twenty Most Available Type Two Issue

6825 1873 Open 3 MS62 PCGS. Brilliant luster swirls around both sides of this orange-gold MS62 example of the Open 3 1873 twenty, likely the most available Type Two issue. This piece displays generous eye appeal despite small abrasions — individually insignificant, save for a couple of obverse ticks including one on Liberty's jaw — that collectively preclude an even finer grade. The reverse is high-end for the grade. (#8967)

## 1873 Double Eagle, MS62 Open 3 Variety

6826 1873 Open 3 MS62 NGC. The 1873, Open 3 Liberty double eagle is the more available variety of the year, part of a mintage of 1.7 million pieces. The present coin is an ideal piece for a type collection, with sharply detailed devices, vibrant mint luster, and light greenish-gold surfaces. A scattering of minor abrasions on both sides explains the grade. (#8967)

# 1874-S Twenty Dollar, MS61 Alternative Date as a Type Two Twenty

6827 1874-S MS61 PCGS. The 1874-S double eagle can be obtained through About Uncirculated with relatively little trouble. Mint State coins are scarce, however, and are generally seen only in MS60 and MS61. PCGS has graded only 50 specimens finer, the vast majority of which are MS62. This brightly lustrous example sports rich reddish-tinted surfaces and minimal abrasions. (#8972)

## 1875 Twenty Dollar, MS62 Elusive Mint State Type Two

6828 1875 MS62 NGC. This 1875 double eagle is fully lustrous, with lovely orange-gold surfaces and brilliant mint frost. A couple of copper alloy spots appear on the reverse. Mint State examples of the Type Two are elusive. Type One twenties are available in Mint State, thanks to various shipwreck recoveries; Uncirculated Type Threes can be found because of large mintages and the return of overseas hoards. The short-lived Type Two design, however, was influenced by neither of those events and is now the rarest design type in Mint State.

Ex: Long Beach Signature (Heritage, 7/2005), lot 5038. (#8973)

6829 1875-CC — Reverse Improperly Cleaned — NGC Details. AU. The luminous, lightly worn yellow-orange obverse displays well on this Carson City coin, though the reverse shows hairlines from a past cleaning. The overall eye appeal of this coin is solid, though, making it an affordable choice for collectors seeking a Carson City twenty.

#### 1875-CC Liberty Twenty, MS61

6830 1875-CC MS61 PCGS. From a large mintage of 111,151 pieces, the 1875-CC Liberty double eagle is a favorite among mintmark type collectors. The present coin is a well detailed MS61 example, with light orange-gold surfaces and bright mint luster. The surfaces display a moderate number of contact marks for the grade. (#8974)

#### 1875-CC Liberty Twenty, MS61

6831 1875-CC MS61 NGC. The 1875-CC Liberty double eagle is one of the most available Carson City issues of the 1870s, making it a favorite with mintmark type collectors. The present coin is a well struck MS61 example, with lustrous orange-gold surfaces and a few traces of prooflike reflectivity on the reverse. (#8974)

#### MS62+ 1875-S Double Eagle

6832 1875-S MS62+ PCGS. CAC. A gorgeous coin by the standards of the issue and one that comes surprisingly close to Select status. Strong yellow-orange luster is key to the coin's eye appeal, overriding the slight striking softness in the centers and almost overcoming the luster scrapes to the left obverse and other scattered flaws. PCGS has graded just 18 numerically finer pieces (3/11). (#8975)

## AU 1876-CC Double Eagle Popular Centennial-Year Issue

6833 1876-CC AU50 PCGS. Glints of luster are especially noticeable near the rims of this lightly circulated Carson City type coin. The cheek and other highpoints show minor wear, but the eagle's wings display nearly complete design detail. The 1876-CC has less than one-tenth the mintage of its San Francisco counterpart. (#8977)

### 1876-CC Liberty Twenty, AU58 Full Prooflike Surfaces

6834 1876-CC AU58 PCGS. Both sides of this lovely near-Mint twenty have prooflike surfaces with fully mirrored fields and lustrous devices. A lovely yellow-gold specimen with bold design definition, the high points show only a trace of wear. Few Carson City twenties, especially at this grade level, show such a high degree of eye appeal. (#8977)

## Brilliant Near-Mint 1876-CC Twenty Close CC, Breen-7261

6835 1876-CC AU58 PCGS. Breen-7261. Close CC. This brilliant and lustrous Centennial Carson City issue is attractive for the grade, with radiant orange-gold surfaces swirling with cartwheel luster. Numerous bag marks cluster on each side, and a small planchet lamination occurs at the CA in AMERICA. There is little evidence of actual circulation wear. Walter Breen designates the variety as Close CC in the Complete Encyclopedia; for comparison, David Akers' 1982 volume on double eagles illustrates the Wide CC variant. (#8977)

Type Two 1876-S Double Eagle, MS62

6836 1876-S MS62 NGC. CAC. Prominent orange overtones are key to this frosty Type Two double eagle's eye appeal. Softly struck on the portrait details, as often seen, but the piece shows no trace of wear. Scattered luster grazes and a long, thin abrasion on Liberty's lower cheek contribute to the grade assigned. (#8978)

#### MS62 1876-S Double Eagle

6837 1876-S MS62 NGC. Warm honey-golden luster is laced with orange at the margins of this lovely later Type Two Liberty double eagle. The strike is decent, with only a few stars flat, and though each side shows a number of the usual abrasions and luster scrapes, the all-around visual appeal remains solid. An intriguing type selection. (#8978)

# 1876-S Liberty Twenty, MS62+ Strong Visual Appeal

6838 1876-S MS62+ PCGS. CAC. The pleasing orange-gold surfaces of this high-end MS62 specimen are highlighted by hints of rose color. The devices exhibit sharp details in most areas, with just a little softness evident on Liberty's hair, and both sides display vibrant mint luster. The 1876-S Liberty double eagle is a scarce date in higher grades, although circulated examples are easily located. Eye appeal is quite strong for the grade. (#8978)

## 1876-S Liberty Twenty, MS62+ Vivid Color, Vibrant Luster

6839 1876-S MS62+ NGC. The 1876-S Liberty twenty was produced in large numbers, and many examples have been repatriated from European holdings in recent years. Mintmark type collectors prize this issue accordingly. The present coin is a well struck example, with a little softness on the left obverse stars. The surfaces are a vivid greenish-gold color, with vibrant mint luster. Census: 6 in 62+, 81 finer (2/11). (#8978)

6840 1878 — Doubled Die Obverse and Doubled Die Reverse, Repunched Date — MS60 ANACS. Breen-7270. The ANACS holder inaccurately lists the variety as Breen-7210. The first 8 in the date is repunched within its upper loop. The obverse stars are only lightly die doubled, but the reverse legends exhibit obvious die doubling, especially on STATES. This green-gold double eagle is lustrous and less abraded than is usual for the grade.

### 1878 Liberty Double Eagle, MS62 Prooflike Obverse Fields

6841 1878 MS62 NGC. The 1878 Liberty double eagle is an available issue in lower Mint State grades, from a mintage of 543,645 pieces. The issue becomes scarce at the MS62 level, and examples in any higher grade are rare. The present coin displays razor-sharp definition on all design elements, with vivid greenish-gold surfaces. The obverse fields exhibit areas of prooflike reflectivity. Only 31 coins have been certified in higher numeric grades at NGC (2/11). (#8985)

## 1878-S Double Eagle Difficult to Locate in Mint State

6842 1878-S MS62 PCGS. Like so many other San Francisco gold coins, the 1878-S double eagle is an elusive condition rarity. While more than 1.7 million double eagles were coined during the year, typical survivors grade Extremely Fine or About Uncirculated. The present offering is thus a significant opportunity for the collector desiring a Mint State specimen. This well detailed specimen exhibits light orange-gold surfaces, with green highlights and frosty mint luster. (#8987)

# 1878-S Double Eagle, MS62 Better-Date, Early Type Three Issue

6843 1878-S MS62 PCGS. CAC. Many of the nearly 1.8 million 1878-S twenty dollar pieces were used in international trade, and nearly all survivors are heavily abraded (Garrett and Guth, 2006). This helps to account for the fact that PCGS has not certified any examples finer than MS63, of which there are only eight (and some of these are likely resubmissions). MS62 is therefore the finest grade most collectors can hope to obtain. The even orange-gold luster is softly frosted and is interrupted by a few small abrasions on each side. (#8987)

#### Scarce 1880-S Twenty Dollar, MS61

6844 1880-S MS61 PCGS. The 1880-S Liberty double eagle claims an ample mintage of 836,000 pieces, but the issue was heavily circulated at the time of issue. Even coins in lower Mint State grades are scarce in today's market. The present example is a sharply detailed, lustrous specimen, with bright greenish-gold color. (#8993)

#### Challenging Mint State 1880-S Twenty

6845 1880-S MS61 PCGS. The 1880-S Liberty double eagle is much more difficult to locate in high grade than its large mintage would indicate. The present coin is a well detailed MS61 example, with strong mint luster, and light orange-gold surfaces. A scattering of minor abrasions on both sides is consistent with the grade. (#8993)

6846 1881-S MS61 PCGS. Bright straw-gold fields shade into slightly deeper yellow-gold on the sharply struck portrait. Notably appealing despite the numerous light to moderate abrasions on each side.(#8995)

# 1881-S Liberty Twenty, MS62 Only 20 Finer PCGS Submissions

6847 1881-S MS62 PCGS. CAC. This frosty Mint State piece has subdued yellow luster that is slightly brighter on the reverse. A few splashes of dark patina attest to its originality. Both sides have moderate surface marks consistent with the grade. This issue is in great demand due to the rarity of P-Mint and CC-Mint coins of the same date. PCGS has only certified 20 finer examples (3/11). (#8995)

6848 1882-S MS61 PCGS. Despite myriad marks on each side, this frosty and fully lustrous piece has attractive intermingled green, yellow, and rose color with sharp design motifs.(#8998)

1882-S MS61 PCGS. Philadelphia double eagles of 1882 are extremely rare, and Carson City pieces are rare, leaving the S-Mint coins to represent the date in most collections. This piece has an attractive display of pink, green, and yellow over frosty surfaces. (#8998)

- 6850 1883-S MS62 PCGS. High-grade 1883-S Liberty double eagles are elusive, due to excessive bagmarks. This attractive MS62 example features well struck devices, with a little softness showing on Liberty's hair. The lustrous surfaces are moderately abraded for the grade. (#9000)
- 6851 1883-S MS62 PCGS. Tall S. Vibrant luster accompanies this boldly struck sun-gold double eagle. Field marks are scattered but moderate, and only a couple of small facial abrasions limit the grade.(#9000)
- 6852 1883-S MS62 PCGS. Tall S mintmark, apparently scarcer than the Small Squat S also seen on this issue. This sharply struck and mildly prooflike representative has pleasing eye appeal despite moderate contact on the cheekbone and on the field near the scrollwork. Ex: West Palm Beach Signature (Heritage, 6/2008), lot 2328. (#9000)
- 6853 1883-S MS62 PCGS. CAC. Tall S. This semi-prooflike Liberty twenty has a good strike and attractive eye appeal for this usually bagmarked grade. Marks are present but do not distract. (#9000)
- 6854 1884-S MS62 PCGS. Warm yellow-gold luster with significant orange overtones that are more prominent on the obverse. Softly struck through the centers but with no actual wear. (#9002)
- 6855 1884-S MS62 NGC. CAC. The design elements of this attractive MS62 double eagle are sharply detailed, and the yellow-gold surfaces display prooflike reflectivity. The fields exhibit the scattering of minor contact marks expected from a San Francisco twenty of this era.(#9002)
- 6856 1884-S MS62 PCGS. An impressive example with satiny luster and reflective fields. The surfaces have rich honey-gold color with hints of pink toning. Lightly abraded as usual for the grade. (#9002)
- 6857 1885-8 MS62 PCGS. Intense gold-orange color dominates the strongly lustrous margins, while the interiors are paler. Pleasingly detailed with just a few too many light abrasions to qualify for a finer grade.(#9005)

## 1887-S Double Eagle, MS62 Reddish-Orange Surfaces

6858 1887-S MS62 PCGS. Large numbers of 1887-S double eagles were shipped overseas for international trade, and nearly all examples returning to the States are heavily bagmarked, accounting for the issue's rarity above MS62. Of the 65 pieces finer than that grade seen by PCGS only five rate better than MS63. The reddish-orange mint frost is interrupted by a few small abrasions and only a coupe of medium-sized ones, both on the obverse. (#9007)

## 1888 Twenty Dollar, MS62 Conditionally Scarce

6859 1888 MS62 NGC. The 1888 double eagle, sporting a mintage exceeding 200,000 pieces, can be readily obtained in the Very Fine to Mint State 61 levels. Coins grading MS62 are available with a bit of searching but finer pieces are few and far between. NGC has graded a mere 12 examples finer than MS62 (3/11). The deep golden-rose luster on this piece has only a few small abrasions on each side. Well-balanced overall. (#9008)

#### 1888 Liberty Twenty, MS62

6860 1888 MS62 ANACS. From a mintage of 226,161 pieces, the 1888 Liberty double eagle is a scarce date in Mint State grades. The present coin displays sharp details on the peripheral design elements, but the central devices show just a touch of softness. The lustrous fields exhibit attractive rose-gold color, with minimal contact marks for the grade. (#9008)

6861 1888 Doubled Die Reverse FS-801 MS61 PCGS. Doubling is most prominent on the lower lettering, specifically the A in DOLLARS. Deep orange-gold surfaces are lustrous and moderately patinated with a grade-defining scrape on the right side of the reverse glory. Population: 16 in 61, 6 finer (3/11). (#145738)

6862 1888-S MS62 PCGS. This impressive piece has light surface marks that are expected for the grade, with fully brilliant yellow surfaces and satin luster. Hints of pink toning add to the eye appeal of this lovely double eagle.(#9009)

6863 1888-S MS62 PCGS. Dark patina is evident on the high points of this lustrous Mint State piece. Both sides are fully brilliant with intermingled green, rose, and yellow on each side. Highly attractive for the grade. (#9009)

6864 1888-S MS62 PCGS. A lovely peach-gold example with attractive luster and typical detail. A tiny copper spot is noted behind Liberty's head, and the surfaces have light to moderate abrasions.(#9009)

#### Appealing 1889-CC Double Eagle, Choice AU

6865 1889-CC AU55 NGC. CAC. This double eagle issue from Carson City's 1889 production, a total near 31,000 pieces, was the first of the denomination since the four-year hiatus beginning in 1885. Lovely orange-gold surfaces are well-struck, with much remaining luster and few abrasions. (#9011)

6866 1890 MS62 PCGS. A relatively low mintage of 75,940 coins means that examples are elusive, and that is especially true in higher grades, as PCGS has only certified 37 finer examples (3/11). This piece has brilliant luster with frosty yellow surfaces and hints of pink toning.(#9013)

## 1890-CC Double Eagle, MS61 Scarce in Mint State

6867 1890-CC MS61 PCGS. After a three-year intermission, the Carson City Mint began striking Morgan dollars and Liberty double eagles in 1889, and added other gold denominations in 1890. This piece housed in a green-label PCGS holder is exceptional for the grade, with rich green-gold luster and dark patina highlighting the obverse. (#9014)

6868 1890-S MS62 PCGS. Gold-orange overtones are prominent on moderately patinated surfaces which have a yellow base. Excellent detail on the portrait, though that element also has a number of wispy but grade-defining abrasions.(#9015)

6869 1890-S MS62 PCGS. Attentively struck with bright, flashy luster in pale yellow-gold. This S-mint double eagle has light yet grade-defining marks on the portrait, though the reverse has a cleaner appearance.(#9015)

# Low-Mintage 1891-CC Double Eagle 5,000 Pieces Coined

6870 1891-CC Genuine PCGS. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. The noted cleaning is subtle and fails to completely mute the prooflike tendencies of the surfaces, an expected product of the small mintage of 5,000 pieces. (#9017)

## Choice 1891-S Double Eagle Two Coins Finer at NGC

6871 1891-S MS64 NGC. A high-mintage date, the 1891-S Liberty double eagle was widely circulated in foreign trade, and many coins were roughly handled. As a result, the 1891-S is seldom encountered in high grade today. The present coin is a sharply detailed Choice specimen, with frosty cartwheel mint luster. The pleasing surfaces are a light orange-gold color, with highlights of green. Census: 55 in 64, 2 finer (3/11). (#9018)

# MS64 1891-S Twenty Dollar Sharply Struck, Two-Toned Example

6872 1891-S MS64 PCGS. CAC. This Type Three twenty is a textbook example of why some type collectors prefer these coins, with splendid orange-gold and green-gold vying for the most territory. The strike is sharp and only minor abrasions appear under a loupe, but the eye appeal is over the top. Much rarer even one grade point finer. Population: 80 in 64, 1 finer (3/11). (#9018)

## Low-Mintage 1892-CC Twenty, AU58 With Semiprooflike Surfaces

6873 1892-CC AU58 NGC. The next-to-last CC-mint twenty, the 1892-CC was made to the extent of only 27,265 coins, a sign not only of the political difficulties that the Carson City Mint endured during the era, but also proof that the lower levels of the Comstock Lode were playing out of both gold and silver. This piece boasts moderate abrasions consistent with the grade, over yellow-gold semiprooflike surfaces. (#9020)

#### Near-Mint 1892-CC Double Eagle

6874 1892-CC AU58 PCGS. CAC. Amply flashy luster remains in the yellow-orange fields of this Carson City double eagle. Most stars and the central devices are well-defined, and aside from minor rub and a few isolated copper spots (including one near the end of the coronet), this twenty presents few concerns. (#9020)

6875 1892-S MS62 NGC. Sharply struck with mild contrast between faintly frosted devices and bold cartwheel luster through yellow-gold fields. Strong eye appeal overall, though an abrasion is noted close to Liberty's eye.(#9021)

#### Near-Mint Prooflike 1893-CC Double Eagle

6876 1893-CC AU58 Prooflike NGC. Though lightly rubbed, this yellow-gold double eagle has its mirrors essentially intact. The strike is solid at right, a touch softer at left, with assorted minor to moderate marks whose appearances are exaggerated by the coin's essential reflectivity. A fundamentally appealing piece that induces greater appreciation with time. Census: 5 in 58 Prooflike, 3 finer (3/11). From The Michael A. Tongg Collection. (#79023)

6877 1894 MS63 PCGS. Minor marks on each side are consistent with the grade and include a couple scrapes on Liberty's cheek and jaw. A splendid example, this Select Mint State piece has intermingled yellow, green, and rose, with sharp design details. (#9025)

#### Two-Toned Near-Gem 1895 Double Eagle

- 6878 1895 MS64 NGC. The 1895 double eagle mintage was a plentiful one exceeding 1.1 million pieces, but anything finer than the present near-Gem must be considered a conditional rarity. This piece is sharply struck if not fully so, with orange-gold centers framed by rings of greenish-gold on each side. Marks are minimal, but the eye appeal is excellent. (#9027)
- 6879 1898 MS62 NGC. CAC. Rich orange-gold luster has a touch of frost to it. Well-defined but with numerous light abrasions and grazes which combine to account for the grade, though the overall eye appeal is decent. (#9033)
- 6880 1898-S MS64 NGC. CAC. The vivid orange-gold surfaces of this Choice double eagle are remarkably free of abrasions and contact marks. The design elements are sharply detailed and the fields exhibit vibrant mint luster.(#9034)
- 6881 1898-S MS64+ PCGS. CAC. Crisply detailed with bright luster and gold-orange outer color that shades to pale yellow at the interiors. A smooth near-Gem that shows just a few wispy abrasions. PCGS has graded 89 numerically finer examples (3/11). (#9034)

# Gem 1898-S Double Eagle Outstanding Eye Appeal

6882 1898-S MS65 PCGS. CAC. The 1898-S Liberty double eagle is an available date in most grades, from a mintage of 2.5 million pieces. Of course, high-quality Gems like the present coin are scarce, despite the high mintage, and anything finer is virtually unobtainable. This attractive piece displays razor-sharp definition on all design elements, with light greenish-gold surfaces and vibrant mint luster. Only two coins have been certified in higher numeric grades at PCGS (3/11). (#9034)

## Bold Gem 1898-S Twenty Dollar With Lustrous Orange-Gold Surfaces

- 6883 1898-S MS65 PCGS. This splendid Gem is boldly detailed with the outstanding luster that is almost expected of an 1898-S twenty, here as thick as on many a high-grade Morgan dollar. The brilliant surfaces are mellow orange-gold. Although the 1898-S is always available in baggy Uncirculated condition, carefully preserved Gems are quite elusive. PCGS has graded just two pieces finer (3/11). Ex: Dallas Signature (Heritage, 11/2006), lot 2659. (#9034)
- **6884 1899 MS64 NGC.** Rich yellow-orange luster dominates the eye appeal of this luminous near-Gem. Scattered wispy abrasions contribute to the grade, and copper spotting along the rims adds to the coin's aura of originality.(#9035)
- 6885 1899 MS62 Prooflike NGC. This pleasing 1899 Liberty double eagle exhibits sharp definition on all design elements, with deeply reflective yellow-gold surfaces. A scattering of minor contact marks on both sides accounts for the grade.(#79035)

# 1899-S Twenty, MS64 Highly Lustrous, Minimally Abraded

6886 1899-S MS64 PCGS. A stunning near-Gem with highly lustrous and frosty yellow-gold surfaces. More than 2 million 1899-S double eagles were coined, yet few have survived as fine as this piece. Higher grade examples are major rarities. In fact PCGS has only certified three finer pieces (3/11). (#9036)

High-End Near-Gem 1899-S Twenty

6887 1899-S MS64 NGC. The rich, swirling luster on this orange-gold Type Three S-mint immediately suggests a Gem grade, although a loupe, while revealing an excellent strike, also reveals just a few too many small abrasions for that level. Type Three Libertys in high grade are an underrated and undercollected area of U.S. numismatics. NGC has seen only 10 submissions finer (3/11). (#9036)

- 6888 1900 MS64 NGC. CAC. A turn-of-the-century example with rich, satiny yellow-orange luster. Excellent design definition with two minor copper-spots in out-of-the-way areas on the obverse. (#9037)
- 6889 1900-S MS63 PCGS. Saturated yellow-gold luster with amberorange peripheral elements yields to pale canary color at the centers. A well struck but lightly abraded Select S-mint twenty from the turn of the century.(#9038)
- 6890 1901 MS64 PCGS. Fully brought up in the centers with only slight softness on the peripheral stars. A few shallow abrasions on the cheek of Liberty account for the grade of this lustrous near-Gem.(#9039)

## Select 1901-S Twenty Strong Mint Luster

6891 1901-S MS63 PCGS. The 1901-S Liberty double eagle is more difficult to locate in high grade than its mintage of nearly 1.6 million pieces would suggest. In Choice condition, the 1901-S is actually considerably rarer than the 1901 Philadelphia issue, with a mintage one-tenth its size. Most collectors will find an attractive Select specimen makes a good balance of quality and availability. The present coin is sharply detailed, with lustrous greenish-gold surfaces. Housed in a green label holder. (#9040)

## 1902 Liberty Twenty, MS62 Elusive Low-Mintage Issue

- 6892 1902 MS62 PCGS. The 1902 Liberty double eagles are scarce in better Mint State grades, with few such survivors from a mintage of only 31,140 pieces. That production is even smaller than the conditionally rare 1905. This pleasing example has lustrous yellow surfaces with faint greenish overtones and a few tiny copper spots. PCGS has only certified 73 finer examples of this scarce issue (2/11). (#9041)
- **6893 1903 MS64 NGC. CAC.** Boldly struck with rich, satiny yellow-orange luster. Only a few tiny marks and grazes scattered in the fields preclude an even finer designation.(#9043)
- 6894 1903-S MS63 NGC. Booming luster brightens apricot-gold and apple-green surfaces. The strike is exemplary, and marks are minor for the grade, particularly on the splendidly smooth reverse. (#9044)
- 6895 1904 MS64 PCGS. Swirling cartwheel luster on surfaces that are rich yellow-gold with apricot highlights. Choice and crisply struck with a few small, scattered marks accounting for the grade. A solid type coin.(#9045)
- 6896 1904 MS64+ NGC. CAC. A solidly struck gold type coin that combines a pristine reverse with a faintly abraded obverse. The lustrous fields and devices possess light chestnut and olive toning. (#9045)

- 6897 1904 MS64+ PCGS. CAC. The single high mintage issue with a production that exceeded 6 million coins, the 1904 is the quintessential type coin to represent the Liberty double eagle series. This piece is close to Gem, with frosty yellow luster and bold design motifs. (#9045)
- 6898 1904 MS64+ PCGS. A lovely butter-gold and olive-green near-Gem of this often encountered Liberty issue. Precisely struck, and uncommonly smooth aside from small marks on the cheek and vertical shield lines.(#9045)
- 6899 1904 MS65 NGC. Ample yellow-orange luster is key to this Gem's eye appeal. Lightly patinated surfaces are pleasingly preserved, making this an excellent type piece.(#9045)

## Gem 1904 Twenty Dollar Rich Orange-Gold Toning

6900 1904 MS65 NGC. Boldly impressed with radiant luster and refreshingly mark-free surfaces. The 1904 may be a common date, but the present lot is significant as an exquisite Gem representative of a widely collected gold type.

Ex: Central States Signature (Heritage, 4/2006), lot 4476. (#9045)

6901 1904-S MS64 PCGS. Slightly soft on some of the upper obverse stars, but sharply defined elsewhere, the satiny surfaces exhibit a few trivial bagmarks on each side. Faint iridescent splashes appear on the frosty yellow surfaces. Housed in a green-label PCGS holder. (#9046)

# Uncirculated 1905 Twenty Dollar Scarce Low-Mintage Issue

6902 1905 MS61 PCGS. Despite the proximity of the issue to the high mintage 1904, the 1905 is considerably scarcer. Just 58,919 pieces were struck, since the vaults were presumably filled with the prior year's production. The present lustrous honey-gold representative has a suitable strike and is only lightly abraded for its designated grade. (#9047)

- 6903 1906-S MS63 PCGS. Potent luster brightens this well struck orange-gold double eagle. Marks are inconsequential aside from a minor field scuff near the nose. Housed in an old green label holder. (#9051)
- 6904 1907 MS64 PCGS. A well detailed example from the last year of the Liberty Head design, the surfaces are enhanced by vivid orange-gold color and vibrant frosty mint luster. Only 13 coins have been certified in higher numeric grades by PCGS (3/11). (#9052)
- 6905 1907 MS64 NGC. CAC. Impressive yellow-gold luster flashes across each side of this Select example. Strongly detailed with a handful of light abrasions in a line on Liberty's cheek.

6906 1907-D MS62 NGC. A peach-gold example of the second and final Denver Mint Liberty issue. The reverse is beautifully free from marks, while the obverse is also generally smooth with abrasions noted near star 3 and the jaw.(#9053)

6907 1907-D MS64+ PCGS. Gold-orange luster swirls on each side of this near-Gem, with the obverse a trifle more satiny. Solidly struck with the grade defined largely by a pair of luster grazes on the portrait.(#9053)

# Last-Year D-Mint Liberty Twenty 1907-D, Gem Mint State

6908 1907-D MS65 NGC. The last (and second, since the mint only opened in 1906) D-mint Liberty Head twenty, the 1907-D, is always a popular coin due to its last-year status as well as its excellent production values, with a bold strike and good eye appeal. This Gem is no exception, with thoroughgoing luster over peachgold surfaces, a full strike, and minimal abrasions. NGC has seen only 15 submissions finer (3/11). (#9053)

# 1907-S Liberty Twenty, MS64 Last of the Liberty Head Double Eagles

6909 1907-S MS64 PCGS. CAC. The 1907-S is the last S-mint Liberty Head double eagle, and this piece is a splendid near-Gem worthy of representing the last of its kind. Most Mint State examples seen are heavily bagmarked, but not so this piece. There are few mentionable abrasions on either side, and the orange-gold color and boldly impressed details put this coin in a small minority. PCGS has certified only two Gems (2/11). (#9054)

#### PROOF LIBERTY DOUBLE EAGLES

#### 1901 Liberty Double Eagle, PR60 Details

6910 1901 — Impaired Proof, Polished — ANACS. PR60 Details. A total of 96 proofs were struck, but in his 1988 Encyclopedia, Breen wrote "possibly 36 to 40 proofs survive, many impaired." Given their high face value, a number of proofs were undoubtedly spent and eventually turned in to the government after the 1933 gold recall. This well struck specimen is bright and faintly hairlined but is still an attractive representative of this rare issue. Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 3429.

# Deeply Reflective 1901 Proof Twenty, PR60 Details

6911 1901 — Rim Filed, Scratched, Cleaned — ANACS. PR60 Details. In spite of the qualifiers, this proof twenty retains a considerable amount of eye appeal. The rims are lightly filed near 7 o'clock on the obverse and opposite near 11 o'clock on the reverse. The fields are glossy from a wipe, but despite the Scratched designation, no abrasions are singularly distracting. One of just 96 proof double eagles struck for the year.

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 3430.

# 1907 Twenty Dollar Liberty, PR55 Final Year of the Type

6912 1907 PR55 NGC. The 1907 proof twenty dollar Liberty is a little-understood issue. Breen (1977) only says: "Date almost centered; slants up; 'broken nose' as in 1906." This piece certainly meets those minimal qualifiers, but additionally it displays deeply reflective fields around the devices on each side. The fields and high-point devices are dense with small to medium-sized contact marks that impede much of the original mirroring in the fields. The mark that is most obvious is placed horizontally across the hair of Liberty just above the face. The devices retain the strength of detailing one would expect from a proof striking. Only 78 proof twenty Libs were struck in this final year of the design. (#9123)

#### HIGH RELIEF DOUBLE EAGLES

# 1907 High Relief Twenty, AU Details Wire Rim Variant

6913 1907 High Relief, Wire Rim — Improperly Cleaned — NGC Details. AU. Here is an opportunity for the budget-minded collector to acquire an attractive example of the famous and popular High Relief double eagle, the closest most collectors can come to the sculptor's original design. This piece has light hairlines and exhibits bright green-gold color with nearly full luster and only slight rub on the highest design points. A pleasing piece at a price that should prove affordable.

#### Wire Rim High Relief Double Eagle AU Sharpness

6914 1907 High Relief, Wire Rim — Mount Removed, Improperly Cleaned — NGC Details. AU. A small mount has been removed at 9 o'clock on the reverse, and both sides have been whizzed to provide an even microgranular texture. Nicely struck and satiny with good eye appeal when viewed with the unaided eye. An affordable yet well detailed example of this prized low mintage gold type.

# High Relief MCMVII Double Eagle Uncirculated Details, Great Eye Appeal

6915 1907 High Relief, Wire Rim — Obverse Rim Filed — NGC Details. Unc. Early owners of high relief double eagles were often confounded by the wire rims seen on a majority of examples, and dealers of the era would sometimes carefully file the rims to remove the "problematic" wire edge. Such practice was considered acceptable at the time, and the result is a beautiful butter-gold example with satin luster, smooth surfaces, a bold strike, and light filing on the left half of the obverse rim.

# 1907 High Relief Twenty, Unc Details American Coinage Classic

6916 1907 High Relief, Wire Rim — Cleaned — ANACS. Unc Details. Unnaturally luminous from a light cleaning, this sharply struck example nonetheless demonstrates the spectacular high relief design as originally intended by Augustus Saint-Gaudens. The lightly hairlined surfaces display apricot-gold color and are virtually devoid of significant abrasions. The wire rim is apparent on portions of each side. Despite the cleaning impairment, this is an attractive example of this American coinage classic that deserves strong consideration from the more modest gold collector.

# SAINT-GAUDENS DOUBLE EAGLES

6917 1907 Arabic Numerals —Lamination— MS63 ANACS. An interesting Select example with sharply detailed devices and attractive greenish-gold surfaces, this piece displays a large planchet lamination on the lower eagle's wing.

#### Frosty Gem 1907 Arabic Numerals Twenty

6918 1907 Arabic Numerals MS65 PCGS. This gorgeous example of Arabic Numerals is certified in a green-label holder, with frosty yellow-gold luster, exquisite pinkish coloration with hazel rim accents, and excellent eye appeal. The strike is sharp, with a full Capitol building and sandal on Liberty's foot. Outstanding quality for the specialist or type collector.

Ex: Long Beach Signature (Heritage, 5/2001), lot 9338; Long Beach Signature (Heritage, 2/2005), lot 9451. (#9141)

#### Gem 1907 Saint-Gaudens Twenty Arabic Numerals

6919 1907 Arabic Numerals MS65 PCGS Secure. This introductoryyear Saint-Gaudens twenty has a nearly immaculate reverse, and the obverse is also smooth save for wispy grazes on the right field. The Capitol building shows a complete strike, and the lustrous butter-gold and apricot surfaces exude eye appeal. One small spot seen on the obverse periphery at 5 o'clock. (#9141)

# Two-Toned Premium Gem 1907 Arabic Numerals Twenty

6920 1907 Arabic Numerals MS66 PCGS. This wonderful Premium Gem type coin boasts gorgeous two-toned surfaces where the dominant apricot-gold competes with scattered glimpses of greenish-gold. Abrasions are absolutely minimal, and the swirling luster and bold strike are equally impeccable. PCGS has seen only 11 submissions finer (3/11). (#9141)

# 1907 Arabic Numerals Double Eagle, MS66 A Pleasing High-Grade Type Coin

- 6921 1907 Arabic Numerals MS66 PCGS. Always popular with first-year type collectors, the 1907 Saint-Gaudens double eagle claims a mintage of 361,667 pieces. It is not until Premium Gem and above that the 1907 emerges as a condition rarity. PCGS and NGC combined have graded fewer than 20 coins above this level (3/11). This sharply detailed Premium Gem features lustrous orange and rose-gold surfaces. (#9141)
- 6922 1908 No Motto MS65 PCGs. Short Rays obverse. Splashes of lemon toning invigorate this lustrous and boldly struck Gem. The reverse is well preserved, and the obverse displays only moderate contact on the chest and near the right (facing) arm. (#9142)
- 6923 1908 No Motto MS66 PCGS. This issue is always popular as the second year of the two-year No Motto design. This attractive Premium Gem displays sharply detailed design elements and lustrous orange-gold surfaces, with green highlights.(#9142)
- 6924 1908-D No Motto MS64+ PCGS. CAC. The more challenging of the two No Motto 1908 double eagle issues, seen here almost as a Gem. Sun-gold surfaces are a touch too rough for the designation, and the top of the torch is a trifle flat, but the overall eye appeal is solid.(#9143)
- 6925 1908-D No Motto MS64+ PCGS. CAC. The more challenging Denver edition of the 1908 No Motto twenty, seen here oh-so-close to the Gem level. A small abrasion on Liberty's upper gown is the prime culprit, but the lightly patinated yellow-orange surfaces are attractive overall with just a few marks elsewhere. (#9143)
- 6926 1908 Motto MS62 PCGS. Honey-gold and lime-green alternate across lustrous and expectedly abraded surfaces. The 1908 Motto is considerably scarcer than its No Motto predecessor. Encapsulated in a green label holder. (#9147)
- 6927 1908 Motto MS63 NGC. CAC. Luminous orange-gold surfaces are smooth for the MS63 designation on this first-year With Motto Saint-Gaudens twenty. Better-defined than usually seen on Liberty's face and torch hand.(#9147)

6928 1908 Motto MS63 NGC. Noticeable marks on each side are consistent with the grade but none are of any consequence. This is a pleasing representative of the first year for the modified With Motto design. (#9147)

#### 1908 Motto Double Eagle, MS64

6929 1908 Motto MS64 PCGS. Due to political pressure from the White House, the motto IN GOD WE TRUST was added on the reverse of the Saint-Gaudens double eagles in 1908, that year seeing production of both types. This lovely Choice Mint State piece has frosty yellow luster with a few small splashes of darker patina. PCGS has only certified 63 finer pieces (3/11). (#9147)

#### 1908 Motto Twenty Dollar, MS64 A Popular Type Coin

6930 1908 Motto MS64 PCGS. The year 1908 saw the return of the motto IN GOD WE TRUST to the Saint-Gaudens double eagle design, making this issue extremely popular with first-year type collectors. The issue is not too difficult to locate in lower Mint State grades, but it is very scarce at the Gem level. This well detailed Choice example displays rich orange-gold surfaces, with only minor contact marks, and bright mint luster. (#9147)

#### With Motto 1908 Double Eagle, MS64

- 6931 1908 Motto MS64 PCGS. While the 1908 No Motto double eagle is famously high-mintage, its With Motto successor has a mintage in the low six figures. While near-Gems such as the present piece are available for a price, finer coins are borderline condition rarities. This MS64 example has sweeping yellow-orange luster with a few shallow, scattered abrasions which contribute to the grade. (#9147)
- 6932 1908-D Motto MS64 PCGS. The Denver Mint halted production of the With Motto twenties after only 349,500 pieces were minted. Today examples are easily obtained in nearly any desired grade, including Choice Mint State like this frosty and brilliant example. Both sides have wisps of pink over light yellow surfaces with a few small marks.(#9148)

#### Unabraded Gem 1908-D Motto Twenty

6933 1908-D Motto MS65 PCGS. Both Saint-Gaudens and President Roosevelt wanted the motto IN GOD WE TRUST omitted on the double eagle design for different reasons, the former aesthetic, the latter because he felt it sacrilegious. Both lost the battle. This Gem Motto 1908-D is a grand example, with mellow orange-gold color alternating with green-gold. Abrasions are insignificant, save for a small knock directly on the mintmark, and the bold strike caps off a marvelous package.

Ex: Long Beach Signature (Heritage, 7/2007), lot 4016. (#9148)

# Orange-Gold With Motto 1908-D Twenty Dollar, Gem Mint State

6934 1908-D Motto MS65 PCGS. Deep, mellow orange-gold surfaces are somewhat mattelike on this D-mint With Motto double eagle, a plentiful issue even at the Gem level but much more elusive in MS66. Type collectors gravitate to this issue for its usually excellent production values, on full display here: a sharp strike, minimal marks, and excellent preservation and eye appeal. PCGS has seen 28 submissions finer (3/11). (#9148)

#### 1908-D Motto Double Eagle, MS65 Rarely Seen Finer

6935 1908-D Motto MS65 PCGS. Frosty yellow-gold surfaces exhibit fully brilliant mint luster with excellent design definition. A few minor blemishes on each side are consistent with the grade. PCGS has only certified 28 finer examples of this grade-elusive issue (3/11). An important opportunity for the specialist. (#9148)

# 1908-S Double Eagle, AU55 Low-Mintage Issue

6936 1908-S AU55 NGC. Just a trace of wear is evident on the high points of this attractive double eagle rarity. Minor surface marks are present on each side but they are of little concern. Both sides have nearly full light yellow luster with excellent design definition. A pleasing example from a low mintage of only 22,000 coins. (#9149)

#### Low-Mintage 1908-S Twenty, AU58

6937 1908-S AU58 PCGS. The 1908-S twenties are the lowest-mintage issues of the With Motto double eagles, produced to the extent of 22,000 pieces. This near-Mint State specimen appears to have full luster and displays little sign of obvious wear, although it may have been downgraded due to the extensive fine bagmarks that dot the yellow-orange surfaces. (#9149)

6938 1909 MS61 NGC. A lustrous lemon-tinged example of this scarcer issue, whose low mintage is shared with the separately collected overdate. Only minor marks are present, and steel-gray toning is limited to the high points.(#9150)

# High-End MS63 1909 Double Eagle

6939 1909 MS63 PCGS. The moderate mintage of 1909 double eagles was 161,282 coins, and today most certified examples grade around MS61. This yellow-orange example boasts swirling luster suggestive of an even finer grade, and even a loupe reveals only a few scattered luster breaks. A nice piece for the grade level. (#9150)

#### Apricot-Gold 1909 Double Eagle, MS64 Perfect Date

- 6940 1909 MS64 PCGS. Bowers comments interestingly in his double eagle *Guide Book*, "The 1909 double eagle, 'perfect date' (not overdate), is readily available, but hardly common, in lower Mint State levels through 62. Higher grades are seldom seen, and even a nice MS-63 would be a show-stopper!" The present piece surpasses even that grade, as it is only lightly abraded and exhibits pleasing apricot-gold luster. PCGS has graded only 25 finer (3/11). Ex: Central States Signature (Heritage, 4/2006), lot 4573, which realized \$8,050; Dallas Signature (Heritage, 11/2006), lot 2775, which brought \$7,475; Long Beach Signature (Heritage, 9/2009), lot 1910, which realized \$7,187.50. (#9150)
- 6941 1909/8 MS61 NGC. FS-301. A satiny sun-gold representative of this obvious overdate, the earliest produced from two different-dated hubs. The strike is good, and abrasions are tiny save for contact on the sun and a concealed contact mark above the torch hand.(#9151)
- 6942 1909/8 MS61 NGC. FS-301. A lustrous butter-gold example of this prominent hubbed overdate. Minimally abraded for the MS61 level, although we note one tiny spot on the left obverse field. Certified in a former generation holder.(#9151)

# 1909/8 Double Eagle, MS62 Only 20th Century U.S. Gold Overdate

6943 1909/8 MS62 PCGS. CAC. For many years the 1909/8 twenty dollar remained scarce, but large numbers were found in European hoards returning to America. These were mainly in the lower Mint State grades of MS60 to MS63. The issue becomes scarce in near-Gem and rare any finer. The present coin is an attractive MS62 example, with well detailed devices and softly frosted mint luster. The pleasing greenish-gold surfaces exhibit a scattering of minor contact marks. (#9151)

# 1909/8 Double Eagle MS62 Only Overdate in the Series

- 6944 1909/8 MS62 NGC. FS-301. This satiny lime-green and strawgold overdated twenty has smooth fields and minor bluntness of impression on Liberty's chest and raised knee. Marks are hard to locate, but we note a concealed abrasion near the crest of the front wing. Encapsulated in a prior generation holder. (#9151)
- 6945 1909-D MS60 NGC. A satiny honey-gold representative of a scarce issue. A scant 52,500 pieces were issued, and many survivors are sliders with slight wear on the devices. Certified in a former generation holder.(#9152)

#### Select 1909-D Saint-Gaudens Twenty Low-Mintage Collector Favorite

- 6946 1909-D MS63 PCGS. CAC. A tiny mintage of 52,500 pieces makes the 1909-D stand out among the *Guide Book* listings of the series. This lustrous representative has a beautifully smooth reverse, and the obverse shows only scattered minor contact. The strike is exemplary, as is the eye appeal for the grade. Housed in an old green label holder. (#9152)
- 6947 1909-S MS64 PCGS. CAC. Bright, swirling wheat-gold luster with apricot and orange highlights. A tiny copper spot is noted on the eagle's back wing. This well struck near-Gem is housed in a first-generation holder. (#9153)
- 6948 1909-S MS64+ PCGS. CAC. The Philadelphia and Denver twenties of 1909 are both elusive, while the 1909-S is a rather common issue. Examples are available in all grades through MS66, and this near-Gem is a pleasing representative. Both sides are satiny and brilliant with light yellow luster and bold design motifs. (#9153)

#### Orange-Gold Gem 1909-S Double Eagle With Tilted Mintmark

6949 1909-S MS65 PCGS. Although the 1909-S double eagle is an available issue even at the Gem level for a price, seldom indeed are finer examples offered at auction, and they are hotly contested when they do appear. This Gem displays complete luster over mellow orange-gold surfaces, with a bold strike and minimal abrasions. The mintmark is somewhat tilted to the left in relation to the date, a feature that we do not recall seeing previously. PCGS has seen eight submissions finer (3/11). (#9153)

# Gem 1910-D Double Eagle Nice Surfaces

6950 1910-D MS65 PCGS. From a nominal mintage of 429,000 pieces, the 1910-D Saint-Gaudens double eagle is not difficult to locate in high grade, making the date a popular choice with type collectors. The present coin is an attractive Gem, with sharp definition on all design elements, light orange-gold surfaces and vibrant mint luster. The fields are remarkably free of contact marks. (#9155)

#### Premium Gem 1910-D Double Eagle Two Finer at PCGS

6951 1910-D MS66 PCGS. From a mintage of 429,000 pieces, the 1910-D Saint-Gaudens double eagle is available in lower Mint State grades, but examples in Premium Gem condition are quite scarce, and only two coins have been certified in higher numeric grades at PCGS (3/11). The present coin features a razor-sharp strike, with excellent mint luster and pleasing greenish-gold surfaces. Ex: Houston Signature (12/2010), lot 4747. (#9155)

# 1910-D Double Eagle, MS66 Only One Finer NGC Coin

- 6952 1910-D MS66 NGC. Frosty orange-gold luster is evident on both sides of this sharply struck condition rarity. Both sides have excellent eye appeal that results from a variety of factors that include pristine surfaces. The advanced double eagle collector will want to take full advantage of this opportunity. Census: 41 in 66, 1 finer (3/11). (#9155)
- 6953 1910-S MS64 PCGS. The frosty and lustrous surfaces exhibit a brilliant blend of light and dark yellow over sharp design motifs. This lovely near-Gem will appeal to the Saint-Gaudens Registry collector as a date that is normally found in lower Mint State grades. (#9156)
- 6954 1911 MS62 PCGS. This lower mintage Philadelphia twenty offers coruscating luster across attractive, sharply struck surfaces. Two minute rim nicks are noted on the reverse near 11 o'clock. Certified in a green label holder.(#9157)
- 6955 1911 MS63 PCGS. A pleasing green-gold example of the scarce Philadelphia Mint 1911 twenty. Less than 200,000 were struck and many entered circulation at the time. Luster is good for the date, but below average for the series. (#9157)

# 1911 Double Eagle, MS64+ Five Pieces Designated as Such by PCGS

- 6956 1911 MS64+ PCGS. CAC. The 1911 double eagle can be located with minimal difficulty through the near-Gem level of preservation. Gems are scarce and finer examples are quite rare. PCGS has given the the Plus designation to five MS64 coins and one MS65 example. This piece is an extraordinarily good value with its smooth, satiny surfaces and lack of abrasions. (#9157)
- 6957 1911-D MS64+ PCGS. CAC. A pleasing double eagle that has booming luster and an unblemished khaki-gold appearance. Well struck overall, despite slight merging of detail on the high points. (#9158)
- 6958 1911-D MS65 NGC. This wonderful Gem exhibits frosty lemonyellow luster with exceptional surfaces. Hints of light orange add to its eye appeal. Although common, the 1911-D has a far lower population than the P-Mint issues of the next decade. (#9158)
- 6959 1911-D MS65 PCGS. Warm orange overtones enrich sun-yellow surfaces on this lightly textured and well struck Gem. Smooth with additional suggestions of silver-lavender at the correct angle to the light. (#9158)

- 6960 1911-D MS65 PCGS. An amazing Gem with excellent eye appeal, this yellow-gold representative has frosty luster and bold design elements. A few trivial marks prevent a higher grade. (#9158)
- 6961 1911-D MS65 PCGS. CAC. Both sides of this subdued Gem have a decided green-gold appearance with delicate rose toning highlights. The strike is bold and marks are minimal on this original appearing double eagle.(#9158)
- 6962 1911-D MS65 PCGS. A frosty and attractive Gem, this lustrous double eagle has green and rose-gold surfaces. It has the appearance of a higher grade, save for small rim marks at the upper reverse. (#9158)
- 6963 1911-D MS66 NGC. Although 1911-D Saints are plentiful in Premium Gem, they are seldom seen in higher grades as NGC and PCGS have combined to grade just 39 submissions in MS67, a figure that undoubtedly includes some duplication (3/11). This frosty example has deep yellow luster with full mint brilliance and sharp design motifs.(#9158)
- 6964 1911-D MS66 PCGS. Subdued but attractive luster is frosty on the yellow-orange obverse, while the reverse is brighter. A decently detailed Premium Gem with impressively preserved surfaces. PCGS has graded just seven numerically finer examples (3/11). (#9158)

#### MS66+ 1911-D Double Eagle

6965 1911-D MS66+ NGC. CAC. While the 1911-D is among the more accessible mintmarked issues in the Saint-Gaudens double eagle series, even it becomes elusive at the Premium Gem level, and Superb Gems are condition rarities. This MS66+ coin has bold apricot-gold luster with faintly textured surfaces and strong central definition. (#9158)

#### Gem 1911-D/D Twenty Dollar

6966 1911-D/D MS65 NGC. FS-501. The mintmark is repunched east. This apricot-gold representative provides coruscating luster and is precisely struck. The obverse is remarkably smooth, and the reverse exhibits only small, inconspicuous marks. A high grade example of this increasingly popular RPM variety. (#145010)

#### 1911-D/D Double Eagle, MS65

6967 1911-D/D MS65 NGC. FS-501. The bold doubled mintmark is clearly visible under magnification. The original punch can be seen outside the right edge of the final D. This pleasing piece has rosegold surfaces with full mint brilliance and outstanding eye appeal. NGC has only certified 30 finer (3/11). (#145010)

#### 1911-D/D Twenty Dollar, MS65 Uncommonly Well Struck

6968 1911-D/D MS65 NGC. FS-501. This apricot-gold Gem offers vibrant luster and minimally abraded surfaces. The strike is intricate, especially on Liberty's face and torch fingers. The grade appears limited solely by faint marks on the sun and a brief hairthin line near the crest of the front wing. (#145010)

# 1911-D/D Double Eagle, MS65+ FS-501 Repunched Mintmark

6969 1911-D/D MS65+ NGC. FS-501. The 2011 Central States sale will provide bidders with ample opportunity to acquire an example of this repunched mintmark variety. This Gem has wonderful surfaces with brilliant orange-gold luster and excellent design definition. Census: 4 in 65+, 30 finer (3/11). (#145010)

#### 1911-D/D Double Eagle, MS65+

6970 1911-D/D MS65+ NGC. FS-501. The boldly repunched mintmark is visible with light magnification on this Gem. Both sides have deep yellow luster with frosty surfaces and delicate pink toning that adds to the eye appeal. Only a few important varieties are known in the Saint-Gaudens series, and all are popular with specialists. Census: 4 in 65+, 30 finer (3/11). (#145010)

# 1911-D/D Saint-Gaudens Twenty, MS66 Popular Repunched Mintmark, FS-501

- 6971 1911-D/D MS66 NGC. CAC. FS-501. The repunched mintmark 1911-D/D twenty dollar is becoming an increasingly popular variety due to the surging appeal of gold, as well as the boom in Registry Set collecting, with varieties increasingly to the fore. The orange-gold surfaces beam with luster, are boldly struck, and free of distracting abrasions, as the grade demands. Acquire a 1909-S/S (also FS-501) to go along with this piece, and you will have a repunched mintmark Cherrypickers' twenty dollar variety set. Watch the popularity of these coins zoom if they are ever listed in the Guide Book. Census: 28 in 66, 2 finer (3/11). (#145010)
- 6972 1911-S MS63 NGC. This lustrous honey-gold twenty dollar piece has an exceptional strike on the Capitol building and Liberty's face. Smooth for the grade despite a few small marks on the sun. (#9159)
- 6973 1911-S MS64+ PCGS. CAC. Softly frosted with light patina and understated but elegant luster. The pale yellow-gold reverse is a touch more lively on this S-mint twenty, which comes close to Gem quality.(#9159)
- 6974 1911-S MS64+ PCGS. CAC. Light yellow surfaces are evident on both sides of this splendid near-Gem double eagle. Only trivial marks appear on each side. (#9159)

#### Gem 1911-S Saint-Gaudens Twenty

- 6975 1911-S MS65 NGC. CAC. The 1911-S Saint-Gaudens double eagle is a scarce issue at the MS65 level, and examples in any higher grade are rare. The present coin is a sharply detailed Gem, with light orange-gold surfaces and frosty mint luster. Only 34 coins have been certified in higher numeric grades at NGC (3/11). (#9159)
- 6976 1912 MS63+ PCGS. CAC. Sea-green and apricot luster coruscates throughout this nicely struck and lightly marked representative. A better Philadelphia issue from a relatively low mintage of 149,750 pieces. (#9160)
- 6977 1913 MS62 PCGS. A lustrous and sharply struck khaki-gold double eagle that exhibits fewer marks than is usually associated with the MS62 level. Encased in an old green label holder. (#9161)

#### Lavish Near-Gem 1913 Saint-Gaudens Twenty

6978 1913 MS64 PCGS. The 1913 twenty overall is neither rare nor common, but Gem examples are few and far between. Struck in the final year of the presidency of William Howard Taft as the "world teetered on the brink of war" — say Garrett and Guth — most of them stayed close to home and circulated little, if at all. This near-Gem boasts lavish luster over rich reddish-orange surfaces, a visual treat. (#9161)

#### Sharp Gem 1913-D Double Eagle

6979 1913-D MS65 PCGS. Most of the well-produced Gem survivors of the 1913-D twenties, such as this piece, are the product of repatriated coins found in European hoards. This Gem exhibits radiant luster over reddish-orange surfaces that are minimally abraded and show an excellent strike. A mark on Liberty's mouth and a couple on her knee are noted. (#9162)

#### Richly Colored Gem 1913-D Twenty

6980 1913-D MS65 PCGS. The 1913-D Saint-Gaudens twenty is popular as a mintmarked issue from early in the series that is usually manufactured to high standards, especially when encountered at the MS65 grade level of the present specimen. This example sports exuberant luster over richly colored peach-gold surfaces. Minor contact marks appear under a loupe, without at all diminishing the eye appeal. (#9162)

#### Pleasing 1913-S Double Eagle, MS62

6981 1913-S MS62 NGC. The 1913-S, like the 1908-S, was a low-mintage affair, 34,000 examples of the former produced compared to 22,000 of the latter. This 1913-S shows minor but extensive abrasions on both sides, likely the result of careless bag handling at some time. The surfaces are nonetheless considerably more pleasing than the numeric grade suggests, with even orange-gold color and radiant luster. (#9163)

#### Choice 1913-S Saint-Gaudens Twenty

6982 1913-S MS64 PCGS. CAC. The 1913-S Saint-Gaudens double eagle is a better date, from a low mintage of 34,000 pieces. This well struck Choice specimen exhibits rich greenish-gold surfaces, with ample mint luster on both sides. Housed in a green label holder. Only 22 coins have been certified in higher numeric grades at PCGS (3/11). (#9163)

# 1913-S Double Eagle, MS64 A Pleasing, Low-Mintage Type Coin

- 6983 1913-S MS64 PCGS. Despite its low mintage (34,000 pieces), the 1913-S double eagle is generally available in most grades below MS65. For some reason, large numbers were saved, probably reposing in European or South American bank vaults before returning to America. The certified population drops significantly from near-Gem to Gem. The mint frost has rich reddish-gold and lilac patina on each side. Minimally abraded. (#9163)
- 6984 1914 MS62 NGC. The lowest mintage Philadelphia issue of the Arabic Numerals type. This olive-gold example has shimmering luster and refreshingly few marks. The high points of the devices display only trivial blending of detail.(#9164)
- 6985 1914 MS62+ PCGS. Wheat-gold and sun-yellow base colors with a distinct peach overtone. A trifle softly struck on the torch and holding hand with a handful of nicks and scrapes which are grade-defining.(#9164)

#### Select Mint State 1914 Double Eagle

6986 1914 MS63 PCGS. CAC. Though it is not the lowest-mintage date in the Saint-Gaudens double eagle series, the 1914 issue's five-figure production has long attracted attention. This Select example is moderately patinated with rich peach-gold color and a few grade-defining abrasions such as the one under Liberty's branch arm. (#9164)

# 1914 Double Eagle, MS63+ Popular, Low-Mintage Issue

6987 1914 MS63+ PCGS. CAC. Always popular with collectors, the 1914 Saint-Gaudens double eagle boasts a low mintage of 95,250 pieces. The present coin is a high-end Select example, sharply detailed, with rich orange-gold surfaces and bright mint luster. The fields show a moderate number of abrasions for the grade. (#9164)

# Low-Mintage 1914 Twenty Dollar, MS64 Mintage 95,250 Pieces

6989 1914-D MS63 NGC. Booming luster sweeps this sharply struck and attractive Saint-Gaudens twenty. Noticeable contact is limited to a short straight mark at the reverse center. Housed in a prior generation holder.(#9165)

6990 1914-D MS64 NGC. This sharply detailed Choice specimen exhibits light orange-gold surfaces, with green highlights and vibrant mint luster. The 1914-D Saint-Gaudens double eagle claims a moderate mintage of 453,000 pieces.(#9165)

#### Conditionally Scarce 1914-D Double Eagle, MS66

6991 1914-D MS66 PCGS. Many examples are known of the 1914-D double eagle right through the MS65 grade level. The population decreases in Premium Gem, making the issue scarce in that grade. Examples grading finer are almost nonexistent as PCGS and NGC combined have seen merely three specimens. Even, rich reddishgold color covers both obverse and reverse of this sharply struck, high-grade example. Population: 58 in 66, 1 finer (3/11). (#9165)

# 1914-D Saint-Gaudens Twenty, MS66 Only One Coin Finer at PCGS

6992 1914-D MS66 PCGS. The 1914-D Saint-Gaudens double eagle is readily obtainable in lower Mint State grades, but the issue is very scarce, bordering on rare, at the Premium Gem level. This delightful Premium Gem is sharply detailed, with light orange-gold surfaces and vibrant mint luster. Population: 58 in 66, 1 finer (3/11). (#9165)

6993 1914-S MS65 PCGS. CAC. Housed in a green-label PCGS holder, this lovely Gem has frosty luster with faint blue and bright orange toning over its deep yellow surfaces.(#9166)

6994 1914-S MS65 PCGS. This green-gold Gem exhibits magnificent eye appeal, due to its unabraded appearance and potent cartwheel sheen. The major devices are fully struck, though the right side stars are lightly brought up.(#9166)

6995 1915 MS62 NGC. Blended olive-green and almond-gold toning enriches this scarcer date twenty. Lustrous, and lightly abraded save for an unobtrusive pair of thin lines on the eagle. (#9167)

#### 1915 Double Eagle, MS64

6996 1915 MS64 PCGS. This Choice 1915 double eagle displays especially vivid orange-gold surfaces, with vibrant mint luster. The devices are strongly impressed and the fields exhibit few signs of contact. Visual appeal is quite strong. The 1915 is a low-mintage issue, seldom encountered above the Choice level. (#9167)

#### Choice 1915 Saint-Gaudens Double Eagle

6997 1915 MS64 PCGS. The 1915 Saint-Gaudens double eagle claims a low mintage of 152,000 pieces, and Choice examples are scarce in today's market. This sharply detailed Choice specimen is brightly lustrous, with attractive greenish-gold surfaces. Only 36 coins have been certified in higher numeric grades at PCGS (3/11). (#9167)

# 1915-S Double Eagle, MS65+ ★ Wonderful Color and Luster

6998 1915-S MS65+ ★ NGC. CAC. The 1915-S is an interesting issue in that several hoards are known. Walter Breen, in his 1988 Encyclopedia cites two of these: more than 50 Uncirculated pieces that turned up in 1980, and a bag of 1,000 examples recovered in Central America in 1983. Numerous Gem coins have been certified by the two major services, but only about 25 have been given the Plus designation. This sharply struck, upper-end Gem has lustrous, reddish-tinted surfaces with a light interplay of lilac on each side. (#9168)

# 1915-S Twenty Dollar, MS65+ A Lustrous, Excellent Type Coin

6999 1915-S MS65+ NGC. The 1915-S double eagle is one of the more common dates of the Saint-Gaudens twenty dollar series. It is a very popular issue among type collectors because of its ready availability in high grades, including that of Premium Gem. The fine-grain texture of the surfaces are overlaid with bright, satiny mint luster. (#9168)

#### Premium Gem 1915-S Saint-Gaudens Twenty

7000 1915-S MS66 PCGS. The 1915-S twenty can be located in Premium Gem condition with patience, but is virtually unobtainable any finer. This MS66 coin displays intense luster and peach-gold surfaces. Well struck throughout, especially on Liberty's face and extremities, and on the eagle's plumage. A couple of minute obverse contact marks prevent what would likely be a higher grade. (#9168)

# Gem 1916-S Saint-Gaudens Double Eagle Popular Type Issue

7001 1916-S MS65 PCGS. From a mintage of 796,000 pieces, the 1916-S Saint-Gaudens double eagle is a popular type coin. The availability of the 1916-S has been exaggerated in the past, but Gem specimens are not too difficult to locate. This attractive Gem is sharply detailed, with light greenish-gold surfaces, and bright mint luster. (#9169)

# 1916-S Double Eagle, MS65+ Good Balance of Quality and Availability

7002 1916-S MS65+ PCGS. The 1916-S Saint-Gaudens double eagle has been overlooked and undervalued by collectors over the years, because of its presence in several hoards that surfaced in the 1970s and 1980s. In high grade, the 1916-S is still a scarce date, and the MS65+ category seems to provide just the right combination of high-grade scarcity and reasonable price. This high-end Gem displays sharply detailed devices, vibrant mint luster, and light greenish-gold surfaces. (#9169)

#### Yellow-Orange 1916-S Double Eagle, MS65+

7003 1916-S MS65+ NGC. CAC. The last twenty dollar issue struck before America's entry into World War I, the 1916-S is available in Gem for a price but becomes scarce any finer. This MS65+ example offers great quality for the grade range, thanks to yellow-orange surfaces that offer blossoming luster and great quality. A well struck beauty. (#9169)

7004 1920 MS62 NGC. Yellow-gold luster bathes this alertly struck double eagle. The scattered contact is minor, but we note slight rim bumps at 4 o'clock on the obverse and at 10 o'clock on the reverse. The 1920 is scarcer than its 1921 to 1928 Philadelphia successors. (#9170)

7005 1920 MS63 NGC. CAC. A delightful Select Mint State piece, this 1920 double eagle has light yellow surfaces with frosty mint luster. An excellent coin for the type collector, and a conditionally rare issue that is impossible to locate above MS65.(#9170)

# 1920 Double Eagle, MS64 Bright, Almost Flashy Luster

- 7006 1920 MS64 PCGS. A dramatic illustration of condition rarity, the 1920 is accessible in MS64 but extremely rare any finer; PCGS has graded only one such coin (3/11). This softly frosted near-Gem offers bright, almost flashy apricot-gold luster with occasional peach accents and few significant marks aside from a dig on the eagle's breast. (#9170)
- 7007 1922 MS64 PCGS. CAC. A dark spot is evident at the tail feathers on the reverse of this brilliant lemon-yellow near-Gem. This piece has excellent eye appeal with only trivial marks on each side.(#9173)
- 7008 1922 MS64 NGC. This Choice double eagle is intricately struck, and the canary-gold surfaces are well preserved apart from minor marks above the eagle's tail. Certified in a prior generation holder. (#9173)
- 7009 1922 MS64+ PCGS. CAC. A significant orange cast is present in the wheat-gold luster on this lightly patinated piece. A trifle softly struck on peripheral elements but overall a gorgeous coin that approaches Gem-level visual appeal. (#9173)
- 7010 1922 MS64+ PCGS. CAC. A stunning lemon-yellow near-Gem, this double eagle has splendid surfaces and sharp design elements. A trace of pink toning appears on each side.(#9173)
- 7011 1922 MS64+ PCGS. CAC. An impressively unabraded near-Gem draped in green-gold shades. Lustrous and nicely struck with an especially pleasing reverse. The 1922 is the first entry in a seven-year run of available Philadelphia issues.(#9173)

# 1922 Saint-Gaudens Twenty, MS65 Only Seven Finer PCGS Submissions

7012 1922 MS65 PCGS. Rich reddish-gold patina embraces this vibrantly lustrous and boldly struck Gem. Only lightly abraded, although a few minor rose and ebony alloy spots are present. Perhaps two dozen times scarcer than the 1924 in MS65 grade but usually available for little or no premium. PCGS has only graded seven finer pieces (3/11). (#9173)

# Gem 1922 Saint-Gaudens Twenty Conditionally Rare in Higher Grades

7013 1922 MS65 PCGS. The 1922 Saint-Gaudens double eagle is a condition rarity in grades above MS65. At the Gem level, this issue is not difficult to locate, but only seven coins have been certified in higher numeric grades at PCGS (3/11). The present coin is sharply detailed, with yellow and rose-gold surfaces, and ample mint luster.

#### 1922 Saint-Gaudens Twenty, MS65

7014 1922 MS65 PCGS. A splendid Gem with fully brilliant mint luster and frosty lemon-yellow surfaces. There are only a few insignificant marks on each side of this boldly defined specimen. A few copper splashes are noted, especially on the obverse. Although the 1922 is plentiful in MS65, it is rarely seen finer with a combined PCGS and NGC population of only 14 higher grade coins. (#9173)

#### Elusive MS62 1922-S Twenty

7015 1922-S MS62 NGC. A beautiful better-date apricot-gold double eagle that has sweeping luster and only a few minor scattered marks. The highpoints show some incompleteness of impression, but the eye appeal is impressive for the assigned grade. Like all postwar S-mint issues, the 1922-S is far scarcer than its mintage suggests. (#9174)

#### 1922-S Saint-Gaudens Twenty, MS62 Interesting Inner Rim Feature

7016 1922-S MS62 NGC. Die bulging has formed an inner rim on this attractive 1922-S double eagle. This feature is often seen on the 1922-S, and it is most easily noticed on the surface of the sun. This well detailed specimen displays orange-gold surfaces and vibrant mint luster, with a scattering of minor contact marks and luster grazes in the fields. (#9174)

# Select 1922-S Twenty Interesting Die Cracks on Both Sides

7017 1922-S MS63 PCGS. CAC. This well struck Select Saint-Gaudens double eagle shows just the slightest softness on the Capitol dome and central devices. The light orange-gold surfaces are highlighted by hints of green color. Strong mint luster enlivens all surfaces of this coin, which shows extensive die cracks on both sides. (#9174)

# Near-Gem 1922-S Saint-Gaudens Twenty A Much Melted Issue

7018 1922-S MS64 PCGS. A production of more than 2.6 million pieces implies that the 1922-S is common, but most of the mintage never left Treasury vaults and was melted after Roosevelt's 1933 gold recall. The issue is much scarcer than its lower mintage P-mint counterpart, which was shipped overseas in greater quantity to fulfill foreign payments. The present lightly marked example has vibrant luster and subtle khaki-gold toning. (#9174)

#### Scarce Choice 1922-S Double Eagle

7019 1922-S MS64 PCGS. A lustrous butter-gold near-Gem of this much-melted issue. Crisply struck save for the dome of the Capitol building, and none of the distributed tiny marks are individually of consequence. Although no longer a notable rarity due to overseas finds over the years, the 1922-S remains dozens of times scarcer than its Philadelphia counterpart. (#9174)

Bright Near-Gem 1922-S Double Eagle

7020 1922-S MS64 PCGS. Bright luster emanates from both sides of this near-Gem specimen whose surfaces show yellow-gold patination blushed with mint-green tints. The strike is well but not fully executed, with minor incompleteness on the lower obverse. A handful of minute contact marks and light alloy spots, the latter confined to the reverse, precludes Gem status. Near-Gems are scarce, and anything finer is rare. PCGS has seen only 13 in higher grade (3/11).

Ex: Central States Signature (4/2009), lot 4109; Summer FUN Signature (7/2010), lot 5021. (#9174)

7021 1923 MS64+ PCGS. CAC. Wheat-gold luster swirls about the sharply struck and lightly abraded surfaces. This attractive near-Gem shows a single tiny spot near the lower left obverse border. (#9175)

# 1923 Saint-Gaudens Twenty, MS65 Only Two Finer at PCGS

7022 1923 MS65 PCGS. A gorgeous Gem, this 1923 double eagle exhibits vivid orange patina on its yellow-gold surfaces with strong design definition, such that Saint-Gaudens would be proud. Both sides are essentially mark-free, save for a tiny rim nick adjacent to the eagle's beak. PCGS has only certified two finer coins (3/11). (#9175)

#### Orange-Gold Gem 1923 Twenty

- 7023 1923 MS65 PCGS. The 1923 double eagle is an available issue but nonetheless a pleasing one at the Gem level, which is virtually the finest obtainable. The date is among the few common series P-mints in this condition. Rich orange-gold cartwheel luster careens around both sides, and it takes a loupe to uncover the few minuscule abrasions. PCGS has seen two finer (3/11). (#9175)
- 7024 1923-D MS66 NGC. CAC. Remarkably smooth for this popular Denver issue with faint orange tints on yellow-gold luster. This Premium Gem is housed in a prior-generation holder. NGC has graded 40 coins finer (3/11).(#9176)
- 7025 1924 MS64 NGC. This beautifully preserved type coin displays lovely peach-gold and powder-blue toning. Any marks are inconsequential, but we note a copper spot beneath the eagle's belly. Housed in a former generation holder. (#9177)
- 7026 1924 MS65 NGC. CAC. Saturated orange-gold luster is the key to this Gem's appeal. Well-defined and richly patinated, an ideal selection for a gold type set that leans toward the same aesthetic. (#9177)
- 7027 1924 MS65 PCGS. A beautiful lemon-gold Gem whose exceptionally mark-free surfaces display coruscating luster. Crisply struck aside from the Capitol dome. Encapsulated in a first generation holder.(#9177)
- 7028 1924 MS65 NGC. A lovely Gem and an ideal type coin due to the large mintage and high survival rate, this piece has sharp design motifs with rich orange-gold luster. (#9177)
- 7029 1924 MS65 NGC. This frosty Gem shows brilliant mint luster with light yellow-gold surfaces and bold design definition. Here is an attractive piece for the type collector or double eagle enthusiast. (#9177)
- 7030 1924 MS65 NGC. This satiny lemon-yellow representative is fully brilliant and highly lustrous with excellent eye appeal. (#9177)
- 7031 1924 MS65 PCGS. This handsome gold type coin displays smooth fields and boldly struck motifs. A pleasing pumpkin-gold representative of a perennially popular type. (#9177)
- 7032 1924 MS65 NGC. Dynamic luster encompasses the caramel-gold fields and devices of this precisely struck and carefully preserved double eagle. The 1924 returned in quantity from European bank holdings, but attractive examples are always in demand. (#9177)
- 7033 1924 MS66 NGC. CAC. Pale yellow-gold surfaces have powerful and flashy luster. This Premium Gem is sharply struck with austere beauty that sets it apart from more commonly seen MS65 coins. (#9177)
- 7034 1924 MS66 PCGS. The 1924 Saint-Gaudens double eagle makes the ideal 20th century type coin. This delightful Premium Gem displays well detailed devices, vivid greenish-gold color, and vibrant mint luster.(#9177)

#### 1924-D Twenty Dollar, MS61

7035 1924-D MS61 PCGS. Most 1924-D twenties apparently remained in Treasury vaults and were subsequently melted in the mid-1930s. A couple of thousand specimens were apparently exported and serve as the source for collectors of this date, having been repatriated from Europe in the 1940s and 1950s (James Halperin, et al., 2006). Most examples are in the MS60 to MS62 range. Higher-grade coins are very rare. This well detailed Mint State example displays bright mint luster and pleasing orange-gold surfaces. (#9178)

# 1924-S Double Eagle, MS60 Brilliant Satin Surfaces

- 7036 1924-S MS60 ANACS. What looks like a well-placed (or horribly-placed) mark on Liberty's forehead actually appears to be a six-pointed star the same size as those around the perimeter, only incused instead of raised. Both sides have many other tiny marks on the devices, in the fields, and on the rims. This bright yellow example has satin luster with hints of blue and rose toning on the reverse. (#9179)
- 7037 1925 MS65 PCGS. CAC. A delightful example, this Gem Saint-Gaudens twenty has bright pink coloration over light yellow-gold surfaces. Both sides have bold details, frosty devices, and satiny fields.(#9180)
- 7038 1925 MS66 PCGS. This frosty Premium Gem exhibits highly lustrous light yellow surfaces and bold design definition with an absence of marks on either side, save for a small nick on Liberty's breast.(#9180)

# Unabraded, Sharply Struck 1925 Double Eagle, MS66+

7039 1925 MS66+ NGC. CAC. The 1925 double eagle is an available issue up to the MS67 grade level. This piece boasts an extremely sharp strike over antique-gold, mattelike surfaces. Liberty's head is fully struck, although a bit of bluntness appears at the Capitol dome. The obverse displays minimal marks, the reverse even less so. Census: 51 in 66+, 20 finer (3/11). (#9180)

7040 1925-S — Improperly Cleaned — NGC Details. AU. A lightly worn S-mint that shows hairlines on pale khaki-gold fields, the result of a past cleaning. As a representative of a heavily melted issue, it should draw considerable interest from collectors who otherwise would have difficulty acquiring the date.

# 1925-S Double Eagle, AU50 High Mintage, Low Survival

7041 1925-S AU50 ANACS. A pleasing light yellow example of the elusive 1925-S double eagle, an issue that is normally found in higher grades, meaning this piece is an excellent candidate for the budget-minded collector. This piece has probably been cleaned but it retains excellent eye appeal. (#9182)

# 1925-S Double Eagle, AU58 Conditionally Rare in High Grade

7042 1925-S AU58 NGC. Most of the nearly 4 million-piece 1925-S double eagle mintage were melted, making the issue one of the major rarities in the Saint-Gaudens series. Consequently, even near-Mint State pieces such as the present offering are highly desired by collectors. This well detailed specimen exhibits light orange-gold surfaces and vibrant mint luster. (#9182)

7043 1926 MS65 PCGS. An outstanding Gem that boasts vibrant cartwheel luster and exceptionally unabraded fields. Well struck throughout, and limited in grade solely by a small tick on the upper drapery. (#9183)

7044 1926 MS65 PCGS. Lovely pink highlights grace the brilliant yellow surfaces of this frosty Gem. Trivial marks are of little consequence.(#9183)

7045 1926 MS66 NGC. Highly lustrous satin surfaces exhibit brilliant yellow-gold luster. The design motifs are boldly detailed and both sides are free of all but the most trivial marks. NGC has only certified seven finer pieces (3/11).(#9183)

7046 1926 MS66 PCGS. Splendid eye appeal is created through the combination of bold design motifs, brilliant yellow-gold luster, and pristine surfaces. PCGS has only certified three finer examples of this issue (3/11).(#9183)

7047 1926 MS66 NGC. A lovely Premium Gem with rose toning on the satiny yellow-gold surfaces of this fully brilliant Saint-Gaudens double eagle. A few minuscule marks and tiny copper spots are evident.(#9183)

7048 1926-S —Surface Tooled— Genuine PCGS. The PCGS number ending in 98 suggests damage as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an uncirculated specimen that has been tooled. The devices are sharply detailed, and the surfaces are brightly lustrous.

#### Conditionally Scarce 1926-S Double Eagle, MS62

7049 1926-S MS62 PCGS. The 1926-S twenty dollar was considered at one time to be one of the rarest issues in the Saint-Gaudens series. Then, small quantities began turning up in the 1950s. Jim Halperin, et al. (2006) write: "Over the the next 20 years the status of the 1926-S plummeted from 'unobtainable' to 'very scarce.' "Certified population figures point to surviving specimens being concentrated in the MS62 to MS64 grade range. This well struck MS62 piece offers bright orange-gold surfaces, with ample mint luster. (#9185)

7050 1927 MS65 NGC. CAC. Intense yellow-gold luster, pale and bright, dominates the eye appeal of this type issue Gem. A well struck beauty that is housed in a prior-generation holder. (#9186)

7051 1927 MS65 PCGS. Richly toned with orange centers and seagreen borders. Well struck throughout, and only a couple of ticks beneath the Y in TWENTY merit passing mention. Housed in a first generation holder. (#9186)

7052 1927 MS65 NGC. Solidly struck with spectacular "fire" to the luster. From bold sun-gold to pale canary-yellow, this coin offers all shades in between. A great Gem for the type enthusiast. (#9186)

7053 1927 MS65 PCGS. An amazing satin Gem, this piece is fully brilliant and lustrous with bright yellow surfaces and traces of rose toning. Destined for a high grade gold type set.(#9186)

7054 1927 MS66 NGC. Lustrous greenish-gold surfaces and vibrant frosty mint luster create substantial visual appeal, while the sharply detailed devices and unmarked fields ensure a high technical grade for this delightful Premium Gem.(#9186)

7055 1927 MS66 NGC. Warmly lustrous wheat-gold surfaces feature strong peach-orange overtones. This is a well-defined and eye-catching Premium Gem with just a few small marks hidden in the eagle's feathers. (#9186)

# 1927 Saint-Gaudens Twenty, MS66+ Outstanding Eye Appeal

7056 1927 MS66+ PCGS. CAC. The 1927 Saint-Gaudens double eagle is a condition rarity in higher Mint State levels. PCGS has currently graded more than 5,000 examples in MS66, but only 13 coins have been certified in higher numeric grades, making this spectacular MS66+ example an attractive balance of value and high quality. This high-end Premium Gem features virtually pristine greenish-gold surfaces and blazing mint luster. Population: 18 in 66+, 13 finer (3/11). (#9186)

7057 1928 MS66 NGC. Bold orange-gold luster is key to the eye appeal on this Premium Gem. An ideal type selection that is housed in a prior-generation holder. NGC has graded just 79 numerically finer representatives (2/11).

From The Dr. Donald M. Gilner Collection. (#9189)

#### TERRITORIAL GOLD

7058 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Repaired, Bent — NGC Details. AU. This wavy example has extensively whizzed fields, but the legends remain bold. Listed on page 365 of the 2011 Guide Book.

#### 1852 Humbert Ten, XF40 Rare K-10b Variant

7059 1852 Humbert Ten Dollar XF40 PCGS. K-10b, R.6. The rare "K-10b" is unlisted in the classic Kagin pioneer gold reference, although the variety is photographed in Breen's 1988 *Encyclopedia* under his 7713. This is an olive-gold example with soft definition on STATES OF and the central reverse. Small marks are distributed but none individually distract. Listed on page 369 of the 2011 *Guide Book.* (#10187)

# Bright Near-Mint 1853 Assay Office Twenty Dollar, K-18

7060 1853 Assay Office Twenty Dollar, 900 Thous. AU58 NGC. K-18, R.2. If the 1942/1 dimes are overdates then the 1853 Assay Office twenties must be considered "overfinenesses." They are all 900/880 in reality, although the feature fades with prolonged die use. And the die use was prolonged; Kagin informs us that some 2.5 million pieces were coined between March and the end of October 1853, "from some 30 different dies destroyed in the fire of 1906." Simple math leads us to conclude that somewhere north of 65,000 pieces per die was the average, or 130,000 per pair. This near-Mint piece displays green-gold color with a sharp strike and bright, satiny mint luster. The arrows and eagle's claw are the only area incompletely struck. Listed on page 371 of the 2011 Guide Book. (#10013)

# 1853 Assay Office Twenty, Unc Details Popular K-18 Variety

7061 1853 Assay Office Twenty Dollar, 900 Thous. — Improperly Cleaned — NGC Details. Unc. K-18, R.2. The variety is recognized by the 900 Thous. fineness on the ribbon. From a mintage of 2.5 million pieces, the K-18 Assay Office twenties were produced between March and November of 1853. The light orange-gold surfaces of this well detailed specimen display vivid rose highlights and strong, if somewhat subdued, underlying mint luster. Listed on page 371 of the 2011 Guide Book.

#### CALIFORNIA FRACTIONAL GOLD

# Famous Peacock Reverse BG-302 1853 Octagonal Half, MS62

7062 1853 Peacock Reverse 50 Cents, BG-302, Low R.4, MS62 PCGS. A later die state with a break along the right obverse border near star 12. The famous "Peacock" reverse, although technically an eagle is depicted. The bird's tail is actually beneath the arrows, and the lines above and behind the bird are glory rays. An important Period One type, much more desirable than the myriad wreath reverses that dominate the series. This is an unabraded and slightly subdued green-gold example with minor retained laminations (as made) on the reverse field. (#10422)

7063 1855 Liberty Octagonal 50 Cents, BG-309, R.5, MS64 NGC. A strongly struck coin for the design with gleaming, partly reflective green-gold luster. Highly appealing with few marks of any significance. Census: 1 in 64, 0 finer (2/11).(#10429)

# Extremely Rare BG-404 Round Liberty 1854 Half Dollar, MS63

7064 1854 Liberty Round 50 Cents, BG-404, R.7, MS63 PCGS. A flashy and unmarked representative of this very rare Period One Frontier, Deviercy & Co. variety. The fields are generally reflective, albeit slightly glossy near DOLLAR and the bridge of the nose. The horizontal die line to the right of the date is diagnostic for BG-404. Population: 2 in 63, 1 finer (3/11). (#10440)

#### Very Rare BG-420 Round Liberty 1853 Half Dollar, MS62

- 7065 1853 Liberty Round 50 Cents, BG-420, Low R.7, MS62 PCGS. A very rare Period One variety, struck at a time when a shortage of small change in California encouraged local jewelers to help fill the gap. This well struck example has a lustrous obverse and a satiny reverse. Iridescent rose-red, sea-green, and canary-gold toning ensures the eye appeal. Population: 2 in 62, 0 finer (3/11). (#10456)
- 7066 1855 Liberty Octagonal 1 Dollar, BG-533, Low R.4, MS62 PCGS. An important example despite its low rarity rating, the Period One fractional gold pieces are highly collectible, and the dollar denomination pieces are in particular demand. This greenish-yellow example has lustrous surfaces and reflective fields. Population: 16 in 62, 6 finer (3/11).(#10510)

# 1871 BG-720 Octagonal Quarter, MS66 A Period Two Rarity-7 Coin

- 7067 1871 Liberty Octagonal 25 Cents, BG-720, R.7, MS66 NGC. The rare BG-720 variety is notable for its oversized head of Liberty and fragmented stars, which were partly lapped away during the obverse die preparation. The reverse is the same as that used on BG-717 before rusting. This is the finest example certified of this Period Two quarter. The fields are nicely mirrored on each side and circular lathe lines are seen on both obverse and reverse. The green-gold surfaces are notably free from abrasions. (#10547)
- 7068 1872 Indian Octagonal 25 Cents, BG-791, R.3, MS66 Prooflike NGC. Profoundly mirrored with excellent contrast and preservation. An impressive yellow-gold representative of this scarce type. Census: 6 in 66 Prooflike, 2 finer (3/11). (#710618)
- 7069 1876 Indian Octagonal 25 Cents, BG-799, At least High R.6, MS65 Prooflike NGC. The sole finest Prooflike example of this very rare die pair known to NGC (3/11). Outstanding contrast and mirrors, the former prominent on the obverse and the latter on the green-gold reverse.(#710626)
- 7070 1880 Indian Octagonal 25 Cents, BG-799J, R.3, MS65 Prooflike NGC. This sun-gold Gem has flashy fields, and is well struck save for the A in DOLLAR. A small amount of translucent residue appears between the stars above the headdress. (#710636)
- 7071 1868 Indian Octagonal 25 Cents, BG-799T, High R.5, MS65 Prooflike NGC. Precisely struck and essentially pristine with glassy fields and moderate cameo contrast. An exceptional Gem of this scarcer octagonal quarter variety. Census: 3 in 65 Prooflike, none finer (2/11).(#710646)

- 7072 1866 Liberty Round 25 Cents, BG-804, R.4, MS65 Prooflike NGC. The flashy canary-gold fields lack any indication of post-strike contact. Better struck than usual for the variety, which often has a lightly impressed date. Census: 2 in 65 Prooflike, 1 finer as MS66 without a Prooflike designation (3/11).(#710665)
- 7073 ND Liberty Round 25 Cents, BG-834, High R.5, MS64 Prooflike NGC. A gleaming example of this rare undated Liberty round quarter, strongly struck and carefully preserved. The color is faintly green-gold, as befits California-origin metal. The sole finest Prooflike example known to NGC (3/11).(#710695)

# 1872/1 Round Indian Quarter, BG-869 Amazing MS66 Deep Mirror Prooflike

- 7074 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS66 Deep Mirror Prooflike NGC. This Period Two quarter is similar to BG-868, but a rim break shows (barely) at the 2 on the obverse, while the reverse was reworked with the leaf tips curled, extra berries at the top, and extensive die cracks. While California fractionals are often found with Prooflike fields, the depth of mirroring seen here is truly exceptional. Likewise the devices are heavily frosted. Bright, dazzling yellow-gold color and nearly perfect preservation. Census: 1 in 66 Deep Mirror Prooflike, 0 finer (3/11). (#910730)
- 7075 1874 Indian Round 25 Cents, BG-875, High R.4, MS66 NGC. The prooflike surfaces are highly attractive, and exhibit lovely green-gold and orange coloration. Impeccably preserved on both sides. No other BG-875 example in the combined certified population rates so highly, regardless of reflectivity designation (3/11).(#10736)
- 7076 1874 Indian Round 25 Cents, BG-875, High R.4, MS65 Prooflike NGC. The blatantly reflective fields contrast with luminous, well struck devices. Essentially flawless from the technical perspective. A few "ghost" stars, as made, are present on the lower reverse. Census: 5 in 65 Prooflike, 1 finer as 65 Deep Mirror Prooflike (3/11).(#710736)
- 7077 1881 Indian Round 25 Cents, BG-887, R.3, MS66 PCGS. Hints of green overtones add eye appeal to this brilliant yellow-gold piece. Both sides have fully and deeply mirrored fields with highly lustrous devices that provide amazing cameo contrast. Population: 6 in 66, 0 finer (3/11).(#10748)
- 7078 1871 Liberty Round 50 Cents, BG-1011, R.2, MS66 NGC. Swirling luster is the hallmark of this honey-gold Premium Gem. Well-defined with smooth and splendidly preserved surfaces. Census: 4 in 66, 1 finer (3/11).(#10840)
- 7079 1872 Indian Round 50 Cents, BG-1048, Low R.4, MS65 PCGS. Appreciably reflective with slight contrast. The yellow-orange surfaces of this Gem are virtually mark-free. Great eye appeal for this scarce type. Population: 7 in 65, 0 finer (3/11). (#10877)
- 7080 1872 Indian Round 50 Cents, BG-1048, Low R.4, MS65 Prooflike NGC. The Small Stars variant of the 1872 Indian round half dollar. The flashy fields appear immaculate, and the grade is solely limited by minor incompleteness of strike at the centers. (#710877)
- 7081 1873 Indian Round 50 Cents, BG-1051, Low R.5, MS64 Prooflike NGC. Glassy honey-gold fields accompany sharply struck devices. A lovely representative of this well made Indian Head Period Two variety. Census: 4 in 64 Prooflike, 1 finer (3/11). (#710880)

# 1873 Indian Gold Half Dollar BG-1051, MS65 Prooflike

7082 1873 Indian Round 50 Cents, BG-1051, Low R.5, MS65 Prooflike NGC. A highly lustrous green-gold example of the Indian Head California fractional half dollar, this piece is fully and deeply mirrored with exceptional cameo contrast on both sides. Census: 1 in 65 Prooflike, 0 finer (3/11). (#710880)

# 1874/3 Half Dollar, Round Indian Type BG-1052, MS66 Prooflike, The Finest Certified

7083 1874/3 Indian Round 50 Cents, BG-1052, High R.4, MS66 Prooflike NGC. State 1. On this die state the die scratch is plain and heavy from star 3 to the chin, and the overdate is plain. The fields shine with exceptionally deep mirrored reflectivity. The reverse shows light, vertical die striations. The level of preservation is truly extraordinary, a common theme among the California fractionals in this collection, and this is the finest Prooflike example certified (3/11). (#710881)

7084 1860 Liberty Octagonal 1 Dollar, BG-1102, R.4, MS63+ PCGS. This high-end Select gold dollar is sharply detailed, with reflective greenish-gold surfaces. A few minor abrasions on both sides account for the grade. Population: 1 in 63+, 15 finer (3/11). (#10913)

#### 1872 Period Two Dollar, Octagonal Large Indian Type BG-1119, MS66 Prooflike

7085 1872 Indian Octagonal 1 Dollar, BG-1119, High R.5, MS66 Prooflike NGC. This issue is distinguished from the similar BG-1120 variety by having a berry beneath the G in GOLD, along the upper right reverse periphery. This remarkable example is well struck and exhibits deeply reflective fields and sharply frosted devices, creating noteworthy cameo contrast on each side. Thick rim cuds are evident on the reverse near 10 and 2 o'clock. Surface distractions are minimal. Census: 2 in 66 Prooflike, 0 finer (3/11). (#710930)

#### **NUGGET**

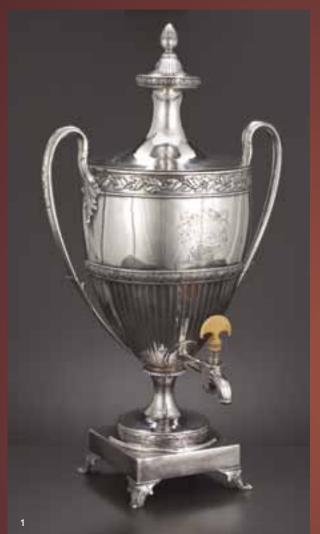

7086 Gold Nugget. Weight 9.7 gm, likely California origin, alluvial features polished, a small but fascinating piece for display.

End of Session Five

# FINE SILVER & VERTU AUCTION

APRIL 13, 2011 | DALLAS | LIVE & ONLINE

Shop our monthly Internet only silver auctions of details.

GEORGE III SILVER HOT WATER URN
 John Schofield, London, England, circa 1790-1791
 20-3/4 x 12 x 7-5/8 inches
 Estimate: \$5,000-\$8,000
 HA.com/5064-14005

2. LATE VICTORIAN SILVER AND SILVER GILT REPOUSSÉ PUNCH BOWL Elkington & Co., Ltd., Birmingham, England, circa 1901-1902 7-1/2 x 14 inches diameter Estimate: \$3,000-\$5,000 HA.com/5064-14002

Annual Sales Exceed \$600 Million | 600,000+ Online Bidder-Members

3500 Maple Avenue, Dallas, Texas 75219 | 800-872-6467 | HA.com/FineArt Fine & Decorative Arts | 1518 Slocum, Dallas, Texas 75207 | Ext. 1444 HERITAGE A U C T I O N S

# **SESSION SIX**

Heritage Live!™, Internet, Fax, and Mail Only Session Saturday, April 30, 2011 | 12:00 PM CT | Dallas, Texas | Lots 9001 - 10984

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots To view full descriptions, enlargeable images and bid online, visit HA.com/1154

#### SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live<sup>TM</sup>, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

#### **COLONIALS**

- 9001 (1670-75) St. Patrick Farthing Brown -Corrosion- NGC Details. VF. NGC Census: (0/0). PCGS Population (0/0). (#42)
- 9002 1723 Rosa Americana Penny VF30 PCGS. PCGS Population (8/59). NGC Census: (2/17). (#125)
- 9003 1723 Hibernia Farthing, DEI GRATIA XF45 PCGS. CAC. PCGS Population (20/151). NGC Census: (9/40). (#176)
- 9004 1773 Virginia Halfpenny, Period -Obverse Scratched- NGC Details. XF. NGC Census: (2/80). PCGS Population (7/228). (#240)
- 9005 1787 Massachusetts Half Cent VF30 NGC. NGC Census: (0/0). PCGS Population (13/194). (#296)
- 9006 1786 Connecticut Copper, Hercules Head -Environmental Damage- NGC Details. VF. NGC Census: (0/0). PCGS Population (5/8). (#334) From The Jack Stickel Collection.
- 9007 1787 Connecticut Copper, Mailed Bust Left VF35 PCGS. PCGS Population (12/17). NGC Census: (2/17). (#349)
- 9008 1787 Connecticut Copper, Draped Bust Left VG8 ANACS. NGC Census: (13/117). PCGS Population (20/519). (#557)
- 9009 1787 Nova Eborac Copper, Seated Left VF35 PCGS. PCGS Population (16/51). NGC Census: (1/13). (#478)
- 9010 1787 New Jersey Copper, Outlined Shield—Environmental Damage— NGC Details. XF. NGC Census: (3/14). PCGS Population (29/63). (#503)
- 9011 1781 North American Token— Environmental Damage—NGC Details. VG. NGC Census: (1/42). PCGS Population (0/155). (#589)

- 9012 1783 Washington & Independence Cent, Small Military Bust, Plain Edge XF45 NGC. NGC Census: (0/6). PCGS Population (10/23). (#670) From The Jack Stickel Collection.
- 9013 1793 Washington Ship Halfpenny, Copper, Lettered Edge AU50 NGC. NGC Census: (9/17). PCGS Population (41/81). (#734)

#### HALF CENTS

- 9014 1794 -Corrosion- NGC Details. VG. NGC Census: (4/132). PCGS Population (11/299). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$785. (#1003)
- 9015 1795 Lettered Edge Good 6 NGC. NGC Census: (1/49). PCGS Population (2/117). Mintage: 139,690. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6: \$480. (#1009)
- 9016 1803 VF30 PCGS. PCGS Population (23/98). NGC Census: (8/74). Mintage: 92,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$502. (#1060)
- 9017 1804 Plain 4, No Stems XF45 NGC. NGC Census: (56/533). PCGS Population (64/352). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$386. (#1063)
- 9018 1804 Crosslet 4, Stems— Environmental Damage—NGC Details. AU. NGC Census: (0/0). PCGS Population (16/76). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$550. (#1069)
- 9019 1806 Small 6, No Stems VF20 NGC. NGC Census: (21/758). PCGS Population (18/414). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$185. (#1093)

- 9020 1807 VF35 NGC. C-1. NGC Census: (13/107). PCGS Population (21/127). Mintage: 476,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$379. (#1104) From The Dustinn (Dusty) Lee Gibson Collection.
- 9021 1807 XF40 NGC. C-1. NGC Census: (14/93). PCGS Population (17/110). Mintage: 476,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$500. (#1104)
- 9022 1808 XF40 NGC. NGC Census: (15/65). PCGS Population (8/46). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#1107)
  From The Dustinn (Dusty) Lee Gibson Collection.
- 9023 1809 PCGS Genuine. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 9024 1811 VG8 NGC. NGC Census: (7/58).
  PCGS Population (12/110). Mintage: 63,140. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$650. (#1135)
  From The Jack Stickel Collection.
- 9025 1825 AU55 PCGS. PCGS Population (19/87). NGC Census: (48/195). Mintage: 63,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$375. (#1141)
- 9026 1826 AU55 NGC. NGC Census: (64/249). PCGS Population (23/103). Mintage: 234,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$225. (#144)
  From The Dustinn (Dusty) Lee Gibson Collection.
- 9027 No lot.

- 9028 1828 13 Stars MS62 Brown NGC. NGC Census: (208/401). PCGS Population (46/165). Mintage: 606,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$275. (#1147) From The Dustinn (Dusty) Lee Gibson Collection.
- 9029 1832 AU58 NGC. NGC Census: (101/216). PCGS Population (41/106). Mintage: 154,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$200. (#1159)
  From The Dustinn (Dusty) Lee Gibson Collection.
- 9030 1833 AU58 PCGS. CAC. PCGS Population (65/198). NGC Census: (45/272). Mintage: 120,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$190. (#1162)
- 9031 1833 MS61 Brown NGC. C-1. NGC Census: (32/240). PCGS Population (7/187). Mintage: 120,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$235. (#1162) From The Dustinn (Dusty) Lee Gibson Collection.
- 9032 1834 AU55 NGC. C-1. NGC Census: (35/309). PCGS Population (46/230). Mintage: 141,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$165. (#1165) From The Jack Stickel Collection.
- 9033 1834 AU58 NGC. C-1. NGC Census: (68/242). PCGS Population (43/187). Mintage: 141,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$190. (#1165)
  From The Dustinn (Dusty) Lee Gibson Collection.
- 9034 1849 Large Date AU58 NGC. C-1. NGC Census: (28/145). PCGS Population (32/105). Mintage: 39,864. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$325. (#1218) From The Dustinn (Dusty) Lee Gibson Collection

- 9035 1849 Large Date MS61 Brown ANACS. NGC Census: (20/121). PCGS Population (6/93). Mintage: 39,864. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$360. (#1218)
- 9036 1850 AU55 NGC. C-1. NGC Census: (12/129). PCGS Population (26/109). Mintage: 39,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$220. (#1221) From The Jack Stickel Collection.
- 9037 1850 MS62 Brown NGC. C-1. NGC Census: (43/40). PCGS Population (15/57). Mintage: 39,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$410. (#1221) From The Dustinn (Dusty) Lee Gibson Collection.
- 9038 1851 AU58 NGC. C-1. NGC Census: (87/332). PCGS Population (73/185). Mintage: 147,672. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$170. (#1224) From The Dustinn (Dusty) Lee Gibson Collection.
- 9039 1851 MS61 Brown NGC. C-1. NGC Census: (46/282). PCGS Population (12/162). Mintage: 147,672. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$200. (#1224) From The Dustinn (Dusty) Lee Gibson Collection.
- 9040 1853 AU58 NGC. C-1. NGC Census: (54/615). PCGS Population (76/382). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$190. (#1227)
  From The Jack Stickel Collection.
- 9041 1853 MS61 Brown NGC. C-1. NGC Census: (46/568). PCGS Population (5/370). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$210. (#1227) From The Dustinn (Dusty) Lee Gibson Collection.
- 9042 1854 MS61 Brown NGC. C-1. NGC Census: (27/374). PCGS Population (11/242). Mintage: 55,358. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$200. (#1230) From The Dustinn (Dusty) Lee Gibson Collection.
- 9043 1854 MS62 Brown NGC. C-1. NGC Census: (87/286). PCGS Population (56/187). Mintage: 55,358. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$225. (#1230) From The Dustinn (Dusty) Lee Gibson Collection.
- 9044 1855 MS62 Brown PCGS. PCGS Population (57/268). NGC Census: (87/350). Mintage: 56,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$225. (#1233)

- 9045 1856 MS62 Brown NGC. C-1. NGC Census: (52/105). PCGS Population (40/71). Mintage: 40,430. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$290. (#1236) From The Dustinn (Dusty) Lee Gibson Collection.
- 9046 1857 AU58 NGC. C-1. NGC Census: (39/269). PCGS Population (37/167). Mintage: 35,180. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$225. (#1239) From The Dustinn (Dusty) Lee Gibson Collection.
- 9047 1857 -Improperly Cleaned NGC Details. Unc. C-1. NGC Census: (1/268). PCGS Population (4/163). Mintage: 35,180. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$250. (#1239) From The Jack Stickel Collection.
- 9048 1857 MS64 Brown NGC. C-1. NGC Census: (78/13). PCGS Population (30/0). Mintage: 35,180. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$500. (#1239)

#### LARGE CENTS

- 9049 1793 Wreath Cent, Vine and Bars—Corroded, Tooled—ANACS. Good 4 Details. S-6. NGC Census: (2/168). PCGS Population (24/398). Mintage: 63,353. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4:\$1,675. (#1347)
- 9050 1794 No Fraction Bar, Head of 1794, S-64, B-50, Low R.5 —Reverse Damage— NGC Details. Fine. NGC Census: (0/0). PCGS Population (0/2). (#35708) From The Jack Stickel Collection.
- 9051 1794 Head of 1793—Corroded— ANACS. AG3 Details. S-17a. NGC Census: (1/7). PCGS Population (0/21). Mintage: 918,521. (#1362) From The Jack Stickel Collection.
- 9052 1794 Head of 1794 ANACS. Fine 15 Details. S-22. NGC Census: (0/0). PCGS Population (35/368). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$1,149. (#901374)
- 9053 1794 Head of 1795 PCGS Genuine. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 9054 1794 Head of 1794 AG3 NGC. S-44. NGC Census: (8/352). PCGS Population (11/449). Mintage: 918,521. (#1365) From The Jack Stickel Collection.

- 9055 1794 Head of 1795 -Corroded- NGC Details. Good. NGC Census: (5/347). PCGS Population (8/441). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4:\$375. (#1365)
  From The Jack Stickel Collection.
- 9056 1794 Head of 1794 Good 6 NGC. S-62. NGC Census: (8/339). PCGS Population (13/428). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6: \$428. (#1365)
  Ex: 2001 EAC Sale, lot 171. From The Jack Stickel Collection.
- 9057 1794 Head of 1794 Good 6 NGC. S-65. NGC Census: (8/339). PCGS Population (13/428). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6: \$428. (#1365)
  From The Jack Stickel Collection.
- 9058 1794 Head of 1794 -Reverse Damage-NGC Details. VG. S-30. NGC Census: (9/330). PCGS Population (18/410). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$525. (#1365)
  From The Jack Stickel Collection.
- 9059 1794 Head of 1794 -Improperly Cleaned- NGC Details. VG. S-60. NGC Census: (9/330). PCGS Population (18/410). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$525. (#1365)
  From The Jack Stickel Collection.
- 9060 1794 Head of 1794 -Improperly Cleaned- NGC Details. VG. S-21. NGC Census: (9/330). PCGS Population (18/410). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$525. (#1365) From The Jack Stickel Collection.
- 9061 1794 Head of 1794 -Rev Damage-NGC Details. VG. S-59. NGC Census: (9/330). PCGS Population (18/410). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$525. (#1365) From The Jack Stickel Collection.
- 9062 1794 Head of 1794 -Environmental Damage- NGC Details. VG. S-22. Ex: John Wright (6/1975). From The Jack Stickel Collection.
- 9063 1794 Head of 1794 VG10 NGC. S-54. NGC Census: (8/322). PCGS Population (17/393). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$613. (#1365)
  Ex: 1999 EAC Sale, lot 149. From The Jack Stickel Collection.

- 9064 1794 Head of 1794 -Environmental Damage- NGC Details. Fine. S-43. NGC Census: (19/303). PCGS Population (28/365). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$775. (#1365)
  From The Jack Stickel Collection.
- 9065 1794 Head of 1794 -Corrosion- NGC Details. Fine. S-25. NGC Census: (19/303). PCGS Population (28/365). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$775. (#1365)
  From The Jack Stickel Collection.
- 9066 1794 Head of 1794 Corrosion NGC Details. Fine. S-23. NGC Census: (19/303). PCGS Population (28/365). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$775. (#1365) From The Jack Stickel Collection.
- 9067 1794 Head of 1794 -Environmental Damage- NGC Details. Fine. S-46. NGC Census: (19/303). PCGS Population (28/365). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$775. (#1365)
  Ex: Jack Beymer; 1999 EAC Sale, lot 144.
  From The Jack Stickel Collection.
- 9068 1794 Head of 1794 -Environmental Damage- NGC Details. Fine. S-28. NGC Census: (19/303). PCGS Population (28/365). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$775. (#1365)
  From The Jack Stickel Collection.
- 9069 1794 Head of 1795 NGC Details. AU. S-72. NGC Census: (21/273). PCGS Population (47/286). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,800. (#1365)
  From The Jack Stickel Collection.

- 9070 1794 Head of 1794 -Rim Damage-NGC Details. VF. S-41. NGC Census: (20/268). PCGS Population (47/286). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,800. (#1365) From The Jack Stickel Collection.
- 9071 1794 Head of 1794 -Damaged- NGC Details. VF. S-41. NGC Census: (20/268). PCGS Population (47/286). Mintage: 918,521. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,800. (#1365)
  From The Jack Stickel Collection.
- 9072 1795 Lettered Edge -Improperly Cleaned- NGC Details. Good. S-75. NGC Census: (1/27). PCGS Population (1/72). Mintage: 37,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$450. (#1377) From The Jack Stickel Collection.
- 9073 1795 Lettered Edge -Corrosion- NGC Details. Good. S-74. NGC Census: (1/27). PCGS Population (1/72). Mintage: 37,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$450. (#1377)
  From The Jack Stickel Collection.
- 9074 1795 Lettered Edge -Damaged- NGC Details. Good. S-76a. NGC Census: (1/27). PCGS Population (1/72). Mintage: 37,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$450. (#1377) From The Jack Stickel Collection.
- 9075 1795 Plain Edge -Obverse Damage-NGC Details. VG. S-77. NGC Census: (3/113). PCGS Population (17/279). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$565. (#1380)
  From The Jack Stickel Collection.
- 9076 1795 Plain Edge -Environmental Damage- NGC Details. Fine. S-78. NGC Census: (10/95). PCGS Population (19/234). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$725. (#1380)
  From The Jack Stickel Collection.
- 9077 1795 Plain Edge -Burnished, Environmental Damage- NGC Details. Fine. S-76b. NGC Census: (10/95). PCGS Population (19/234). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$725. (#1380) From The Jack Stickel Collection.
- 9078 1796 Liberty Cap Fair 2 NGC. S-81. NGC Census: (4/90). PCGS Population (6/146). Mintage: 109,825. (#1392) From The Jack Stickel Collection.
- 9079 1796 Liberty Cap AG3 NGC. S-81. NGC Census: (7/83). PCGS Population (7/140). Mintage: 109,825. (#1392) From The Jack Stickel Collection.
- 9080 1796 Liberty Cap AG3 NGC. S-87. NGC Census: (7/83). PCGS Population (7/140). Mintage: 109,825. (#1392) From The Jack Stickel Collection.

- 9081 1796 Liberty Cap Good 4 NGC. S-83. NGC Census: (5/78). PCGS Population (10/129). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$350. (#1392)
  Ex: Superior (9/1997), lot 181. From The Jack Stickel Collection.
- 9082 1796 Liberty Cap Good 4 NGC. NGC Census: (5/78). PCGS Population (10/130). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$350. (#1392) From The Jack Stickel Collection.
- 9083 1796 Liberty Cap -Obverse Scratched-NGC Details. VG. S-89. NGC Census: (4/70). PCGS Population (9/114). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$500. (#1392)
  From The Jack Stickel Collection.
- 9084 1796 Liberty Cap -Damaged- NGC Details. VG. S-85. NGC Census: (4/70). PCGS Population (9/115). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$500. (#1392) From The Jack Stickel Collection.
- 9085 1796 Liberty Cap -Corrosion- NGC Details. VG. S-84. NGC Census: (4/70). PCGS Population (9/115). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$500. (#1392)
  From The Jack Stickel Collection.
- 9086 1796 Liberty Cap—Corrosion—NGC Details. VG. S-82. NGC Census: (4/70). PCGS Population (9/115). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$500. (#1392)
  From The Jack Stickel Collection.
- 9087 1796 Liberty Cap -Corrosion- NGC Details. VF. S-91. NGC Census: (2/48). PCGS Population (16/61). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,950. (#1392)
  From The Jack Stickel Collection.
- 9088 1796 Draped Bust, Reverse of 1795 Fair 2 NGC. S-95. NGC Census: (4/55). PCGS Population (0/75). Mintage: 363,375. (#1401) From The Jack Stickel Collection.
- 9089 1796 Draped Bust, Reverse of 1796 Fair 2 NGC. S-97. NGC Census: (4/55). PCGS Population (0/75). Mintage: 363,375. (#1401) Purchased from James E. Long (5/8/1999). From The Jack Stickel Collection.
- 9090 1796 Draped Bust, Reverse of 1795—Damaged, Improperly Cleaned—NGC Details. AG. S-93. NGC Census: (1/54). PCGS Population (3/72). Mintage: 363,375. (#1401) From The Jack Stickel Collection.

- 9091 1796 Draped Bust, Reverse of 1795— Corrosion—NGC Details. VG. S-99. NGC Census: (5/48). PCGS Population (4/62). Mintage: 363,375. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$425. (#1401) From The Jack Stickel Collection.
- 9092 1796 Draped Bust, Reverse of 1795—Environmental Damage—NGC Details. VF. S-93. NGC Census: (0/42). PCGS Population (10/33). Mintage: 363,375. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$2,100. (#1401)

  Ex: Superior (2/2002), lot 1161. From The Jack Stickel Collection.
- 9093 1796 Draped Bust, Reverse of 1794—Corrosion—NGC Details. Good. S-102. NGC Census: (1/11). PCGS Population (1/18). Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$350. (#1404)
  From The Jack Stickel Collection.
- 9094 1796 Draped Bust, Reverse of 1794 Damaged— NGC Details. Good. S-101. NGC Census: (1/11). PCGS Population (3/20). (#1404) From The Jack Stickel Collection.
- 9095 1796 Draped Bust, Reverse of 1794 VG8 NGC. S-102. NGC Census: (1/10). PCGS Population (2/15). Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$625. (#1404) From The Jack Stickel Collection.
- 9096 1796 Draped Bust, Reverse of 1794— Improperly Cleaned—NGC Details. Fine. S-106. NGC Census: (5/5). PCGS Population (0/14). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$1,150. (#1404) Purchased from Mario Byrge (9/1998). From The Jack Stickel Collection.
- 9097 1796 Draped Bust, Reverse of 1794—Corrosion—NGC Details. Fine. S-109. NGC Census: (5/5). PCGS Population (0/14). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$1,150. (#1404)
  From The Jack Stickel Collection.
- 9098 1796 Draped Bust, Reverse of 1794 ANACS. VF30 Details. S-112. NGC Census: (0/1). PCGS Population (1/5). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$3,170. (#1404) From The Jack Stickel Collection.
- 9099 1796 Draped Bust, Reverse of 1797 Fair 2 NGC. S-114. NGC Census: (0/15). PCGS Population (2/24). (#1407)
- 9100 1796 Draped Bust, Reverse of 1797 AG3 NGC. S-117. NGC Census: (3/12). PCGS Population (1/23). (#1407) From The Jack Stickel Collection.
- 9101 1796 Draped Bust, Reverse of 1797 Good 4 NGC. S-115. NGC Census: (1/10). PCGS Population (3/20). (#1407) From The Jack Stickel Collection.

- 9102 1796 Draped Bust, Reverse of 1797
  —Corrosion—NGC Details. Good.
  S-100. NGC Census: (1/11). PCGS
  Population (3/20). (#1407)
  Purchased from James E. Long (5/8/1999).
  From The Jack Stickel Collection.
- 9103 1796 Draped Bust, Reverse of 1797 Good 6 NGC. S-114. NGC Census: (1/10). PCGS Population (1/19). (#1407) From The Jack Stickel Collection.
- 9104 1796 Draped Bust, Reverse of 1797 Brown—Burnished—NGC Details. Fine. S-119. NGC Census: (0/0). PCGS Population (0/0). (#1407) From The Jack Stickel Collection.
- 9105 1796 LIHERTY Good 4 NGC. S-104. NGC Census: (2/3). PCGS Population (1/17). Mintage: 363,375. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$375. (#1413) From The Jack Stickel Collection.
- 9106 1796 LIHERTY—Improperly Cleaned—NGC Details. VG. S-104. NGC Census: (0/3). PCGS Population (2/12). Mintage: 363,375. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$490. (#1413) From The Jack Stickel Collection.
- 9107 1796 Draped "LIHERTY"—Scratched, Improperly Cleaned—NGC Details. VG. S-103. NGC Census: (0/3). PCGS Population (2/12). Mintage: 363,375. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$490. (#1413)
  From The Jack Stickel Collection.

- 9163 1800 80/79 Second Hair Style— Improperly Cleaned—NGC Details. VG. S-195. NGC Census: (1/32). PCGS Population (5/56). Mintage: 2,822,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$225. (#1455) Ex: Superior (2/1998), lot 963. From The Jack Stickel Collection.
- 9164 1800 80/79 Second Hair Style Fine 12 NGC. S-192. NGC Census: (2/29). PCGS Population (3/47). Mintage: 2,822,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$375. (#1455) From The Jack Stickel Collection.
- 9165 1800 80/79 Second Hair Style— Obv Damage—NGC Details. VF. S-192. NGC Census: (3/23). PCGS Population (11/34). Mintage: 2,822,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,000. (#1455) From The Jack Stickel Collection.
- 9166 1800 80/79 Second Hair Style— Improperly Cleaned—NGC Details. VF. S-196. NGC Census: (3/23). PCGS Population (11/34). Mintage: 2,822,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,000. (#1455) Purchased from March Wells. From The Jack Stickel Collection.
- 9167 1800 80/79 Second Hair Style— Environmental Damage—NGC Details. VF. S-193. NGC Census: (3/23). PCGS Population (11/34). Mintage: 2,822,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,000. (#1455) From The Jack Stickel Collection.
- 9168 1801—Improperly Cleaned—NGC Details. VG. S-215. NGC Census: (3/94). PCGS Population (3/88). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$86. (#1458) From The Jack Stickel Collection.

- 9169 1801 Fine 15 NGC. S-213. NGC Census: (6/69). PCGS Population (10/64). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$354. (#1458)
  From The Jack Stickel Collection.
- 9170 1801 Fine 15 ANACS. S-224. NGC Census: (6/69). PCGS Population (10/64). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$354. (#1458)

From The Jack Stickel Collection.

- 9171 1801—Improperly Cleaned—NGC Details. VF. S-222. NGC Census: (8/61). PCGS Population (10/54). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$500. (#1458) From The Jack Stickel Collection.
- 9172 1801 VF20 NGC. S-216. NGC Census: (8/61). PCGS Population (10/54). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$500. (#1458) From The Jack Stickel Collection.
- 9173 1801 3 Errors—Improperly Cleaned—NGC Details. Good. S-219. NGC Census: (1/11). PCGS Population (2/30). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4:\$180. (#1461) From The Jack Stickel Collection.
- 9174 1801 3 Errors—Environmental Damage—NGC Details. VG. S-219. NGC Census: (2/9). PCGS Population (5/22). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$500. (#1461) From The Jack Stickel Collection.
- 9175 1801 3 Errors—Environmental Damage—NGC Details. VG. S-219. NGC Census: (2/9). PCGS Population (5/22). Mintage: 1,362,837. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$500. (#1461) From The Jack Stickel Collection.

- 9176 1801 1/000—Bent, Environmental Damage—NGC Details. Fine. S-220. NGC Census: (0/0). PCGS Population (2/21). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$250. (#1464)
  From The Jack Stickel Collection.
- 9177 1801 1/000—Scratched— NGC Details. VF. S-223. NGC Census: (0/0). PCGS Population (1/15). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$725. (#1464) From The Jack Stickel Collection.
- 9178 1801 1/000—Environmental Damage—NGC Details. VF. S-223. NGC Census: (0/0). PCGS Population (1/15). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$725. (#1464) From The Jack Stickel Collection.
- 9179 1801 100/000—Corrosion—NGC Details. VG. S-221. NGC Census: (0/0). PCGS Population (0/12). Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$185. (#1467) From The Jack Stickel Collection.
- 9180 1801 100/000—Improperly Cleaned—NGC Details. Fine. S-221. NGC Census: (0/0). PCGS Population (0/12). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$300. (#1467)
  From The Jack Stickel Collection.
- 9181 1802 Surface Damage PCGS Genuine. Mintage: 3,435,100. (#1470)
- 9182 1802 PCGS Genuine. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. PCGS Population (0/0). NGC Census: (0/0). Mintage: 3,435,100. (#1470)
- 9183 1802 VG10 NGC. S-227. NGC Census: (9/257). PCGS Population (18/338). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$141. (#1470)
  From The Jack Stickel Collection.
- 9184 1802 VG10 NGC. S-240. NGC Census: (9/257). PCGS Population (18/338). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$141. (#1470)
  From The Jack Stickel Collection.
- 9185 1802 Fine 12 NGC. S-236. NGC Census: (20/237). PCGS Population (24/314). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$225. (#1470)
  From The Jack Stickel Collection.

- 9186 1802 Fine 12 NGC. S-233. NGC Census: (20/237). PCGS Population (24/314). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$225. (#1470)
  From The Jack Stickel Collection.
- 9187 1802 Fine 12 NGC. S-236. NGC Census: (20/237). PCGS Population (24/314). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$225. (#1470)
  From The Jack Stickel Collection.
- 9188 1802 1/000—Rev Damage—NGC Details. Fine. S-228. NGC Census: (20/237). PCGS Population (24/314). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$225. (#1470) From The Jack Stickel Collection.
- 9189 1802 Fine 15 NGC. S-242. NGC Census: (22/215). PCGS Population (26/288). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$278. (#1470) From The Jack Stickel Collection.
- 9190 1802 Fine 15 NGC. S-235. NGC Census: (22/215). PCGS Population (26/288). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$278. (#1470) From The Jack Stickel Collection.
- 9191 1802 No Stems Fine 15 NGC. S-231. NGC Census: (22/215). PCGS Population (26/288). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$278. (#1470)
  From The Jack Stickel Collection.
- 9192 1802 1/000 Fine 15 NGC. S-228. NGC Census: (22/215). PCGS Population (26/288). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$278. (#1470) From The Jack Stickel Collection.
- 9193 1802 Fine 15 NGC. S-226. NGC Census: (22/215). PCGS Population (26/288). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$278. (#1470)
  From The Jack Stickel Collection.
- 9194 1802—Improperly Cleaned—NGC Details. VF. S-242. NGC Census: (20/195). PCGS Population (35/253). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$375. (#1470) From The Jack Stickel Collection.
- 9195 1802—Corrosion—NGC Details. VF. S-229. NGC Census: (20/195). PCGS Population (35/253). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$375. (#1470)
  From The Jack Stickel Collection.

#### PROOF INDIAN CENTS

- 9519 1870 PR64 Red and Brown NGC. NGC Census: (90/90). PCGS Population (76/38). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$480. (#2298)
- 9520 1872 PR63 Red and Brown PCGS. PCGS Population (37/190). NGC Census: (30/214). Mintage: 950. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$510. (#2304)
- 9521 1876 PR64 Red and Brown PCGS. PCGS Population (90/53). NGC Census: (104/124). Mintage: 1,150. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$385. (#2316)
- 9522 1878 PR64 Red and Brown PCGS. PCGS Population (153/50). NGC Census: (166/126). Mintage: 2,350. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$430. (#2322)
- 9523 1879 PR64 Red and Brown PCGS. PCGS Population (153/104). NGC Census: (148/196). Mintage: 3,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$300. (#2325)
- 9524 1884 PR64 Red and Brown PCGS. PCGS Population (161/166). NGC Census: (78/148). Mintage: 3,942. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$320. (#2340)
- 9525 1884 PR64 Red and Brown PCGS. PCGS Population (161/166). NGC Census: (78/148). Mintage: 3,942. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$320. (#2340)
- 9526 1889 PR64 Red PCGS. PCGS Population (17/23). NGC Census: (18/8). Mintage: 3,336. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$460. (#2356)
- 9527 1890 PR64 Red and Brown PCGS. CAC. PCGS Population (112/25). NGC Census: (140/80). Mintage: 2,740. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$300. (#2358)
- 9528 1892 PR64 Red and Brown PCGS. PCGS Population (135/70). NGC Census: (158/146). Mintage: 2,745. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$345. (#2364)
- 9529 1892 PR64 Red and Brown PCGS. PCGS Population (135/70). NGC Census: (158/146). Mintage: 2,745. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$345. (#2364)

9530 1894 PR63 Brown PCGS. PCGS Population (11/25). NGC Census: (24/80). Mintage: 2,632. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$140. (#2369)

- 9531 1895 PR65 Red and Brown NGC. NGC Census: (117/30). PCGS Population (37/10). Mintage: 2,062. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$475. (#2373) From The B & D Collection.
- 9532 1901 PR63 Brown ANACS. NGC Census: (4/41). PCGS Population (7/21). Mintage: 1,985. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$135. (#2390)
- 9533 1904 PR65 Red and Brown PCGS. CAC. PCGS Population (37/4). NGC Census: (47/8). Mintage: 1,817. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$480. (#2400)
- 9534 1906 PR64 Red NGC. NGC Census: (20/46). PCGS Population (30/35). Mintage: 1,725. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$380. (#2407)
- 9535 1907 PR63 Red and Brown PCGS. PCGS Population (39/126). NGC Census: (26/184). Mintage: 1,475. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$175. (#2409)
- 9536 1908 PR64 Brown PCGS. PCGS Population (21/7). NGC Census: (17/17). Mintage: 1,620. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$200. (#2411)
- 9537 1909 PR63 Red and Brown ANACS. NGC Census: (28/232). PCGS Population (52/172). Mintage: 2,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$175. (#2415)

#### LINCOLN CENTS

- 9538 (5)1909 VDB MS65 Red & Brown NGC. (Total: 5 coins)
- 9539 1909 VDB MS65 Red and Brown PCGS. PCGS Population (839/135). NGC Census: (705/235). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$73. (#2424)
- 9540 1909 VDB MS66 Red NGC. NGC Census: (1351/99). PCGS Population (1899/206). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$220. (#2425)
- 9541 1909 VDB MS66 Red PCGS. PCGS Population (1900/206). NGC Census: (1350/99). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$220. (#2425)
- 9542 1909 VDB MS66 Red PCGS. PCGS Population (1900/206). NGC Census: (1350/99). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$220. (#2425)
- 9543 1909 VDB MS66 Red NGC. NGC Census: (1349/99). PCGS Population (1899/206). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$220. (#2425)
- 9544 1909 VDB MS66 Red NGC. NGC Census: (1349/99). PCGS Population (1899/206). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$220. (#2425)
- 9545 1909 VDB MS66 Red PCGS. CAC. PCGS Population (1899/206). NGC Census: (1351/99). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$220. (#2425)
- 9546 1909 VDB Double Die Obverse MS64 Brown PCGS. FS-1101(FS-012). PCGS Population (13/1). NGC Census: (0/0). (#37631) From The Dustinn (Dusty) Lee Gibson Collection.
- 9547 1909 VDB Double Die Obverse PCGS Genuine. FS-1101 (FS-012). The PCGS number ending in .91 suggests Questionable/Artificial Toning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 9548 1909-S VDB PCGS Genuine. The PCGS number ending in .92 suggests Cleaned as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.

- 9549 1909-S VDB—Polished—ANACS. Good 4 Details. NGC Census: (6/3870). PCGS Population (15/7112). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4:\$600. (#2426)
- 9550 1909-S VDB Good 4 PCGS. PCGS Population (15/7093). NGC Census: (6/3836). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$600. (#2426)
- 9551 1909-S VDB—Heavily Corroded—ANACS. VG8 Details. NGC Census: (49/3756). PCGS Population (78/6989). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$745. (#2426)
- 9552 1909-S VDB -Improperly Cleaned-NGC Details. Fine. NGC Census: (306/3350). PCGS Population (327/6484). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$850. (#2426)
- 9553 1909-S VDB Fine 12 ANACS. NGC Census: (306/3350). PCGS Population (325/6466). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$850. (#2426)
  From The Dustinn (Dusty) Lee Gibson

Collection.

- 9554 1909-S VDB—Cleaned—ANACS. Fine 12 Details. NGC Census: (306/3350). PCGS Population (325/6466). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$850. (#2426) From The Dustinn (Dusty) Lee Gibson Collection.
- 9555 1909-S VDB Fine 15 NGC. NGC Census: (318/3032). PCGS Population (540/5944). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$885. (#2426)
- 9556 1909-S VDB—Improperly Cleaned—NGC Details. VF. NGC Census: (238/2804). PCGS Population (507/5447). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$950. (#2426)
- 9557 1909-S VDB VF35 PCGS. PCGS Population (597/3830). NGC Census: (155/2230). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$1,005. (#2426)
- 9558 1909-S XF40 NGC. NGC Census: (62/352). PCGS Population (164/574). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$165. (#2432) From The Jack Stickel Collection.

- 9559 1909-S AU55 NGC. NGC Census: (39/217). PCGS Population (77/265). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$220. (#2432)
  From The Dustinn (Dusty) Lee Gibson Collection.
- 9560 1909-S AU55 NGC. NGC Census: (39/217). PCGS Population (77/265). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$220. (#2432) From The Dustinn (Dusty) Lee Gibson Collection.
- 9561 1909-S—Altered Color—NGC Details. Unc. NGC Census: (0/168). PCGS Population (6/170). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$250. (#2432)
- 9562 1909-S MS64 Brown NGC. NGC Census: (45/17). PCGS Population (62/8). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$360. (#2432) From The Dustinn (Dusty) Lee Gibson Collection.
- 9563 1909-S MS64 Red and Brown NGC. NGC Census: (189/139). PCGS Population (433/212). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. (#2433)

- 9564 1909-S MS65 Red and Brown PCGS. PCGS Population (204/6). NGC Census: (121/15). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$600. (#2433)
- 9565 1909-S MS65 Red and Brown NGC. NGC Census: (124/15). PCGS Population (207/6). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$600. (#2433)

- 9566 1909-S MS64 Red PCGS. PCGS Population (447/541). NGC Census: (162/235). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$520. (#2434)
- 9567 1909-S MS64 Red NGC. NGC Census: (162/235). PCGS Population (447/541). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$520. (#2434)
- 9568 1909-S S Over Horizontal S MS64 Red and Brown NGC. NGC Census: (46/27). PCGS Population (91/33). (#92433)
- 9569 1909-S S Over Horizontal S MS64 Red and Brown NGC. CAC. NGC Census: (45/27). PCGS Population (91/33). (#92433)
- 9570 1909-S S Over Horizontal S MS63 Red PCGS. PCGS Population (27/365). NGC Census: (9/130). (#92434)
- 9571 1910 MS64 Red PCGS. PCGS Population (319/546). NGC Census: (218/488). Mintage: 146,801,216. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$72. (#2437)
- 9572 1910 MS65 Red PCGS. PCGS Population (387/159). NGC Census: (296/192). Mintage: 146,801,216. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$190. (#2437)
- 9573 1910 MS65 Red NGC. NGC Census: (296/192). PCGS Population (387/159). Mintage: 146,801,216. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$190. (#2437)
- 9574 1910-S MS65 Red and Brown NGC. CAC. NGC Census: (225/26). PCGS Population (168/2). Mintage: 6,045,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$330. (#2439)
- 9575 1911 MS65 Red PCGS. PCGS Population (182/103). NGC Census: (98/70). Mintage: 101,177,784. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$360. (#2443)
- 9576 1911-D MS64 Brown NGC. NGC Census: (132/52). PCGS Population (77/6). Mintage: 12,672,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$160. (#2444)
- 9577 1911-S MS62 Brown ANACS. NGC Census: (42/228). PCGS Population (27/138). Mintage: 4,026,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$180. (#2447)

- 9578 1911-S MS63 Brown PCGS. PCGS Population (73/65). NGC Census: (100/128). Mintage: 4,026,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$210. (#2447)
- 9579 1911-S MS63 Brown NGC. NGC Census: (100/128). PCGS Population (73/65). Mintage: 4,026,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$210. (#2447)
- 9580 1912 MS66 Brown NGC. NGC Census: (3/0). PCGS Population (0/0). Mintage: 68,153,056. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$130. (#2450)
- 9581 1912-D MS64 Brown NGC. NGC Census: (64/22). PCGS Population (45/3). Mintage: 10,411,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$230. (#2453)
- 9582 1912-D MS64 Red PCGS. PCGS Population (199/117). NGC Census: (110/72). Mintage: 10,411,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$685. (#2455)
- 9583 1912-S MS62 Brown NGC. NGC Census: (66/174). PCGS Population (27/103). Mintage: 4,431,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$165. (#2456)
- 9584 1912-S MS63 Red and Brown PCGS. PCGS Population (98/205). NGC Census: (104/258). Mintage: 4,431,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$275. (#2457)
- 9585 1912-S MS64 Red and Brown PCGS. PCGS Population (176/29). NGC Census: (186/72). Mintage: 4,431,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$385. (#2457)
- 9586 1913-D MS63 Red and Brown NGC. NGC Census: (74/204). PCGS Population (49/132). Mintage: 15,804,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$185. (#2463)

- 9587 1913-D MS64 Red and Brown ANACS. NGC Census: (158/48). PCGS Population (118/14). Mintage: 15,804,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$325. (#2463)
- 9588 1913-S MS62 Brown NGC. NGC Census: (68/126). PCGS Population (27/71). Mintage: 6,101,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$165. (#2465)
- 9589 1914-D PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 9590 1914-D VG10 PCGS. PCGS Population (379/3265). NGC Census: (370/3582). Mintage: 1,193,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$195. (#2471) From The Dustinn (Dusty) Lee Gibson Collection.
- 9591 1914-D Fine 12 ANACS. NGC Census: (468/3114). PCGS Population (413/2852). Mintage: 1,193,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$250. (#2471)
  - From The Dustinn (Dusty) Lee Gibson Collection.
- 9592 1914-D VF20 PCGS. PCGS Population (410/2013). NGC Census: (358/2328). Mintage: 1,193,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$325. (#2471) From The Dustinn (Dusty) Lee Gibson
- 9593 1914-D—Environmental Damage—NGC Details. VF. NGC Census: (366/2338). PCGS Population (411/2025). Mintage: 1,193,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$325. (#2471)

Collection.

9725 1971-S Doubled Die Obverse, Type Two PR65 Red Cameo PCGS. FS-101 (FS-032). PCGS Population (15/39). NGC Census: (3/30). (#83533)

#### TWO CENT PIECES

- 9726 1864 Large Motto MS64 Red and Brown PCGS. PCGS Population (868/296). NGC Census: (496/658). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$260. (#3577)
- 9727 1865—Recolored—ANACS. MS60 Details. NGC Census: (0/1552). PCGS Population (7/490). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$88. (#3582)
- 9728 1865 MS63 Brown NGC. NGC Census: (322/966). PCGS Population (208/212). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$155. (#3582)
- 9729 1865 MS64 Red and Brown NGC. NGC Census: (643/780). PCGS Population (577/277). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$270. (#3583)
- 9730 1865 MS64 Red and Brown PCGS. CAC Gold. PCGS Population (578/277). NGC Census: (643/782). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$270. (#3583)
- 9731 1865 MS65 Red and Brown NGC. NGC Census: (650/130). PCGS Population (257/20). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$480. (#3583)
- 9732 1866 AU50 PCGS. PCGS Population (7/148). NGC Census: (8/383). Mintage: 3,177,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$60. (#3588)
- 9733 1866 MS64 Red PCGS. PCGS Population (40/49). NGC Census: (2/27). Mintage: 3,177,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$775. (#3590)
- 9734 1868 MS65 Red and Brown NGC. CAC. NGC Census: (152/14). PCGS Population (39/3). Mintage: 2,803,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$725. (#3598)
- 9735 1870 MS62 Brown NGC. NGC Census: (40/152). PCGS Population (12/47). Mintage: 860,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$240. (#3606) From The Jack Stickel Collection.
- 9736 1871 MS60 Red and Brown ANACS. NGC Census: (0/139). PCGS Population (1/184). Mintage: 721,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$225. (#3610)

- 9737 1872 VF30 PCGS. PCGS Population (14/152). NGC Census: (4/151). Mintage: 64,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$754. (#3612)
  From The Dustinn (Dusty) Lee Gibson Collection.
- 9738 1872 VF35 PCGS. PCGS Population (20/132). NGC Census: (8/143). Mintage: 64,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$814. (#3612) From The Dustinn (Dusty) Lee Gibson Collection.

#### PROOF TWO CENT PIECES

- 9739 1865 PR64 Red and Brown PCGS. PCGS Population (51/39). NGC Census: (20/43). Mintage: 500. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$700. (#3628)
- 9740 1870 PR63 Red and Brown NGC. NGC Census: (14/115). PCGS Population (33/165). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$440. (#3643)
- 9741 1871 PR63 Red and Brown NGC. NGC Census: (12/126). PCGS Population (39/191). Mintage: 960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$480. (#3646)

From The Dustinn (Dusty) Lee Gibson Collection.

## THREE CENT SILVER

- 9742 1857 PCGS Genuine. The PCGS number ending in .92 suggests Cleaned as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 9743 1859 AU58 NGC. NGC Census: (11/227). PCGS Population (37/256). Mintage: 364,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$150. (#3677)
- 9744 1862 MS64 NGC. NGC Census: (290/357). PCGS Population (258/311). Mintage: 343,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$430. (#3680)
- 9745 1862/1 AU55 PCGS. CAC. PCGS Population (11/342). NGC Census: (3/282). Mintage: 343,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$160. (#3681)

## PROOF THREE CENT SILVER

- 9746 1862 PR64 PCGS. PCGS Population (63/25). NGC Census: (45/43). Mintage: 550. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$825. (#3711)
- 9747 1865 PR62 PCGS. CAC. PCGS Population (18/148). NGC Census: (9/120). Mintage: 500. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR62: \$440. (#3715)
- 9748 1865 PR64 PCGS. PCGS Population (58/43). NGC Census: (52/50). Mintage: 500. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$850. (#3715)

#### THREE CENT NICKELS

- 9749 1865 MS63 NGC. NGC Census: (341/657). PCGS Population (475/610). Mintage: 11,382,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$140. (#3731)
- 9750 1870 MS64 NGC. NGC Census: (124/55). PCGS Population (99/70). Mintage: 1,335,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$250. (#3736)
- 9751 1870 MS64 NGC. NGC Census: (124/55). PCGS Population (99/70). Mintage: 1,335,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$250. (#3736)
- 9752 1870 MS65 PCGS. PCGS Population (54/16). NGC Census: (45/10). Mintage: 1,335,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$635. (#3736)
- 9753 1883 XF45 NGC. NGC Census: (4/27). PCGS Population (8/41). Mintage: 4,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$283. (#3751)
  From The Dustinn (Dusty) Lee Gibson Collection.
- 9754 1887 XF40 NGC. NGC Census: (3/82). PCGS Population (8/107). Mintage: 5,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$390. (#3755)
  From The Jack Stickel Collection.
- 9755 1889 AU55 NGC. NGC Census: (6/166). PCGS Population (19/191). Mintage: 18,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$185. (#3758) From The Jack Stickel Collection.

## PROOF THREE CENT NICKELS

- 9756 1869 PR64 Cameo NGC. NGC Census: (18/65). PCGS Population (18/44). (#83765)
- 9757 1872 PR65 Cameo PCGS. PCGS Population (23/7). NGC Census: (21/22). (#83768)
- 9758 1876 PR64 PCGS. CAC. PCGS Population (169/93). NGC Census: (110/121). Mintage: 1,150. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$370. (#3772)
- 9759 1879 PR65 PCGS. CAC. PCGS Population (289/217). NGC Census: (297/233). Mintage: 3,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$480. (#3775)
- 9760 1883 PR65 NGC. NGC Census: (488/369). PCGS Population (498/410). Mintage: 6,609. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$480. (#3779)
  From The Dustinn (Dusty) Lee Gibson Collection.

- 9761 1883 PR66 NGC. NGC Census: (285/84). PCGS Population (343/67). Mintage: 6,609. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$670. (#3779)
  From The Dr. Donald M. Gilner Collection.
- 9762 1883 PR66 PCGS. PCGS Population (343/67). NGC Census: (285/84). Mintage: 6,609. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$670. (#3779)
  From The Orchid Collection.
- 9763 1884 PR65 Cameo PCGS. PCGS Population (54/73). NGC Census: (43/67). (#83780)
- 9764 1885 PR63 NGC. CAC. NGC Census: (60/704). PCGS Population (135/842). Mintage: 3,790. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$340. (#3781)

- 9765 1886 PR66 NGC. NGC Census: (197/35). PCGS Population (203/47). Mintage: 4,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$685. (#3782) From The Dr. Donald M. Gilner Collection.
- 9766 1887/6 PR63+ NGC. NGC Census: (22/343). PCGS Population (55/377). Mintage: 2,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$420. (#3784)
- 9767 1887/6 PR64 NGC. NGC Census: (113/231). PCGS Population (149/227). Mintage: 2,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$520. (#3784) From The Jack Stickel Collection.
- 9768 1889 PR65 PCGS. PCGS Population (387/296). NGC Census: (373/261). Mintage: 3,436. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$480. (#3786) From The Dustinn (Dusty) Lee Gibson Collection.

#### SHIELD NICKELS

- 9769 1867 Rays MS64 NGC. NGC Census: (178/60). PCGS Population (138/32). Mintage: 2,019,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$700. (#3791)
- 9770 1867 Rays MS64 PCGS. PCGS Population (138/32). NGC Census: (178/60). Mintage: 2,019,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$700. (#3791)

- 10353 1915-D AU58 PCGS. CAC. PCGS Population (60/592). NGC Census: (48/427). Mintage: 3,694,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$145. (#5671)
- 10354 1915-D MS64 NGC. NGC Census: (149/85). PCGS Population (193/163). Mintage: 3,694,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$500. (#5671)
- 10355 1915-S AU58 NGC. NGC Census: (17/106). PCGS Population (41/121). Mintage: 704,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$225. (#5672)

## PROOF BARBER QUARTERS

- 10356 1899 PR62 ANACS. NGC Census: (12/129). PCGS Population (34/144). Mintage: 846. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR62: \$440. (#5685)
- 10357 1900 PR63 NGC. NGC Census: (28/161). PCGS Population (53/106). Mintage: 912. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$675. (#5625)
  From The Dr. Donald M. Gilner Collection.
- 10358 1910 PR63 Cameo NGC. NGC Census: (5/60). PCGS Population (7/48). (#85696)

## STANDING LIBERTY QUARTERS

- 10359 1917 Type One PCGS Genuine. The PCGS number ending in .91 suggests Questionable/Artificial Toning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 10360 1917 Type One—Improperly Cleaned—NGC Details. Unc. NGC Census: (3/1119). PCGS Population (19/1546). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$180. (#5706)
- 10361 1917 Type One—Improperly Cleaned—NGC Details. Unc. NGC Census: (3/1119). PCGS Population (19/1545). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$180. (#5706)
- 10362 1917 Type One—Environmental Damage—NGC Details. Unc. NGC Census: (3/1119). PCGS Population (19/1545). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$180. (#5706)
- 10363 1917 Type One—Improperly Cleaned—NGC Details. Unc. NGC Census: (3/1119). PCGS Population (19/1546). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$180. (#5706)
- 10364 1917 Type One MS64 NGC. NGC Census: (497/222). PCGS Population (603/248). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$360. (#5706)

From The Dr. Donald M. Gilner Collection.

- 10365 1917 Type One MS65 NGC. NGC Census: (184/37). PCGS Population (212/36). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$685. (#5706)
- 10366 1917 Type One MS62 Full Head PCGS. PCGS Population (419/3953). NGC Census: (425/2760). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$265. (#5707)
- 10367 1917 Type One MS63 Full Head NGC. NGC Census: (576/2192). PCGS Population (1005/2957). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$340. (#5707)
- 10368 1917 Type One MS63 Full Head PCGS. PCGS Population (1002/2955). NGC Census: (575/2192). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$340. (#5707)
- 10369 1917 Type One MS64 Full Head PCGS. CAC. PCGS Population (1590/1361). NGC Census: (1158/1031). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#5707)
- 10370 1917 Type One Full Head MS64+ NGC. NGC Census: (1158/1031). PCGS Population (1590/1361). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#5707)
- 10371 1917 Type One MS64 Full Head PCGS. PCGS Population (1594/1363). NGC Census: (1157/1035). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#5707)
- 10372 1917 Type One MS64 Full Head ANACS. NGC Census: (1158/1031). PCGS Population (1590/1361). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#5707)

- 10373 1917 Type One MS64 Full Head PCGS. CAC. PCGS Population (1594/1363). NGC Census: (1157/1035). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#5707)
- 10374 1917 Type One MS64 Full Head NGC. NGC Census: (1157/1035). PCGS Population (1592/1363). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#5707) From The Scott Cedars Collection.
- 10375 1917 Type One MS65 Full Head PCGS. PCGS Population (954/409). NGC Census: (681/354). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$800. (#5707)
- 10376 1917 Type One MS65 Full Head NGC. Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$800. (#5707) From The Dr. Donald M. Gilner Collection.
- 10377 1917-D Type One MS63 PCGS. PCGS Population (145/250). NGC Census: (68/204). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$355. (#5708)
  - From The Scott Cedars Collection.
- 10378 1917-D Type One MS64 NGC. NGC Census: (129/75). PCGS Population (167/83). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. (#5708)
- 10379 1917-D Type One AU58 Full Head NGC. NGC Census: (89/887). PCGS Population (140/1205). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$240. (#5709)
- 10380 1917-D Type One AU58 Full Head NGC. NGC Census: (89/886). PCGS Population (140/1206). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$240. (#5709)
- 10381 1917-D Type One AU58 Full Head ANACS. NGC Census: (89/889). PCGS Population (141/1207). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$240. (#5709)
- 10382 1917-D Type One MS64 Full Head PCGS. PCGS Population (436/395). NGC Census: (294/278). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$700. (#5709)
- 10383 1917-D Type One MS64 Full Head PCGS. CAC. PCGS Population (436/396). NGC Census: (295/278). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$700. (#5709)

- 10384 1917-S Type One AU55 Full Head PCGS. PCGS Population (35/754). NGC Census: (9/564). Mintage: 1,952,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$230. (#5711)
- 10385 1917-S Type One MS63 Full Head NGC. NGC Census: (84/323). PCGS Population (156/406). Mintage: 1,952,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$565. (#5711)
  From The Scott Cedars Collection.
- 10386 1917 Type Two AU53 PCGS. CAC. PCGS Population (17/622). NGC Census: (8/419). Mintage: 13,880,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$80. (#5714)
- 10387 1917 Type Two MS64 PCGS. CAC. PCGS Population (163/109). NGC Census: (110/100). Mintage: 13,880,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$320. (#5714)
  From The Scott Cedars Collection.
- 10388 1917 Type Two MS62 Full Head NGC. NGC Census: (112/543). PCGS Population (95/757). Mintage:

PCGS Population (95/757). Mintage: 13,880,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$240. (#5715)

- 10389 1917 Type Two MS65 Full Head PCGS. PCGS Population (178/66). NGC Census: (121/51). Mintage: 13,880,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$725. (#5715)
- 10390 1917-D Type Two AU50 PCGS. CAC. PCGS Population (30/569). NGC Census: (7/380). Mintage: 6,224,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$130. (#5716)

- 10391 1917-D Type Two MS61 NGC. NGC Census: (14/275). PCGS Population (5/366). Mintage: 6,224,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$200. (#5716)
- 10392 1917-D Type Two MS64 NGC. NGC Census: (94/53). PCGS Population (137/59). Mintage: 6,224,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#5716)
  - From The Scott Cedars Collection.
- 10393 1917-S Type Two MS63 PCGS. CAC. PCGS Population (114/215). NGC Census: (79/171). Mintage: 5,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$290. (#5718)
  - From The Scott Cedars Collection.
- 10394 1917-S Type Two MS64 NGC. Ex: Jules Reiver Collection. NGC Census: (105/66). PCGS Population (132/83). Mintage: 5,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$480. (#5718)
- 10395 1917-S Type Two AU58 Full Head PCGS. CAC. PCGS Population (27/273). NGC Census: (21/170). Mintage: 5,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$235. (#5719)
- 10396 1918 AU53 PCGS. CAC. PCGS Population (16/500). NGC Census: (6/355). Mintage: 14,240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$72. (#5720)
- 10397 1918 MS63 PCGS. PCGS Population (100/227). NGC Census: (38/207). Mintage: 14,240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$200. (#5720) From The Scott Cedars Collection.
- 10398 1918-D MS64 NGC. CAC. NGC Census: (80/62). PCGS Population (149/67). Mintage: 7,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$535. (#5722) From The Scott Cedars Collection.
- 10399 1918-S MS63 PCGS. PCGS Population (144/256). NGC Census:
  - (108/226). Mintage: 11,072,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$310. (#5724)
- 10400 1918-S MS64 NGC. NGC Census: (139/86). PCGS Population (182/75). Mintage: 11,072,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$550. (#5724) From The Scott Cedars Collection.
- 10401 1919 AU53 PCGS. CAC. PCGS Population (10/750). NGC Census: (9/538). Mintage: 11,324,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$105. (#5728)

- 10402 1919 MS63 Full Head PCGS. PCGS Population (79/333). NGC Census: (42/211). Mintage: 11,324,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$375. (#5729)
- 10403 1919 MS64 Full Head PCGS. PCGS Population (158/177). NGC Census: (93/118). Mintage: 11,324,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$560. (#5729)
- 10404 1919-8 VF25 PCGS. PCGS Population (23/449). NGC Census: (5/281). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$258. (#5732)
- 10405 1919-S—Improperly Cleaned—NGC Details. XF. NGC Census: (19/237). PCGS Population (43/347). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$400. (#5732)
- 10406 1919-8 AU55 NGC. NGC Census: (34/151). PCGS Population (48/199). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$675. (#5732) From The Scott Cedars Collection.
- 10407 1919-S AU58 NGC. NGC Census: (27/124). PCGS Population (55/144). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$875. (#5732)
- 10408 1920 AU53 PCGS and a 1920-S XF45 PCGS. PCGS Population (22/1433). NGC Census: (6/1074). Mintage: 27,860,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$75. (#5734) (Total: 2)
- 10409 1920 MS64 NGC. NGC Census: (333/253). PCGS Population (444/262). Mintage: 27,860,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$250. (#5734) From The Dr. Donald M. Gilner Collection.
- 10410 1920 MS65+ PCGS. PCGS Population (209/55). NGC Census: (178/75). Mintage: 27,860,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$440. (#5734)
- 10411 1920 MS65 PCGS. PCGS Population (209/55). NGC Census: (178/75). Mintage: 27,860,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$440. (#5734)
- 10412 1920 MS65 PCGS. CAC. PCGS
  Population (209/55). NGC Census:
  (178/75). Mintage: 27,860,000.
  Numismedia Wsl. Price for problem
  free NGC/PCGS coin in MS65: \$440.
  (#5734)
  From The Scott Cedars Collection.

- 10413 1920 MS66+ PCGS. CAC. PCGS Population (51/4). NGC Census: (62/13). Mintage: 27,860,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$785. (#5734)
- 10414 1920 MS64 Full Head PCGS. PCGS Population (151/122). NGC Census: (91/72). Mintage: 27,860,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$500. (#5735)
- 10415 1920-D MS62 NGC. NGC Census: (15/111). PCGS Population (19/192). Mintage: 3,586,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$465. (#5736)
- 10416 1920-S AU58 NGC. NGC Census: (56/270). PCGS Population (88/326). Mintage: 6,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$170. (#5738)
- 10417 1920-S MS62 ANACS. NGC Census: (45/209). PCGS Population (50/266). Mintage: 6,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$500. (#5738) From The Scott Cedars Collection.
- 10418 1920-S MS64 NGC. NGC Census: (91/57). PCGS Population (125/57). Mintage: 6,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,400. (#5738)
- 10419 1923 MS62 PCGS. PCGS Population (85/1198). NGC Census: (85/942). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$160. (#5742) From The Scott Cedars Collection.
- 10420 1923 MS65 NGC. NGC Census: (284/217). PCGS Population (315/239). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$425. (#5742) From The Dr. Donald M. Gilner Collection.

- 10421 1923 MS66 NGC. NGC Census: (172/45). PCGS Population (226/14). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$610. (#5742)
- 10422 1923 MS63 Full Head PCGS. PCGS Population (34/95). NGC Census: (15/68). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#5743)
- 10423 1923-S VF25 NGC. NGC Census: (15/336). PCGS Population (33/713). Mintage: 1,360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$824. (#5744)
- 10424 1924 AU55 PCGS. CAC. PCGS Population (45/723). NGC Census: (15/574). Mintage: 10,920,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$84. (#5746)

- 10975 1964 Accented Hair PR67 Cameo PCGS. PCGS Population (184/90). NGC Census: (286/200). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$140. (#86801)
- 10976 1970-S PR69 Deep Cameo PCGS. PCGS Population (230/0). NGC Census: (228/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: \$280. (#96806)
- 10977 1977-S PR70 Deep Cameo PCGS. PCGS Population (107). NGC Census: (13). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$345. (#96815)
- 10978 1977-S PR70 Deep Cameo PCGS. PCGS Population (107). NGC Census: (13). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$345. (#96815)
- 10979 1978-S PR70 Deep Cameo PCGS. PCGS Population (140). NGC Census: (27). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$175. (#96816)
- 10980 1979-S Type One PR70 Deep Cameo PCGS. PCGS Population (192). NGC Census: (0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$190. (#96818)
- 10981 1979-S Type Two PR70 Deep Cameo PCGS. PCGS Population (53). NGC Census: (0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$650. (#96819)

- 10982 1984-S PR70 Deep Cameo PCGS. PCGS Population (107). NGC Census: (30). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$365. (#96825)
- 10983 1988-S PR70 Deep Cameo PCGS. PCGS Population (110). NGC Census: (68). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$225. (#96829)
- 10984 1999-S Silver PR70 Deep Cameo PCGS. PCGS Population (99). NGC Census: (490). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$165. (#96911)

End of Session Six

# **SESSION SEVEN**

Heritage Live!™, Internet, Fax, and Mail Only Session Sunday, May 1, 2011 | 12:00 PM CT | Dallas, Texas | Lots 10985 - 13007

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots To view full descriptions, enlargeable images and bid online, visit HA.com/1154

### SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live<sup>TM</sup>, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

#### EARLY DOLLAR

10985 1799 7x6 Stars—Rims Repaired, Improperly Cleaned—NGC Details. Good. BB-158, B-16. NGC Census: (9/1539). PCGS Population (7/2464). Mintage: 423,515. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$875. (#6878)

### SEATED DOLLARS

- 10986 1840 Improperly Cleaned NGC Details. XF. NGC Census: (14/162). PCGS Population (38/179). Mintage: 61,005. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$625. (#6926)
- 10987 1841—Reverse Graffiti—NGC Details. AU. NGC Census: (12/126). PCGS Population (31/126). Mintage: 173,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$775. (#6927)
- 10988 1842 XF45 NGC. NGC Census: (51/294). PCGS Population (100/263). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$599. (#6928)
- 10989 1843—Environmental Damage—NGC Details. Fine. NGC Census: (1/326). PCGS Population (2/427). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$270. (#6929)
- 10990 1844 XF40 NGC. NGC Census: (7/112). PCGS Population (16/152). Mintage: 20,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$500. (#6930)
- 10991 1845 XF45 PCGS. PCGS Population (41/98). NGC Census: (22/89). Mintage: 24,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$873. (#6931)

- 10992 1846-O PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. (#6933)
- 10993 1847 XF40 ANACS. NGC Census: (17/302). PCGS Population (50/375). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$525. (#6934)

- 10994 1859-O—Cleaned—ANACS. AU53 Details. NGC Census: (27/358). PCGS Population (25/502). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$690. (#6947)
- 10995 1859-S PCGS Genuine. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.

- 10996 1860-O VF30 PCGS. CAC. PCGS Population (19/1019). NGC Census: (6/632). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$375. (#6950)
- 10997 1871—Rim Filing—NGC Details. Fine. NGC Census: (10/454). PCGS Population (9/668). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$275. (#6966)
- 10998 1871—Reverse Scratched—NGC Details. XF. NGC Census: (25/374). PCGS Population (75/480). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$475. (#6966)
- 10999 1871—Cleaned—ANACS. AU53 Details. NGC Census: (33/258). PCGS Population (41/253). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$750. (#6966)
- 11000 1872 -Obverse Damaged- NGC Details. Fine. NGC Census: (6/318). PCGS Population (3/457). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$270. (#6968)
- 11001 1872 VF35 NGC. NGC Census: (7/286). PCGS Population (37/363). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$405. (#6968)
- 11002 1872—Improperly Cleaned—NGC Details. AU. NGC Census: (20/188). PCGS Population (54/195). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$685. (#6968)
- 11003 1872—Cleaned, Repaired—NGC Details. AU. NGC Census: (20/188). PCGS Population (54/195). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$685. (#6968)

#### PROOF SEATED DOLLAR

11004 1872—Altered Surfaces—ANACS. Net PR50. NGC Census: (1/137). PCGS Population (0/204). Mintage: 950. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR50: \$775. (#7020)

#### TRADE DOLLARS

- 11005 1873-CC PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 124,500. (#7032)
- 11006 1874-S PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 11007 1875 PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 11008 1875-CC—Improperly Cleaned—NGC Details. AU. NGC Census: (5/205). PCGS Population (27/261). Mintage: 1,573,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$555. (#7038)
- 11009 1875-CC—Improperly Cleaned—NGC. AU. NGC Census: (5/205). PCGS Population (27/261). Mintage: 1,573,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$555. (#7038)
- 11010 1875-S Chop Mark AU53 PCGS. PCGS Population (6/100). NGC Census: (0/0). (#87039)
- 11011 1876 PCGS Genuine. The PCGS number ending in .92 suggests Cleaned as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 11012 1876 AU50 NGC. NGC Census: (6/328). PCGS Population (14/406). Mintage: 455,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$250. (#7041)
- 11013 1876-S Improperly Cleaned NGC Details. AU. NGC Census: (15/577). PCGS Population (23/652). Mintage: 5,227,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$240. (#7043)
- 11014 1876-S—Improperly Cleaned—NGC Details. AU. NGC Census: (16/577). PCGS Population (23/653). Mintage: 5,227,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$240. (#7043)

- 11015 1876-S AU55 NGC. NGC Census: (38/531). PCGS Population (84/544). Mintage: 5,227,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$325. (#7043)
- 11016 1877 VF30 NGC. NGC Census: (6/367). PCGS Population (13/466). Mintage: 3,039,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$163. (#7044)
- 11017 1877-S—Chopmarked, Scratched—NGC Details. Unc. NGC Census: (37/624). PCGS Population (52/686). Mintage: 9,519,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$850. (#7046)
- 11018 1877-S—Stained—NGC Details. Unc. NGC Census: (37/624). PCGS Population (52/686). Mintage: 9,519,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$850. (#7046)
- 11019 1878-S—Surface Damage—PCGS Genuine.

#### MORGAN DOLLARS

- 11020 1878 8TF VF20 PCGS. Hot 50 VAM-14.5, Open Nostril. PCGS Population (1/8675). NGC Census: (0/6436). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$27. (#7072)
- 11021 1878 8TF XF40 PCGS. Top 100 Vam-9, 1st Die Pair. PCGS Population (15/8650). NGC Census: (19/6407). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$28. (#7072)
- 11022 1878 8TF AU50 PCGS. Vam-14.10, Cracked Bonnet. PCGS Population (30/8584). NGC Census: (31/6345). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$34. (#7072)
- 11023 1878 8TF AU55 PCGS. VAM-15, Doubled Liberty. A Top 100 Variety. PCGS Population (41/8518). NGC Census: (34/6277). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$38. (#7072)
- 11024 1878 8TF MS62 NGC. VAM-14.1. NGC Census: (1260/4544). PCGS Population (1737/6214). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$125. (#7072)
- 11025 1878 8TF MS62 NGC. Vam-14.2. NGC Census: (1260/4544). PCGS Population (1737/6219). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$125. (#7072)

- 11026 1878 8TF MS63 NGC. Vam-17. NGC Census: (2385/2169). PCGS Population (3432/2796). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)
- 11027 1878 8TF MS63 NGC. Vam-4. NGC Census: (2373/2171). PCGS Population (3432/2787). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)
- 11028 1878 8TF MS63 ANACS. Vam-2A, Super CD. NGC Census: (2385/2169). PCGS Population (3432/2796). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)
- 11029 1878 8TF MS63 NGC. Hot 50 Vam-14.4, Concave Reverse. NGC Census: (2385/2169). PCGS Population (3432/2796). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)
- 11030 1878 8TF MS63 PCGS. Vam-7, Tripled E. PCGS Population (3432/2796). NGC Census: (2385/2169). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)
- 11031 1878 8TF MS63 PCGS. Vam-14, Chip in Ear. PCGS Population (3432/2796). NGC Census: (2385/2169). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)
- 11032 1878 8TF MS63 PCGS. Vam-14.3, Doubled Bow. PCGS Population (3432/2796). NGC Census: (2385/2169). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)

- 11033 1878 8TF MS63 PCGS. Hot 50 Vam-8, Stick Feather. PCGS Population (3432/2796). NGC Census: (2385/2169). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)
- 11034 1878 8TF MS64 PCGS. PCGS Population (2278/504). NGC Census: (1828/343). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11035 1878 8TF MS64 PCGS. PCGS Population (2283/504). NGC Census: (1828/343). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11036 1878 8TF MS64 NGC. NGC Census: (1826/343). PCGS Population (2289/507). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11037 1878 8TF MS64 NGC. Vam-6. NGC Census: (1826/343). PCGS Population (2289/507). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11038 1878 8TF MS64 NGC. NGC Census: (1826/343). PCGS Population (2289/507). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11039 1878 8TF MS64 NGC. NGC Census: (1826/343). PCGS Population (2289/507). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11040 1878 8TF MS64 PCGS. Vam-10, Notched 7. PCGS Population (2289/507). NGC Census: (1826/343). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11041 1878 8TF MS64 PCGS. Vam-22, Polished LIB. PCGS Population (2289/507). NGC Census: (1826/343). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11042 1878 8TF MS64 PCGS. Vam-12, Notched Star. PCGS Population (2289/507). NGC Census: (1826/343). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7072)
- 11043 1878 7/8TF MS62 NGC. 7/4TF, Vam-33. NGC Census: (737/2405). PCGS Population (1036/3796). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$150. (#7078)

- 11044 1878 7/8TF Strong MS63 NGC. NGC Census: (1368/1037). PCGS Population (2246/1561). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)
- 11045 1878 7/8TF Strong MS63 NGC. NGC Census: (1368/1037). PCGS Population (2246/1561). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)
- 11046 1878 7/8TF Strong MS63 NGC. NGC Census: (1367/1037). PCGS Population (2233/1557). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)
- 11047 1878 7/8TF Strong MS64 PCGS. VAM-37 7/4. PCGS Population (1347/214). NGC Census: (946/91). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. (#7078)
- 11048 1878 7/8TF MS62 NGC. 7/4TF, Vam-37. NGC Census: (0/0). PCGS Population (481/1929). Mintage: 544,000. (#7070)

- 11049 1878 7/8TF Strong MS64 PCGS. VAM-38. 7/5. PCGS Population (29/7). NGC Census: (0/0). (#134035)
- 11050 1878 7TF Reverse of 1878 MS64 NGC. NGC Census: (3176/478). PCGS Population (2320/485). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$190. (#7074)
- 11051 1878 7TF Reverse of 1878 MS64 ANACS. VAM-83. NGC Census: (3175/475). PCGS Population (2331/479). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$190. (#7074)

- 11052 1878 7TF Reverse of 1878 MS64 NGC. NGC Census: (3175/475). PCGS Population (2331/479). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$190. (#7074)
- 11053 1878 7TF Reverse of 1878 MS64 PCGS. PCGS Population (2331/479). NGC Census: (3175/475). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$190. (#7074)

#### SACAGAWEA DOLLARS

- 11890 2000-P Sacagawea Presentation Piece SP68 PCGS. This presentation piece was presented to Glenna Goodacre on April 5, 2000. It is signed on the holder by Philip N. Diehl, the 35th U.S. Mint Director. Display box included.
- 11891 2000-P Goodacre MS67 PCGS. PCGS Population (1386/773). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$28. (#99584)

## PROOF SACAGAWEA DOLLARS

11892 2004-S PR69 Ultra Cameo NGC, 2004-S PR70 Ultra Cameo NGC, 2005-P MS66 Satin NGC, 2005-P MS68 Satin NGC, 2005-P MS68 Satin PCGS, 2005-D MS66 NGC, 2005-D MS68 NGC, 2005-S PR69 Ultra Cameo NGC and 2005-S PR70 Ultra Cameo NGC (Total: 9 coins)

#### **GOLD DOLLARS**

- 11893 1849 Small Head No L MS61 NGC. NGC Census: (38/246). PCGS Population (21/226). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$575. (#7501)
- 11894 1849 No L MS62 NGC. NGC Census: (77/169). PCGS Population (61/165). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$800. (#7501)
- 11895 1849 Closed Wreath MS62 NGC. NGC Census: (0/0). PCGS Population (30/115). (#7502)
- 11896 1849 Open Wreath MS63 PCGS. PCGS Population (247/234). NGC Census: (290/390). Mintage: 687,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,125. (#7502)
- 11897 1850-O MS61 NGC. NGC Census: (38/30). PCGS Population (4/11). Mintage: 14,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$2,950. (#7512)
- 11898 1851 AU58 ANACS. NGC Census: (409/3080). PCGS Population (317/1662). Mintage: 3,317,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$245. (#7513)
- 11899 1851-O—Cleaned—ANACS. AU50 Details. NGC Census: (12/721). PCGS Population (20/318). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$230. (#7516)

- 11900 1851-O AU58 NGC. NGC Census: (242/382). PCGS Population (53/168). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$290. (#7516)
- 11901 1852—Obverse Damage—NGC Details. AU. NGC Census: (8/3256). PCGS Population (51/1988). Mintage: 2,045,351. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$223. (#7517)
- 11902 1852 MS62 PCGS. PCGS Population (466/610). NGC Census: (1074/875). Mintage: 2,045,351. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$550. (#7517)
- 11903 1853 MS62 PCGS. PCGS Population (1219/1655). NGC Census: (2946/2249). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$550. (#7521)

- 11904 1853 MS63 NGC. NGC Census: (1191/1061). PCGS Population (916/738). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,125. (#7521)
- 11905 1853-O AU55 NGC. NGC Census: (63/1006). PCGS Population (96/364). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$255. (#7524)
- 11906 1853-O AU58 NGC. NGC Census: (320/684). PCGS Population (105/257). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$270. (#7524)
- 11907 1854 Type Two PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.

- 11908 1854 Type Two—Improperly Cleaned—NGC Details. AU. NGC Census: (190/4776). PCGS Population (355/2471). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$420. (#7531)
- 11909 1854 Type Two—Improperly Cleaned—NGC Details. AU. NGC Census: (190/4773). PCGS Population (355/2476). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$420. (#7531)
- 11910 1854 Type Two AU53 NGC. NGC Census: (275/4501). PCGS Population (279/2192). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$460. (#7531)
- 11911 1854 Type Two AU55 NGC. CAC. NGC Census: (853/3648). PCGS Population (544/1663). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$510. (#7531)
- 11912 1854 Type Two AU58 PCGS. PCGS Population (509/1147). NGC Census: (2120/1525). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$750. (#7531)
- 11913 1855 PCGS Genuine. The PCGS number ending in .92 suggests Cleaned as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 11914 1855—Cleaned, Struck on Scratched Blank—ANACS. XF45 Details. NGC Census: (164/4500). PCGS Population (241/2732). Mintage: 758,269. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$388. (#7532)
- 11915 1855 AU58 NGC. NGC Census: (1798/1392). PCGS Population (431/1194). Mintage: 758,269. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$765. (#7532)
- 11916 1855 AU58 NGC. NGC Census: (1800/1394). PCGS Population (431/1194). Mintage: 758,269. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$765. (#7532)
- 11917 1855—Improperly Cleaned—NGC Details. Unc. NGC Census: (63/1330). PCGS Population (34/1154). Mintage: 758,269. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,400. (#7532)

- 11918 1856 Slanted 5 MS62 NGC. NGC Census: (442/266). PCGS Population (176/258). Mintage: 1,762,936. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$550. (#7540)
- 11919 1857 MS63 PCGS. PCGS Population (92/63). NGC Census: (79/53). Mintage: 774,789. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$925. (#7544)
- 11920 1857-C—Mount Removed—NGC Details. AU. NGC Census: (0/0). PCGS Population (0/0). Mintage: 13,200. (#7545)
- 11921 1860-S -Bent- NGC Details. AU. NGC Census: (8/122). PCGS Population (9/70). Mintage: 13,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$565. (#7557)
- 11922 1861 AU55 ANACS. NGC Census: (30/1109). PCGS Population (79/876). Mintage: 527,499. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$250. (#7558)
- 11923 1870—Improperly Cleaned—NGC Details. Unc. NGC Census: (1/89). PCGS Population (3/76). Mintage: 6,335. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$850. (#7569)
- 11924 1872 AU50 PCGS. PCGS Population (8/69). NGC Census: (1/54). Mintage: 3,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$483. (#7572)
- 11925 1873 Closed 3 AU55 ANACS. NGC Census: (6/76). PCGS Population (8/57). Mintage: 1,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$925. (#7574)
- 11926 1874 PCGS Genuine. The PCGS number ending in .92 suggests Cleaned as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 11927 1874 MS61 NGC. NGC Census: (537/2511). PCGS Population (307/2213). Mintage: 198,820. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$530. (#7575)
  From The Michael A. Tongg Collection.
- 11928 1885 AU58 NGC. NGC Census: (14/375). PCGS Population (22/352). Mintage: 11,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$300. (#7586)

- 11929 1887 MS62 NGC. NGC Census: (74/323). PCGS Population (86/398). Mintage: 7,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$550. (#7588)
- 11930 1887 MS62 NGC. NGC Census: (74/323). PCGS Population (86/398). Mintage: 7,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$550. (#7588)

# CLASSIC QUARTER EAGLES

- 11931 1834 Classic XF45 NGC. NGC Census: (56/821). PCGS Population (81/473). Mintage: 112,234. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$773. (#7692)
- 11932 1838 XF45 NGC. NGC Census: (27/197). PCGS Population (19/94). Mintage: 47,030. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$808. (#7696)
- 11933 1839 AU50 NGC. NGC Census: (9/48). PCGS Population (12/33). Mintage: 27,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,950. (#7698)

# LIBERTY QUARTER EAGLES

- 11934 1843-D Small D Good 4 NGC. NGC Census: (1/257). PCGS Population (0/232). Mintage: 36,200. (#7730)
- 11935 1843-O Small Date, Crosslet 4 XF45 NGC. NGC Census: (93/467). PCGS Population (55/146). Mintage: 288,002. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$312. (#7731)
- 11936 1843-O Small Date, Crosslet 4 AU53 NGC. NGC Census: (67/348). PCGS Population (20/89). Mintage: 288,002. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$360. (#7731)
- 11937 1845—Cleaned—ANACS. XF40
  Details. NGC Census: (5/221). PCGS
  Population (13/105). Mintage: 91,051.
  Numismedia Wsl. Price for problem
  free NGC/PCGS coin in XF40: \$305.
  (#7737)
- 11938 1846-O—Cleaned—ANACS. AU50 Details. NGC Census: (21/173). PCGS Population (11/54). Mintage: 62,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$750. (#7743)
- 11939 1847 XF40 PCGS. PCGS Population (6/52). NGC Census: (4/118). Mintage: 29,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$460. (#7744)
- 11940 1849 XF40 ANACS. NGC Census: (5/130). PCGS Population (20/52). Mintage: 23,294. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$425. (#7752)
- 11941 1850-C—Scratched—NGC Details. XF. NGC Census: (4/107). PCGS Population (14/66). Mintage: 9,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,750. (#7756)
- 11942 1851 MS62 NGC. NGC Census: (149/106). PCGS Population (76/81). Mintage: 1,372,748. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$740. (#7759)
- 11943 1851-O XF45 NGC. NGC Census: (52/339). PCGS Population (43/77). Mintage: 148,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$455. (#7762)
- 11944 1852 MS62 NGC. NGC Census: (217/126). PCGS Population (99/110). Mintage: 1,159,681. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$740. (#7763)
  From The Michael A. Tongg Collection.
- 11945 1853 —Obverse Struck Thru—XF45 NGC. NGC Census: (14/1151). PCGS Population (34/743). Mintage: 1,404,668. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$307. (#7767)

- 11946 1853 AU55 NGC. NGC Census: (66/1062). PCGS Population (109/544). Mintage: 1,404,668. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$320. (#7767)
- 11947 1854 AU58 NGC. NGC Census: (181/306). PCGS Population (52/129). Mintage: 596,258. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$330. (#7769)
- 11948 1856 CTSP "Everman" AU58 NGC. CTSP on both sides. NGC Census: (160/302). PCGS Population (60/162). Mintage: 384,240. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$330. (#7777)
- 11949 1857 AU58 NGC. NGC Census: (123/218). PCGS Population (32/106). Mintage: 214,130. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$340. (#7782)
- 11950 1859 Old Reverse, Type One AU55 NGC. NGC Census: (12/85). PCGS Population (19/18). (#97788)
- 11951 1859-S -Improperly Cleaned- NGC Details. XF. NGC Census: (7/89). PCGS Population (7/38). Mintage: 15,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,025. (#7790)
- 11952 1861 New Reverse, Type Two MS61 NGC. NGC Census: (342/606). PCGS Population (95/437). Mintage: 1,283,878. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$850. (#7794)
- 11953 1861-S -Obverse Scratched- NGC Details. XF. NGC Census: (11/61). PCGS Population (5/41). Mintage: 24,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,250. (#7795)
- 11954 1862/1—Holed—NGC Details. AU. NGC Census: (2/44). PCGS Population (5/15). Mintage: 98,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,800. (#7797)
- 11955 1866-S—Improperly Cleaned—NGC Details. VF. NGC Census: (2/166). PCGS Population (2/117). Mintage: 38,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#7804)
- 11956 1867-S PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 11957 1867-S—Damaged—ANACS. VF20 Details. NGC Census: (3/150). PCGS Population (4/91). Mintage: 28,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$300. (#7806)
- 11958 1869-S AU53 NGC. NGC Census: (18/105). PCGS Population (10/42). Mintage: 29,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$900. (#7810)

- 11959 1872-8 XF40 PCGS. PCGS Population (17/75). NGC Census: (13/148). Mintage: 18,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$475. (#7816)
- 11960 1873 Closed 3 MS62 PCGS. PCGS Population (65/115). NGC Census: (121/92). Mintage: 55,225. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$740. (#7818)
- 11961 1873-S VF30 NGC. NGC Census: (7/231). PCGS Population (4/124). Mintage: 27,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$310. (#7820)

- 11962 1878 MS63 PCGS. PCGS Population (258/168). NGC Census: (245/181). Mintage: 286,260. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$925. (#7828)
- 11963 1878-S MS62 NGC. NGC Census: (114/63). PCGS Population (60/44). Mintage: 178,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$740. (#7829)
  From The Michael A. Tongg Collection.
- 11964 1879 MS62 NGC. NGC Census: (237/146). PCGS Population (129/159). Mintage: 88,990. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$740. (#7830)
- 11965 1889 MS62 NGC. NGC Census: (86/107). PCGS Population (73/100). Mintage: 17,648. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$740. (#7841)
- 11966 1890 AU55 NGC. NGC Census: (4/182). PCGS Population (24/166). Mintage: 8,720. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$325. (#7842)
- 11967 1894 MS61 NGC. NGC Census: (40/121). PCGS Population (23/110). Mintage: 4,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$725. (#7846)

- 11968 1900 MS63 NGC. NGC Census: (373/707). PCGS Population (412/601). Mintage: 67,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$925. (#7852) From The Orchid Collection.
- 11969 1901 —Struck Through Obverse at 12:00— MS63 PCGS. (#7853)
- 11970 1902 MS63 NGC. NGC Census: (626/1119). PCGS Population (854/1135). Mintage: 133,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$925. (#7854)
  From The Orchid Collection.
- 11971 1903 MS64 PCGS. PCGS Population (1185/845). NGC Census: (1170/930). Mintage: 201,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$975. (#7855)
- 11972 1904—Improperly Cleaned—NGC Details. Unc. NGC Census: (40/3624). PCGS Population (61/3497). Mintage: 160,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$500. (#7856)
- 11973 1904—Improperly Cleaned—NGC Details. Unc. NGC Census: (40/3629). PCGS Population (61/3502). Mintage: 160,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$500. (#7856)
- 11974 1906—Improperly Cleaned—NGC Details. Unc. NGC Census: (30/4420). PCGS Population (105/4410). Mintage: 176,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$500. (#7858)

# INDIAN QUARTER EAGLES

- 11975 1908 AU58 NGC. NGC Census: (908/6812). PCGS Population (510/4695). Mintage: 564,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$325. (#7939)
- 11976 1908—Improperly Cleaned—NGC Details. Unc. NGC Census: (68/6744). PCGS Population (69/4626). Mintage: 564,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$350. (#7939)

- 12913 1883 Hawaii Half Dollar—Polished—NGC Details. AU. NGC Census: (23/258). PCGS Population (52/337). Mintage: 700,000. (#10991) From The Michael A. Tongg Collection.
- 12914 1883 Hawaii Half Dollar AU58 NGC. NGC Census: (53/148). PCGS Population (41/210). Mintage: 700,000. (#10991) From The Michael A. Tongg Collection.
- 12915 1883 Hawaii Dollar—Improperly Cleaned—NGC Details. VF. NGC Census: (2/288). PCGS Population (1/558). Mintage: 500,000. (#10995)

- 12916 1883 Hawaii Dollar—Cleaned, Corroded—ANACS. AU50 Details. NGC Census: (21/148). PCGS Population (56/187). Mintage: 500,000. (#10995)
- 12917 1883 Hawaii Dollar—Whizzed—NGC Details. AU. NGC Census: (21/148). PCGS Population (56/187). Mintage: 500,000. (#10995)
  From The Michael A. Tongg Collection.
- 12918 1883 Hawaii Dollar—Improperly Cleaned—NGC Details. AU. NGC Census: (21/148). PCGS Population (56/187). Mintage: 500,000. (#10995) From The Michael A. Tongg Collection.
- 12919 1883 Hawaii Dollar—Improperly Cleaned—NGC Details. AU. NGC Census: (21/148). PCGS Population (56/187). Mintage: 500,000. (#10995) From The Michael A. Tongg Collection.
- 12920 1883 Hawaii Dollar—Cleaned— ANACS. AU53 Details. NGC Census: (13/135). PCGS Population (25/162). Mintage: 500,000. (#10995)

#### **ERRORS**

- 12921 No Date Cent—35% Off Center—PCGS Genuine. The PCGS number ending in .91 suggests Questionable/Artificial Toning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.
- 12922 1891 Indian Cent—Double Struck 2nd Strike 90% Off Center—Fine 12 PCGS.
- 12923 197X-S Lincoln Cent—Triple Struck, All Strikes Off Center—MS62 Red and Brown NGC.
- 12924 1970-D Lincoln Cent—Struck on a 10C Blank Planchet, 2.25 Grams— MS64 NGC.
- 12925 No Date Buffalo Nickel—Split Planchet Reverse Only—VG10 PCGS.
- 12926 1916 Buffalo Nickel—Clamshell Lamination—VG8 NGC.
- 12927 1935 Buffalo Nickel—Double Curved Clips—AU55 NGC. From The Jack Stickel Collection.
- 12928 1944-P Coin #1-100% Split Planchet-VF35 PCGS and Coin #2-100% Split Planchet-VF35 PCGS. (Total: 2)
- 12929 1970 Roosevelt Dime -Aluminum Scrap, Cut in Half-ANACS. Unc Details. Net AU50.
- 12930 No Date Washington Quarter—47% Double Clip Plan—MS64 PCGS.
- 12931 No Date-D Washington Quarter— Struck on Silver 10C Planchet—MS62 PCGS.

12932 1967 Washington Quarter—Struck on 5C Planchet—AU58 PCGS.

- 12933 2001-S Rhode Island Silver Quarter— Double Struck in Collar—PR67 Deep Cameo PCGS.
- 12934 1964 Kennedy Half—Stk on 16% Roll. Thin Pln—MS63 PCGS.
- 12935 1921 Morgan Dollar -Curved Clip at 8:00- AU53 NGC.
- 12936 2001 P Sacagawea—US Mint Experimental Rinse, Anti-Tarnishing Agent—MS67 PCGS.
- 12937 (2007) John Adams Dollar—Missing Edge Lettering— MS64 NGC.
- 12938 2008-P SMS Andrew Jackson Dollar— Missing Edge Lettering—MS67 NGC.
- 12939 (2010) James Buchanan—Missing Edge Lettering—MS67 PCGS.
- 12940 1923 Double Eagle -Reverse Struck Thru- MS62 NGC.

#### SO-CALLED DOLLARS

- 12941 1892-3 World Globe Dollar, World's Columbian Expo MS62 NGC. IL HK-174, Eglit-9.
- 12942 1901 Gilt Pan-American Exposition Official Medal MS67 NGC. NY HK-289. Included with the lot is a custom Capitol holder. From The Dr. Donald M. Gilner Collection.
- 12943 1904 Louisiana Purchase Exposition Official Medal MS65 NGC. MO HK-302.
- 12944 1915 Silver Panama-Pacific Exposition Official Medal MS63 NGC. CA HK-399. Also included are the original envelope for the medal in a custom Capitol holder, and an original envelope for a Panama-Pacific half dollar. From The Dr. Donald M. Gilner Collection. (Total: 3 items)
- 12945 1896 Uniface Gorham Bryan Dollar MS62 NGC. HK-781, S-7.
- 12946 1933 Pedley-Ryan Dollar AU55 NGC. CO HK-825. Misattributed as HK-824 by NGC.
- 12947 1933 Pedley-Ryan Dollar AU55 NGC. HK-825.
- 12948 1933 Pedley-Ryan Dollar AU58 NGC. HK-825.
- 12949 (1962) Bashlow Bronze Restrike Continental Dollar MS65 Red and Brown NGC. HK-853A.
- 12950 (1962) Bashlow Goldine Restrike Continental Dollar MS65 NGC. HK-856A.

End of Auction

for the Intelligent Collector

HERITAGE

**HERITAGE** 

IF YOU LIKE WHAT YOU SEE IN THE FIRST FREE ISSUE, YOU'LL GET ANOTHER YEAR FOR ONLY \$21

— a total savings of \$18.90 off the newsstand price

THE AWARD-WINNING MAGAZINE FOR THE WORLD'S MOST PASSIONATE COLLECTORS

2010 Numismatic Literary Guild - Best Dealer Publication 2010 Maggie Award Finalist for Editorial Excellence

1770 Pillar Dollar

With each issue, Heritage Magazine for the Intelligent Collector gives readers priceless insights into the vintage collectibles and fine art that matter most to the world's most passionate collectors.

# INSIGHTFUL INTERVIEWS & FEATURES

Each issue includes exclusive interviews with world-class collectors who share their wisdom and knowledge about collecting.

#### **FULL-COLOR PHOTOGRAPHY**

Eye-popping photography gives you a detailed look at the world's top collectibles and fine art. A *Free Pull-Out Poster* is included in each issue.

#### **COLUMNS BY TOP EXPERTS**

Some of the top collecting experts tackle topics such as intelligent collecting, trusts and estates, and collecting with kids, and focus on specific categories such as coins, fine and rare wines, vintage jewelry and comics and comic art.

#### **AUCTION PREVIEWS & PRICES REALIZED**

Get a sneak peek at upcoming blockbuster auctions, in addition to prices realized for some of the world's most sought-after treasures.

#### **COLLECTING CATEGORIES COVERED**

Decorative arts, fine art, illustration art, Texas art, U.S. coins, world and ancient coins, comics and comic art, currency, entertainment memorabilia, American Indian art, Americana and political, rare books, Civil War, manuscripts, natural history, photography, space exploration, jewelry and timepieces, movie posters, pop culture, sports collectibles, fine and rare wine, silver and vertu.

#### **SEND NO MONEY**

You will receive an invoice for a full year (3 additional issues) for only \$21.

If you're not thrilled, write "cancel" on your invoice, return it and owe nothing. The Free Sample Issue is yours to keep.

Order a two-year subscription (6 issues plus your Free Bonus Issue) for \$36 and save even more.

#### Terms and Conditions of Auction

#### Auctioneer and Auction:

1. This Auction is presented by Heritage Auction Galleries, a d/b/a/ of Heritage Auctions, Inc., or its affiliates Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

#### Buver's Premium:

2. Ón bids placed through Auctioneer, a Buyer's Premium of fifteen percent (15%) will be added to the successful hammer price bid on lots in Coin, Currency, and Philatelic auctions or nineteen and onehalf percent (19.5%) on lots in all other auctions. There is a minimum Buyer's Premium of \$14.00 per lot. In Gallery Auctions (sealed bid auctions of mostly bulk numismatic material), the Buyer's Premium is 19.5%.

#### Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books and Vintage Movie Poster); Heritage Monthly Internet Auctions (Sports and Rare Wine). Signature\* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; Heritage Live and real-time telephone bidding are available to registered clients during these auctions.

#### Bidders:

- 4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- 5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

#### Credit:

7. Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) well in advance of the Auction or supply valid credit card information. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders; Bidders who are not members of HA.com or affiliates should pre-register at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit may be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof to us so a credit check may be performed prior to Auctioneer's acceptance of a bid.

#### **Bidding Options:**

- Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
- the alternatives on HA.com. Review at HA.com/common/howtobid.php.

  9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- 10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- 11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

Current Bid	Bid Increment	Current BidBid Incre	men
<\$10			
\$10 - \$29		\$30,000 - \$49,999\$2,500	
\$30 - \$49	\$3	\$50,000 - \$99,999\$5,000	
\$50 - \$99	\$5	\$100,000 - \$199,999\$10,000	
\$100 - \$199	\$10	\$200,000 - \$299,999\$20,000	
\$200 - \$299	\$20	\$300,000 - \$499,999\$25,000	
\$300 - \$499	\$25	\$500,000 - \$999,999\$50,000	
\$500 - \$999	\$50	\$1,000,000 - \$1,999,999 \$100,000	
\$1,000 - \$1,999	\$100	\$2,000,000 - \$2,999,999 \$200,000	
\$2,000 - \$2,999	\$200	\$3,000,000 - \$4,999,999 \$250,000	
\$3,000 - \$4,999	\$250	\$5,000,000 - \$9,999,999 \$500,000	
\$5,000 - \$9,999	\$500	>\$10,000,000\$1,000,000	0
\$10,000 - \$19,999	\$1,000		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature\* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

#### Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid" THE CONSIGNOR

- MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
- 14. The highest qualified Bidder recognized by the Auctioneer shall be the buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
- 15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
- 16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
- 17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
- 18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- 19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
- 20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
- 21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- 22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

#### Payment:

- 23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, all subject to reporting requirements). All are subject to clearing and funds being received In Auctioneer's account before delivery of the purchases. Auctioneer reserves the right to determine if a check constitutes "good funds" when drawn on a U.S. bank for ten days, and thirty days when drawn on an international bank. Credit Card (Visa or Master Card only) and PayPal payments may be accepted up to \$10,000 from non-dealers at the sole discretion of the Auctioneer, subject to the following limitations: a) sales are only to the cardholder, b) purchases are shipped to the cardholder's registered and verified address, c) Auctioneer may pre-approve the cardholder's credit line, d) a credit card transaction may not be used in conjunction with any other financing or extended terms offered by the Auctioneer, and must transact immediately upon invoice presentation, e) rights of return are governed by these Terms and Conditions, which supersede those conditions promulgated by the card issuer, f) floor Bidders must present their card.
- 24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
- 25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and in Texas on invoices under \$1000. Check the Web site at: http://coins.ha.com/c/ref/sales-tax.zx for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- 26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
- 27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
- 28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
- Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.

#### Terms and Conditions of Auction

- 30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
- 31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

#### Delivery; Shipping; and Handling Charges:

- 32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs.
- 33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
- 34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
- 35. Due to the nature of some items sold, it shall be the responsibility for the successful bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtleshell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.
- 37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

#### Cataloging, Warranties and Disclaimers:

- 38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
- 39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
- 40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
- 41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
  42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects,
- 42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

#### Release

- 43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
- 44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

#### Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

- 46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, In such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
- 47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
- 48. Dispute Resolution for Consumers and Non-Consumers: Any claim, dispute, or controversy in connection with, relating to and /or arising out of the Auction, participation in the Auction. Award of lots, damages of claims to lots, descriptions, condition reports, provenance, estimates, return and warranty rights, any interpretation of these Terms and Conditions, any alleged verbal modification of these Terms and Conditions and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation shall or any other matter: a) if presented by a consumer, be exclusively heard by, and the parties consent to, exclusive in personam jurisdiction in the State District Courts of Dallas County, Texas. THE PARTIES EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY. Any appeals shall be solely pursued in the appellate courts of the State of Texas; or b) for any claimant other than a consumer, the claim shall be presented in confidential binding arbitration before a single arbitrator, that the parties may agree upon, selected from the JAMS list of Texas arbitrators. The case is not to be administrated by JAMS; however, if the parties cannot agree on an arbitrator, then JAMS shall appoint the arbitrator and it shall be conducted under JAMS rules. The locale shall be Dallas Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. Any party on any claim involving the purchase or sale of numismatic or related items may elect arbitration through binding PNG arbitration. Any claim must be brought within one (1) year of the alleged breach, default or misrepresentation or the claim is waived. This agreement and any claims shall be determined and construed under Texas law. The prevailing party (party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorneys' fees and costs
- 49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
- 50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
  51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery
- 51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

#### Aiscellaneou:

- 52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
- 53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
- 54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

#### State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auction Galleries, Inc. #41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of Heritage Numismatic Auctions, Inc. (for Coins and Currency) and Heritage Auction Galleries Inc. (for other items). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

#### Terms and Conditions of Auction

#### Additional Terms & Conditions: COINS & CURRENCY

- COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.
- COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege. You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.
- COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.
- COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.
- COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.
- COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

- COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.
- COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.
- COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.
- COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.
- COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.
- COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.
- COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.
- COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

For wiring instructions call the Credit department at 1-800-872-6467 or e-mail: CreditDept@HA.com

#### **New York State Auctions Only**

These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auction Galleries, Inc. #41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of Heritage Numismatic Auctions, Inc. (for Coins and Currency) and Heritage Auction Galleries Inc. (for other items). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

# Why Heritage Exists: Our Mission & Our Values

Collecting valuable objects uniquely rewards owners with beauty, history, personal satisfaction, and much more. Unfortunately new collectors often overpay and become disillusioned, while inexperienced owners and heirs routinely receive too little when selling. For collecting to become a more credible and widespread vehicle for wealth creation, the playing field between experts and novices must be leveled.

At Heritage Auctions, we believe information can and should be available to all, transactions made more transparent, trading friction reduced and the learning curve made less steep and less expensive for new collectors and sellers. Therefore...

# Our Mission:

is to be the world's most trusted and efficient marketplace and information resource for owners of fine art, jewels, rare collectibles, and other precious objects.

# Our Values:

**Integrity** - Honesty and fairness must define every facet of our business.

**Transparency** - We embrace clarity and openness, enabling clients, partners and coworkers to make informed, confident decisions.

**Expertise** - Our success depends upon providing clients with the best possible advice.

Efficiency - We focus on helping clients, partners and coworkers save valuable time and resources.

nnovation - We continually make our services more accessible and useful.

Long-Term Perspective - We strive to carefully construct only sustainable, win-win agreements with clients and partners.

## **Explore the Possibilities**

Now accepting consignments to our spring Fine & Rare Wine auction. Send in your list for a free evaluation.
